REILLY, THOMAS À K., O.P., S.T.D., S.S.L., Professor of Sacred Scripture, Dominican House of Studies, Washington: Tongues, Gift of.

REVILLE, JOHN CLEMENT, S.J., Professor of Rhetoric and Sacred Eloquence, St. Stanislaus College, Macon, Georgia: Taion, Nicolas; Tornielli, Girolamo Francesco.

ROBINSON, DOANE, Secretary, South Dakota Department of History, Pierre, South Dakota: South Dakota.

ROBINSON, PASCHAL, O.F.M., New York: Spina, Alfonso de.

RODRIGUEZ MOURE, JOSE, LL.D., J.U.D., Teneriffe, Canary Islands: Teneriffe, Diocese of.

ROMPEL, JOSEF HEINRICH, S.J., Ph.D., Stella Matutina College, Feldkirch, Austria: Tournefort, Joseph Pitton de.

RYAN, JOHN A., S.T.D., Professor of Moral Theology, St. Paul Seminary, St. Paul, Minnesota: Socialistic Communities.

RYAN, PATRICK, S.J., London: Thomas Alfield, Venerable; Thomas Cottam, Blessed.

SACHER, HERMANN, Ph.D., Editor of the "Konversationslexikon", Assistant Editor, "Staatslexikon" of the Görresgesellschaft, Freiburg-im-Breisgau, Germany: Styria; Thuringia.

SALDANHA, JOSEPH LOUIS, B.A., Editor, "The Christian Puranna"; Professor of English, St. Aloysius College, Mangalore, India: Stephens, Thomas.

SANDS, HON. WILLIAM FRANKLIN, Chevalier of the Legion of Honour; Ex-Envoy Extraordinary and Minister Plenipotentiary of the United States to Guatemala; Member:

---

* Deceased.

of the Am. Soc. International Law; Am. Academy Political and Social Science and the Mexican Soc. of Geography and Statistics, New York: Tahiti, Vicariate Apostolic of.

SCHEID, N., S.J., Stella Matutina College, Feldkirch, Austria: Spillmann, Joseph; Stifter, Adalbert.

SCHLAGER, HEINRICH PATRICIUS, O.F.M., St. Ludwig's College, Dalheim, Germany: Sonnius, Franciscus; Thangmar; Thegan of Treves; Thurmayr, Johannes.

SCHMID, ULRICH, Ph.D., Editor, "Walhalla", Munich: Tegernsee.

SCHNÜRER, GUSTAV, Ph.D., Professor of Medieval and Modern History, University of Fribourg: States of the Church.

SCHÜHLEIN, FRANZ X., Professor in the Gymnasium of Freising, Bavaria, Germany: Talmud; Targum; Torah; Tosephta.

SCHUYLER, HENRY C., S.T.L., Vice-Rector, Catholic High School, Philadelphia, Pennsylvania: Steinmeyer, Ferdinand.

SCULLY, JOHN, S.J., New York: Squiers, Herbert Goldsmith.

SCULLY, VINCENT JOSEPH, C.R.L., St. Ives, Cornwall, England: Thomas à Kempis; Thomas of Jesus.

SENFELDER, LEOPOLD, M.D., Teacher of the History of Medicine, University of Vienna: Skoda, Josef; Sorbait, Paul de.

SHAHAN, MGR. THOMAS J., S.T.D., J.U.D., Rector of the Catholic University of America, Washington: Thomas Abel, Blessed.

SHANLEY, WALTER J., LL.D., Danbury, Connecticut: Temperance Movements in the United States and Canada.

SHIPMAN, ANDREW J., M.A., LL.M., New York: Slavonic Language and Liturgy; Slavs in America.

SILVA COTAPOS, CARLOS, Canon of the Cathedral of Santiago, Chile: Tarapacá, Vicariate Apostolic of.

SINKMAJER, JOS., East Islip, New York: Strahov, Abbey of.

SLATER, T., S.J., St. Francis Xavier's College, Liverpool, England: Speculation; Sunday; Synderesis.

SLOANE, THOMAS O'CONOR, M.A., E.M., Ph.D., New York: Thénard, Louis-Jacques, Baron.

SMITH, IGNATIUS, O.P., Dominican House of Studies, Washington: Thomas of Jorz.

SMITH, WALTER GEORGE, M.A., LL.B., (U. of P.), Philadelphia, Pennsylvania: Smith, Thomas Kilby.

SOLLIER, JOSEPH FRANCIS, S.M., S.T.D., Provincial of the American Province of the Society of Mary, Washington: Supernatural Order; Theophilanthropists.

SORTAIS, GASTON, S.J., Associate Editor, "Etudes", Paris: Tintoretto, Il.

SOUVAY, CHARLES L., C.M., S.T.D., Ph.D., S.S.D., Professor, Sacred Scripture, Hebrew and Liturgy, Kenrick Seminary, St. Louis: Stephen, Saint; Stones, Precious, in the Bible; Tabernacle in Scripture; Tabernacles, Feast of.

SPAHN, MARTIN, Ph.D., Professor of Modern History, University of Strasburg: Thirty Years War, The; Tilly, Johannes Tserclæs, Count of.

SPILLANE, EDWARD P., S.J., Associate Editor, "America", New York: Thimelby, Richard.

STEELE, FRANCESCA M., Stroud, Gloucestershire, England: Taylor, Frances Margaret; Temple, Sisters of the.

STEICHEN, MICHAEL, Missionary Apostolic, Tokio, Japan: Tokio, Archdiocese of.

STREICHER, FRIEDRICH, S.J., Stella Matutina College, Feldkirch, Austria: Toscanelli, Paolo dal Pozzo.

STUART, JANET, R.S.H., Superior Vicar, Convent of the Sacred Heart, Roehampton, London: Society of the Sacred Heart of Jesus, The.

TARNOWSKI, COUNT STANISLAUS, President, Imperial Academy of Sciences, Professor, Polish Literature, University of Cracow: Skarga, Peter; Sobieski, John; Starowolski, Simon; Szujski, Joseph; Szymonowicz, Simon.

TAVERNIER, EUGENE, Paris: Soloviev, Vladimir.

TETU, MGR HENRI, Quebec, Canada: Taschereau, Elzéar-Alexandre.

THURSTON, HERBERT, S.J., London: Southwell, Robert, Venerable; Stone, Corner or Foundation; Stylites; Symbolism; Tenebræ; Thanksgiving before and after Meals; Theatre, The; Thomas, Saint, the Apostle; Thomas Becket, Saint; Toleration, History of.

TOKE, LESLIE ALEXANDER ST. LAURENCE, B.A., Stratton-on-the-Fosse, Bath, England: Socialism.

TURNER, MGR. JAMES P., S.T.D., Philadelphia, Pennsylvania: Tabernacle Society.

TURNER, WILLIAM, B.A., S.T.D., Professor of Logic and the History of Philosophy, Catholic University of America, Washington: Socrates; Sophists; Summæ; Sylvester, Bernard; Telesio, Bernardino; Theodore of Gaza; Theodoric of Chartres; Thomas of Strasburg.

TYNE, THOMAS JAMES, Nashville, Tennessee: Tennessee.

VACCON. A., Amiens, France: Tarisel, Pierre.

VAILHÉ, SIMÉON, A.A., Member of the Russian Archæological Institute of Constantinople, Rome: Sinope; Siunia; Smyrna, Latin Archdiocese of; Sophene; Sozusa; Sparta; Stauropolis; Syra, Diocese of; Tanis; Tarsus; Tenedos; Tentyris; Teos; Terenuthis; Termessus; Thasos; Thebes (Achaia Secunda); Thebes (Thebais Secunda); Thelepte; Themiscyra; Thennesus; Theodosiopolis; Thera, Diocese of; Thermopylæ; Thessalonica; Theveste; Thugga; Thyatira; Thynias; Tiberias; Ticelia; Tinos and Mykonos; Tipasa; Titopolis; Tius; Tomi.

VAN DER HEEREN, ACHILLE, S.T.L. (Louvain), Professor of Moral Theology and Librarian, Grande Séminaire, Bruges, Belgium: Suicide.

VAN ORTROY, FRANCIS, S.J., Brussels: Stanislas Kostka, Saint.

VASCHALDE, A.A., C.S.B., Catholic University of America, Washington: Tell el-Amarna Tablets, The.

WAINEWRIGHT, JOHN BANNERMAN, B.A. (Oxon.), London: Slythurst, Thomas; Snow, Peter, Venerable; Somerset, Thomas; Southerne, William, Venerable; Southworth, John, Venerable; Speed, John, Venerable; Spenser, William, Venerable; Sprott, Thomas, Venerable; Stonnes, James; Stransham, Edward, Venerable; Sugar, John, Venerable; Sutton, Robert, Venerable; Talbot, John; Taylor, Hugh, Venerable; Teilo, Saint; Teresian Martyrs of Compiègne, The Sixteen Blessed; Thomas Ford, Blessed; Thomas Johnson, Blessed; Thomas of Dover; Thomas Woodhouse, Blessed; Thorpe, Robert, Venerable; Thulis, John, Venerable; Tichborne, Nicholas, Venerable.

WALLAU, HEINRICH WILHELM, Mainz, Germany: Speyer, Johann and Wendelin von; Sweynheim, Konrad.

WALSH, JAMES A., Missionary Apostolic, Director of the Catholic Foreign Missionary Society of America, Hawthorne, New York: Théophane Vénard, Blessed.

WALSH, JAMES J., M.D., Ph.D., LL.D., D.Sc., Dean of the Medical School, Fordham University, New York: Spallanzani, Lazzaro.

WALTER, ALOYSIUS, C.SS.R., Rome: Steffani, Agostino.

WARD, MGR. BERNARD, Canon of Westminster, F. R. Hist. Soc., President, St. Edmund's College, Ware, England: Talbot, James; Taunton, Ethelred.

WARICHEZ, JOSEPH, Docteur en sciences morales et historiques, Archivist of the Diocese of Tournai, Belgium: Tournai, Diocese of.

WEBER, N. A., S.M., S.T.D., Professor of Church History, Marist College, Washington: Simony; Sirleto, Guglielmo; Sirmond, Jacques; Sixtus III, Saint, Pope; Smalkaldic League; Sophronius, Saint; Suger, Abbot of St. Denis; Sully, Maurice de; Sulpicius Severus; Swedenborgians.

WEBSTER, D. RAYMOND, O.S.B., M.A. (Oxon.), Downside Abbey, Bath, England: Stephen of Muret, Saint; Swithin, Saint; Sylvester Gozzolini, Saint; Sylvestrines.

WELD-BLUNDELL, EDWARD BENEDICT, O.S.B., Stanbrook, England: Stanbrook Abbey.

WHITFIELD, JOSEPH LOUIS, M.A. (Cantab.), Oscott College, Birmingham, England: Sykes, Edmund; Talbot, Thomas Joseph; Thomas Sherwood, Blessed; Thwing, Thomas, Venerable.

WILHELM, JOSEPH, S.T.D., Ph.D., Aachen, Germany: Superstition.

WILLIAMSON, GEORGE CHARLES, Litt.D., London: Sodoma; Stanfield, William Clarkson; Teniers, David; Theotocopuli, Domenico; Tibaldi, Pellegrino; Tiepolo, Giovanni Battista; Torbido, Francesco.

WITTMANN, PIUS, Archivist for the Princes and Counts of the House of Ysenburg-Büdingen; Royal Bavarian Archivist, Büdingen, Germany: Snorri Sturluson; Stolberg, Friedrich Leopold, Count zu; Sweden.

WOLFSGRUBER, COELESTINE, O.S.B., Vienna: Spalato-Macarsca, Diocese of; Tarnow, Diocese of; Thugut, Johann Amadeus; Franz de Paula; Thun Hohenstein, Count Leo.

WÖRNDLE VON ADELSFRIED, HEINRICH, Innsbruck, Austria: Speckbacher, Josef.

ZIMMERMAN, BENEDICT, O.D.C., St. Luke's Priory, Wincanton, Somersetshire, England: Teresa of Jesus, Saint; Third Order of Our Lady of Mount Carmel; Thomas à Jesu.

ZUPAN, CYRIL, O.S.B., Pueblo, Colorado: Slomsek, Anton Martin.

Tables of Abbreviations

The following tables and notes are intended to guide readers of THE CATHOLIC ENCYCLOPEDIA in interpreting those abbreviations, signs, or technical phrases which, for economy of space, will be most frequently used in the work. For more general information see the article ABBREVIATIONS, ECCLESIASTICAL.

I.—GENERAL ABBREVIATIONS.

a.	article.
ad an.	at the year (Lat. *ad annum*).
an., ann.	the year, the years (Lat. *annus*, *anni*).
ap.	in (Lat. *apud*).
art.	article.
Assyr.	Assyrian.
A. S.	Anglo-Saxon.
A. V.	Authorized Version (i.e. tr. of the Bible authorized for use in the Anglican Church—the so-called "King James", *or* "Protestant Bible").
b.	born.
Bk.	Book.
Bl.	Blessed.
C., c.	about (Lat. *circa*); canon; chapter; *compagnie*.
can.	canon.
cap.	chapter (Lat. *caput*—used only in Latin context).
cf.	compare (Lat. *confer*).
cod.	codex.
col.	column.
concl.	conclusion.
const., constit.	Lat. *constitutio*.
curâ.	by the industry of.
d.	died.
dict.	dictionary (Fr. *dictionnaire*).
disp.	Lat. *disputatio*.
diss.	Lat. *dissertatio*.
dist.	Lat. *distinctio*.
D. V.	Douay Version.
ed., edit.	edited, edition, editor.
Ep., Epp.	letter, letters (Lat. *epistola*).
Fr.	French.
gen.	genus.
Gr.	Greek.
H. E., Hist. Eccl.	Ecclesiastical History.
Heb., Hebr.	Hebrew.
ib., ibid.	in the same place (Lat. *ibidem*).
Id.	the same person, *or* author (Lat. *idem*).
inf.	below (Lat. *infra*).
It.	Italian.
l. c., loc. cit.	at the place quoted (Lat. *loco citato*).
Lat.	Latin.
lat.	latitude.
lib.	book (Lat. *liber*).
long.	longitude.
Mon.	Lat. *Monumenta*.
MS., MSS.	manuscript, manuscripts.
n., no.	number.
N. T.	New Testament.
Nat.	National.
Old Fr., O. Fr.	Old French.
op. cit.	in the work quoted (Lat. *opere citato*).
Ord.	Order.
O. T.	Old Testament.
p., pp.	page, pages, *or* (in Latin references) *pars* (part).
par.	paragraph.
passim.	in various places.
pt.	part.
Q.	Quarterly (a periodical), e.g. "Church Quarterly".
Q., QQ., quæst.	question, questions (Lat. *quæstio*).
q. v.	which [title] see (Lat. *quod vide*).
Rev.	Review (a periodical).
R. S.	Rolls Series.
R. V.	Revised Version.
S., SS.	Lat. *Sanctus*, *Sancti*, "Saint", "Saints"—used in this Encyclopedia only in Latin context.
Sept.	Septuagint.
Sess.	Session.
Skt.	Sanskrit.
Sp.	Spanish.
sq., sqq.	following page, *or* pages (Lat. *sequens*).
St., Sts.	Saint, Saints.
sup.	Above (Lat. *supra*).
s. v.	Under the corresponding title (Lat. *sub voce*).
tom.	volume (Lat. *tomus*).

tr.	translation *or* translated. By itself it means "English translation", *or* "translated into English by". Where a translation is into any other language, the language is stated.
tr., tract	tractate.
v.	see (Lat. *vide*).
Ven.	Venerable.
Vol.	Volume.

II.—ABBREVIATIONS OF TITLES.

Acta SS.	*Acta Sanctorum* (Bollandists).
Ann. pont. cath.	Battandier, *Annuaire pontifical catholique.*
Bibl. Dict. Eng. Cath.	Gillow, Bibliographical Dictionary of the English Catholics.
Dict. Christ. Antiq.	Smith and Cheetham (ed.), Dictionary of Christian Antiquities.
Dict. Christ. Biog.	Smith and Wace (ed.), Dictionary of Christian Biography.
Dict. d'arch. chrét.	Cabrol (ed.), *Dictionnaire d'archéologie chrétienne et de liturgie.*
Dict. de théol. cath.	Vacant and Mangenot (ed.), *Dictionnaire de théologie catholique.*
Dict. Nat. Biog.	Stephen and Lee (ed.), Dictionary of National Biography.
Hast., Dict. of the Bible	Hastings (ed.), A Dictionary of the Bible.
Kirchenlex.	Wetzer and Welte, *Kirchenlexicon.*
P. G.	Migne (ed.), *Patres Græci.*
P. L.	Migne (ed.), *Patres Latini.*
Vig., Dict. de la Bible.	Vigouroux (ed.), *Dictionnaire de la Bible.*

NOTE I.—Large Roman numerals standing alone indicate volumes. Small Roman numerals standing alone indicate chapters. Arabic numerals standing alone indicate pages. In other cases the divisions are explicitly stated. Thus "Rashdall, Universities of Europe, I, ix" refers the reader to the ninth chapter of the first volume of that work; "I, p. ix" would indicate the ninth page of the preface of the same volume.

NOTE II.—Where St. Thomas (Aquinas) is cited without the name of any particular work the reference is always to "Summa Theologica" (not to "Summa Philosophiæ"). The divisions of the "Summa Theol." are indicated by a system which may best be understood by the following example: "I-II, Q. vi, a. 7, ad 2 um" refers the reader to the *seventh* article of the *sixth* question in the *first* part of the *second* part, in the response to the *second* objection.

NOTE III.—The abbreviations employed for the various books of the Bible are obvious. Ecclesiasticus is indicated by *Ecclus.*, to distinguish it from Ecclesiastes (*Eccles.*). It should also be noted that I and II Kings in D. V. correspond to I and II Samuel in A. V.; and I and II Par. to I and II Chronicles. Where, in the spelling of a proper name, there is a marked difference between the D. V. and the A. V., the form found in the latter is added, in parentheses.

Full Page Illustrations in Volume XIV

Frontispiece in Colour PAGE
Interior of the Church of the Gesù, Rome 84
Sorrento—Road from Sorrento to Positano, etc 150
Spain—A Chapel in the Cathedral of Sigüenza, etc 170
East End of the Cathedral, Segovia 171
Spain—The Alcalá Gate, Madrid, etc 206
Spalato—Interior of the Cathedral, etc 207

Episcopal Throne, Church of SS. Nereo ed Achilleo, Rome 708
Tintern Abbey, Monmouth 736
Titian—A Knight of Malta, etc 744
Tivoli—Medieval Castle, etc 745
Alcantara Bridge, Toledo 758
Altar-tomb of the Emperor Maximilian I 772

THE
CATHOLIC ENCYCLOPEDIA

S

Simony (from Simon Magus; Acts, viii, 18–24) is usually defined "a deliberate intention of buying or selling for a temporal price such things as are spiritual or annexed unto spirituals". While this definition only speaks of purchase and sale, any exchange of spiritual for temporal things is simoniacal. Nor is the giving of the temporal as the price of the spiritual required for the existence of simony; according to a proposition condemned by Innocent XI (Denzinger-Bannwart, no. 1195) it suffices that the determining motive of the action of one party be the obtaining of compensation from the other. The various temporal advantages which may be offered for a spiritual favour are, after Gregory the Great, usually divided into three classes. These are: (1) the *munus a manu* (material advantage), which comprises money, all movable and immovable property, and all rights appreciable in pecuniary value; (2) the *munus a lingua* (oral advantage) which includes oral commendation, public expressions of approval, moral support in high places; (3) the *munus ab obsequio* (homage) which consists in subserviency, the rendering of undue services, etc. The spiritual object includes whatever is conducive to the eternal welfare of the soul, i. e. all supernatural things: sanctifying grace, the sacraments, sacramentals, etc. While according to the natural and Divine laws the term simony is applicable only to the exchange of supernatural treasures for temporal advantages, its meaning has been further extended through ecclesiastical legislation. In order to preclude all danger of simony the Church has forbidden certain dealings which did not fall under Divine prohibition. It is thus unlawful to exchange ecclesiastical benefices by private authority, to accept any payment whatever for holy oils, to sell blessed rosaries or crucifixes. Such objects lose, if sold, all the indulgences previously attached to them (S. Cong. of Indulg., 12 July, 1847). Simony of ecclesiastical law is, of course, a variable element, since the prohibitions of the Church may be abrogated or fall into disuse. Simony whether it be of ecclesiastical or Divine law, may be divided into mental, conventional, and real (*simonia mentalis, conventionalis, et realis*). In mental simony there is lacking the outward manifestation, or, according to others, the approval on the part of the person to whom a proposal is made. In conventional simony an expressed or tacit agreement is entered upon. It is subdivided into merely conventional, when neither party has fulfilled any of the terms of the agreement, and mixed conventional, when one of the parties has at least partly complied with the assumed obligations. To the latter subdivision may be referred what has been aptly termed "confidential simony", in which an ecclesiastical benefice is procured for a certain person with the understanding that later he will either resign in favour of the one through whom he obtained the position or divide with him the revenues. Simony is called real when the stipulations of the mutual agreement have been either partly or completely carried out by both parties.

To estimate accurately the gravity of simony, which some medieval ecclesiastical writers denounced as the most abominable of crimes, a distinction must be made between the violations of the Divine law, and the dealings contrary to ecclesiastical legislation. Any transgression of the law of God in this matter is, objectively considered, grievous in every instance (*mortalis ex toto genere suo*). For this kind of simony places on a par things supernatural and things natural, things eternal and things temporal, and constitutes a sacrilegious depreciation of Divine treasures. The sin can become venial only through the absence of the subjective dispositions required for the commission of a grievous offense. The merely ecclesiastical prohibitions, however, do not all and under all circumstances impose a grave obligation. The presumption is that the church authority, which, in this connexion, sometimes prohibits actions in themselves indifferent, did not intend the law to be grievously binding in minor details. As he who preaches the gospel "should live by the gospel" (I Cor., ix, 14) but should also avoid even the appearance of receiving temporal payment for spiritual services, difficulties may arise concerning the propriety or sinfulness of remuneration in certain circumstances. The ecclesiastic may certainly receive what is offered to him on the occasion of spiritual ministrations, but he cannot accept any payment for the same. The celebration of Mass for money would, consequently, be sinful; but it is perfectly legitimate to accept a stipend offered on such occasion for the support of the celebrant. The amount of the stipend, varying for different times and countries, is usually fixed by ecclesiastical authority (see STIPEND). It is allowed to accept it even should the priest be otherwise well-to-do; for he has a right to live from the altar and should avoid becoming obnoxious to other members of the clergy. It is simoniacal to accept payment for the exercise of ecclesiastical jurisdiction, e. g., the granting of dispensations; but there is nothing improper in demanding from the applicants for matrimonial dispensations a contribution intended partly as a chancery fee and partly as a salutary fine calculated to prevent the too frequent recurrence of such requests. It is likewise simony to accept temporal compensation for admission into a religious order; but contributions made by candidates to defray the expenses of their novitiate as well as the dowry required by some female orders are not included in this prohibition.

In regard to the parish clergy, the poorer the church, the more urgent is the obligation incumbent upon the faithful to support them. In the fulfilment of this duty local law and custom ought to be observed. The Second Plenary Council of Baltimore has framed the following decrees for the United

States: (1) The priest may accept what is freely offered after the administration of baptism or matrimony, but should refrain from asking anything (no. 221). (2) The confessor is never allowed to apply to his own use pecuniary penances, nor may he ask or accept anything from the penitent in compensation of his services. Even voluntary gifts must be refused, and the offering of Mass stipends in the sacred tribunal cannot be permitted (no. 289). (3) The poor who cannot be buried at their own expense should receive free burial (no. 393). The Second and Third Plenary Councils of Baltimore also prohibited the exaction of a compulsory contribution at the church entrance from the faithful who wish to hear Mass on Sundays and Holy Days (Conc. Plen. Balt. II, no. 397; Conc. Plen. Balt. III, no. 288). As this practice continued in existence in many churches until very recently, a circular letter addressed 29 Sept., 1911, by the Apostolic Delegate to the archbishops and bishops of the United States, again condemns the custom and requests the ordinaries to suppress it wherever found in existence.

To uproot the evil of simony so prevalent during the Middle Ages, the Church decreed the severest penalties against its perpetrators. Pope Julius II declared simoniacal papal elections invalid, an enactment which has since been rescinded, however, by Pope Pius X (Constitution "Vacante Sede", 25 Dec., 1904, tit. II, cap. vi, in "Canoniste Contemp.", XXXII, 1909, 291). The collation of a benefice is void if, in obtaining it, the appointee either committed simony himself, or at least tacitly approved of its commission by a third party. Should he have taken possession, he is bound to resign and restore all the revenues received during his tenure. Excommunication simply reserved to the Apostolic See is pronounced in the Constitution "Apostolicæ Sedis" (12 Oct., 1869): (1) against persons guilty of real simony in any benefices and against their accomplices; (2) against any persons, whatsoever their dignity, guilty of confidential simony in any benefices; (3) against such as are guilty of simony by purchasing or selling admission into a religious order; (4) against all persons inferior to the bishops, who derive gain (*quæstum facientes*) from indulgences and other spiritual graces; (5) against those who, collecting stipends for Masses, realize a profit on them by having the Masses celebrated in places where smaller stipends are usually given. The last-mentioned provision was supplemented by subsequent decrees of the Sacred Congregation of the Council. The Decree "Vigilanti" (25 May, 1893) forbade the practice indulged in by some booksellers of receiving stipends and offering exclusively books and subscriptions to periodicals to the celebrant of the Masses. The Decree "Ut Debita" (11 May, 1904) condemned the arrangements according to which the guardians of shrines sometimes devoted the offerings originally intended for Masses partly to other pious purposes. The offenders against the two decrees just mentioned incur suspension *ipso facto* from their functions if they are in sacred orders; inability to receive higher orders if they are clerics inferior to the priests; excommunication of pronounced sentence (*latæ sententiæ*) if they belong to the laity.

Simple (SIMPLEX). See FEASTS, ECCLESIASTICAL.

Simplicius, SAINT, POPE (468–483), date of birth unknown; d. 10 March, 483. According to the "Liber Pontificalis" (ed. Duchesne, I, 249) Simplicius was the son of a citizen of Tivoli named Castinus; and after the death of Pope Hilarius in 468 was elected to succeed the latter. The elevation of the new pope was not attended with any difficulties. During his pontificate the Western Empire came to an end. Since the murder of Valentinian III (455) there had been a rapid succession of insignificant emperors in the Western Roman Empire, who were constantly threatened by war and revolution. Following other German tribes the Heruli entered Italy, and their ruler Odoacer put an end to the Western Empire by deposing the last emperor, Romulus Augustulus, and assuming himself the title of King of Italy. Although an Arian, Odoacer treated the Catholic Church with much respect; he also retained the greater part of the former administrative organization, so that the change produced no great differences at Rome. During the Monophysite controversy, that was still carried on in the Eastern Empire, Simplicius vigorously defended the independence of the Church against the Cæsaropapism of the Byzantine rulers and the authority of the Apostolic See in questions of faith. The twenty-eighth canon of the Council of Chalcedon (451) granted the See of Constantinople the same privileges of honour that were enjoyed by the Bishop of Old Rome, although the primacy and the highest rank of honour were due to the latter. The papal legates protested against this elevation of the Byzantine Patriarch, and Pope Leo confirmed only the dogmatic decrees of the council. However, the Patriarch of Constantinople sought to bring the canon into force, and the Emperor Leo II desired to obtain its confirmation by Simplicius. The latter, however, rejected the request of the emperor and opposed the carrying out of the canon, that moreover limited the rights of the old Oriental patriarchates.

The rebellion of Basiliscus, who in 476 drove the Emperor Zeno into exile and seized the Byzantine throne, intensified the Monophysite dispute. Basiliscus looked for support to the Monophysites, and he granted permission to the deposed Monophysite patriarchs, Timotheus Ailurus of Alexandria and Peter Fullo of Antioch, to return to their sees. At the same time he issued a religious edict (*Enkyklikon*) addressed to Ailurus, which commanded that only the first three œcumenical synods were to be accepted, and rejected the Synod of Chalcedon and the Letter of Pope Leo. All bishops were to sign the edict. The Bishop of Constantinople, Acacius (from 471), wavered and was about to proclaim this edict. But the firm stand taken by the populace, influenced by the monks who were rigidly Catholic in their opinions, moved the bishop to oppose the emperor and to defend the threatened faith. The abbots and priests of Constantinople united with Pope Simplicius, who made every effort to maintain the Catholic dogma and the definitions of the Council of Chalcedon. The pope exhorted to loyal adherence to the true faith in letters to Acacius, to the priests and abbots, as well as to the usurper Basiliscus himself. In a letter to Basiliscus of 10 Jan., 476, Simplicius says of the See of Peter at Rome: "This same norm of Apostolic doctrine is firmly maintained by his [Peter's] successors, of him to whom the Lord entrusted the care of the entire flock of sheep, to whom He promised not to leave him until the end of time" (Thiel, "Rom. Pont.", 182). In the same way he took up with the emperor the cause of the Catholic Patriarch of Alexandria, Timotheus Salophakiolus, who had been superseded by Ailurus. When the Emperor Zeno in 477 drove away the usurper and again gained the supremacy, he sent the pope a completely Catholic confession of faith, whereupon Simplicius (9 Oct., 477) congratulated him on his restoration to power and exhorted him to ascribe the victory to God, who wished in this way to restore liberty to the Church.

Zeno recalled the edicts of Basiliscus, banished Peter Fullo from Antioch, and reinstated Timotheus Salophakiolus at Alexandria. He did not disturb Ailurus on account of the latter's great age, and as a matter of fact the latter soon died. The Monophysites of Alexandria now put forward Peter Mongus, the former archdeacon of Ailurus, as his successor. Urged by the pope and the Eastern Catholics, Zeno commanded the banishment of Peter Mongus, but the latter was able to hide in Alexandria, and fear of the Monophysites prevented the use of force. In a moment of weakness Salophakiolus himself had permitted the placing of the name of the Monophysite patriarch Dioscurus in the diptychs to be read at the church services. On 13 March, 478, Simplicius wrote to Acacius of Constantinople that Salophakiolus should be urged to wipe out the disgrace that he had brought upon himself. The latter sent legates and letters to Rome to give satisfaction to the pope. At the request of Acacius, who was still active against the Monophysites, the pope condemned by name the heretics Mongus, Fullo, Paul of Epheseus, and John of Apamea, and delegated the Patriarch of Constantinople to be in this his representative. When the Monophysites at Antioch raised a revolt in 497 against the patriarch Stephen II, and killed him, Acacius consecrated Stephen III, and afterwards Kalendion as Stephen's successors. Simplicius made an energetic demand upon the emperor to punish the murderers of the patriarch, and also reproved Acacius for exceeding his competence in performing this consecration; at the same time, though, the pope granted him the necessary dispensation. After the death of Salophakiolus, the Monophysites of Alexandria again elected Peter Mongus patriarch, while the Catholics chose Johannes Talaia. Both Acacius and the emperor, whom he influenced, were opposed to Talaia, and sided with Mongus. Mongus went to Constantinople to advance his cause. Acacius and he agreed upon a formula of union between the Catholics and the Monophysites that was approved by the Emperor Zeno in 482 (*Henotikon*). Talaia had sent ambassadors to Pope Simplicius to notify the pope of his election. However, at the same time, the pope received a letter from the emperor in which Talaia was accused of perjury and bribery and a demand was made for the recognition of Mongus. Simplicius, therefore, delayed to recognize Talaia, but protested energetically against the elevation of Mongus to the Patriarchate of Alexandria. Acacius, however, maintained his alliance with Mongus and sought to prevail upon the Eastern bishops to enter into Church communion with him. For a long time Acacius sent no information of any kind to the pope, so that the latter in a letter blamed him severely for this. When finally Talaia came to Rome in 483 Simplicius was already dead.

Simplicius exercised a zealous pastoral care in western Europe also notwithstanding the trying circumstances of the Church during the disorders of the Migrations. He issued decisions in ecclesiastical questions, appointed Bishop Zeno of Seville papal vicar in Spain, so that the prerogatives of the papal see could be exercised in the country itself for the benefit of the ecclesiastical administration. When Bishop John of Ravenna in 482 claimed Mutina as a suffragan diocese of his metropolitan see, and without more ado consecrated Bishop George for this diocese, Simplicius vigorously opposed him and defended the rights of the papal see. Simplicius established four new churches in Rome itself. A large hall built in the form of a rotunda on the Cælian Hill was turned into a church and dedicated to St. Stephen; the main part of this building still exists as the Church of San Stefano Rotondo. A fine hall near the Church of Santa Maria Maggiore was given to the Roman Church and turned by Simplicius into a church dedicated to St. Andrew by the addition of an apse adorned with mosaics; it is no longer in existence (cf. de Rossi, "Bull. di archeol. crist.", 1871, 1–64). The pope built a church dedicated to the first martyr, St. Stephen, behind the memorial church of San Lorenzo in Agro Verano; this church is no longer standing. He had a fourth church built in the city in honour of St. Balbina, "juxta palatium Licinianum", where her grave was; this church still remains. In order to make sure of the regular holding of church services, of the administration of baptism, and of the discipline of penance in the great churches of the catacombs outside the city walls, namely the church of St. Peter (in the Vatican), of St. Paul on the Via Ostiensis, and of St. Lawrence on the Via Tiburtina, Simplicius ordained that the clergy of three designated sections of the city should, in an established order, have charge of the religious functions at these churches of the catacombs. Simplicius was buried in St. Peter's on the Vatican. The "Liber Pontificalis" gives 2 March as the day of burial (VI non.); probably 10 March (VI id.) should be read. After his death King Odoacer desired to influence the filling of the papal see. The prefect of the city, Basilius, asserted that before death Pope Simplicius had begged to issue the order that no one should be consecrated Roman bishop without his consent (cf. concerning the regulation Thiel, "Epist. Rom. Pont.", 686–88). The Roman clergy opposed this edict that limited their right of election. They maintained the force of the edict, issued by the Emperor Honorius at the instance of Pope Boniface I, that only that person should be regarded as the rightful Bishop of Rome who was elected according to canonical form with Divine approval and universal consent. Simplicius was venerated as a saint; his feast is on 2 or 3 March.

J. P. Kirsch.

Simplicius, Faustinus, and Beatrice, martyrs at Rome during the Diocletian persecution (302 or 303). The brothers Simplicius and Faustinus were cruelly tortured on account of their Christian faith, beaten with clubs, and finally beheaded; their bodies were thrown into the Tiber. According to another version of the legend a stone was tied to them and they were drowned. Their sister Beatrice had the bodies drawn out of the water and buried. Then for seven months she lived with a pious matron named Lucina, and with her aid Beatrice succoured the persecuted Christians by day and night. Finally she was discovered and arrested. Her accuser was her neighbour Lucretius who desired to obtain possession of her lands. She courageously asserted before the judge that she would never sacrifice to demons, because she was a Christian. As punishment she was strangled in prison. Her friend Lucina buried her by her brothers in the cemetery *ad Ursum Pileatum* on the road to Porto. Soon after this Divine punishment overtook the accuser Lucretius. When Lucretius at a feast was making merry over the folly of the martyrs, an infant who had been brought to the entertainment by his mother, cried out, "Thou hast committed murder and hast taken unjust possession of land. Thou art a slave of the devil". And the devil at once took possession of him and tortured him three hours and drew him down into the bottomless pit. The terror of those present was so great that they became Christians. This is the story of the legend. Trustworthy Acts concerning the history of the two brothers and sister are no longer in existence. Pope Leo II (682–683) translated their relics to a church which he had built at Rome in honour of St. Paul. Later the greater part of the relics of the martyrs were taken to the Church of Santa Maria Maggiore. St. Simplicius is represented with a pennant, on the shield of which are three lilies called the crest of Simplicius; the lilies are a symbol of purity of heart. St. Beatrice has a cord in her hand, because she was strangled. The feast of the three saints is on 29 July.

KLEMENS LÖFFLER.

Simpson, RICHARD, b. 1820; d. near Rome, 5 April, 1876. He was educated at Oriel College, Oxford, and took his B.A. degree, 9 Feb., 1843. Being ordained an Anglican clergyman, he was appointed vicar of Mitcham in Surrey, but resigned this in 1845 to become a Catholic. After some years spent on the continent, during which time he became remarkably proficient as a linguist, he returned to England and became editor of "The Rambler". When this ceased in 1862 he, with Sir John Acton, began the "Home and Foreign Review", which was opposed by ecclesiastical authority as unsound and was discontinued in 1864. Afterwards Simpson devoted himself to the study of Shakespeare and to music. His works are: "Invocation of Saints proved from the Bible alone" (1849); "The Lady Falkland: her life" (1861); "Edmund Campion" (1867), the most valuable of his works; "Introduction to the Philosophy of Shakespeare's Sonnets" (1868); "The School of Shakespeare" (1872); and "Sonnets of Shakespeare selected from a complete setting, and miscellaneous songs" (1878). Though he remained a practical Catholic his opinions were very liberal and he assisted Mr. Gladstone in writing his pamphlet on "Vaticanism". His papers in "The Rambler" on the English martyrs deserve attention.

EDWIN BURTON.

Sin.—The subject is treated under these heads: I. Nature of Sin; II. Division; III. Mortal Sin; IV. Venial Sin; V. Permission and Remedies; VI. The Sense of Sin.

I. NATURE OF SIN.—Since sin is a moral evil, it is necessary in the first place to determine what is meant by evil, and in particular by moral evil. Evil is defined by St. Thomas (De malo, Q. ii, a. 2) as a privation of form or order or due measure. In the physical order a thing is good in proportion as it possesses being. God alone is essentially being, and He alone is essentially and perfectly good. Everything else possesses but a limited being, and, in so far as it possesses being, it is good. When it has its due proportion of form and order and measure it is, in its own order and degree, good. (See GOOD.) Evil implies a deficiency in perfection, hence it cannot exist in God who is essentially and by nature good; it is found only in finite beings which, because of their origin from nothing, are subject to the privation of form or order or measure due them, and, through the opposition they encounter, are liable to an increase or decrease of the perfection they have: "for evil, in a large sense, may be described as the sum of opposition, which experience shows to exist in the universe, to the desires and needs of individuals; whence arises, among human beings at least, the suffering in which life abounds" (see EVIL).

According to the nature of the perfection which it limits, evil is metaphysical, physical, or moral. Metaphysical evil is not evil properly so called; it is but the negation of a greater good, or the limitation of finite beings by other finite beings. Physical evil deprives the subject affected by it of some natural good, and is adverse to the well-being of the subject, [illegible] pain and suffering. Moral evil is found only in intelligent beings; it deprives them of some moral good. Here we have to deal with moral evil only. This may be defined as a privation of conformity to right reason and to the law of God. Since the morality of a human act consists in its agreement or non-agreement with right reason and the eternal law, an act is good or evil in the moral order according as it involves this agreement or non-agreement. When the intelligent creature, knowing God and His law, deliberately refuses to obey, moral evil results.

Sin is nothing else than a morally bad act (St. Thomas, "De malo", Q. vii, a. 3), an act not in accord with reason informed by the Divine law. God has endowed us with reason and free-will, and a sense of responsibility; He has made us subject to His law, which is known to us by the dictates of conscience, and our acts must conform with these dictates, otherwise we sin (Rom., xiv, 23). In every sinful act two things must be considered, the substance of the act and the want of rectitude or conformity (St. Thomas, I–II, Q. lxxii, a. 1). The act is something positive. The sinner intends here and now to act in some determined matter, inordinately electing that particular good in defiance of God's law and the dictates of right reason. The deformity is not directly intended, nor is it involved in the act so far as this is physical, but in the act as coming from the will which has power over its acts and is capable of choosing this or that particular good contained within the scope of its adequate object, i. e. universal good (St. Thomas, "De malo", Q. iii, a. 2, ad 2um). God, the first cause of all reality, is the cause of the physical act as such, the free-will of the deformity (St. Thomas, I–II, Q. lxxxix, a. 2; "De malo", Q. iii, a. 2). The evil act adequately considered has for its cause the free-will defectively electing some mutable good in place of the eternal good, God, and thus deviating from its true last end.

In every sin a privation of due order or conformity to the moral law is found, but sin is not a pure, or entire privation of all moral good (St. Thomas, "De malo", Q. ii, a. 9; I–II, Q. lxxiii, a. 2). There is a twofold privation; one entire which leaves nothing of its opposite, as for instance, darkness which leaves no light; another, not entire, which leaves something of the good to which it is opposed, as for instance, disease which does not entirely destroy the even balance of the bodily functions necessary for health. A pure or entire privation of good could occur in a moral act only on the supposition that the will could incline to evil as such for an object. This is impossible because evil as such is not contained within the scope of the adequate object of the will, which is good. The sinner's intention terminates at some object in which there is a participation of God's goodness, and this object is directly intended by him. The privation of due order, or the deformity, is not directly intended, but is accepted in as much as the sinner's desire tends to an object in which this want of conformity is involved, so that sin is not a pure privation, but a human act deprived of its due rectitude. From the defect arises the evil of the act, from the fact that it is voluntary, its imputability.

II. DIVISION OF SIN.—As regards the principle from which it proceeds sin is original or actual. The will of Adam acting as head of the human race for the conservation or loss of original justice is the cause and source of original sin (q. v.). Actual sin is committed by a free personal act of the individual will. It is divided into sins of commission and omission. A sin of commission is a positive act contrary to some prohibitory precept; a sin of omission is a failure to do what is commanded. A sin of omission, however, requires a positive act whereby one wills to omit the fulfilling of a precept, or at least wills something incompatible with its fulfillment (I–II, Q. lxxii, a. 5). As regards their malice, sins are distinguished into sins of ignorance, passion or infirmity, and malice; as regards the activities involved, into sins of thought, word, or deed (*cordis, oris, operis*); as regards their gravity, into mortal and venial. This last named division is indeed the most important of all and it calls for special treatment. But before taking up the details, it will be useful to indicate some further distinctions which occur in theology or in general usage.

Material and Formal Sin.—This distinction is based upon the difference between the objective elements (object itself, circumstances) and the subjective (advertence to the sinfulness of the act). An action which, as a matter of fact, is contrary to the Divine law but is not known to be such by the agent constitutes a material sin; whereas formal sin is committed when the agent freely transgresses the law as shown him by his conscience, whether such law really exists or is only thought to exist by him who acts. Thus, a person who takes the property of another while believing it to be his own commits a material sin; but the sin would be formal if he took the property in the belief that it belonged to another, whether his belief were correct or not.

Internal Sins.—That sin may be committed not only by outward deeds but also by the inner activity of the mind apart from any external manifestation, is plain from the precept of the Decalogue: "Thou shalt not covet", and from Christ's rebuke of the scribes and pharisees whom he likens to "whited sepulchres . . . full of all filthiness" (Matt., xxiii, 27). Hence the Council of Trent (Sess. XIV, c. v), in declaring that all mortal sins must be confessed, makes special mention of those that are most secret and that violate only the last two precepts of the Decalogue, adding that they "sometimes more grievously wound the soul and are more dangerous than sins which are openly committed". Three kinds of internal sin are usually distinguished: *delectatio morosa*, i. e. the pleasure taken in a sinful thought or imagination even without desiring it; *gaudium*, i. e. dwelling with complacency on sins already committed; and *desiderium*, i. e. the desire for what is sinful. An *efficacious* desire, i. e. one that includes the deliberate intention to realize or gratify the desire, has the same malice, mortal or venial, as the action which it has in view. An inefficacious desire is one that carries a condition, in such a way that the will is prepared to perform the action in case the condition were verified. When the condition is such as to eliminate all sinfulness from the action, the desire involves no sin: e. g. I would gladly eat meat on Friday, if I had a dispensation; and in general this is the case whenever the action is forbidden by positive law only. When the action is contrary to natural law and yet is permissible in given circumstances or in a particular state of life, the desire, if it include those circumstances or that state as conditions, is not in itself sinful: e. g. I would kill so-and-so if I had to do it in self-defence. Usually, however, such desires are dangerous and therefore to be repressed. If, on the other hand, the condition does not remove the sinfulness of the action, the desire is also sinful. This is clearly the case where the action is intrinsically and absolutely evil, e. g. blasphemy: one cannot without committing sin, have the desire—I would blaspheme God if it were not wrong; the condition is an impossible one and therefore does not affect the desire itself. The pleasure taken in a sinful thought (*delectatio, gaudium*) is, generally speaking, a sin of the same kind and gravity as the action which is thought of. Much, however, depends on the motive for which one thinks of sinful actions. The pleasure, e. g. which one may experience in studying the nature of murder or any other crime, in getting clear ideas on the subject, tracing its causes, determining the guilt etc., is not a sin; on the contrary, it is often both necessary and useful. The case is different of course where the pleasure means gratification in the sinful object or action itself. And it is evidently a sin when one boasts of his evil deeds, the more so because of the scandal that is given.

The Capital Sins or Vices.—According to St. Thomas (II–II, Q. cliii, a. 4) "a capital vice is that which has an exceedingly desirable end so that in his desire for it a man goes on to the commission of many sins all of which are said to originate in that vice as their chief source". It is not then the gravity of the vice in itself that makes it capital but rather the fact that it gives rise to many other sins. These are enumerated by St. Thomas (I–II, Q. lxxxiv, a. 4) as vainglory (pride), avarice, gluttony, lust, sloth, envy, anger. St. Bonaventure (Brevil., III, ix) gives the same enumeration. Earlier writers had distinguished eight capital sins: so St. Cyprian (De mort., iv); Cassian (De instit. cœnob., v, coll. 5, de octo principalibus vitiis); Columbanus ("Instr. de octo vitiis princip." in "Bibl. max. vet. patr.", XII, 23); Alcuin (De virtut. et vitiis, xxvii sqq.). The number seven, however, had been given by St. Gregory the Great (Lib. mor. in Job. XXXI, xvii), and it was retained by the foremost theologians of the Middle Ages.

It is to be noted that "sin" is not predicated univocally of all kinds of sin. "The division of sin into venial and mortal is not a division of genus into species which participate equally the nature of the genus, but the division of an analogue into things of which it is predicated primarily and secondarily" (St. Thomas, I–II, Q. lxxxviii, a. 1, ad 1um). "Sin is not predicated univocally of all kinds of sin, but primarily of actual mortal sin . . . and therefore it is not necessary that the definition of sin in general should be verified except in that sin in which the nature of the genus is found perfectly. The definition of sin may be verified in other sins in a certain sense" (St. Thomas, II, d. 33, Q. i, a. 2, ad 2um). Actual sin primarily consists in a voluntary act repugnant to the order of right reason. The act passes, but the soul of the sinner remains stained, deprived of grace, in a state of sin, until the disturbance of order has been restored by penance. This state is called habitual sin, *macula peccati. reatus culpæ* (I–II, Q. lxxxvii, a. 6).

The division of sin into original and actual, mortal and venial, is not a division of genus into species because sin has not the same signification when applied to original and personal sin, mortal and venial. Mortal sin cuts us off entirely from our true last end; venial sin only impedes us in its attainment. Actual personal sin is voluntary by a proper act of the will. Original sin is voluntary not by a personal voluntary act of ours, but by an act of the will of Adam. Original and actual sin are distinguished by the manner in which they are voluntary (*ex parte actus*); mortal and venial sin by the way in which they affect our relation to God (*ex parte deordinationis*). Since a voluntary act and its disorder are of the essence of sin, it is impossible that sin should be a generic term in respect to original and actual, mortal and venial sin. The true nature of sin is found perfectly only in a personal mortal sin, in other sins imperfectly, so that sin is predicated primarily of actual sin, only secondarily of the others. Therefore we shall consider: first, personal mortal sin; second, venial sin.

III. MORTAL SIN.—Mortal sin is defined by St. Augustine (Contra Faustum, XXII, xxvii) as "Dictum vel factum vel concupitum contra legem æternam", i. e. something said, done or desired contrary to the eternal law, or a thought, word, or deed contrary to the eternal law. This is a definition of sin as it is a voluntary act. As it is a defect or privation it may be defined as an aversion from God, our true last end, by reason of the preference given to some mutable good. The definition of St. Augustine is accepted generally by theologians and is primarily a definition of actual mortal sin. It explains well the material and formal elements of sin. The words "dictum vel factum vel concupitum" denote the material element of sin, a human act: "contra legem æternam", the formal element. The act is bad because it transgresses the Divine law. St. Ambrose (De paradiso, viii) defines sin as a "prevarication of the Divine law". The definition of St. Augustine strictly considered, i. e. as sin averts us from our true ultimate end, does not comprehend venial sin, but in as much as venial sin is in a manner contrary to the Divine law, although not averting us from our last end, it may be said to be included in the definition as it stands. While primarily a definition of sins of commission, sins of omission may be included in the definition because they presuppose some positive act (St. Thomas, I–II, Q. lxxi, a. 5) and negation and affirmation are reduced to the same genus. Sins that violate the human or the natural law are also included, for what is contrary to the human or natural law is also contrary to the Divine law, in as much as every just human law is derived from the Divine law, and is not just unless it is in conformity with the Divine law.

Biblical Description of Sin.—In the Old Testament sin is set forth as an act of disobedience (Gen., ii, 16–17; iii, 11; Is., i, 2–4; Jer., ii, 32); as an insult to God (Num., xxvii, 14); as something detested and punished by God (Gen., iii, 14–19, Gen., iv, 9–16); as injurious to the sinner (Tob., xii, 10); to be expiated by penance (Ps. l, 19). In the New Testament it is clearly taught in St. Paul that sin is a transgression of the law (Rom., ii, 23; v, 12–20); a servitude from which we are liberated by grace (Rom., vi, 16–18); a disobedience (Heb., ii, 2) punished by God (Heb., x, 26–31). St. John describes sin as an offence to God, a disorder of the will (John, xii, 43), an iniquity (I John, iii, 4–10). Christ in many of his utterances teaches the nature and extent of sin. He came to promulgate a new law more perfect than the old, which would extend to the ordering not only of external but also of internal acts to a degree unknown before, and, in His Sermon on the Mount, he condemns as sinful many acts which were judged honest and righteous by the doctors and teachers of the Old Law. He denounces in a special manner hypocrisy and scandal, infidelity and the sin against the Holy Ghost. In particular he teaches that sins come from the heart (Matt., xv, 19–20).

Systems which Deny Sin or Distort its True Notion.—All systems, religious and ethical, which either deny, on the one hand, the existence of a personal creator and lawgiver distinct from and superior to his creation, or, on the other, the existence of free will and responsibility in man, distort or destroy the true biblico-theological notion of sin. In the beginning of the Christian era the Gnostics, although their doctrines varied in details, denied the existence of a personal creator. The idea of sin in the Catholic sense is not contained in their system. There is no sin for them, unless it be the sin of ignorance, no necessity for an atonement; Jesus is not God (see GNOSTICISM). Manichæism (q. v.) with its two eternal principles, good and evil, at perpetual war with each other, is also destructive of the true notion of sin. All evil, and consequently sin, is from the principle of evil. The Christian concept of God as a lawgiver is destroyed. Sin is not a conscious voluntary act of disobedience to the Divine will. Pantheistic systems which deny the distinction between God and His creation make sin impossible. If man and God are one, man is not responsible to anyone for his acts, morality is destroyed. If he is his own rule of action, he cannot deviate from right as St. Thomas teaches (I, Q. lxiii, a. 1). The identification of God and the world by Pantheism (q. v.) leaves no place for sin.

There must be some law to which man is subject, superior to and distinct from him, which can be obeyed and transgressed, before sin can enter into his acts. This law must be the mandate of a superior, because the notions of superiority and subjection are correlative. This superior can be only God, who alone is the author and lord of man. Materialism, denying as it does the spirituality and the immortality of the soul, the existence of any spirit whatsoever, and consequently of God, does not admit sin. There is no free will, everything is determined by the inflexible laws of motion. "Virtue" and "vice" are meaningless qualifications of action. Positivism places man's last end in some sensible good. His supreme law of action is to seek the maximum of pleasure. Egotism or altruism is the supreme norm and criterion of the Positivistic systems, not the eternal law of God as revealed by Him, and dictated by conscience. For the materialistic evolutionists man is but a highly-developed animal, conscience a product of evolution. Evolution has revolutionized morality, sin is no more.

Kant in his "Critique of Pure Reason" having rejected all the essential notions of true morality, namely, liberty, the soul, God and a future life, attempted in his "Critique of the Practical Reason" to restore them in the measure in which they are necessary for morality. The practical reason, he tells us, imposes on us the idea of law and duty. The fundamental principle of the morality of Kant is "duty for duty's sake", not God and His law. Duty cannot be conceived of alone as an independent thing. It carries with it certain postulates, the first of which is liberty. "I ought, therefore I can", is his doctrine. Man by virtue of his practical reason has a consciousness of moral obligation (categorical imperative). This consciousness supposes three things: free will, the immortality of the soul, the existence of God, otherwise man would not be capable of fulfilling his obligations, there would be no sufficient sanction for the Divine law, no reward or punishment in a future life. Kant's moral system labours in obscurities and contradictions and is destructive of much that pertains to the teaching of Christ. Personal dignity is the supreme rule of man's actions. The notion of sin as opposed to God is suppressed. According to the teaching of materialistic Monism, now so widespread, there is, and can be, no free will. According to this doctrine but one thing exists and this one being produces all phenomena, thought included; we are but puppets in its hands, carried hither and thither as it wills, and finally are cast back into nothingness. There is no place for good and evil, a free observance or a wilful transgression of law, in such a system. Sin in the true sense is impossible. Without law and liberty and a personal God there is no sin.

That God exists and can be known from His visible creation, that He has revealed the decrees of His eternal will to man, and is distinct from His creation (Denzinger-Bannwart, "Enchiridion", nn. 1782, 1785, 1701), are matters of Catholic faith and teaching. Man is a created being endowed with free will (ibid, 793), which fact can be proved from Scripture and reason (ibid., 1041–1650). The Council of Trent declares in Sess. VI, c. i (ibid., 793) that man by reason of the prevarication of Adam has lost his primeval innocence, and that while free will remains, its powers are lessened (see ORIGINAL SIN).

Protestant Errors.—Luther and Calvin taught as their fundamental error that no free will properly so called remained in man after the fall of our first parents; that the fulfillment of God's precepts is impossible even with the assistance of grace, and that man in all his actions sins. Grace is not an interior gift, but something external. To some sin is not imputed, because they are covered as with a cloak by the merits of Christ. Faith alone saves, there is no necessity for good works. Sin in Luther's doctrine cannot be a deliberate transgression of the Divine law. Jansenius, in his "Augustinus", taught that according to the present powers of man some of God's precepts are impossible of fulfilment, even to the just who strive to fulfil them, and he further taught that grace by means of which the fulfilment becomes possible is wanting even to the just. His fundamental error consists in teaching that the will is not free but is necessarily drawn either by concupiscence or grace. Internal liberty is not required for merit or demerit. Liberty from coercion suffices. Christ did not die for all men. Baius taught a semi-Lutheran doctrine. Liberty is not entirely destroyed, but is so weakened that without grace it can do nothing but sin. True liberty is not required for sin. A bad act committed involuntarily renders man responsible (propositions 50–51 in Denzinger-Bannwart, "Enchiridion", nn. 1050–1). All acts done without charity are mortal sins and merit damnation because they proceed from concupiscence. This doctrine denies that sin is a voluntary transgression of Divine law. If man is not free, a precept is meaningless as far as he is concerned.

Philosophical Sin.—Those who would construct a moral system independent of God and his law distinguish between theological and philosophical sin. Philosophical sin is a morally bad act which violates the natural order of reason, not the Divine law. Theological sin is a transgression of the eternal law. Those who are of atheistic tendencies and contend for this distinction, either deny the existence of God or maintain that He exercises no providence in regard to human acts. This position is destructive of sin in the theological sense, as God and His law, reward and punishment, are done away with. Those who admit the existence of God, His law, human liberty and responsibility, and still contend for a distinction between philosophical and theological sin, maintain that in the present order of God's providence there are morally bad acts, which, while violating the order of reason, are not offensive to God, and they base their contention on this that the sinner can be ignorant of the existence of God, or not actually think of Him and His law when he acts. Without the knowledge of God and consideration of Him, it is impossible to offend Him. This doctrine was censured as scandalous, temerarious, and erroneous by Alexander VIII (24 Aug., 1690) in his condemnation of the following proposition: "Philosophical or moral sin is a human act not in agreement with rational nature and right reason, theological and mortal sin is a free transgression of the Divine law. However grievous it may be, philosophical sin in one who is either ignorant of God or does not actually think of God, is indeed a grievous sin, but not an offense to God, nor a mortal sin dissolving friendship with God, nor worthy of eternal punishment" (Denzinger-Bannwart, 1290).

This proposition is condemned because it does not distinguish between vincible and invincible ignorance, and further supposes invincible ignorance of God to be sufficiently common, instead of only metaphysically possible, and because in the present dispensation of God's providence we are clearly taught in Scripture that God will punish all evil coming from the free will of man (Rom., ii, 5–11). There is no morally bad act that does not include a transgression of Divine law. From the fact that an action is conceived of as morally evil it is conceived of as prohibited. A prohibition is unintelligible without the notion of some one prohibiting. The one prohibiting in this case and binding the conscience of man can be only God, Who alone has power over man's free will and actions, so that from the fact that any act is perceived to be morally bad and prohibited by conscience, God and His law are perceived at least confusedly, and a wilful transgression of the dictate of conscience is necessarily also a transgression of God's law. Cardinal de Lugo (De incarnat., disp. 5, lect. 3) admits the possibility of philosophical sin in those who are inculpably ignorant of God, but he holds that it does not actually occur, because in the present order of God's providence there cannot be invincible ignorance of God and His law. This teaching does not necessarily fall under the condemnation of Alexander VIII, but it is commonly rejected by theologians for the reason that a dictate of conscience necessarily involves a knowledge of the Divine law as a principle of morality.

Conditions of Mortal Sin: Knowledge, Free Will, Grave Matter.—Contrary to the teaching of Baius (prop. 46, Denzinger-Bannwart, 1046) and the Reformers, a sin must be a voluntary act. Those actions alone are properly called human or moral actions which proceed from the human will deliberately acting with knowledge of the end for which it acts. Man differs from all irrational creatures in this precisely that he is master of his actions by virtue of his reason and free will (I–II, Q. i, a. 1). Since sin is a human act wanting in due rectitude, it must have, in so far as it is a human act, the essential constituents of a human act. The intellect must perceive and judge of the morality of the act, and the will must freely elect. For a deliberate mortal sin there must be full advertence on the part of the intellect and full consent on the part of the will in a grave matter. An involuntary transgression of the law even in a grave matter is not a formal but a material sin. The gravity of the matter is judged from the teaching of Scripture, the definitions of councils and popes, and also from reason. Those sins are judged to be mortal which contain in themselves some grave disorder in regard to God, our neighbour, ourselves, or society. Some sins admit of no lightness of matter, as for example, blasphemy, hatred of God; they are always mortal (*ex toto genere suo*), unless rendered venial by want of full advertence on the part of the intellect or full consent on the part of the will. Other sins admit lightness of matter: they are grave sins (*ex genero suo*) in as much as their matter in itself is sufficient to constitute a grave sin without the addition of any other matter, but is of such a nature that in a given case, owing to its smallness, the sin may be venial, e. g. theft.

Imputability.—That the act of the sinner may be imputed to him it is not necessary that the object which terminates and specifies his act should be directly willed as an end or means. It suffices that it be willed indirectly or in its cause, i. e. if the sinner foresees, at least confusedly, that it will follow from the act which he freely performs or from his omission of an act. When the cause produces a twofold effect, one of which is directly willed, the other indirectly, the effect which follows indirectly is morally imputable to the sinner when these three conditions are verified: first, the sinner must foresee at least confusedly the evil effects which follow on the cause he places; second, he must be able to refrain from placing the cause; third, he must be under the obligation of preventing the evil effect. Error and ignorance in regard to the object or circumstances of the act to be placed, affect the judgment of the intellect and consequently the morality and imputability of the act. Invincible ignorance excuses entirely from sin. Vincible ignorance does not, although it renders the act less free (see IGNORANCE). The passions, while they disturb the judgment of the intellect, more directly affect the will. Antecedent passion increases the intensity of the act, the object is more intensely desired, although less freely, and the disturbance caused by the passions may be so great as to render a free judgment impossible, the agent being for the moment beside himself (I–II, Q. vi, a. 7, ad 3um). Consequent passion, which arises from a command of the will, does not lessen liberty, but is rather a sign of an intense act of volition. Fear, violence, heredity, temperament and pathological states, in so far as they affect free volition, affect the malice and imputability of sin. From the condemnation of the errors of Baius and Jansenius (Denz.-Bann., 1046, 1066, 1094, 1291–2) it is clear that for an actual personal sin a knowledge of the law and a personal voluntary act, free from coercion and necessity, are required. No mortal sin is committed in a state of invincible ignorance or in a half-conscious state. Actual advertence to the sinfulness of the act is not required, virtual advertence suffices. It is not necessary that the explicit intention to offend God and break his law be present, the full and free consent of the will to an evil act suffices.

Malice.—The true malice of mortal sin consists in a conscious and voluntary transgression of the eternal law, and implies a contempt of the Divine will, a complete turning away from God, our true last end, and a preferring of some created thing to which we subject ourselves. It is an offence offered to God, and an injury done Him; not that it effects any change in God, who is immutable by nature, but that the sinner by his act deprives God of the reverence and honor due Him: it is not any lack of malice on the sinner's part, but God's immutability that prevents Him from suffering. As an offence offered to God mortal sin is in a way infinite in its malice, since it is directed against an infinite being, and the gravity of the offence is measured by the dignity of the one offended (St. Thomas, III, Q. i, a. 2, ad 2um). As an act sin is finite, the will of man not being capable of infinite malice. Sin is an offence against Christ Who has redeemed man (Phil., iii, 18); against the Holy Ghost Who sanctifies us (Heb., x, 29), an injury to man himself, causing the spiritual death of the soul, and making man the servant of the devil. The first and primary malice of sin is derived from the object to which the will inordinately tends, and from the object considered morally, not physically. The end for which the sinner acts and the circumstances which surround the act are also determining factors of its morality. An act which, objectively considered, is morally indifferent, may be rendered good or evil by circumstances, or by the intention of the sinner. An act that is good objectively may be rendered bad, or a new species of good or evil may be added, or a new degree. Circumstances can change the character of a sin to such a degree that it becomes specifically different from what it is objectively considered; or they may merely aggravate the sin while not changing its specific character; or they may lessen its gravity. That they may exercise this determining influence two things are necessary: they must contain in themselves some good or evil, and must be apprehended, at least confusedly, in their moral aspect. The external act, in so far as it is a mere execution of a voluntary efficacious internal act, does not, according to the common Thomistic opinion, add any essential goodness or malice to the internal sin.

Gravity.—While every mortal sin averts us from out true last end, all mortal sins are not equally grave, as is clear from Scripture (John, xix, 11; Matt., xi, 22; Luke, vi), and also from reason. Sins are specifically distinguished by their objects, which do not all equally avert man from his last end. Then again, since sin is not a pure privation, but a mixed one, all sins do not equally destroy the order of reason Spiritual sins, other things being equal, are graver than carnal sins (St. Thomas, "De malo", Q. ii, a. 9; I–II, Q. lxxiii, a. 5).

Specific and numeric distinction of Sin.—Sins are distinguished specifically by their formally diverse objects; or from their opposition to different virtues, or to morally different precepts of the same virtue. Sins that are specifically distinct are also numerically distinct. Sins within the same species are distinguished numerically according to the number of complete acts of the will in regard to total objects. A total object is one which, either in itself or by the intention of the sinner, forms a complete whole and is not referred to another action as a part of the whole. When the completed acts of the will relate to the same object there are as many sins as there are morally interrupted acts.

Subject causes of Sin.—Since sin is a voluntary act lacking in due rectitude, sin is found, as in a subject, principally in the will. But, since not only acts elicited by the will are voluntary, but also those that are elicited by other faculties at the command of the will, sin may be found in these faculties in so far as they are subject in their actions to the command of the will, and are instruments of the will, and move under its guidance (I–II, Q. lxxiv).

The external members of the body cannot be effective principles of sin (I–II, Q. lxxiv, a. 2 ad 3um). They are mere organs which are set in activity by the soul; they do not initiate action. The appetitive powers on the contrary can be effective principles of sin, for they possess, through their immediate conjunction with the will and their subordination to it, a certain though imperfect liberty (I–II, Q. lvi, a. 4, ad 3um). The sensual appetites have their own proper sensible objects to which they naturally incline, and since original sin has broken the bond which held them in complete subjection to the will, they may antecede the will in their actions and tend to their own proper objects inordinately. Hence they may be proximate principles of sin when they move inordinately contrary to the dictates of right reason.

It is the right of reason to rule the lower faculties, and when the disturbance arises in the sensual part the reason may do one of two things: it may either consent to the sensible delectation or it may repress and reject it. If it consents, the sin is no longer one of the sensual part of man, but of the intellect and will, and consequently, if the matter is grave, mortal. If rejected, no sin can be imputed. There can be no sin in the sensual part of man independently of the will. The inordinate motions of the sensual appetite which precede the advertence of reason, or which are suffered unwillingly, are not even venial sins. The temptations of the flesh not consented to are not sins. Concupiscence, which remains after the guilt of original sin is remitted in baptism, is not sinful so long as consent is not given to it (Coun. of Trent., sess. V, can. v). The sensual appetite of itself cannot be the subject of mortal sin, for the reason that it can neither grasp the notion of God as an ultimate end, nor avert us from Him, without which aversion there cannot be mortal sin. The superior reason, whose office it is to occupy itself with Divine things, may be the proximate principle of sin both in regard to its own proper act, to know truth, and as it is directive of the inferior faculties: in regard to its own proper act, in so far as it voluntarily neglects to know what it can and ought to know; in regard to the act by which it directs the inferior faculties, to the extent that it commands inordinate acts or fails to repress them (I–II, Q. lxxiv, a. 7, ad 2um).

The will never consents to a sin that is not at the same time a sin of the superior reason as directing badly, by either actually deliberating and commanding the consent, or by failing to deliberate and impede the consent of the will when it could and should do so. The superior reason is the ultimate judge of human acts and has an obligation of deliberating and deciding whether the act to be performed is according to the law of God. Venial sin may also be found in the superior reason when it deliberately consents to sins that are venial in their nature, or when there is not a full consent in the case of a sin that is mortal considered objectively.

Causes of Sin.—Under this head, it is needful to distinguish between the efficient cause, i.e. the agent performing the sinful action, and those other agencies, influences or circumstances, which incite to sin and consequently involve a danger, more or less grave, for one who is exposed to them. These inciting causes are explained in special articles on OCCASIONS OF SIN and TEMPTATION. Here we have to consider only the efficient cause or causes of sin. These are interior and exterior. The complete and sufficient cause of sin is the will, which is regulated in its actions by the reason, and acted upon by the sensitive appetites. The principal interior causes of sin are ignorance, infirmity or passion, and malice. Ignorance on the part of the reason, infirmity and passion on the part of the sensitive appetite, and malice on the part of the will. A sin is from certain malice when the will sins of its own accord and not under the influence of ignorance or passion.

The exterior causes of sin are the devil and man, who move to sin by means of suggestion, persuasion, temptation, and bad example. God is not the cause of sin (Counc. of Trent., sess. VI, can. vi, in Denz.-Bann., 816). He directs all things to Himself and is the end of all His actions, and could not be the cause of evil without self-contradiction. Of whatever entity there is in sin as an action, He is the cause. The evil will is the cause of the disorder (I–II, Q. lxxix, a. 2). One sin may be the cause of another inasmuch as one sin may be ordained to another as an end. The seven capital sins, so called, may be considered as the source from which other sins proceed. They are sinful propensities which reveal themselves in particular sinful acts. Original sin by reason of its dire effects is the cause and source of sin in so far as by reason of it our natures are left wounded and inclined to evil. Ignorance, infirmity, malice, and concupiscence are the consequences of original sin.

Effects of Sin.—The first effect of mortal sin in man is to avert him from his true last end, and deprive his soul of sanctifying grace. The sinful act passes, and the sinner is left in a state of habitual aversion from God. The sinful state is voluntary and imputable to the sinner, because it necessarily follows from the act of sin he freely placed, and it remains until satisfaction is made (see PENANCE). This state of sin is called by theologians habitual sin, not in the sense that habitual sin implies a vicious habit, but in the sense that it signifies a state of aversion from God depending on the preceding actual sin, consequently voluntary and imputable. This state of aversion carries with it necessarily in the present order of God's providence the privation of grace and charity by means of which man is ordered to his supernatural end. The privation of grace is the "macula peccati" (St. Thomas I–II, Q. lxxxvi), the stain of sin spoken of in Scripture (Jos., xxii, 17; Isaias, iv, 4; 1 Cor., vi, 11). It is not anything positive, a quality or disposition, an obligation to suffer, an extrinsic denomination coming from sin, but is solely the privation of sanctifying grace. There is not a real but only a conceptual distinction between habitual sin (*reatus culpæ*) and the stain of sin (*macula peccati*). One and the same privation considered as destroying the due order of man to God is habitual sin, considered as depriving the soul of the beauty of grace is the stain or "macula" of sin.

The second effect of sin is to entail the penalty of undergoing suffering (*reatus pœnæ*). Sin (*reatus culpæ*) is the cause of this obligation (*reatus pœnæ*). The suffering may be inflicted in this life through the medium of medicinal punishments, calamities, sickness, temporal evils, which tend to withdraw from sin; or it may be inflicted in the life to come by the justice of God as vindictive punishment. The punishments of the future life are proportioned to the sin committed, and it is the obligation of undergoing this punishment for unrepented sin that is signified by the "reatus pœnæ" of the theologians. The penalty to be undergone in the future life is divided into the pain of loss (*pœna damni*) and the pain of sense (*pœna sensus*). The pain of loss is the privation of the beatific vision of God in punishment of turning away from Him. The pain of sense is suffering in punishment of the conversion to some created thing in place of God. This two-fold pain in punishment of mortal sin is eternal (I Cor., vi, 9; Matt., xxv, 41; Mark, ix, 45). One mortal sin suffices to incur punishment. (See HELL.) Other effects of sins are: remorse of conscience (Wisdom, v, 2–13); an inclination towards evil, as habits are formed by a repetition of similar acts; a darkening of the intelligence, a hardening of the will (Matt., xiii, 14–15; Rom., xi, 8); a general vitiating of nature, which does not however totally destroy the substance and faculties of the soul but merely weakens the right exercise of its faculties.

IV. VENIAL SIN.—Venial sin is essentially different from mortal sin. It does not avert us from our true last end, it does not destroy charity, the principle of union with God, nor deprive the soul of sanctifying grace, and it is intrinsically reparable. It is called venial precisely because, considered in its own proper nature, it is pardonable; in itself meriting, not eternal, but temporal punishment. It is distinguished from mortal sin on the part of the disorder. By mortal sin man is entirely averted from God, his true last end, and, at least implicitly, he places his last end in some created thing. By venial sin he is not averted from God, neither does he place his last end in creatures. He remains united with God by charity, but does not tend towards Him as he ought. The true nature of sin as it is contrary to the eternal law, repugnant namely to the primary end of the law, is found only in mortal sin. Venial sin is only in an imperfect way contrary to the law, since it is not contrary to the primary end of the law, nor does it avert man from the end intended by the law (St. Thomas, I–II, Q. lxxxviii, a. 1; and Cajetan, I–II, Q. lxxxviii, a. 1, for the sense of the *præter legem* and *contra legem* of St. Thomas).

Definition.—Since a voluntary act and its disorder are of the essence of sin, venial sin as it is a voluntary act may be defined as a thought, word, or deed at variance with the law of God. It retards man in the attainment of his last end while not averting him from it. Its disorder consists either in the not fully deliberate choosing of some object prohibited by the law of God, or in the deliberate adhesion to some created object not as an ultimate end but as a medium, which object does not avert the sinner from God, but is not, however, referable to Him as an end. Man cannot be averted from God except by deliberately placing his last end in some created thing, and in venial sin he does not adhere to any temporal good, enjoying it as a last end, but as a medium referring it to God not actually but habitually inasmuch as he himself is ordered to God by charity. "Ille qui peccat venialiter, inhæret bono temporali non ut fruens, quia non constituit in eo finem, sed ut utens, referens in Deum non actu sed habitu" (I–II, Q. lxxxviii, a. 1, ad 3). For a mortal sin, some created good must be adhered to as a last end at least implicitly. This adherence cannot be accomplished by a semi-deliberate act. By adhering to an object that is at variance with the law of God and yet not destructive of the primary end of the Divine law, a true opposition is not set up between God and that object. The created good is not desired as an end. The sinner is not placed in the position of choosing between God and creature as ultimate ends that are opposed, but is in such a condition of mind that if the object to which he adheres were prohibited as contrary to his true last end he would not adhere to it, but would prefer to keep friendship with God. An example may be had in human friendship. A friend will refrain from doing anything that of itself will tend directly to dissolve friendship while allowing himself at times to do what is displeasing to his friends without destroying friendship.

The distinction between mortal and venial sin is set forth in Scripture. From St. John (I John, v, 16–17) it is clear there are some sins "unto death" and some sins not "unto death", i. e. mortal and venial. The classic text for the distinction of mortal and venial sin is that of St. Paul (I Cor., iii, 8–15), where he explains in detail the distinction between mortal and venial sin. "For other foundation no man can lay, but that which is laid; which is Christ Jesus. Now if any man build upon this foundation gold, silver, precious stones, wood, hay, stubble: every man's work shall be manifest; for the day of the Lord shall declare it; because it shall be revealed in fire; and the fire shall try every man's work, of what sort it is. If any man's work abide, which he hath built thereupon, he shall receive a reward. If any man's work burn, he shall suffer loss; but he himself shall be saved, yet so as by fire." By wood, hay, and stubble are signified venial sins (St. Thomas, I–II, Q. lxxxix, a. 2) which, built on the foundation of a living faith in Christ, do not destroy charity, and from their very nature do not merit eternal but temporal punishment. "Just as", says St. Thomas, [wood, hay, and stubble] "are gathered together in a house and do not pertain to the substance of the edifice, so also venial sins are multiplied in man, the spiritual edifice remaining, and for these he suffers either the fire of temporal tribulations in this life, or of purgatory after this life and nevertheless obtains eternal salvation." (ibid.)

The suitableness of the division into wood, hay, and stubble is explained by St. Thomas (iv, dist. 21, Q. i, a. 2). Some venial sins are graver than others and less pardonable, and this difference is well signified by the difference in the inflammability of wood, hay, and stubble. That there is a distinction between mortal and venial sins is of faith (Counc. of Trent, sess. VI, c. xi and canons 23–25; sess. XIV, de pœnit., c. v). This distinction is commonly rejected by all heretics ancient and modern. In the fourth century Jovinian asserted that all sins are equal in guilt and deserving of the same punishment (St. Aug., "Ep. 167", ii, n. 4); Pelagius (q. v.), that every sin deprives man of justice and therefore is mortal; Wyclif, that there is no warrant in Scripture for differentiating mortal from venial sin, and that the gravity of sin depends not on the quality of the action but on the decree of predestination or reprobation so that the worst crime of the predestined is infinitely less than the slightest fault of the reprobate; Hus, that all the actions of the vicious are mortal sins, while all the acts of the good are virtuous (Denz.-Bann., 642); Luther, that all sins of unbelievers are mortal and all sins of the regenerate, with the exception of infidelity, are venial; Calvin, like Wyclif, bases the difference between mortal sin and venial sin on predestination, but adds that a sin is venial because of the faith of the sinner. The twentieth among the condemned propositions of Baius reads: "There is no sin venial in its nature, but every sin merits eternal punishment" (Denz.-Bann., 1020). Hirscher in more recent times taught that all sins which are fully deliberate are mortal, thus denying the distinction of sins by reason of their objects and making the distinction rest on the imperfection of the act (Kleutgen, 2nd ed., II, 284, etc.).

Malice of Venial Sin.—The difference in the malice of mortal and venial sin consists in this: that mortal sin is contrary to the primary end of the eternal law, that it attacks the very substance of the law which commands that no created thing should be preferred to God as an end, or equalled to Him, while venial sin is only at variance with the law, not in contrary opposition to it, not attacking its substance. The substance of the law remaining, its perfect accomplishment is prevented by venial sin.

Conditions.—Venial sin is committed when the matter of the sin is light, even though the advertence of the intellect and consent of the will are full and deliberate, and when, even though the matter of the sin be grave, there is not full advertence on the part of the intellect and full consent on the part of the will. A precept obliges *sub gravi* when it has for its object an important end to be attained, and its transgression is prohibited under penalty of losing God's friendship. A precept obliges *sub levi* when it is not so directly imposed.

Effects.—Venial sin does not deprive the soul of sanctifying grace, or diminish it. It does not produce a *macula*, or stain, as does mortal sin, but it lessens the lustre of virtue—"In anima duplex est nitor, unus quiden habitualis, ex gratia sanctificante, alter actualis ex actibus virtutum, jamvero peccatum veniale impedit quidem fulgorem qui ex actibus virtutum oritur, non autem habitualem nitorem, quia non excludit nec minuit habitum charitatis" (I–II, Q. lxxxix, a. 1). Frequent and deliberate venial sin lessens the fervour of charity, disposes to mortal sin (I–II, Q. lxxxviii, a. 3), and hinders the reception of graces God would otherwise give. It displeases God (Apoc., ii, 4–5) and obliges the sinner to temporal punishment either in this life or in Purgatory. We cannot avoid all venial sin in this life. "Although the most just and holy occasionally during this life fall into some slight and daily sins, known as venial, they cease not on that account to be just" (Counc. of Trent, sess. VI, c. xi). And canon xxiii says: "If any one declare that a man once justified cannot sin again, or that he can avoid for the rest of his life every sin, even venial, let him be anathema", but according to the common opinion we can avoid all such as are fully deliberate. Venial sin may coexist with mortal sin in those who are averted from God by mortal sin. This fact does not change its nature or intrinsic reparability, and the fact that it is not coexistent with charity is not the result of venial sin, but of mortal sin. It is *per accidens*, for an extrinsic reason, that venial sin in this case is irreparable, and is punished in hell. That venial sin may appear in its true nature as essentially different from mortal sin it is considered as *de facto* coexisting with charity (I Cor., iii, 8–15). Venial sins do not need the grace of absolution. They can be remitted by prayer, contrition, fervent communion, and other pious works. Nevertheless it is laudable to confess them (Denn.-Bann., 1539).

V. PERMISSION OF SIN AND REMEDIES.—Since it is of faith that God is omnipotent, omniscient, and all good it is difficult to account for sin in His creation. The existence of evil is the underlying problem in all theology. Various explanations to account for its existence have been offered, differing according to the philosophical principles and religious tenets of their authors. Any Catholic explanation must take into account the defined truths of the omnipotence, omniscience, and goodness of God; free will on the part of man; and the fact that suffering is the penalty of sin. Of metaphysical evil, the negation of a greater good, God is the cause inasmuch as he has created beings with limited forms. Of physical evil (*malum pœnæ*) He is also the cause. Physical evil, considered as it proceeds from God and is inflicted in punishment of sin in accordance with the decrees of Divine justice, is good, compensating for the violation of order by sin. It is only in the subject affected by it that it is evil.

Of moral evil (*malum culpæ*) God is not the cause (Counc. of Trent, sess. VI, can. vi), either directly or indirectly. Sin is a violation of order, and God orders all things to Himself, as an ultimate end, consequently He cannot be the direct cause of sin. God's withdrawal of grace which would prevent the sin does not make Him the indirect cause of sin inasmuch as this withdrawal is affected according to the decrees of His Divine wisdom and justice in punishment of previous sin. He is under no obligation of impeding the sin, consequently it cannot be imputed to Him as a cause (I–II, Q. lxxix, a. 1). When we read in Scripture and the Fathers that God inclines men to sin the sense is, either that in His just judgment He permits men to fall into sin by a punitive permission, exercising His justice in punishment of past sin; or that He directly causes, not sin, but certain exterior works, good in themselves, which are so abused by the evil wills of men that here and now they commit evil; or that He gives them the power of accomplishing their evil designs. Of the physical act in sin God is the cause inasmuch as it is an entity and good. Of the malice of sin man's evil will is the sufficient cause. God could not be impeded in the creation of man by the fact that He foresaw his fall. This would mean the limiting of His omnipotence by a creature, and would be destructive of Him. He was free to create man even though He foresaw his fall, and He created him, endowed him with free will, and gave him sufficient means of persevering in good had he so willed. We must sum up our ignorance of the permission of evil by saying in the words of St. Augustine, that God would not have permitted evil had He not been powerful enough to bring good out of evil. God's end in creating this universe is Himself, not the good of man, and somehow or other good and evil serve His ends, and there shall finally be a restoration of violated order by Divine justice. No sin shall be without its punishment. The evil men do must be atoned for either in this world by penance (see PENANCE) or in the world to come in purgatory or hell, according as the sin that stains the soul, and is not repented of, is mortal or venial, and merits eternal or temporal punishment. (See EVIL.) God has provided a remedy for sin and manifested His love and goodness in the face of man's ingratitude by the Incarnation of His Divine Son (see INCARNATION); by the institution of His Church to guide men and interpret to them His law, and administer to them the sacraments, seven channels of grace, which, rightly used, furnish an adequate remedy for sin and a means to union with God in heaven, which is the end of His law.

Sense of Sin.—The understanding of sin, as far as it can be understood by our finite intelligence, serves to unite man more closely to God. It impresses him with a salutary fear, a fear of his own powers, a fear, if left to himself, of falling from grace; with the necessity he lies under of seeking God's help and grace to stand firm in the fear and love of God, and make progress in the spiritual life. Without the acknowledgment that the present moral state of man is not that in which God created him, that his powers are weakened; that he has a supernatural end to attain, which is impossible of attainment by his own unaided efforts, without grace there being no proportion between the end and the means; that the world, the flesh, and the devil are in reality active agents fighting against him and leading him to serve them instead of God, sin cannot be understood. The evolutionary hypothesis would have it that physical evolution accounts for the physical origin of man, that science knows no condition of man in which man exhibited the characteristics of the state of original justice, no state of sinlessness. The fall of man in this hypothesis is in reality a rise to a higher grade of being. "A fall it might seem, just as a vicious man sometimes seems degraded below the beasts, but in promise and potency, a rise it really was" (Sir O. Lodge, "Life and Matter", p. 79). This teaching is destructive of the notion of sin as taught by the Catholic Church. Sin is not a phase of an upward struggle, it is rather a deliberate, wilful refusal to struggle. If there has been no fall from a higher to a lower state, then the teaching of Scripture in regard to Redemption and the necessity of a baptismal regeneration is unintelligible. The Catholic teaching is the one that places sin in its true light, that justifies the condemnation of sin we find in Scripture.

The Church strives continually to impress her children with a sense of the awfulness of sin that they may fear it and avoid it. We are fallen creatures, and our spiritual life on earth is a warfare. Sin is our enemy, and while of our own strength we cannot avoid sin, with God's grace we can. If we but place no obstacle to the workings of grace we can avoid all deliberate sin. If we have the misfortune to sin, and seek God's grace and pardon with a contrite and humble heart, He will not repel us. Sin has its remedy in grace, which is given us by God, through the merits of His only-begotten Son, Who has redeemed us, restoring by His passion and death the order violated by the sin of our first parents, and making us once again children of God and heirs of heaven. Where sin is looked on as a necessary and unavoidable condition of things human, where inability to avoid sin is conceived as necessary, discouragement naturally follows. Where the Catholic doctrine of the creation of man in a superior state, his fall by a wilful transgression, the effects of which fall are by Divine decree transmitted to his posterity, destroying the balance of the human faculties and leaving man inclined to evil; where the dogmas of redemption and grace in reparation of sin are kept in mind, there is no discouragement. Left to ourselves we fall, by keeping close to God and continually seeking His help we can stand and struggle against sin, and if faithful in the battle we must wage shall be crowned by God in heaven. (See CONSCIENCE; JUSTIFICATION; SCANDAL.)

A. C. O'NEIL.

Sinai (סיני, Σινâ, *Sinai* and *Sina*), the mountain on which the Mosaic Law was given. Horeb and Sinai were thought synonymous by St. Jerome ("De situ et nom. Hebr.", in P. L., XXIII, 889), W. Gesenius (חרב סיני), and, more recently, G. Ebers (p. 381). Ewald, Delitzsch, Ed. Robinson, E. H. Palmer, and others think Horeb denoted the whole mountainous region about Sinai (Ex., xvii, 6). The origin of the name *Sinai* is disputed. It seems to be an adjective from סין, "the desert" (Ewald and Ebers) or "the moon-god" (E. Schrader and others). The mount was called Sinai, or "the mount of God" probably before the time of Moses (Josephus, "Antiq. Jud.", II, xii.) The name is now given to the triangular peninsula lying between the desert of Southern Palestine, the Red Sea, and the gulfs of Akabah and Suez, with an area of about 10,000 sq. miles, which was the scene of the forty years' wandering of the Israelites after the Exodus from Egypt.

The principal topographical features are two. North of the Jabal et-Tih (3200 to 3950 feet) stretches an arid plateau, the desert of Tih, marked by numerous Wadis, notably El-Arish, the "River of Egypt", which formed the southern boundary of the Promised Land (Gen., xv, 18; Num., xxxiv, 5). South of Jabal et-Tih rises a mountainous mass of granite streaked with porphyry, dividing into three principal groups: the western, Jabal Serbal (6750 feet); the central, Jabal Mûsa (7380 feet), Jabal Catherine (8560 feet), and Jabal Um Schomer (8470 feet); the eastern, Jabal Thebt (7906 feet) and Jabal Tarfa, which terminates in Ras Mohammed. It is among these mountains that Jewish and Christian tradition places the Sinai of the Bible, but the precise location is uncertain. It is Jabal Mûsa, according to a tradition traceable back to the fourth century, when St. Silvia of Aquitaine was there. Jabal Mûsa is defended by E. H. and H. S. Palmer, Vigouroux, Lagrange, and others. However, the difficulty of applying Ex., xix, 12, to Jabal Mûsa and the inscriptions found near Jabal Serbal have led some to favour Serbal. This was the opinion of St. Jerome (P. L., XXIII, 916, 933) and Cosmas (P. G., LXXXVIII, 217), and more recently of Burkhard and Lepsius, and it has of late been very strongly defended by G. Ebers, not to mention Beke, Gressmann, and others, who consider the whole story about Sinai (Ex., xix) only a mythical interpretation of some volcanic eruption. The more liberal critics, while agreeing generally that the Jewish traditions represented by the "Priest-codex" and "Elohistic documents" place Sinai among the mountains in the south-central part of the peninsula, yet disagree as to its location by the older "Jahvistic" tradition (Ex., ii, 15, 16, 21; xviii, 1, 5). A. von Gall, whose opinion Welhausen thinks the best sustained, contends that Meribar (D. V. Temptation.—Ex., xvii, 7) is identical with Cades (Num., xxxiii, 36; xxvii, 14), that the Israelites never went so far south as Jabal Mûsa, and hence that Sinai must be looked for in Madian, on the east coast of Akabar. Others (cf. Winckler, II, p. 29; Smend, p. 35, n. 2; and Weill, opp. cit. infra in bibliography) look for Sinai in the near neighbourhood of Cades (Ayn Qâdis) in Southern Palestine.

MOUNT SERBAL
Identified by St. Jerome and others with the Sinai of the Bible

Sinai was the refuge of many Christian anchorites during the third-century persecutions of the Church. There are traces of a fourth-century monastery near Mount Serbal. In 527 the Emperor Justinian built the famous convent of Mt. Sinai on the north foot of Jabal Mûsa, which has been known since the ninth century as St. Catherine's. Its small library contains about 500 volumes of valuable manuscripts in Greek, Arabic, Syriac, Ethiopic, etc. It was here that Tischendorf, during his researches in 1844, 1853, and 1859, found a very ancient Greek MS. (since known as the "Codex Sinaiticus") containing most of the Septuagint, all the new Testament, the "Epistle of Barnabas", and the first part of the "Shepherd" of Hermas. Forty-three MS. pages found by him are preserved at the University of Leipzig and known as the "Codex Friderico-Augustanus". In 1892 Mrs. Smith Lewis found at Sinai a fourth-century palimpsest Syriac text of St. Luke's Gospel. Sinai is rich in valuable inscriptions. M. de Vogüé gives 3200 Egyptian and Semitic inscriptions found in the Wâdi Mukatteb, the ruins of the temple of Ischta, or Astaroth-Carmain, and the iron and turquoise mines and granite and marble quarries, which were extensively worked under the twelfth and eighteenth Egyptian dynasties.

The present population of Sinai is 4000 to 6000 semi-nomadic Arabs, Mohammedans, governed by their tribal sheikhs and immediately subject to the commandant of the garrison at Qalʿat un-Nakhl, under the Intelligence Department of the Egyptian War Office at Cairo.

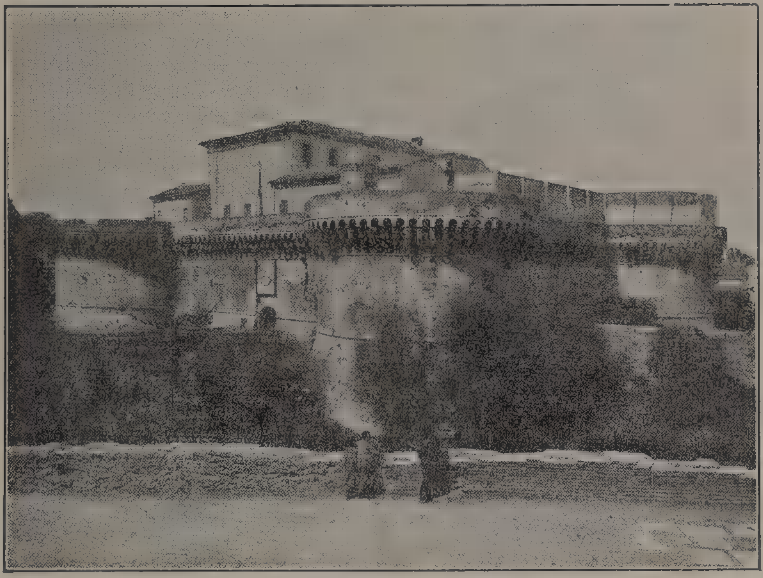
Sinaiticus Codex. See CODEX SINAITICUS.

Sinaloa, DIOCESE OF (SINALOENSIS), in the Republic of Mexico, suffragan of the Archdiocese of Durango. Its area is that of the State of Sinaloa, 27,552 sq. miles, and its population (1910) 323,499. Culiacan, the capital of the state and residence of the bishop and governor, counts a population (1910) of 13,578. The present territory of Sinaloa was discovered in 1530 by the ill-reputed D. Nuño de Guzman who founded the city of San Miguel de Culiacan. A few Spaniards established a colony there. The province of Culiacan was soon obliged to face the terrors of war brought upon it by the barbarous cruelties of Nuño and his favourite, Diego Hernandez de Proaño. So frightened was Nuño by the terrible insurrection that he removed Proaño, placing in his stead Cristóbal de Tapia, whose humanitarian measures slowly restored confidence. Although colonized from the beginning of the sixteenth century, most of the territory, excepting a few strong places, was inhabited by fierce pagan tribes, for whose conversion the Jesuits laboured early in the seventeenth century. After having subdued and evangelized the Indians of the mission of Piaxtla in a comparatively short time, and after having turned over to the Bishop of Durango the settlements under their control, the Jesuits extended their domination over the Indians living in the northern part of the actual state and at the time of their expulsion (by decree of Charles III) they fruitfully administered the missions of Chinipas and Sinaloa. In Chinipas they had residences at Guasarapes, Santa Ana, Secora, Moris, Barbaroco, Santa Ines, Serocagui, Tubares, Satebó, Baborigame, Nabogame, and San Andres; in Sinaloa (misión del Fuerte) they had residences at Mocorito, Nio, Guazave, Chicorato, Mochicave, Batacosa, Conicari, Tehueco, Ocoroni, and Bacubirito. It is notable that the towns of the misión del Rio Yaqui, which now belong to the Diocese of Sonora, were then included in the mission of Sinaloa. When the See of Durango was founded in 1620, Sinaloa, which until then had belonged to the Diocese of Guadalajara, became part of it; on the foundation (1780) of the Diocese of Sonora, it became a part of the latter. However, the residence of the bishop, after having been successively at Arispe and Alamo, passed to Culiacan, capital of Sinaloa until 1883, when Leo XIII founded the Diocese of Sinaloa, which had formed part of the ecclesiastical province of Guadalajara, and the Bishop of Sonora removed to Hermosillo. In 1891, when the new archiepiscopal See of Durango was created, Sinaloa became one of its suffragans.



The Castle, Sinigaglia

The diocese has 1 seminary with 18 students; 10 parochial schools; 3 colleges with 677 students.

Sinigaglia (Senigallia), Diocese of (Senogalliensis), in the Province of Ancona in the Marches (Central Italy). The city is situated on the Adriatic at the mouth of the Misa, which divides it into two parts. Maritime commerce, the cultivation and manufacture of silk, agriculture, and cattle-raising form the means of support of the population. The fortifications constructed by the dukes of Urbino and by the popes still remain in part. Among the churches, besides the cathedral, that of Santa Maria delle Grazie (1491) without the city walls deserves mention; it possesses a Madonna with six saints by Perugino, and another Madonna by Piero della Francesca. The name Senigallia records the Senones, a tribe of Gauls who possessed this city before its conquest by the Romans. The latter founded a colony here called Sena Hadria, but later the name most commonly used was Senogallia or Senigallia. In the Civil War (B.C. 82) it was sacked by Pompey, then one of Sulla's generals. It was pillaged a second time by Alaric, A.D. 408. Under the Byzantine rule it belonged to the so-called Pentapolis. Several times in the sixth and eighth centuries the Lombards attempted to capture it, and, in fact, shortly before the city was bestowed upon the Holy See it was the seat of a Duke Arioldo, who in 772 owed allegiance to King Desiderius. It afterwards shared the vicissitudes of the March of Ancona, and at the end of the twelfth century was the seat of a count. In the wars between the popes and Frederick II it belonged for the most part to the party of the Guelphs, for which reason it sustained many sieges, and was in 1264 sacked by Percivale Doria, captain of King Manfred. Hardly recovered from this calamity, it fell into the power of Guido di Montefeltro (1280). In 1306 it was captured by Pandolfo Malatesta of Pesaro and remained in his family, notwithstanding that they were expelled by Cardinal Bertrando du Poyet and later by Cardinal Albornoz (1355). In 1416 Ludovico Migliorati of Fermo and the cities of Ancona and Camerino formed a league against Galeotto Malatesta, and captured Sinigaglia, but they afterwards restored it. In 1445 it was taken by Sigismondo Malatesta of Rimini, who also secured the investiture from Eugenius IV and fortified the city.

After various vicissitudes Sinigaglia was (1474) given in fief to Giovanni della Rovere, a nephew of Sixtus IV. He married the last heiress of the duchy of Urbino, of which the city thus became a part (1508). In December, 1502, Sinigaglia, which had thrown open its gates to Cæsar Borgia, was the scene of the celebrated treachery by which Borgia rid himself of his enemies, the petty lords of the Romagna. In 1624 it came under the immediate suzerainty of the popes. In 1683 Turkish pirates disembarked and plundered the city. Sinigaglia was the birthplace of Pius IX and B. Gherardo di Serra (fourteenth century). The patron saint of Sinigaglia is St. Paulinus, whose body is preserved in the cathedral (as is attested for the first time in 1397). He is, therefore, not identical with St. Paulinus of Nola, nor is it known to what epoch he belongs. The first bishop of certain date was Venantius (502). About 562 the bishop was St. Bonifacius, who at the time of the Lombard invasion was martyred by the Arians. Under Bishop Sigismundus (c. 590) the relics of St. Gaudentius, Bishop of Rimini and martyr, were transported to Sinigaglia. Other bishops of the diocese are: Robertus and Theodosius (1057), friends of St. Peter Damianus; Jacopo (1232–1270), who rebuilt the cathedral which had been destroyed in 1264 by the Saracen troops of King Manfred; Francesco Mellini (1428), an Augustinian, who died at Rome, suffocated by the crowd at a consistory of Egenius IV. Under Bishop Antonio Colombella (1438), an Augustinian, Sigismondo Malatesta, lord of Sinigaglia, angered by his resistance to the destruction of certain houses, caused the cathedral and the episcopal palace to be demolished. The precious materials were transported to Rimini and were used in the construction of S. Francesco (*tempio Malatestiano*). Under Bishop Marco Vigerio della Rovere (1513) the new cathedral was begun in 1540; it was consecrated in 1595 by Pietro Ridolfi (1591), a learned writer. Other bishops were Cardinal Antonio Barberini, a Capuchin brother of Urban VIII; Cardinal Domenico Poracciani (1714); Annibale della Genga (1816), who afterwards became Pope Leo XII. The diocese is suffragan of Urbino; it has 48 parishes with 114 secular and 78 regular clergy; 92,000 souls; 15 monasteries for men; 19 convents for women; and 3 institutes for female education.

U. Benigni.

Sinis, a titular see in Armenia Secunda, suffragan of Melitene. The catalogue of titular bishoprics of the Roman Curia formerly contained a see of Sinita, in Armenia. When the list was revised in 1884, this name was replaced by Sinis, mentioned as belonging to Armenia Secunda, with Melitene, now Malatia, as its metropolis. Ptolemy, V. 7, 5, mentions a town called Siniscolon in Cappadocia at Melitene, near the Euphrates. Müller in his "Notes à Ptolemy" ed. Didot, I (Paris, 1901), 887, identifies this with Sinekli, a village near the Euphrates, "ab Argovan versus ortum hibernum", about nineteen miles north of Malatia in the vilayet of Mamouret ul-Aziz. But it seems certain that Siniscolon is a mis-reading for "Sinis Colonia", a form found in several MSS. Ramsay, "Asia Minor", 71, 272, 314, reads Sinis for Pisonos in "Itinerar. Anton." and especially for Sinispora in the "Tabula Peutingeriana" (Sinis, Erpa), and places Sinis Colonia twenty-two Roman miles west of Melitene, on the road to Cæsarea. There is no mention of this town in the Greek "Notitiæ episcopatuum" among the suffragans of Melitene, and none of its bishops is known, so it seems never to have been a bishopric.

S. Pétridès.

Sinna. See Sehna, Diocese of.

Sinope, a titular see in Asia minor, suffragan of Amasea in Helenopontus. It is a Greek colony, situated on a peninsula on the coast of Paphlagonia, of very early origin, some attributing its foundation to the Argonaut Autolycus, a companion of Hercules. Later it received a colony from Miletus which seems to have been expelled or conquered by the Cimmerians (Herodotus, IV, 12); but in 632 B.C. the Greeks succeeded again in capturing it. Henceforth Sinope enjoyed great prosperity and founded several colonies, among them being Cerasus, Cotyora, and Trapezus. The town took part in the Peloponnesian War, supporting Athens. Xenophon stopped there with his forces on the retreat of the Ten Thousand (Anab. V, v, 3; Diodor. Sicul., XIV, 30, 32; Ammien Marcel., XXII, 8). Fruitlessly besieged in 220 B.C. by Mithridates IV, King of Pontus, Sinope was taken by Pharnaces in 183 B.C., and became the capital and residence of the kings of Pontus. It was the birthplace of Mithridates the Great, who adorned it with magnificent monuments and constructed large arsenals there for his fleet. Lucullus captured it and gave it back its autonomy. Cæsar also established the Colonia Julia Cæsarea there in 45 B.C. when his supremacy began. Sinope was also the birthplace of the cynic philosopher, Diogenes, Diphilus, the comic poet, and Aquila, the Jew, who translated the Old Testament into Greek in the second century A.D. A Christian community existed there in the first half of the second century, with a bishop, the father of the celebrated heretic Marcion, whom he expelled from his diocese. Among its other bishops may be mentioned St. Phocas, venerated on 22 September, with St. Phocas, the gardener of the same town, who is possibly to be identified with him; Prohæresios, present at the Councils of Gangres and Philippopolis in 343 and 344; Antiochus at the Council of Chalcedon, 451; Sergius at the Sixth Œcumenical Council, 681; Zeno, who was exiled in 712 for opposing Monothelitism; Gregory, present at the Seventh Council in 787, beheaded in 793 for revolting against the emperor, etc. A little before 1315 the Bishop of Sinope, driven out of his see by the Turks, received in compensation the metropoles of Sida and Sylæos (Miklosich and Müller, "Acta patriarchatus Constantinopolitani", I, 34); the diocese must have been suppressed upon his death, as it is not mentioned in the "Notitiæ episcopatuum" of the fifteenth century. In 1401 a Greek merchant who visited Sinope found everything in disorder as a result of the Turkish inroads (Wächter, "Der Verfall des Griechentums in Kleinasien im XIV. Jahrhundert", 20); however, the town, which had belonged to the Empire of Trapezus from 1204 was not captured till 1470 by Mahomet II. In November, 1853, the Turkish fleet was destroyed by the Russians in the port of Sinope. Sinope is now the chief town of a sanjak of the vilayet of Castamouni, containing 15,000 inhabitants, about one half of whom are Greek schismatics.

Smith, *Dict. of Greek and Roman Geog.* (London, 1870), s. v.; Robinson, *Ancient Sinope* (Baltimore, 1906); Le Quien, *Oriens christianus* (Paris, 1740), I, 537-40; Vailhé, *Les évêques de Sinope* in *Echos d'Orient*, XI, 210-12; Cuinet, *La Turquie d'Asie* (Paris, 1891), IV. 574-82.

Sinuessa, Synod of. See Marcellinus, Saint, Pope.

Sion. See Jerusalem.

Sion, a titular see in Asia Minor, suffragan of Ephesus. No civil document mentions it. It is numbered among the suffragans of Ephesus in the Greek "Notitiæ episcopatuum", from the seventh to the thirteenth century. [See Gelzer in "Abhandlungen der k. bayer. Akademie der Wiss.", I. Cl. XXI Bd. III Abth. (Munich, 1900), 536, 552; Idem, "Georgii Cyprii descriptio orbis romani" (Leipzig, 1890), 8, 62; Parthey, "Hierocles Synecdemus e Notit. gr. episcopat. (Berlin, 1866), 61, 103, 155, 167, 203, 245.] The names of only three bishops of Sion are known: Nestorius, present at the Council of Ephesus, 431; John, at the Council in Trullo, 692; Philip, represented at Nicæa, 787, by the priest Theognis (Le Quien, "Oriens christianus", I, 721). This author asks if Basil, Bishop πόλεως Ἀσαίων represented at Chalcedon, 451, by his metropolitan does not belong to Sion; it is more likely that he was Bishop of Assus. Ramsay ("Asia Minor", 105) thinks that Sion is probably the same town as Tianae, or Tiarae mentioned by Pliny, V, 33, 3, and Hierocles, 661, 8, and Attaca, mentioned by Strabo, XIII, 607; but this is very doubtful. In any case the site of Sion is unknown.

S. Pétridès.

Sion, Diocese of (Sedunensis), a Swiss bishopric depending directly on the Holy See.

History.—The Diocese of Sion is the oldest in Switzerland and one of the oldest north of the Alps. At first its see was at Octodorum, now called Martinach, or Martigny. According to tradition there was a Bishop of Octodorum, named Oggerius, as early as A. D. 300. However, the first authenticated bishop is St. Theodore (d. 391), who was present at the Council of Aquileia in 381. On the spot where the Abbey of Saint-Maurice now stands he built a church in honour of St. Mauritius, martyred here about 300. He also induced the hermits of the vicinity to unite in a common life, thus beginning the Abbey of Saint-Maurice, the oldest north of the Alps. Theodore rebuilt the church at Sion, which had been destroyed by Emperor Maximianus at the beginning of the fourth century. At first the diocese was a suffragan of Vienne; later it became suffragan of Tarentaise. In 580 the bishop, St. Heliodorus, transferred the see to Sion, as Octodorum was frequently endangered by the inundations of the Rhone and the Drance. There were frequent disputes with the monks of the Abbey of Saint-Maurice, who were jealously watchful that the bishops should not extend their jurisdiction over the abbey. Several of the bishops united both offices, as: Wilcharius (764–80), previously Archbishop of Vienne, from which he had been driven by the Saracens; St. Alteus, who received from the pope a Bull of exemption in favour of the monastery (780); Aimo II, son of Count Hubert of Savoy, who entertained Leo IX at Saint-Maurice in 1049.

The last king of Upper Burgundy, Rudolph III, granted the Countship of Valais to Bishop Hugo (998–1017); this union of the spiritual and secular powers made the bishop the most powerful ruler in the valley of the Upper Rhone. Taking this donation as a basis, the bishops of Sion extended their secular power, and the religious metropolis of the valley became also the political centre. However, the union of the two powers was the cause of violent disputes in the following centuries. For, while the spiritual jurisdiction of the bishop extended over the whole valley of the Rhone above Lake Geneva, the Countship of Valais included only the upper part of the valley, reaching to the confluence of the Trient and the Rhone. The attempts of the bishops of Sion to carry their secular power farther down the Rhone were bitterly and successfully opposed by the abbots of Saint-Maurice, who had obtained large possessions in Lower Valais. The bishops were also opposed by the patrons of the abbey, the counts of Savoy, who used this position to increase their suzerainty over Lower Valais. The medieval bishops of Sion belonged generally to noble families of Savoy and Valais and were often drawn into the feuds of these families. Moreover the bishops were vigorously opposed by the petty feudal nobles of Valais, who, trusting to their fortified castles on rocky heights, sought to evade the supremacy of the bishop who was at the same time count and prefect of the Holy Roman Empire. Other opponents of the bishops were the flourishing peasant communities of Upper Valais, which were called later the *sieben Zehnten* (seven-tenths). Their struggles with Savoy forced the bishops to grant continually increasing political rights to the peasant communities. Thus Bishop William IV of Raron (1437–57) was obliged to relinquish civil and criminal jurisdiction over the *sieben Zehnten* by the Treaty of Naters in 1446, while a revolt of his subjects compelled Bishop Jost of Silinen (1482–96) to flee from the diocese. Walter II of Supersax (1457–82) took part in the battles of the Swiss against Charles the Bold of Burgundy and his confederate, the Duke of Savoy, and in 1475 drove the House of Savoy from Lower Valais. The most important bishop of this era was Matthew Schinner (1499–1522), a highly cultivated Humanist. Bishop Schinner, fearing that French supremacy would endanger the freedom of the Swiss, placed the military force of the diocese at the disposal of the pope and in 1510 brought about an alliance for five years between the Swiss Confederacy and the Roman Church. In return for this Julius II made the bishop a cardinal. In 1513 the bishop had succeeded in having his diocese separated from the Archdiocese of Tarentaise and placed directly under the control of the pope. The defeat of the Swiss in 1515 at the battle of Marignano, at which Schinner himself fought, weakened his position in the diocese, and the arbitrary rule of his brothers led to a revolt of his subjects; in 1518 he was obliged to leave the diocese.

The new doctrines of the Reformation found little acceptance in Valais, although preachers were sent into the canton from Berne, Zurich, and Basle. In 1529 Bishop Adrian I of Riedmatten (1529–48), the cathedral chapter, and the *sieben Zehnten* formed an alliance with the Catholic cantons of the Confederation, the purpose of which was to maintain and protect the Catholic Faith in all the territories of the allied cantons against the efforts of the Reformed cantons. On account of this alliance Valais aided in gaining the victory of the Catholics over the followers of Zwingli at Cappel in 1531; this victory saved the possessions of the Catholic Church in Switzerland. The abbots of Saint-Maurice opposed all religious innovations as energetically as did Bishops Adrian I of Riedmatten, Hildebrand of Riedmatten (1565–1604), and Adrian II of Riedmatten (1604–13), so that the whole of Valais remained Catholic. Both Adrian II and his successor Hildebrand Jost (1613–38) were again involved in disputes with the *sieben Zehnten* in regard to the exercise of the rights of secular supremacy. In order to put an end to these quarrels and not to endanger the Catholic Faith he relinquished in 1630 the greater part of his rights as secular suzerain, and the power of the bishop was thereafter limited almost entirely to the spiritual sphere.

The secular power of the bishops was brought to an end by the French Revolution. In 1798 Valais, after an heroic struggle against the supremacy of France, was incorporated into the Helvetian Republic, and Bishop John Anthony Blatter (1790–1817) retired to Novara. During the sway of Napoleon Valais was separated from Switzerland in 1802 as the Rhodanic Republic, and in 1810 was united with France. Most of the monasteries were suppressed. In 1814 Valais threw off French supremacy, when the Allies entered the territory; in 1815 it joined Switzerland as one of the cantons. As partial compensation for the loss of his secular power the bishop received a post of honour in the Diet of the canton and the right to four votes. Disputes often arose as the Constitution of 1815 of the canton gave Upper Valais political predominance in the cantonal government, notwithstanding the fact that its population was smaller than that of Lower Valais. This led in 1840 to a civil war with Lower Valais, where the "Young Swiss" party, hostile to the Church, were in control. The party friendly to the Church conquered, it is true, and the influence of the Church over teaching was, at first, preserved, but on account of the defeat of the *Sonderbund*, with which Valais had united, a radical Government gained control in 1847. The new administration at once showed itself unfriendly to the Church, secularized many church landed properties, and wrung large sums of money from the bishop and monasteries. When in 1856 the moderate party gained the cantonal election, negotiations were begun with Bishop Peter Joseph von Preux (1843–75), and friendly relations were restored between the diocese and the canton. In 1880 the two powers came to an agreement as to the lands taken from the Church in 1848; these, so far as they had not been sold, were given back for their original uses. Since then the bishop and the Government have been on friendly terms. The new Constitution of 1907 declares the Catholic religion to be the religion of the canton, and forbids any union of spiritual and secular functions. The ordinances regulating the election of a bishop which have been in existence from early times, at least, contradict this (see below). The present bishop is Julius Mauritius Abbet, b. 12 Sept., 1845, appointed auxiliary bishop *cum jure successionis* 1 Oct., 1895, succeeded to the see 26 Feb., 1901.

Statistics.—The boundaries of the Diocese of Valais have hardly been changed since it was founded; the diocese includes the Upper Rhone Valley, that is, the Canton of Valais, with exception of the exempt Abbey of Saint-Maurice, and of the Catholic inhabitants of Saint-Gingolph, who belong to the French Diocese of Annecy; it also includes the parishes of Bex and

Aigle that belong to the Canton of Vaud. In 1911 the diocese had 11 deaneries, 125 parishes, 70 chaplaincies, 208 secular priests, 135 regular priests and professed, about 120,000 Catholics. Nearly 30 per cent of the population of the diocese speak German, and nearly 65 per cent French; the language of the rest of the population is Italian. The bishop is elected by the denominationally mixed Great Council from a list of four candidates presented by the cathedral chapter, and the election is laid before the pope for confirmation. The cathedral chapter consists of ten canons; in addition five rectors are included among the cathedral clergy. The clergy are trained at a seminary for priests at Sion that has six ecclesiastical professors and twelve resident students; there are also six theological students studying at the University of Innsbruck. The religious orders of men in the diocese are: Augustinian Canons, with houses on the Great St. Bernard, the Simplon, and at Martigny, containing altogether 45 priests, 6 professed and 7 lay-brothers; Capuchins, at Sion and Saint-Maurice, numbering 22 priests, 6 students of theology, and 9 lay-brothers. The exempt abbey of Augustinian Canons at Saint-Maurice contains 46 priests, 9 professed and lay-brothers. The orders and congregations of nuns in the diocese are: Bernardines at Colombay; Hospital Sisters at Sion; Sisters of St. Vincent de Paul at Saint-Maurice; Franciscan Nuns, at the same place; Sisters of Charity of the Holy Cross at Sion, Leuk, and Leukerbad; Ursuline Nuns at Sion and Brieg.

JOSEPH LINS.

Sionita. See GABRIEL SIONITA.

Sioux City, DIOCESE OF (SIOPOLITAN.), erected 15 Jan., 1902, by Leo XIII. The establishment of this diocese was provided for in the Bull appointing Most Rev. John J. Keane, D.D., to the Archbishopric of Dubuque on 24 July, 1900. This provision was made on the occasion of that appointment for the reason that the new diocese was taken entirely from the Archdiocese of Dubuque. It comprises twenty-four counties in north-western Iowa, including a territory of 14,518 square miles. Sioux City is on the extreme limit of the western boundary of Iowa, situated on the east bank of the Missouri River, about one hundred miles north of Omaha. With the exception of Des Moines, the capital, it is the largest and most enterprising municipality in the State of Iowa, containing a population of between fifty and sixty thousand. It is in the midst of a large and rich agricultural country, and relies chiefly on the products of the soil, of which the staple article is corn; consequently grain-packing is the chief industry of Sioux City. The Catholic population of the diocese is almost sixty thousand. It has 138 churches, including missions, 122 priests, of whom 6 are religious (4 Friars Minor and 2 Fathers of the Sacred Heart); 53 parochial schools, with 4 hospitals; 4 academies; 2 schools of domestic science; an orphanage, a Good Shepherd home, an infant asylum, a home for the aged, and a working girls' home. There are 7327 children in the parish schools, and nearly 8000 under Catholic care. The composition of the Catholic population of the diocese is English-speaking and German. These form the principal elements of the Church's membership here, and are almost equally divided in numbers. A characteristic feature of western Catholicism is manifest here as in other western dioceses, that is the ardent desire of the people for parochial schools wherever it is possible. Out of the 10,000 children of school age (i. e. under seventeen years) in the diocese, three-fourths are in parochial schools. The following orders conduct schools and charitable institutions in the diocese: Sisters of Charity B.V.M., Sisters of Christian Charity, Sisters of St. Dominic, Sisters of St. Francis (Dubuque, Iowa), Franciscan Sisters (Clinton, Iowa), Franciscan Sisters of Perpetual Adoration, School Sisters of St. Francis, Presentation Nuns, Servants of Mary, Sisters of St. Benedict, Sisters of Mercy, Sisters of the Good Shepherd.

Since its establishment nine years ago, the diocese is thoroughly organized and has been constantly expanding by the erection of churches, schools, and other institutions. The present bishop, the Right Reverend Philip J. Garrigan, D.D., first bishop of the diocese, was born in Ireland in the early forties, came to this country with his parents, and received his elementary education in the public schools of Lowell, Mass. He pursued his classical course at St. Charles's College, Ellicott City, Maryland, and courses of philosophy and theology at the Provincial Seminary of New York at Troy, where he was ordained on 11 June, 1870. After a short term as curate of St. John's Church, Worcester, Massachusetts, he was appointed director of the Troy seminary for three years; and was for fourteen years afterwards pastor of St. Bernard's Church, Fitchburg, Massachusetts. In the fall of 1888 he was appointed first vice-rector of the Catholic University at Washington, D. C., which position he also held for fourteen years. He was named Bishop of Sioux City on 21 March, 1902, and consecrated at the see of his home diocese, Springfield, Massachusetts, on 25 May of the same year, by the Right Rev. T. D. Beaven, and on 18 June following took possession of his see.

PHILIP J. GARRIGAN.

Sioux Falls, DIOCESE OF (SIOUXORMENSIS), suffragan of St. Paul, comprises all that part of the State of South Dakota east of the Missouri River, an area of 34,861 square miles. The western portion of the state, forming the present Diocese of Lead, was detached from the Diocese of Sioux Falls, 8 August, 1902. The early history of religion in South Dakota (until 1879) must be sought for in the histories respectively of St. Paul, Dubuque, and Nebraska. The first Mass celebrated in South Dakota was in 1842, in Brown County, by the late Monsignor Ravoux of St. Paul on his first visit to the Sioux Indians; and the first church erected was in 1867, by the late Father Pierre Boucher, who was sent by Bishop Grace of St. Paul to Jefferson, Union County, to attend the Catholics scattered about that centre. In August, 1879, the Vicariate Apostolic of Dakota, whose boundaries corresponded with the then existing civil boundaries of the newly formed Territory of Dakota, was established, and the Right Reverend Martin Marty, Abbot of St. Meinrad's Benedictine Abbey, Indiana, nominated Bishop of Tiberias and vicar Apostolic of the new district. Bishop Marty was consecrated in the Church of St. Ferdinand, Ferdinand, Indiana, 1 Feb., 1880, by the Right Reverend Francis Silas Chatard, the present Bishop of Indianapolis. The vicariate was an immense district to govern (149,112 square miles) with scarcely any mode of travelling, except by the primitive ox or mule teams. A few miles of railroad existed from Sioux City to Yankton. The new vicar Apostolic went directly to Yankton, where he took up his residence. He found 12 priests administering to a scattered Catholic population of less than 14,000 souls and 20 churches. Many and heroic were the hardships endured by both bishop and priests. At the close of 1881 the number of priests increased to 37, the number of churches to 41 with 33 stations. There were 3 convents, 2 academies for young ladies, 4 parochial schools for the white and 4 schools for the Indian children, while the Catholic population, including 700 Indians, numbered 15,800 souls. The decade beginning with 1880, witnessed a wonderful development and the population increased from 135,180 to 250,000. The statistics at the end of 1883 show 45 priests, 82 churches, 67 stations, 4 convents, 4 academies, 12 parochial schools, 6 Indian schools and a Catholic population, including 1,600 Indians, of 25,600 souls. The Territory of Dakota was divided by Act of Congress, 22 February, 1889, and the two states, North and South Dakota, were admitted to the Union, 2 November, 1889. The same month witnessed the ecclesiastical division of the vicariate, and two new dioceses were formed, Sioux Falls (South Dakota) with Bishop Marty its first bishop; and Jamestown (North Dakota), now Fargo, with Bishop Shanley (d. July, 1909) its first incumbent. In 1894 Bishop Marty was transferred to the Diocese of St. Cloud, Minnesota, where he died 19 September, 1896.

The efforts of Bishop Marty were crowned with marvellous success. He devoted himself especially to the Indian race. He spoke their language and translated hymns and prayers into their tongue. The second and present (1911) Bishop of Sioux Falls, the Right Rev. Thomas O'Gorman, was born at Boston, Massachusetts, 1 May, 1843, he moved with his parents to St. Paul, and was one of the first two students selected for the priesthood by Bishop Cretin, the other was Archbishop Ireland. Having pursued his ecclesiastical studies in France, he returned to St. Paul, where he was ordained priest, 5 November, 1865. He was pastor in turn of Rochester and Faribault, Minn., and first president and professor of dogmatic theology at St. Thomas' College, St. Paul. In 1890 he was appointed Professor of Church History in the Catholic University, Washington, D. C., was consecrated in St. Patrick's Church, Washington, D. C. (19 April, 1896) by Cardinal Satolli, then Apostolic delegate to this country, and on 2 May, 1896, was installed in the pro-cathedral of his episcopal see. The statistics of the diocese then showed 51 secular and 14 regular priests, 50 churches with resident priests, 61 missions with churches, 100 stations, 10 chapels, 14 parochial schools, 61 Indian schools, 2 orphanages, and 1 hospital. There were 3 communities of men and 6 of women, while the Catholic population, white and Indian, was estimated at 30,000 souls. Bishop O'Gorman infused new life into the diocese. The population increased so rapidly that in 1902 the Diocese of Lead was erected. The statistics of the diocese (1911) are in priests, secular 102, regular 13; students 10; churches with resident priests, 91; missions with churches, 70; stations, 23; chapels, 13; parochial schools, 23 with 2,500 children in attendance; hospitals, 4. There are 3 communities of men: Benedictines, Eudists, and the Clerics of St. Viateur. The communities of women are: Dominican Sisters; Presentation Nuns; Benedictine Sisters; Sisters of the Third Order of St. Francis; School Sisters of St. Francis, and the Sisters of Charity of St. Louis. Columbus College at Chamberlain, in charge of the Clerics of St. Viateur is an institution of great promise. The Catholic population, including 500 Indians, is 50,000. In the vicariate Apostolic of thirty-one years ago, where there were only 1 bishop and 12 priests, there are now (1911) 4 bishops and 284 priests.

Diocesan Archives; Catholic Directories; personal recollections.

DANIEL F. DESMOND.

Sioux Indians, the largest and most important Indian tribe north of Mexico, with the single exception of the Ojibwa (Chippewa), who, however, lack the solidarity of the Sioux, being widely scattered on both sides of the international boundary, while the Sioux are virtually all within the United States and up to a comparatively recent period kept up close connexion among the various bands.

Name and Affiliation.—The name Sioux (pronounced Su) is an abbreviation of the French spelling of the name by which they were anciently known to their eastern Algonquian neighbours and enemies, viz. *Nadouessioux*, signifying "little snakes", i. e. little, or secondary enemies, as distinguished from the eastern Nadowe, or enemies, the Iroquois. This ancient name is now obsolete, having been superseded by the modern Ojibwa term *Buanag*, of uncertain etymology. They call themselves Dakota, Nakota, or Lakota, according to dialect, meaning "allies". From the forms Dakota, Lakota, and Sioux are derived numerous place-names within their ancient area, including those of two great states. Linguistically the Sioux are of the great Siouan stock, to which they have given name and of which they themselves now constitute nearly three-fourths. Other cognate tribes are the Assiniboin, Crow, Hidatsa, or Minitarí, Mandan, Winnebago, Iowa, Omaha, Ponca, Oto, Missouri, Kaw, Osage, and Quapaw, all excepting the Winnebago living west of the Mississippi; together with a number of tribes formerly occupying territories in Mississippi and the central regions of the Carolinas and Virginia, all now virtually extinct, excepting a handful of Catawba in South Carolina. Linguistic and traditionary evidence indicate this eastern region as the original home of the stock, although the period and causes of the westward migration remain a matter of conjecture. The Sioux language is spoken in three principal dialects, viz. Santee (pronounced Sahntee), or eastern; Yankton, or middle; and Teton, or western, differing chiefly in the interchange of *d*, *n*, and *l*, as indicated in the various forms of the tribal name. The Assiniboin are a seceded branch of the Yankton division, having separated from the parent tribe at some time earlier than 1640.

History.—When and why the Sioux removed from their original home in the East, or by what route they reached the upper Mississippi country, are unknown. When first noticed in history, about 1650, they centered about Mille Lac and Leech Lake, toward the heads of the Mississippi, in central Minnesota, having their eastern frontier within a day's march of Lake Superior. From this position they were gradually driven by the pressure, from the east, of the advancing Ojibwa, who were earlier in obtaining firearms, until nearly the whole nation had removed to the Minnesota and upper Red River, in turn driving before them the Cheyenne, Omaha, and other tribes. On reaching the buffalo plains and procuring horses, supplemented soon thereafter by firearms, they rapidly overran the county to the west and south-west, crossing the Missouri perhaps about 1750, and continuing on to the Black Hills and the Platte until checked by the Pawnee, Crow, and other tribes. At the beginning of treaty relations in 1805 they were the acknowledged owners of most of the territory extending from central Wisconsin, across the Mississippi and Missouri, to beyond the Black Hills, and from the Canada boundary to the North Platte, including all of Southern Minnesota, with considerable portions of Wisconsin and Iowa, most of both Dakotas, Northern Nebraska, and much of Montana and Wyoming. The boundaries of all that portion lying east of the Dakotas were defined by the great inter-tribal treaty of Prairie du Chien in 1825 and a supplemental treaty at the same place in 1830. At this period the Minnesota region was held by the various Santee bands; Eastern Dakota and a small part of Iowa were claimed by the Yankton and their cousins the Yanktonai; while all the Sioux territory west of the Missouri was held by bands of the great Teton division, constituting three-fifths of the whole nation.

Under the name of *Naduesiu* the Sioux are first mentioned by Father Paul le Jeune in the Jesuit Relation of 1640, apparently on the information of that pioneer western explorer, Jean Nicolet, the first white man known to have set foot in Wisconsin, probably in 1634–5. In 1655–6 two other famous French explorers, Radisson and Groseilliers, spent some time with them in their own country, about the western border of Wisconsin. At that time the Sioux were giving shelter to a band of refugee Hurons fleeing before the Iroquois. They were rated as possessing thirty villages, and were the terror of all the surrounding tribes by reason of their number and prowess, although admittedly less cruel. Fathers Allouez and Marquette, from their mission of St. Esprit, established at Lapointe (now Bayfield, Wis.) on Lake Superior in 1665, entered into friendly relations with the Sioux, which continued until 1671, when the latter, provoked by insults from the eastern tribes, returned Marquette's presents, declared war against their hereditary foes, and compelled the abandonment of the mission. In 1674 they sent a delegation to Sault Ste. Marie to arrange peace through the good offices of the resident Jesuit missionary, Father Gabriel Druillettes, who already had several of the tribe under instruction in his house, but the negotiations were brought to an abrupt end by a treacherous attack made upon the Sioux while seated in council in the mission church, resulting in the massacre of the ambassadors after a desperate encounter, and the burning of the church, which was fired over their heads by the Ojibwa to dislodge them.

The tribal war went on, but the Sioux kept friendship with the French traders, who by this time had reached the Mississippi. In 1680 one of their war parties, descending the Mississippi against the Illinois, captured the Recollect Father Louis Hennepin with two companions and brought them to their villages at the head of the river, where they held them, more as guests than prisoners, until released on the arrival of the trader, Du Luth, in the fall. While thus in custody Father Hennepin observed their customs, made some study of the language, baptized a child and attempted some religious instruction, explored a part of Minnesota, and discovered and named St. Anthony's Falls. In 1683 Nicholas Perrot established a post at the mouth of the Wisconsin. In 1689 he established Fort Perrot near the lower end of Lake Pepin, on the Minnesota side, the first post within the Sioux territory, and took formal possession of their country for France. The Jesuit Father Joseph Marest, officially designated "Missionary to the Nadouesioux", was one of the witnesses at the ceremony and was again with the tribe some twelve years later. Another post was built by Pierre LeSueur, near the present Red Wing about 1693, and in 1695 a principal chief of the tribe accompanied him to Montreal to meet the governor, Frontenac. By this time the Sioux had a number of guns and were beginning to wage aggressive warfare toward the west, driving the Cheyenne, Omaha, and Oto down upon the Missouri and pushing out into the buffalo plains. During Frontenac's administration mission work languished owing to his bitter hostility to missionaries, especially the Jesuits.

About the year 1698, through injudiciously assisting the Sioux against the Foxes, the French became involved in a tedious forty-years' war with the latter tribe which completely paralyzed trade on the upper Mississippi and ultimately ruined the Foxes. Before its end the Sioux themselves turned against the French and gave refuge to the defeated Foxes. In 1700 LeSueur had built Fort L'Huillier on the Blue Earth River near the present Mankato, Minn. In 1727, an ineffective peace having been made, the Jesuit Fathers, Ignatius Guignas and Nicolas de Gonnor, again took up work among the Sioux at the new Fort Beauharnais on Lake Pepin. Although driven out for a time by the Foxes, they returned and continued with the work some ten years, until the Sioux themselves became hostile. In 1736 the Sioux massacred an entire exploring party of twenty-one persons under command of the younger Verendrye at the Lake of the Woods, just beyond the northern (international) Minnesota boundary. Among those killed was the Jesuit father, Jean-Pierre Aulneau. In 1745–6, the Foxes having been finally crushed, De Lusignan again arranged peace with the Sioux, and between them and the Ojibwa, and four Sioux chiefs returned with him to Montreal. On the fall of Canada the Sioux, in 1763, sent delegates to the English post at Green Bay with proffers of friendship and a request for traders. They were described as "certainly the greatest nation of Indians ever yet found", holding all other Indians as "their slaves or dogs". Two thousand of their warriors now had guns, while the other and larger portion still depended upon the bow, in the use of which, and in dancing, they excelled the other tribes.

In the winter of 1766–7 the American traveller, Jonathan Carver, spent several months with the Santee visiting their burial-ground and sacred cave near the present St. Paul, and witnessing men and women gashing themselves in frenzied grief at their bereavement. Soon after this period the eastern Sioux definitively abandoned the Mille Lac and Leech Lake country to their enemies the Ojibwa, with whom the hereditary war still kept up. The final engagement in this upper region occurred in 1768 when a great canoe fleet of Sioux, numbering perhaps five hundred warriors, while descending the Mississippi from a successful raid upon the Ojibwa, was ambushed near the junction of Crow Wing River and entirely defeated by a much smaller force of the latter tribe. In 1775 peace was again made between the two tribes through the efforts of the English officials in order to secure their alliance in the coming Revolutionary struggle. The peace lasted until the close of the Revolutionary War, in which both tribes furnished contingents against the American frontier, after which the warriors returned to their homes, and the old feud was resumed. In the meantime the Teton Sioux, pressing westward, were gradually pushing the Arikara (Ree) up the Missouri, and by acquiring horses from the plains tribes had become metamorphosed from canoe men and gatherers of wild rice into an equestrian race of nomad buffalo hunters.

Some years after the close of the Revolution, perhaps about 1796, French traders in the American interest ascended the Missouri from St. Louis and established posts among the Yankton and Teton. In 1804 the first American exploring expedition, under Captains Lewis and Clark, ascended the river, holding councils and securing the allegiance of the Sioux and other tribes, and then crossing the mountains and descending the Columbia to the Pacific, returning over nearly the same route in 1806. As a result of this acquaintance the first Sioux (Yankton) delegation visited Washington in the latter year. At the same time, 1805–6, Lieutenant Zebulon Pike ascended the Mississippi on a similar errand to the Santee Sioux and other tribes of that region. In this he was successful and on 23 September, 1805, negotiated the first treaty of the Sioux with the United States, by which they ceded lands in the vicinity of the present St. Paul for the establishment of military posts, at the same time giving up their English flags and medals and accepting American ones. Up to this period and for some years later the rapidly diverging bands of the east and west still held an annual reunion east of the lower James River in eastern South Dakota. In 1807 Manuel Lisa, founder of the American Fur Company, "the most active and indefatigable trader that St. Louis ever produced" (Chittenden), established headquarters among the Sioux, at Cedar Island, below the present Pierre, S. D., later moving down to about the present Chamberlain. Lisa was a Spaniard, and like his French associates, Chouteau, Ménard, and Trudeau, was a Catholic. At his several trading posts among the Teton and Yankton Sioux, and the Omaha lower down the river, he showed the Indians how to plant gardens and care for cattle and hogs, besides setting up blacksmith shops for their benefit, without charge, and caring for their aged and helpless, so that it was said that he was better loved by the Sioux than any other white man of his time. Being intensely American in feeling, he was appointed first government agent for the upper Missouri River tribes, and by his great influence with them held them steady for the United States throughout the War of 1812, notwithstanding that most of the eastern, or Santee, Sioux, through the efforts of Tecumtha and a resident British trader, Robert Dickson, declared for England and furnished a contingent against Fort Meigs. Lisa died in 1820. At the close of the war, by a series of five similar treaties made 15 July, 1815, at Portage des Sioux, above St. Louis, the various Sioux bands made their peace with the United States and finally acknowledged its sovereignty. Other late hostile tribes made peace at the same time. This great treaty gathering, the most important ever held with the tribes of the Middle West, marks the beginning of their modern history. In 1820 Fort Snelling was built at the present Minneapolis to control the Santee Sioux and Ojibwa, an agency being also established at the same time. In 1825 another great treaty gathering was convened at Prairie du Chien for the delimitation of tribal boundaries to put an end to inter-tribal wars, and clear the way for future land cessions. At this period, and for years after, the Sioux led all other tribes in the volume of their fur trade, consisting chiefly of buffalo robes and beaver skins.

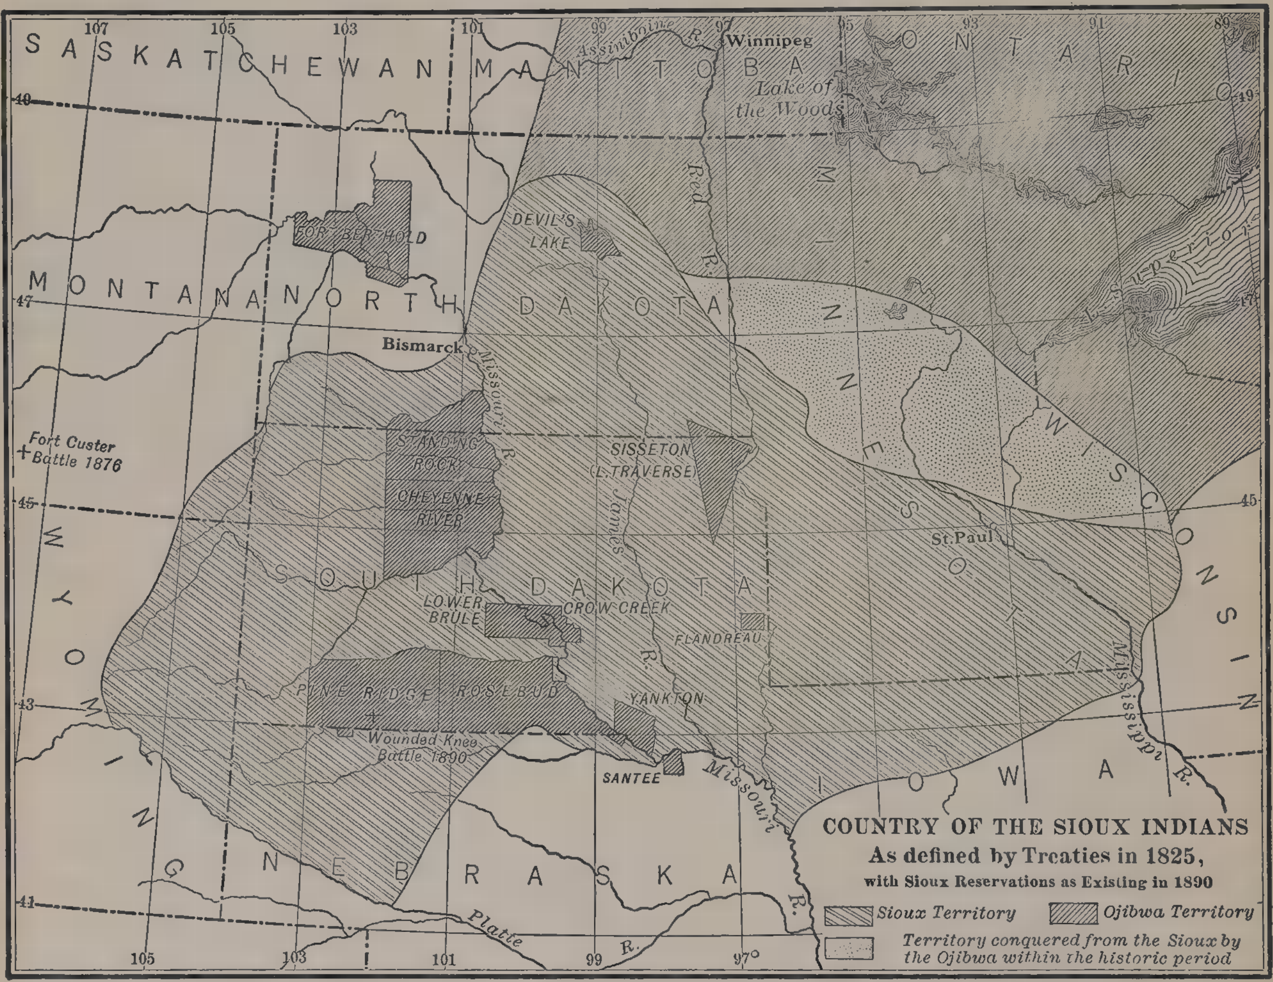
With the establishment of permanent government relations regular mission work began. In 1834 the brothers Samuel and Gideon Pond, for the Congregationalists, located among the Santee at Lake Calhoun, near the present St. Paul, Minn. In 1835 the same denomination established other missions at Lake Harriet and Lac-qui-Parle, Minn., under Rev. J. D. Stevens and Thomas Williamson respectively. In 1837 Williamson was joined by Rev. Stephen Riggs and his son Alfred. In 1852 the two last-named missions were removed to the upper Minnesota in consequence of a treaty cession. All of these workers are known for their linguistic contributions as well as for their missionary service. In 1837 a Lutheran mission was established at Red Wing and continued for some years. The successful establishment of these missions was due chiefly to the encouragement and active aid afforded by Joseph Renville, a remarkable half-breed, who stood high in the respect and affection of the eastern Sioux. Born in the wilderness in 1779 of an Indian mother, he had been taken to Canada, when a small boy, by his French father, a noted trader, and placed under the care of a Catholic priest, from whom he acquired some knowledge of French and of the Christian religion. The death of his father a few years later and his consequent return to the Sioux country put an end to his educational opportunity, but the early impression thus made was never effaced. On coming to manhood and succeeding to his father's business he sent across the ocean, probably through Dickson, the British trader, for a French Bible (which, when it came, was Protestant) and then hired a clerk who could read it to him. On the establishment of the post at Prairie du Chien he brought down his Indian wife and had her regularly married to him by a Catholic priest, he himself having previously instructed her in religion as well as he could. When the Congregationalists arrived he welcomed them as bringing Christianity, even though not of the form of his childhood teacher. He died in 1846.

Red Cloud, a Famous Chief of the Ogalala Sioux
From a Photograph

In 1841 Father Augustine Ravoux began work among the Santee in the neighbourhood of Fort Snelling, near which Father Galtier had just built a log chapel of St. Paul, around which grew the modern city. Applying himself to the study of the language, in which he soon became proficient, Father Ravoux in 1843 repaired to Prairie du Chien, and there with his own hands printed a small devotional work, "Katolik Wocekiye Wowapi Kin", which is still used as a mission manual. He continued with the tribe for several years, extending his ministrations also to the Yankton, until recalled to parish work. As early at least as 1840 the great Jesuit apostle of the North-West, Father P. J. De Smet, had visited the bands along the Missouri River, where Father Christian Hoecken had preceded him in 1837, instructing adults and baptizing children. Father De Smet made several other brief stops later on his way to and from the Rocky Mountain missions, and in the summer of 1848 spent several months in the camps of the Brulé and Ogalala, whom he found well disposed to Christianity. In 1850 Father Hoecken was again with the Yankton and Teton, but the design to establish a permanent mission was frustrated by his untimely death from cholera, 19 June, 1851. In the same summer Father De Smet attended the great inter-tribal gathering at Fort Laramie, where for several weeks he preached daily to the Sioux and other tribes, baptizing over fifteen hundred children. From that period until his death in 1872 a large portion of his time was given to the western Sioux, among whom his influence was so great that he was several times called in by the Government to assist in treaty negotiations, notably in the great peace treaty of 1868.

In 1837 the Sioux sold all of their remaining territory east of the Mississippi. In the winter of 1837–8 smallpox, introduced from a passing steamer, swept over all the tribes of the upper Missouri River, killing perhaps 30,000 Indians, of whom a large proportion were Sioux. About the same time the war with the

Ojibwa on the eastern frontier broke out again with greater fury than ever. In a battle near the present Stillwater, Minn., in June, 1839, some 50 Ojibwa were slain and shortly afterward a Sioux raiding party surprised an Ojibwa camp in the absence of the warriors and brought away 91 scalps. In 1851 the various Santee bands sold all their remaining lands in Minnesota and Iowa, excepting a twenty-mile strip along the upper Minnesota River. Although there were then four missions among the Santee, the majority of the Indians were reported to have "an inveterate hatred" of Christianity. In March, 1857, on some trifling provocation, a small band of renegade Santee, under an outlawed chief, Inkpaduta, "Scarlet Point," attacked the scattered settlements about Spirit Lake, on the Iowa-Minnesota border, burning houses, massacring about fifty persons, and carrying off several women, two of whom were killed later, the others being rescued by the Christian Indians. Inkpaduta escaped to take an active part in all the Sioux troubles for twenty years thereafter. In 1858 the Yankton Sioux sold all their lands in South Dakota, excepting the present Yankton reservation. The famous pipestone quarry in south-western Minnesota, whence the Sioux for ages had procured the red stone from which their pipes were carved, was also permanently reserved to this Indian purpose. In 1860 the first Episcopalian work was begun among the (Santee) Sioux by Rev. Samuel D. Hinman.



COUNTRY OF THE SIOUX INDIANS
As defined by Treaties in 1825,
with Sioux Reservations as Existing in 1890

In 1862 occurred the great "Minnesota outbreak" and massacre, involving nearly all the Santee bands, brought about by dissatisfaction at the confiscation of a large proportion of the treaty funds to satisfy traders' claims, and aggravated by a long delay in the annuity issue. The weakening of the local garrisons and the general unrest consequent upon the Civil War also encouraged to revolt. The trouble began 2 August with an attack upon the agency storehouse at Redwood, where five thousand Indians were awaiting the distribution of the delayed annuity supplies. The troops were overpowered and the commissary goods seized, but no other damage attempted. On 17 Aug. a small party of hunters, being refused food at a settler's cabin, massacred the family and fled with the news to the camp of Little Crow, where a general massacre of all the whites and Christian Indians was at once resolved upon. Within a week almost every farm cabin and small settlement in Southern Minnesota and along the adjoining border was wiped out of existence and most of the inhabitants massacred, in many cases with devilish barbarities, excepting such as could escape to Fort Ridgely at the lower end of the reservation. The missionaries were saved by the faithful heroism of the Christian Indians, who, as in 1857, stood loyally by the Government. Determined attacks were made under Little Crow upon Fort Ridgely (20–21 August) and New Ulm (22 August), the latter defended by a strong volunteer force under Judge Charles Flandrau. Both attacks were finally repulsed. On 2 Sept. a force of 1500 regulars and volunteers under Colonel (afterwards General) H. H. Sibley defeated the hostiles at Birch Coulee and again on 23 September at Wood Lake. Most of the hostiles now surrendered, the rest fleeing in small bands beyond the reach of pursuit. Three hundred prisoners were condemned to death by court martial, but the number was cut down by President Lincoln to thirty-eight, who were hanged at Mankato, 26 December, 1862. They were attended by Revs. Riggs and Williamson and by Father Ravoux, but although the other missionaries had been twenty-five years stationed with the tribe and spoke the language fluently, thirty-three of the whole number elected to die in the Catholic Church, two of the remaining five rejecting all Christian ministration. Three years later Father Ravoux again stood on the scaffold with two condemned warriors of the tribe.

Two months after the outbreak Congress declared the Santee treaties abrogated and the Minnesota reservations forfeited. One part of the fugitives trying to escape to the Yanktonai was overtaken and defeated with great loss by Sibley near Big Mound, North Dakota, 24 July, 1863. The survivors fled to the Teton beyond the Missouri or took refuge in Canada, where they are still domiciled. On 3 Sept. General Sully struck the main hostile camp under Inkpaduta at Whitestone Hill, west of Ellendale, N. D., killing 300 and capturing nearly as many more. On 28 July, 1864, General Sully delivered the final blow to the combined hostile force, consisting of Santee, Yanktonai, and some northern Teton, at Kildeer Mountain on the Little Missouri. The prisoners and others of the late hostile bands were finally settled on two reservations established for the purpose, viz. the (Lower) Yanktonai at Crow Creek, S. D., and the Santee at Santee, north-eastern Nebraska. Here they still remain, being now well advanced in civilization and Christianity, and fairly prosperous. The outbreak had cost the lives of nearly 1000 whites, of whom nearly 700 perished in the first few days of the massacre. The Indian loss was about double, falling almost entirely upon the Santee. Pananapapi (Strike-the-Ree), head chief of the 3000 Yankton, and a Catholic, had steadily held his people loyal and the great Brulé and Ogalala bands of the Teton, 13,000 strong, had remained neutral. In October, 1865, at old Fort Sully (near Pierre), S. D., a general treaty of peace was made with the Sioux, and one Teton band, the Lower Brulé, agreed to come upon a reservation. The majority of the great Teton division, however, comprising the whole strength of the nation west of the Missouri, refused to take part.

In the meantime serious trouble had been brewing in the West. With the discovery of gold in California in 1849 and the consequent opening of an emigrant trail along the North Platte and across the Rocky Mountains, the Indians became alarmed at the disturbance to their buffalo herds, upon which they depended for their entire subsistence. The principal complainants were the Brulé and Ogalala Sioux. For the protection of the emigrants in 1849 the Government bought and garrisoned the American Fur Company post of Fort Laramie on the upper North Platte, in Wyoming, later making it also an agency headquarters. In September, 1851, a great gathering of nearly all the tribes and bands of the Northern Plains was held at Fort Laramie, and a treaty was negotiated by which they came to an agreement in regard to their rival territorial claims, pledged peace among themselves and with the whites, and promised not to disturb the trail on consideration of a certain annual payment. Father De Smet attended throughout the council, teaching and baptizing, and gives an interesting account of the gathering, the largest ever held with the Plains Indians. The treaty was not ratified and had no permanent effect. On 17 August, 1854, while the Indians were camped about the post awaiting the distribution of the annuity goods, occurred the "Fort Laramie Massacre", by which Lieutenant Grattan and an entire detachment of 29 soldiers lost their lives while trying to arrest some Brulés who had killed and eaten an emigrant's cow. From all the evidence the conflict was provoked by the officer's own indiscretion. The Indians then took forcible possession of the annuity goods and left without making any attempt upon the fort or garrison. The Brulé Sioux were now declared hostile, and Gen. W. S. Harney was sent against them. On 3 September, with 1200 men, he came upon their camp at Ash Hollow, Western Nebraska, and, while pretending to parley on their proffer of surrender, suddenly attacked them, killing 136 Indians and destroying the entire camp outfit.

Late in 1863 the Ogalala and Brulé under their chiefs, Red Cloud (*Makhpiya-luta*) and Spotted Tail (*Shinté-galeshka*) respectively, became actively hostile, inflamed by reports of the Santee outbreak and the Civil War in the South. They were joined by the Cheyenne and for two years all travel across the plains was virtually suspended. In March, 1865, they were roused to desperation by the proclamation of two new roads to be opened through their best hunting grounds to reach the new gold fields of Montana. Under Red Cloud's leadership they notified the Government that they would allow no new roads or garrison posts to be established in their country, and carried on the war on this basis with such determination that by treaty at Fort Laramie through a peace commission in April–May, 1868, the Government actually agreed to close the "Montana road" that had been opened north from Laramie, and to abandon the three posts that had been established to protect it. Red Cloud himself refused to sign until after the troops had been withdrawn. The treaty left the territory south of the North Platte open to road building, recognized all north of the North Platte and east of the Bighorn Mountains as unceded Indian territory, and established the "Great Sioux Reservation", nearly equivalent to all of South Dakota west of the Missouri. Provision was made for an agency on the Missouri River and the inauguration of regular governmental civilizing work. In consideration of thus giving up their old freedom the Indians were promised, besides the free aid of blacksmiths, doctors, a saw mill, etc., a complete suit of clothing yearly for thirty years to every individual of the bands concerned, based on the actual yearly

Group of Sioux
Weasel Bear and Family, Pine Ridge, S. D.

census. Among the official witnesses were Rev. Hinman, the Episcopalian missionary, and Father De Smet. This treaty brought the whole of the Sioux nation under agency restriction, and with its ratification in February, 1869, the five years' war came to a close.

In this war Red Cloud had been the principal leader, Spotted Tail having been won to friendship earlier through the kindness extended by the officers at Fort Laramie on the occasion of the death of his daughter, who was buried there with Christian rites at her own request. The Cheyenne and Northern Arapaho also acted with the Sioux. The chief fighting centered around Fort Kearney, Wyoming, which Red Cloud himself held under repeated siege, and near which on 21 December, 1866, occurred the "Fetterman Massacre", when an entire detachment of 80 men under Captain Fetterman was exterminated by an overwhelming force of Indians. By treaties in 1867 reservations had been established at Lake Traverse, S. D. and at Fort Totten, N. D., for the Sisseton and Wahpeton Santee and the Cuthead Yanktonai, most of whom had been concerned in the Minnesota outbreak. In 1870 a part of the Christian Santee separated from their kinsmen in Nebraska and removed to Flandreau, S. D., and became citizens. In 1871, despite the protest of Red Cloud and other leading chiefs, the Northern Pacific railway was constructed along the south bank of the Yellowstone and several new posts built for its protection, and war was on again with the Teton Sioux, Cheyenne, and part of the Arapaho. Several skirmishes occurred, and in 1873 General G. A. Custer was ordered to Dakota. In the next year, while hostilities were still in progress, Custer made an exploration of the Black Hills, S. D., and reported gold. Despite the treaty and the military, there was at once a great rush of miners and others into the Hills. The Indians refusing to sell on any terms offered, the military patrol was withdrawn, and mining towns at once sprang up all through the mountains. Indians hunting by agents' permission in the disputed territory were ordered to report at their agencies by 31 January, 1876, or be considered hostile, but even the runners who carried the message were unable to return, by reason of the severity of the winter, until after war had been actually declared. This is commonly known as the "Custer War" from its central event, 25 June, 1876, the massacre of General Custer and every man of a detachment of the Seventh Cavalry, numbering 204 in all, in an attack upon the main camp of the hostile Sioux and Cheyenne, on the Little Bighorn River in south-eastern Montana. On that day and the next, in the same vicinity, other detachments under Reno and Benteen sustained desperate conflicts with the Indians, with the loss of some sixty more killed. The Indians, probably numbering at least 2500 warriors with their families, finally withdrew on the approach of Generals Terry and Gibbons from the north. The principal Sioux commanders were Crazy Horse and Gall, although Sitting Bull was also present. Red Cloud and Spotted Tail had remained at their agencies.

Several minor engagements later in the year resulted in the surrender and return of most of the hostiles to the reservation, while Sitting Bull and Gall and their immediate following escaped into Canada (June, 1877). By a series of treaties negotiated 23 Sept.-27 Oct., 1876, the Sioux surrendered the whole of the Black Hills country and the western outlet. On 7 Sept, 1877, Crazy Horse, who had come in with his band some months before, was killed in a conflict with the guard at Fort Robinson, Neb. In the same month the last hostiles surrendered. Soon after the treaty a large delegation visited Washington, following which event the Red Cloud (Ogalala) and Spotted Tail (Brulé) agencies were permanently established in 1878 at Pine Ridge and Rosebud, S. D., respectively. This date may be considered to mark the beginning of civilization in these two powerful bands. In 1881 all the late hostiles in Canada came in and surrendered. Sitting Bull and his immediate followers, after being held in confinement for two years, were allowed to return to their homes on Standing Rock reservation. On 5 August, 1881, Spotted Tail was killed by a rival chief. On 29 July, 1888, Strike-the-Ree, the famous Catholic chief of the Yankton, died at the age of 84.

In the allotment of Indian agencies to the management of the various religious denominations, in accord with President Grant's "peace policy" in 1870, only two of the eleven Sioux agencies were assigned to the Catholics, namely, Standing Rock and Devil's Lake, notwithstanding that, with the exception of a portion of the Santee and a few of the Yankton, the only missionaries the tribe had ever known from Allouez to De Smet had been Catholic, and most of the resident whites and mixed-bloods were of Catholic ancestry. Santee, Flandreau, and Sisseton (Lake Traverse) agencies of the Santee division were assigned to the Presbyterians, who had already been continuously at work among them for more than a generation. Yankton reservation had been occupied jointly by Presbyterians and Episcopalians in 1869, as was Cheyenne River reservation in 1873. Pine Ridge, Rosebud, Lower Brulé and Crow Creek reservations, comprising nearly one-half the tribe, were given to the Episcopalians, who erected buildings between 1872 (Crow Creek) and 1877 (Pine Ridge). At Devil's Lake an industrial boarding school was completed and opened in 1874 in charge of Benedictine Fathers and Grey Nun Sisters of Charity. At Standing Rock a similar school was opened in 1877 in charge of Benedictine priests and Sisters. Thus by 1878 regular mission plants were in operation on every Sioux reservation. Other Catholic foundations were begun at Crow Creek and Rosebud in 1886, at Pine Ridge in 1887, and at Cheyenne River in 1892. In 1887 the noted secular missionary priest, Father Francis M. J. Craft, opened school at Standing Rock and later succeeded in organizing in the tribe an Indian sisterhood which, however, was refused full ecclesiastical recognition. In 1891 he removed with his community to the Fort Berthold reservation, N. D., where for some years the Sioux Indian Sisters proved valuable auxiliaries, particularly in instructing the women and nursing the sick of the confederated Grosventres, Arikara, and Mandan. Later on several of them won commendation as volunteer nurses in Cuba during the Spanish War. This zealous sisterhood is no longer in existence. In 1889, after long and persistent opposition by the older chiefs, the "Great Sioux Reservation" was cut in two and reduced by about one half by a treaty cession which included almost all territory between White and Cheyenne Rivers, S. D., and all north of Cheyenne River west of 102°. The ceded lands were thrown open to settlement by proclamation in the next spring, and were at once occupied by the whites. In the meantime payment for the lands was delayed, the annuity goods failed to arrive until the winter was nearly over, the crops had failed through attendance of the Indians at the treaty councils in the preceding spring, epidemic diseases were raging in the camps, and as the final straw Congress, despite previous promise, cut down the beef ration by over four million pounds on the ground of the stipulated money payment, which, however, had not arrived.

A year before rumours had come to the Sioux of a new Indian Messiah arisen beyond the mountains to restore the old-time Indian life, together with their departed friends, in a new earth from which the whites should be excluded. Several tribes, including the Sioux, sent delegates to the home of the Messiah, in Western Nevada, to investigate the rumour. The first delegation, as well as a second, confirmed the truth of the report, and in the spring of 1890 the ceremonial "Ghost Dance," intended to hasten the fulfilment of the prophecy, was inaugurated at Pine Ridge. Because of its strong appeal to the Indians under the existing conditions, the Dance soon spread among other Teton reservations until the Indians were in a frenzy of religious excitement. The newly-appointed agent at Pine Ridge became frightened and called for troops, thus precipitating the outbreak of 1890. By 1 December 3000 troops were disposed in the neighbourhood of the western Sioux reservations the under orders of General Nelson Miles. Leading events of the outbreak were: the killing of Sitting Bull, his son, and six others on 15 December, at his camp on Grand River, Standing Rock reservation, while resisting arrest by the Indian police, six of whom were killed in the encounter; the flight of Sitting Bull's followers and others of Standing Rock and Cheyenne River reservations into the Bad Lands of western South Dakota where they joined other refugee "hostiles" from Pine Ridge and Rosebud; the fight at Wounded Knee Creek, twenty miles north-east of Pine Ridge agency, 29 December, 1890, between a band of surrendered hostiles under Big Foot and a detachment of the Seventh Cavalry under Colonel Forsyth. On 16 Jan., 1891, the hostiles surrendered to General Miles at Pine Ridge, and the outbreak was at an end. With the restoration of peace, grievances were adjusted and the work of civilization resumed. Under provision of the general allotment law of 1887 negotiations were concluded from time to time with the various bands by which the size of the reservations was still further curtailed, and lands allotted in severalty, until now almost all of the Sioux Indians are individual owners and well on the way to full citizenship. Indian dress and adornment are nearly obsolete, together with the tipi and aboriginal ceremonial, and the great majority are clothed in citizen's dress, living in comfortable small houses with modern furniture, and engaged in farming and stock raising. The death of the old chief, Red Cloud, at Pine Ridge in 1909, removed almost the last link binding the Sioux to their Indian past.

Religious Status.—in 1909 nearly 10,000 of the 25,000 Sioux within the United States were officially reported as Christians. The proportion is now probably at least one-half, of whom about half are Catholic, the others being chiefly Episcopalian and Presbyterian. The Catholic missions are: Our Lady of Sorrows, Fort Totten, N. D. (Devil's Lake Res.), Benedictine; St. Elizabeth, Cannonball, N. D. (Standing Rock Res.), Benedictine; St. Peter, Fort Yates, N. D. (Standing Rock Res.), Benedictine; St. James, Porcupine (Shields P. O.), N. D. (Standing Rock Res.), Benedictine; St. Benedict, Standing Rock Agency, S. D. (Standing Rock Res.), Benedictine; St. Aloysius, Standing Rock Agency, S. D., (Standing Rock Res.), Benedictine; St. Edward, Standing Rock Agency, S. D., (Standing Rock Res.), Benedictine; St. Bede, Standing Rock Agency, S. D. (Standing Rock Res.), Benedictine; Immaculate Conception, Stephan, S. D. (Crow Creek Res.), Benedictine; St. Matthew, Veblen Co. (Britton P. O.) S. D. (former Sisseton Res.), secular; Corpus Christi, Cheyenne River Agency, S. D. (Chey. R. Res.), secular; St. Francis, Rosebud, S. D. (Rosebud Res.), Jesuit; Holy Rosary, Pine Ridge, S. D. (Pine Ridge Res.), Jesuit. The two Jesuit missions maintain boarding-schools, and are assisted by Franciscan Sisters. The Immaculate Conception mission also maintains a boarding-school, with Benedictine Sisters. At the Fort Totten mission a monthly paper, "Sina Sapa Wocekiye Taeyanpaha" (Black-gown Prayer Herald), entirely in the Sioux language, is published under the editorship of Father Jerome Hunt, who has been with the mission from its foundation. Notable events in the religious life of the tribe are the Catholic Sioux congresses held in the summer of each year, one in North and one in South Dakota, which are attended by many high church dignitaries and mission workers and several thousands of Catholic Indians. Of some 470 Christian Sioux in Canada about one-fourth are Catholic, chiefly at Standing Buffalo Reservation, Sask., where they are served from the Oblate mission school at Qu'Appelle.

Organization and Culture.—The Sioux were not a compact nation with centralized government and supreme head chief, but were a confederacy of seven allied sub-tribes speaking a common language, each with a recognized head chief and each subdivided into bands or villages governed by subordinate chiefs. The seven sub-tribes, from east to west, were: (1) Mdewakantonwan (Mde-wakanton) Village (people) of the Spirit Lake (i.e. Mille Lac); (2) Wakhpekute "Leaf Shooters"; (3) Wakhpetonwan (Wahpeton), "Village in the Leaves"; (4) Sisitonwan (Sisseton), "Village of the Marsh"; (5) Ihanktonwan (Yankton), "Village at the End"; (6) Ihanktonwanna (Yanktonai), "Little Yankton"; (7) Titonwan (Teton), "Village of the Prairie". Of these, the first four, originally holding the heads of the Mississippi, constitute the Isanti (Santee) or eastern, dialectic group; The Yankton and Yanktonai, about the lower and upper courses of the James River respectively, together with the Assiniboin tribe constitute the central dialectic group. The great Teton division, west of the Missouri and comprising three-fifths of the whole nation, constitutes a third dialectic group. The Teton are divided into seven principal bands, commonly known as Ogalala (at Pine Ridge); Brulé (at Rosebud and Lower Brulé); Hunkpapa (at Standing Rock); Blackfoot (at Standing Rock and Cheyenne River); Miniconju, Sans-Arc, and Two Kettle (Cheyenne River). Among the more sedentary eastern bands chiefship seems to have been hereditary in the male line, but with the roving western bands it depended usually upon pre-eminent ability. In their original home about the heads of the Mississippi the Sioux subsisted chiefly upon wild rice, fish, and small game, and were expert canoe men, but as they drifted west into the plains and obtained possession of the horse their whole manner of life was changed, and they became a race of equestrian nomads, subsisting almost entirely upon the buffalo. They seem never to have been agricultural to any great extent. Their dwelling was the birch-bark lodge in the east and the buffalo-skin tipi on the plain. Their dead were sometimes deposited in a coffin upon the surface of the ground, but more often laid upon a scaffolding or in the tree-tops. Food and valuables were left with the corpse, and relatives gashed their bodies with knives and cut off their hair in token of grief. Besides the knife, bow, and hatchet of the forest warrior, they carried also on the plains the lance and shield of the horseman. Polygamy was recognized. There was no clan system.

To the Sioux the earth was a great island plain surrounded by an ocean far to the west of which was the spirit world. There were two souls—some said four—one of which remained near the grave after death, while the other travelled on to the spirit world, or in certain cases became a wandering and dangerous ghost. In the west also, in a magic house upon the top of a high mountain and guarded by four sentinel animals at the four doorways, lived the *Wakinyan*, or thunders, the greatest of the gods, and mortal enemies of the subterranean earth spirits and the water spirits. The sun also was a great god. There was no supreme "Great Spirit", as supposed by the whites, no ethical code to their supernaturalism, and no heaven or hell in their spirit world. Among animals the buffalo was naturally held in highest veneration. Fairies and strange monsters, both good and bad, were everywhere, usually invisible, but sometimes revealing themselves in warning portent. Dreams were held as direct revelations of the supernatural. Taboos, fasting, and sacrifices, including voluntary torture, were frequent. Among the great ceremonials the annual sun dance was the most important, on which occasion the principal performers danced at short intervals for four days and nights, without food, drink, or sleep, undergoing at the same time painful bodily laceration, either as a propitiation or in fulfilment of a thanksgiving vow. The several warrior orders and various secret societies each had their special dance, and for young girls there was a puberty ceremony. (For cults and home life see works of Dorsey and Eastman quoted in bibliography below.) In physique, intellect, morality, and general manliness the Sioux rated among the finest of the Plains tribes. Under the newer conditions the majority are now fairly industrious and successful farmers and stock-raisers.

Language and Literature.—The Sioux language is euphonious, sonorous, and flexible, and possesses a more abundant native literature than that of any other tribe within the United States, with the possible exception of the Cherokee. By means of an alphabet system devised by the early Presbyterian missionaries, nearly all of the men can read and write their own language. The printed literature includes religious works, school textbooks, grammars, and dictionaries, miscellaneous publications, and three current mission journals, Catholic, as already noted, Presbyterian, and Episcopal, all three entirely in Sioux. The earliest publication was a spelling-book by Rev. J. D. Stevens in 1836. In linguistics the principal is the "Grammar and Dictionary of the Dakota Language", by Rev. S. R. Riggs, published by the Smithsonian Institution, Washington, in 1852, and republished in part, with editing by Dorsey, by the Bureau of Am. Ethnology, Washington, in 1892–4.

Population.—Contrary to the usual rule with Indian tribes, the Sioux have not only held their own since the advent of the whites, but have apparently slightly increased. This increase, however, is due largely to incorporation of captives and intermarriage of whites. We have no reliable estimates for the whole tribe before 1849, when Governor Ramsey gave them "not over 20,000", while admitting that some resident authorities gave them 40,000 or more. Riggs in 1851 gives them about 25,000, but underestimates the western (Teton) bands. By official census of 1910 they number altogether 28,618 souls, including all mixed-bloods, distributed as follows: Minnesota, scattered, about 929; Nebraska, Santee agency, 1155; North Dakota, Devil's Lake (Fort Totten) agency, 986; Standing Rock agency, 3454; South Dakota, Flandreau agency, 275, Lower Brulé, 469, Crow Creek, 997, Yankton, 1753, Sisseton, 1994, Cheyenne River, 2590, Rosebud, 5096, Pine Ridge, 6758. Canada: Birdtail, Oak Lake, Oak River, Turtle Mountain, Portage La Prairie (Manitoba), 613; Wahspaton, Standing Buffalo, Moosejaw, Moose Woods (Sask.), 455. Those in Canada are chiefly descendants of refugees from the United States in 1862 and 1876.

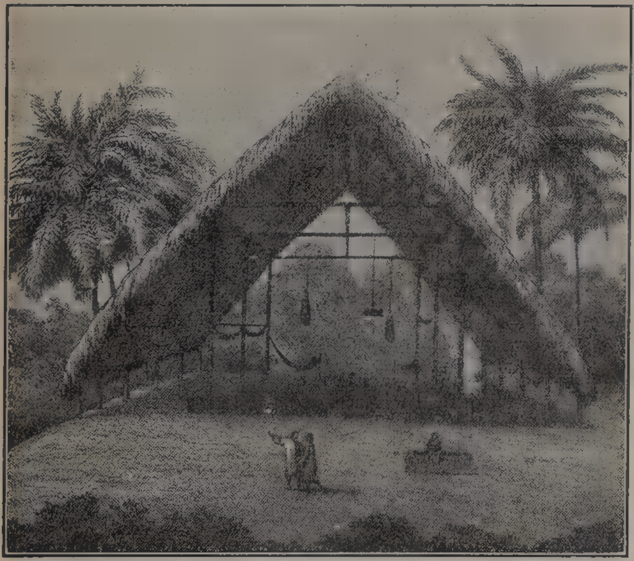
James Mooney.

Sipibo Indians, a numerous tribe of Panoan linguistic stock, formerly centring about the Pisqui and Aguaitia tributaries of the upper Ucayali River, Province of Loreto, north-eastern Peru, and now found as boatmen or labourers along the whole course of that stream. They speak the same language as the Conibo, Pano, and Setebo, whom they resemble in habit and ceremonial.

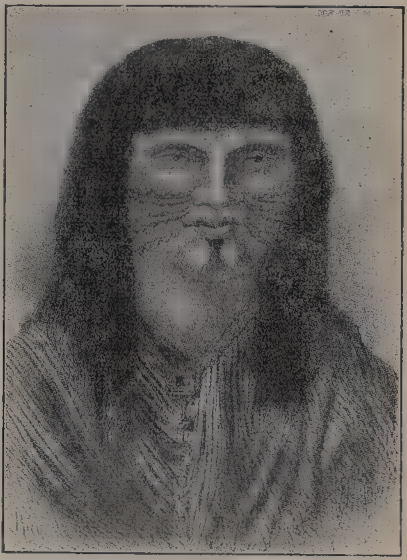
The Sipibo became known about the same time as their cognate tribes early in the seventeenth century, but opposed a determined resistance to the entrance of both gold-hunters and missionaries (1657), for a long time frustrating all Christianizing efforts in the Ucayali region by their constant raids upon the mission settlements, particularly of the Setebo. In 1670, in common with other tribes of that region, they were greatly wasted by smallpox. In 1736 they broke the power of the Setebo in a bloody battle, but in 1764 the Franciscan Father Juan de Frezneda entered their country and so far won their good will that he succeeded in making peace between the two tribes and in the next year (1765) established the first mission among the Sipibo under the title of Santo Domingo de Pisqui. This was shortly followed by the founding of Santa Barbara de Archani and Santa Cruz de Aguaitia in the same tribe, together with a resumption of work among the Conibo, first undertaken in 1685. Among other labourers in the Sipibo field at this period was Father José Amich, author of a history of the Ucayali missions. Suddenly and without warning in the summer of 1766 all the river tribes attacked the missions simultaneously, slaughtered nine of the missionaries together with their neophytes, and completely destroyed all that had been accomplished by years of persevering sacrifice. Rungato, a Setebo chief, who had professed the greatest friendship for the missionaries, appears to have been the leader. The reason of the outbreak was never known. It may have been jealousy of authority, impatience of restraint, covetousness of the mission property, some unrecorded outrage by the Spaniards on the frontier, some dream, or superstitious panic such as are of so frequent occurrence among savages. A small relief expedition sent out in charge of three Franciscans the next year learned the details of the massacre, and was forced to turn back, but was permitted to retire without molestation.

Aboriginal Village on the Pachytea River, Peru

This last rising of the wild tribes of the middle Ucayali was in some measure an echo of a similar rising of the wild Campa tribes on the upper branches of the same stream in 1742, led by Juan Santos, an apostate Quichua Indian, who assumed the title of the Inca Atahualpa (see Quichua), and resulting in the destruction of all the missions of that region and the slaughter of nearly eighty Franciscan missionaries. Of this rising of the Campa, Herndon says: "It is quite evident that no distaste for the Catholic religion induced this rebellion; for in the year 1750, eight years afterward, the Marquis of Mina-hermosa, marching into this country for the punishment of the rebels, found the church at Quimisi in perfect order, with candles burning before the images. He burned the town and church, and six years after this, when another entrance into this country was made by General Bustamente, he found the town rebuilt and a large cross erected in the middle of the plaza. I have had occasion myself to notice the respect and reverence of these Indians for their pastors, and their delight in participating in the ceremonial and sense-striking worship of the Roman Church." A similar instance is recorded of the revolted Pueblos (q. v.), as also of the unconverted Setebo. Following close upon the massacre of 1766 came the expulsion of the Jesuits by royal decree in the following year, and the Ucayali region was given over to barbarism until 1791, when by direction of the superior of the Franciscan college of Ocopa, Father Narciso Girbal with two companions once more braved the wilderness dangers and made successful foundation at Sarayacu (q. v.) into which mission and its branches most of the wandering river Indians were finally gathered.



Aboriginal House on the Ucayali River
The hanging bags contain pounded manioc root from which the poisonous juice is being pressed out.



A Sipibo Type

A description of the Sipibo will answer in most of its details for all the tribes of the Ucayali and Huallaga region, within the former sphere of influence of the Franciscan missionaries, with the addition that certain tribes, particularly the Cashibo, were noted for their cannibalism. There was very little tribal solidarity, each so-called tribe being broken up into petty bands ruled by local chiefs, and seldom acting together even against a common enemy. They subsisted chiefly on fish, game, turtle eggs, bananas, yuccas, and a little corn, agriculture, however, being but feebly developed. The root of the yucca was roasted as bread, ground between stones for flour, boiled or fried, while from the juice, fermented with saliva, was prepared the intoxicating *masato* or *chicha*, which was in requisition at all family or tribal festivals. Salt was seldom used, but clay-eating was common and sometimes of fatal consequence. Their houses, scattered simply at intervals along the streams, were of open framework thatched with palm leaves. The arrow poison, usually known as *curari*, was prepared from the juice of certain lianas or tree vines and was an article of intertribal trade over a great extent of territory. They either went entirely naked or wore a short skirt or sleeveless shirt woven of cotton or bark fibre. Head flattening and the wearing of nose and ear pendants and labrets were common. They blackened their teeth with a vegetable dye. The modern civilized Indians dress in light peon fashion.

Although most of the tribes could count no higher than five, their general mentality was high, and they progressed rapidly in civilized arts. Their religion was animism, dominated by the *yutumi* or priests, but with few great ceremonies. As among all savages, disease and death were commonly ascribed to evil spirits or witchcraft. Polygamy was universal, the women being frequently obtained by raids upon other tribes. Among their barbarous customs were the eating of prisoners of war, and sometimes of deceased parents, the killing of the helpless and of deformed children and twins, and a sort of circumcision of young girls at about the age of twelve years. A part of the Sipibo still roam the forests, but the majority are now civilized and employed as boatmen, rubber-gatherers, or labourers along the river. In common with all the tribes of the region their numbers are steadily decreasing. See also Setebo Indians.

James Mooney.

Sirach. See Ecclesiasticus.

Siricius, Saint, Pope (384–99), b. about 334; d. 26 November, 399. Siricius was a native of Rome; his father's name was Tiburtius. Siricius entered the service of the Church at an early age and, according to the testimony of the inscription on his grave, was lector and then deacon of the Roman Church during the pontificate of Liberius (352–66). After the death of Damasus, Siricius was unanimously elected his successor (December, 384) and consecrated bishop probably on 17 December. Ursinus, who had been a rival to Damasus (366), was alive and still maintained his claims. However, the Emperor Valentinian III, in a letter to Pinian (23 Feb., 385), gave his consent to the election that had been held and praised the piety of the newly-elected bishop; consequently no difficulties arose. Immediately upon his elevation Siricius had occasion to assert his primacy over the universal Church. A letter, in which questions were asked on fifteen different points concerning baptism, penance, church discipline, and the celibacy of the clergy, came to Rome addressed to Pope Damasus by Bishop Himerius of Tarragona, Spain. Siricius answered this letter on 10 February, 385, and gave the decisions as to the matters in question, exercising with full consciousness his supreme power of authority in the Church (Coustant, "Epist. Rom. Pont.", 625 sq.). This letter of Siricius is of special importance because it is the oldest completely preserved papal decretal (edict for the authoritative decision of questions of discipline and canon law). It is, however, certain that before this earlier popes had also issued such decretals, for Siricius himself in his letter mentions "general decrees" of Liberius that the latter had sent to the provinces; but these earlier ones have not been preserved. At the same time the pope directed Himerius to make known his decrees to the neighbouring provinces, so that they should also be observed there. This pope had very much at heart the maintenance of Church discipline and the observance of canons by the clergy and laity. A Roman synod of 6 January, 386, at which eighty bishops were present, reaffirmed in nine canons the laws of the Church on various points of discipline (consecration of bishops, celibacy, etc.). The decisions of the council were communicated by the pope to the bishops of North Africa and probably in the same manner to others who had not attended the synod, with the command to act in accordance with them. Another letter which was sent to various churches dealt with the election of worthy bishops and priests. A synodal letter to the Gallican bishops, ascribed by Coustant and others to Siricius, is assigned to Pope Innocent I by other historians (P. L., XIII, 1179 sq.). In all his decrees the pope speaks with the consciousness of his supreme ecclesiastical authority and of his pastoral care over all the churches.

Siricius was also obliged to take a stand against heretical movements. A Roman monk Jovinian came forward as an opponent of fasts, good works, and the higher merit of celibate life. He found some adherents among the monks and nuns of Rome. About 390–392 the pope held a synod at Rome, at which Jovinian and eight of his followers were condemned and excluded from communion with the Church. The decision was sent to St. Ambrose, the great Bishop of Milan and a friend of Siricius. Ambrose now held a synod of the bishops of upper Italy which, as the letter says, in agreement with his decision also condemned the heretics. Other heretics including Bishop Bonosus of Sardica (390), who was also accused of errors in the dogma of the Trinity, maintained the false doctrine that Mary was not always a virgin. Siricius and Ambrose opposed Bonosus and his adherents and refuted their false views. The pope then left further proceedings against Bonosus to the Bishop of Thessalonica and the other Illyrian bishops. Like his predecessor Damasus, Siricius also took part in the Priscillian controversy; he sharply condemned the episcopal accusers of Priscillian, who had brought the matter before the secular court and had prevailed upon the usurper Maximus to condemn to death and execute Priscillian and some of his followers. Maximus sought to justify his action by sending to the pope the proceedings in the case. Siricius, however, excommunicated Bishop Felix of Trier who supported Ithacius, the accuser of Priscillian, and in whose city the execution had taken place. The pope addressed a letter to the Spanish bishops in which he stated the conditions under which the converted Priscillians were to be restored to communion with the Church.

According to the life in the "Liber Pontificalis" (ed. Duchesne, I, 216), Siricius also took severe measures against the Manichæans at Rome. However, as Duchesne remarks (loc. cit., notes) it cannot be assumed from the writings of the converted Augustine, who was a Manichæan when he went to Rome (383), that Siricius took any particular steps against them, yet Augustine would certainly have commented on this if such had been the case. The mention in the "Liber Pontificalis" belongs properly to the life of Pope Leo I. Neither is it probable, as Langen thinks (Gesch. der röm. Kirche, I, 633), that Priscillians are to be understood by this mention of Manichæans, although probably Priscillians were at times called Manichæans in the writings of that age. The western emperors, including Honorius and Valentinian III, issued laws against the Manichæans, whom they declared to be political offenders, and took severe action against the members of this sect (Codex Theodosian, XVI, V, various laws). In the East Siricius interposed to settle the Meletian schism at Antioch; this schism had continued notwithstanding the death in 381 of Meletius at the Council of Constantinople. The followers of Meletius elected Flavian as his successor, while the adherents of Bishop Paulinus, after the death of this bishop (388), elected Evagrius. Evagrius died in 392 and through Flavian's management no successor was elected. By the mediation of St. John Chrysostom and Theophilus of Alexandria an embassy, led by Bishop Acacius of Berœa, was sent to Rome to persuade Siricius to recognize Flavian and to readmit him to communion with the Church.

At Rome the name of Siricius is particularly connected with the basilica over the grave of St. Paul on the Via Ostiensis which was rebuilt by the emperor as a basilica of five aisles during the pontificate of Siricius and was dedicated by the pope in 390. The name of Siricius is still to be found on one of the pillars that was not destroyed in the fire of 1823, and which now stands in the vestibule of the side entrance to the transept. Two of his contemporaries describe the character of Siricius disparagingly. Paulinus of Nola, who on his visit to Rome in 395 was treated in a guarded manner by the pope, speaks of the *urbici papæ superba discretio*, the haughty policy of the Roman bishop (Epist., V, 14). This action of the pope is, however, explained by the fact that there had been irregularities in the election and consecration of Paulinus (Buse, "Paulin von Nola", I, 193). Jerome, for his part, speaks of the "lack of judgment" of Siricius (Epist., cxxvii, 9) on account of the latter's treatment of Rufinus of Aquileia, to whom the pope had given a letter when Rufinus left Rome in 398, which showed that he was in communion with the Church. The reason, however, does not justify the judgment which Jerome expressed against the pope; moreover, Jerome in his polemical writings often exceeds the limits of propriety. All that is known of the labours of Siricius refutes the criticism of the caustic hermit of Bethlehem. The "Liber Pontificalis" gives an incorrect date for his death; he was buried in the *cæmeterium* of Priscilla on the Via Salaria. The text of the inscription on his grave is known (De Rossi, "Inscriptiones christ. urbis Romæ", II, 102, 138). His feast is celebrated on 26 November. His name was inserted in the Roman Martyrology by Benedict XIV.

J. P. Kirsch.

Sirleto, Guglielmo, cardinal and scholar, b. at Guardavalle near Stilo in Calabria, 1514; d. at Rome, 6 October, 1585. The son of a physician, he received an excellent education, made the acquaintance of distinguished scholars at Rome, and became an intimate friend of Cardinal Marcello Cervino, later Pope Marcellus II. He prepared for Cervino, who was President of the Council of Trent in its initial period, extensive reports on all the important questions presented for discussion. After his appointment as custodian of the Vatican Library, Sirleto drew up a complete descriptive catalogue of its Greek manuscripts and prepared a new edition of the Vulgate. Paul IV named him prothonotary and tutor to two of his nephews. After this pope's death he taught Greek and Hebrew at Rome, numbering St. Charles Borromeo among his students. During the concluding period of the Council of Trent he was, although he continued to reside at Rome, the constant and most heeded adviser of the cardinal-legates. He was himself created cardinal in 1565, became Bishop of San Marco in Calabria in 1566, and of Squillace in 1568. An order of the papal secretary of state, however, enjoined his residence at Rome, where he was named, in 1570, librarian of the Vatican Library. His influence was paramount in the execution of the scientific undertakings decreed by the Council of Trent. He collaborated in the publication of the Roman Catechism, presided over the Commissions for the reform of the Roman Breviary and Missal, and directed the work of the new edition of the Roman Martyrology. Highly appreciative of Greek culture, he entertained very friendly relations with the East and encouraged all efforts tending to ecclesiastical reunion. He was attended in his last illness by St. Philip Neri and was buried in the presence of Sixtus V.

N. A. Weber.

Sirmium (Szerém), Diocese of (Sirmiensis), situated near the modern town of Mitrovitz in Slavonia; its church is said to have been founded by St. Peter. The district of Szerém was subject to the Archbishop of Kalocsa after the Christianization of Hungary. In 1228, the archbishop petitioned the Holy See, in consideration of the large extent of his diocese, to found a new bishopric, and in 1229 Gregory IX established the See of Szerém, the jurisdiction of which covered almost exclusively the country on the right bank of the Sava River. The see was under the Turkish Government in 1526. It had no bishop from 1537 to 1578, and was held by a titular bishop after 1624. In 1709 the see was reestablished with some changes in its territory. Clement XIV united it with Bosnia and Diakovár in 1773.

A. Áldásy.

Sirmond, Jacques, one of the greatest scholars of the seventeenth century, b. at Riom in the Department of Puy-de-Dôme, France, Oct., 1559; d. in Paris, 7 Oct., 1651. He entered the Society of Jesus in 1576 and was appointed in 1581 professor of classical languages in Paris, where he numbered St. Francis de Sales among his pupils. Called to Rome in 1590, he was for sixteen years private secretary to the Jesuit superior general, Aquaviva, devoting his leisure moments during the same period to the study of the literary and historical treasures of antiquity. He entertained intimate relations with several learned men then present at Rome, among them Bellarmine and particularly Baronius, to whom he was helpful in the composition of the "Annales". In 1608 he returned to Paris, and in 1637 became confessor to King Louis XIII. His first literary production appeared in 1610, and from that date until the end of his life almost every year witnessed the publication of some new work. The results of his literary labours

are chiefly represented by editions of Greek and Latin Christian writings. Theodoret of Cyrus, Ennodius, Idatius of Gallicia, Sidonius Apollinaris, Theodulph of Orleans, Paschasius Radbertus, Flodoard, and Hincmar of Rheims are among the writers whose works he edited, either completely or in part. Of great importance were his editions of the capitularies of Charles the Bald and successors and of the ancient councils of France: "Karoli Calvi et successorum aliquot Franciæ regum Capitula" (Paris, 1623); "Concilia antiqua Galliæ" (Paris, 1629). His collected works, a complete list of which will be found in de Backer-Sommervogel (VII, 1237–60), were published in Paris in 1696 and again at Venice in 1728.

Sis. See Flavias.

Sisinnius, Pope, date of birth unknown; d. 4 Feb., 708. Successor of John VII, he was consecrated probably 15 Jan., 708, and died after a brief pontificate of about three weeks; he was buried in St. Peter's. He was a Syrian by birth and the son of one John. Although he was so afflicted with gout that he was unable even to feed himself, he is nevertheless said to have been a man of strong character, and to have been able to take thought for the good of the city. He gave orders to prepare lime to repair the walls of Rome, and before he died consecrated a bishop for Corsica.

Liber Pontificalis, I, 338; Mann, *The Lives of the Popes in the Early Middle Ages*, I, pt. ii (St. Louis and London, 1902), 124.

Horace K. Mann.

Sisters of Charity of Cincinnati, Ohio.—On 27 October, 1829, at the request of Bishop Fenwick of Cincinnati, several sisters from Mother Seton's community at Emmitsburg, Maryland, opened an orphanage, parochial school, and academy on Sycamore Street opposite the old cathedral, then occupying the present site of St. Xavier's Church and college. When Bishop Purcell built the new cathedral on Eighth and Plum Sts., the sisters moved to Third and Plum Sts., and later the academy was transferred to George St., near John. When Father Etienne, superior of the Daughters of Charity of France, in December, 1850, effected the affiliation of the sisterhood at Emmitsburg with the Daughters of Charity of France, Sister Margaret George was superior in Cincinnati. She had entered the community at Emmitsburg early in 1812, and had filled the office of treasurer and secretary of the community, teaching in the academy during most of Mother Seton's life. She wrote the early records of the American Daughters of Charity, heard all the discussions regarding rules and constitutions, and left to her community in Cincinnati letters from the first bishops and clergy of the United States, Mother Seton's original Journal written in 1803 and some of her letters, and valuable writings of her own. She upheld Mother Seton's rules, constitutions, traditions, and costume, confirmed by Archbishop Carroll 17 Jan., 1812, objecting with Archbishop Carroll and Mother Seton to the French rule in its fulness, in that it limited the exercise of charity to females in the orphanages and did not permit the teaching of boys in the schools. The sisters in New York had separated from Emmitsburg in December, 1846, because they were to be withdrawn from the boys' orphanage. When it was finally decided that the community at Emmitsburg was to affiliate with the French Daughters of Charity, the sisters in Cincinnati laid before Archbishop Purcell their desire to preserve the original rule of Mother Seton's foundation. He confirmed the sisters in their desire and notified the superior of the French Daughters of Charity that he would take under his protection the followers of Mother Seton. Archbishop Purcell became ecclesiastical superior and was succeeded by Archbishop Elder and Archbishop Moeller.

The novitiate in Cincinnati was opened in 1852. During that year twenty postulants were received. The first Catholic hospital was opened by the sisters in November, 1852. In February, 1853, the sisters took charge of the Mary and Martha Society, a charitable organization established for the benefit of the poor of the city. On 15 August, 1853, the sisters purchased their first property on the corner of Sixth and Parks Sts., and opened there in September a boarding and select day-school. The following July they bought a stone house on Mt. Harrison near Mt. St. Mary Seminary of the West, and called it Mt. St. Vincent. The community was incorporated under the laws of Ohio in 1854 as "The Sisters of Charity of Cincinnati, Ohio". Mother Margaret George, Sister Sophia Gillmeyer, Mother Josephine Harvey, Sister Anthony O'Connell, Mother Regina Mattingly, Sister Antonio McCaffrey, and Sister Gonzalva Dougherty were the incorporators. In 1856 Mt. St. Vincent Academy was transferred to the "Cedars", the former home of Judge Alderson. It remained the mother-house until 29 Sept., 1869, and the boarding-school until July, 1906. It is now a day academy and a residence for the sisters teaching adjacent parochial schools. In 1857 Bishop Bayley of New Jersey sent five postulants to Mt. St. Vincent, Cedar Grove, Cincinnati, to be trained by Mother Margaret George. At the conclusion of their novitiate, Mother Margaret and Sister Anthony were to have gone with them to Newark, New Jersey, to remain until the little community would be well established. but affairs proving too urgent, Mother Margaret interceded with the New York community, and Sisters Xavier and Catherine were appointed superiors over the little band. In July, 1859, Mother Margaret George having held the office of mother for the two terms allowed by the constitution, was succeeded by Mother Josephine Harvey. During the Civil War many of the sisters served in the hospitals. Between 1852 and 1865 the sisters had taken charge of ten parochial schools. Archbishop Lamy of New Mexico, and Bishop Machebreuf of Colorado, both pioneer priests of Ohio, in 1865 petitioned Archbishop Purcell for a colony of Sisters of Charity to open a hospital and orphanage in the West. Accordingly four sisters left Cincinnati 21 August, 1865, arriving at Santa Fé, 13 Sept., 1865. The archbishop gave them his own residence which had been used also as a seminary. There were twenty-five orphans to be cared for and some sick to be nursed. On 15 August, 1866, Joseph C. Butler and Lewis Worthington presented Sister Anthony O'Connell with the Good Samaritan Hospital, a building erected by the Government for a Marine Hospital at a cost of $300,000. Deeply impressed by the charity done in "old St. John's" during the war, these non-Catholic gentlemen bought the Government hospital for $90,000 and placed the deeds in the hands of Sister Anthony, Butler suggesting the name "Good Samaritan". Early in 1870 Bishop Domenec of Pittsburg, desiring a diocesan branch of Mother Seton's community, sent four postulants to be trained in the Cincinnati novitiate. On their return they were accompanied by five of the Cincinnati sisters who were to remain with them for a limited time, and to be withdrawn one by one. Finally all were recalled but Mother Aloysia Lowe and Sister Ann Regina Ennis, the former being superior and the latter mistress of novices. Mother Aloysia governed the community firmly but tenderly, and before her death (1889) had the satisfaction of seeing the sisters in their new mother-house at Seton Hill, Greensburg, Pa., the academy having been blessed, and the chapel dedicated, 3 May, 1889.

Mother Aloysia's term of office had expired 19 July, 1889, and she was succeeded by Sister Ann Regina (d. 16 May, 1894). The community at Greensburg, Pa., at present number more than three hundred. Their St. Joseph Academy at the mother-house is flourishing; they teach about thirty parochial schools in the Dioceses of Altoona and Pittsburg and conduct the Pittsburg Hospital and Roselia Foundling Asylum in Pittsburg.

From 1865 to 1880 the sisters in Cincinnati opened thirty-three branch houses, one of these being the St. Joseph Foundling and Maternity Hospital, a gift to Sister Anthony from Joseph Butler. In 1869 a site for a mother-house, five miles from Cedar Grove, was purchased. The first Mass was offered in the novitiate chapel, 24 October, 1869, by Rev. Thos. S. Byrne, the chaplain, the present Bishop of Nashville, Tennessee. In 1882 the building of the new mother-house began under his direction. Before its completion Mother Regina Mattingly died (4 June, 1883). Mother Josephine Harvey again assumed the office. In 1885 the new St. Joseph was burned to the ground. The present mother-house was begun at once under the superintendence of Rev. T. S. Byrne. Mt. St. Mary Seminary, closed since the financial troubles, was now used for the sisters' novitiate. In July, 1886, the sisters took possession of the west wing of the mother-house, and the following year the seminary reopened. Mother Josephine Harvey resigned the office of mother in 1888, and was succeeded by Mother Mary Paul Hayes, who filled Mother Josephine's unexpired term and was re-elected in July, 1890, dying the following April. Mother Mary Blanche Davis was appointed to the office of mother, and held it until July, 1899. During her incumbency the Seton Hospital, the Glockner Sanitarium at Colorado Springs, St. Joseph Sanitarium, Mt. Clemens, Mich., and Santa Maria Institute for Italians were begun; additions were made to the mother-house. During the administration of Mother Sebastian Shea were built: the St. Joseph Sanitarium, Pueblo; the San Rafael Hospital, Trinidad; the St. Vincent Hospital, Santa Fé, New Mexico; the St. Vincent Academy, Albuquerque; and the Good Samaritan Annex in Clifton. Mother Mary Blanche resumed the duties of office in 1905, and was re-elected in 1908. During these terms a very large addition was built to the Glockner Sanitarium and to the St. Mary Sanitarium, Pueblo; the Hospital Antonio in Kenton, Ohio; a large boarding school for boys at Fayetteville, Ohio; the new Seton Hospital was bought; the new Good Samaritan Hospital was begun. Many parochial schools were opened, among them a school for coloured children in Memphis, Tennessee.

The community numbers: about 800 members; 74 branch houses; 5 academies; 2 orphan asylums; 1 foundling asylum; 1 Italian institute; 11 hospitals or sanitariums; 1 Old Ladies' Home; 53 parochial schools throughout Michigan, Ohio, Tennessee, Colorado, and New Mexico.

Sister Mary Agnes.

Sisters of the Little Company of Mary, a congregation founded in 1877 in England to honour in a particular manner the maternal Heart of the Blessed Virgin, especially in the mystery of Calvary. The sisters make an entire consecration of themselves to her, and aim at imitating her virtues. They devote themselves to the sick and dying, which is their principal exterior work. They nurse the sick in their own homes, and also receive them in the hospitals and nursing-homes attached to their convents. They make no distinction of class, nationality, or creed, and exact no charge for their services, but accept any offering which may be made them. Besides the personal attendance on the sick, they are bound to pray continually for the dying, and in the novitiate watch before the Blessed Sacrament, both by day and night, praying for the dying. When circumstances require it, the sisters may engage in various forms of mission work, especially in poor districts. The rules received final approbation from Leo XIII in 1893. The order conducts houses in: Italy (1 in Rome, 1 at Florence, 1 at Fiesole); England (3 in London, 1 at Nottingham); Ireland (1 at Limerick, 1 in Fermoy); Malta (1); United States (Chicago); Australia (2 at Sydney, 1 at Adelaide); South Africa (Port Elizabeth). The sisters when in the convent wear a black habit and blue veil, with a white cloak in the chapel; when nursing, the habit is of white linen, with a blue veil.

An association of pious women, known as "Pie Donne" or "Affiliated", are aggregated to the order, and share in its prayers and good works, some residing in their own homes, others living in the convent, though in part separated from the community. A confraternity is attached to the order, called the Calvary Confraternity, the members of which assist those in their last agony by their prayers and, if possible, by personal attendance.

Mother M. Patrick.

Sistine Choir.—Although it is known that the Church, from her earliest days, employed music in her cult, it was not until the time of her emergence from the catacombs that she began freely to display her beauty and splendour in sacred song. As early as in the pontificate of Sylvester I (314–35) we find a regularly-constituted company of singers, under the name of *schola cantorum*, living together in a building devoted to their exclusive use. The word *schola* was in those days the legal designation of an association of equals in any calling or profession and did not primarily denote, as in our time, a school. It had more the nature of a guild, a characteristic which clung to the papal choir for many centuries. Hilary II (461–8) ordained that the pontifical singers live in community, while Gregory the Great (590–604) not only made permanent the existing institution attached to St. John Lateran and including at that time in its membership monks, secular clergy, and boys, but established a second and similar one in connexion with the Basilica of St. Peter. The latter is supposed to have served as a sort of preparatory school for the former. For several centuries the papal *schola cantorum* retained the same general character. Its head, *archicantor* or *primicerius*, was always a clergyman of high rank and often a bishop. While it was his duty to intone the various chants to be followed by the rest of the singers, he was by no means their master in the modern technical sense.

It is at the time of the transfer of the papal see from Rome to Avignon in the thirteenth century that a marked change takes place in the institution. Innocent IV did not take his *schola cantorum* with him to his new abode, but provided for its continuance in Rome by turning over to it properties, tithes, and other revenues. Community life among the singers seems to have come to an end at this period. Clement V (1305–14) formed a new choir at Avignon, consisting for the most part of French singers, who showed a decided preference for the new developments in church music — the *déchant* and *falsibordoni*, which had in the meantime gained great vogue in France. When Gregory XI (1370–8) returned to Rome, he took his singers with him and amalgamated them with the still-existing, at least in name, ancient *schola cantorum*. Before the sojourn of the papal Court at Avignon, it had been the duty of the *schola* to accompany the pope to the church where he held station, but after the return to Rome, the custom established at Avignon of celebrating all pontifical functions in the papal church or chapel was continued and has existed ever since. The *primicerius* of former times is now no longer mentioned but is replaced by the *magister capellæ*, which title, however, continues to be more an honorary one held by a bishop or prelate than an indication of technical leadership, as may be gathered from the relative positions assigned to various dignitaries, their prerogatives, etc. Thus the *magister capellæ* came immediately after the cardinals, followed, in the order given, by the *sacrista*, *cantores*, *capellani*, and *clerici*.

With the building by Sixtus IV (1471–84) of the church for the celebration of all papal functions since known as the Sistine Chapel, the original *schola cantorum* and subsequent *capella pontificia* or *capella papale*, which still retains more or less of the guild character, becomes the *capella sistina*, or Sistine Choir, whose golden era takes its beginning. Up to this time the number of singers had varied considerably, there being sometimes as few as nine men and six boys. By a Bull dated November, 1483, Sixtus IV fixed the number at twenty-four, six for each part. After the year 1441 the records no longer mention the presence of boys in the choir, the high voices, soprano and alto, being thenceforth sung by natural (and occasionally unnatural) *soprani falsetti* and high tenors respectively. Membership in the papal choir became the great desideratum of singers, contrapuntists, and composers of every land, which accounts for the presence in Rome, at least for a time, of most of the great names of that period. The desire to re-establish a sort of preparatory school for the papal choir, on the plan of the ancient *schola*, and incidentally to become independent of the ultramontane, or foreign, singers, led Julius II (1503–13) to issue, on 19 February, 1512, a Bull founding the *capella Julia*, which to this day performs all the choir duties at St. Peter's. It became indeed, and has ever since been, a nursery for, and stepping-stone to, membership in the Sistine Choir. The high artistic aims of its founder have, however, but rarely been attained, owing to the rarity of truly great choirmasters. Leo X (1513–21), himself a musician, by choosing as head of the organization a real musician, irrespective of his clerical rank, took a step which was of the greatest importance for the future. It had the effect of transforming a group of vocal *virtuosi* on equal footing into a compact vocal body, whose interpretation of the greatest works of polyphony which we possess, and which were then coming into existence, became the model for the rest of the world, not only then but for all time. Leo's step was somewhat counteracted by Sixtus V (1585–90), who ordered the singers to elect their leader annually from their own number. Paul II (1534–49) on 17 November, 1545, published a Bull approving a new constitution of the choir, which has been in force ever since, and according to which the choir-master proposes the candidates for membership, who are then examined by the whole company of singers. Since that time the state of life of the candidate has not been a factor.

While the Sistine Choir has, since its incipiency, undergone many vicissitudes, its artistic and moral level fluctuating, like all things human, with the mutations of the times, it has ever had for its purpose and object to hold up, at the seat of ecclesiastical authority, the highest model of liturgical music as well as of its performance. When the Gregorian melodies were still the sole music of the Church, it was the papal choir that set the standard for the rest of Christendom, both as regards the purity of the melodies and their rendition. After these melodies had blossomed into polyphony, it was in the Sistine Chapel that it received adequate interpretation. Here the artistic degeneration, which church music suffered in different periods in many countries, never took hold for any length of time. The use of instruments, even of the organ, has ever been excluded. The choir's ideal has always been the purely vocal style. Since the accession of the present pope, and under its present conductor, the falsetto voices have been succeeded by boys' voices, and the artistic level of the institute has been raised to a higher point than it had occupied for the previous thirty or forty years.

Sitifis, Titular See of (Sitifensis), in Mauretania Sitifensis. Sitifis, situated in Mauretania Cæsarensis, on the road from Carthage to Cirta, was of no importance under the Numidian kings and became prominent only when Nerva established a colony of veterans there. When Mauretania Sitifensis was created, at the close of the third century, Sitifis became its capital. Under the Vandals it was the chief town of a district called Zaba. It was still the capital of a province under Byzantine rule and was then a place of strategic importance. Captured by the Arabs in the seventh century, it was almost ruined at the time of the French occupation (1838). It is now Setif, the chief town of an *arrondissement* in the Department of Constantine, Algeria. It contains 15,000 inhabitants, of whom 3700 are Europeans and 1600 Jews; it has a trade in cattle, cereals, leather, and cloths. Interesting Christian inscriptions are to be found there, one of 452 mentioning the relics of St. Lawrence, another naming two martyrs of Sitifis, Justus and Decurius; there are a museum and the ruins of a Byzantine fortress. St. Augustine, who had frequent relations with Sitifis, informs us that in his time it contained a monastery and an episcopal school, and that it suffered from a violent earthquake, on which occasion 2000 persons, through fear of death, received baptism (Ep., lxxxiv; Serm., xix). Five bishops of this see are known: Severus, in 409, mentioned in a letter of St. Augustine; Novatus, present at the Council of Carthage (411), where he opposed the Donatist Marcian, present at the Council of Carthage (419), dying in 440, mentioned in St. Augustine's letters; Lawrence, in 452; Donatus, present at the Council of Carthage (484), and exiled by Huneric; Optatus, at the Council of Carthage (525).

S. Pétridès.

Sitjar, Buenaventura, b. at Porrera, Island of Majorca, 9 Dec., 1739; d. at San Antonio, Cal., 3 Sept., 1808. In April, 1758, he received the habit of St. Francis. After his ordination he joined the College of San Fernando, Mexico. In 1770 he was assigned to California, arriving at San Diego, 21 May, 1771. He was present at the founding of the Mission of San Antonio, and was appointed first missionary by Father Junipero Serra. He toiled there until his death, up to which time 3400 Indians had been baptized. Father Sitjar mastered the Telame language, spoken at the Mission of San Antonio, and compiled a vocabulary with Spanish explanations, published at New York in 1861. Though the list of words is not as long as Arroyo de la Cuesta's dictionary of 2884 words and sentences in the Mutsun idiom of Mission San Juan Bautista, Sitjar's gives the pronunciation and fuller explanations. He also left a journal of an exploring expedition which he accompanied in 1795. His body was interred in the sanctuary of the church.

Sitten. See SION, DIOCESE OF.

Siunia, a titular see, suffragan of Sebastia in Armenia Prima. Siunia is not a town, but a province situated between Goghtcha, Araxa, and Aghovania, in the present Russian districts of Chamakha, or Baku, and Elisavetpol. The real name should be Sisacan, the Persian form, for Siunia got its name from Sisac, the son of Gegham, the fifth Armenian sovereign. Its first rulers, vassals of the kings of Armenia or the shahs of Persia, date back to the fourth century of our era; about 1046 it became an independent kingdom, but only till 1166. The Church of Siunia was established in the fifth century or perhaps a little earlier. It soon became a metropolis subject to the Catholicos of Armenia, and, as we see in a letter of the patriarch Ter Sargis in 1006, it counted twelve crosiers, which must signify twelve suffragan sees. The archdiocese contained 1400 villages and 28 monasteries. In the ninth century the metropolitan see was fixed in the convent of Tatheo, situated between Ouronta and Migri, sixty-two miles south-east of Lake Gokcha. Separated for a brief interval from Noravank, the See of Siunia was reunited to it, but was definitively separated again in the thirteenth century. In 1837 the Diocese of Siunia was, by order of the Synod of Etchmiadzin, suppressed and subjected directly to the catholicos under the supervision of the Bishop of Erivan, who had a vicar at Tatheo. The complete list of the bishops and metropolitans of Siunia, from the fifth century till the nineteenth century, is known; amongst them we may mention Petros, a writer at the beginning of the sixth century, and Stephanos Orbelian, the historian of his Church. It is not known why the Roman Curia introduced this episcopal title, which does not appear in any Greek or Latin "Notitia episcopatuum", and was never a suffragan of Sebastia.

Sixtus I, SAINT, POPE (in the oldest documents, XYSTUS is the spelling used for the first three popes of that name), succeeded St. Alexander and was followed by St. Telesphorus. According to the "Liberian Catalogue" of popes, he ruled the Church during the reign of Adrian "a consulatu Nigri et Aproniani usque Vero III et Ambibulo", that is, from 117 to 126. Eusebius, who in his "Chronicon" made use of a catalogue of popes different from the one he used in his "Historia Ecclesiastica", states in his "Chronicon" that Sixtus I was pope from 114 to 124, while in his "History" he makes him rule from 119 to 128. All authorities agree that he reigned about ten years. He was a Roman by birth, and his father's name was Pastor. According to the "Liber Pontificalis" (ed. Duchesne, I, 128), he passed the following three ordinances: (1) that none but sacred ministers are allowed to touch the sacred vessels; (2) that bishops who have been summoned to the Holy See shall, upon their return, not be received by their diocese except on presenting Apostolic letters; (3) that after the Preface in the Mass the priest shall recite the Sanctus with the people. The "Felician Catalogue" of popes and the various martyrologies give him the title of martyr. His feast is celebrated on 6 April. He was buried in the Vatican, beside the tomb of St. Peter. His relics are said to have been transferred to Alatri in 1132, though O. Jozzi ("Il corpo di S. Sisto I., papa e martire rivendicato alla basilica Vaticana", Rome, 1900) contends that they are still in the Vatican Basilica. Butler (Lives of the Saints, 6 April) states that Clement X gave some of his relics to Cardinal de Retz, who placed them in the Abbey of St. Michael in Lorraine. The Xystus who is commemorated in the Canon of the Mass is Xystus II, not Xystus I.

MICHAEL OTT.

Sixtus II (XYSTUS), SAINT, POPE, elected 31 Aug., 257, martyred at Rome, 6 Aug., 258. His origin is unknown. The "Liber Pontificalis" says that he was a Greek by birth, but this is probably a mistake, originating from the false assumption that he was identical with a Greek philosopher of the same name, who was the author of the so-called "Sentences" of Xystus. During the pontificate of his predecessor, St. Stephen, a sharp dispute had arisen between Rome and the African and Asiatic Churches, concerning the rebaptism of heretics, which had threatened to end in a complete rupture between Rome and the Churches of Africa and Asia Minor (see CYPRIAN OF CARTHAGE, SAINT). Sixtus II, whom Pontius (Vita Cypriani, cap. xiv) styles a good and peaceful priest (*bonus et pacificus sacerdos*), was more conciliatory than St. Stephen and restored friendly relations with these Churches, though, like his predecessor, he upheld the Roman usage of not rebaptizing heretics.

HEAD OF ST. SIXTUS II
Detail from the Sistine Madonna, Raphael

Shortly before the pontificate of Sixtus II the Emperor Valerian issued his first edict of persecution, which made it binding upon the Christians to participate in the national cult of the pagan gods and forbade them to assemble in the cemeteries, threatening with exile or death whomsoever was found to disobey the order. In some way or other, Sixtus II managed to perform his functions as chief pastor of the Christians without being molested by those who were charged with the execution of the imperial edict. But during the first days of August, 258, the emperor issued a new and far more cruel edict against the Christians, the import of which has been preserved in a letter of St. Cyprian to Successus, the Bishop of Abbir Germaniciana (Ep. lxxx). It ordered bishops, priests, and deacons to be summarily put to death ("episcopi et presbyteri et diacones incontinenti animadvertantur"). Sixtus II was one of the first to fall a victim to this imperial enactment ("Xistum in cimiterio animadversum sciatis VIII. id. Augusti et cum eo diacones quattuor"—Cyprian, Ep. lxxx). In order to escape the vigilance of the imperial officers he assembled his flock on 6 August at one of the less-known cemeteries, that of Prætextatus, on the left side of the Appian Way, nearly opposite the cemetery of St. Callistus. While seated on his chair in the act of addressing his flock he was suddenly apprehended by a band of soldiers. There is some doubt whether he was beheaded forthwith, or was first brought before a tribunal to receive his sentence and then led back to the cemetery for execution. The latter opinion seems to be the more probable.

The inscription which Pope Damasus (366–84) placed on his tomb in the cemetery of St. Callistus may be interpreted in either sense. The entire inscription is to be found in the works of St. Damasus (P. L., XIII, 383–4, where it is wrongly supposed to be an epitaph for Pope Stephen I), and a few fragments of it were discovered at the tomb itself by de Rossi (Inscr. Christ., II, 108). The "Liber Pontificalis" mentions that he was led away to offer sacrifice to the gods ("ductus ut sacrificaret demoniis"—I, 155). St. Cyprian states in the above-named letter, which was written at the latest one month after the martyrdom of Sixtus, that "the prefects of the City were daily urging the persecution in order that, if any were brought before them, they might be punished and their property confiscated". The pathetic meeting between St. Sixtus II and St. Lawrence, as the former was being led to execution, of which mention is made in the unauthentic "Acts of St. Lawrence" as well as by St. Ambrose (Officiorum, lib. I, c. xli, and lib. II, c. xxviii) and the poet Prudentius (Peristephanon, II), is probably a mere legend. Entirely contrary to truth is the statement of Prudentius (ibid., lines 23–26) that Sixtus II suffered martyrdom on the cross, unless by an unnatural trope the poet uses the specific word cross ("Jam Xystus adfixus cruci") for martyrdom in general, as Duchesne and Allard (see below) suggest. Four deacons, Januarius, Vincentius, Magnus, and Stephanus, were apprehended with Sixtus and beheaded with him at the same cemetery. Two other deacons, Felicissimus and Agapitus, suffered martyrdom on the same day. The feast of St. Sixtus II and these six deacons is celebrated on 6 August, the day of their martyrdom. The remains of Sixtus were transferred by the Christians to the papal crypt in the neighbouring cemetery of St. Callistus. Behind his tomb was enshrined the blood-stained chair on which he had been beheaded. An oratory (*Oratorium Xysti*) was erected above the cemetery of St. Prætextatus, at the spot where he was martyred, and was still visited by pilgrims of the seventh and the eighth century.

For some time Sixtus II was believed to be the author of the so-called "Sentences", or "Ring of Sixtus", originally written by a Pythagorean philosopher and in the second century revised by a Christian. This error arose because in his introduction to a Latin translation of these "Sentences" Rufinus ascribes them to Sixtus of Rome, bishop and martyr. It is certain that Pope Sixtus II is not their author (see Conybeare, "The Ring of Pope Xystus now first rendered into English, with an historical and critical commentary", London, 1910). Harnack (Texte und Untersuchungen zur altchrist. Literatur, XIII, XX) ascribes to him the treatise "Ad Novatianum", but his opinion has been generally rejected (see Rombold in "Theol. Quartalschrift", LXXII, Tübingen, 1900). Some of his letters are printed in P. L., V, 79–100. A newly discovered letter was published by Conybeare in "English Hist. Review", London, 1910.

MICHAEL OTT.

Sixtus III (XYSTUS), SAINT, POPE, consecrated 31 July, 432; d. 440. Previous to his accession he was prominent among the Roman clergy and in correspondence with St. Augustine. He reigned during the Nestorian and Pelagian controversies, and it was probably owing to his conciliatory disposition that he was falsely accused of leanings towards these heresies. As pope he approved the Acts of the Council of Ephesus and endeavoured to restore peace between Cyril of Alexandria and John of Antioch. In the Pelagian controversy he frustrated the attempt of Julian of Eclanum to be readmitted to communion with the Catholic Church. He defended the pope's right of supremacy over Illyricum against the local bishops and the ambitious designs of Proclus of Constantinople. At Rome he restored the Basilica of Liberius, now known as St. Mary Major, enlarged the Basilica of St. Lawrence-Without-the-Walls, and obtained precious gifts from the Emperor Valentinian III for St. Peter's and the Lateran Basilica. The work which asserts that the consul Bassus accused him of crime is a forgery. He is the author of eight letters (in P. L., L, 583 sqq.), but he did not write the works "On Riches", "On False Teachers", and "On Chastity" ("De divitiis", "De malis doctoribus", "De castitate") attributed to him. His feast is kept on 28 March.

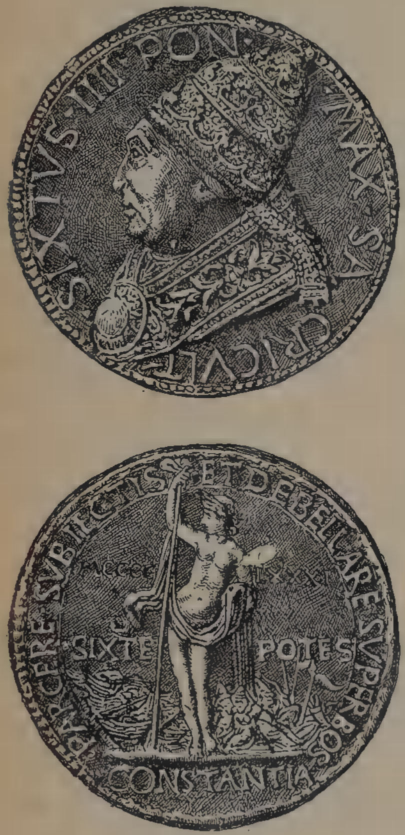
N. A. WEBER.

Sixtus IV (FRANCESCO DELLA ROVERE), POPE, b. near Abisola, 21 July, 1414; d. 12 Aug., 1484. His parents were poor, and while still a child he was destined for the Franciscan Order. Later he studied philosophy and theology with great success at the University of Pavia, and lectured at Padua, Bologna, Pavia, Siena, and Florence, having amongst other eminent disciples the famous Cardinal Bessarion. After filling the post of procurator of his order in Rome and Provincial of Liguria, he was in 1467 created Cardinal of S. Pietro in Vincoli by Paul II. Whatever leisure he now had was devoted to theology, and in 1470 he published a treatise on the Precious Blood and a work on the Immaculate Conception, in which latter he endeavoured to prove that Aquinas and Scotus, though differing in words, were really of one mind upon the question. The conclave which assembled on the death of Paul II elected him pope, and he ascended the chair of St. Peter as Sixtus IV.

ARMS OF SIXTUS IV

His first thought was the prosecution of the war against the Turks, and legates were appointed for France, Spain, Germany, Hungary, and Poland, with the hope of enkindling enthusiasm in these countries. The crusade, however, achieved little beyond the bringing back to Rome of twenty-five Turkish prisoners, who were paraded in triumph through the streets of the city. Sixtus continued the policy of his predecessor Paul II with regard to France, and denounced Louis XI for insisting on the royal consent being given before papal decrees could be published in his kingdom. He also made an effort like his predecessor for the reunion of the Russian Church with Rome, but his negotiations were without result. He now turned his attention almost exclusively to Italian politics, and fell more and more under his dominating passion of nepotism, heaping riches and favours on his unworthy relations. In 1478 took place the famous conspiracy of the Pazzi, planned by the pope's nephew—Cardinal Rafael Riario—to overthrow the Medici and bring Florence under the Riarii. The pope was cognizant of the plot, though probably not of the intention to assassinate, and even laid Florence under interdict because it rose in fury against the conspirators and brutal murderers of Giuliano de' Medici. He now entered upon a two years' war with Florence, and encouraged the Venetians to attack Ferrara, which he wished to obtain for his nephew Girolamo Riario. Ercole d'Este, attacked by Venice, found allies in almost every Italian state, and Ludovico Sforza, upon whom the pope relied for support, did nothing to help him. The allied princes forced Sixtus to make peace, and the chagrin which this caused him is said to have hastened his death.



SIXTUS IIII PON MAX SACRICVLT
PARCERE SVBIECTIS ET DEBELLARE SVPERBOS
PACEM
SIXTE
POTES
CONSTANTIA

Medal to Commemorate the Defeat of the Turks at Otranto, 1481
Obverse: Portrait of Sixtus IV. Reverse: Allegorical figure of Constancy, with the line from Virgil, Æneid, VI, 853: "To spare the submissive and crush the proud", with the added words: "Thou art able, O Sixtus."

Henceforth, until the Reformation, the secular interests of the papacy were of paramount importance. The attitude of Sixtus towards the conspiracy of the Pazzi, his wars and treachery, his promotion to the highest offices in the Church of such men as Pietro and Girolamo Riario are blots upon his career. Nevertheless, there is a praiseworthy side to his pontificate. He took measures to suppress abuses in the Inquisition, vigorously opposed the Waldenses, and annulled the decrees of the Council of Constance. He was a patron of arts and letters, building the famous Sistine Chapel, the Sistine Bridge across the Tiber, and becoming the second founder of the Vatican Library. Under him Rome once more became habitable, and he did much to improve the sanitary conditions of the city. He brought down water from the Quirinal to the Fountain of Trevi, and began a transformation of the city which death alone hindered him from completing. In his private life Sixtus IV was blameless. The gross accusations brought against him by his enemy Infessura have no foundation; his worst vice was nepotism, and his greatest misfortune was that he was destined to be placed at the head of the States of the Church at a time when Italy was emerging from the era of the republics, and territorial princes like the pope were forced to do battle with the great despots.

R. Urban Butler.

Sixtus V, Pope (Felice Peretti), b. at Grottamare near Montalto, 13 December, 1521; elected 24 April, 1585; crowned 1 May, 1585; d. in the Quirinal, 27 August, 1590. He belonged to a Dalmatian family which in the middle of the preceding century had fled to Italy from the Turks who were devastating Illyria and threatened to invade Dalmatia. His father was a gardener and it is said of Felice that, when a boy, he was a swineherd. At the age of nine he came to the Minorite convent at Montalto, where his uncle, Frà Salvatore, was a friar. Here he became a novice at the age of twelve. He was educated at Montalto, Ferrara, and Bologna and was ordained at Siena in 1547. The talented young priest gained a high reputation as a preacher. At Rome, where in 1552 he preached the Lenten sermons in the Church of Santi Apostoli, his successful preaching gained for him the friendship of very influential men, such as Cardinal Carpi, the protector of his order; the Cardinals Caraffa and Ghislieri, both of whom became popes; St. Philip Neri and St. Ignatius. He was successively appointed rector of his convent at Siena in 1550, of San Lorenzo at Naples in 1553, and of the convent of the Frari at Venice in 1556. A year later Pius IV appointed him also counsellor to the Inquisition at Venice. His zeal and severity in the capacity of inquisitor displeased the Venetian Government, which demanded and obtained his recall in 1560. Having returned to Rome he was made counsellor to the Holy Office, professor at the Sapienza, and general procurator and vicar Apostolic of his order. In 1565 Pius IV designated him to accompany to Spain Cardinal Buoncompagni (afterwards Gregory XIII), who was to investigate a charge of heresy against Archbishop Carranza of Toledo. From this time dates the antipathy between Peretti and Buoncompagni, which declared itself more openly during the latter's pontificate (1572-85). Upon his return to Rome in 1566 Pius V created him Bishop of Sant' Agata dei Goti in the Kingdom of Naples and later chose him as his confessor. On 17 May, 1570, the same pope created him cardinal-priest with the titular Church of S. Simeone, which he afterwards exchanged for that of S. Girolamo dei Schiavoni. In 1571 he was transferred to the See of Fermo. He was popularly known as the Cardinal di Montalto. During the pontificate of Gregory XIII he withdrew from public affairs, devoting himself to study and to the collection of works of art, as far as his scanty means permitted. During this time he edited the works of St. Ambrose (Rome, 1579-1585) and erected a villa (now Villa Massimi) on the Esquiline.

Monument of Sixtus V—Fontana
Basilica of St. Mary Major

Gregory XIII died on 10 April, 1585, and after a conclave of four days Peretti was elected pope by "adoration" on 24 April, 1585. He took the name Sixtus V in memory of Sixtus IV, who had also been a Minorite. The legend that he entered the conclave on crutches, feigning the infirmities of old age, and upon his election exultantly thrust aside his crutches and appeared full of life and vigour has long been exploded; it may, however, have been invented as a symbol of his forced inactivity during the reign of Gregory XIII and the remarkable energy which he displayed during the five years of his pontificate. He was a born ruler and especially suited to stem the tide of disorder and lawlessness which had broken out towards the end of the reign of Gregory XIII. Having obtained the co-operation of the neighbouring states, he exterminated, often with excessive cruelty, the system of brigandage which had reached immense proportions and terrorized the whole of Italy. The number of bandits in and about Rome at the death of Gregory XIII has been variously estimated at from twelve to twenty-seven thousand, and in little more than two years after the accession of Sixtus V the Papal States had become the most secure country in Europe.

Of almost equal importance with the extermination of the bandits was, in the opinion of Sixtus V, the rearrangement of the papal finances. At his accession the papal exchequer was empty. Acting on his favourite principle that riches as well as severity are necessary for good government, he used every available means to replenish the state treasury. So successful was he in the accumulation of money that, despite his enormous expenditures for public buildings, he had shortly before his death deposited in the Castello di Sant' Angelo three million *scudi* in gold and one million six hundred thousand in silver. He did not consider that in the long run so much dead capital withdrawn from circulation was certain to impoverish the country and deal the death-blow to commerce and industry. To obtain such vast sums he economized everywhere, except in works of architecture; increased the number of salable public offices; imposed more taxes and extended the *monti*, or public loans, that had been instituted by Clement VII. Though extremely economical in other ways, Sixtus V spent immense sums in erection of public works. He built the Lateran Palace; completed the Quirinal; restored the Church of Santa Sabina on the Aventine; rebuilt the Church and Hospice of San Girolamo dei Schiavoni; enlarged and improved the Sapienza; founded the hospice for the poor near the Ponte Sisto; built and richly ornamented the Chapel of the Cradle in the Basilica of Santa Maria Maggiore; completed the cupola of St. Peter's; raised the obelisks of the Vatican, of Santa Maria Maggiore, of the Lateran, and of Santa Maria del Popolo; restored the columns of Trajan and of Antoninus Pius, placing the statue of St. Peter on the former and that of St. Paul on the latter; erected the Vatican Library with its adjoining printing-office and that wing of the Vatican Palace which is inhabited by the pope; built many magnificent streets; erected various monasteries; and supplied Rome with water, the "Acqua Felice", which he brought to the city over a distance of twenty miles, partly underground, partly on elevated aqueducts. At Bologna he founded the Collegio Montalto for fifty students from the March of Ancona.

Far-reaching were the reforms which Sixtus V introduced in the management of ecclesiastical affairs. On 3 Dec., 1586, he issued the Bull "Postquam verus", fixing the number of cardinals at seventy, namely, six cardinal-bishops, fifty cardinal-priests, and fourteen cardinal-deacons. Before his pontificate, ecclesiastical business was generally discharged by the pope in consistory with the cardinals. There were, indeed, a few permanent cardinalitial congregations, but the sphere of their competency was very limited. In his Bull "Immensa æterni Dei", of 11 February, 1588, he established fifteen permanent congregations, some of which were concerned with spiritual, others with temporal affairs. They were the Congregations: (1) of the Inquisition; (2) of the Segnatura; (3) for the Establishment of Churches; (4) of Rites and Ceremonies; (5) of the Index of Forbidden Books; (6) of the Council of Trent; (7) of the Regulars; (8) of the Bishops; (9) of the Vatican Press; (10) of the Annona, for the provisioning of Rome and the provinces; (11) of the Navy; (12) of the Public Welfare; (13) of the Sapienza; (14) of Roads, Bridges, and Waters; (15) of State Consultations. These congregations lessened the work of the pope, without in any way limiting his authority. The final decision belonged to the pope. In the creation of cardinals Sixtus V was, as a rule, guided by their good qualities. The only suspicion of nepotism with which he might be reproached was giving the purple to his fourteen-year-old grand-nephew Alessandro, who, however, did honour to the Sacred College and never wielded an undue influence.

In 1588 he issued from the Vatican Press an edition of the Septuagint revised according to a Vatican MS. His edition of the Vulgate, printed shortly before his death, was withdrawn from circulation on account of its many errors, corrected, and reissued in 1592 (see BELLARMINE, ROBERT FRANCIS ROMULUS, VENERABLE). Though a friend of the Jesuits, he objected to some of their rules and especially to the title "Society of Jesus". He was on the point of changing these when death overtook him. A statue which had been erected in his honour on the Capitol during his lifetime was torn down by the rabble immediately upon his death. (For his relations with the various temporal rulers and his attempts to stem the tide of Protestantism, see COUNTER-REFORMATION, THE.)

MICHAEL OTT.

Skarga, PETER, theologian and missionary, b. at Grojec, 1536; d. at Cracow, 27 Sept., 1612. He began his education in his native town in 1552; he went to study in Cracow and afterwards in Warsaw. In 1557 he was in Vienna as tutor to the young Castellan, Teczynski; returning thence in 1564, he received Holy orders, and later was nominated canon of Lemberg Cathedral. Here he began to preach his famous sermons, and to convert Protestants. In 1568 he entered the Society of Jesus and went to Rome, where he became penitentiary for the Polish language at St. Peter's. Returning to Poland, he worked in the Jesuit colleges of Pultusk and Wilna, where he converted a multitude of Protestants, Calvinism being at the time prevalent in those parts. To this end he first published some works of controversy; and in 1576, in order to convince the numerous schismatics in Poland, he issued his great treatise "On the Unity of the Church of God", which did much good then, and is even now held in great esteem. It powerfully promoted the cause of the Union. King Stephen Báthori prized Skarga greatly, often profited by his aid and advice, took him on one of his expeditions, and made him rector of the Academy of Wilna, founded in 1578. In 1584 he was sent to Cracow as superior, and founded there the Brotherhood of Mercy and the "Mons pietatis", meanwhile effecting numerous conversions. He was appointed court preacher by Sigismund III in 1588, and for twenty-four years filled this post to the great advantage of the Church and the nation. In 1596 the Ruthenian Church was united with Rome, largely through his efforts. When the nobles, headed by Zebrzydowski, revolted against Sigismund III, Skarga was sent on a mission of conciliation to the rebels, which, however, proved fruitless. Besides the controversial works mentioned, Skarga published a "History of the Church", and "Lives of the Saints" (Wilna, 1579; 25th ed., Lemberg, 1883–84), possibly the most widely read book in Poland. But most important of all are his "Sermons for Sundays and Holidays" (Cracow, 1595) and "Sermons on the Seven Sacraments" (Cracow, 1600), which, besides their glowing eloquence, are profound and instructive. In addition to these are "Sermons on Various Occasions" and the "Sermons Preached to the Diet". These last for inspiration and feeling are the finest productions in the literature of Poland before the Partitions. Nowhere are there found such style, eloquence, and patriotism, with the deepest religious conviction. Skarga occupies a high place in the literature and the history of Poland. His efforts to convert heretics, to restore schismatics to unity, to prevent corruption, and to stem the tide of public and political license, tending even then towards anarchy, were indeed as to this last point unsuccessful; but that was the nation's fault, not his.

S. Tarnowski.

Skoda (Schkoda), Josef, celebrated clinical lecturer and diagnostician and, with Rokitansky, founder of the modern medical school of Vienna, b. at Pilsen in Bohemia, 10 December, 1805; d. at Vienna, 13 June, 1881. Skoda was the son of a locksmith. He attended the gymnasium at Pilsen, entered the University of Vienna in 1825, and received the degree of Doctor of Medicine on 10 July, 1831. He first served in Bohemia as physician during the outbreak of cholera, was assistant physician in the general hospital of Vienna, 1832–38, in 1839 city physician of Vienna for the poor, and on 13 February, 1840, on the recommendation of Dr. Ludwig, Freiherr von Türkheim, chairman of the imperial committee of education, was appointed to the unpaid position of chief physician of the department for consumptives just opened in the general hospital. In 1846, thanks to the energetic measures of Karl Rokitansky, professor of pathological anatomy, he was appointed professor of the medical clinic against the wishes of the rest of the medical faculty. In 1848 he began to lecture in German instead of Latin, being the first professor to adopt this course. On 17 July, 1848, he was elected an active member of the mathematico-physical section of the Academy of Sciences. Early in 1871 he retired from his professorship, and the occasion was celebrated by the students and the population of Vienna by a great torchlight procession in his honour. Rokitansky calls him "a light for those who study, a model for those who strive, and a rock for those who despair". Skoda's benevolent disposition is best shown by the fact that, notwithstanding his large income and known simplicity of life, he left a comparatively small fortune, and in his will bequeathed legacies to a number of benevolent institutions.

Skoda's great merit lies in his development of the methods of physical investigation. The discovery of the method of percussion diagnosis made in 1761 by the Viennese physician, Leopold Auenbrugger (1722–1809), had been forgotten, and the knowledge of it was first revived in 1808 by Corvisart (1755–1821), court-physician to Napoleon I. Laennec (1787–1826) and his pupils Piorry and Bouillaud added auscultation to this method. Skoda began his clinical studies in close connexion with pathological anatomy while assistant physician of the hospital, but his superiors failed to understand his course, and in 1837, by way of punishment, transferred him to the ward for the insane, as it was claimed that the patients were annoyed by his investigations, especially by the method of percussion. His first publication, "Über die Perkussion" in the "Medizinische Jahrbücher des k.k. österreichen Kaiserstaates", IX (1836), attracted but little attention. This paper was followed by: "Über den Herzstoss und die durch die Herzbewegungen verursachten Töne und über die Anwendung der Perkussion bei Untersuchung der Organe des Unterleibes", in the same periodical, vols. XIII, XIV (1837); "Über Abdominaltyphus und dessen Behandlung mit Alumen crudum", also in the same periodical, vol. XV (1838); "Untersuchungsmethode zur Bestimmung des Zustandes des Herzens", vol. XVIII (1839); "Über Pericarditis in pathologisch-anatomischer und diagnostischer Beziehung", XIX (1839); "Über Piorrys Semiotik und Diagnostik", vol. XVIII (1839); "Über die Diagnose der Herzklappenfehler", vol. XXI (1840). His small but up to now unsurpassed chief work, "Abhandlung über die Perkussion und Auskultation" (Vienna, 1839), has been repeatedly published and translated into foreign languages. It established his universal renown as a diagnostician. In 1841, after a journey for research to Paris, he made a separate division in his department for skin diseases and thus gave the first impulse towards the reorganization of dermatology by Ferdinand Hebra. In 1848 at the request of the ministry of education he drew up a memorial on the reorganization of the study of medicine, and encouraged later by his advice the founding of the present higher administration of the medical school of Vienna. As regards therapeutics the accusation was often made against him that he held to the "Nihilism" of the Vienna School. As a matter of fact his therapeutics were exceedingly simple in contrast to the great variety of remedial agents used at that time, which he regarded as useless, as in his experience many ailments were cured without medicines, merely by suitable medical supervision and proper diet. His high sense of duty as a teacher, the large amount of work he performed as a physician, and the early appearance of organic heart-trouble are probably the reasons that from 1848 he published less and less. The few papers which he wrote from 1850 are to be found in the transactions of the Academy of Sciences and the periodical of the Society of Physicians of Vienna of which he was the honorary president.

Drasche, *Skoda* (Vienna, 1881).

Leopold Senfelder.

Slade, John, Venerable See Bodey, John, Venerable.

Slander is the attributing to another of a fault of which one knows him to be innocent. It contains a twofold malice, that which grows out of damage unjustly done to our neighbour's good name and that of lying as well. Theologians say that this latter guilt considered in itself, in so far as it is an offence against veracity, may not be grievous, but that nevertheless it will frequently be advisable to mention it in confession, in order that the extent and method of reparation may be settled. The important thing to note of slander is that it is a lesion of our neighbour's right to his reputation. Hence moralists hold that it is not specifically distinct from mere detraction. For the purpose of determining the species of this sin, the manner in which the injury is done is negligible. There is, however, this difference between slander and detraction: that, whereas there are circumstances in which we may lawfully expose the misdeeds which another has actually committed, we are never allowed to blacken his name by charging him with what he has not done. A lie is intrinsically evil and can never be justified by any cause or in any circumstances. Slander involves a violation of commutative justice and therefore imposes on its perpetrator the obligation of restitution. First of all, he must undo the injury of the defamation itself. There seems in general to be only one adequate way to do this: he must simply retract his false statement. Moralists say that if he can make full atonement by declaring that he has made a mistake, this will be sufficient; otherwise he must unequivocally take back his untruth, even at the expense of exhibiting himself a liar. In addition he is bound to make compensation to his victim for whatever losses may have been sustained as a result of his malicious imputation. It is supposed that the damage which ensues has been in some measure foreseen by the slanderer.

Joseph F. Delany.

Slavery.—How numerous the slaves were in Roman society when Christianity made its appearance, how hard was their lot, and how the competition of slave labour crushed free labour is notorious. It is the scope of this article to show what Christianity has done for slaves and against slavery, first in the Roman world, next in that society which was the result of the barbarian invasions, and lastly in the modern world.

I. The Church and Roman Slavery.—The first missionaries of the Gospel, men of Jewish origin, came from a country where slavery existed. But it existed in Judea under a form very different from the Roman form. The Mosaic Law was merciful to the slave (Ex., xxi; Lev., xxv; Deut., xv, xvi, xxi) and carefully secured his fair wage to the labourer (Deut., xxiv, 15). In Jewish society the slave was not an object of contempt, because labour was not despised as it was elsewhere. No man thought it beneath him to ply a manual trade. These ideas and habits of life the Apostles brought into the new society which so rapidly grew up as the effect of their preaching. As this society included, from the first, faithful of all conditions—rich and poor, slaves and freemen—the Apostles were obliged to utter their beliefs as to the social inequalities which so profoundly divided the Roman world. "For as many of you as have been baptized in Christ, have put on Christ. There is neither Jew nor Greek: there is neither bond nor free: there is neither male nor female. For you are all one in Christ Jesus" (Gal., iii, 27–28; cf. I Cor., xii, 13). From this principle St. Paul draws no political conclusions. It was not his wish, as it was not in his power, to realize Christian equality either by force or by revolt. Such revolutions are not effected of a sudden. Christianity accepts society as it is, influencing it for its transformation through, and only through, individual souls. What it demands in the first place from masters and from slaves is, to live as brethren—commanding with equity, without threatening, remembering that God is the master of all—obeying with fear, but without servile flattery, in simplicity of heart, as they would obey Christ (cf. Eph., vi, 9; Col., iii, 22–4; iv, 1).

This language was understood by masters and by slaves who became converts to Christianity. But many slaves who were Christians had pagan masters to whom this sentiment of fraternity was unknown, and who sometimes exhibited that cruelty of which moralists and poets so often speak. To such slaves St. Peter points out their duty: to be submissive "not only to the good and gentle, but also to the froward", not with a mere inert resignation, but to give a good example and to imitate Christ, Who also suffered unjustly (I Peter, ii, 18, 23–24). In the eyes of the Apostles, the slave's condition, peculiarly wretched, peculiarly exposed to temptations, bears all the more efficacious testimony to the new religion. St. Paul recommends slaves to seek in all things to please their masters, not to contradict them, to do them no wrong, to honour them, to be loyal to them, so as to make the teaching of God Our Saviour shine forth before the eyes of all, and to prevent that name and teaching from being blasphemed (cf. I Tim., vi, 1; Tit., ii, 9, 10). The Apostolic writings show how large a place slaves occupied in the Church. Nearly all the names of the Christians whom St. Paul salutes in his Epistle to the Romans are servile *cognomina:* the two groups whom he calls "those of the household of Aristobulus" and "those of the household of Narcissus" indicate Christian servitors of those two contemporaries of Nero. His Epistle, written from Rome, to the Philippians (iv, 22) bears them greeting from the saints of Cæsar's household, i. e. converted slaves of the imperial palace.

One fact which, in the Church, relieved the condition of the slave was the absence among Christians of the ancient scorn of labour (Cicero, "De off.", I, xlii; "Pro Flacco", xviii; "Pro domo", xxxiii; Suetonius, "Claudius", xxii; Seneca, "De beneficiis", xviii; Valerius Maximus, V, ii, 10). Converts to the new religion knew that Jesus had been a carpenter; they saw St. Paul exercise the occupation of a tentmaker (Acts, xviii, 3; I Cor., iv, 12). "Neither did we eat any man's bread", said the Apostle, "for nothing, but in labour and in toil we worked night and day, lest we should be chargeable to any of you" (II Thess., iii, 8; cf. Acts, xx, 33, 34). Such an example, given at a time when those who laboured were accounted "the dregs of the city", and those who did not labour lived on the public bounty, constituted a very efficacious form of preaching. A new sentiment was thereby introduced into the Roman world, while at the same time a formal discipline was being established in the Church. It would have none of those who made a parade of their leisurely curiosity in the Greek and Roman cities (II Thess., iii, 11). It declared that those who do not labour do not deserve to be fed (ibid., 10). A Christian was not permitted to live without an occupation (Didache, xii).

Religious equality was the negation of slavery as it was practised by pagan society. It must have been an exaggeration, no doubt, to say, as one author of the first century said, that "slaves had no religion, or had only foreign religions" (Tacitus, "Annals", XIV, xliv): many were members of funerary *collegia* under the invocation of Roman divinities (Statutes of the College of Lanuvium, "Corp. Inscr. lat.", XIV, 2112). But in many circumstances this haughty and formalist religion excluded slaves from its functions, which, it was held, their presence would have defiled (Cicero, "Octavius", xxiv). Absolute religious equality, as proclaimed by Christianity, was therefore a novelty. The Church made no account of the social condition of the faithful. Bond and free received the same sacraments. Clerics of servile origin were numerous (St. Jerome, Ep. lxxxii). The very Chair of St. Peter was occupied by men who had been slaves—Pius in the second century, Callistus in the third. So complete—one might almost say, so levelling—was this Christian equality that St. Paul (I Tim., vi, 2), and, later, St. Ignatius (Polyc., iv), are obliged to admonish the slave and the handmaid not to contemn their masters, "believers like them and sharing in the same benefits". In giving them a place in religious society, the Church restored to slaves the family and marriage. In Roman law, neither legitimate marriage, nor regular paternity, nor even any impediment to the most unnatural unions had existed for the slave (Digest, XXXVIII, viii, i, § 2; x, 10, § 5). That slaves often endeavoured to override this abominable position is touchingly proved by innumerable mortuary inscriptions; but the name of *uxor*, which the slave woman takes in these inscriptions, is very precarious, for no law protects her honour, and with her there is no adultery (Digest, XLVIII, v, 6; Cod. Justin., IX, ix, 23). In the Church the marriage of slaves is a sacrament; it possesses "the solidity" of one (St. Basil, Ep. cxcix, 42). The Apostolic Constitutions impose upon the master the duty of making his slave contract "a legitimate marriage" (III, iv; VIII, xxxii). St. John Chrysostom declares that slaves have the marital power over their wives and the paternal over their children ("In Ep. ad Ephes.", Hom. xxii, 2). He says that "he who has immoral relations with the wife of a slave is as culpable as he who has the like relations with the wife of the prince: both are adulterers, for it is not the condition of the parties that makes the crime" ("In I Thess.", Hom. v, 2; "In II Thess.", Hom. iii, 2).

In the Christian cemeteries there is no difference between the tombs of slaves and those of the free. The inscriptions on pagan sepulchres—whether the *columbarium* common to all the servants of one household, or the burial plot of a funerary *collegium* of slaves or freedmen, or isolated tombs—always indicate the servile condition. In Christian epitaphs it is hardly ever to be seen ("Bull. di archeol. christiana", 1866, p. 24), though slaves formed a considerable part of the Christian population. Sometimes we find a slave honoured with a more pretentious sepulchre than others of the faithful, like that of Ampliatus in the cemetery of Domitilla ("Bull. di archeol. christ.", 1881, pp. 57–74, and pl. III, IV). This is particularly so in the case of slaves who were martyrs: the ashes of two slaves, Protus and Hyacinthus, burned alive in the Valerian persecution, had been wrapped in a winding-sheet of gold tissue (ibid., 1894, p. 28). Martyrdom eloquently manifests the religious equality of the slave: he displays as much firmness before the menaces of the persecutor as does the free man. Sometimes it is not for the Faith alone that a slave woman dies, but for the faith and chastity equally threatened—"pro fide et castitate occisa est" ("Acta S. Dulæ" in Acta SS., III March, p. 552). Beautiful assertions of this moral freedom are found in the accounts of the martyrdoms of the slaves Ariadne, Blandina, Evelpistus, Potamienna, Felicitas, Sabina, Vitalis, Porphyrus, and many others (see Allard, "Dix leçons sur le martyre", 4th ed., pp. 155–64). The Church made the enfranchisement of the slave an act of disinterested charity. Pagan masters usually sold him his liberty for his market value, on receipt of his painfully amassed savings (Cicero, "Philipp. VIII", xi; Seneca, "Ep. lxxx"); true Christians gave it to him as an alms. Sometimes the Church redeemed slaves out of its common resources (St. Ignatius, "Polyc.", 4; Apos. Const., IV, iii). Heroic Christians are known to have sold themselves into slavery to deliver slaves (St. Clement, "Cor.", 4; "Vita S. Joannis Eleemosynarii" in Acta SS., Jan., II, p. 506). Many enfranchised all the slaves they had. In pagan antiquity wholesale enfranchisements are frequent, but they never include all the owner's slaves, and they are always by testamentary disposition—that is when the owner cannot be impoverished by his bounty (Justinian, "Inst.", I, vii; "Cod. Just.", VII, iii, 1). Only Christians enfranchised all their slaves in the owner's lifetime, thus effectually despoiling themselves of a considerable part of their fortune (see Allard, "Les esclaves chrétiens", 4th ed., p. 338). At the beginning of the fifth century, a Roman millionaire, St. Melania, gratuitously granted liberty to so many thousand of slaves that her biographer declares himself unable to give their exact number (Vita S. Melaniæ, xxxiv). Palladius mentions eight thousand slaves freed (Hist. Lausiaca, cxix), which, taking the average price of a slave as about $100, would represent a value of $800,000. But Palladius wrote before 406, which was long before Melania had completely exhausted her immense fortune in acts of liberality of all kinds (Rampolla, "S. Melania Giuniore", 1905, p. 221).

Primitive Christianity did not attack slavery directly; but it acted as though slavery did not exist. By inspiring the best of its children with this heroic charity, examples of which have been given above, it remotely prepared the way for the abolition of slavery. To reproach the Church of the first ages with not having condemned slavery in principle, and with having tolerated it in fact, is to blame it for not having let loose a frightful revolution, in which, perhaps, all civilization would have perished with Roman society. But to say, with Ciccotti (Il tramonto della schiavitù, Fr. tr., 1910, pp. 18, 20), that primitive Christianity had not even "an embryonic vision" of a society in which there should be no slavery, to say that the Fathers of the Church did not feel "the horror of slavery", is to display either strange ignorance or singular unfairness. In St. Gregory of Nyssa (In Ecclesiastem, hom. iv) the most energetic and absolute reprobation of slavery may be found; and again in numerous passages of St. John Chrysostom's discourses we have the picture of a society without slaves—a society composed only of free workers, an ideal portrait of which he traces with the most eloquent insistence (see the texts cited in Allard, "Les esclaves chrétiens", pp. 416–23).

II. THE CHURCH AND SLAVERY AFTER THE BARBARIAN INVASIONS.—It is beyond the scope of this article to discuss the legislative movement which took place during the same period in regard to slaves. From Augustus to Constantine statutes and jurisprudence tended to afford them greater protection against ill-treatment and to facilitate enfranchisement. Under the Christian emperors this tendency, in spite of relapses at certain points, became daily more marked, and ended, in the sixth century, in Justinian's very liberal legislation (see Wallon, "Hist. de l'esclavage dans l'antiquité", III, ii and x). Although the civil law on slavery still lagged behind the demands of Christianity ("The laws of Cæsar are one thing, the laws of Christ another", St. Jerome writes in "Ep. lxxvii"), nevertheless very great progress had been made. It continued in the Eastern Empire (laws of Basil the Macedonian, of Leo the Wise, of Constantine Porphyrogenitus), but in the West it was abruptly checked by the barbarian invasions. Those invasions were calamitous for the slaves, increasing their numbers which had begun to diminish, and subjecting them to legislation and to customs much harder than those which obtained under the Roman law of the period (see Allard, "Les origines du servage" in "Rev. des questions historiques", April, 1911). Here again the Church intervened. It did so in three ways: redeeming slaves; legislating for their benefit in its councils; setting an example of kind treatment. Documents of the fifth to the seventh century are full of instances of captives carried off from conquered cities by the barbarians and doomed to slavery, whom bishops, priests, and monks, and pious laymen redeemed. Redeemed captives were sometimes sent back in thousands to their own country (ibid., pp. 393–7, and Lesne, "Hist. de la propriété ecclésiastique en France", 1910, pp. 357–69).

The Churches of Gaul, Spain, Britain, and Italy were incessantly busy, in numerous councils, with the affairs of the slaves; protection of the maltreated slave who has taken refuge in a church (Councils of Orléans, 511, 538, 549; Council of Epone, 517); protection of freedmen, not only those manumitted *in ecclesiis*, but also those freed by any other process (Council of Arles, 452; of Agde, 506; of Orléans, 549; of Mâcon, 585; of Toledo, 589, 633; of Paris, 615);

validity of marriages contracted with full knowledge of the circumstances between free persons and slaves (Councils of Verberie, 752; of Compiègne, 759); rest for slaves on Sundays and feast days (Council of Auxerre, 578 or 585; of Châlon-sur-Saône, middle of the seventh century; of Rouen, 650; of Wessex, 691; of Berghamsted, 697); prohibition of Jews to possess Christian slaves (Council of Orléans, 541; of Mâcon, 581; of Clichy, 625; of Toledo, 589, 633, 656); suppression of traffic in slaves by forbidding their sale outside of the kingdom (Council of Châlon-sur-Saône, between 644 and 650); prohibition against reducing a free man to slavery (Council of Clichy, 625). Less liberal in this respect than Justinian (Novella cxxiii, 17), who made tacit consent a sufficient condition, the Western discipline does not permit a slave to be raised to the priesthood without the formal consent of his master; nevertheless the councils held at Orléans in 511, 538, 549, while imposing canonical penalties upon the bishop who exceeded his authority in this matter, declare such an ordination to be valid. A council held at Rome in 595 under the presidency of St. Gregory the Great permits the slave to become a monk without any consent, express or tacit, of his master.

At this period the Church found itself becoming a great proprietor. Barbarian converts endowed it largely with real property. As these estates were furnished with serfs attached to the cultivation of the soil, the Church became by force of circumstances a proprietor of human beings, for whom, in these troublous times, the relation was a great blessing. The laws of the barbarians, amended through Christian influence, gave ecclesiastical serfs a privileged position: their rents were fixed; ordinarily, they were bound to give the proprietor half of their labour or half of its products, the remainder being left to them (Lex Alemannorum, xxii; Lex Bajuvariorum, I, xiv, 6). A council of the sixth century (Eauze, 551) enjoins upon bishops that they must exact of their serfs a lighter service than that performed by the serfs of lay proprietors, and must remit to them one-fourth of their rents. Another advantage of ecclesiastical serfs was the permanency of their position. A Roman law of the middle of the fourth century (Cod. Just., XI, xlvii, 2) had forbidden rural slaves to be removed from the lands to which they belonged: this was the origin of serfdom, a much better condition than slavery properly so called. But the barbarians virtually suppressed this beneficent law (Gregory of Tours, "Hist. Franc.", VI, 45); it was even formally abrogated among the Goths of Italy by the edict of Theodoric (§ 142). Nevertheless, as an exceptional privilege, it remained in force for the serfs of the Church, who, like the Church itself, remained under Roman law (Lex Burgondionum, LVIII, i; Louis I, "Add. ad legem Langobard.", III, i). They shared besides, the inalienability of all ecclesiastical property which had been established by councils (Rome, 502; Orléans, 511, 538; Epone, 517; Clichy, 625; Toledo, 589); they were sheltered from the exactions of the royal officers by the immunity granted to almost all church lands (Kroell, "L'immunité franque", 1910); thus their position was generally envied (Flodoard, "Hist. eccl. Remensis", I, xiv), and when the royal liberality assigned to a church a portion of land out of the state property, the serfs who cultivated were loud in their expressions of joy (Vita S. Eligii, I, xv).

It has been asserted that the ecclesiastical serfs were less fortunately situated because the inalienability of church property prevented their being enfranchised. But this is inexact. St. Gregory the Great enfranchised serfs of the Roman Church (Ep. vi, 12), and there is frequent discussion in the councils in regard to ecclesiastical freedmen. The Council of Agde (506) gives the bishop the right to enfranchise those serfs "who shall have deserved it" and to leave them a small patrimony. A Council of Orléans (541) declares that even if the bishop has dissipated the property of his church, the serfs whom he has freed in reasonable number (*numero competenti*) are to remain free. A Merovingian formula shows a bishop enfranchising one-tenth of his serfs (Formulæ Biturigenses, viii). The Spanish councils imposed greater restrictions, recognizing the right of a bishop to enfranchise the serfs of his church on condition of his indemnifying it out of his own private property (Council of Seville, 590; of Toledo, 633; of Merida, 666). But they made it obligatory to enfranchise the serf in whom a serious vocation to the priesthood was discerned (Council of Saragossa, 593). An English council (Celchyte, 816) orders that at the death of a bishop all the other bishops and all the abbots shall enfranchise three slaves each for the repose of his soul. This last clause shows again the mistake of saying that the monks had not the right of manumission. The canon of the Council of Epone (517) which forbids abbots to enfranchise their serfs was enacted in order that the monks might not be left to work without assistance and has been taken too literally. It is inspired not only by agricultural prudence, but also by the consideration that the serfs belong to the community of monks, and not to the abbot individually. Moreover, the rule of St. Ferréol (sixth century) permits the abbot to free serfs with the consent of the monks or without their consent, if, in the latter case, he replaces at his own expense those he has enfranchised. The statement that ecclesiastical freedmen were not as free as the freedmen of lay proprietors will not bear examination in the light of facts, which shows the situation of the two classes to have been identical, except that the freedman of the Church carried a higher *wergheld* than a lay freedman, and therefore his life was better protected. The "Polyptych of Irminon", a detailed description of the abbey lands of Saint-Germain-des-Prés, shows that in the ninth century the serfs of that domain were not numerous and led in every way the life of free peasants.

III. THE CHURCH AND MODERN SLAVERY.—In the Middle Ages, slavery, properly so called, no longer existed in Christian countries; it had been replaced by serfdom, an intermediate condition in which a man enjoyed all his personal rights except the right to leave the land he cultivated and the right to freely dispose of his property. Serfdom soon disappeared in Catholic countries, to last longer only where the Protestant Reformation prevailed. But while serfdom was becoming extinct, the course of events was bringing to pass a temporary revival of slavery. As a consequence of the wars against the Mussulmans and the commerce maintained with the East, the European countries bordering on the Mediterranean, particularly Spain and Italy, once more had slaves—Turkish prisoners and also, unfortunately, captives imported by conscienceless traders. Though these slaves were generally well treated, and set at liberty if they asked for baptism, this revival of slavery, lasting until the seventeenth century, is a blot on Christian civilization. But the number of these slaves was always very small in comparison with that of the Christian captives reduced to slavery in Mussulman countries, particularly in the Barbary states from Tripoli to the Atlantic coast of Morocco. These captives were cruelly treated and were in constant danger of losing their faith. Many actually did deny their faith, or, at least, were driven by despair to abandon all religion and all morality. Religious orders were founded to succour and redeem them.

The Trinitarians, founded in 1198 by St. John of Matha and St. Felix of Valois, established hospitals for slaves at Algiers and Tunis in the sixteenth and seventeenth centuries; and from its foundation until the year 1787 it redeemed 900,000 slaves. The Order of Our Lady of Ransom (Mercedarians), founded in the thirteenth century by St. Peter Nolasco, and established more especially in France and Spain, redeemed 490,736 slaves between the years 1218 and 1632. To the three regular vows its founder had added a fourth, "To become a hostage in the hands of the infidels, if that is necessary for the deliverance of Christ's faithful." Many Mercedarians kept this vow even to martyrdom. Another order undertook not only to redeem captives, but also to give them spiritual and material assistance. St. Vincent of Paul had been a slave at Algiers in 1605, and had witnessed the sufferings and perils of Christian slaves. At the request of Louis XIV, he sent them, in 1642, priests of the congregation which he had founded. Many of these priests, indeed, were invested with consular functions at Tunis and at Algiers. From 1642 to 1660 they redeemed about 1200 slaves at an expense of about 1,200,000 *livres*. But their greatest achievements were in teaching the Catechism and converting thousands, and in preparing many of the captives to suffer the most cruel martyrdom rather than deny the Faith. As a Protestant historian has recently said, none of the expeditions sent against the Barbary States by the Powers of Europe, or even America, equalled "the moral effect produced by the ministry of consolation, peace and abnegation, going even to the sacrifice of liberty and life, which was exercised by the humble sons of St. John of Matha, St. Peter Nolasco, and St. Vincent of Paul" (Bonet-Maury, "France, christianisme et civilisation", 1907, p. 142).

A second revival of slavery took place after the discovery of the New World by the Spaniards in 1492. To give the history of it would be to exceed the limits of this article. It will be sufficient to recall the efforts of Las Casas in behalf of the aborigines of America and the protestations of popes both against the enslavement of those aborigines and the traffic in negro slaves. England, France, Portugal, and Spain, all participated in this nefarious traffic. England only made amends for its transgressions when, in 1815, it took the initiative in the suppression of the slave-trade. In 1871 a writer had the temerity to assert that the Papacy had not yet been able "to make up its mind to condemn slavery" (Ernest Havet, "Le christianisme et ses origines", I, p. xxi). He forgot that, in 1462, Pius II declared slavery to be "a great crime" (*magnum scelus*); that, in 1537, Paul III forbade the enslavement of the Indians; that Urban VIII forbade it in 1639, and Benedict XIV in 1741; that Pius VII demanded of the Congress of Vienna, in 1815, the suppression of the slave-trade, and Gregory XVI condemned it in 1839; that, in the Bull of Canonization of the Jesuit Peter Claver, one of the most illustrious adversaries of slavery, Pius IX branded the "supreme villainy" (*summum nefas*) of the slave-traders. Everyone knows of the beautiful letter which Leo XIII, in 1888, addressed to the Brazilian bishops, exhorting them to banish from their country the remnants of slavery—a letter to which the bishops responded with their most energetic efforts, and some generous slave-owners by freeing their slaves in a body, as in the first ages of the Church.

In our own times the slave-trade still continued to devastate Africa, no longer for the profit of Christian states, from which all slavery had disappeared, but for the use of Mussulman countries. But as European penetration progresses in Africa, the missionaries, who are always its precursors—Fathers of the Holy Ghost, Oblates, White Fathers, Franciscans, Jesuits, Priests of the Mission of Lyons—labour in the Sudan, Guinea, on the Gabun, in the region of the Great Lakes, redeeming slaves and establishing "liberty villages." At the head of this movement appear two men: Cardinal Lavigerie, who in 1888 founded the *Société Antiesclavagiste* and in 1889 promoted the Brussels conference; Leo XIII, who encouraged Lavigerie in all his projects and, in 1890, by an Encyclical once more condemning the slave-traders and "the accursed pest of servitude", ordered an annual collection to be made in all Catholic churches for the benefit of the anti-slavery work. Some modern writers, mostly of the Socialist School—Karl Marx, Engel, Ciccotti, and, in a measure, Seligman—attribute the now almost complete disappearance of slavery to the evolution of interests and to economic causes only. The foregoing exposition of the subject is an answer to their materialistic conception of history, as showing that, if not the only, at least the principal, cause of that disappearance is Christianity acting through the authority of its teaching and the influence of its charity.

PAUL ALLARD.

Slavery, ETHICAL ASPECT OF.—In Greek and Roman civilization slavery on an extensive scale formed an essential element of the social structure; and consequently the ethical speculators, no less than the practical statesmen, regarded it as a just and indispensable institution. The Greek, however, assumed that the slave population should be recruited normally only from the barbarian or lower races. The Roman laws, in the heyday of the empire, treated the slave as a mere chattel. The master possessed over him the power of life and death; the slave could not contract a legal marriage, or any other kind of contract; in fact he possessed no civil rights; in the eyes of the law he was not a "person". Nevertheless the settlement of natural justice asserted itself sufficiently to condemn, or at least to disapprove, the conduct of masters who treated their slaves with signal inhumanity.

Christianity found slavery in possession throughout the Roman world; and when Christianity obtained power it could not and did not attempt summarily to abolish the institution. From the beginning, however, as is shown elsewhere in this article, the Church exerted a steady powerful pressure for the immediate amelioration of the condition of the individual slave, and for the ultimate abolition of a system which, even in its mildest form, could with difficulty be reconciled with the spirit of the Gospel and the doctrine that all men are brothers in that Divine sonship which knows no distinction of bond and free. From the beginning the Christian moralist did not condemn slavery as *in se*, or essentially, against the natural law or natural justice. The fact that slavery, tempered with many humane restrictions, was permitted under the Mosaic law would have sufficed to prevent the institution from being condemned by

Christian teachers as absolutely immoral. They, following the example of St. Paul, implicitly accept slavery as not in itself incompatible with the Christian Law. The apostle counsels slaves to obey their masters, and to bear with their condition patiently. This estimate of slavery continued to prevail till it became fixed in the systematized ethical teaching of the schools; and so it remained without any conspicuous modification till towards the end of the eighteenth century. We may take as representative de Lugo's statement of the chief argument offered in proof of the thesis that slavery, apart from all abuses, is not in itself contrary to the natural law. "Slavery consists in this, that a man is obliged, for his whole life, to devote his labour and services to a master. Now as anybody may justly bind himself, for the sake of some anticipated reward, to give his entire services to a master for a year, and he would in justice be bound to fulfil this contract, why may not he bind himself in like manner for a longer period, even for his entire lifetime, an obligation which would constitute slavery?" (De Justitia et Jure, disp. VI, sec. 2. no. 14.)

It must be observed that the defence of what may be termed theoretical slavery was by no means intended to be a justification of slavery as it existed historically, with all its attendant, and almost inevitably attendant, abuses, disregarding the natural rights of the slave and entailing pernicious consequences on the character of the slave-holding class, as well as on society in general. Concurrently with the affirmation that slavery is not against the natural law, the moralists specify what are the natural inviolable rights of the slave, and the corresponding duties of the owner. The gist of this teaching is summarized by Cardinal Gerdil (1718–1802): "Slavery is not to be understood as conferring on one man the same power over another that men have over cattle. Wherefore they erred who in former times refused to include slaves among persons; and believed that however barbarously the master treated his slave he did not violate any right of the slave. For slavery does not abolish the natural equality of men: hence by slavery one man is understood to become subject to the dominion of another to the extent that the master has a perpetual right to all those services which one man may justly perform for another; and subject to the condition that the master shall take due care of his slave and treat him humanely" (Comp. Instit. Civil., L, vii). The master was judged to sin against justice if he treated his slave cruelly, if he overloaded him with labour, deprived him of adequate food and clothing, or if he separated husband from wife, or the mother from her young children. It may be said that the approved ethical view of slavery was that while, religiously speaking, it could not be condemned as against the natural law, and had on its side the *jus gentium*, it was looked upon with disfavour as at best merely tolerable, and when judged by its consequences, a positive evil.

The later moralists, that is to say, broadly speaking, those who have written since the end of the eighteenth century, though in fundamental agreement with their predecessors, have somewhat shifted the perspective. In possession of the bad historical record of slavery and familiar with a Christian structure of society from which slavery had been eliminated, these later moralists emphasize more than did the older ones the reasons for condemning slavery; and they lay less stress on those in its favour. While they admit that it is not, theoretically speaking at least, contrary to the natural law, they hold that it is hardly compatible with the dignity of personality, and is to be condemned as immoral on account of the evil consequences it almost inevitably leads to. It is but little in keeping with human dignity that one man should so far be deprived of his liberty as to be perpetually subject to the will of a master in everything that concerns his external life; that he should be compelled to spend his entire labour for the benefit of another and receive in return only a bare subsistence. This condition of degradation is aggravated by the fact that the slave is, generally, deprived of all means of intellectual development for himself or for his children. This life almost inevitably leads to the destruction of a proper sense of self-respect, blunts the intellectual faculties, weakens the sense of responsibility, and results in a degraded moral standard. On the other hand, the exercise of the slave-master's power, too seldom sufficiently restrained by a sense of justice or Christian feeling, tends to develop arrogance, pride, and a tyrannical disposition, which in the long run comes to treat the slave as a being with no rights at all. Besides, as history amply proves, the presence of a slave population breeds a vast amount of sexual immorality among the slave-owning class, and, to borrow a phrase of Lecky, tends to cast a stigma on all labour and to degrade and impoverish the free poor.

Even granting that slavery, when attended with a due regard for the rights of the slave, is not in itself intrinsically wrong, there still remains the important question of the titles by which a master can justly own a slave. The least debatable one, voluntary acceptance of slavery, we have already noticed. Another one that was looked upon as legitimate was purchase. Although it is against natural justice to treat a person as a mere commodity or thing of commerce, nevertheless the labour of a man for his whole lifetime is something that may be lawfully bought and sold. Owing to the exalted notion that prevailed in earlier times about the *patria potestas*, a father was granted the right to sell his son into slavery, if he could not otherwise relieve his own dire distress. But the theologians held that if he should afterwards be able to do so, the father was bound to redeem the slave, and the master was bound to set him free if anybody offered to repay him the price he had paid. To sell old or worn-out slaves to anybody who was likely to prove a cruel master, to separate by sale husband and wife, or a mother and her little children, was looked upon as wrong and forbidden. Another title was war. If a man forfeited his life so that he could be justly put to death, this punishment might be commuted into the mitigated penalty of slavery, or penal servitude for life. On the same principle that slavery is a lesser evil than death, captives taken in war, who, according to the ethical ideas of the *jus gentium*, might lawfully be put to death by the victors, were instead reduced to slavery. Whatever justification this practice may have had in the *jus gentium* of former ages, none could be found for it now.

When slavery prevailed as part of the social organization and the slaves were ranked as property, it seemed not unreasonable that the old juridical maxim, *Partus sequitur ventrem*, should be accepted as peremptorily settling the status of children born in slavery. But it would be difficult to find any justification for this title in the natural law, except on the theory that the institution of slavery was, in certain conditions, necessary to the permanence of the social organization. An insufficient reason frequently offered in defence of it was that the master acquired a right to the children as compensation for the expense he incurred in their support, which could not be provided by the mother who possessed nothing of her own. Nor is there much cogency in the other plea, *i.e.* that a person born in slavery was presumed to consent tacitly to remaining in that condition, as there was no way open to him to enter any other. It is unnecessary to observe that the practice of capturing savages or barbarians for the purpose of making slaves of them has always been condemned as a heinous offence against justice, and no just title could be created by this procedure. Was it lawful for owners to retain in slavery the descendants of those who had been made slaves in this unjust way? The last conspicuous Catholic moralist who posed this question when it was not merely a theoretical one, Kenrick, resolves it in the affirmative on the ground that lapse of time remedies the original defect in titles when the stability of society and the avoidance of grave disturbances demand it.

James J. Fox.

Slaves (Déné "Men"), a tribe of the great Déné family of American Indians, so called apparently from the fact that the Crees drove it back to its original northern haunts. Its present habitat is the forests that lie to the west of Great Slave Lake, from Hay River inclusive. The Slaves are divided into five main bands: those of Hay River, Trout Lake, Horn Mountain, the forks of the Mackenzie, and Fort Norman. Their total population is about 1100. They are for the most part a people of unprepossessing appearance. Their morals were not formerly of the best, but since the advent of Catholic missionaries they have considerably improved. Many of them have discarded the tepees of old for more or less comfortable log houses. Yet the religious instinct is not so strongly developed in them as with most of their congeners in the North. They were not so eager to receive the Catholic missionaries, and when the first Protestant ministers arrived among them, the liberalities of the strangers had more effect on them than on the other northern Dénés. To-day perhaps one-twelfth of the whole tribe has embraced Protestantism, the remainder being Catholics. The spiritual wants of the latter are attended to from the missions of St. Joseph on Great Slave Lake, Ste. Anne, Hay River, and Providence, Mackenzie.

Slavonic Language and Liturgy.—Although the Latin holds the chief place among the liturgical languages in which the Mass is celebrated and the praise of God recited in the Divine Offices, yet the Slavonic language comes next to it among the languages widely used throughout the world in the liturgy of the Church. Unlike the Greek or the Latin languages, each of which may be said to be representative of a single rite, it is dedicated to both the Greek and the Roman Rites. Its use, however, is far better known throughout Europe as an expression of the Greek Rite; for it is used amongst the various Slavic nationalities of the Byzantine Rite, whether Catholic or Orthodox, and in that form is spread among 115,000,000 people; but it is also used in the Roman Rite along the eastern shores of the Adriatic Sea in Dalmatia and in the lower part of Croatia among about 100,000 Catholics there. Whilst the Greek language is the norm and the original of the Byzantine or Greek Rite, its actual use as a church language is limited to a comparatively small number, reckoning by population. The liturgy and offices of the Byzantine Church were translated from the Greek into what is now Old Slavonic (or Church Slavonic) by Sts. Cyril and Methodius about the year 866 and the period immediately following. St. Cyril is credited with having invented or adapted a special alphabet which now bears his name (Cyrillic) in order to express the sounds of the Slavonic language, as spoken by the Bulgars and Moravians of his day. (See Cyril and Methodius, Saints.)

Later on St. Methodius translated the entire Bible into Slavonic and his disciples afterwards added other works of the Greek saints and the canon law. These two brother saints always celebrated Mass and administered the sacraments in the Slavonic language. News of their successful missionary work among the pagan Slavs was carried to Rome along with complaints against them for celebrating the rites of the Church in the heathen vernacular. In 868 Saints Cyril and Methodius were summoned to Rome by Nicholas I, but arriving there after his death they were heartily received by his successor Adrian II, who approved of their Slavonic version of the liturgy. St. Cyril died in Rome in 869 and is buried in the Church of San Clemente. St. Methodius was afterwards consecrated Archbishop of Moravia and Pannonia and returned thither to his missionary work. Later on he was again accused of using the heathen Slavonic language in the celebration of the Mass and in the sacraments. It was a popular idea then, that as there had been three languages, Hebrew, Greek, and Latin, inscribed over our Lord on the cross, it would be sacrilegious to use any other language in the service of the Church. St. Methodius appealed to the pope and in 879 he was again summoned to Rome, before John VIII, who after hearing the matter sanctioned the use of the Slavonic language in the Mass and the offices of the Church, saying among other things: "We rightly praise the Slavonic letters invented by Cyril, in which praises to God are set forth, and we order that the glories and deeds of Christ our Lord be told in that same language. Nor is it in anywise opposed to wholesome doctrine and faith to say Mass in that same Slavonic language (Nec sanæ fidei vel doctrinæ aliquid obstat missam in eadem slavonica lingua canere), or to chant the holy gospels or divine lessons from the Old and New Testaments duly translated and interpreted therein, or the other parts of the divine office: for He who created the three principal languages, Hebrew, Greek, and Latin, also made the others for His praise and glory" (Boczek, Codex, tom. I, pp. 43–44). From that time onward the Slavonic tongue was firmly fixed as a liturgical language of the Church, and was used wherever the Slavic tribes were converted to Christianity under the influence of monks and missionaries of the Greek Rite. The Cyrillic letters used in writing it are adaptations of the uncial Greek alphabet, with the addition of a number of new letters to express sounds not found in the Greek language. All Church books in Russia, Servia, Bulgaria, or Austro-Hungary (whether used in the Greek Catholic or the Greek Orthodox Churches) are printed in the old Cyrillic alphabet and in the ancient Slavonic tongue.

But even before St. Cyril invented his alphabet for the Slavonic language there existed certain runes or native characters in which the southern dialect of the language was committed to writing. There is a tradition, alluded to by Innocent XI, that they were invented by St. Jerome as early as the fourth century; Jagič however thinks that they were really the original letters invented by St. Cyril and afterwards abandoned in favour of an imitation of Greek characters by his disciples and successors. This older alphabet, which still survives, is called the Glagolitic (from *glagolati*, to speak, because the rude tribesmen imagined that the letters spoke to the reader and told him what to say), and was used by the southern Slavic tribes and now exists along the Adriatic highlands. (See Glagolitic.) The Slavonic which is written in the Glagolitic characters is also the ancient language, but it differs considerably from the Slavonic written in the Cyrillic letters. In fact it may be roughly compared to the difference between the Gaelic of Ireland and the Gaelic of Scotland. The Roman Mass was translated into this Slavonic shortly after the Greek liturgy had been translated by Sts. Cyril and Methodius, so that in the course of time among the Slavic peoples the southern Slavonic written in Glagolitic letters became the language of the Roman Rite, while the northern Slavonic written in Cyrillic letters was the language of the Greek Rite. The prevailing use of the Latin language and the adoption of the Roman alphabet by many Slavic nationalities caused the use of the Glagolitic to diminish and Latin to gradually take its place. The northern Slavic peoples, like the Bohemians, Poles, and Slovaks, who were converted by Latin missionaries, used the Latin in their rite from the very first. At present the Glagolitic is only used in Dalmatia and Croatia. Urban VIII in 1631 definitively settled the use of the Glagolitic-Slavonic missal and office-books in the Roman Rite, and laid down rules where the clergy of each language came in contact with each other in regard to church services. Leo XIII published two editions of the Glagolitic Missal, from one of which the illustration on page 45 is taken.

The liturgy used in the Slavonic language, whether of Greek or Roman Rite, offers no peculiarities differing from the original Greek or Latin sources. The Ruthenians have introduced an occasional minor modification (see RUTHENIAN RITE), but the Orthodox Russians, Bulgarians, and Servians substantially follow the Byzantine liturgy and offices in the Slavonic version. The Glagolitic Missal, Breviary, and ritual follow closely the Roman liturgical books, and the latest editions contain the new offices authorized by the Roman congregations. The casual observer could not distinguish the Slavonic priest from the Latin priest when celebrating Mass or other services, except by hearing the language as pronounced aloud.

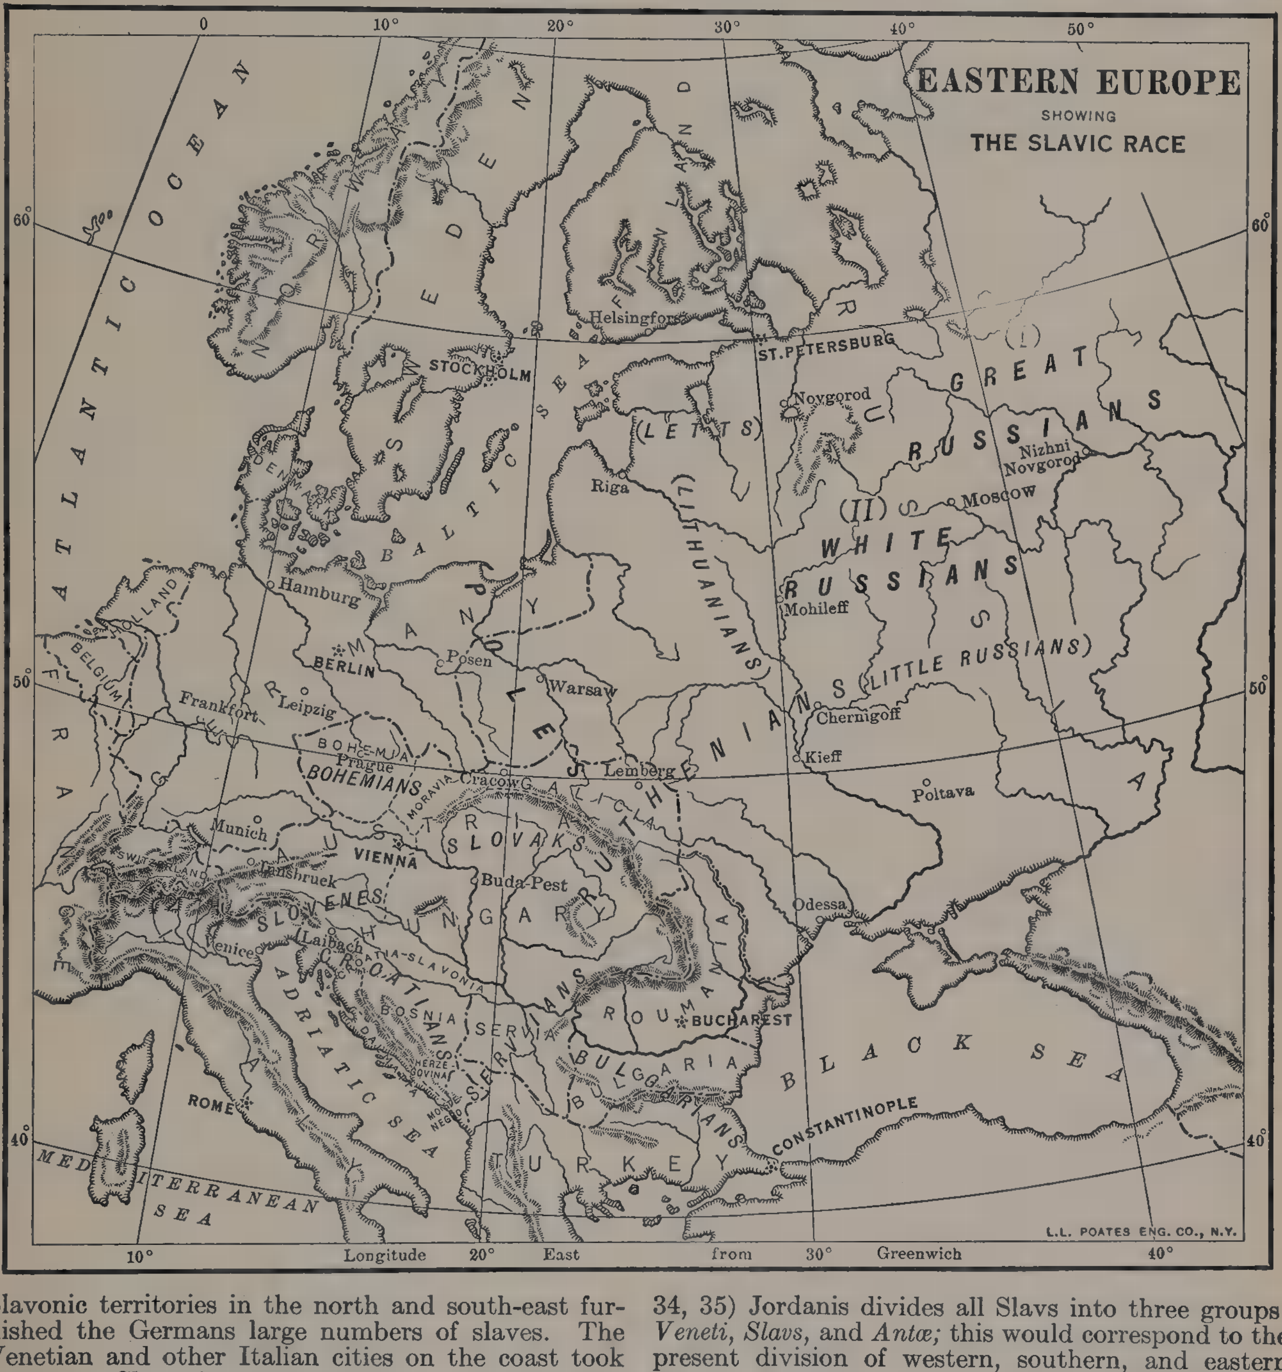
ANDREW J. SHIPMAN.

Slavs, THE.—I. NAME.—A. *Slavs.*—At present the customary name for all the Slavonic races is *Slav.* This name did not appear in history until a late period, but it has superseded all others. The general opinion is that it appeared for the first time in written documents in the sixth century of the Christian era. However, before this the Alexandrian scholar Ptolemy (about A.D. 100–178) mentioned in his work, "Γεωγραφικὴ ὑφήγησις", a tribe called *Stavani* (Σταυανοί), which was said to live in European Sarmatia between the Lithuanian tribes of the Galindæ and the Sudeni and the Sarmatic tribe of the Alans. He also mentioned another tribe, *Soubenoi* (Σουβενοί), which he assigned to Asiatic Sarmatia on the other side of the Alani. According to Šafařík these two statements refer to the same Slavonic people. Ptolemy got his information from two sources; the orthography of the copies he had was poor and consequently he believed there were two tribes to which it was necessary to assign separate localities. In reality the second name refers very probably to the ancestors of the present Slavs, as does the first name also though with less certainty. The Slavonic combination of consonants *sl* was changed in Greek orthography into *stl, sthl,* or *skl.* This theory was accepted by many scholars before Šafařík, as Lomonosov, Schlözer, Tatistcheff, J. Thunmann, who in 1774 published a dissertation on the subject. It was first advanced probably in 1679 by Hartknoch who was supported in modern times by many scholars. Apart from the mention by Ptolemy, the expression Slavs is not found until the sixth century. The opinion once held by some German and many Slavonic scholars that the names *Suevi* and *Slav* were the same and that these two peoples were identical, although the Suevi were a branch of the Germans and the ancestors of the present Swabians, must be absolutely rejected. Scattered names found in old inscriptions and old charters that are similar in sound to the word *Slav* must also be excluded in this investigation.

After the reference by Ptolemy the Slavs are first spoken of by Pseudo-Cæsarios of Nazianzum, whose work appeared at the beginning of the sixth century; in the middle of the sixth century Jordanis and Procopius gave fuller accounts of them. Even in the earliest sources the name appears in two forms. The old Slavonic authorities give: *Slověne* (plural from the singular *Slověnin*), the country is called *Slověńsko*, the language *slověnesk jazyk*, the people *slověńsk narod.* The Greeks wrote *Soubenoi* (in Ptolemy Σουβενοί), but the writers of the sixth century used the terms: *Sklabenoi* (Σκλαβηνοί), *Sklauenoi* (Σκλαυηνοί), *Sklabinoi* (Σκλαβῖνοι), *Sklauinoi* (Σκλαυῖνοι). The Romans used the terms: *Sclaueni, Sclauini, Sclauenia, Sclauinia.* Later authors employ the expressions *Sthlabenoi* (Σθλαβηνοί), *Sthlabinoi* (Σθλαβῖνοι, Σθλαβινοί), while the Romans wrote: *Sthlaueni, Sthlauini.* In the "Life of St. Clement" the expression Σθλαβενοί occurs; later writers use such terms as *Esklabinoi* (Εσκλαβίνοι), *Asklabinoi* (Ασκλαβῖνοι), *Sklabinioi* (Σκλαβίνιοι), *Sklauenioi* (Σκλαυήνιοι). The adjectives are *sclaviniscus, sclavaniscus, sclavinicus, sclauanicus.* At the same time shorter forms are also to be found, as: *sklaboi* (Σκλαβοί), *sthlaboi* (Σθλάβοι), *sclavi, schlavi, sclavania,* later also *slavi.* In addition appear as scattered forms: *Sclauani, Sclauones* (Σκλαβῶνοι, Εσθλαβησιανοί, Σθλαβογενεῖς). The Armenian Moises of Choren was acquainted with the term *Sklavajin:* the chronicler Michael the Syrian used the expression *Sglau* or *Sglou;* the Arabians adopted the expression *Sclav*, but because it could not be brought into harmony with their phonetical laws they changed it into *Sakláb, Sakálibe,* and later also to *Slavije, Slavijun.* The anonymous Persian geography of the tenth century uses the term *Seljabe.*

Various explanations of the name have been suggested, the theory depending upon whether the longer or shorter form has been taken as the basis and upon the acceptance of the vowel *o* or *a* as the original root vowel. From the thirteenth century until Šafařík the shorter form *Slav* was always regarded as the original expression, and the name of the Slavs was traced from the word *Slava* (honour, fame), consequently it signified the same as *gloriosi* (αἰνετοί). However, as early as the fourteenth century and later the name *Slav* was at times referred to the longer form *Slověnin* with *o* as the root vowel, and this longer form was traced to the word *Slovo* (word, speech), Slavs signifying, consequently, "the talking ones", *verbosi, veraces,* ὁμόγλοττοι. Dobrowsky maintained this explanation and Šafařík inclined to it, consequently it has been the accepted theory up to the present time. Other elucidations of the name *Slav*, as *člověk* (man), *skala* (rock), *seló* (colony), *slati* (to send), *solovej* (nightingale), scarcely merit mention. There is much more reason in another objection that Slavonic philologists have made to the derivation of the word *Slav* from *slovo* (word). The ending *en* or *an* of the form *Slověnin* indicates derivation from a topographical designation. Dobrowsky perceived this difficulty and therefore invented the topographical name *Slovy*, which was to be derived from *slovo.* With some reservation Šafařík also gave a geographical interpretation. He did not, however, accept the purely imaginary locality *Slovy* but connected the word *Slověnin* with the Lithuanian *Salava*, Lettish *Sala*, from which is derived the Polish *žuława*, signifying island, a dry spot in a swampy region. According to this interpretation the word Slavs would mean the inhabitants of an island, or inhabitants of a marshy region. The German scholar Grimm maintained the identity of the Slavs with the Suevi and derived the name from *sloba*, *svoba* (freedom). The most probable explanation is that deriving the name from *slovo* (word); this is supported by the Slavonic name for the Germans *Nemci* (the dumb). The Slavs called themselves *Slovani*, that is, "the speaking ones", those who know words, while they called their neighbours the Germans, "the dumb", that is, those who do not know words.



During the long period of war between the Germans and Slavs, which lasted until the tenth century, the Slavonic territories in the north and south-east furnished the Germans large numbers of slaves. The Venetian and other Italian cities on the coast took numerous Slavonic captives from the opposite side of the Adriatic whom they resold to other places. The Slavs frequently shared in the seizure and export of their countrymen as slaves. The Naretani, a piratical Slavonic tribe living in the present district of Southern Dalmatia, were especially notorious for their slave-trade. Russian princes exported large numbers of slaves from their country. The result is that the name *Slav* has given the word *slave* to the peoples of Western Europe.

The question still remains to be answered whether the expression *Slavs* indicated originally all Slavonic tribes or only one or a few of them. The reference to them in Ptolemy shows that the word then meant only a single tribe. Ptolemy called the Slavs as a whole the *Venedai* and says they are "the greatest nation" (μεγίστον ἔθνος). The Byzantines of the sixth century thought only of the southern Slavs and incidentally also of the Russians, who lived on the boundaries of the Eastern Empire. With them the expression Slavs meant only the southern Slavs; they called the Russians *Antæ*, and distinguished sharply between the two groups of tribes. In one place (Get., 34, 35) Jordanis divides all Slavs into three groups: *Veneti*, *Slavs*, and *Antæ*; this would correspond to the present division of western, southern, and eastern Slavs. However, this mention appears to be an arbitrary combination. In another passage he designates the eastern Slavs by the name *Veneti*. Probably he had found the expression *Veneti* in old writers and had learned personally the names *Slavs* and *Antæ*; in this way arose his triple division. All the seventh-century authorities call all Slavonic tribes, both southern Slavs and western Slavs, that belonged to the kingdom of Prince Samo, simply Slavs; Samo is called the "ruler of the Slavs", but his peoples are called "the Slavs named Vindi" (*Sclavi cognomento Winadi*). In the eighth and ninth centuries the Czechs and Slavs of the Elbe were generally called Slavs, but also at times Wends, by the German and

Roman chroniclers. In the same way all authorities of the era of the Apostles to the Slavs, Cyril and Methodius, give the name Slav without any distinction both to the southern Slavs, to which branch both missionaries belonged, and to the western Slavs, among whom they laboured. As regards the eastern Slavs or Russians, leaving out the mention of Ptolemy already referred to, Jordanis says that at the beginning of the era of the migrations the Goths had carried on war with the "nation of Slavs"; this nation must have lived in what is now Southern Russia. The earliest Russian chronicle, erroneously ascribed to the monk Nestor, always calls the Slavs as a whole "Slavs". When it begins to narrate the history of Russia it speaks indeed of the Russians to whom it never applies the designation Slav, but it also often tells of the Slavs of Northern Russia, the Slavs of Novgorod. Those tribes that were already thoroughly incorporated in the Russian kingdom are simply called Russian tribes, while the Slavs in Northern Russia, who maintained a certain independence, were designated by the general expression Slavs. Consequently, the opinion advocated by Miklošič, namely, that the name Slav was originally applied only to one Slavonic tribe, is unfounded, though it has been supported by other scholars like Krek, Potkánski, Czermak, and Pasternek.

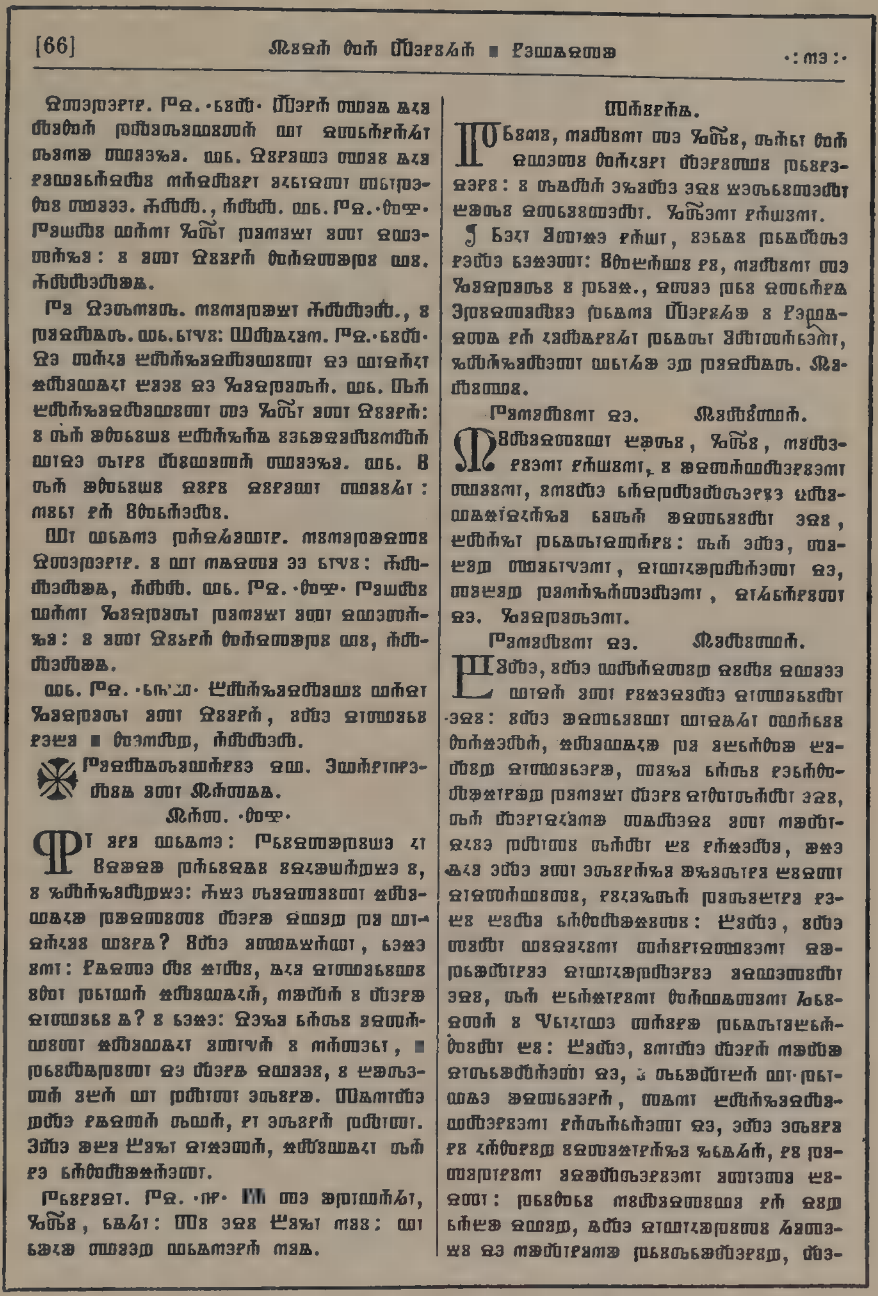
From at least the sixth century the expression Slav was, therefore, the general designation of all Slavonic tribes. Wherever a Slavonic tribe rose to greater political importance and founded an independent kingdom of its own, the name of the tribe came to the front and pushed aside the general designation Slav. Where, however, the Slavs attained no political power but fell under the sway of foreign rulers they remained known by the general name of Slavs. Among the successful tribes who brought an entire district under their sway and gave it their name were the Russians, Poles, Czechs, Croats, and the Turanian tribe of the Bulgars. The old general name has been retained to the present time by the Slovenes of Southern Austria on the Adriatic coast, the Slovaks of Northern Hungary, the province Slavonia between Croatia and Hungary and its inhabitants the Slavonians, and the Slovinci of Prussia on the North Sea. Up to recent times the name was customary among the inhabitants of the most southern point of Dalmatia, which was formerly the celebrated Republic of Dubrovnik (Ragusa). Until late in the Middle Ages it was retained by the Slavs of Novgorod in Northern Russia and by the Slavs in Macedonia and Albania. These peoples, however, have also retained their specific national and tribal names.

B. *Wends.*—A much older designation in the historical authorities than Slav is the name Wend. It is under this designation that the Slavs first appear in history. The first certain references to the present Slavs date from the first and second centuries. They were made by the Roman writers Pliny and Tacitus and the Alexandrian already mentioned Ptolemy. Pliny (d. A.D. 79) says (Nat. hist., IV, 97) that among the peoples living on the other side of the Vistula besides the Sarmatians and others are also the Wends (*Venedi*). Tacitus (G., 46) says the same. He describes the Wends somewhat more in detail but cannot make up his mind whether he ought to include them among the Germans or the Sarmatians; still they seem to him to be more closely connected with the first named than with the latter. Ptolemy (d. about 178) in his Γεωγραφική (III, 5, 7) calls the Venedi the greatest nation living on the Wendic Gulf. However, he says later (III, 5, 8) that they live on the Vistula; he also speaks of the Venedic mountains (III. 5, 6). In the centuries immediately succeeding the Wends are mentioned very rarely. The migrations that had now begun had brought other peoples into the foreground until the Venedi again appear in the sixth century under the name of Slavs. The name Wend, however, was never completely forgotten. The German chroniclers used both names constantly without distinction, the former almost oftener than the latter. Even now the Sorbs of Lusatia are called by the Germans Wends, while the Slovenes are frequently called Winds and their language is called Windish.

Those who maintain the theory that the original home of the Slavs was in the countries along the Danube have tried to refute the opinion that these references relate to the ancestors of the present Slavs, but their arguments are inconclusive. Besides these definite notices there are several others that are neither clear nor certain. The Wends or Slavs have had connected with them as old tribal confederates of the present Slavs the *Budinoi* mentioned by Herodotus, and also the Island of Banoma mentioned by Pliny (IV, 94), further the Venetæ, the original inhabitants of the present Province of Venice, as well as the Homeric Venetoi, Cæsar's Veneti in Gaul and Anglia, etc. In all probability, the Adriatic Veneti were an Illyrian tribe related to the present Albanians, but nothing is known of them. With more reason can the old story that the Greeks obtained amber from the River Eridanos in the country of the Enetoi be applied to the Wends or Slavs; from which it may be concluded that the Slavs were already living on the shores of the Baltic in the fourth century before Christ.

Most probably the name Wend was of foreign origin and the race was known by this name only among the foreign tribes, while they called themselves Slavs. It is possible that the Slavs were originally named Wends by the early Gauls, because the root Wend, or Wind, is found especially in the districts once occupied by the Gauls. The word was apparently a designation that was first applied to various Gallic or Celtic tribes, and then given by the Celts to the Wendic tribes living north of them. The explanation of the meaning of the word is also to be sought from this point of view. The endeavour was made at one time to derive the word from the Teutonic dialects, as Danish *wand*, Old Norwegian *vatn*, Latin *unda*, meaning water. Thus Wends would signify watermen, people living about the water, people living by the sea, as proposed by Jordan, Adelung, and others. A derivation from the German *wenden* (to turn) has also been suggested, thus the Wends are the people wandering about; or from the Gothic *vinja*, related to the German *weiden*, pasture, hence Wends, those who pasture, the shepherds; finally the word has been traced to the old root *ven*, belonging together. Wends would, therefore, mean the allied. Pogodin traced the name from the Celtic, taking it from the early Celtic root *vindos*, white, by which expression the dark Celts designated the light Slavs. Naturally an explanation of the term was also sought in the Slavonic language; thus, Kollar derived it from the Old Slavonic word *Un*, Sassinek from *Slo-van*, Perwolf from the Old Slavonic root *vęd*, still retained in the O. Slav. comparative *vestij* meaning large and brought it into connexion with the Russian *Anti* and *Vjatiči;* Hilferding even derived it from the old East Indian designation of the Aryans *Vanila*, and Šafařík connected the word with the East Indians, a confusion that is also to be found in the early writers.

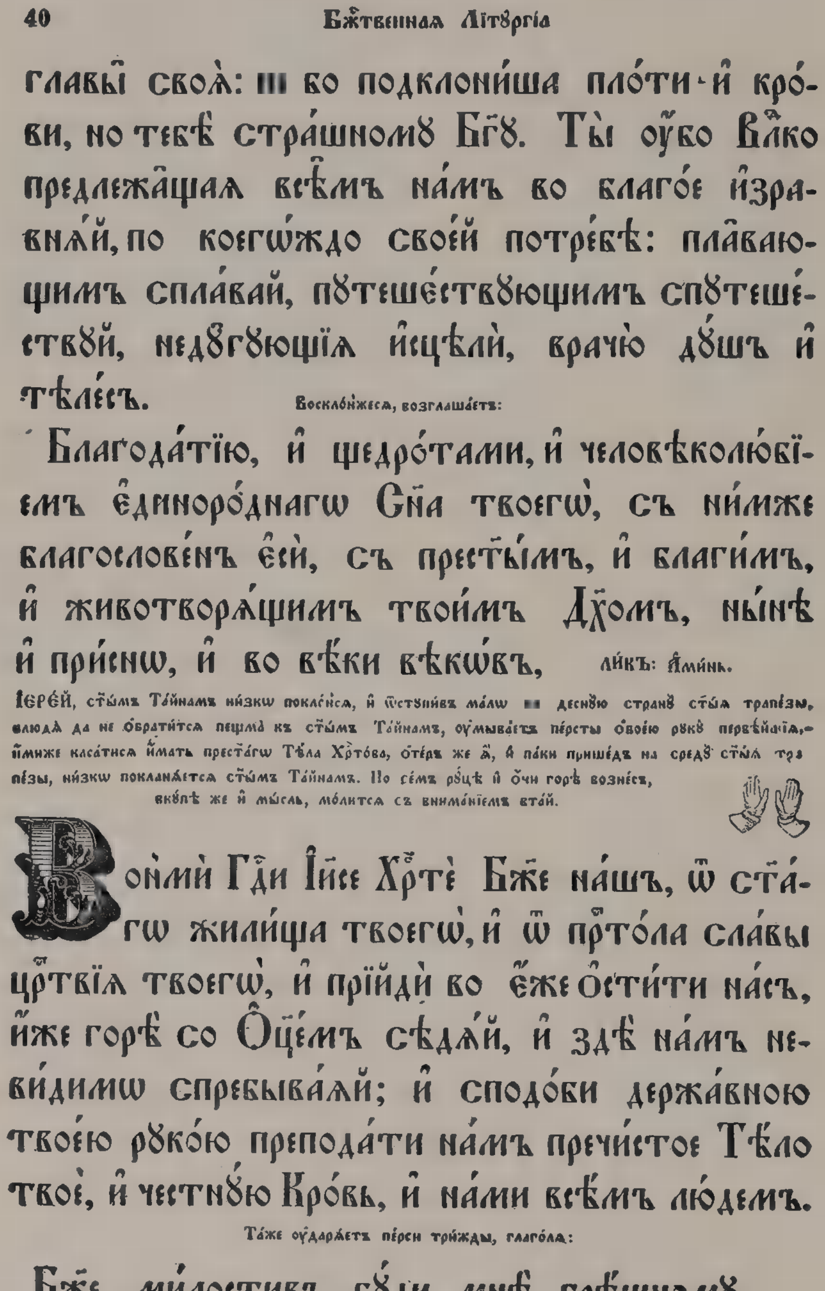
II. ORIGINAL HOME AND MIGRATIONS.—There are two theories in regard to the original home of the Slavs, and these theories are in sharp opposition to each other. One considers the region of the Danube as the original home of the Slavs, whence they spread north-east over the Carpathians as far as the Volga River, Lake Ilmen, and the Caspian Sea. The other theory regards the districts between the Vistula and the Dneiper as their original home, whence they spread south-west over the Carpathians to the Balkans and into the Alps, and towards the west across the Oder and the Elbe.



Glagolitic Missal of the Roman Rite
A page from the Missa pro Sponso et Sponsa, containing the Gradual, Tract, Gospel (Matt. xix), and Special Prayer over the Bride and Groom

The ancient Kieff chronicle, erroneously ascribed to the monk Nestor, is the earliest authority quoted for the theory that the original home of the Slavs is to be sought in the region of the Danube. Here in detail is related for the first time how the Slavs spread from the lower Danube to all the countries occupied later by them. The Noricans and Illyrians are declared to be Slavs, and Andronikos and the Apostle Paul are called Apostles to the Slavs because they laboured in Illyria and Pannonia. This view was maintained by the later chroniclers and historical writers of all Slavonic peoples, as the Pole Kadlubek, "Chronika pol." (1206), Boguchwal (d. 1253), Dlugos, Matej Miechowa, Decius, and others. Among the Czechs this theory was supported by Kozmaz (d. 1125), Dalimir (d. 1324), Johann Marignola (1355–1362), Pribik Pulkava (1374), and V. Hajek (1541). The Russians also developed their theories from the statements of their first chronicler, while the Greek Laonikos Harkondilos of the fifteenth century did not commit himself to this view. The southern Slavs have held this theory from the earliest period up to the present time with the evident intention to base on it their claims to the Church Slavonic in the Liturgy. At an early period, in the letter of Pope John X (914–29) to the Croatian Ban Tomislav and the Sachlumian ruler Mihael, there is a reference to the prevalent tradition that St. Jerome invented the Slavonic alphabet. This tradition maintained itself through the succeeding centuries, finding supporters even outside these countries, and was current at Rome itself. Consequently if we were to follow strictly the written historical authorities, of which a number are very trustworthy, we would be obliged to support the theory that the original home of the Slavs is in the countries along the Danube and on the Adriatic coast.

However, the contrary is the case; the original home of the Slavs and the region from which their migrations began is to be sought in the basin of the Dnieper and in the region extending to the Carpathians and the Vistula. It is easy to explain the origin of the above-mentioned widely believed opinion. At the beginning of the Old Slavonic literature in the ancient Kingdom of the Bulgars the Byzantine chronicles of Hamartolos and Malala, which were besides of very little value, were translated into Slavonic. These chronicles give an account of the migrations of the nations from the region of Senaar after the Deluge. According to this account the Europeans are the descendants of Japhet, who journeyed from Senaar by way of Asia Minor to the Balkans; there they divided into various nations and spread in various directions. Consequently the Slavonic reader of these chronicles would believe that the starting point of the migrations of the Slavs also was the Balkans and the region of the lower Danube. Because the historical authorities place the ancient tribe of the Illyrians in this region, it was necessary to make this tribe also Slavonic. In the later battles of the Slavs for the maintenance of their language in the Liturgy this opinion was very convenient, as appeal could be made for the Slavonic claims to the authority of St. Jerome and even of St. Paul. Opinions which are widely current yet which do not correspond to facts are often adopted in historical writings. Among the Slavonic historians and philologists supporting this theory are: Kopitar, August Schlötzer, Šafařík, N. Arcybašef, Fr. Rački, Bielowski, M. Drinov, L. Stur, Ivan P. Filevič, Dm. Samokvasov, M. Leopardov, N. Zakoski, and J. Pic. We have here an interesting proof that a tradition deeply rooted and extending over many centuries and found in nearly all of the early native historical authorities does not agree with historical fact.



40 Бж҃твеннаѧ Літꙋргіа

главы̀ своѧ̀: во подклонѝша плѡ́ти и҆ кро́ви, но тебѣ̀ стра́шномꙋ Бг҃ꙋ. Ты̀ ѹ҆́бо Вл҃ко предлежа̑щаѧ всѣ̑мъ на́мъ во бла́гое и҆зравнѧ́й, по коегѡ́ждо свое́й потре́бѣ: пла̑вающимъ спла́вай, пꙋтеше́ствꙋющимъ спꙋтеше́ствꙋй, недꙋгꙋющїѧ и҆сцѣлѝ, врачꙋ̀ дꙋ́шъ и҆ тѣле́съ.

Воскло́ньжесѧ, возглаша́етъ:

Блгода́тїю, и҆ щедро́тами, и҆ человѣколю́бїемъ є҆диноро́днагѡ Сн҃а твоегѡ̀, съ ни́мже благослове́нъ є҆сѝ, съ прест҃ы́мъ, и҆ бла́гимъ, и҆ животворѧ́щимъ твои́мъ Дх҃омъ, ны́нѣ и҆ при́снѡ, и҆ во вѣ́ки вѣкѡ́въ,

Ли́къ: А҆ми́нь.

Ієре́й, ст҃ы̑мъ Та́йнамъ ни́зкѡ покло́нсѧ, и҆ ѿстꙋпи́въ ма́лѡ деснꙋ́ю странꙋ̀ ст҃ы́ѧ трапе́зы, блюдѧ̀ да не ѡ҆брати́тсѧ пещмѝ къ ст҃ы̑мъ Та́йнамъ, ѹ҆мыва́етъ пе́рсты ѡ҆бо́ею рꙋкꙋ̀ перве́йшаѧ,— и҆мѝже каса́тисѧ и҆́мать прест҃а́гѡ Тѣ́ла Хр҇то́ва, ѡ҆те́ръ же а҆, и҆ па́ки прише́дъ на сре́дꙋ ст҃ы́ѧ трапе́зы, ни́зкѡ покланѧ́етсѧ ст҃ы̑мъ Та́йнамъ. По се́мъ рꙋ́цѣ и҆ ѻ҆́чи горѣ̀ вознёсъ, вкꙋ́пѣ же и҆ мы́сль, мо́литсѧ съ внима́нїемъ втай.

Вонмѝ Гд҇и І҆и҃се Хр҇тѐ Бж҃е на́шъ, ѿ ст҃а́гѡ жили́ща твоегѡ̀, и҆ ѿ пр҇то́ла сла́вы цр҇твїѧ твоегѡ̀, и҆ прїидѝ во є҆̀же ѡ҆ст҃и́ти на́съ, и҆́же горѣ̀ со Ѻ҆ц҃е́мъ сѣдѧ́й, и҆ здѣ̀ на́мъ неви́димѡ спребыва́ѧй; и҆ сподо́би держа́вною твое́ю рꙋко́ю препода́ти на́мъ пречи́стое Тѣ́ло твоѐ, и҆ че́стнꙋю Кро́вь, и҆ на́ми всѣ̑мъ лю́демъ.

Та́же ѹ҆дарѧ́етъ пе́рси три́жды, глаго́лѧ:

Бж҃е, ми́лостивъ бꙋ́ди мнѣ̀ грѣ́шномꙋ.

Cyrillic Missal of Greek Rite
A page from the Liturgy of St. John Chrysostom, containing the Prayers of Adoration just before Communion

At present most scholars are of the opinion that the original home of the Slavs in South-eastern Europe must be sought between the Vistula and the Dneiper. The reasons for this belief are: the testimony of the oldest accounts of the Slavs, given as already mentioned by Pliny, Tacitus, and Ptolemy; further the close relationship between the Slavs and the Lettish tribes, pointing to the fact that originally the Slavs lived close to the Letts and Lithuanians; then various indications proving that the Slavs must have been originally neighbours of the Finnish and Turanian tribes. Historical investigation has shown that the Thraco-Illyrian tribes are not the forefathers of the Slavs, but form an independent family group between the Greeks and the Latins. There is no certain proof in the Balkan territory and in the region along the Danube of the presence of the Slavs there before the first century. On the other hand in the region of the Dneiper excavations and archæological finds show traces only of the Slavs. In addition the direction of the general march in the migrations of the nations was always from the north-east towards the south-west, but never in the opposite direction. Those who maintain the theory that the Slavs came from the region of the Danube sought to strengthen their views by the names of various places to be found in these districts that indicate Slavonic origin. The etymology of these names, however, is not entirely certain; there are other names that appear only in the later authorities of the first centuries after Christ. Some again prove nothing, as they could have arisen without the occupation of these districts by the Slavs.

It can therefore be said almost positively that the original home of the Slavs was in the territory along the Dnieper, and farther to the north-west as far as the Vistula. From these regions they spread to the west and south-west. This much only can be conceded to the other view, that the migration probably took place much earlier than is generally supposed. Probably it took place slowly and by degrees. One tribe would push another ahead of it like a wave, and they all spread out in the wide territory from the North Sea to the Adriatic and Ægean Seas. Here and there some disorder was caused in the Slavonic migration by the incursions of Asiatic peoples, as Scythians, Sarmatians, Avars, Bulgars, and Magyars, as well as by the German migration from north-west to south-east. These incursions separated kindred tribes from one another or introduced foreign elements among them. Taken altogether, however, the natural arrangement was not much disturbed, kindred tribes journeyed together and settled near one another in the new land, so that even to-day the entire Slavonic race presents a regular succession of tribes. As early as the first century of our era individual Slavonic tribes might have crossed the boundaries of the original home and have settled at times among strangers at a considerable distance from the native country. At times again these outposts would be driven back and obliged to retire to the main body, but at the first opportunity they would advance again. Central Europe must have been largely populated by Slavs as early as the era of the Hunnish ruler Attila, or of the migrations of the German tribes of the Goths, Lombards, Gepidæ, Heruli, Rugians etc. These last-mentioned peoples and tribes formed warlike castes and military organizations which became conspicuous in history by their battles and therefore have left more traces in the old historical writings. The Slavs, however, formed the lower strata of the population of Central Europe; all the migrations of the other tribes passed over them, and when the times grew more peaceful the Slavs reappeared on the surface. It is only in this way that the appearance of the Slavs in great numbers in these countries directly after the close of the migrations can be explained without there being any record in history of when and whence they came and without their original home being depopulated.

III. Classification of the Slavonic Peoples.—The question as to the classification and number of the Slavonic peoples is a complicated one. Scientific investigation does not support the common belief, and in addition scholars do not agree in their opinions on this question. In 1822 the father of Slavonic philology, Joseph Dobrovsky, recognized nine Slavonic peoples and languages: Russian, Illyrian or Serb, Croat, Slovene, Korotanish, Slovak, Bohemian, Lusatian Sorb, and Polish. In his "Slavonic Ethnology" (1842) Pavel Šafařík enumerated six languages with thirteen dialects: Russian, Bolgarish, Illyrian, Lechish, Bohemian, Lusatian. The great Russian scholar J. Sreznejevskij held that there were eight Slavonic languages: Great Russian, Little Russian, Serbo-Croat, Korotanish, Polish, Lusatian, Bohemian, Slovak. In 1865 A. Schleicher enumerated eight Slavonic languages: Polish, Lusatian, Bohemian, Great Russian, Little Russian, Serb, Bulgarian, and Slovene. Franc Miklošič counted nine: Slovene, Bulgarian, Serbo-Croat, Great Russian, Little Russian, Bohemian, Polish, Upper Lusatian, Lower Lusatian. In 1907 Dm. Florinskij enumerated nine: Russian, Bulgarian, Serbo-Croat, Slovene, Bohemian-Moravian, Slovak, Lusatian, Polish, and Kašube. In 1898 V. Jagič held that there were eight: Polish, Lusatian, Bohemian, Great Russian, Little Russian, Slovene, Serbo-Croat, Bulgarian. Thus it is seen that the greatest representatives of Slavonic linguistics are not in accord upon the question of the number of Slavonic languages. The case is the same from the purely philological point of view. Practically the matter is even more complicated because other factors, which often play an important part, have to be considered, as religion, politics etc.

At the present time some eleven to fourteen languages, not including the extinct ones, can be enumerated which lay claim to be reckoned as distinct tongues. The cause of the uncertainty is that it is impossible to state definitively of several branches of the Slavonic family whether they form an independent nation or only the dialect and subdivision of another Slavonic nation, and further because often it is impossible to draw the line between one Slavonic people and another. The Great Russians, Poles, Bohemians, and Bulgarians are universally admitted to be distinctive Slavonic peoples with distinctive languages. The Little Russians and the White Russians are trying to develop into separate nationalities, indeed the former have now to be recognized as a distinct people, at least this is true of the Ruthenians in Austria-Hungary. The Moravians must be included in the Bohemian nation, because they hold this themselves and no philological, political, or ethnographical reason opposes. The Slovaks of Moravia also consider that they are of Bohemian nationality. About sixty years ago the Slovaks of Hungary began to develop as a separate nation with a separate literary language and must now be regarded as a distinct people. The Lusatian Sorbs also are generally looked upon as a separate people with a distinct language. A division of this little nationality into Upper and Lower Lusatians has been made on account of linguistic, religious, and political differences; this distinction is also evident in the literary language, consequently some scholars regard the Lusatians as two different peoples. The remains of the languages of the former Slavonic inhabitants of Pomerania, the Sloventzi, or Kašubes, are generally regarded at present as dialects of Polish, though some distinguished Polish scholars maintain the independence of the Kašube language. The conditions in the south are even more complicated. Without doubt the Bulgarians are a separate nationality, but it is difficult to draw the line between the Bulgarian and the Servian peoples, especially in Macedonia. Philologically the Croats and Serbs must be regarded as one nation; politically, however, and ethnographically they are distinct peoples. The population of Southern Dalmatia, the Mohammedan population of Bosnia, and probably also the inhabitants of some parts of Southern Hungary, and of Croatia cannot easily be assigned to a definite group. Again, the nationality and extent of the Slovenes living in the eastern Alps and on the Adriatic coast cannot be settled without further investigation.

From a philological point of view the following fundamental principles must be taken for guidance. The Slavonic world in its entire extent presents philologically a homogeneous whole without sharply defined transitions or gradations. When the Slavs settled in the localities at present occupied by them they were a mass of tribes of closely allied tongues that changed slightly from tribe to tribe. Later historical development, the appearance of Slavonic kingdoms, the growth of literary languages, and various civilizing influences from without have aided in bringing about the result that sharper distinctions have been drawn in certain places, and that distinct nationalities have developed in different localities. Where these factors did not appear in sufficient number the boundaries are not settled even now, or have been drawn only of late. The Slavonic peoples can be separated into the following groups on the basis of philological differences: (1) The eastern or Russian group; in the south this group approaches the Bulgarian; in the north-west the White Russian dialects show an affinity to Polish. The eastern group is subdivided into Great Russian, that is, the prevailing Russian nationality, then Little Russian, and White Russian. (2) The north-western group. This is subdivided into the Lechish languages and into Slovak, Bohemian, and Sorb tongues. The first subdivision includes the Poles, Kašubes, and Slovintzi, also the extinct languages of the Slavs who formerly extended across the Oder and the Elbe throughout the present Northern Germany. The second subdivision includes the Bohemians, Slovaks, and the Lusatian Sorbs. The Slavs in the Balkans and in the southern districts of the Austro-Hungarian Monarchy are divided philologically into Bulgarians; Stokauans, who include all Serbs, the Slavonic Mohammedans of Bosnia, and also a large part of the population of Croatia; the Cakauans, who live partly in Dalmatia, Istria, and on the coast of Croatia; the Kajkauans, to whom must be assigned three Croatian countries and all Slovene districts. According to the common opinion that is based upon a combination of philological, political, and religious reasons the Slavs are divided into the following nations: Russian, Polish, Bohemian-Slovak, Slovenes, Serbs, Croats, Bulgarians.

IV. PRESENT CONDITION—A. *Russians.*—The Russians live in Russia and the north-eastern part of Austria-Hungary. They form a compact body only in the south-western part of the Russian Empire, as in the north and east they are largely mixed with Finnish and Tatar populations. In Austria the Little Russians inhabit Eastern Galicia and the northern part of Bukowina; in Hungary they live in the eastern part on the slopes of the Carpathians. Scattered colonies of Little Russians or Ruthenians are also to be found in Slavonia and Bosnia among the southern Slavs, in Bulgaria, and in the Dobrudja. In Asia Western Siberia is Russian, Central Siberia has numerous Russian colonies, while Eastern Siberia is chiefly occupied by native tribes. There are Russians, however, living in the region of the Amur River, and on the Pacific as well as on the Island of Saghalien. Turkestan and the Kirghiz steppes have native populations with Russian colonies in the cities. There are large numbers of Russian emigrants, mostly members of sects, in Canada and elsewhere in America. Brazil, Argentina, and the United States have many Little Russian immigrants. There are small Russian colonies in Asia Minor and lately the emigration has also extended to Africa. According to the Russian census of 1897 there were in the Russian Empire 83,933,567 Russians, that is, 67 per cent of the entire population of the empire. Allowing for natural increase, at the present (1911) time there are about 89 millions. In 1900 there were in Austria 3,375,576 Ruthenians, in Hungary 429,447. Consequently in 1900 the total number of Russians could be reckoned at about 93 million persons. This does not include the Russian colonists in other countries; moreover, the numbers given by the official statistics of Austria-Hungary may be far below reality. Classified by religion the Russian Slavs are divided as follows: in Russia Orthodox Greeks, 95.48 per cent; Old Believers, 2.59 per cent; Catholics, 1.78 per cent; Protestants, .05 per cent; Jews, .08 per cent; Mohammedans, .01 per cent; in Austria-Hungary Uniat Greeks, 90.6 per cent, the Orthodox Greeks, 8 per cent. In the Russian Empire, excluding Finland and Poland, 77.01 per cent are illiterates; in Poland, 69.5 per cent; Finland and the Baltic provinces with the large German cities show a higher grade of literacy.

The Russians are divided into Great Russians, Little Russians or inhabitants of the Ukraine, and White Russians. In 1900 the relative numbers of these three divisions were approximately: Great Russians, 59,000,000; White Russians, 6,200,000; Little Russians, 23,700,000. In addition there are 3,800,000 Little Russians in Austria-Hungary, and 500,000 in America. The Russian official statistics are naturally entirely too unfavourable to the White Russians and the Little Russians; private computations of Little Russian scholars give much higher results. Hrusevskij found that the Little Russians taken altogether numbered 34,000,000; Karskij calculated that the White Russians numbered 8,000,000. A thousand years of historical development, different influences of civilization, different religious confessions, and probably also the original philological differentiation have caused the Little Russians to develop as a separate nation, and to-day this fact must be taken as a fixed factor. Among the White Russians the differentiation has not developed to so advanced a stage, but the tendency exists. In classifying the Little Russians three different types can be again distinguished: the Ukrainian, the Podolian-Galician, and the Podlachian. Ethnographically interesting are the Little Russian or Ruthenian tribes in the Carpathians, the Lemci, Boici, and Huzuli (Gouzouli). The White Russians are divided into two groups; ethnographically the eastern group is related to the Great Russians; the western to the Poles.

B. *Poles.*—The Poles represent the north-western branch of the Slavonic race. From the very earliest times they have lived in their ancestral regions between the Carpathians, the Oder, and the North Sea. A thousand years ago Boleslaw the Brave united all the Slavonic tribes living in these territories into a Polish kingdom. This kingdom, which reached its highest prosperity at the close of the Middle Ages, then gradually declined and, at the close of the eighteenth century, was divided by the surrounding powers—Russia, Prussia, and Austria. In Austria the Poles form the population of Western Galicia and are in a large minority throughout Eastern Galicia; in Eastern Galicia the population of the cities particularly is preponderantly Polish, as is also a large part of the population of a section of Austrian Silesia, the district of Teschin. The Poles are largely represented in the County of Zips in Hungary and less largely in other Hungarian counties which border on Western Galicia. There is a small Polish population in Bukowina. In Prussia the Poles live in Upper Silesia, form a large majority of the inhabitants of the Province of Posen, and also inhabit the districts of Dantzic and Marienwerder in West Prussia, and the southern parts of East Prussia. In Russia the Poles form 71.95 per cent of the population in the nine provinces formed from the Polish kingdom. In addition they live in the neighbouring district of the Province of Grodno and form a relatively large minority in Lithuania and in the provinces of White and Little Russia, where they are mainly owners of large estates and residents of cities. According to the census of 1900 the Poles in Russia numbered about 8,400,000; in Austria, 4,259,150; in Germany, including the Kasubes and Mazurians, 3,450,200; in the rest of Europe about 55,000; and in America about 1,500,000; consequently altogether, 17,664,350. Czerkawski reckoned the total number of Poles to be 21,111,374; Straszewicz held that they numbered from 18 to 19,000,000. As regards religion the Poles of Russia are almost entirely Catholic; in Austria 83.4 per cent are Catholics, 14.7 per cent are Jews, and 1.8 per cent are Protestants; in Germany they are also almost entirely Catholics, only the Mazurians in East Prussia and a small portion of the Kasubes are Protestant.

Ethnographically the Polish nation is divided into three groups: the Great Poles live in Posen, Silesia, and Prussia; the Little Poles on the upper Vistula as far as the San River and in the region of the Tatra mountains; the Masovians east of the Vistula and along the Narva and the Bug. The Kasubes could be called a fourth group. All these groups can be subdivided again into a large number of branches, but the distinctions are not so striking as in Russia and historical tradition keeps all these peoples firmly united. The Kasubes live on the left bank of the Vistula from Dantzic to the boundary of Pomerania and to the sea. According to government statistics in 1900 there were in Germany 100,213 Kasubes The very exact statistics of the scholar Ramult gives 174,831 Kasubes for the territory where they live in large bodies, and 200,000 for a total including those scattered through Germany, to which should be added a further 130,000 in America. According to the latest investigation the Kasubes are what remains of the Slavs of Pomerania who are, otherwise, long extinct.

C. *Lusatian Sorbs.*—The Lusatian Sorbs are the residue of the Slavs of the Elbe who once spread across the Oder and Elbe, inhabiting the whole of the present Northern Germany. During centuries of combat with the Germans their numbers gradually decreased. They are divided into three main groups: the Obotrites who inhabited the present Mecklenburg, Lüneburg, and Holstein whence they extended into the Old Mark; the Lutici or Veltæ, who lived between the Oder and Elbe, the Baltic and the Varna; the Sorbs, who lived on the middle course of the Elbe between the Rivers Havel and Bober. The Lutici died out on the Island of Rügen at the beginning of the fifteenth century. In the middle of the sixteenth century there were still large numbers of Slavs in Lüneburg and in the northern part of the Old Mark, while their numbers were less in Mecklenburg and in Brandenburg. However, even in Lüneburg the last Slavs disappeared between 1750–60. Only the Lusatian Sorbs who lived nearer the borders of Bohemia have been able to maintain themselves in declining numbers until the present time. The reason probably is that for some time their territory belonged to Bohemia. At present the Lusatian Sorbs number about 150,000 persons on the upper course of the Spree. They are divided into two groups, which differ so decidedly from each other in speech and customs that some regard them as two peoples; they also have two separate literatures. They are rapidly becoming Germanized, especially in Lower Lusatia. The Lusatian Sorbs are Catholics with exception of 15,000 in Upper Lusatia.

D. *Bohemians and Slovaks.*—The Bohemians and Slovaks also belong to the north-western branch of the Slavonic peoples. They entered the region now constituting Bohemia from the north and then spread farther into what is now Moravia and Northern Hungary, and into the present Lower Austria as far as the Danube. The settlements of the Slovaks in Hungary must have extended far towards the south, perhaps as far as Lake Platten, where they came into contact with the Slovenes who belonged to the southern Slavonic group. Probably, however, they did not formerly extend as far towards the east as now, and the Slovaks in the eastern portion of Slovakia are really Ruthenians who were Slovakanized in the late Middle Ages. Directly after their settlement in these countries the Bohemians fell apart into a great number of tribes. One tribe, which settled in the central part of the present Bohemia, bore the name of Czechs. It gradually brought all the other tribes under its control and gave them its name, so that since then the entire people have been called Czechs. Along with this name, however, the name Bohemians has also been retained; it comes from the old Celtic people, the Boii, who once lived in these regions. Soon, however, German colonies sprang up among the Bohemians or Czechs. The colonists settled along the Danube on the southern border of Bohemia and also farther on in the Pannonian plain. However, these settlements disappeared during the storm of the Magyar incursion. The Bohemians did not suffer from it as they did from the later immigrations of German colonists who were brought into the country by the Bohemian rulers of the native Premsylidian dynasty. These colonists lived through the mountains which encircle Bohemia and large numbers of them settled also in the interior of the country. From the thirteenth century the languages of Bohemia and Moravia became distinct tongues.

The Bohemians have emigrated to various countries outside of Bohemia-Moravia. In America there are about 800,000 Bohemians; there are large Bohemian colonies in Russia in the province of Volhynia, also in the Crimea, in Poland, and in what is called New Russia, altogether numbering 50,385. In Bulgaria there are Bohemian colonies in Wojewodovo and near Plevna; there is also a Bohemian colony in New Zealand. Nearly 400,000 Bohemians live at Vienna, and there are large numbers of Bohemians in the cities of Linz, Pesth, Berlin, Dresden, Leipzig, Triest; there are smaller, well-organized Bohemian colonies in nearly all Austrian cities, besides large Bohemian colonies in Hungary and Slavonia. In the last-mentioned country there are 31,581 Bohemians. These settlements are modern. The Slovaks occupy the south-eastern part of Moravia and the north-eastern part of Hungary from the Carpathians almost to the Danube. But there are scattered settlements of Slovaks far into the Hungarian plain and even in Southern Hungary, besides colonies of Slovaks in Slavonia. On account of the barrenness of the soil of their native land many Slovaks emigrate to America. According to the Austrian census of 1900 there were 5,955,297 Bohemians in Austria. The number may be decidedly higher. In Germany there were 115,000 Bohemians; in Hungary 2,019,641 Slovaks and 50,000 Bohemians; in America there are at least 800,000 Bohemians; in Russia 55,000; in the rest of Europe 20,000. Consequently taking all Bohemians and Slovaks together there are probably over 9,000,000. If, as is justifiable, the figures for America, Vienna, Moravia, Silesia, and Hungary are considered entirely too low, a maximum of about 10,000,000 may be accepted. As to religion 96.5 per cent of the Bohemians are Catholics, and 2.4 per cent are Protestants; 70.2 per cent of the Slovaks are Catholics, 5.3 per cent are Uniat Greeks, and 23 per cent are Protestants.

E. *Slovenes.*—The Slovenes belong, together with the Croats, Serbs, and Bulgarians, to the southern group of Slavs. The Slovenes have the position farthest to the west in the Alps and on the Adriatic. They first appeared in this region after the departure of the Lombards for Italy and the first date in their history is 595, when they fought an unsuccessful battle with the Bavarian Duke Tassilo on the field of Toblach. They occupied at first a much larger territory than at present. They extended along the Drave as far as the Tyrol, reaching the valleys of the Rivers Rienz and Eisack; they also occupied the larger part of what is now Upper Austria, Lower Austria as far as the Danube, and from the district of the Lungau in Southern Salzburg through Carinthia, Carniola, Styria, the crownland of Görz-Gradiska, and a large part of Friuli. Under German supremacy the territory occupied by them has grown considerably less in the course of the centuries. They still maintain themselves only in Carniola, in the northern part of Istria, about Görz, and in the vicinity of Triest, in the mountainous districts north of Udine in Italy, in the southern part of Carinthia and Styria, and in the Hungarian countries bordering on the farther side of the Mur River. Carinthia is becoming rapidly Germanized, and the absorption of the other races in Hungary by the Magyars constantly advances. According to the census of 1900 there were then 1,192,780 Slovenes in Austria, 94,993 in Hungary, 20,987 in Croatia and Slavonia, probably 37,000 in Italy, in America 100,000, and 20,000 in other countries. There are, taking them altogether, probably about 1,500,000 Slovenes in the world; 99 per cent of them are Catholics.

F. *Croats and Serbs.*—In speech the Croats and Serbs are one people; they have the same literary language, but use different characters. The Croats write with the Latin characters and the Serbs with the Cyrillic. They have been separated into two peoples by religion, political development, and different forms of civilization; the Croats came under the influence of Latin civilization, the Serbs under that of the Byzantines. After the migrations the warlike tribe of the Croats gained the mastery over the Slavonic tribes then living in the territory between the Kulpa and the Drave, the Adriatic and the River Cetina, in Southern Dalmatia. They founded the Croat Kingdom on the remains of Latin civilization and with Roman Catholicism as their religion. Thus the Croat nation appeared. It was not until a later date that the tribes living to the south and east began to unite politically under the old Slavonic name of Serbs, and in this region the Servian nation developed. Decided movements of the population came about later, being caused especially by the Turkish wars. The Servian settlements, which originally followed only a south-eastern course, now turned in an entirely opposite direction to the north-east. The original home of the Serbs was abandoned largely to the Albanians and Turks; the Serbs emigrated to Bosnia and across Bosnia to Dalmatia and even to Italy, where Slavonic settlements still exist in Abruzzi. Others crossed the boundaries of the Croat Kingdom and settled in large numbers in Servia and Slavonia, also in Southern Hungary, where the Austrian Government granted them religious and national autonomy and a patriarch of their own. Some of the Serbs settled here went to Southern Russia and founded there what is called the New Servia in the Government of Kherson. Consequently, the difference between the Croats and the Serbs consists not in the language but mainly in the religion, also in the civilization, history, and in the form of handwriting. But all these characteristic differences are not very marked, and thus there are districts and sections of population which cannot be easily assigned to one or the other nation, and which both peoples are justified in claiming.

Taking Serbs and Croats together there are: in Austria, 711,382; in Hungary and Croatia, 2,839,016; in Bosnia and Herzegovina, probably 1,700,000; in Montenegro, 350,000; in Servia, 2,298,551; Old Servia and Macedonia, 350,000; Albania and the vilayet of Scutari, about 100,000; Italy, 5000; Russia, 2000; America and elsewhere, 300,000. In addition there are about 108,000 Schokzians, Bunjevzians, and Krashovanians, Serbo-Croatian tribes in Hungary, who were not included with these in the census. Consequently the number of this bipartite people may be reckoned approximately as 8,700,000 persons. According to Servian computation there are about 2,300,000 Croats in Austria-Hungary; the Croats reckon their number as over 2,700,000. The controversy results from the uncertainty as to the group to which the Bosnian Mohammedans and the above-mentioned Schokzians, Bunjevzians, and Krashovanians, as well as the population of Southern Dalmatia, belong. As to religion the Serbs are almost exclusively Orthodox Greek, the Croats Catholic, the great majority of the inhabitants of Southern Dalmatia are Catholic, but many consider themselves as belonging to the Servian nation. The branches in Hungary mentioned above are Catholic; it is still undecided whether to include them among the Croats or Serbs.

G. *Bulgarians.*—The Slavonic tribes living in ancient Roman Mœsia and Thrace south of the Danube and south-east of the Serbs as far as the Black Sea came under the sway of the Turanian tribe of the Bulgars, which established the old Kingdom of Bulgaria in this region as early as the second half of the seventh century. The conquerors soon began to adopt the language and customs of the subjugated people, and from this intermixture arose the Bulgarian people. The historical development was not a quiet and uniform one; there were continual migrations and remigrations, conquests and intermingling. When the Slavs first entered the Balkan peninsula they spread far beyond their present boundaries and even covered Greece and the Peloponnesus, which seemed about to become Slavonic. However, thanks to their higher civilization and superior tactics, the Greeks drove back the Slavs. Still, Slavonic settlements continued to exist in Greece and the Peloponnesus until the late Middle Ages. The Greeks were aided by the Turkish conquest, and the Slavs were forced to withdraw to the limit that is still maintained. The Turks then began to force back the Slavonic population in Macedonia and Bulgaria and to plant colonies of their own people in certain districts. The chief aim of the Turkish colonization was always to obtain strategic points and to secure the passes over the Balkans. The Slavonic population also began to withdraw from the plains along the Danube where naturally great battles were often fought, and which were often traversed by the Turkish army. A part emigrated to Hungary, where a considerable number of Bulgarian settlements still exist; others journeyed to Bessarabia and South Russia. After the liberation of Bulgaria the emigrants began to return and the population moved again from the mountains into the valleys, while large numbers of Turks and Circassians went back from liberated Bulgaria to Turkey.

On the other hand the emigration from Macedonia is still large. Owing to these uncertain conditions, and especially on account of the slight investigation of the subject in Macedonia, it is difficult to give the size of the Bulgarian population even approximately. In approximate figures the Bulgarians number: in the Kingdom of Bulgaria, 2,864,735; Macedonia, 1,200,000; Asia Minor, 600,000; Russia, 180,000; Rumania, 90,000; in other countries, 50,000, hence there are altogether perhaps over 5,000,000. In Bulgaria there are besides the Bulgarian population, 20,644 Pomaks, that is Mohammedans who speak Bulgarian, 1516 Serbs, 531,217 Turks, 9862 Gagauzi (Bulgarians who speak Turkish), 18,874 Tatars, 66,702 Greeks in cities along the coast, 89,563 Gypsies, and 71,023 Rumanians. The kingdom, therefore, is not an absolutely homogeneous nationality. In religion the Bulgarians are Orthodox Greeks with exception of the Pomaks, already mentioned, and of the Paulicians who are Catholics. The Bulgarians are divided into a number of branches and dialects; it is often doubtful whether some of these subdivisions should not be included among the Serbs. This is especially the case in Macedonia, consequently all enumerations of the population differ extremely from one another.

If, on the basis of earlier results, the natural annual growth of the Slavonic populations is taken as 1.4 per cent, it may be claimed that there were about 156–157 million Slavs in the year 1910. In 1900 all Slavs taken together numbered approximately 136,500,000 persons, divided thus: Russians, 94,000,000; Poles, 17,500,000; Lusatian Serbs, 150,000; Bohemians and Slovaks, 9,800,000; Slovenes, 1,500,000; Serbo-Croats, 8,550,000; Bulgarians, 5,000,000.

LEOPOLD LÉNARD.

Slavs in America.—The Slavic races have sent large numbers of their people to the United States and Canada, and this immigration is coming every year in increasing numbers. The earliest immigration began before the war of the States, but within the past thirty years it has become so great as quite to overshadow the Irish and German immigration of the earlier decades. For two-thirds of that period no accurate figures of tongues and nationalities were kept, the immigrants being merely credited to the political governments or countries from which they came, but within the past twelve years more accurate data have been preserved. During these years (1899–1910) the total immigration into the United States has been about 10,000,000 in round numbers, and of these the Slavs have formed about 22 per cent. (actually 2,117,240), to say nothing of the increase of native-born Slavs in this country during that period, as well as the numbers of the earlier arrivals. Reliable estimates compiled from the various racial sources show that there are from five and a half to six millions of Slavs in the United States, including the native-born of Slavic parents. We are generally unaware of these facts, because the Slavs are less conspicuous among us than the Italians, Germans, or Jews; their languages and their history are unfamiliar and remote, besides they are not so massed in the great cities of this country.

I. BOHEMIANS (*Čech;* adjective, *český*, Bohemian). These people ought really be called *Chekh* (*Czech*), but are named Bohemians after the aboriginal tribe of the Boii, who dwelt in Bohemia in Roman times. By a curious perversion of language, on account of various gypsies who about two centuries ago travelled westward across Bohemia and thereby came to be known in France as "Bohemians", the word Bohemian came into use to designate one who lived an easy, careless life, unhampered by serious responsibilities. Such a meaning is, however, the very antithesis of the serious conservative Chekh character. The names of a few Bohemians are found in the early history of the United States. Augustýn Heřman (1692) of Bohemia Manor, Maryland, and Bedřich Filip (Frederick Philipse, 1702) of Philipse Manor, Yonkers, New York, are the earliest. In 1848 the revolutionary uprisings in Austria sent many Bohemians to this country. In the eighteenth century the Moravian Brethren (Bohemian Brethren) had come in large numbers. The finding of gold in California in 1849–50 attracted many more, especially as serfdom and labour dues were abolished in Bohemia at the end of 1848, which left the peasant and workman free to travel. In 1869 and the succeeding years immigration was stimulated by the labour strikes in Bohemia, and on one occasion all the women workers of several cigar factories came over and settled in New York. About 60 per cent of the Bohemians and Moravians who have settled here are Catholics, and their churches have been fairly maintained. Their immigration during the past ten years has been 98,100, and in 1910 the number of Bohemians in the United States, immigrants and native born, was reckoned at 550,000. They have some 140 Bohemian Catholic churches and about 250 Bohemian priests; their societies, schools, and general institutions are active and flourishing.

II. BULGARIANS (*Bŭlgar;* adjective *bŭlgarski*, Bulgarian).—This part of the Slavic race inhabits the present Kingdom of Bulgaria, and the Turkish provinces of Eastern Rumelia, representing ancient Macedonia. Thus it happens that the Bulgarians are almost equally divided between Turkey and Bulgaria. Their ancestors were the Bolgars or Bulgars, a Finnish tribe, which conquered, intermarried, and coalesced with the Slav inhabitants, and eventually gave their name to them. The Bulgarian tongue is in many respects the nearest to the Church Slavonic, and it was the ancient Bulgarian which Sts. Cyril and Methodius are said to have learned in order to evangelize the pagan Slavs. The modern Bulgarian language, written with Russian characters and a few additions, differs from the other Slavic languages in that it, like English, has lost nearly every inflexion, and, like Rumanian, has the peculiarity of attaching the article to the end of the word, while the other Slavic tongues have no article at all. The Bulgarians who have gained their freedom from Turkish supremacy in the present Kingdom of Bulgaria are fairly contented; but those in Macedonia chafe bitterly against Turkish rule and form a large portion of those who emigrate to America. The Bulgarians are nearly all of the Greek Orthodox Church; there are some twenty thousand Greek Catholics, mostly in Macedonia, and about 50,000 Roman Catholics. The Greek Patriarch of Constantinople has always claimed jurisdiction over the Bulgarian Orthodox Church, and he enforced his jurisdiction until 1872, when the Bulgarian exarch was appointed to exercise supreme jurisdiction. Since that time the Bulgarians have been in a state of schism to the patriarch. They are ruled in Bulgaria by a Holy Synod of their own, whilst the Bulgarian exarch, resident in Constantinople, is the head of the entire Bulgarian Church. He is recognized by the Russian Church, but is considered excommunicate by the Greek Patriarch, who however retained his authority over the Greek-speaking churches of Macedonia and Bulgaria.

Bulgarians came to the United States as early as 1890; but there were then only a few of them as students, mostly from Macedonia, brought hither by mission bodies to study for the Protestant ministry. The real immigration began in 1905, when it seems that the Bulgarians discovered America as a land of opportunity, stimulated probably by the Turkish and Greek persecutions then raging in Macedonia against them. The railroads and steel works in the West needed men, and several enterprising steamship agents brought over Macedonians and Bulgarians in large numbers. Before 1906 there were scarcely 500 to 600 Bulgarians in the country, and these chiefly in St. Louis, Missouri. Since then they have been coming at the rate of from 8000 to 10,000 a year, until now (1911) there are from 80,000 to 90,000 Bulgarians scattered throughout the United States and Canada. The majority of them are employed in factories, railroads, mines, and sugar works. Granite City, Madison, and Chicago, Illinois; St. Louis, Missouri; Indianapolis, Indiana; Steelton, Pennsylvania; Portland, Oregon, and New York City all have a considerable Bulgarian population. They also take to farming and are scattered throughout the north-west. They now (1911) have three Greek Orthodox churches in the United States, at Granite City and Madison, Illinois, and at Steelton, Pennsylvania, as well as several mission stations. Their clergy consist of one monk and two secular priests; and they also have a church at Toronto, Canada. There are no Bulgarian Catholics, either of the Greek or Roman Rite, sufficient to form a church here. The Bulgarians, unlike the other Slavs, have no church or benefit societies or brotherhoods in America. They publish five Bulgarian papers, of which the "Naroden Glas" of Granite City is the most important.

III. Croatians (*Hrvat;* adjective, *hrvatski*, Croatian).—These are the inhabitants of the autonomous or home-rule province of Croatia-Slavonia, in the south-western part of the Kingdom of Hungary where it reaches down to the Adriatic Sea. It includes not only them but also the Slavic inhabitants of Istria and Dalmatia, in Austria, and those of Bosnia and Herzogovina who are Catholic and use the Roman alphabet. In blood and speech the Croatians and Servians are practically one; but religion and politics divide them. The former are Roman Catholics and use the Roman letters; the latter are Greek Orthodox and use modified Russian letters. In many of the places on the border-line school-children have to learn both alphabets. The English word "cravat" is derived from their name, it being the Croatian neckpiece which the south Austrian troops wore. Croatia-Slavonia itself has a population of nearly 2,500,000 and is about one-third the size of the State of New York. Croatia in the west is mountainous and somewhat poor, while Slavonia in the east is level, fertile, and productive. Many Dalmatian Croats from seaport towns came here from 1850 to 1870. The original emigration from Croatia-Slavonia began in 1873, upon the completion of the new railway connexions to the seaport of Fiume, when some of the more adventurous Croatians came to the United States. From the early eighties the Lipa-Krbava district furnished much of the emigration. The first Croatian settlements were made in Calumet, Michigan, while many of them became lumbermen in Michigan and stave-cutters along the Mississippi. Around Agram (Zágráb, the Croatian capital) the grape disease caused large destruction of vineyards and the consequent emigration of thousands. Later on emigration began from Varasdin and from Slavonia also, and now immigrants arrive from every county in Croatia-Slavonia. In 1899 the figures for Croatia-Slavonia were 2923, and by 1907 the annual immigration had risen to 22,828, the largest number coming from Agram and Varasdin Counties. Since then it has fallen off, and at the present time (1911) it is not quite 20,000. Unfortunately the governmental statistics do not separate the Slovenians from the Croatians in giving the arrivals of Austro-Hungarian immigrants, but the Hungarian figures of departures serve as checks.

The number of Croatians in the United States at present, including the native-born, is about 280,000, divided according to their origin as follows: from Croatia-Slavonia, 160,000; Dalmatia, 80,000; Bosnia, 20,000; Herzegovina, 15,000; and the remainder from various parts of Hungary and Servia. The largest group of them is in Pennsylvania, chiefly in the neighbourhood of Pittsburg, and they number probably from 80,000 to 100,000. Illinois has about 45,000, chiefly in Chicago. Ohio has about 35,000, principally in Cleveland and the vicinity. Other considerable colonies are in New York, San Francisco, St. Louis, Kansas City, and New Orleans. They are also in Montana, Colorado, and Michigan. The Dalmatians are chiefly engaged in business and grape culture; the other Croatians are mostly labourers employed in mining, railroad work, steel mills, stockyards, and stone quarries. Nearly all of these are Catholics, and they now have one Greek Catholic and 16 Roman Catholic churches in the United States. The Greek Catholics are almost wholly from the Diocese of Križevač (Crisium), and are chiefly settled at Chicago and Cleveland. They have some 250 societies devoted to church and patriotic purposes, and in some cases to Socialism, but as yet they have no very large central organization, the National Croatian Union with 29,247 members being the largest. They publish ten newspapers, among them two dailies, of which "Zajednicar" the organ of Narodne Hrvatske Zajednice (National Croatian Union) is the best known.

IV. Poles (*Polak*, a Pole; adjective *polski*, Polish).—The Poles came to the United States quite early in its history. Aside from some few early settlers, the American Revolution attracted such noted men as Kosciuszko and Pulaski, together with many of their fellow-countrymen. The Polish Revolution of 1830 brought numbers of Poles to the United States. In 1851 a Polish colony settled in Texas, and called their settlement Panna Marya (Our Lady Mary). In 1860 they settled at Parisville, Michigan, and Polonia, Wisconsin. Many distinguished Poles served in the Civil War (1861–65) upon both sides. After 1873 the Polish immigration began to grow apace, chiefly from Prussian Poland. Then the tide turned and came from Austria, and later from Russian Poland. In 1890 they began to come in the greatest numbers from Austrian and Russian Poland, until the flow from German Poland has largely diminished. The immigration within the past ten years has been as follows: from Russia, 53 per cent; from Austria about 43 per cent; and only a fraction over 4 per cent from the Prussian or German portion. It is estimated that there are at present about 3,000,000 Poles in the United States, counting the native-born. It may be said that they are almost solidly Catholic; the dissident and disturbing elements among them being but comparatively small, while there is no purely Protestant element at all. They have one Polish bishop, about 750 priests, and some 520 churches and chapels, besides 335 schools. There are large numbers, both men and women, who are members of the various religious communities. The Poles publish some 70 newspapers, amongst them nine dailies, 20 of which are purely Catholic publications. Their religious and national societies are large and flourishing; and altogether the Polish element is active and progressive.

V. Russians (*Rossiyanin;* adjective *rossiiski*, Russian).—The Russian Empire is the largest nation in Europe, and its Slavic inhabitants (exclusive of Poles) are composed of Great Russians or Northern Russians, White Russians or Western Russians, and the Little Russians (Ruthenians) or Southern Russians. The Great Russians dwell in the central and northern parts of the empire around Moscow and St. Petersburg, and are so called in allusion to their stature and great predominance in number, government, and language. The White Russians are so called from the prevailing colour of the clothing of the peasantry, and inhabit the provinces lying on the borders of Poland—Vitebsk, Mohileff, Minsk, Vilna, and Grodno. Their language differs but slightly from Great Russian, inclining towards Polish and Old Slavonic. The Little Russians (so called from their low stature) differ considerably from the Great Russians in language and customs, and they inhabit the Provinces of Kieff, Kharkoff, Tchernigoff, Poltava, Podolia, and Volhynia, and they are also found outside the Empire of Russia in Galicia, Bukovina, and Hungary (see below, VI. Ruthenians). The Great Russians may be regarded as the norm of the Russian people. Their language became the language of the court and of literature, just as High German and Tuscan Italian did, and they form the overwhelming majority of the inhabitants of the Russian Empire. They are practically all Greek Orthodox, the Catholics in Russia being Poles or Germans where they are of the Roman Rite, and Little Russians (Ruthenians) where they are of the Greek Rite.

The Russians have long been settled in America, for Alaska was Russian territory before it was purchased by the United States in 1867. The Russian Greek Orthodox church has been on American soil for over a century. The immigration from Russia is however composed of very few Russians. It is principally made up of Jews (Russian and Polish), Poles, and Lithuanians. Out of an average emigration of from 250,000 to 260,000 annually from the Russian Empire to the United States, 65 per cent have been Jews and only from three to five per cent actual Russians. Nevertheless the Russian peasant and working class are active emigrants, and the exodus from European Russia is relatively large. But it is directed eastward instead of to the west, for Russia is intent upon settling up her vast prairie lands in Siberia. Hindrances are placed in the way of those Russians (except the Jews) who would leave for America or the west of Europe, while inducements and advantages are offered for settlers in Siberia. For the past five years about 500,000 Russians have annually migrated to Siberia, a number equal to one-half the immigrants yearly received by the United States from all sources. They go in great colonies and are aided by the Russian Government by grants of land, loans of money, and low transportation. New towns and cities have sprung up all over Siberia, which are not even on our maps, thus rivalling the American settlement of the Dakotas and the North-West. Many Russian religious colonists, other than the Jews, have come to America; but often they are not wholly of Slavic blood or are Little Russians (Ruthenians). It therefore happens that there are very few Russians in the United States as compared with other nationalities. There are, according to the latest estimates, about 75,000, chiefly in Pennsylvania and the Middle West. There has been a Russian colony in San Francisco for sixty years, and they are numerous in and around New York City.

The Russian Orthodox Church is well established here. About a third of the Russians in the United States are opposed to it, being of the anti-government, semi-revolutionary type of immigrant. But the others are enthusiastic in support of their Church and their national customs, yet their Church includes not only them but the Little Russians of Bukovina and a very large number of Greek Catholics of Galicia and Hungary whom they have induced to leave the Catholic and enter the Orthodox Church. The Russian Church in the United States is endowed by the tsar and the Holy Governing Synod, besides having the support of Russian missionary societies at home, and is upon a flourishing financial basis in the United States. It now (1911) has 83 churches and chapels in the United States, 15 in Alaska, and 18 in Canada, making a total of 126 places of worship, besides a theological seminary at Minneapolis and a monastery at South Canaan, Pennsylvania. Their present clergy is composed of one archbishop, one bishop, 6 proto-priests, 89 secular priests, 2 archimandrites, 2 hegumens, and 18 monastic priests, making a total of 119, while they also exercise jurisdiction over the Servian and Syrian Orthodox clergy besides. Lately they took over a Greek Catholic sisterhood, and now have four Basilian nuns. The United States is now divided up into the following six districts of the Russian Church, intended to be the territory for future dioceses: New York and the New England States; Pennsylvania and the Atlantic states; Pittsburg and the Middle West; Western Pacific States; Canada; and Alaska. Their statistics of church population have not been published lately in their year-books, and much of their growth has been of late years by additions gained from the Greek Catholic Ruthenians of Galicia and Hungary, and is due largely to the active and energetic work and financial support of the Russian church authorities at St. Petersburg and Moscow.

They have the "Russkoye Pravoslavnoye Obshchestvo Vzaimopomoshchi" (Russian Orthodox Mutual Aid Society) for men, founded in 1895, now (1911) having 199 councils and 7072 members, and the women's division of the same, founded in 1907, with 32 councils and 690 members. They publish two church papers, "American Orthodox Messenger", and "Svit"; although there are some nine other Russian papers published by Jews and Socialists.

VI. Ruthenians (*Rusin*; adjective *russky*, Ruthenian).—These are the southern branch of the Russian family, extending from the middle of Austria-Hungary across the southern part of Russia. The use of the adjective *russky* by both the Ruthenians and the Russians permits it to be translated into English by the word "Ruthenian" or "Russian". They are also called Little Russians (*Malorossiani*) in the Empire of Russia, and sometimes *Russniaki* in Hungary. The appellations "Little Russians" and "Ruthenians" have come to have almost a technical meaning, the former indicating subjects of the Russian Empire who are of the Greek Orthodox Church, and the latter those who are in Austria-Hungary and are Catholics of the Greek Rite. Those who are active in the Panslavic movement and are Russophiles are very anxious to have them called "Russians", no matter whence they come. The Ruthenians are of the original Russo-Slavic race, and gave their name to the peoples making up the present Russian Empire. They are spread all over the southern part of Russia, in the provinces of Kieff, Kharkoff, Tchernigoff, Poltava, Podolia, and Volhynia (see above, V. Russians), but by force of governmental pressure and restrictive laws are being slowly made into Great Russians. Only within the past five years has the use of their own form of language and their own newspapers and press been allowed by law in Russia. Nearly every Ruthenian author in the empire has written his chief works in Great Russian, because denied the use of his own language. They are also spread throughout the Provinces of Lublin, in Poland; Galicia and Bukovina, in Austria; and the Counties of Szepes, Saros, Abauj, Zemplin, Ung, Marmos, and Bereg, in Hungary. They have had an opportunity to develop in Austria and also in Hungary. In the latter country they are closely allied with the Slovaks, and many of them speak the Slovak language. They are all of the Greek Rite, and with the exception of those in Russia and Bukovina are Catholics. They use the Russian alphabet for their language, and in Bukovina and a portion of Galicia have a phonetic spelling, thus differing largely from Great Russian, even in words that are common to both.

Their immigration to America commenced in 1880 as labourers in the coal mines of Pennsylvania and Ohio, and has steadily increased ever since. Although they were the poorest class of peasants and labourers, illiterate for the most part and unable to grasp the English language or American customs when they arrived, they have rapidly risen in the scale of prosperity and are now rivalling the other nationalities in progress. Greek Ruthenian churches and institutions are being established upon a substantial basis, and their clergy and schools are steadily advancing. They are scattered all over the United States, and there are now (1911) between 480,000 and 500,000 of them, counting immigrants and native born. Their immigration for the past five years has been as follows: 1907, 24,081; 1908, 12,361; 1909, 15,808; 1910, 27,907; 1911, 17,724; being an average of 20,000 a year. They have chiefly settled in the State of Pennsylvania, over half of them being there; but Ohio, New York, New Jersey, and Illinois have large numbers of them. The Greek Rite in the Slavonic language is firmly established through them in the United States, but they suffer greatly from Russian Orthodox endeavours to lead them from the Catholic Church, as well as from frequent internal dissensions (chiefly of an old-world political nature) among themselves. They have 152 Greek Catholic churches, with a Greek clergy consisting of a Greek Catholic bishop who has his seat at Philadelphia, but without diocesan powers as yet, and 127 priests, of whom 9 are Basilian monks. During 1911 Ruthenian Greek Catholic nuns of the Order of St. Basil were introduced. The Ruthenians have flourishing religious mutual benefit societies, which also assist in the building of Greek churches. The "Soyedineniya Greko-Katolicheskikh Bratstv" (Greek Catholic Union) in its senior division has 509 brotherhoods or councils and 30,255 members, while the junior division has 226 brotherhoods and 15,200 members; the "Russky Narodny Soyus" (Ruthenian National Union) has 301 brotherhoods and 15,200 members; while the "Obshchestvo Russkikh Bratstv" (Society of Russian Brotherhood) has 129 brotherhoods and 7350 members. There are also many Ruthenians who belong to Slovak organizations. The Ruthenians publish some ten papers, of which the "Amerikansky Russky Viestnik", "Svoboda", and "Dushpastyr" are the principal ones.

VII. Servians (*Srbin*; adjective *srpski*, Servian).—This designation applies not only to the inhabitants of the Kingdom of Servia, but includes the people of the following countries forming a geographical although not a political whole: southern Hungary, the Kingdoms of Servia and Montenegro, the Turkish Provinces of Kossovo, Western Macedonia and Novi-Bazar, and the annexed Austrian provinces of Bosnia and Herzegovina. The last two provinces may be said to furnish the shadowy boundary line between the Croatians and the Servians. The two peoples are ethnologically the same, and the Servian and Croatian languages are merely two dialects of the same Slavic tongue. Servians are sometimes called the *Shtokavski*, because the Servian word for "what" is *shto*, while the Croats use the word *cha* for "what", and Croatians are called *Chakavski*. The Croatians are Roman Catholics and use the Roman alphabet (*latinica*), whilst the Servians are Greek Orthodox and use the Cyrillo-Russian alphabet (*cirilica*), with additional signs to express special sounds not found in the Russian. Servians who happen to be Roman Catholics are called *Bunjevaci* (disturbers, dissenters).

Servian immigration to the United States did not commence until about 1892, when several hundred Montenegrins and Servians came with the Dalmatians and settled in California. It began to increase largely in 1903 and was at its highest in 1907. They are largely settled in Pennsylvania, Ohio, and Illinois. There are no governmental statistics showing how many Servians come from Servia and how many from the surrounding provinces. The Servian Government has established a special consular office in New York City to look after Servian immigration. There are now (1911) about 150,000 Servians in the United States. They are located as follows: New England States, 25,000; Middle Atlantic States, 50,000; Middle Western States, 25,000; Western and Pacific States, 25,000; and the remainder throughout the Southern States and Alaska. They have brought with them their Orthodox clergy, and are at present affiliated with the Russian Orthodox Church here although they expect shortly to have their own national bishop. They now (1911) have in the United States 20 churches (of which five are in Pennsylvania) and 14 clergy, of whom 8 are monks and 6 seculars. They publish eight newspapers in Servian, of which "Amerikanski Srbobran" of Pittsburg, "Srbobran" of New York, and "Srpski Glasnik" of San Francisco are the most important. They have a large number of church and patriotic societies, of which the Serb Federation "Sloga" (Concord) with 131 *društva* or councils and over 10,000 members and "Prosvjeta" (Progress), composed of Servians from Bosnia and Herzegovina, are the most prominent.

VIII. Slovaks (*Slovak;* adjective *slovenský*, Slovak).—These occupy the north-western portion of the Kingdom of Hungary upon the southern slopes of the Carpathian mountains, ranging over a territory comprising the Counties of Poszony, Nyitra, Bars, Hont, Zólyom, Trencsén, Turocz, Arva, Liptó, Szepes, Sáros, Zemplin, Ung, Abauj, Gömör, and Nógrad. A well-defined ethnical line is all that divides the Slovaks from the Ruthenians and the Magyars. Their language is almost the same as the Bohemian, for they received their literature and their mode of writing it from the Bohemians, and even now nearly all the Protestant Slovak literature is from Bohemian sources. It must be remembered however that the Bohemians and Moravians dwell on the northern side of the Carpathian mountains in Austria, whilst the Slovaks are on the south of the Carpathians and are wholly in Hungary. Between the Moravians and the Slovaks, dwelling so near to one another, the relationship was especially close. The Slovak and Moravian people were among those who first heard the story of Christ from the Slavonic apostles Sts. Cyril and Methodius, and at one time their tribes must have extended down to the Danube and the southern Slavs. The Magyars (Hungarians) came in from Asia and the East, and like a wedge divided this group of northern Slavs from those on the south.

The Slovaks have had no independent history and have endured successively Polish rule, Magyar conquest, Tatar invasions, German invading colonization, Hussite raids from Bohemia, and the dynastic wars of Hungary. In 1848–49, when revolution and rebellion were in the air, the Hungarians began their war against Austria; the Slovaks in turn rose against the Hungarians for their language and national customs, but on the conclusion of peace they were again incorporated as part of Hungary without any of their rights recognized. Later they were ruthlessly put down when they refused to carry out the Hungarian decrees, particularly as they had rallied to the support of the Austrian throne. In 1861 the Slovaks presented their famous Memorandum to the Imperial Throne of Austria, praying for a bill of rights and for their autonomous nationality. Stephen Moyses, the distinguished Slovak Catholic bishop, besought the emperor to grant national and language rights to them. The whole movement awoke popular enthusiasm, Catholics and Protestants working together for the common good. In 1862 high schools were opened for Slovaks; the famous "Slovenska Matica", to publish Slovak books and works of art and to foster the study of the Slovak history and language, was founded; and in 1870 the Catholics also founded the "Society of St. Voytech", which became a powerful helper. Slovak newspapers sprang into existence and 150 reading clubs and libraries were established. After the defeat of the Austrian arms at Sadowa in 1866, pressure was resumed to split the empire into two parts, Austrian and Hungarian, each of which was practically independent. The Slovaks thenceforth came wholly under Hungarian rule. Then the Law of Nationalities was passed which recognized the predominant position of the Magyars, but gave some small recognition to the other minor nationalities, such as the Slovaks, by allowing them to have churches and schools conducted in their own language.

In 1878 the active Magyarization of Hungary was undertaken. The doctrine was mooted that a native of the Kingdom of Hungary could not be a patriot unless he spoke, thought, and felt as a Magyar. A Slovak of education who remained true to his ancestry (and it must be remembered that the Slovaks were there long before the Hungarians came) was considered deficient in patriotism. The most advanced political view was that a compromise with the Slovaks was impossible; that there was but one expedient, to wipe them out as far as possible by assimilation with the Magyars. Slovak schools and institutions were ordered to be closed, the charter of the "Matica" was annulled, and its library and rich historical and artistic collections, as well as its funds, were confiscated. Inequalities of every kind before the law were devised for the undoing of the Slovaks and turning them into Hungarians; so much so that one of their authors likened them to the Irish in their troubles. The Hungarian authorities in their endeavour to suppress the Slovak nationality went even to the extent of taking away Slovak children to be brought up as Magyars, and forbade them to use their language in school and church. The 2,000,000 Catholic Slovaks clung to their language and Slavic customs, but the clergy were educated in their seminaries through the medium of the Magyar tongue and required in their parishes to conform to the state idea. Among the 750,000 Protestant Slovaks the Government went even further by taking control of their synods and bishops. Even Slovak family names were changed to Hungarian ones, and preferment was only through Hungarian channels. Naturally, religion decayed under the stress and strain of repressed nationality. Slovak priests did not perform their duties with ardour or diligence, but confined themselves to the mere routine of canonical obligation. There are no monks or religious orders among the Slovaks and no provision is made for any kind of community life. Catechetical instruction is at a minimum and is required to be given whenever possible through the medium of the Hungarian language. There is no lack of priests in the Slovak country, yet the practice of solemnizing the reception of the first communion by the children is unknown and many other forms of Catholic devotion are omitted. Even the Holy Rosary Society was dissolved, because its devotions and proceedings were conducted in Slovak. The result of governmental restriction of any national expression has been a complete lack of initiative on the part of the Slovak priesthood, and it is needless to speak of the result upon their flocks. In the eastern part of the Slovak territory where there were Slovak-speaking Greek Catholics, they fared slightly better in regard to the attempts to make them Hungarians. There the liturgy was Slavonic and the clergy who used the Magyar tongue still were in close touch with their people through the offices of the Church. All this pressure on the part of the authorities tended to produce an active Slovak emigration to America, while bad harvests and taxation also contributed.

A few immigrants came to America in 1864 and their success brought others. In the late seventies the Slovak exodus was well marked, and by 1882 it was sufficiently important to be investigated by the Hungarian Minister of the Interior and directions given to repress it. The American immigration figures indicate the first important Slovak influx in 1873 when 1300 immigrants came from Hungary, which rose to 4000 in 1880 and to nearly 15,000 in 1884, most of them settling in the mining and industrial regions of Pennsylvania. At first they came from the Counties of Zemplin, Saros, Szepes, and Ung, where there were also many Ruthenians. They were called "Huns" or "Hunkies", and were used at first to fill the places left vacant by strikers. They were very poor and willing to work for little when they arrived, and were accordingly hated by the members of the various unions. The Slovak girls, like the Irish, mostly went into service, and because they had almost no expense for living managed to earn more than the men. To-day the Slovaks of America are beginning to possess a national culture and organization, which presents a striking contrast to the cramped development of their kinsmen in Hungary. Their immigration of late years has ranged annually from 52,368 in 1905 to 33,416 in 1910. Altogether it is estimated that there are now some 560,000 Slovaks in the United States, including the native born. They are spread throughout the country, chiefly in the following states: Pennsylvania, 270,000; Ohio, 75,000; Illinois, 50,000; New Jersey, 50,000; New York, 35,000; Connecticut, 20,000; Indiana, 15,000; Missouri, 10,000; whilst they range from 5000 to a few hundreds in the other states. About 450,000 of them are Roman Catholics, 10,000 Greek Catholics and 95,000 Protestants.

The first Slovak Catholic church in the United States was founded by Rev. Joseph Kossalko at Streator, Illinois, and was dedicated 8 Dec., 1883. Following this he also built St. Joseph's Church at Hazleton, Pennsylvania, in 1884. In 1889 Rev. Stephen Furdek founded the Church of St. Ladislas at Cleveland, Ohio, together with a fine parochial school, both of which were dedicated by Bishop Gilmour. The American bishops were anxious to get Slovak priests for the increasing immigration, and Bishop Gilmour sent Father Furdek to Hungary for that purpose. The Hungarian bishops were unwilling to send Slovak priests at first, but as immigration increased they acceded to the request. At present (1911) the Catholic Slovaks have a clergy consisting of one bishop (Rt. Rev. J. M. Koudelka) and 104 priests, and have 134 churches situated as follows: in Pennsylvania, 81 (Dioceses of Altoona, 10; Erie, 4; Harrisburg, 3; Philadelphia, 15; Pittsburg, 35; and Scranton, 14); in Ohio, 14 (in the Diocese of Cleveland, 12, and Columbus, 2); in Illinois, 10 (in the Archdiocese of Chicago, 7; and Peoria, 3); in New Jersey, 11 (in the Diocese of Newark, 7; and Trenton, 4); in New York, 6; and in the States of Connecticut, 3; Indiana, 2; Wisconsin, 2; and Minnesota, Michigan, Missouri, Alabama, and West Virginia, one each. Some of the Slovak church buildings are very fine specimens of church architecture. There are also 36 Slovak parochial schools, that of Our Lady Mary in Cleveland having 750 pupils. They have also introduced an American order of Slovak nuns, the Sisters of Saints Cyril and Methodius, who are established under the direction of Bishop Hoban in the Diocese of Scranton, where they have four schools.

The Protestant Slovaks followed the example of the Catholics and established their first church at Streator, Illinois, in 1885, and later founded a church at Minneapolis in 1888, and from 1890 to 1894 three churches in Pennsylvania. They now have in the United States 60 Slovak churches and congregations (of which 28 are in Pennsylvania), with 34 ministers (not including some 5 Presbyterian clergymen), who are organized under the name of "The Slovak Evangelical Lutheran Synod of America". The Slovaks have a large number of organizations. The principal Catholic ones are: Prva Katolícka Slovenská Jednota (First Slovak Catholic Union), for men, 33,000 members; Pennsylvánska Slovenská Rimsko a Grécko Katolícka Jednota (Pennsylvania Slovak Roman and Greek Catholic Union), 7500 members; Prva Katolícka Slovenská Ženská Jednota (First Catholic Slovak Women's Union), 12,000 members; Pennsylvánska Slovenská Ženská Jednota (Pennsylvania Slovak Women's Union), 3500 members; Živena (Women's League), 6000 members. There are also: Národný Slovenský Spolok (National Slovak Society), which takes in all Slovaks except Jews, 28,000 members; Evanjelícka Slovenská Jednota (Evangelical Lutheran Slovak Union), 8000 members; Kalvinská Slovenská Jednota (Presbyterian Slovak Union), 1000 members; Neodvislý Národny Slovenský Spolok (Independent National Slovak Society), 2000 members. They also have a large and enterprising Press, publishing some fourteen papers. The chief ones are: "Slovenský Denník" (Slovak Journal), a daily, of Pittsburg; "Slovak v Amerike" (Slovak in America), of New York; "Narodne Noviny" (National News), a weekly, of Pittsburg, Pennsylvania, with 38,000 circulation; "Jednota" (The Union), also a weekly, of Middletown, Pennsylvania, with 35,000 circulation; and "Bratstvo" (Brotherhood) of Wilkes-Barre, Pennsylvania. There are also Protestant and Socialistic Slovak journals, whose circulation is small. Among the distinguished Slovaks in the United States may be mentioned Rev. Joseph Murgas of Wilkes-Barre, who, in addition to his work among his people, has perfected several inventions in wireless telegraphy and is favourably known in other scientific matters.

IX. SLOVENES (*Slovenec;* adjective *slovenski*, Slovenian).—These come chiefly from south-western Austria, from the Provinces of Carniola (*Kranjsko;* Ger., *Krain*), Carinthia (*Koroško;* Ger., *Kärnten*), and Styria (*Štajersko;* Ger., *Steiermark*); as well as from Resia (*Resja*) and Udine (*Videm*) in north-eastern Italy, and the Coast Lands (*Primorsko*) of Austria-Hungary. Their neighbours on the south-west are Italians; on the west and north, Germans; on the east, Germans and Magyars; and towards the south, Italians and their Slavic neighbours the Croatians. Most of them are bilingual, speaking not only the Slovenian but also the German language. For this reason they are not so readily distinguishable in America as the other Slavs, and have less trouble in assimilating themselves. At home the main centres of their language and literature have been Laibach (Ljubljana), Klagenfurt (Celovec), Graz (Gradec), and Görz (Gorica), the latter city being also largely Italian. In America they are sometimes known as Austrians, but are more often known as "Krainer", that being the German adjective of *Krain* (Carniola), from whence the larger number of them come to the United States; sometimes the word has even been mispronounced and set down as "Griner". The Slovenes became known somewhat early in the history of the United States. Father Frederic Baraga was among the first of them to come here in 1830, and began his missionary work as a priest among the Indians of Michigan, Wisconsin, and Minnesota, and finally became the first Bishop of Marquette, Michigan. He studied the Indian languages and wrote their grammars and history in his various English, German, and Slovenian works. He also published several catechisms and religious works in Slovenian, and brought over several other Slovenian priests.

In Calumet, Michigan, the Slovenes settled as early as 1856; they first appeared in Chicago and in Iowa about 1863, and in 1866 they founded their chief farming colony in Brockway, Minnesota. Here they still preserve their own language and all their minute local peculiarities. They came to Omaha in 1868, and in 1873 their present large colony in Joliet, Illinois, was founded. Their earliest settlement in New York was towards the end of 1878, and gradually their numbers have increased until they have churches in Haverstraw and Rockland Lake, where their language is used. They have also established farm settlements in Iowa, South Dakota, Idaho, Washington, and in additional places in Minnesota. Their very active immigration began in 1892, and has been (1900–1910) at the rate of from 6000 to 9000 annually, but has lately fallen off. The official government statistics class them along with the Croatians. There are now (1911) in the United States a little over 120,000 Slovenes; practically all of them are Catholics, and with no great differences or factions among them. There is a leaning towards Socialism in the large mining and manufacturing centres. In Pennsylvania there are about 30,000; in Ohio, 15,000; in Illinois, 12,000; in Michigan, 8000; in Minnesota, 12,000; in Colorado, 10,000; in Washington, 10,000; in Montana, 5000; in California, 5000; and in fact there are Slovenes reported in almost every state and territory except Georgia. Their immigration was caused by the poverty of the people at home, especially as Carniola is a rocky and mountainous district without much fertility, and neglected even from the times of the Turkish wars. Latterly the institution of Raffeisen banks, debt-paying and mutual aid associations, introduced among the people by the Catholic party (Slovenska Ljudska Stranka), has diminished immigration and enabled them to live more comfortably at home.

The Slovenes are noted for their adaptability, and have given many prominent missionary leaders to the Church in the United States. Among them are Bishops Baraga, Mrak, and Vertin (of Marquette), Stariha (of Lead), and Trobec (of St. Cloud); Monsignori Stibil, Buh, and Plut; Abbot Bernard Locnika, O.S.B.; and many others. There are some 92 Slovenian priests in the United States, and twenty-five Slovenian churches. Many of their churches are quite fine, especially St. Joseph's, Joliet, Illinois; St. Joseph's, Calumet, Michigan; and Sts. Cyril and Methodius, Sheboygan, Wisconsin. There are also mixed parishes where the Slovenes are united with other nationalities, usually with Bohemians, Slovaks, or Germans. There are no exclusively Slovenian religious communities. At St. John's, Minnesota, there are six Slovenian Benedictines, and at Rockland Lake, New York, three Slovenian Franciscans, who are undertaking to establish a Slovenian and Croatian community. From them much of the information herein has been obtained. The Franciscan nuns at Joliet, Illinois, have many Slovenian sisters; at Kansas City, Kansas, there are several Slovenian sisters engaged in school work; and there are some Slovenians among the Notre Dame Sisters of Cleveland, Ohio. Archbishop Ireland of St. Paul, Minnesota, sent to Austria for Slovenian seminarians to finish their education here, and also appointed three Slovenian priests as professors in his diocesan seminary, thus providing a Slovenian-American clergy for their parishes in his province.

There are several church and benevolent organizations among the Slovenians in America. The principal ones are: Kranjsko Slovenska Katoliška Jednota (Krainer Slovenian Catholic Union), organized in April, 1894, now having 100 councils and a membership of 12,000; Jugoslovenska Katoliška Jednota (South Slovenian Catholic Union), organized in Jan., 1901, having 90 councils and 8000 members; besides these there are also Slovenska Zapadna Zveza (Slovenian Western Union), with 30 councils and about 3000 members, Društva Sv. Barbara (St. Barbara Society), with 80 councils, chiefly among miners, and the semi-socialistic Delvaska Podporna Zveza (Workingmen's Benevolent Union), with 25 councils and a considerable membership. There are also Sv. Rafaelova Družba (St. Raphael's Society), to assist Slovenian immigrants founded by Father Kasimir, O.F.M., and the Society of Sts. Cyril and Methodius to assist Slovenian schools, as well as numerous singing and gymnastic organizations. The Slovenians publish ten newspapers in the United States. The oldest is the Catholic weekly "Amerikanski Slovenec" (American Slovene), established in 1891 at Joliet, and it is the organ of the Krainer Slovenian Catholic Union. "Glas Naroda" (Voice of the People), established in 1892 in New York City, is a daily paper somewhat Liberal in its views, but it is the official organ of the South Slavonic Catholic Union and the St. Barbara Society. "Ave Maria" is a religious monthly published by the Franciscans of Rockland Lake, New York. "Glasnik" (The Herald) is a weekly of Calumet, Michigan; as are also "Edinost" (Unity), of Pittsburg, Pennsylvania; "Clevelandska Amerika", of Cleveland, Ohio; "Narodni Vestnik" (People's Messenger), of Duluth, Minnesota; and "Slovenski Narod" (Slovenian People), of Pueblo, Colorado. There are also two purely Socialistic weeklies in Chicago: "Proletarec" (Proletarian) and "Glas Svobode" (Voice of Freedom). A very fine work, "Amerika in Amerikanci" (America and the Americans), descriptive of all the United States and Slovenian life and development here, has been published by Father J. M. Trunk at Klagenfurt, Austria.

Andrew J. Shipman.

Slomšek, Anton Martin, Bishop of Lavant, in Maribor, Styria, Austria, noted Slovenian educator, b. 1800; d. 24 Sept., 1862. The dawn of the nineteenth century found the Slovenian schools in a precarious condition; their number was pitifully small, and the courses they offered were inadequate and unsatisfactory. This deplorable state was due to the fact that the Austrian officials endeavoured to suppress the national language, and, to compass this end, introduced foreign teachers thoroughly distasteful to the people, whom in turn they despised. Moreover, books, magazines, papers, and other educational influences were lacking, not because they would not have been gladly welcomed, but because they were forbidden by the Government in its fear of Panslavism. This situation Bishop Slomšek was compelled to face. A man of initiative and discernment, the changes he wrought in a short time were wonderful. In the Constitution of 1848, granting national rights long denied, he found his instrument. Following this measure, though only after many futile attempts, he received official sanction to undertake the reform of the schools. The first fruits of his labours were a series of excellent text-books, many from his own pen, which proved powerful factors in the growth and development of religious as well as national education. The founding of the weekly, "Drobtinice" (Crumbs), was his next step. Essays and books on a great variety of subjects, embracing practically every question on which his countrymen stood in need of enlightenment, were published in quick succession, and his vigorous and incisive style, well adapted to the intelligence of his readers, though not lacking scholarly refinement, made his works exceedingly popular. His pastorals and sermons constitute a literature of lasting value. In 1841 he sought to realize a dream of years—the establishment of a society for the spread of Catholic literature. Unfortunately, the movement was branded as Panslavistic, and failed at the time; but ten years later this organization was effected, and *Druzba sv. Mohora* began sending a few instructive books to Catholic homes. To-day, a million educational volumes have been distributed among a million and a half of people.

Although Slomšek was ardent and active in the interests of his own race, yet he was admired and loved by great men of other nations, and his kindness and tact eliminated all bitterness from the controversies in which he was forced to engage. Patriotism, the education of his people. their temporal and spiritual welfare, were his inspiring motives, as the non-Catholic Makusev remarks: "Education, based on religion and nationality, was his lofty aim". Humility and childlike simplicity marked his life. His priests, sincerely devoted to him, frequently heard him repeat the words: "When I was born, my mother laid me on a bed of straw, and I desire no better pallet when I die, asking only to be in the state of grace and worthy of salvation".

Grafenaner, *Hist. of Slovenian Literature* (1862).

P. Cyril Zupan.

Slotanus (Schlottanus, van der Slooten), John (John Geffen), polemical writer; b. at Geffen, Brabant; d. at Cologne, 9 July, 1560. He joined the Dominican order at Cologne about 1525. For many years he ably defended the Faith against the heretics by preaching and writing. Later he taught sacred letters at Cologne, and in 1554 was made a doctor of theology. About this same time he became prior of his convent at Cologne, and as such exercised the offices of censor of the faith and papal inquisitor throughout the Archdiocese of Cologne and the Rhine country. In the discharge of these responsible duties Slotanus came into conflict with the learned Justus Velsius, who in 1556, on account of heretical teachings, was obliged to leave Cologne. The vehement writings which Velsius afterwards published against the Cologne theologians moved Slotanus to write two works in which nearly all the heretical doctrines of his time are discussed with admirable skill.

Among his various works those most worthy of mention are: "Disputationum adversus hæreticos liber unus" (Cologne, 1558); "De retinenda fide orthodoxa et catholica adversus hæreses et sectas" (Cologne, 1560); "De barbaris nationibus convertendis ad Christum" (Cologne, 1559). In the last-named work Slotanus witnesses to the ardent missionary zeal which fired the religious men of his time.

Chas. J. Callan.

Sloth, one of the seven capital sins. In general it means disinclination to labour or exertion. As a capital or deadly vice St. Thomas (II–II, Q. xxxv) calls it sadness in the face of some spiritual good which one has to achieve (*tristitia de bono spirituali*). Father Rickaby aptly translates its Latin equivalent *acedia* (Gr. ἀκηδία) by saying that it means the don't-care feeling. A man apprehends the practice of virtue to be beset with difficulties and chafes under the restraints imposed by the service of God. The narrow way stretches wearily before him and his soul grows sluggish and torpid at the thought of the painful life journey. The idea of right living inspires not joy but disgust, because of its laboriousness. This is the notion commonly obtaining, and in this sense sloth is not a specific vice according to the teaching of St. Thomas, but rather a circumstance of all vices. Ordinarily it will not have the malice of mortal sin unless, of course, we conceive it to be so utter that because of it one is willing to bid defiance to some serious obligation. St. Thomas completes his definition of sloth by saying that it is torpor in the presence of spiritual good which is Divine good. In other words, a man is then formally distressed at the prospect of what he must do for God to bring about or keep intact his friendship with God. In this sense sloth is directly opposed to charity. It is then a mortal sin unless the act be lacking in entire advertence or full consent of the will. The trouble attached to maintenance of the inhabiting of God by charity arouses tedium in such a person. He violates, therefore, expressly the first and the greatest of the commandments: "Thou shalt love the Lord thy God with thy whole heart, and with thy whole soul, and with thy whole mind, and with thy whole strength." (Mark, xii, 30).

Slythurst, Thomas, English confessor, b. in Berkshire; d. in the Tower of London, 1560. He was B.A. Oxon, 1530; M.A., 1534; B.D., 1543; and supplicated for the degree of D.D., 1554–5, but never took it. He was rector of Chalfont St. Peter, Bucks, from 1545 to 1555, canon of Windsor, 1554, rector of Chalfont St. Giles, Bucks, 1555, and first President of Trinity College, Oxford. He was deprived of these three preferments in 1559. On 11 Nov., 1556, he was appointed with others by Convocation to regulate the exercises in theology on the election of Cardinal Pole to the chancellorship.

John B. Wainewright.

Smalkaldic League, a politico-religious alliance formally concluded on 27 Feb., 1531, at Smalkalden in Hesse-Nassau, among German Protestant princes and cities for their mutual defence. The compact was entered into for six years, and stipulated that any military attack made upon any one of the confederates on account of religion or under any other pretext was to be considered as directed against them all and resisted in common. The parties to it were: the Landgrave Philip of Hesse; the Elector John of Saxony and his son John Frederick; the dukes Philip of Brunswick-Grubenhagen and Otto, Ernest, and Francis of Brunswick-Lüneburg; Prince Wolfgang of Anhalt; the counts Gebhard and Albrecht of Mansfeld and the towns of Strasburg, Ulm, Constance, Reutlingen, Memmingen, Lindau, Biberach, Isny, Magdeburg, and Bremen. The city of Lübeck joined the league on 3 May, and Bavaria on 24 Oct., 1531. The accession of foreign powers, notably England and France, was solicited, and the alliance of the latter nation secured in 1532. The princes of Saxony and Hesse were appointed military commanders of the confederation, and its military strength fixed at 10,000 infantry and 2000 cavalry. At a meeting held at Smalkalden in Dec., 1535, the alliance was renewed for ten years, and the maintenance of the former military strength decreed, with the stipulation that it should be doubled in case of emergency. In April, 1536, Dukes Ulrich of Würtemberg and Barnim and Philip of Pomerania, the cities of Frankfort, Augsburg, Hamburg, and Hanover joined the league with several other new confederates. An alliance was concluded with Denmark in 1538, while the usual accession of the German Estates which accepted the Reformation continued to strengthen the organization. Confident of its support, the Protestant princes introduced the new religion in numerous districts, suppressed bishoprics, confiscated church property, resisted imperial ordinances to the extent of refusing help against the Turks, and disregarded the decisions of the Imperial Court of Justice.

In self-defence against the treasonable machinations of the confederation, a Catholic League was formed in 1538 at Nuremberg under the leadership of the emperor. Both sides now actively prepared for an armed conflict, which seemed imminent. But negotiations carried on at the Diet of Frankfort in 1539 resulted, partly owing to the illness of the Landgrave of Hesse, in the patching up of a temporary peace. The emperor during this respite renewed his earnest but fruitless efforts to effect a religious settlement, while the Smalkaldic confederates continued their violent proceedings against the Catholics, particularly in the territory of Brunswick-Wolfenbüttel, where Duke Henry was unjustly expelled, and the new religion introduced (1542). It became more and more evident as time went on that a conflict was unavoidable. When, in 1546, the emperor adopted stern measures against some of the confederates, the War of Smalkalden ensued. Although it was mainly a religious conflict between Catholics and Protestants, the denominational lines were not sharply drawn. With Pope Paul III, who promised financial and military assistance, several Protestant princes, the principal among whom was Duke Maurice of Saxony, defended the imperial and Catholic cause. The beginning of hostilities was marked nevertheless by the success of the Smalkaldic allies; but division and irresoluteness soon weakened them and caused their ruin in Southern Germany, where princes and cities submitted in rapid succession. The battle of Mühlberg (24 April, 1547) decided the issue in favour of the emperor in the north. The Elector John Frederick of Saxony was captured, and shortly after the Landgrave Philip of Hesse was also forced to submit. The conditions of peace included the transfer of the electoral dignity from the former to his cousin Maurice, the reinstatement of Duke Henry of Wolfenbüttel in his dominions, the restoration of Bishop Julius von Pflug to his See of Naumburg-Zeitz, and a promise demanded of the vanquished to recognize and attend the Council of Trent. The dissolution of the Smalkaldic League followed; the imperial success was complete, but temporary. A few years later another conflict broke out and ended with the triumph of Protestantism.

Smaragdus, Ardo, hagiographer, d. at the Benedictine monastery of Aniane, Herault, in Southern France, March, 843. He entered this monastery when still a boy and was brought up under the direction of Abbot St. Benedict of Aniane. On account of his piety and talents he was ordained and put at the head of the school at his monastery. In 794 he accompanied his abbot to the Council of Frankfort and in 814 was made abbot in place of Benedict, who on the invitation of Louis-le-Debonnaire had taken up his abode at the imperial Court at Aix-la-Chapelle. Smaragdus was honoured as a saint in his monastery. He is the author of a life of St. Benedict of Aniane which he wrote at the request of the monks of Cornelimünster near Aix-la-Chapelle, where Abbot Benedict had died. It was written in 822,and is one of the most reliable hagiological productions of that period. Mabillon edited it in his "Acta SS. of the Benedictine Order" (sæculum IV, I, 192–217), whence it was reprinted in P. L., CIII, 353–84. It was also edited by Waitz in "Mon. Germ. Script.", XV, I, 200–29.

Michael Ott.

Smith, George. See Argyll and the Isles, Diocese of.

Smith, James, journalist, b. at Skolland, in the Shetland Isles, about 1790; d. Jan., 1866. He spent his boyhood at Skolland, a small place belonging to his mother, who was a member of a branch of the Bruce family which had settled in Shetland in the sixteenth century. He studied law in Edinburgh, became a solicitor to the Supreme Court there, and married a Catholic lady (a cousin of Bishop Macdonell of the Glengarry clan), the result being his own conversion to Catholicism. Naturally hampered in his career, at that period, by his profession of Catholicism, he turned his attention to literature, and became the pioneer of Catholic journalism in Scotland. In 1832 he originated and edited the "Edinburgh Catholic Magazine", which appeared somewhat intermittently in Scotland until April, 1838, at which date Mr. Smith went to reside in London, and the word "Edinburgh" was dropped from the title of the magazine, the publication of which was continued for some years in London. Mr. Smith, on settling in London, inaugurated the "Catholic Directory" for England, in succession to the old "Laity's Directory", and edited it for many years; and he was also for a short time editor of the "Dublin Review", in 1837. Possessed of considerable gifts both as a speaker and as a writer, he was always ready to put them at the service of the Catholic cause; and during the years of agitation immediately preceding Catholic Emancipation, as well as at a later period, he was one of the most active champions of the Church in England and Scotland. He made a brilliant defence in public of Catholic doctrine when it was violently attacked by certain prominent members of the Established Church of Scotland, and published in this connexion, in 1831, his "Dialogues on the Catholic and Protestant Rules of Faith", between a member of the Protestant Reformation Society and a Catholic layman. He also edited (1838) Challoner's abridgment of Gother's "Papist Misrepresented and Represented", with copious notes. Mr. Smith was father of the Most Rev. William Smith, second Archbishop of St. Andrews and Edinburgh in the restored hierarchy of Scotland, and a distinguished Biblical scholar.

D. O. Hunter-Blair.

Smith, James A. See Saint Andrews and Edinburgh, Archdiocese of.

Smith, Richard, Bishop of Chalcedon, second Vicar Apostolic of England; b. at Hanworth, Lincolnshire, Nov., 1568 (not 1566 as commonly stated); d. at Paris, 18 March, 1655. He was educated at Trinity College, Oxford, where he became a Catholic. He was admitted to the English College, Rome, in 1586, studied under Bellarmine, and was ordained priest 7 May, 1592. In Feb., 1593, he arrived at Valladolid, where he took the degree of Doctor of Theology, and taught philosophy at the English College till 1598, when he went to Seville as professor of controversies. In 1603 he went on the English mission, where he made his mark as a missioner. Chosen to represent the case of the secular clergy in the archpriest controversy, he went to Rome, where he opposed Persons, who said of him: "I never dealt with any man in my life more heady and resolute in his opinions". In 1613 he became superior of the small body of English secular priests at Arras College, Paris, who devoted themselves to controversial work. In 1625 he was elected to succeed Dr. Bishop as vicar Apostolic, but the date usually assigned for his consecration as Bishop of Chalcedon (12 Jan., 1625) must be wrong, as he was not elected till 2 Jan. He arrived in England in April, of the same year, residing in Lord Montagu's house at Turvey, Bedfordshire. As vicar Apostolic he came into conflict with the regulars, claiming the rights of an ordinary, but Urban VIII decided (16 Dec., 1627) that he was not an ordinary. In 1628 the Government issued a proclamation for his arrest, and in 1631 he withdrew to Paris, where he lived with Richelieu till the cardinal's death in 1642; then he retired to the convent of the English Augustinian nuns, where he died.

He wrote: "An answer to T. Bel's late Challenge" (1605); "The Prudentiall Ballance of Religion", (1609); "Vita Dominæ Magdalenæ Montis-Acuti" i. e., Viscountess Montagu (1609); "De auctore et essentia Protestanticæ Religionis" (1619), English translation, 1621; "Collatio doctrinæ Catholicorum et Protestantium" (1622), tr. (1631); "Of the distinction of fundamental and not fundamental points of faith" (1645); "Monita quædam utilia pro Sacerdotibus, Seminaristis, Missionariis Angliæ" (1647); "A Treatise of the best kinde of Confessors" (1651); "Of the all-sufficient Eternal Proposer of Matters of Faith" (1653); "Florum Historiæ Ecclesiasticæ gentis Anglorum libri septem" (1654). Many unpublished documents relating to his troubled episcopate (an impartial history of which yet remains to be written) are preserved in the Westminster Diocesan Archives.

Dodd, *Church History*, III (Brussels *vere* Wolverhampton, 1737–1742) the account from which most subsequent biographies were derived. Edwin Burton

Smith, Richard, b. in Worcestershire, 1500; d. at Douai, 9 July, 1563. He was educated at Merton College, Oxford; and, having taken his M.A. degree in 1530, he became registrar of the university in 1532. In 1536 Henry VIII appointed him first Regius Professor of divinity, and he took his doctorate in that subject on 10 July in the same year. He subsequently became master of Whittington College, London; rector of St. Dunstan's-in-the-East; rector of Cuxham, Oxfordshire; principal of St. Alban's Hall; and divinity reader at Magdalen College. Under Edward VI he is said by his opponents to have abjured the pope's authority at St. Paul's Cross (15 May, 1547) and at Oxford, but the accounts of the proceedings are obscure and unreliable. If he yielded at all, he soon recovered and accordingly suffered the loss of his professorship, being succeeded by Peter Martyr, with whom he held a public disputation in 1549. Shortly afterwards he was arrested, but was soon liberated. Going to Louvain, he became professor of divinity there. During Mary's Catholic restoration he regained most of his preferments, and was made royal chaplain and canon of Christ Church. He took a prominent part in the proceedings against Cranmer, Ridley, and Latimer. He again lost all his benefices at the change of religion under Elizabeth, and after a short imprisonment in Parker's house he escaped to Douai, where he was appointed by Philip II dean of St. Peter's church. There is no foundation for the slanderous story spread by the Reformers to account for his deprivation of his Oxford professorship. When Douai University was founded on 5 Oct., 1562, he was installed as chancellor and professor of theology, but only lived a few months to fill these offices. He wrote many works, the chief of which are: "Assertion and Defence of the Sacrament of the Altar" (1546); "Defence of the Sacrifice of the Mass" (1547); "Defensio cœlibatus sacerdotum" (1550); "Diatriba de hominis justificatione" (1550); "Buckler of the Catholic Faith" (1555–56); "De Missæ Sacrificio" (1562); and several refutations of Calvin, Melanchthon, Jewell, and Beza, all published in 1562.

EDWIN BURTON.

Smith, THOMAS KILBY, b. at Boston, Mass., 23 Sept., 1820; d. at New York, 14 Dec., 1887; eldest son of Captain George Smith and Eliza Bicker Walter. Both his paternal and maternal forefathers were active and prominent in the professional life and in the government of New England. His parents moved to Cincinnati in his early childhood, where he was educated in a military school under O. M. Mitchel, the astronomer, and studied law in the office of Chief Justice Salmon P. Chase. In 1853 he was appointed special agent in the Post Office Department at Washington, and later marshal for the Southern District of Ohio and deputy clerk of Hamilton County. He entered the Union Army, 9 September, 1861, as lieutenant-colonel, and was conspicuous in the Battle of Shiloh, 6 and 7 April, 1862, assuming command of Stuart's Brigade, Sherman's Division, during the second day. As commander of brigade in the 15th and 17th Army Corps, he participated in all the campaigns of the Army of the Tennessee, being also for some months on staff duty with General Grant.

Commissioned Brigadier-General of Volunteers, 11 August, 1863, he was assigned on 7 March, 1864, to the command of the detached division of the 17th Army Corps and rendered distinguished service during the Red River Expedition, protecting Admiral Porter's fleet after the disaster of the main army. After the fall of Mobile, he assumed the command of the Department of Southern Alabama and Florida, and then of the Post and District of Maine. He was brevetted Major-General for gallant and meritorious service. In 1866 President Johnson appointed him United States Consul at Panama. After the war he removed to Torresdale, Philadelphia. At the time of his death he was engaged in journalism in New York. On 2 May, 1848, he married Elizabeth Budd, daughter of Dr. William Budd McCullough and Arabella Sanders Piatt, of Cincinnati, Ohio. She was a gifted and devout woman, and through her influence and that of the venerable Archbishop Purcell he became a Catholic some years before his death. He was remarkable for his facility of expression, distinguished personal appearance, and courtly bearing. He left five sons and three daughters.

SMITH, *Life and Letters of Thomas Kilby Smith* (New York, 1898).

WALTER GEORGE SMITH.

Smyrna, LATIN ARCHDIOCESE OF (SMYRNENSIS), in Asia Minor. The city of Smyrna rises like an amphitheatre on the gulf which bears its name. It is the capital of the vilayet of Aïdin and the starting-point of several railways; it has a population of at least 300,000, of whom 150,000 are Greeks. There are also numerous Jews and Armenians and almost 10,000 European Catholics. It was founded more than 1000 years B. C. by colonists from Lesbos who had expelled the Leleges, at a place now called Bournabat, about an hour's distance from the present Smyrna. Shortly before 688 B. C. it was captured by the Ionians, under whose rule it became a very rich and powerful city (Herodotus, I, 150). About 580 B. C. it was destroyed by Alyattes, King of Lydia. Nearly 300 years afterwards Antigonus (323–301 B. C.), and then Lysimachus, undertook to rebuild it on its present site. Subsequently comprised in the Kingdom of Pergamus, it was ceded in 133 B. C. to the Romans. These built there a judiciary *conventus* and a mint. Smyrna had a celebrated school of rhetoric, was one of the cities which had the title of metropolis, and in which the *concilium festivum* of Asia was celebrated. Demolished by an earthquake in A. D. 178 and 180, it was rebuilt by Marcus Aurelius. In 673 it was captured by a fleet of Arab Mussulmans. Under the inspiration of Clement VI the Latins captured it from the Mussulmans in 1344 and held it until 1402, when Tamerlane destroyed it after slaying the inhabitants. In 1424 the Turks captured it and, save for a brief occupation by the Venetians in 1472, it has since belonged to them.

Christianity was preached to the inhabitants at an early date. As early as the year 93, there existed a Christian community directed by a bishop for whom St. John in the Apocalypse (i, 11; ii, 8–11) has only words of praise. There are extant two letters written early in the second century from Troas by St. Ignatius of Antioch to those of Smyrna and to Polycarp, their bishop. Through these letters and those of the Christians of Smyrna to the city of Philomelium, we know of two ladies of high rank who belonged to the Church of Smyrna. There were other Christians in the vicinity of the city and dependent on it to whom St. Polycarp wrote letters (Eusebius, "Hist. eccl.", V, xxiv). When Polycarp was martyred (23 Feb.), the Church of Smyrna sent an encyclical concerning his death to the Church of Philomelium and others. The "Vita Polycarpi" attributed to St. Pionius, a priest of Smyrna martyred in 250, contains a list of the first bishops: Stratæs; Bucolus; Polycarp; Papirius; Camerius; Eudæmon (250), who apostatized during the persecution of Decius; Thraseas of Eumenia, martyr, who was buried at Smyrna. Noctos, a Modalist heretic of the second century, was a native of the city as were also Sts. Pothinus and Irenæus of Lyons. Mention should also be made of another martyr, St. Dioscorides, venerated on 21 May. Among the Greek bishops, a list of whom appears in Le Quien, (Oriens Christ., I, 737–46), was Metrophanes, the great opponent of Photius, who laboured in the revision of the "Octoekos", a Greek liturgical book.

The Latin See of Smyrna was created by Clement VI in 1346 and had an uninterrupted succession of titulars until the seventeenth century. This was the beginning of the Vicariate Apostolic of Asia Minor, or of Smyrna, of vast extent. In 1818 Pius VII established the Archdiocese of Smyrna, at the same time retaining the vicariate Apostolic, the jurisdiction of which was wider. Its limits were those of the vicariates Apostolic of Mesopotamia, Syria, and Constantinople. The archdiocese had 17,000 Latin Catholics, some Greek Melchites, called Alepi, and Armenians under special organization. There are: 19 secular priests; 55 regulars; 8 parishes, of which 4 are in Smyrna; 14 churches with resident priests and 12 without priests; 25 primary schools with 2500 pupils, 8 colleges or academies with 800 pupils; 2 hospitals; and 4 orphanages. The religious men in the archdiocese or the vicariate Apostolic are Franciscans, Capuchins, Lazarists, Dominicans, Salesians of Don Bosco, Assumptionists (at Koniah), Brothers of the Christian Schools, and Marist Brothers (at Metellin). Religious communities of women are the Carmelites, Sisters of Charity (13 houses with more than 100 sisters), Sisters of Sion, Dominicans of Ivrée, Sisters of St. Joseph, and Oblates of the Assumption.

S. VAILHÉ.

Snorri Sturluson, historian, b. at Hvammr, 1178; d. 1241. Snorri, who was the son of Sturla Thortsson (d. 1182), was the most important Icelandic historian of the Middle Ages. In him were united the experienced statesman and the many-sided scholar. As a child he went to the school of Saemund the Wise at Oddi, of which, at that time, Saemund's grandson Jón Loptsson was the head. On his father's side Jón was related to the most distinguished families of Iceland, while by his mother Thora he was connected with the royal family of Norway. Under this skilful teacher Snorri was thoroughly trained in many branches of knowledge, but he learned especially the old northern belief in the gods, the saga concerning Odin, and Scandinavian history. By a rich alliance Snorri obtained the money to take a leading part in politics, but his political course brought him many dangerous enemies, among whom King Haakon of Norway was the most powerful, and he was finally murdered at the king's instigation. Snorri's importance rests on his literary works of which "Heimskringla" (the world) is the most important, since it is the chief authority for the early history of Iceland and Scandinavia. However, it does not contain reliable statements until the history, which extends to 1177, reaches a late period, while the descriptions of the primitive era are largely vague narrations of sagas. The Sturlunga-Saga, which shows more of the local colouring of Iceland, was probably only partly the work of Snorri. On the other hand he is probably the author of the Younger Edda called "Snorra-Edda", which was intended as a textbook of the art of poetry. Its first part "Gylfaginning" relates the mythology of the North in an interesting, pictorial manner, and is a compilation of the songs of the early scalds, the songs of the common people, sagas, and probably his own poetic ideas.

Pius Wittmann.

Snow, Peter, Venerable, English martyr, suffered at York, 15 June, 1598. He was born at or near Ripon, and arrived at the English College, Reims, 17 April, 1589, receiving the first tonsure and minor orders 18 August, 1590, the subdiaconate at Laon on 22 Sept., and the diaconate and priesthood at Soissons on 30 and 31 March, 1591. He left for England on the following 15 May. He was arrested about 1 May, 1598, when on his way to York with Venerable Ralph Grimston of Nidd. Both were shortly after condemned, Snow of treason as being a priest and Grimston of felony, for having aided and assisted him, and, it is said, having attempted to prevent his apprehension.

John B. Wainewright.

Sobaipura Indians, once an important tribe of the Piman branch of the great Shoshonean linguistic stock, occupying the territory of the Santa Cruz and San Pedro Rivers, in south-eastern Arizona and adjacent portion of Sonora, Mexico. In dialect and general custom they seem to have closely resembled the Pápago, by whom and by the closely cognate Pima most of them were finally absorbed. Their principal centre was Bac or Vaaki, later San Xavier del Bac, on Santa Cruz River, nine miles south from the present Tucson, Arizona. Here they were visited in 1692 by the pioneer Jesuit explorer of the south-west, Father Eusebio Kino, who in 1699 began the church from which the mission took its name. Other Jesuit mission foundations in the same tribe were (Santa Maria de) Suamca, just inside the Sonora line, established also by Kino about the same time, and San Miguel de Guevavi, founded in 1732 near the present Nogales, Arizona, all three missions being upon the Santa Cruz River. There were also several visiting stations. The missions shared the misfortunes attending those of the Pima and Pápago, but continued to exist until a few years after the expulsion of the Jesuits in 1767. Before the end of the century the tribe itself had disappeared, and in later years San Xavier appears as a Pápago settlement. According to tradition the tribe was destroyed about the year 1790 by the attacks of the wild Apache, by whom a part were carried off, while the others were forced to incorporate with the Pápago and Pima (q. v.).

James Mooney.

Sobieski, John, b. at Olesko in 1629; d. at Wilanow, 1696; son of James, Castellan of Cracow and descended by his mother from the heroic Zołkiewski, who died in battle at Cecora. His elder brother Mark was his companion in arms from the time of the great Cossack rebellion (1648), and fought at Zbaraź, Beresteczko, and lastly at Batoh where, after being taken prisoner, he was murdered by the Tatars. John, the last of all the family, accompanied Czarniecki in the expedition to Denmark; then, under George Lubomirski, he fought the Muscovites at Cudnow. Lubomirski revolting, he remained faithful to the king (John Casimir), became successively Field Hetman, Grand Marshal, and—after Revera Potocki's death—Grand Hetman, or Commander-in-chief. His first exploit as Hetman was in Podhajce, where, besieged by an army of Cossacks and Tatars, he at his own expense raised 8000 men and stored the place with wheat, baffling the foe so completely that they retired with great loss. When, in 1672, under Michael Wiśniowiecki's reign, the Turks seized Kamieniec, Sobieski beat them again and again, till at the crowning victory of Chocim they lost 20,000 men and a great many guns. This gave Poland breathing-space, and Sobieski became the national hero, so that, King Michael dying at that time, he was unanimously elected king in 1674. Before his coronation he was forced to drive back the Turkish hordes, that had once more invaded the country; he beat them at Lemberg in 1675, arriving in time to raise the siege of Trembowla, and to save Chrzanowski and his heroic wife, its defenders. Scarcely crowned, he hastened to fight in the Ruthenian provinces. Having too few soldiers (20,000) to attack the Turks, who were ten to one, he wore them out, entrenching himself at Zurawno, letting the enemy hem him in for a fortnight, extricating himself with marvellous skill and courage, and finally regaining by treaty a good part of the Ukraine.

John Sobieski
From an unsigned portrait in the Louvre

For some time there was peace: the Turks had learned to dread the "Unvanquished Northern

Lion", and Poland, too, was exhausted. But soon the Sultan turned his arms against Austria. Passing through Hungary, a great part of which had for one hundred and fifty years been in Turkish hands, an enormous army, reckoned at from 210,000 to 300,000 men (the latter figures are Sobieski's) marched forward. The Emperor Leopold fled from Vienna, and begged Sobieski's aid, which the papal nuncio also implored. Though dissuaded by Louis XIV, whose policy was always hostile to Austria, Sobieski hesitated not an instant. Meanwhile (July, 1683) the Grand Vizier Kara Mustapha, had arrived before Vienna, and laid siege to the city, defended by the valiant Imperial General Count Stahremberg, with a garrison of only 15,000 men, exposed to the horrors of disease and fire, as well as to hostile attacks. Sobieski started to the rescue in August, taking his son James with him; passing by Our Lady's sanctuary at Czenstochowa, the troops prayed for a blessing on their arms; and in the beginning of September, having crossed the Danube and joined forces with the German armies under John George, Elector of Saxony, and Prince Charles of Lorraine, they approached Vienna. On 11 Sept., Sobieski was on the heights of Kahlenberg, near the city, and the next day he gave battle in the plain below, with an army of not more than 76,000 men, the Germans forming the left wing and the Poles under Hetmans Jahonowski and Sieniawski, with General Katski in command of the artillery, forming the right. The hussars charged with their usual impetuosity, but the dense masses of the foe were impenetrable. Their retreat was taken for flight by the Turks, who rushed forward in pursuit; the hussars turned upon them with reinforcements and charged again, when their shouts made known that the "Northern Lion" was on the field and the Turks fled, panic-stricken, with Sobieski's horsemen still in pursuit. Still the battle raged for a time along all the line; both sides fought bravely, and the king was everywhere commanding, fighting, encouraging his men and urging them forward. He was the first to storm the camp: Kara Mustapha had escaped with his life, but he received the bow-string in Belgrade some months later. The Turks were routed, Vienna and Christendom saved, and the news sent to the pope along with the Standard of the Prophet, taken by Sobieski, who himself had heard Mass in the morning.

Prostrate with outstretched arms, he declared that it was God's cause he was fighting for, and ascribed the victory (Veni, vidi, Deus vicit—his letter to Innocent XI) to Him alone. Next day he entered Vienna, acclaimed by the people as their saviour. Leopold, displeased that the Polish king should have all the glory, condescended to visit and thank him, but treated his son James and the Polish hetmans with extreme and haughty coldness. Sobieski, though deeply offended, pursued the Turks into Hungary, attacked and took Ostrzyhom after a second battle, and returned to winter in Poland, with immense spoils taken in the Turkish camp. These and the glory shed upon the nation were all the immediate advantages of the great victory. The Ottoman danger had vanished forever. The war still went on: step by step the foe was driven back, and sixteen years later Kamieniec and the whole of Podolia were restored to Poland. But Sobieski did not live to see this triumph. In vain had he again and again attempted to retake Kamieniec, and even had built a stronghold to destroy its strategic value; this fortress enabled the Tatars to raid the Ruthenian provinces upon several occasions, even to the gates of Lemberg. He was also forced by treaty to give up Kieff to Russia in 1686; nor did he succeed in securing the crown for his son James. His last days were spent in the bosom of his family, at his castle of Wilanow, where he died in 1696, broken down by political strife as much as by illness. His wife, a Frenchwoman, the widow of John Zamoyski, Marie-Casimire, though not worthy of so great a hero, was tenderly beloved by him, as his letters show: she influenced him greatly and not always wisely. His family is now extinct. Charles Edward, the Young Pretender, was his great-grandson—his son James' daughter, Clementine, having married James Stuart in 1719.

S. Tarnowski.

Socialism, a system of social and economic organization that would substitute state monopoly for private ownership of the sources of production and means of distribution, and would concentrate under the control of the secular governing authority the chief activities of human life. The term is often used vaguely to indicate any increase of collective control over individual action, or even any revolt of the dispossessed against the rule of the possessing classes. But these are undue extensions of the term, leading to much confusion of thought. State control and even state ownership are not necessarily Socialism: they become so only when they result in or tend towards the prohibition of private ownership not only of "natural monopolies", but also of all the sources of wealth. Nor is mere revolt against economic inequality Socialism: it may be Anarchism (see Anarchy); it may be mere Utopianism (see Communism); it may be a just resistance to oppression. Nor is it merely a proposal to make such economic changes in the social structure as would banish poverty. Socialism is this (see Collectivism) and much more. It is also a philosophy of social life and action, regarding all human activities from a definite economic standpoint. Moreover modern Socialism is not a mere arbitrary exercise at state-building, but a deliberate attempt to relieve, on explicit principles, the existing social conditions, which are regarded as intolerable. The great inequalities of human life and opportunity, produced by the excessive concentration of wealth in the hands of a comparatively small section of the community, have been the cause and still are the stimulus of what is called the Socialistic movement. But, in order to understand fully what Socialism is and what it implies, it is necessary first to glance at the history of the movement, then to examine its philosophical and religious tendencies, and finally to consider how far these may be, and actually have proved to be, incompatible with Christian thought and life. The first requirement is to understand the origin and growth of the movement.

It has been customary among writers of the Socialist movement to begin with references to Utopian theories of the classical and Renaissance periods, to Plato's "Republic", Plutarch's "Life of Lycurgus", More's "Utopia", Campanella's "City of the Sun", Hall's "Mundus alter et idem", and the like. Thence the line of thought is traced through the French writers of the eighteenth century, Meslier, Montesquieu, d'Argenson, Morelly, Rousseau, Mably, till, with Linguet and Necker, the eve of the Revolution is reached. In a sense, the modern movement has its roots in the ideas of these creators of ideal commonwealths. Yet there is a gulf fixed between the modern Socialists and the older Utopists. Their schemes were mainly directed towards the establishment of Communism, or rather, Communism was the idea that gave life to their fancied states (see Communism). But the Collectivist idea, which is the economic basis of modern Socialism (see Collectivism), really emerges only with "Gracchus" Babeuf and his paper, "The Tribune of the People", in 1794. In the manifesto issued by him and his fellow-conspirators, “Les Egaux”, is to be found a clear vision of the collective organization of society, such as would be largely accepted by most modern Socialists. Babeuf was guillotined by the Directory, and his party suppressed. Meanwhile, in 1793, Godwin in England had published his “Enquiry Concerning Political Justice”, a work which, though inculcating Anarchist-Communism (see ANARCHY) rather than Collectivism, had much influence on Robert Owen and the school of Determinist Socialists who succeeded him. But a small group of English writers in the early years of the nineteenth century had really more to do with the development of Socialist thought than had either Owen's attempts to found ideal communities, at New Lanark and elsewhere, or the contemporary theories and practice of Saint-Simon and Fourier in France.

These English writers, the earliest of whom, Dr. Charles Hall, first put forward that idea of a dominant industrial and social “system”, which is the pervading conception of modern Socialism, worked out the various basic principles of Socialism, which Marx afterwards appropriated and combined. Robert Thompson, Ogilvie, Hodgkin, Gray, above all William Carpenter, elaborated the theories of “surplus value”, of “production for profit”, of “class-war”, of the ever-increasing exploitation of the poor by the rich, which are the stuff of Marx's “Das Kapital”, that “old clothes-shop of ideas culled from Berlin, Paris, and London”. For indeed, this famous work is really nothing more than a dexterous combination of Hegelian Evolutionism, of French Revolutionism, and of the economic theories elaborated by Ricardo, on the one hand, and this group of English theorists on the other. Yet the services of Karl Marx and of his friend and brother-Hebrew, Friedrich Engels, to the cause of Socialism must not be underrated. These two writers came upon the scene just when the Socialist movement was at its lowest ebb. In England the work of Robert Owen had been overlaid by the Chartist movement and its apparent failure, while the writings of the economists mentioned above had had but little immediate influence. In France the Saint-Simonians and the Fourierists had disgusted everyone by the moral collapse of their systems. In Germany Lassalle had so far devoted his brilliant energies merely to Republicanism and philosophy. But in 1848 Marx and Engels published the “Communist Manifesto”, and, mere rhetoric as it was, this document was the beginning of modern “scientific Socialism”. The influence of Proudhon and of the Revolutionary spirit of the times pervades the whole manifesto: the economic analysis of society was to be grafted on later. But already there appear the ideas of “the materialistic conception of history”, of “the bourgeoisie” and “the proletariat”, and of “class-war”.

After 1848, in his exile in London, Marx studied, and wrote, and organized with two results: first, the foundation of “The International Workingmen's Association”, in 1864; second, the publication of the first volume of “Das Kapital”, in 1867. It is not easy to judge which has had the more lasting effect upon the Socialist movement. “The International” gave to the movement its world-wide character; “Das Kapital” elaborated and systematized the philosophic and economic doctrine which is still the creed of the immense majority of Socialists. “Proletarians of all lands, unite!” the sentence with which the Communist Manifesto of 1848 concludes, became a reality with the foundation of the International. For the first time since the disruption of Christendom an organization took shape which had for its object the union of the major portion of all nations upon a common basis. It was not so widely supported as both its upholders believed and the frightened moneyed interests imagined. Nor had this first organization any promise of stability. From the outset the influence of Marx steadily grew, but it was confronted by the opposition of Bakunin and the Anarchist school. By 1876 the International was even formally at an end. But it had done its work: the organized working classes of all Europe had realized the international nature both of their own grievances and of capitalism, and when, in 1889, the first International Congress of Socialist and Trade-Union delegates met at Paris, a “New International” came into being which exists with unimpaired or, rather, with enhanced energy to the present day. Since that first meeting seven others have been held at intervals of three or four years, at which there has been a steady growth in the number of delegates present, the variety of nationalities represented, and the extent of the Socialistic influence over its deliberations.

In 1900, an International Socialist Bureau was established at Brussels, with the purpose of solidifying and strengthening the international character of the movement. Since 1904, an Inter-Parliamentary Socialist Committee has given further support to the work of the bureau. To-day the international nature of the Socialistic movement is an axiom both within and without its ranks; an axiom that must not be forgotten in the estimation both of the strength and of the trend of the movement. To the International, then, modern Socialism owes much of its present power. To “Das Kapital” it owes such intellectual coherence as it still possesses. The success of this book was immediate and considerable. It has been translated into many languages, epitomized by many hands, criticized, discussed, and eulogized. Thousands who would style themselves Marxians and would refer to “Das Kapital” as “the Bible of Socialism”, and the irrefragable basis of their creed, have very probably never seen the original work, nor have even read it in translation. Marx himself published only the first volume; the second was published under Engels' editorship in 1885, two years after the death of Marx; a third was elaborated by Engels from Marx's notes in 1895; a fourth was projected but never accomplished. But the influence of this torso has been immense. With consummate skill Marx gathered together and worked up the ideas and evidence that had originated with others, or were the floating notions of the movement; with the result that the new international organization had ready to hand a body of doctrine to promulgate, the various national Socialist parties a common theory and programme for which to work. And promulgated it was, with a devotion and at times a childlike faith that had no slight resemblance to religious propaganda. It has been severely and destructively criticized by economists of many schools, many of its leading doctrines have been explicitly abandoned by the Socialist leaders in different countries, some are now hardly defended even by those leaders who label themselves “Marxian”. Yet the influence of the book persists. The main doctrines of Marxism are still the stuff of popular Socialist belief in all countries, are still put forward in scarcely modified form in the copious literature produced for popular consumption, are still enunciated or implied in popular addresses even by some of the very leaders who have abandoned them in serious controversy. In spite of the growth of Revisionism in Germany, of Syndicalism in France, and of Fabian Expertism in England, it is still accurate to maintain that the vast majority of Socialists, the rank and file of the movement in all countries, are adherents of the Marxian doctrine, with all its materialistic philosophy, its evolutionary immorality, its disruptive political and social analysis, its class-conscious economics.

In Socialism, to-day, as in most departments of human thought, the leading writers display a marked shyness of fundamental analysis: “The domain of Socialist thought”, says Lagardelle, has become “an intellectual desert." Its protagonists are largely occupied, either in elaborating schemes of social reform, which not infrequently present no exclusively socialist characteristics, or else in apologizing for and disavowing inconvenient applications by earlier leaders, of socialist philosophy to the domain of religion and ethics. Nevertheless, in so far as the International movement remains definitely Socialist at all, the formulæ of its propaganda and the creed of its popular adherents are predominantly the reflection of those put forward in "Das Kapital" in 1867. Moreover, during all this period of growth of the modern Socialist movement, two other parallel movements in all countries have at once supplemented and counterpoised it. These are trade-unionism and co-operation. There is no inherent reason why either of these movements should lead towards Socialism: properly conducted and developed, both should render unnecessary anything that can correctly be styled "Socialism". But, as a matter of fact, both these excellent movements, owing to unwise opposition by the dominant capitalism, on the one hand, and indifference in the Churches on the other, are menaced by Socialism, and may eventually be captured by the more intelligent and energetic Socialists and turned to serve the ends of Socialism. The training in mutual aid and interdependence, as well as in self-government and business habits, which the leaders of the wage-earners have received in both trade-unionism and the co-operative movements, while it might be of incalculable benefit in the formation of the needed Christian democracy, has so far been effective largely in demonstrating the power that is given by organization and numbers. And the leaders of Socialism have not been slow to emphasize the lesson and to extend the argument, with sufficient plausibility, towards state monopoly and the absolutism of the majority. The logic of their argument has, it is true, been challenged, in recent years, in Europe by the rise of the great Catholic trade-union and co-operative organizations. But in English-speaking nations this is yet to come, and both co-operation and trade-unionism are allowed to drift into the grip of the Socialist movement, with the result that what might become a most effective alternative for Collectivism remains to-day its nursery and its support.

Parallel with the International movement has run the local propaganda in various countries, in each of which the movement has taken its colour from the national characteristics; a process which has continued, until to-day it is sometimes difficult to realize that the different bodies who are represented in the International Congresses form part of the same agitation. In Germany, the fatherland of dogmatic Socialism, the movement first took shape in 1862. In that year Ferdinand Lassalle, the brilliant and wealthy young Jewish lawyer, delivered a lecture to an artisans' association at Berlin. Lassalle was fined by the authorities for his temerity, but "The Working Men's Programme", as the lecture was styled, resulted in The Universal German Working Men's Association, which was founded at Leipzig under his influence the following year. Lassalle commenced a stormy progress throughout Germany, lecturing, organizing, writing. The movement did not grow at first with the rapidity he had expected, and he himself was killed in a duel in 1864. But his tragic death aroused interest, and The Working Men's Association grew steadily till, in 1869, reinforced by the adhesion of the various organizations which had grown out of Marx's propaganda, it became, at Eisenach, the Socialist Democratic Working Men's Party. Liebknecht, Bebel, and Singer, all Marxians, were its chief leaders. The two former were imprisoned for treason in 1870; but in 1874 ten members of the party, including the two leaders, were returned to the Reichstag by 450,000 votes. The Government attempted repression, with the usual result of consolidating and strengthening the movement. In 1875 was held the celebrated congress at Gotha, at which was drawn up the programme that formed the basis of the party. Three years later an attempt upon the emperor's life was made the excuse for renewed repression. But it was in vain. In spite of alternate persecution and essays in state Socialism, on the part of Bismarck, the movement progressed steadily. Bismarck fell from power in 1890 and since then the party has grown rapidly, and is now the strongest political body in Germany. In 1899 Edward Bernstein, who had come under the influence of the Fabians in England since 1888, started the "Revisionist" movement, which, while attempting to concentrate the energies of the party more definitely upon specific reforms and "revising" to extinction many of the most cherished doctrines of Marxism, has yet been subordinated to the practical exigencies of politics. To all appearance the Socialist Party is stronger to-day than ever. The elections of 1907 brought out 3,258,968 votes in its favour; those of January, 1912, gave it 110 seats out of a total of 397 in the Reichstag—a gain of more than 100 per cent over its last previous representation (53 seats). The Marxian "Erfurt Programme", adopted in 1891, is still the official creed of the Party. But the "Revisionist" policy is obviously gaining ground and, if the Stuttgart Congress of 1907 be any indication, is rapidly transforming the revolutionary Marxist party into an opportunist body devoted to specific social reforms.

In France the progress of Socialism has been upon different lines. After the collapse of Saint-Simonism and Fourierism, came the agitation of Louis Blanc in 1848, with his doctrine of "The Right to Work". But this was side-tracked by the triumphant politicians into the scandalous "National Workshops", which were probably deliberately established on wrong lines in order to bring ridicule upon the agitation. Blanc was driven into exile, and French Socialism lay dormant till the ruin of Imperialism in 1870 and the outbreak of the Commune in 1871. This rising was suppressed with a ferocity that far surpassed the wildest excesses of the Communards; 20,000 men are said to have been shot in cold blood, many of whom were certainly innocent, while not a few were thrown alive into the common burial pits. But this savagery, though it temporarily quelled the revolution, did nothing to obviate the Socialist movement. At first many of the scattered leaders declared for Anarchism, but soon most of them abandoned it as impracticable and threw their energies into the propagation of Marxian Socialism. In 1879 the amnesty permitted Jules Guesde, Brousse, Malon, and other leaders to return. In 1881, after the Anarchist-Communist group under Kropotkin and Réclus had seceded, two parties came into existence, the opportunist Alliance Socialiste Républicaine, and the Marxian Parti Ouvrier Socialiste Révolutionaire de France. But these parties soon split up into others. Guesde led, and still leads, the Irreconcilables; Jaurès and Millerand have been the leaders of the Parliamentarians; Brousse, Blanqui, and others have formed their several communistic groups. In 1906, however, largely owing to the influence of Jaurès, the less extreme parties united again to form Le Parti Socialiste Unifié. This body is but loosely formed of various irreconcilable groups and includes Anarchists like Hervé, Marxists like Guesde, Syndicalists like Lagardelle, Opportunists like Millerand, all of whom Jaurès endeavours, with but slight success, to maintain in harmony. For right across the Marxian doctrinairianism and the opportunism of the parliamentary group has driven the recent Revolutionary Syndicalist movement. This, which is really Anarchist-Communism working through trade-unionism, is a movement distrustful of parliamentary systems, favourable to violence, tending towards destructive revolution. The Confédération Générale du Travail is rapidly absorbing the Socialist movement in France, or at least robbing it of the ardent element that gives it life.

In the British Isles the Socialist movement has had a less stormy career. After the collapse of Owenism and the Chartist movement, the practical genius of the nation directed its chief reform energies towards the consolidation of the trade unions and the building up of the great co-operative enterprise. Steadily, for some forty years, the trade-union leaders worked at the strengthening of their respective organizations, which, with their dual character of friendly societies and professional associations, had no small part in training the working classes in habits of combination for common ends. And this lesson was emphasized and enlarged by the Co-operative movement, which, springing from the tiny efforts of the Rochdale Pioneers, spread throughout the country, till it is now one of the mightiest business organizations in the world. In this movement many a labour leader learnt habits of business and of successful committee work that enabled him later on to deal on equal, or even on advantageous, terms with the representatives of the owning classes. But during all this period of training the Socialist movement proper lay dormant. It was not until 1884, with the foundation of the strictly Marxian Social Democratic Federation by H. M. Hyndman, that the Socialist propaganda took active form in England. It did not achieve any great immediate success, nor has it ever since shown signs of appealing widely to the English temperament. But it was a beginning, and it was followed by other, more inclusive, organizations. A few months after its foundation the Socialist League, led by William Morris, seceded from it and had a brief and stormy existence. In 1893, at Bradford, the "Independent Labour Party" was formed under the leadership of J. Keir Hardie, with the direct purpose of carrying Socialism into politics. Attached to it were two weekly papers, "The Clarion" and "The Labour Leader"; the former of which, by its sale of over a million copies of an able little manual, "Merrie England", had no small part in the diffusion of popular Socialism. All these three bodies were Marxian in doctrine and largely working class in membership.

But, as early as 1883, a group of middle-class students had joined together as The Fabian Society. This body, while calling itself Socialist, rejected the Marxian in favour of Jevonsian economics, and devoted itself to the social education of the public by means of lectures, pamphlets and books, and to the spread of Collectivist ideas by the "permeation" of public bodies and political parties. Immense as have been its achievements in this direction, its constant preoccupation with practical measures of reform and its contact with organized party politics have led it rather in the direction of the "Servile State" than of the Socialist Commonwealth. But the united efforts of the various Socialist bodies, in concert with trade unionism, resulted, in 1899, in the formation of the Labour Representation Committee which, seven years later, had developed into the Labour Party, with about thirty representatives in the House of Commons. Already, however, a few years' practical acquaintance with party politics has diminished the Socialist orthodoxy of the Labour Party, and it shows signs of becoming absorbed in the details of party contention. Significant commentaries appeared in the summer of 1911 and in the spring of 1912; industrial disturbances, singularly resembling French Syndicalism, occurred spontaneously in most commercial and mining centres, and the whole Labour movement in the British Isles has reverted to the Revolutionary type that last appeared in 1889.

In every European nation the Socialist movement has followed, more or less faithfully, one of the three preceding types. In Belgium, Switzerland, Denmark, and Italy it is predominantly parliamentary: in Russia, Spain, and Portugal it displays a more bitterly revolutionary character. But everywhere the two tendencies, parliamentary and revolutionary, struggle for the upper hand; now one, now the other becoming predominant. Nor is the movement in the United States any exception to the rule. It began about 1849, purely as a movement among the German and other immigrants and, in spite of the migration of the old International to New York in 1872, had but little effect upon the native population till the Henry George movement of 1886. Even then jealousies and divisions restricted its action, till the reorganization of the Socialist Labour Party at Chicago in 1889. Since then the movement has spread rapidly. In 1897 appeared the Social Democracy of America, which, uniting with the majority of the Socialist Labour Party in 1901, formed the present rapidly growing Socialist Party. In the United States the movement is still strongly Marxian in character, though a Revisionist school is growing up, somewhat on the lines of the English Fabian movement, under the influence of writers like Edmond Kelly, Morris Hillquit, and Professors Ely and Zueblin. But the main body is still crudely Revolutionary, and is likely to remain so until the political democracy of the nation is more perfectly reflected in its economic conditions.

These main points in the history of Socialism lead up to an examination of its spirit and intention. The best idealism of earlier times was fixed upon the soul rather than upon the body: exactly the opposite is the case with Socialism. Social questions are almost entirely questions of the body—public health, sanitation, housing, factory conditions, infant mortality, employment of women, hours of work, rates of wages, accidents, unemployment, pauperism, old-age pensions, sickness, infirmity, lunacy, feeble-mindedness, intemperance, prostitution, physical deterioration. All these are excellent ends for activity in themselves, but all of them are mainly concerned with the care or cure of the body. To use a Catholic phrase, they are opportunities for corporal works of mercy, which may lack the spiritual intention that would make them Christian. The material may be made a means to the spiritual, but is not to be considered an end in itself. This world is a place of probation, and the time is short. Man is here for a definite purpose, a purpose which transcends the limits of this mortal life, and his first business is to realize this purpose and carry it out with whatever help and guidance he may find. The purpose is a spiritual one, but he is free to choose or refuse the end for which he was created; he is free to neglect or to co-operate with the Divine assistance, which will give his life the stability and perfection of a spiritual rather than of a material nature. This being so, there must be a certain order in the nature of his development. He is not wholly spiritual nor wholly material; he has a soul, a mind, and a body; but the interests of the soul must be supreme, and the interests of mind and body must be brought into proper subservience to it. His movement towards perfection is by way of ascent: it is not easy; it requires continual exercise of the will, continual discipline, continual training—it is a warfare and a pilgrimage, and in it are two elements, the spiritual and the material, which are one in the unity of his daily life. As St. Paul pointed out, there must be a continual struggle between these two elements. If the individual life is to be a success, the spiritual desire must triumph, the material one must be subordinate, and when this is so the whole individual life is lived with proper economy, spiritual things being sought after as an end, while material things are used merely as a means to that end.

The point, then, to be observed is that the spiritual life is really the economic life. From the Christian point of view material necessities are to be kept at a minimum, and material superfluities as far as possible to be dispensed with altogether. The Christian is a soldier and a pilgrim who requires material things only as a means to fitness and nothing more. In this he has the example of Christ Himself, Who came to earth with a minimum of material advantages and persisted thus even to the Cross. The Christian, then, not only from the individual but also from the social standpoint, has chosen the better part. He does not despise this life, but, just because his material desires are subordinate to his spiritual ones, he lives it much more reasonably, much more unselfishly, much more beneficially to his neighbours. The point, too, which he makes against the Socialist is this. The Socialist wishes to distribute material goods in such a way as to establish a substantial equality, and in order to do this he requires the State to make and keep this distribution compulsory. The Christian replies to him: "You cannot maintain this widespread distribution, for the simple reason that you have no machinery for inducing men to desire it. On the contrary, you do all you can to increase the selfish and accumulative desires of men: you centre and concentrate all their interest on material accumulation, and then expect them to distribute their goods." This ultimate difference between Christian and Socialist teaching must be clearly understood. Socialism appropriates all human desires and centres them on the here-and-now, on material benefit and material prosperity. But material goods are so limited in quality, in quantity, and in duration that they are incapable of satisfying human desires, which will ever covet more and more and never feel satisfaction. In this Socialism and Capitalism are at one, for their only quarrel is over the bone upon which is the meat that perisheth. Socialism, of itself and by itself, can do nothing to diminish or discipline the immediate and materialistic lust of men, because Socialism is itself the most exaggerated and universalized expression of this lust yet known to history. Christianity, on the other hand, teaches and practises unselfish distribution of material goods, both according to the law of justice and according to the law of charity.

Again, ethically speaking, Socialism is committed to the doctrine of determinism. Holding that society makes the individuals of which it is composed, and not vice versa, it has quite lost touch with the invigorating Christian doctrine of free will. This fact may be illustrated by its attitude towards the three great institutions which have hitherto most strongly exemplified and protected that doctrine—the Church, the Family, and private ownership. Socialism, with its essentially materialistic nature, can admit no *raison d'être* for a spiritual power, as complementary and superior to the secular power of the State. Man, as the creature of a material environment, and as the subject of a material State, has no moral responsibilities and can yield to no allegiance beyond that of the State. Any power which claims to appropriate and discipline his interior life, and which affords him sanctions that transcend all evolutionary and scientific determinism, must necessarily incur Socialist opposition. So, too, with the Family. According to the prevalent Socialist teaching, the child stands between two authorities, that of its parents and that of the State, and of these the State is certainly the higher. The State therefore is endowed with the higher authority and with all powers of interference to be used at its own discretion. Contrast this with the Christian notion of the Family —an organic thing with an organic life of its own. The State, it is true, must ensure a proper basis for its economic life, but beyond that it should not interfere: its business is not to detach the members of the family from their body in order to make them separately and selfishly efficient; a member is cut off from its body only as a last resource to prevent organic poisoning. The business of the State is rather that of helping the Family to a healthy, co-operative, and productive unity. The State was never meant to appropriate to itself the main parental duties, it was rather meant to provide the parents, especially poor parents, with a wider, freer, healthier family sphere in which to be properly parental. Socialism, then, both in Church and Family, is impersonal and deterministic: it deprives the individual of both his religious and his domestic freedom. And it is exactly the same with the institution of private property.

The Christian doctrine of property can best be stated in the words of St. Thomas Aquinas: "In regard to an external thing man has two powers: one is the power of managing and controlling it, and as to this it is lawful for a man to possess private property. It is, moreover, necessary for human life for three reasons. First, because everyone is more zealous in looking after a thing that belongs to him than a thing that is the common property of all or of many; because each person, trying to escape labour, leaves to another what is everybody's business, as happens where there are many servants. Secondly, because there is more order in the management of men's affairs if each has his own work of looking after definite things; whereas there would be confusion if everyone managed everything indiscriminately. Thirdly, because in this way the relations of men are kept more peaceful, since everyone is satisfied with his own possession, whence we see that quarrels are commoner between those who jointly own a thing as a whole. The other power which man has over external things is the using of them: and as to this man must not hold external things as his own property, but as everyone's; so as to make no difficulty, I mean, in sharing when others are in need" (Summa theologica, II–II, Q. lxvi, a. 2). If man, then, has the right to own, control, and use private property, the State cannot give him this right or take it away; it can only protect it. Here, of course, we are at issue with Socialism, for, according to it, the State is the supreme power from which all human rights are derived; it acknowledges no independent spiritual, domestic, or individual power whatever. In nothing is the bad economy of Socialism more evident than in its derogation or denial of all the truly personal and self-directive powers of human nature, and its misuse of such human qualities as it does not despise or deny is a plain confession of its material and deterministic limitations. It is true that the institutions of religion, of the family, and of private ownership are liable to great abuses, but the perfection of human effort and character demands a freedom of choice between good and evil as their first necessary condition. This area of free choice is provided, on the material side, by private ownership; on the spiritual and material, by the Christian Family; and on the purely spiritual by religion. The State, then, instead of depriving men of these opportunities of free and fine production, not only of material but also of intellectual values, should rather constitute itself as their defender.

In apparent contradiction, however, to much of the foregoing argument are the considerations put forward by numerous schools of "Christian Socialism", both Catholic and non-Catholic. It will be urged that there cannot really be the opposition between Socialism and Christianity that is here suggested, for, as a matter of fact, many excellent and intelligent persons in all countries are at once convinced Christians and ardent Socialists. Now, before it is possible to estimate correctly how far this undoubted fact can alter the conclusions arrived at above, certain premises must be noted. First, it is not practically possible to consider Socialism solely as an economic or social doctrine. It has long passed the stage of pure theory and attained the proportions of a movement: it is to-day a doctrine embodied in programmes, a system of thought and belief that is put forward as the vivifying principle of an active propaganda, a thing organically connected with the intellectual and moral activities of the millions who are its adherents. Next, the views of small and scattered bodies of men and women, who profess to reconcile the two doctrines, must be allowed no more than their due weight when contrasted with the expressed beliefs of not only the majority of the leading exponents of Socialism, past and present, but also of the immense majority of the rank and file in all nations. Thirdly, for Catholics, the declarations of supreme pontiffs, of the Catholic hierarchy, and of the leading Catholic sociologists and economists have an important bearing on the question, an evidential force not to be lightly dismissed. Lastly, the real meaning attached to the terms "Christianity" and "Socialism", by those who profess to reconcile these doctrines, must always be elicited before it is possible to estimate either what doctrines are being reconciled or how far that reconciliation is of any practical adequacy.

If it be found on examination that the general trend of the Socialist movement, the predominant opinion of the Socialists, the authoritative pronouncements of ecclesiastical and expert Catholic authority all tend to emphasize the philosophical cleavage indicated above, it is probably safe to conclude that those who profess to reconcile the two doctrines are mistaken: either their grasp of the doctrines of Christianity or of Socialism will be found to be imperfect, or else their mental habits will appear to be so lacking in discipline that they are content with the profession of a belief in incompatible principles. Now, if Socialism be first considered as embodied in the Socialist movement and Socialist activity, it is notorious that everywhere it is antagonistic to Christianity. This is above all clear in Catholic countries, where the Socialist organizations are markedly anti-Christian both in profession and practice. It is true that of late years there has appeared among Socialists some impatience of remaining mere catspaws of the powerful Masonic anti-clerical societies, but this is rather because these secret societies are largely engineered by the wealthy in the interests of capitalism than from any affection for Catholicism. The European Socialist remains anti-clerical, even when he revolts against Masonic manipulation. Nor is this really less true of non-Catholic countries. In Germany, in Holland, in Denmark, in the United States, even in Great Britain, organized Socialism is ever prompt to express (in its practical programme, if not in its formulated creed) its contempt for and inherent antagonism to revealed Christianity. What, in public, is not infrequently deprecated is clearly enough implied in projects of legislation, as well as in the mental attitude that is usual in Socialist circles.

Nor are the published views of the Socialist leaders and writers less explicit. "Scientific Socialism" began as an economic exposition of evolutionary materialism; it never lost that character. Its German founders, Marx, Engels, Lassalle, were notoriously anti-Christian both in temper and in acquired philosophy. So have been its more modern exponents in Germany, Bebel, Liebknecht, Kautsky, Dietzgen, Bernstein, Singer, as well as the popular papers—the "Sozial Demokrat", the "Vorwärts", the "Zimmerer", the "Neue Zeit"—which reflect, while expounding, the view of the rank and file; and the Gotha and Erfurt programmes, which express the practical aims of the movement. In France and the Netherlands the former and present leaders of the various Socialist sections are at one on the question of Christianity—Lafargue, Hervé, Boudin, Guesde, Jaurès, Viviani, Sorel, Briand, Griffuelhes, Largardelle, Téry, Renard, Nieuwenhuis, Vandervelde—all are anti-Christian, as are the popular newspapers, like "La Guerre Sociale", "L'Humanité", "Le Socialiste", the "Petite République", the "Recht voor Allen", "Le Peuple". In Italy, Austria, Spain, Russia, and Switzerland it is the same: Socialism goes hand in hand with the attack on Christianity. Only in the English-speaking countries is the rule apparently void. Yet, even there, but slight acquaintance with the leading personalities of the Socialist movement and the habits of thought current among them, is sufficient to dispel the illusion. In Great Britain certain prominent names at once occur as plainly anti-Christian—Aveling, Hyndman, Pearson, Blatchford, Bax, Quelch, Leatham, Morris, Standring—many of them pioneers and prophets of the movement in England. The Fabians, Shaw, Pease, Webb, Guest; independents, like Wells, or Orage, or Carpenter; popular periodicals like "The Clarion", "The Socialist Review", "Justice" are all markedly non-Christian in spirit, though some of them do protest against any necessary incompatibility between their doctrines and the Christian. It is true that the political leaders, like Macdonald and Hardie, and a fair proportion of the present Labour Party might insist that "Socialism is only Christianity in terms of modern economics", but the very measures they advocate or support not unfrequently are anti-Christian in principle or tendency. And in the United States it is the same. Those who have studied the writings or speeches of well-known Socialists, such as Bellamy, Gronlund, Spargo, Hunter, Debs, Herron, Abbott, Brown, Del Mar, Hillquit, Kerr, or Simmons, or periodicals like the "New York Volkszeitung", "The People", "The Comrade", or "The Worker", are aware of the bitterly anti-Christian tone that pervades them and is inherent in their propaganda.

The trend of the Socialist movement, then, and the deliberate pronouncements and habitual thought of leaders and followers alike, are almost universally found to be antagonistic to Christianity. Moreover, the other side of the question is but a confirmation of this antagonism. For all three popes who have come into contact with modern Socialism, Pius IX, Leo XIII, and Pius X, have formally condemned it, both as a general doctrine and with regard to specific points. The bishops and clergy, the lay experts on social and economic questions, the philosophers, the theologians, and practically the whole body of the faithful are unanimous in their acceptance of the condemnation. It is of little purpose to point out that the Socialism condemned is Marxism, and not Fabianism or its analogues in various countries. For, in the first place, the main principles common to all schools of Socialism have been explicitly condemned in Encyclicals like the "Rerum novarum" or the "Graves de communi"; and, in addition, as has been shown above, the main current of Socialism is still Marxist, and no adhesion to a movement professedly international can be acquitted of the guilt of lending support to the condemned doctrines. The Church, the Socialists, the very tendency of the movement do but confirm the antagonism of principle, indicated above, between Socialism and Christianity. The "Christian Socialists" of all countries, indeed, fall readily, upon examination, into one of three categories. Either they are very imperfectly Christian, as the Lutheran followers of Stöcker and Naumann in Germany, or the Calvinist Socialists in France, or the numerous vaguely-doctrinal "Free-Church" Socialists in England and America; or, secondly, they are but very inaccurately styled "Socialist"; as were the group led by Kingsley, Maurice and Hughes in England, or "Catholic Democrats" like Ketteler, Manning, Descurtins, the "Sillonists"; or, thirdly, where there is an acceptance of the main Christian doctrine, side by side with the advocacy of Revolutionary Socialism, as is the case with the English "Guild of St

Matthew" or the New York Church Association for the Advancement of the Interests of Labour, it can only be ascribed to that mental facility in holding at the same time incompatible doctrines, which is everywhere the mark of the "Catholic but not Roman" school. Christianity and Socialism are hopelessly incompatible, and the logic of events makes this ever clearer. It is true that, before the publication of the Encyclical "Rerum novarum", it was not unusual to apply the term "Christian Socialism" to the social reforms put forward throughout Europe by those Catholics who are earnestly endeavouring to restore the social philosophy of Catholicism to the position it occupied in the ages of Faith. But, under the guidance of Pope Leo XIII, that crusade against the social and economic iniquities of the present age is now more correctly styled "Christian Democracy", and no really instructed, loyal, and clear-thinking Catholic would now claim or accept the style of Christian Socialist.

To sum up, in the words of a capable anonymous writer in "The Quarterly Review", Socialism has for "its philosophical basis, pure materialism; its religious basis is pure negation; its ethical basis the theory that society makes the individuals of which it is composed, not the individuals society, and that therefore the structure of society determines individual conduct, which involves moral irresponsibility; its economic basis is the theory that labour is the sole producer, and that capital is the surplus value over bare subsistence produced by labour and stolen by capitalists; its juristic basis is the right of labour to the whole product; its historical basis is the industrial revolution, that is the change from small and handicraft methods of production to large and mechanical ones, and the warfare of classes; its political basis is democracy. . . . It may be noted that some of these [bases] have already been abandoned and are in ruins, others are beginning to shake; and as this process advances the defenders are compelled to retreat and take up fresh positions. Thus the form of the doctrine changes and undergoes modification, though all cling still to the central principle, which is the substitution of public for private ownership."

I. History of the Socialist Movement: (1) General:—Cetty, *Les socialistes allemands* (Paris, 1907); De Seilhac, *Les congrès ouvriers en France* (Reims, 1908); Hillquit, *History of Socialism in the United States* (New York, 1902); Kirkup, *History of Socialism* (London, 1909); Lecocq, *La question sociale au xviii siècle* (Paris, 1909); Louis, *Histoire du mouvement syndical en France* (Paris, 1907); Pelloutier, *Histoire des Bourses de Travail* (Paris, 1902); Rae, *Contemporary Socialism* (London, 1908); Sombart, *Socialism and the Socialist Movement* (London, 1909); Stoddart, *The New Socialism* (London, 1909); Tugan–Baronowsky, *Modern Socialism in its Historical Development* (London, 1910); Villiers, *The socialist Movement in England* (London, 1910); Winterer, *Le socialisme contemporain* (Paris, 1895). (2) Utopian and Revolutionary Attempts.—Buonarotti, *Babeuf's Conspiracy for Equality* (London, 1836); Cullen, *Adventures in Socialism* (London, 1910); Hinds, *American Communities* (Chicago, 1902); Lissagaray, *History of the Commune of 1871* (London, 1886); Mallock, *A Century of Socialistic Experiments* in *The Dublin Review* (July, 1909); March, *History of the Paris Commune* (London, 1895); Nordhoff, *Communistic Societies in the United States* (London, 1875); Noyes, *History of American Socialisms* (Philadelphia, 1870). (3) Biographies of Socialist Leaders.—Bernstein, *Ferdinand Lassalle as a Social Reformer* (London, 1893); Booth, *Saint-Simon and Saint-Simonism* (London, 1871); George, *Life of Henry George* (London, 1900); Gibbins, *English Social Reformers* (London, 1907); Jackson, *Bernard Shaw, a monograph* (London, 1909); Jones, *The Life, Times and Labours of Robert Owen* (London, 1900); MacKail, *Life of William Morris* (2 vols., London, 1899); Spargo, *Karl Marx, his Life and Work* (New York, 1910); Taylor, *Leaders of Socialism* (London, 1908).

II. History of Movements Influencing Socialism: (1) Cooperation.—Fay, *Co-operation at Home and Abroad* (London, 1908); Holyoake, *History of Co-operation* (2 vols., London, 1908); Lavergne, *Le régime coopératif* (Paris, 1910); Potter, *Co-operative movement in Great Britain* (London, 1899). (2) Combinations of Labour and Capital.—De Seilhac, *Les grèves* (Paris, 1909); Diligent, *Les orientations syndicales* (Paris, 1909); Ely, *Monopolies and Trusts* (New York, 1900); Hirst, *Monopolies, Trusts, and Kartells* (London, 1905); Howell, *Trade Unionism Old and New* (London, 1907); Kirkbride and Sterrett, *The Modern Trust Company* (New York, 1906); Macrosty, *The Trust Movement in British Industry* (London, 1907); Webb, *History of Trade-Unionism* (London, 1901); Idem, *Industrial Democracy* (London, 1901). (3) Legislation.—Cunningham and Macarthur, *Outlines of English Industrial History* (Cambridge, 1894); Hutchins and Harrison, *History of Factory Legislation* (London, 1910); Nicholls and Mackay, *History of the English Poor Law* (3 vols., London, 1910); Webb, *English Poor Law Policy* (London, 1909); Idem, *Grants in Aid* (London, 1911); Idem, *The State and the Doctor* (London, 1910). (4) Municipal and Administrative Activities.—Darwin, *Municipal Ownership* (London, 1907); Joly, *La Suisse politique et sociale* (Paris, 1909); Idem, *L'Italie contemporaine* (Paris, 1911); Meyer, *Municipal Ownership in Great Britain* (London, 1906); Reeves, *State Experiments in Australia and New Zealand* (2 vols., London, 1902); Shaw, *Municipal Government in Great Britain* (London, 1895); Idem, *Municipal Government in Continental Europe* (London, 1896); Webber, *The Growth of Cities in the Nineteenth Century* (London, 1899); Zueblin, *American Municipal Enterprise* (New York, 1902).

III. Socialism as Expounded by Socialists. (1) Marxism.—Bax, *Essays in Socialism New and Old* (London, 1905); Blatchford, *Merrie England* (London, 1895); Engels, *Socialism Utopian and Scientific* (London, 1892); Ferri, *Socialism and Positive Science* (London, 1905); Gronlund, *The Co-operative Commonwealth* (London, 1896); Hunter, *Socialists at Work* (New York, 1908); Hyndman, *The Economics of Socialism* (London, 1896); Jaurés, *Studies in Socialism* (London, 1906); Marx, *Capital* (3 vols., London, 1888, 1907, 1909); Morris and Bax, *Socialism its Growth and Outcome* (London, 1897); Spargo, *Socialism, a Summary and Interpretation* (New York, 1906); Idem, *The Substance of Socialism* (New York, 1910). (2) Revisionism, Revolutionary Syndicalism, Fabian Expertism.—Bernstein, *Evolutionary Socialism* (London, 1909); Clay, *Syndicalism and Labour* (London, 1911); Ensor, *Modern Socialism as Set Forth by Socialists* (New York, 1910); *Fabian Essays in Socialism* (London, 1909); *Fabian Tracts, Nos. 1–160* (London, 1884–1911); Griffuelhes, *L'action syndicaliste* (Paris, 1908); Idem, *Voyages révolutionaires* (Paris, 1910); Hillquit, *Socialism in Theory and Practice* (New York, 1909); Kelly, *Twentieth Century Socialism* (London, 1910); Lagardelle. *Le socialisme ouvrier* (Paris, 1911); Macdonald, *Socialism and Society* (London, 1905); Idem, *The Socialist Movement* (London, 1911); Mermeix, *Le socialisme* (Paris, 1907); Idem, *Le syndicalisme contre le socialisme* (Paris, 1908); Pataud and Pouget, *Comment nous ferons la révolution* (Paris, 1909); Prezzolini, *La teoria sindicalista* (Naples, 1909); Vandervelde, *Collectivism and Industrial Revolution* (London, 1907); Webb, *The Prevention of Destitution* (London, 1911); Wells, *New Worlds for Old* (London, 1908).

IV. Catholic Criticism of Socialism.—Antoine, *Cours d'économie sociale* (Paris, 1988), 523–68; Ardant, *Le socialisme contemporain et la propriété* (Paris, 1905); *Brochures jaunes de l'Action Populaire, Nos. 26, 28, 49, 97, 100, 163, 174, 199* (Reims, 1904–11); Castelein, *Le socialisme et le droit de propriété* (Brussels); Cathrein, *Socialism, its theoretical basis and practical application* (New York, 1904); Cousin, *Catéchisme d'économie soc. et polit.* (Paris, 1907); De Seilhac, *L'utopie social.* (Paris, 1907); Devas, *Political Economy* (London, 1907), 514–26; Kelleher, *Private ownership: its basis and equitable conditions* (Dublin, 1911); Le roy-Beaulieu, *Collectivism, a Study of Some of the Leading Questions of the Day* (London, 1908); Pesch, *Liberalismus, Socialismus Christl. Gesellschaftsord.* (Freiburg, 1896); Preuss, *The Fundamental Fallacy of Socialism* (St. Louis, 1908); Savatier, *Les variations du socialisme* in *Le mouvement soc.* (Paris, May, 1911); Schrijvers, *Handbook of Practical Econonomics* (London, 1910), 25–48; Toussaint, *Collectivisme et communisme* (Paris, 1907); Winterer, *Le socialisme allemand et ses dernières évolutions* (Paris, 1907).

V. Non-Catholic Criticism of Socialism.—Guyot, *Socialistic Fallacies* (London, 1910); Flint, *Socialism* (London, 1908); Hobson, *The Industrial System* (London, 1909); Idem, *The Science of wealth* (London, 1911); Kirkup, *An Enquiry Into Socialism* (London, 1908); Mallock, *A Critical Examination of Socialism* (London, 1908); Nicholson, *Historical Progress and Ideal Socialism* (London, 1894); Schaeffle, *The Quintessence of Socialism* (London, 1899); Skelton, *Socialism, a critical analysis* (London, 1911); *Socialism, Its Meaning and Origin; its Present Position and Future Prospects* in *Quarterly Review* (April, July, London, 1910); *The Case Against Socialism* (London, 1909).

VI. W. E. CAMPBELL.

Socialistic Communities.—This title comprehends those societies which maintain common ownership of the means of production and distribution, e. g., land, factories, and stores, and also those which further extend the practice of common ownership to consumable goods, e. g., houses and food. While the majority of the groups treated in the present article are, strictly speaking, communistic rather than socialistic, they are frequently designated by the latter term. The most important of them have already been described under COMMUNISM. Below a more nearly complete list is given, together with brief notices of those societies that have not been discussed in the former articles. At the time of the Protestant Reformation certain socialistic experiments were made by several heretical sects, including the Anabaptists, the Libertines, and the Familists; but these sects did not convert their beliefs along this line into practice with sufficient thoroughness or for a sufficient length of time to give their attempts any considerable value or interest (see Kautsky, "Communism in Central Europe at the Time of the Reformation", London, 1897).

The Labadists, a religious sect with communistic features, founded a community in Westphalia, in 1672, under the leadership of Jean de la Badie, an apostate priest. A few years later about one hundred members of the sect established a colony in Northern Maryland, but within half a century both communities ceased to exist.

The Ephrata (Pennsylvania) Community was founded in 1732, and contained at one time 300 members, but in 1900 numbered only 17.

The Shakers adopted a socialistic form of organization at Watervliet, New York, in 1776. At their most prosperous period their various societies comprised about 5000 persons; to-day (1911) they do not exceed 1000.

The Harmonists, or Rappists, were established in Pennsylvania in 1805. Their maximum membership was 1000; in 1900 they numbered 9. Connected with this society is the Bethel Community, which was founded (1844) in Missouri by a group which included some seceders from Harmony. In 1855 the Bethel leader, Dr. Keil, organized another community at Aurora, Oregon. The combined membership of the two settlements never exceeded 1000 persons. Bethel dissolved in 1880 and Aurora in 1881.

The Separatists of Zoar (Ohio) were organized as a socialistic community in 1818, and dissolved in 1898. At one time they had 500 members.

The New Harmony Community, the greatest attempt ever made in this form of social organization, was founded in Indiana in 1824 by Robert Owen. Its maximum number of members was 900 and its length of life two years. Eighteen other communities formed by seceders from the New Harmony society were about equally short-lived. Other socialistic settlements that owed their foundation to the teachings of Owen were set up at Yellow Springs, Ohio; Nashoba, Tennessee (composed mostly of negroes); Haverstraw, New York; and Kendal, Oregon. None of them lasted more than two years.

The Hopedale (Massachusetts) Community was organized in 1842 by the Rev. Adin Ballou; it never had more than 175 members, and it came to an end in 1857.

The Brook Farm (Massachusetts) Community was established in 1842 by the Transcendentalist group of scholars and writers. In 1844 it was converted into a Fourierist phalanx; this, however, was dissolved in 1846.

Of the Fourieristic phalanges two had a very brief existence in France, and about thirty were organized in the United States between 1840 and 1850. Their aggregate membership was about 4500, and their longevity varied from a few months to twelve years. Aside from the one at Brook Farm, the most noteworthy were: the North American phalanx, founded in 1843 in New Jersey under the direction of Greeley, Brisbane, Channing, and other gifted men, and dissolved in 1855; the Wisconsin, or Cresco, phalanx, organized in 1844, and dispersed in 1850; and the Sylvania Association of Pennsylvania, which has the distinction of being the earliest Fourieristic experiment in the United States, though it lasted only eighteen months.

The Oneida (New York) Community, the members of which called themselves Perfectionists because they believed that all who followed their way of life could become perfect, became a communistic organization in 1848, and was converted into a joint-stock corporation in 1881. Its largest number of members was 300.

The first Icarian community was set up in Texas in 1848, and the last came to an end in 1895 in Iowa. Their most prosperous settlement, at Nauvoo, numbered more than 500 souls.

The Amana Community was organized on socialistic lines in 1843 near Buffalo, New York, but moved to Amana, Iowa, in 1845. It is the one communistic settlement that has increased steadily, though not rapidly, in wealth and numbers. Its members rightly attribute this fact to its religious character and motive. The community embraces about 1800 persons.

A unique community is the Woman's Commonwealth, established about 1875 near Belton, Texas, and transferred to Mount Pleasant, D. C., in 1898. It was organized by women who from motives of religion and conscience had separated themselves from their husbands. As the members number less than thirty and are mostly those who instituted the community more than thirty-five years ago, the experiment cannot last many years longer.

The most important of recently founded communities was the Ruskin Co-operative Colony, organized in 1894 in Tennessee by J. A. Wayland, editor of the socialist paper, "The Coming Nation". While the capital of the community was collectively owned, its products were distributed among the members in the form of wages. Owing to dissensions and withdrawals, the colony was reorganized on a new site in 1896, but it also was soon dissolved. About 250 of the colonists moved to Georgia, and set up another community, but this in a few years ceased to exist.

A number of other communities have been formed within recent years, most of which permit private ownership of consumption-goods and private family life. As none of them has become strong either in numbers or in wealth, and as all of them seem destined to an early death, they will receive only the briefest mention here. Those worthy of any notice are: The Christian Commonwealth of Georgia, organized in 1896, and dissolved in 1900; the Co-operative Brotherhood, of Burley, Washington; the Straight Edge Industrial Settlement, of New York City; the Home Colony in the State of Washington, which has the distinction of being the only anarchist colony; the Mutual Home Association, located in the same state; the Topolambo Colony in Mexico, which lasted but a few months; and the Fairhope (Alabama) Single-Tax Corporation, which has had a fair measure of success, but which is neither socialistic nor communistic in the proper sense.

Reviewing the history of socialistic experiments, we perceive that only those that were avowedly and strongly religious, adopting a socialistic organization as incidental to their religious purposes, have achieved even temporary and partial success. Practically speaking, only two of these religious communities remain; of these the Shakers are growing steadily weaker, while the Amana Society is almost stationary, and, besides, is obliged to carry on some of its industries with the aid of outside hired labor.

John A. Ryan.

Societies, Catholic.—Catholic societies are very numerous throughout the world; some are international in scope, some are national; some diocesan and others parochial. These are treated in particular under their respective titles throughout the Encyclopedia, or else under the countries or the dioceses in which they exist. This article is concerned only with Catholic societies in general. The right of association is one of the natural rights of man. It is not surprising, therefore, that from earliest antiquity societies of the most diverse kinds should have been formed. In pagan Rome the Church was able to carry on its work and elude the persecuting laws, only under the guise of a private corporation or society. When it became free it encouraged the association of its children in various guilds and fraternities, that they might more easily, while remaining subject to the general supervision of ecclesiastical authority, obtain some special good for their souls or bodies or both simultaneously. By a society we understand the voluntary and durable association of a number of persons who pledge themselves to work together to obtain some special end. Of such societies there is a great variety in the Church both for laymen and clerics, the most perfect species of the latter being the regular orders and religious congregations bound by perpetual vows. As to societies of laymen, we may distinguish broadly three classes: (a) confraternities, which are associations of the faithful canonically erected by the proper ecclesiastical superior to promote a Christian method of life by special works of piety towards God, e. g. the splendour of divine worship, or towards one's neighbour, e. g. the spiritual or corporal works of mercy (see Confraternity); (b) pious associations, whose objects are generally the same as those of confraternities, but which are not canonically erected (see Associations, Pious); and (c) societies whose members are Catholics, but which are not in the strict sense of the word religious societies. Some of these associations are ecclesiastical corporations in the strict acceptation of the term, while others are merely subordinate and dependent parts of the parish or diocesan organization, or only remotely connected with it. Church corporations, inasmuch as they are moral or legal persons, have the right, according to canon law, of making by-laws for their association by the suffrage of the members, of electing their own officers, of controlling their property within the limits of the canons, and of making provision, according to their own judgment, for their preservation and growth. They have, consequently, certain defined rights, both original or those derived from their constitution, and adventitious or what they have acquired by privilege or concession. Among original rights of all ecclesiastical corporations are the right of exclusion or the expelling of members; of selection or the adoption of new members; of convention or meeting for debate and counsel; of assistance or aiding their associates who suffer from a violation of their corporate rights. Societies of this nature have an existence independent of the individual members and can be dissolved only by ecclesiastical decree. Catholic societies which are not church corporations may be founded and dissolved at the will of their members. Sometimes they are approved, or technically praised, by ecclesiastical authority, but they are also frequently formed without any intervention of the hierarchy. In general, it may be said that Catholic societies of any description are very desirable.

The Church has always watched with singular care over the various organizations formed by the faithful for the promotion of any good work, and the popes have enriched them with indulgences. No hard and fast rules have been made, however, as to the method of government. Some societies, e. g. the Propagation of the Faith and the Holy Childhood, are general in their scope; others, e. g. the Church Extension Society of the United States, are peculiar to one country. It sometimes happens that an association formed for one country penetrates into another, e. g. the Piusverein, the Society of Christian Mothers, etc. There are also societies instituted to provide for some special need, as an altar or tabernacle society, or for the furthering of some special devotion, as the Holy Name Society. For societies which are general in their scope, the Holy See frequently appoints a cardinal protector and reserves the choice of the president to itself. This is likewise done as a mark of special favour to some societies which are only national, as the Church Extension Society of the United States (Brief of Pius X, 9 June, 1910). In general, it may be affirmed that it is the special duty of the bishop and the parish priest to found or promote such societies as the faithful of their districts may be in need of. Utility and necessity often vary with the circumstances of time and country. In some lands it has been found possible and advisable for the Church authorities to form Catholic societies of workingmen. These are trades-unions under ecclesiastical auspices and recall the old Catholic guilds of the Middle Ages. Zealous bishops and priests have made the promotion of such societies, as in Germany and Belgium, a special work, in the hope of preventing Catholic workingmen from being allured by temporal gain into atheistic societies in which the foundations of civil and religious institutions are attacked. In these unions a priest appointed by the bishop gives religious instructions which are particularly directed against the impious arguments of those who seek to destroy the morals and faith of the workingman. Methods are pointed out for regulating the family life according to the laws of God; temperance, frugality, and submission to lawful authority are urged, and frequentation of the sacraments insisted on. These unions also provide innocent amusements for their members. Such societies at times add confraternity and sodality features to their organization.

There are a number of societies formed by Catholics which are not in a strict sense Catholic societies. Nevertheless, as the individual faithful are subject to the authority of the bishop they remain subject to the same authority even as members of an organization. It is true that the bishop may not, in consequence of his ecclesiastical jurisdiction, rule such societies in the same sense as he does confraternities and pious associations, yet he retains the inalienable right and even the obligation of preventing the faithful from being led into spiritual ruin through societies of whatsoever name or purpose. He can, therefore, if convinced that an organization is harmful, forbid it to assist at church services in its regalia, and, when no emendation results, warn individuals against entering it or remaining members of it. Finally, there are societies which are entirely secular, whose sole purpose is to promote or obtain some commercial, domestic, or political advantage, such as the ordinary trades-unions. In such organizations men of every variety of religious belief combine together, and many Catholics are found among the members. There can be no objection to such societies as long as the end intended and the means employed are licit and honourable. It remains, however, the duty of the bishops to see that members of their flock suffer no diminution of faith or contamination of morals from such organizations. Experience has proved that secular societies, while perfectly unobjectionable in their avowed ends, may cause grave spiritual danger to their members. Bishops and parish priests can not be blamed, therefore, if they display some anxiety as to membership in societies which are not avowedly Catholic. If they did otherwise, they would be false to their duty towards their flock. It may be well to quote here the weighty words of an Instruction of the Holy Office (10 May, 1884): "Concerning artisans and labourers, among whom various societies are especially desirous of securing members that they may destroy the very foundations of religion and society, let the bishops place before their eyes the ancient guilds of workingmen, which, under the protection of some patron saint, were an ornament of the commonwealth and an aid to the higher and lower arts. They will again found such societies for men of commercial and literary pursuits, in which the exercises of religion will go hand in hand with the benevolent aims that seek to assuage the ills of sickness, old age, or poverty. Those who preside over such societies should see that the members commend themselves by the probity of their morals, the excellence of their work, the docility and assiduity of their labours, so that they may more securely provide for their sustenance. Let the bishops themselves not refuse to watch over such societies, suggest or approve by-laws, conciliate employers, and give every assistance and patronage that lie in their power."

There are many societies of Catholics or societies of which Catholics are members that employ methods which seem imitations derived from various organizations prohibited by the Church. It may be well, therefore, to state that no Catholic is allowed, as a member of any society whatever, to take an oath of blind and unlimited obedience; or promise secrecy of such a nature that, if circumstances require it, he may not reveal certain things to the lawful ecclesiastical or civil authorities; or join in a ritual which would be equivalent to sectarian worship (see SOCIETIES, SECRET). Even when a society is founded by Catholics or is constituted principally of Catholics, it is possible for it to degenerate into a harmful organization and call for the intervention of the authority of the Church. Such was the fate of the once brilliant and meritorious French society "Le Sillon", which was condemned by Pius X (25 Aug., 1910). It is often expedient for Catholic societies to be incorporated by the civil authority as private corporations. In fact, this is necessary if they wish to possess property or receive bequests in their own name. In some countries, as Russia, such incorporation is almost impossible; in others, as Germany and France, the Government makes many restrictions; but in English-speaking countries there is no difficulty. In England societies may be incorporated not only by special legal act, but also by common law or by prescription. In the United States a body corporate may be formed only by following the plan proposed by a law of Congress or a statute of a state legislature. The procedure varies slightly in different states, but as a rule incorporation is effected by filing a paper in the office of the secretary of state or with a circuit judge, stating the object and methods of the society. Three incorporators are sufficient, and the petition will always be granted if the purposes of the association are not inconsistent with the laws of the United States or of the particular state in question.

WILLIAM H. W. FANNING.

Societies, CATHOLIC, AMERICAN FEDERATION OF, an organization of the Catholic laity, parishes, and societies under the guidance of the hierarchy, to protect and advance their religious, civil, and social interests. It does not destroy the autonomy of any society or interfere with its activities, but seeks to unite all of them for purposes of co-operation and economy of forces. It is not a political organization, neither does it ask any privileges or favours for Catholics. The principal object of the Federation is to encourage (1) the Christian education of youth; (2) the correction of error and exposure of falsehood and injustice; the destruction of bigotry; the placing of Catholics and the Church in their true light, thus removing the obstacles that have hitherto impeded their progress; (3) the infusion of Christian principles into public and social life, by combatting the errors threatening to undermine the foundations of civil society, notably socialism, divorce, dishonesty in business, and corruption in politics and positions of public trust. The first organization to inaugurate the movement for a concerted action of the societies of Catholic laymen was the Knights of St. John. At their annual meeting held at Cleveland in 1899 they resolved to unite the efforts of their local commanderies. In 1900 at Philadelphia they discussed the question of a federation of all the Catholic societies. As a result a convention was held on 10 Dec., 1901, at Cincinnati, under the presidency of Mr. H. J. Fries. Two hundred and fifty delegates were present under the guidance of Bishop McFaul of Trenton, Bishop Messmer of Green Bay, now Archbishop of Milwaukee, the principal factors in the organization of the movement, Archbishop Elder of Cincinnati, Bishop Horstmann of Cleveland, and Bishop Maes of Covington. A charter bond was framed and the Federation formally established, with Mr. T. B. Minahan as its first president. Since then annual conventions have been held. The Federation represents close to two million Catholics. It has been approved by Popes Leo XIII and Pius X, and practically all the hierarchy of the country. The fruits of the labours of the organization have been manifold; among other things it has helped to obtain a fair settlement of the disputes concerning the church property in the Philippines, permission for the celebration of Mass in the navy-yards, prisons, reform schools; assistance for the Catholic Indian schools and negro missions; the withdrawal and prohibition of indecent plays and post-cards. It has prevented the enactment of laws inimical to Catholic interests in several state legislatures. One of its chief works has been the uniting of the Catholics of different nationalities, and harmonizing their efforts for self-protection and improvement. It publishes a monthly Bulletin, which contains valuable social studies. The national secretary is Mr. Anthony Matré, Victoria Building, St. Louis, Missouri.

A. A. MACERLEAN.

Societies, SECRET, a designation of which the exact meaning has varied at different times. I. DEFINITION.—"By a secret society was formerly meant a society which was known to exist, but whose members and places of meetings were not publicly known. To-day, we understand by a secret society, a society with secrets, having a ritual demanding an oath of allegiance and secrecy, prescribing ceremonies of a religious character, such as the use of the Bible, either by extracts therefrom, or by its being placed on an altar within a lodge-room, by the use of prayers, of hymns, of religious signs and symbols, special funeral services, etc." (Rosen, "The Catholic Church and Secret Societies", p. 2). Raich gives a more elaborate description: "Secret societies are those organizations which completely conceal their rules, corporate activity, the names of their members, their signs, passwords and usages from outsiders or the 'profane'. As a rule, the members of these societies are bound to the strictest secrecy concerning all the business of the association by oath or promise or word of honour, and often under the threat of severe punishment in case of its violation. If such secret society has higher and lower degrees, the members of the higher degree must be equally careful to conceal their secrets from their brethren of a lower degree. In certain secret societies, the members are not allowed to know even the names of their highest officers. Secret societies were founded to promote certain ideal aims, to be obtained not by violent but by moral measures. By this, they are distingushed from conspiracies and secret plots which are formed to attain a particular object through violent means. Secret societies may be religious, scientific, political or social" (Kirchenlex., V, p. 519). Narrowing the definition still more to the technical meaning of secret societies (*societates clandestinæ*) in ecclesiastical documents, Archbishop Katzer in a Pastoral (20 Jan., 1895) says: "The Catholic Church has declared that she considers those societies illicit and forbidden which (1) unite their members for the purpose of conspiring against the State or Church; (2) demand the observance of secrecy to such an extent that it must be maintained even before the rightful ecclesiastical authority; (3) exact an oath from their members or a promise of blind and absolute obedience; (4) make use of a ritual and ceremonies that constitute them sects."

II. ORIGIN.—Though secret societies, in the modern and technical sense, did not exist in antiquity, yet there were various organizations which boasted an esoteric doctrine known only to their members, and carefully concealed from the profane. Some date societies of this kind back to Pythagoras (582–507 B. C.). The Eleusinian Mysteries, the secret teachings of Egyptian and Druid hierarchies, the esoteric doctrines of the Magian and Mithraic worshippers furnished material for such secret organizations. In Christian times, such heresies as the Gnostic and Manichæan also claimed to possess a knowledge known only to the illuminated and not to be shared with the vulgar. Likewise, the enemies of the religious order of Knights Templars maintained that the brothers of the Temple, while externally professing Christianity, were in reality pagans who veiled their impiety under orthodox terms to which an entirely different meaning was given by the initiated. Originally, the various guilds of the Middle Ages were in no sense secret societies in the modern acceptation of the term, though some have supposed that symbolic Freemasonry was gradually developed in those organizations. The fantastic Rosicrucians are credited with something of the nature of a modern secret society, but the association, if such it was, can scarcely be said to have emerged into the clear light of history.

III. MODERN ORGANIZATIONS.—Secret societies in the true sense began with symbolic Freemasonry about the year 1717 in London (see MASONRY). This widespread oath-bound association soon became the exemplar or the parent of numerous other fraternities, nearly all of which have some connexion with Freemasonry, and in almost every instance were founded by Masons. Among these may be mentioned the Illuminati, the Carbonari, the Odd-Fellows, the Knights of Pythias, the Sons of Temperance and similar societies whose number is legion. Based on the same principles as the secret order to which they are affiliated are the women-auxiliary lodges, of which almost every secret society has at least one. These secret societies for women have also their rituals, their oaths, and their degrees. Institutions of learning are also infected with the glamour of secret organizations and the "Eleusis" of Chi Omega (Fayetteville, Ark.) of 1 June, 1900, states that there are twenty-four Greek letter societies with seven hundred and sixty-eight branches for male students, and eight similar societies with one hundred and twenty branches for female students, and a total membership of 142,456 in the higher institutions of learning in the United States.

IV. ATTITUDE OF ECCLESIASTICAL AUTHORITIES.—The judgment of the Church on secret oath-bound associations has been made abundantly clear by papal documents. Freemasonry was condemned by Clement XII in a Constitution, dated 28 April, 1738. The pope insists on the objectionable character of societies that commit men of all or no religion to a system of mere natural righteousness, that seek their end by binding their votaries to secret pacts by strict oaths, often under penalties of the severest character, and that plot against the tranquillity of the State. Benedict XIV renewed the condemnation of his predecessor on 18 May, 1751. The Carbonari were declared a prohibited society by Pius VII in a Constitution dated 13 Sept., 1821, and he made it manifest that organizations similar to Freemasonry involve an equal condemnation. The Apostolic Constitution "Quo Graviora" of Leo XII (18 March, 1825) put together the acts and decrees of former pontiffs on the subject of secret societies and ratified and confirmed them. The dangerous character and tendencies of secret organizations among students did not escape the vigilance of the Holy See, and Pius VIII (24 May, 1829) raised his warning voice concerning those in colleges and academies, as his predecessor, Leo XII, had done in the matter of universities. The succeeding popes, Gregory XVI (15 Aug., 1832) and Pius IX (9 Nov., 1846; 20 Apr., 1849; 9 Dec., 1854; 8 Dec., 1864; 25 Sept., 1865), continued to warn the faithful against secret societies and to renew the ban of the Church on their designs and members. On 20 Apr., 1884, appeared the famous Encyclical of Leo XIII, "Humanum Genus". In it the pontiff says: "As soon as the constitution and spirit of the masonic sect were clearly discovered by manifest signs of its action, by cases investigated, by the publication of its laws and of its rites and commentaries, with the addition often of the personal testimony of those who were in the secret, the Apostolic See denounced the sect of the Freemasons and publicly declared its constitution, as contrary to law and right, to be pernicious no less to Christendom than to the State; and it forbade anyone to enter the society, under the penalties which the Church is wont to inflict upon exceptionally guilty persons. The sectaries, indignant at this, thinking to elude or to weaken the force of these decrees, partly by contempt of them and partly by calumny, accused the Sovereign Pontiffs who had uttered them, either of exceeding the bounds of moderation or of decreeing what was not just. This was the manner in which they endeavoured to elude the authority and weight of the Apostolic Constitutions of Clement XII and Benedict XIV, as well as of Pius VIII and Pius IX. Yet in the very society itself, there were found men who unwillingly acknowledged that the Roman Pontiffs had acted within their right, according to the Catholic doctrine and discipline. The pontiffs received the same assent, and in strong terms, from many princes and heads of governments, who made it their business either to delate the masonic society to the Holy See, or of their own accord by special enactments to brand it as pernicious, as for example in Holland, Austria, Switzerland, Spain, Bavaria, Savoy and other parts of Italy. But, what is of the highest importance, the course of events has demonstrated the prudence of our predecessors". Leo XIII makes it clear that it is not only the society explicitly called Masonic that is objectionable: "There are several organized bodies which, though they differ in name, in ceremonial, in form and origin, are nevertheless so bound together by community of purpose and by the similarity of their main opinions as to make in fact one thing with the sect of the Freemasons, which is a kind of centre whence they all go forth and whither they all return. Now, these no longer show a desire to remain concealed; for they hold their meetings in the daylight and before the public eye, and publish their own newspaper organs; and yet, when thoroughly understood, they are found still to retain the nature and the habits of secret societies." The pope is not unmindful of the professed benevolent aims of these societies: "They speak of their zeal for a more cultured refinement and of their love of the poor; and they declare their one wish to be the amelioration of the condition of the masses, and to share with the largest possible number all the benefits of civil life. Even were these purposes aimed at in real truth, yet they are by no means the whole of their object. Moreover, to be enrolled, it is necessary that candidates promise and undertake to be thenceforward strictly obedient to their leaders and masters with the utmost submission and fidelity, and to be in readiness to do their bidding upon the slightest expression of their will." The pontiff then points out the dire consequences which result from the fact that these societies substitute Naturalism for the Church of Christ and inculcate, at the very least, indifferentism in matters of religion. Other papal utterances on secret societies are: "Ad Apostolici", 15 Oct., 1890; "Præclara", 20 June, 1894; "Annum Ingressi", 18 Mar., 1902.

V. The Societies Forbidden.—The extension of the decrees of the Apostolic See in regard to societies hitherto forbidden under censure is summed up in the well-known Constitution "Apostolicæ Sedis" of Pius IX, where excommunication is pronounced against those "who give their names to the sect of the Masons or Carbonari or any other sects of the same nature, which conspire against the Church or lawfully constituted Governments, either openly or covertly, as well as those who favor in any manner these sects or who do not denounce their leaders and chiefs". The condemned societies here described are associations formed to antagonize the Church or the lawful civil power. A society to be of the same kind as the Masonic, must also be a secret organization. It is of no consequence whether the society demand an oath to observe its secrets or not. It is plain also that public and avowed attacks on Church or State are quite compatible with a secret organization. It must not be supposed, however, that only societies which fall directly under the formal censure of the Church are prohibited. The Congregation of the Holy Office issued an instruction on 10 May, 1884, in which it says: "That there may be no possibility of error when there is question of judging which of these pernicious societies fall under censure or mere prohibition, it is certain, in the first place, that the Masonic and other sects of the same nature are excommunicated, whether they exact or do not exact an oath from their members to observe secrecy. Besides these, there are other prohibited societies, to be avoided under grave sin, among which are especially to be noted those which under oath, communicate a secret to their members to be concealed from everybody else, and which demand absolute obedience to unknown leaders". To the secret societies condemned by name, the Congregation of the Holy Office, on 20 Aug., 1894, in a Decree addressed to the hierarchy of the United States, added the Odd-Fellows, the Sons of Temperance, and the Knights of Pythias.

VI. Recently Condemned Societies.—The order of Odd-Fellows was formed in England in 1812 as a completed organization, though some lodges date back to 1745; and it was introduced into America in 1819. In the "Odd-Fellows' Improved Pocket Manual" the author writes: "Our institution has instinctively, as it were, copied after all secret associations of religious and moral character". The "North-West Odd-Fellow Review" (May, 1895) declares: "No home can be an ideal one unless the principles of our good and glorious Order are represented therein, and its teachings made the rule of life". In the "New Odd-Fellows' Manual" (N. Y., 1895) the author says: "The written as well as the unwritten secret work of the Order, I have sacredly kept unrevealed", though the book is dedicated "to all inquirers who desire to know what Odd-Fellowship really is". This book tells us "Odd-Fellowship was founded on great religious principles" (p. 348); "we use forms of worship" (p. 364); "Judaism, Christianity, Mohammedanism recognize the only living and true God" (p. 297). The Odd-Fellows have chaplains, altars, high-priests, ritual, order of worship, and funeral ceremonies. The order of the Sons of Temperance was founded in New York in 1842 and introduced into England in 1846. The "Cyclopædia of Fraternities" says (p. 409): "The Sons of Temperance took the lead in England in demonstrating the propriety and practicability of both men and women mingling in secret society lodges". That the object of this order and its kindred societies is not confined to temperance "is evidenced by its mode of initiation, the form of the obligation and the manner of religious worship" (Rosen, p. 162). The order of the Knights of Pythias was founded in 1864 by prominent Freemasons (Cyclop. of Fraternities, p. 263). In number, its membership is second only to that of the Odd-Fellows. Rosen (The Catholic Church and Secret Societies) says: "The principal objectionable features, on account of which the Catholic Church has forbidden its members to join the Knights of Pythias, and demanded a withdrawal of those who joined it, are: First, the oath of secrecy by which the member binds himself to keep secret whatever concerns the doings of the Order, even from those in Church and State who have a right to know, under certain conditions, what their subjects are doing. Secondly, this oath binds the member to blind obedience, which is symbolized by a test. Such an obedience is against the law of man's nature, and against all divine and human law. Thirdly, Christ is not the teacher and model in the rule of life, but the pagan Pythagoras and the pagans Damon, Pythias and Dionysius" (p. 160). The "Ritual for the subordinate Lodges of the Knights of Pythias" (Chicago, 1906) shows that this organization has oaths, degrees, prelates, and a ritual that contains religious worship. The decree of the Holy Office concerning the Odd-Fellows, Sons of Temperance, and Knights of Pythias, though not declaring them to be condemned under censure, says: "The bishops must endeavour by all means to keep the faithful from joining all and each of the three aforesaid societies; and warn the faithful against them, and if, after proper monition, they still determine to be members of these societies, or do not effectually separate themselves from them, they are to be forbidden the reception of the sacraments." A decree of 18 Jan., 1896, allows a nominal membership in these three societies, if in the judgment of the Apostolic delegate, four conditions are fulfilled: that the society was entered in good faith, that there be no scandal, that grave temporal injury would result from withdrawal, and that there be no danger of perversion. The delegate, in granting a dispensation, usually requires a promise that the person will not attend any meetings or frequent the lodge-rooms, that the dues be sent in by mail or by a third party, and that in case of death the society will have nothing to do with the funeral.

VII. Orders of Women.—In regard to female secret societies, the Apostolic delegation at Washington, 2 Aug., 1907, declared (Ans. no. 15,352–C): "If these societies are affiliated to societies already nominally condemned by the Church, they fall under the same condemnation, for they form, as it were, a branch of such societies. As regards other female secret societies which may not be affiliated with societies condemned expressly by the Church, the confessor must, in cases of members belonging to such societies, apply the principles of moral theology which treat of secret societies in general." The document adds that members of female secret societies affiliated to the three societies condemned in 1894 will be dealt with by the Apostolic delegate in the same manner as male members when the necessary conditions are fulfilled.

VIII. Trades Unions.—The Third Council of Baltimore (no. 253) declares: "We see no reason why the prohibition of the Church against the Masonic and other secret societies should be extended to organizations of workingmen, which have no other object in view than mutual protection and aid for their members in the practice of their trades. Care must be taken, however, that nothing be admitted under any pretext which favors condemned societies; or that the workingmen who belong to these organizations be induced, by the cunning arts of wicked men, to withhold, contrary to the laws of justice, the labor due from them, or in any other manner violate the rights of their employers. Those associations are also entirely illicit, in which the members are so bound for mutual defense that danger of riots and murders is the outcome."

IX. Method of Condemnation.—Finally, in regard to the condemnation of individual societies in the United States, the council says (no. 255): "To avoid confusion of discipline which ensues, to the great scandal of the faithful and the detriment of ecclesiastical authority, when the same society is condemned in one diocese and tolerated in another, we desire that no society be condemned by name as falling under one of the classes [of forbidden societies] before the Ordinary has brought the matter before a commission which we now constitute for judging such cases, and which will consist of all the archbishops of these provinces. If it be not plain to all that a society is to be condemned, recourse must be had to the Holy See in order that a definite judgment be obtained and that uniform discipline may be preserved in these provinces".

William H. W. Fanning.

Society implies fellowship, company, and has always been conceived as signifying a human relation, and not a herding of sheep, a hiving of bees, or a mating of wild animals. The accepted definition of a society is a stable union of a plurality of persons cooperating for a common purpose of benefit to all. The fulness of co-operation involved naturally extends to all the activities of the mind, will, and external faculties, commensurate with the common purpose and the bond of union: this alone presents an adequate, human working-together.

This definition is as old as the Schoolmen, and embodies the historical concept as definitized by cogent reasoning. Under such reasoning it has become the essential idea of society and remains so still, notwithstanding the perversion of philosophical terms consequent upon later confusion of man with beast, stock, and stone. It is a priori only as far as chastened by restrictions put upon it by the necessities of known truth, and is a departure from the inductive method in vogue to-day only so far as to exclude rigidly the aberrations of uncivilized tribes and degenerate races from the requirements of reason and basic truth. Historical induction taken alone, while investigating efficient causes of society, may yet miss its essential idea, and is in peril of including irrational abuse with rational action and development.

The first obvious requisite in all society is authority. Without this there can be no secure co-ordination of effort nor permanency of co-operation. No secure co-ordination, for men's judgment will differ on the relative value of means for the common purpose, men's choice will vary on means of like value; and unless there is some headship, confusion will result. No permanence of co-operation, for the best of men relax in their initial resolutions, and to hold them at a coordinate task, a tight rein and a steady spur is needed. In fact, reluctant though man is to surrender the smallest tittle of independence and submit in the slightest his freedom to the bidding of another, there never has been in the history of the world a successful, nor even a serious attempt at co-operative effort without authoritative guidance (see Authority, Civil). Starting with this definition and requirement, philosophy finds itself confronted with two kinds of society, the artificial or conventional, and the natural; and on pursuing the subject, finds the latter differentiating itself into domestic society, or the family, civil society, or the State, and religious society, or the Church. Each of these has a special treatment under other headings (see Family; State and Church). Here, however, we shall state the philosophic basis of each, and add thereto the theories which have had a vogue for the last three centuries, though breaking down now under the strain of modern problems before the bar of calm judgment.

Conventional Societies.—The plurality of persons, the community of aim, the stability of bond, authority, and some co-operation of effort being elements common to every form of society, the differentiation must come from differences in the character of the purpose, in the nature of the bond. Qualifications of authority as well as modifications in details of requisite co-operation will follow on changes in the purpose and the extent of the bond. As many, then, as there are objects of human desire attainable by common effort (and their name is legion, from the making of money, which is perhaps the commonest to-day, to the rendering of public worship to our Maker which is surely the most sacred), so manifold are the co-operative associations of men. The character, as well as the existence of most of them, is left in full freedom to human choice. These may be denominated conventional societies. Man is under no precept to establish them, nor in universal need of them. He makes or unmakes them at his pleasure. They serve a passing purpose, and in setting them up men give them the exact character which they judge at present suitable for their purpose, determining as they see fit the limits of authority, the choice of means, the extent of the bond holding them together, as well as their own individual reservations. Everything about such a society is of free election, barring the fact that the essential requisites of a society must be there. We find this type exemplified in a reading circle, a business partnership, or a private charitable organization. Of course, in establishing such a society men are under the Natural Law of right and wrong, and there can be no moral bond, for example, where the common purpose is immoral. They also fall under the restrictions of the civil law, when the existence or action of such an organization comes to have a bearing, whether of promise or of menace, upon the common weal. In such case the State lays down its essential requirements for the formation of such bodies, and so we come to have what is known as a legal society, a society, namely, freely established under the sanction and according to the requirements of the civil law. Such are mercantile corporations and beneficial organizations with civil charter.

Natural Societies.—Standing apart from the foregoing in a class by themselves are the family, the State, and the Church. That these differ from all other societies in purpose and means, is clear and universally admitted. That they have a general application to the whole human race, history declares. That there is a difference between the bond holding them in existence and the bond of union in every other society, has been disputed—with more enthusiasm and imagination, however, than logical force. The logical view of the matter brings us to the concept of a natural society, a society, that is to say, which men are in general under a mandate of the natural law to establish, a society by consequence whose essential requisites are firmly fixed by the same natural law To get at this is simple enough, if the philosophical problems are taken up in due order. Ethics may not be divided from psychology and theodicy, any more than from deductive logic. With the proper premisals then from one and the other here assumed, we say that the Creator could not have given man a fixed nature, as He has, without willing man to work out the purpose for which that nature is framed. He cannot act idly and without purpose, cannot form His creature discordantly with the purpose of His will. He cannot multiply men on the face of the earth without a plan for working out the destiny of mankind at large. This plan must contain all the elements necessary to His purpose, and these necessary details He must have willed man freely to accomplish, that is to say, He must have put upon man a strict obligation thereunto. Other details may be alternatives, or helpful but not necessary, and these He has left to man's free choice; though where one of these elements would of its nature be far more helpful than another, God's counsel to man will be in favour of the former. God's will directing man through his nature to his share in the full purpose of the cosmic plan, we know as the natural law, containing precept, permission, and counsel, according to the necessity, helpfulness, or extraordinary value of an action to the achievement of the Divine purpose. We recognize these in the concrete by a rational study of the essential characteristics of human nature and its relations with the rest of the universe. If we find a natural aptitude in man for an action, not at variance with the general purpose of things, we recognize also the licence of the natural law to that action. If we find a more urgent natural propensity to it, we recognize further the counsel of the law. If we find the use of a natural faculty, the following up of a natural propensity, inseparable from the rational fulfilment of the ultimate destiny of the individual or of the human race, we know that thereon lies a mandate of the natural law, obliging the conscience of man. We must not, however, miss the difference, that if the need of the action or effort is for the individual natural destiny, the mandate lies on each human being severally: but if the need be for the natural destiny of the race, the precept does not descend to this or that particular individual, so long as the necessary bulk of men accomplish the detail so intended in the plan for the natural destiny of the race. This is abstract reasoning, but necessary for the understanding of a natural society in the fulness of its idea.

A Society Natural by Mandate.—A society, then, is natural by mandate, when the law of nature sets the precept upon mankind to establish that society. The precept is recognized by the natural aptitude, propensity, and need in men for the establishment of such a union. From this point of view the gift of speech alone is sufficient to show man's aptitude for fellowship with his kind. It is emphasized by his manifold perfectibility through contact with others and through their permanent companionship. Furthermore his normal shrinking from solitude, from working out the problems of life alone, is evidence of a social propensity to which mankind has always yielded. If again we consider his dependence for existence and comfort on the multiplied products of co-ordinate human effort; and his dependence for the development of his physical, intellectual, and moral perfectibility on complex intercourse with others, we see a need, in view of man's ultimate destiny, that makes the actualization of man's capacity of organized social co-operation a stringent law upon mankind. Taking then the kinds of social organization universally existent among men, it is plain not only that they are the result of natural propensities, but that, as analysis shows, they are a human need and hence are prescribed in the code of the Natural Law.

A Society Natural in Essentials.—Furthermore, as we understand a legal contract to be one which, because of its abutment on common interests, the civil law hedges round with restrictions and reservations for their protection, similarly on examination we shall find that all agreements by which men enter into stable social union are fenced in with limitations set by the natural law guarding the essential interests of the good of mankind. When, moreover, we come to social unions prescribed for mankind by mandate of that law, we expect to find the purpose of the union set by the law (otherwise the law would not have prescribed the union), all the details morally necessary for the rational attainment of that purpose fixed by the law, and all obstacles threatening sure defeat to that purpose, proscribed by the same. A natural society, then, besides being natural by mandate, will also be natural in all its essentials, for as much as these too shall be determined and ordained by the law.

The Family a Natural Society.—Working along these lines upon the data given by experience, personal as well as through the proxy of history, the philosopher finds in man's nature, considered physiologically and psychologically, the aptitude, propensity, and, both as a general thing and for mankind at large, the need of the matrimonial relation. Seeing the natural and needful purpose to which this relation shapes itself to be in full the mutually perfecting compensation of common life between man and woman, as well as the procreation and education of the child, and keeping in mind that Nature's Lawgiver has in view the rational development of the race (or human nature at large) as well as of the individual, we conclude not only to abiding rational love as its distinguishing characteristic, but to monogamy and a stability that is exclusive of absolute divorce. This gives us the essential requisites of domestic society, a stable union of man and wife bound together to work for a fixed common good to themselves and humanity. When this company is filled out with children and its incidental complement of household servants, we have domestic society in its fullness. It is created under mandate of the natural law, for though this or that individual may safely eschew matrimony for some good purpose, mankind may not. The individual in exception need not be concerned about the purpose of the Lawgiver, as human nature is so constituted that mankind will not fail of its fulfilment. The efficient cause of this domestic union in the concrete instance is the free consent of the initial couple, but the character of the juridical bond which they thus freely accept is determined for them by the natural law according to Nature's full purpose. Husband and wife may see to their personal benefit in choosing to establish a domestic community, but the interests of the child and of the future race are safeguarded by the law. The essential purpose of this society we have stated above. The essential requisite of authority takes on a divided character of partnership, because of the separate functions of husband and wife requiring authority as well as calling for harmonious agreement upon details of common interest: but the headship of final decision is put by the law, as a matter of ordinary course, in the man, as is shown by his natural characteristics marking him for the preference. The essential limitations forbid plural marriage, race-suicide, sexual excess, unnecessary separation, and absolute divorce.

The State a Natural Society.—On the same principle of human aptitude, propensity, and need for the individual and the race, we find the larger social unit of civil society manifested to us as part of the Divine set purpose with regard to human nature, and so under precept of the natural law. Again, the exceptional individual may take to solitude for some ennobling purpose; but he is an exception, and the bulk of mankind will not hesitate to fulfil Nature's bidding and accomplish Nature's purpose. In the concrete instance civil society, though morally incumbent on man to establish, still comes into existence by the exercise of his free activity. We have seen the same of domestic society, which begins by the mutual free consent of man and woman to the acceptance of the bond involving all the natural rights and duties of the permanent matrimonial relation. The beginning of civil society as an historical fact has taken on divers colours, far different at different times and places. It has arisen by peaceful expansion of a family into a widespread kindred eventually linked together in a civil union. It has sprung from the multiplication of independent families in the colonizing of undeveloped lands. It has come into being under the strong hand of conquest enforcing law, order, and civil organization, not always justly, upon a people. There have been rare instances of its birth through the tutoring efforts of the gentler type of civilizers, who came to spread the Gospel. But the juridical origin is not obviously identical with this. History alone exhibits only the manifold confluent causes which moved men into an organized civil unit. The juridical cause is quite another matter. This is the cause which of its character under the natural law puts the actual moral bond of civil union upon the many in the concrete, imposes the concrete obligation involving all the rights, duties, and powers native to a State, even as the mutual consent of the contracting parties creates the mutual bond of initial domestic society. This determinant has been under dispute among Catholic teachers.

The common view of Scholastic philosophy, so ably developed by Francis Suarez, S.J., sets it in the consent of the constituent members, whether given explicitly in the acceptance of a constitution, or tacitly by submitting to an organization of another's making, even if this consent be not given by immediate surrender, but by gradual process of slow and often reluctant acquiescence in the stability of a common union for the essential civil purpose. In the early fifties of the nineteenth century Luigi Taparelli, S.J., borrowing an idea from C. de Haller of Berne, brilliantly developed a theory of the juridical origin of civil government, which has dominated in the Italian Catholic schools even to the present day, as well as in Catholic schools in Europe, whose professors of ethics have been of Italian training. In this theory civil society has grown into being from the natural multiplication of cognate families, and the gradual extension of parental power. The patriarchal State is the primitive form, the normal type, though by accident of circumstance States may begin here or there from occupation of the same wide territory under feudal ownership; by organization consequent upon conquest; or in rarer instances by the common consent of independent colonial freeholders. These two Catholic views part company also in declaring the primitive juridical determinant of the concrete subject of supreme authority (see Authority, Civil). To-day the Catholic schools are divided between these two positions. We shall subjoin below other theories of the juridical origin of the State, which have no place in Catholic thought for the simple reason that they exclude the natural character of civil society and throw to the winds the principles logically inseparable from the existing natural law.

With regard to the essential elements in civil society fixed by the natural law, it is first to be noted that the normal unit is the family: for not only has the family come historically before the commonwealth, but the natural needs of man lead him first to that social combination, in pursuit of a natural result only to be obtained thereby; and it is logically only subsequent that the purpose of civil society comes into human life. Of course this does not mean that individuals actually outside of the surroundings of family life cannot be constituent members of civil society with full civic rights and duties, but they are not the primary unit; they are in the nature of things the exception, however numerous they may be, and beyond the family limit of perfectibility it is in the interest of complementary development that civil activity is exercised. The State cannot eliminate the family; neither can it rob it of its inalienable rights, nor bar the fulfilment of its inseparable duties, though it may restrict the exercise of certain family activities so as to co-ordinate them to the benefit of the body politic.

Secondly, the natural object pursued by man in his ultimate social activity is perfect temporal happiness, the satisfacton, to wit, of his natural faculties to the full power of their development within his capacity, on his way, of course, to eternal felicity beyond earth. Man's happiness cannot be handed over to him, or thrust upon him by another here on earth; for his nature supposes that his possession of it, and so too in large measure his achievement of it, shall be by the exercise of his native faculties. Hence, civil society is destined by the natural law to give him his opportunity, i. e. to give it to all who share its citizenship. This shows the proximate natural purpose of the State to be: first, to establish and preserve social order, a condition, namely, wherein every man, as far as may be, is secured in the possession and free exercise of all his rights, natural and legal, and is held up to the fulfilment of his duties as far as they bear upon the common weal; secondly, to put within reasonable reach of all citizens a fair allowance of the means of temporal happiness. This is what is known as external peace and prosperity, prosperity being also denominated the relatively perfect sufficiency of life. There are misconceptions enough about the generic purpose native to all civil society. De Haller thought that there is none such; that civil purposes are all specific, peculiar to each specific State. Kant limited it to external peace. The Manchester School did the same, leaving the citizen to work out his subsistence and development as best he may. The Evolutionist consistently makes it the survival of the fittest, on the way to developing a better type. The modern peril is to treat the citizen merely as an industrial unit, mistaking national material progress for the goal of civic energy; or as a military unit, looking to self-preservation as the nation's first if not only aim. Neither material progress nor martial power, nor merely intellectual civilization, can fill the requirements of existing and expanding human nature. The State, while protecting a man's rights, must put him in the way of opportunity for developing his entire nature, physical, mental, and moral.

Thirdly, the accomplishment of this calls for an authority which the Lawgiver of Nature, because he has ordained this society, has put within the competency of the State, and which, because of its reach, extending as it does to life and death, to reluctant subjects and to the posterity of its citizenship, surpasses the capacity of its citizenship to create out of any mere conventional surrender of natural rights. The question of the origin of civil power and its concentration in this or that subject is like the origin of society itself, a topic of debate. Catholic philosophy is agreed that it is conferred by Nature's Lawgiver directly upon the social depositary thereof, as parental supremacy is upon the father of a family. But the determination of the depositary is another matter. The doctrine of Suarez makes the community itself the depositary, immediately and naturally consequent upon its establishment of civil society, to be disposed of then by their consent, overt or tacit, at once or by degrees, according as they determine for themselves a form of government. This is the only true philosophical sense of the dictum that "governments derive their just powers from the consent of the governed". The Taparelli school makes the primitive determinant out of an existing prior right of another character, which passes naturally into this power. Primitively this is parental supremacy grown to patriarchal dimensions and resulting at the last in supreme civil power. Secondarily, it may arise from other rights, showing natural aptitude preferentially in one subject or another, as that of feudal ownership of the territory of the community, capacity to extricate order out of chaos in moments of civic confusion, military ability and success in case of just conquest, and, finally, in remote instances by the consent of the governed.

Finally, the means by which the commonwealth will work toward its ideal condition of the largest measure of peace and prosperity attainable are embraced in the just exercise, under direction of civil authority, of the physical, mental, and moral activities of the members of the community: and here the field of human endeavour is wide and expansive. However, the calls upon the individual by the governmental power are necessarily limited by the scope of the natural purpose of the State and by the inalienable prior rights and inseparable duties conferred or imposed upon the individual by the Natural Law.

RELIGIOUS SOCIETY *de facto* A SUPERNATURAL SOCIETY.—If we analyze the moral development of man, we find looming large his obligation to worship his Creator, not only privately, but publicly, not only as an individual, but in social union. This opens up another kind of society ordered by the natural law, to wit, religious society. An examination of this in the natural order and by force of reason alone would seem to show that man, though morally obliged to social worship, was morally free to establish a parallel organization for such worship or to merge its functions with those of the State, giving a double character to the enlarged society, namely, civil and religious. Historically, among those who knew not Divine revelation, men would seem to have been inclined more to the latter; but not always so. Of course, the purpose and means of this religious social duty are so related to those of a merely civil society that considerable care would have to be exercised in adjusting the balance of intersecting rights and duties, to define the relative domains of religious and civil authority, and, finally, to adjudicate supremacy in case of direct apparent conflict. The development of all this has been given an entirely different turn through the intervention of the Creator in His creation by positive law revealed to man, changing the natural status into a higher one, eliminating natural religious society, and at the last establishing through the mission of our Lord Jesus Christ an universal and unfailing religious society in the Church. This is a supernatural religious society. (See CHURCH.)

NON-CATHOLIC THEORIES.—Thomas Hobbes, starting from the assumption which Calvin had propagated that human nature is itself perverse and man essentially inept for consorting with his fellows, made the natural state of man to be one of universal and continuous warfare. This, of course, excludes the Maker of man from having destined him originally to society, since he would in Hobbes's view have given him a nature exactly the reverse of a proportioned means. Hobbes thought that he found in man such selfish rivalry, weak cowardice, and greed of self-glorification as to make him naturally prey upon his fellows and subdue them, if he could, to his wants, making might to be the only source of right. However, finding life intolerable (if not impossible) under such conditions, he resorted to a social pact with other men for the establishment of peace, and, as that was a prudent thing to do, man, adds Hobbes, was thus following the dictates of reason and in that sense the law of nature. On this basis Hobbes could and did make civil authority consist in nothing more than the sum of the physical might of the people massed in a chosen centre of force. This theory was developed in the "Leviathan" of Hobbes to account for the existence of civil authority and civil society, but its author left his reader to apply the same perversity of nature and exercise of physical force for the taking of a wife or wives and establishing domestic society.

Jean-Jacques Rousseau, though borrowing largely from Hobbes and fearlessly carrying some of his principles to their most extreme issue, had a view in part his own. As for the family, he was content to leave it as a natural institution, with a stability, however, commensurate only with the need of putting the offspring within reach of self-preservation. Not so for the State. Man naturally, he contended, was sylvan and solitary, a fine type of indolent animal, mating with his like and living in the pleasant ease of shady retreats by running waters. He was virtuous, sufficient to himself for his own needs, essentially free, leaving others alone in their freedom, and desirous of being left alone in his. His life was not to be disturbed by the fever of ambitious desires, the burden of ideas, or the restriction of moral laws. Unfortunately, he had a capacity and an itch for self-improvement, and his inventive genius, creating new conveniences, started new deeds, and, to meet these more readily, he entered into transitory agreements with other men. Then came differences, fraud, and quarrels, and so ended the tranquil ease and innocence of his native condition. Through sheer necessity of self-defence, as in the theory of Hobbes, he took to the establishment of civil society. To do so without loss of personal freedom, there was but one way, namely, that all the members should agree to merge all their rights, wills, and personalities in a unit moral person and will, leaving the subject member the satisfaction that he was obeying but his own will thus merged, and so in possession still of full liberty in every act. Thus civil authority was but the merger of all rights and wills in the one supreme right and will of the community. The merging agreement was Rousseau's "Social Contract". Unfortunately for its author, as he himself confessed, the condition of perfect, self-sufficient, lawless man was never seen on land or sea; and his social contract had no precedent in all the centuries of the history of man. His dream ignored man's inalienable rights, took no account of coercing wills that would not agree, nor of the unauthorized merging of the wills of posterity, and drained all the vitality as well out of authority as out of obedience. He left authority a power shorn of the requisites essential for the purpose of civil security.

The evolutionist, who has left the twisted turn of all his theories in much of the common language of the day, even after the theories themselves have died to all serious scientific acceptance, wished to make ethics a department of materialistic biology, and have the aggregate of human entities assemble by the same physical laws that mass cells into a living being. Man's native tendency to persist, pure egoism, made him shrink from the danger of destruction or injury at the hands of other individuals, and this timidity became a moving force driving him to compound with his peers into a unit source of strength without which he could not persist. From common life in this unit man's egoism began to take on a bit of altruism, and men acquired at the last a sense of the common good, which replaced their original timidity as the spring of merging activity. Later mutual sympathy put forth its tendrils, a sense of unity sprang up, and man had a civil society. Herein was latent the capacity for expressing the general will, which when developed became civil authority. This evolutionary process is still in motion toward the last stand foreseen by the theorist, a universal democracy clad in a federation of the world. All this has been seriously and solemnly presented to our consideration with a naïve absence of all sense of humour, with no suspicion that the human mind naturally refuses to confound the unchanging action of material attraction and repulsion with human choice; or to mistake the fruit of intellectual planning and execution for the fortuitous results of blind force. We are not cowards all, and have not fled to society from the sole promptings of fear, but from the natural desire we have of human development. Authority for mankind is not viewed as the necessary resultant of the necessary influx of all men's wills to one goal, but is recognized to be a power to loose and to bind in a moral sense the wills of innumerable freemen.

The neo-pagan theory, renewing the error of Plato and in a measure of Aristotle also, has made the individual and the family mere creatures and chattels of the State, and, pushing the error further, wishes to orientate all moral good and evil, all right and duty from the authority of the State, whose good as a national unit is paramount. This theory sets up the State as an idol for human worship and eventually, if the theory were acted upon, though its authors dream it not, for human destruction.

The historical school, mistaking what men have done for what men should do and, while often missing the full induction of the past, scornfully rejecting as empty apriorism deductive reasoning from the nature of man, presents a materialistic, evolutionary, and positivistic view of human society, which in no way appeals to sane reason. No more does the theory of Kant, as applied to society in the Hegelian development of it; though, owing to its intellectual character and appearance of ultimate analysis, it has found favour with those who seek philosophic principles from sources of so-called pure metaphysics. It would be idle to present here with Kant an analysis of the assumption of the development of all human right from the conditions of the use of liberty consistent with the general law of universal liberty, and the creation of civil government as an embodiment of universal liberty in the unified will of all the constituents of the State.

Society, The Catholic Church Extension.—In the United States.—The first active agitation for a church extension or home mission society for the Catholic Church in North America was begun in 1904 by an article of the present writer, published in the "American Ecclesiastical Review" (Philadelphia). This article was followed by a discussion in the same review, participated in by several priests, and then by a second article of the writer's. On 18 October, 1905, the discussion which these articles aroused took form, and, under the leadership of the Most Reverend James Edward Quigley, Archbishop of Chicago, a new society, called The Catholic Church Extension Society of the United States of America, was organized at a meeting held in the archbishop's residence at Chicago. The following were present at that meeting and became the first board of governors of the society: The Archbishops of Chicago and Santa Fe, the Bishop of Wichita, the present Bishop of Rockford, Reverends Francis C. Kelley, G. P. Jennings, E. P. Graham, E. A. Kelly, J. T. Roche, B. X. O'Reilly, F. J. Van Antwerp, F. A. O'Brien; Messrs. M. A. Fanning, Anthony A. Hirst, William P. Breen, C. A. Plamondon, J. A. Roe, and S. A. Baldus. All these are still (1911) connected with the church extension movement, except Archbishop Bourgade of Santa Fé, who has since died, Reverends E. P. Graham and F. A. O'Brien, and Mr. C. A. Plamondon, who for one reason or another have found it impossible to continue in the work. The Archbishop of Chicago was made chairman of the board, the present writer was elected president, and Mr. William P. Breen, LL.D., of Fort Wayne, Indiana, treasurer. Temporary headquarters were established at Lapeer, Michigan. The second meeting was held in December of the same year, when the constitution was adopted and the work formally launched. A charter was granted on 25 December, 1905, by the State of Michigan to the new society, whose objects were set forth as follows: "To develop the missionary spirit in the clergy and people of the Catholic Church in the United States. To assist in the erection of parish buildings for poor and needy places. To support priests for neglected or proverty-stricken districts. To send the comfort of religion to pioneer localities. In a word, to preserve the faith of Jesus Christ to thousands of scattered Catholics in every portion of our own land, especially in the country districts and among immigrants." In January, 1907, the headquarters of the society were moved to Chicago, and the president was transferred to that archdiocese. In April, 1906, the society began the publication of a quarterly bulletin called "Extension". In May, 1907, this quarterly was enlarged and changed into a monthly; its circulation has steadily increased, and at the present time (1911) it has over one hundred thousand paid subscribers. On 7 June, 1907, the society received its first papal approval by an Apostolic Letter of Pius X addressed to the Archbishop of Chicago. In this letter His Holiness gave unqualified praise to the young organization and bestowed on its supporters and members many spiritual favours. On 9 June, 1910, the pope issued a special Brief by which the society was raised to the dignity of a canonical institution, directly under his own guidance and protection. By the terms of this Brief, the Archbishop of Chicago is always to be chancellor of the Society. The president must be appointed by the Holy Father himself. His term of office is not more than five years. The board of governors has the right to propose three names to the Holy See for this office, and to elect, according to their laws, all other officers of the society. The Brief also provided for a cardinal protector, living in Rome. His Holiness named Cardinal Sebastian Martinelli for this office, and later on appointed the present writer the first president under the new regulations. The Brief limits the society's activities to the United States and its possessions. A similiar Brief was issued to the Church Extension Society in Canada.

Since the organization of the church extension movement, the American society has expended over half a million dollars in missionary work. It has made about seven hundred gifts and loans to poor missions, and has had about five hundred and fifty chapels built in places where no Catholic Church or chapel existed previously and the scattered people could attend Mass only with great difficulty. Both societies have been educating many students for the missions, and both have circulated much good Catholic literature. The American society operates a "chapel car" (donated by one of its members, Ambrose Petry, K. C. S. G.), which carries a missionary into the remote districts along railroad lines, preaching missions and encouraging scattered Catholics to form centres with their own little chapels as beginnings of future parishes. The Holy Father has particularly blessed this chapel car work, and has given a gold medal to the donor of the car and to the society in recognition of its usefulness. Another chapel car, much larger and better equipped, is now about to be built. The society has interested itself very greatly in the missionary work of Porto Rico and the Philippine Islands, and has achieved substantial results. The Canadian society has been very active in saving the Ruthenian Catholics of the Canadian North-West to the Faith, against which an active war has been waged, especially by the Presbyterians. It was principally through the publicity given to this activity by the Canadian Society that the situation was brought to the attention of the bishops in Canada, who at the first Plenary Council decided to raise $100,000 for this work. The American society's first quinquennial report shows splendid progress, and the present situation of both societies gives promise of great things to come. A remarkable thing about the church extension movement is the ready response of the wealthier class of Catholics in the United States to its appeals. Some very large donations have been given. The Ancient Order of Hibernians is raising a fund of $50,000 for chapel building, and the Women's Catholic Order of Foresters $25,000. The directors intend to erect a college for the American mission.

The church extension movement, as it exists in the United States and Canada, has no close parallels in other countries, but is not unlike the Boniface Association in Germany or the Œuvre of St. Francis de Sales in France. Membership is divided into founders ($5000), life members ($1000), fifteen-year members ($100), and Annual Members ($10). There is a Women's Auxiliary in both societies which now begins to flourish. The American society has also a branch for children called the "Child Apostles". From the pennies of the children, chapels are to be built and each one called the "Holy Innocents"; the children have just completed (1911) the amount needed for their first chapel. The present officers of the American society are: His Eminence, Sebastian Cardinal Martinelli, Cardinal Protector; Most Rev. James E. Quigley, D.D., Chancellor; Most Rev. S. G. Messmer, D.D., Vice-Chancellor; Very Rev. Francis C. Kelley, D.D., LL.D., President; Rev. E. B. Ledvina, Vice-President and General Secretary; Rev. E. L. Roe, Director of the Women's Auxiliary and Vice-President; Rev. W. D. O'Brien, Director of the Child Apostles and Vice-President; Mr. Leo Doyle, General Counsel and Vice-President; Mr. John A. Lynch, Treasurer. The members of the executive committee are: Most Rev. James E. Quigley, D.D.; Very Rev. Francis C. Kelley, D.D., LL.D., Rev. Edward A. Kelly, LL.D.; Messrs. Ambrose Petry, K. C. S. G., Richmond Dean, Warren A. Cartier, and Edward F. Carry. On the board of governors are the Archbishops of Chicago, San Francisco, Milwaukee, Boston, New Orleans, Santa Fé, Oregon City, with the bishops of Covington, Detroit, Wichita, Duluth, Brooklyn, Trenton, Mobile, Rockford, Kansas City, Pittsburgh and Helena, and distinguished priests and laymen.

In Canada.—The church extension movement was organized in Canada as an independent society (bearing the name of "The Catholic Church Extension Society of Canada") by the Most Reverend Donatus Sbarretti, Delegate Apostolic of that country, Most Rev. Fergus Patrick McEvay, D.D., Archbishop of Toronto, Rev. Dr. A. E. Burke of the Diocese of Charlottetown, Very Rev. Monsignor A. A. Sinnott, secretary of the Apostolic Delegation, the Rev. Dr. J. T. Kidd, chancellor of Toronto, the Right Honourable Sir Charles Fitzpatrick, K. C. M. G., Chief Justice of Canada, and the present writer. The Canadian society at once purchased the "Catholic Register", a weekly paper, enlarged it, and turned it into the official organ of the work. The circulation of this paper has increased marvellously. The new society in Canada received a Brief, similar to that granted the American society, establishing it canonically. The same cardinal protector was appointed for both organizations. The Archbishop of Toronto was made chancellor of the Canadian society, and Very Rev. Dr. A. E. Burke was appointed president for the full term of five years. The officers of the Canadian society are: His Eminence Cardinal Martinelli, Protector; The Archbishop of Toronto (see vacant), Chancellor; Very Rev. A. E. Burke, D.D., LL.D., President; Rev. J. T. Kidd, D.D., Secretary; Rev. Hugh J. Canning, Diocesan Director; The Archbishop of Toronto; Right Hon. Sir Charles Fitzpatrick, K. C. M. G., and the President, Executive Committee.

Francis C. Kelley.

Society for Promoting Christian Knowledge. See Christian Knowledge, Society for Promoting.

Society of Foreign Missions of Paris.—The Society of Foreign Missions was established 1658–63, its chief founders being Mgr Pallu, Bishop of Heliopolis, Vicar Apostolic of Tonking, and Mgr Lambert de la Motte, Bishop of Bertyus, Vicar Apostolic of Cochin-China. Both bishops left France (1660–62) to go to their respective missions and as true travellers of Christ they crossed Persia and India on foot. The object of the new society was and still is the evangelization of infidel countries, by founding churches and training up a native clergy under the jurisdiction of the bishops. In order that the society might recruit members and administer its property, a house was established in 1663 by the priests whom the vicars Apostolic had appointed their agents. This house, whose directors were to form young priests to the apostolic life and transmit to the bishops the offerings made by charity, was and is still situated at Paris in the Rue du Bac. Known from the beginning as the Seminary of Foreign Missions, it secured the approval of Alexander VII, and the legal recognition, still in force, of the French Government.

The nature and organization of the society deserve special mention. It is not a religious order but a congregation, a society of secular priests, united as members of the same body, not by vows but by the rule approved by the Holy See, by community of object, and the Seminary of Foreign Missions, which is the centre of the society and the common basis which sustains the other parts. On entering the society the missionaries promise to devote themselves until death to the service of the missions, while the society assures them in return, besides the means of sanctification and perseverance, all necessary temporal support and assistance. There is no superior general; the bishops, vicars Apostolic, superiors of missions, and board of directors of the seminary are the superiors of the society. The directors of the seminary are chosen from among the missionaries and each group of missions is represented by a director. The bishops and vicars Apostolic are appointed by the pope, after nomination by the missionaries, and presentation by the directors of the seminary. In their missions they depend only on Propaganda and through it on the pope. No subject aged more than thirty-five may be admitted to the seminary nor may anyone become a member of the society before having spent three years in the mission field. Several points of this rule were determined from the earliest years of the society's existence, others were established by degrees and as experience pointed out their usefulness. By this rule the society has lived and according to it its history has been outlined.

This history is difficult, for owing to the length of the journeys, the infrequent communications, and the poverty of resources the missions have developed with difficulty. The chief events of the first period (1658–1700) are: the publication of the book "Institutions apostoliques", which contains the germ of the principles of the rule, the foundation of the general seminary at Juthia (Siam), the evangelization of Tonking, Cochin China, Cambodia, and Siam, where more than 40,000 Christians were baptized, the creation of an institute of Annamite nuns known as "Lovers of the Cross", the establishment of rules among catechists, the ordination of thirty native priests. Beside these events of purely religious interest there were others in the political order which emphasized the patriotism of these evangelical labourers: through their initiative a more active trade was established between Indo-China, the Indies, and France; embassies were sent from place to place; treaties were signed; a French expedition to Siam took possession of Bangkok, Mergin, and Jonselang, and France was on the verge of possessing an Indo-Chinese empire when the blundering of subalterns ruined an undertaking the failure of which had an unfortunate influence on the missions. But the most important work of the vicars Apostolic and the society is the application of the fruitful principle of the organization of churches by native priests and bishops. Thenceforth the apostolate in its progress has followed this plan in every part of the world with scrupulous fidelity and increasing success. In the second half of the eighteenth century it was charged with the missions which the Jesuits had possessed in India prior to their suppression in Portugal. Many of the Jesuits remained there. The missions thereupon assumed new life, especially at Se-tchoan, where remarkable bishops, Mgr Pottier and Mgr Dufresse, gave a strong impulse to evangelical work; and in Cochin China, where Mgr Pigneau de Behaine performed signal service for the king of that country as his agent in making with France a treaty, which was the first step towards the present splendid situation of France in Indo-China. At the end of the eighteenth century the French Revolution halted the growth of the society, which had previously been very rapid. At that time it had six bishops, a score of missionaries, assisted by 135 native priests; in the various missions there were nine seminaries with 250 students, and 300,000 Christians. Each year the number of adult baptisms rose on an average of 3000 to 3500; that of infant baptisms *in articulo mortis* was more than 100,000.

In the nineteenth century the development of the society and its missions was rapid and considerable. Several causes contributed to this; chiefly the charity of the Propagation of the Faith and the Society of the Holy Childhood; each bishop receives annually 1200 francs, each missionary 660 francs, each mission has its general needs and works allowance, which varies according to its importance and may amount to from 10,000 to 30,000 francs. The second cause was persecution. Fifteen missionaries died in prison or were beheaded during the seventeenth and eighteenth centuries and the beginning of the nineteenth century, but after that the martyrs among the missionaries were very numerous. The best known are Mgr Dufresse, Vicar Apostolic of Se-tchoan, beheaded in 1815; Gagelin, Marchand, Jaccard, Cornay, and Dumoulin-Borie from 1833 to 1838; and from 1850 to 1862 Schoeffler, Vénard, Bonnard, Néron, Chapdelaine, Néel, Cuenot, Vicar Apostolic of Eastern Cochin China. If, besides these, mention were made of the native priests, catechists, and nuns, in short of all who died for Christ, we should have a record of one of the bloodiest holocausts in history. These persecutions were described in Europe by books, pamphlets, annals, and journals, arousing the pity of some and the anger of others and inspiring numerous young men either with the desire of martyrdom or that of evangelization. They moved European nations, especially France and England, to intervene in Indo-China and China and open up in these countries an era of liberty and protection till then unknown. Another cause of the progress of the missionaries was the ease and frequency of communication in consequence of the invention of steam and the opening of the Suez Canal. A voyage could be made safely in one month which had formerly required from eight to ten months amid many dangers.

The following statistics of the missions confided to the Society will show this development at a glance: *Missions of Japan and Korea.*—Tokio, Nagasaki, Osaka, Hakodate, Korea, total number of Catholics, 138,624; churches or chapels, 238; bishops and missionaries, 166; native priests, 48; catechists, 517; seminaries, 4; seminarists, 81; communities of men and women, 44, containing 399 persons; schools, 161, with 9024 pupils; orphanages and work-rooms 38, with 988 children; pharmacies, dispensaries, and hospitals, 19. *Missions of China and Tibet.*—Western, Eastern, and Southern Se-tchoan, Yun-nan, Kouy-tcheou, Kouang-ton, Kouang-si, Southern Manchuria, Northern Manchuria.—Catholics, 272, 792; churches or chapels, 1392; bishops and missionaries, 408; native priests, 191; catechists, 998; seminaries, 19; seminarists, 661; communities of men and women, 23, with 222 members; schools, 1879, with 31,971 pupils; orphanages and work-rooms, 132, with 4134 children; pharmacies, dispensaries, and hospitals, 364. *Missions of Eastern Indo-China.*—Tongking, Cochin China, Cambodia.—Catholic population, 632,830; churches or chapels, 2609; bishops and missionaries, 365; native priests, 491; catechists, 1153; seminaries, 14; seminarists, 1271; communities of men and women, 91, with 2583 persons; schools, 1859, with 58,434 pupils; orphanages and work-rooms, 103, with 7217 children; pharmacies, dispensaries, hospitals, 107. *Missions of Western Indo-China.*—Siam, Malacca, Laos, Southern Burma, Northern Burma.—Catholics, 132,226; churches or chapels, 451; bishops and missionaries, 199; native priests, 42; catechists, 242; seminaries, 3; seminarists, 81; communities of men and women, 47, with 529 members; schools, 320, with 21,306 pupils; orphanages and work-rooms, 132, with 3757 children; pharmacies, dispensaries, hospitals, 86. *Missions of India.*—Pondicherry, Mysore, Coimbatore, Kumbakonam.—Catholics, 324,050; churches or chapels, 1048; bishops and missionaries, 207; native priests, 67; catechists, 274; seminaries, 4; seminarists, 80; communities of men and women, 54, with 787 members; schools, 315, with 18,693 pupils; orphanages and work-rooms, 57, with 2046 children; pharmacies, dispensaries, and hospitals, 41.

In addition to these missionaries actively engaged in mission work, there are some occupied in the establishments called common, because they are used by the whole society. Indeed the development of the society necessitated undertakings which were not needed in the past. Hence a sanatorium for sick missionaries has been established at Hong-Kong on the coast of China; another in India among the Nilgiri mountains, of radiant appearance and invigorating climate, and a third in France. In thinking of the welfare of the body, that of the soul was not lost sight of, and a house of spiritual retreat was founded at Hong-Kong, whither all the priests of the society may repair to renew their priestly and apostolic fervour. To this house was added a printing establishment, whence issue the most beautiful works of the Far East, dictionaries, grammars, books of theology, piety, Christian doctrine, and pedagogy. Houses of correspondence, or agencies, were established in the Far East at Shanghai, Hong-Kong, Saigon, Singapore, and one at Marseilles, France. The Seminary of the Foreign Missions which long had only one section, has for twenty years had two.

A. Launay.

Society of Jesus (Company of Jesus, Jesuits), a religious order founded by Saint Ignatius Loyola (q. v.). Designated by him "The Company of Jesus" to indicate its true leader and its soldier spirit, the title was latinized into "Societas Jesu" in the Bull of Paul III approving its formation and the first formula of its Institute ("Regimini militantis ecclesiæ", 27 Sept., 1540). The term "Jesuit" (of fifteenth-century origin, meaning one who used too freely or appropriated the name of Jesus), was first applied to the Society in reproach (1544–52), and was never employed by its founder, though members and friends of the Society in time accepted the name in its good sense. The Society ranks among religious institutes as a mendicant order of clerks regular, that is, a body of priests organized for apostolic work, following a religious rule, and relying on alms for their support [Bulls of Pius V, "Dum indefessæ", 7 July, 1571; Gregory XIII, "Ascendente Domino" (q. v.), 25 May, 1584].

As has been explained under the title "Ignatius Loyola", the founder began his self-reform, and the enlistment of followers, entirely prepossessed with the idea of the imitation of Christ, and without any plan for a religious order or purpose of attending to the needs of the days. Unexpectedly prevented from carrying out this original idea, he offered his services and those of his followers to the pope, "Christ upon Earth", who at once employed them in such works as were most pressing at the moment. It was only after this and just before the first companions broke up to go at the pope's command to various countries, that the resolution to found an order was taken, and that Ignatius was commissioned to draw up Constitutions. This he did slowly and methodically; first introducing rules and customs, and seeing how they worked. He did not codify them for the first six years. Then three years were given to formulating laws, the wisdom of which had been proved by experiment. In the last six years of the saint's life the Constitutions so composed were finally revised and put into practice everywhere. This sequence of events explains at once how the Society, though devoted to the following of Christ, as though there were nothing else in the world to care for, is also so excellently adapted to the needs of the day. It began to attend to them before it began to legislate; and its legislation was the codification of those measures which had been proved by experience to be apt to preserve its preliminary religious principle among men actually devoted to the requirements of the Church in days not unlike our own.

The Society was not founded with the avowed intention of opposing Protestantism. Neither the papal letters of approbation, nor the Constitutions of the order mention this as the object of the new foundation. When Ignatius began to devote himself to the service of the Church, he had probably not heard even the names of the Protestant Reformers. His early plan was rather the conversion of Mohammedans, an idea which, a few decades after the final triumph of the Christians over the Moors in Spain, must have strongly appealed to the chivalrous Spaniard. The name "Societas Jesu" had been borne by a military order approved and recommended by Pius II in 1459, the purpose of which was to fight against the Turks and aid in spreading the Christian faith. The early Jesuits were sent by Ignatius first to pagan lands or to Catholic countries; to Protestant countries only at the special request of the pope, and to Germany, the cradle-land of the Reformation, at the urgent solicitation of the imperial ambassador. From the very beginning the missionary labours of Jesuits among the pagans of India, Japan, China, Canada, Central and South America were as important as their activity in Christian countries. As the object of the Society was the propagation and strengthening of the Catholic Faith everywhere, the Jesuits naturally endeavoured to counteract the spread of Protestantism. They became the main instruments of the Counter-Reformation; the reconquest of southern and western Germany and Austria for the Church, and the preservation of the Catholic faith in France and other countries were due chiefly to their exertions.

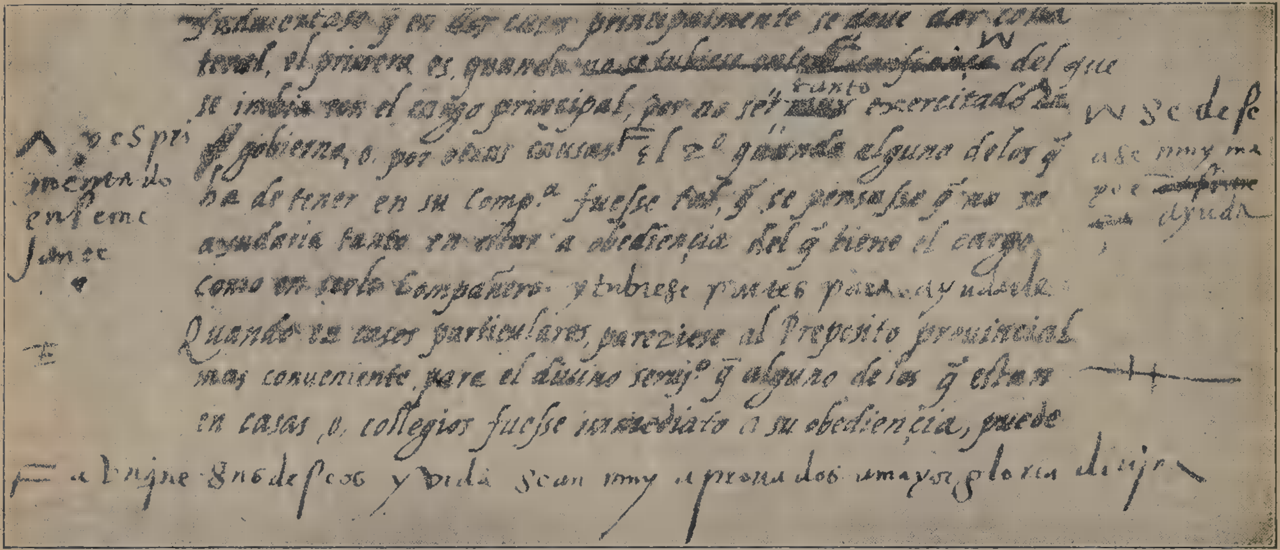
Institute, Constitutions, Legislation.—The official publication which comprises all the regulations of the Society, its *codex legum*, is entitled "Institutum Societatis Jesu", of which the latest edition was issued at Rome and Florence, 1869–91 (for full bibliography see Sommervogel, V, 75–115; IX, 609–611; for commentators see X, 705–710). The Institute contains: (1) The special Bulls and other pontifical documents approving the Society and canonically determining or regulating its various works, and its ecclesiastical standing and relations.—Besides those already mentioned, other important Bulls are those of: Paul III, "Injunctum nobis", 14 March, 1543; Julius III, "Exposcit debitum", 21 July, 1550; Pius V, "Æquum reputamus", 17 January, 1565; Pius VII, "Sollicitudo omnium ecclesiarum", 7 August, 1814; Leo XIII, "Dolemus inter alia", 13 July, 1880. (2) The Examen Generale and Constitutions.—The Examen contains subjects to be explained to postulants and points on which they are to be examined. The Constitutions are divided into ten parts: (a) admission; (b) dismissal; (c) novitiate; (d) scholastic training; (e) profession and other grades of membership; (f) religious vows and other obligations as observed in the Society; (g) missions and other ministries; (h) congregations, local and general assemblies as a means of union and uniformity; (i) the general and chief superiors; (j) preservation of the spirit of the Society. Thus far in the Institute all is by St. Ignatius, who has also added "Declarations" of various obscure parts. Then come: (3) Decrees of General Congregations, which have equal authority with the Constitutions; (4) Rules, general and particular, etc.; (5) Formulæ or order of business for the congregations; (6) Ordinations of generals, which have the same authority as the rules; (7) Instructions, some for superiors, others for those engaged in the missions or other works of the Society; (8) Industriæ, or special counsels for superiors; (9) The Book of the Spiritual Exercises; and (10) the Ratio Studiorum (q. v.), which have directive force only.

The Constitutions as drafted by Ignatius and adopted finally by the first congregation of the Society, 1558, have never been altered. Ill-informed writers have stated that Lainez, the second general, made considerable changes in the saint's conception of the order; but Ignatius's own last recension of the Constitutions, lately reproduced in facsimile (Rome, 1908), exactly agrees with the text of the Constitutions now in force, and contains no word by Lainez, not even in the Declarations, or glosses added to the text, which are all the work of Ignatius. The text in use in the Society is a Latin version prepared under the direction of the third congregation, and subjected to a minute comparison with the Spanish original preserved in the Society's archives, during the fourth congregation (1581).

These Constitutions were written after long deliberation between Ignatius and his companions in founding the Society, as at first it seemed to them that they might continue their work without the aid of a special Rule. They were the fruit of long experience and of serious meditation and prayer. Throughout they are inspired by an exalted spirit of charity and of zeal for souls. They contain nothing unreasonable. To appreciate them, however, requires a knowledge of canon law as applied to monastic life and also of their history in the light of the times for which they were framed. Usually those who find fault with them either have never read them or else have misinterpreted them. Monod, for instance, in his introduction to Böhmer's essay on the Jesuits ("Les jésuites", Paris, 1910, pp. 13, 14) recalls how Michelet mistranslated the words of the Constitutions, p. VI, c. 5, *obligationem ad peccatum*, and made it appear that they require obedience even to the commission of sin, as if the text were *obligatio ad peccandum*, whereas the obvious meaning and purpose of the text is precisely to show that the transgression of the rules is not in itself sinful. Monod enumerates such men as Arnauld, Wolf, Lange, Ranke in the first edition of his "History", Häusser and Droysen, Philippson and Charbonnel, as having repeated the same error, although it had been refuted frequently since 1824, particularly by Gieseler, and corrected by Ranke in his second edition. Whenever the Constitutions enjoin what is already a serious moral obligation, or superiors, by virtue of their authority, impose a grave obligation, transgression is sinful; but this is true of such transgressions not only in the Society but out of it. Moreover such commands are rarely given by the superiors and only when the good of the individual member or the common good imperatively demands it. The rule throughout is one of love inspired by wisdom, and it must be interpreted in the spirit of charity which animates it. This is especially true of its provisions for the affectionate relations of members with superiors and with one another, by the manifestation of conscience, more or less practised in every religious order, and by mutual correction when this may be necessary. It also applies to the methods employed to ascertain the qualifications of members for various offices or ministries.

The chief authority is vested in the general congregation, which elects the general, and could, for certain grave causes, depose him. This body could also (though there has never yet been an occasion for so doing) add new Constitutions, and abrogate old ones. Usually this congregation is convened on the occasion of the death of a general, in order to elect his successor, and to make provisions for the government and welfare of the Society. It may also be called at other times for grave reasons. It consists of the general, when alive, and his assistants, the provincials, and two deputies from each province or territorial division of the society elected by the superiors and older professed members. Thus authority in the Society eventually rests on a democratic basis. But as there is no definite time for calling the general congregation, which in fact rarely occurs except to elect a new general, the exercise of authority is usually in the hands of the general, in whom is vested the fullness of administrative power, and of spiritual authority. He can do anything within the scope of the Constitutions, and can even dispense with them for good causes, though he cannot change them. He resides at Rome, and has a council of assistants, five in number at present, one each for Italy, France, Spain and countries of Spanish origin, one for Germany, Austria, Poland, Belgium, Hungary, Holland, and one for English-speaking countries—England, Ireland, United States, Canada, and British colonies (except India). These usually hold office until the death of the general. Should the general through age or infirmity become incapacitated for governing the Society, a vicar is chosen by a general congregation to act for him. At his death he names one so to act until the congregation can meet and elect his successor.

Next to him in order of authority come the provincials, the heads of the Society, whether for an entire country, as England, Ireland, Canada, Belgium, Mexico, or, where these units are too large or too small to make convenient provinces, they may be subdivided or joined together. Thus there are now four provinces in the United States: California, Maryland-New York, Missouri, New Orleans. In all there are now twenty-seven provinces. The provincial is appointed by the general, with ample



REDUCED FACSIMILE OF SPANISH MS. OF THE CONSTITUTIONS WITH AUTOGRAPH CORRECTIONS BY ST. IGNATISUS administrative faculties. He too has a council of "consultors" and an "admonitor", appointed by the general. Under the provincial come the local superiors. Of these, rectors of colleges, provosts of professed houses, and masters of novices are appointed by the general; the rest by the provincial. To enable the general to make and control so many appointments, a free and ample correspondence is kept up, and everyone has the right of private communication with him. No superior, except the general, is named for life. Usually provincials and rectors of colleges hold office for three years.

Members of the Society fall into four classes: (1) *Novices* (whether received as lay brothers for the domestic and temporal services of the order, or as aspirants to the priesthood), who are trained in the spirit and discipline of the order, prior to making the religious vows. (2) At the end of two years the novices make simple but perpetual vows, and, if aspirants to the priesthood, become *formed scholastics;* they remain in this grade as a rule from two to fifteen years, in which time they will have completed all their studies, pass (generally) a certain period in teaching, receive the priesthood, and go through a third year of novitiate or probation (the tertianship). According to the degree of discipline and virtue, and to the talents they display (the latter are normally tested by the examination for the Degree of Doctor of Theology), they may now become formed coadjutors or professed members of the order. (3) *Formed coadjutors,* whether formed lay brothers or priests, make vows, which, though not solemn, are perpetual on their part; while the Society, on its side, binds itself to them, unless they should commit some grave offence. (4) The *professed* are all priests, who make, besides the three usual solemn vows of religion, a fourth, of special obedience to the pope in the matter of missions, undertaking to go wherever they are sent, without even requiring money for the journey. They also make certain additional, but non-essential, simple vows, in the matter of poverty, and the refusal of external honours. The professed of the four vows constitute the kernel of the Society; the other grades are regarded as preparatory or as subsidiary to this. The chief offices can be held by the professed alone; and though they may be dismissed, yet they must be received back, if willing to comply with the conditions that may be prescribed. Otherwise they enjoy no privileges, and many posts of importance, such as the government of colleges, may be held by members of other grades. For special reasons some are occasionally professed of three vows and they have certain but not all the privileges of the other professed. All live in community alike as regards food, apparel, lodging, recreation, and all are alike bound by the rules of the Society.

There are no secret Jesuits. Like other orders the Society can, if it will, make its friends participators in its prayers and in the merits of its good works; but it cannot make them members of the order, unless they live the life of the order. There is indeed the case of St. Francis Borgia, who made some of the probations in an unusual way, outside the houses of the order. But this was in order that he might be free to conclude certain business matters and other affairs of state, and thus appear the sooner in public as a Jesuit, not that he might remain permanently outside the common life.

Novitiate and Training.—Candidates for admission come not only from the colleges conducted by the Society, but from other schools. Frequently postgraduate or professional students, and those who have already begun their career in business or professional life, or even in the priesthood, apply for admission. Usually the candidate applies in person to the provincial, and if he considers him a likely subject he refers him for examination to four of the more experienced fathers. They question him about the age, health, position, occupation of his parents, their religion and good character, their dependence on his services; about his own health, obligations, such as debts, or other contractual relations; his studies, qualifications, moral character, personal motives as well as the external influences that may have led him to seek admission. The results of their questioning and of their own observation they report severally to the provincial, who weighs their opinions carefully before deciding for or against the applicant. Any notable bodily or mental defect in the candidate, serious indebtedness or other obligation, previous membership in another religious order even for a day, indicating instability of vocation, unqualifies for admission. Undue influence, particularly if exercised by members of the order, would occasion stricter scrutiny than usual into the personal motives of the applicant.

Candidates may enter at any time, but usually there is a fixed day each year for their admission, towards the close of the summer holidays, in order that all may begin their training, or probation, together. They spend the first ten days considering the manner of life they are to adopt and its difficulties, the rules of the order, the obedience required of its members. They then make a brief retreat, meditating on what they have learned about the Society and examining closely their own motives and hopes of perseverance in the new mode of life. If all be satisfactory to them and the superior or director who has charge of them, they are admitted as novices, wear the clerical costume (as there is no special Jesuit habit), and begin in earnest the life of members of the Society. They rise early, make a brief visit to the chapel, a meditation on some subject selected the night before, assist at Mass, review their meditation, breakfast, and then prepare for the day's routine. This consists of manual labour, in or out of doors, reading books on spiritual topics, ecclesiastical history, biography, particularly of men or women distinguished for zeal and enterprise in missionary or educational fields. There is a daily conference by the master of novices on some detail of the Institute, notes of which all are required to make, so as to be ready, when asked, to repeat the salient points.

Wherever it is possible some are submitted to certain tests of their vocation and usefulness: to teaching catechism in the village churches; to attendance on the sick in hospitals; to going about on a pilgrimage or missionary journey without money or other provision. As soon as possible all make the spiritual exercises for thirty days. This is really the chief test of a vocation, as it is also in epitome the main work of the two years of the novitiate and for that matter of the entire life of a Jesuit. On these exercises the Constitutions, the life, and activity of the Society are based, so that they are really the chief factor in forming the character of a Jesuit. In accordance with the ideals set forth in these exercises, of disinterested conformity with God's will, and of personal love of Jesus Christ, the novice is trained diligently in a meditative study of the truths of religion, in the habit of self-knowledge, in a constant scrutiny of his motives and of the actions inspired by them, in the correction of every form of self-deceit, illusion, plausible pretext, and in the education of his will, particularly in making choice of what seems best after careful deliberation and without self-seeking. Deeds, not words, are insisted upon as proof of genuine service, and a mechanical, emotional, or fanciful piety is not tolerated. As the novice gradually thus becomes master of his judgment and will, he grows more and more capable of offering to God the reasonable service enjoined by St. Paul, and seeks to follow the Divine will, as manifested by Jesus Christ, by His vicar on earth, by the bishops appointed to rule His Church, by his more immediate or religious superiors, and by the civil powers rightfully exercising authority. This is what is meant by Jesuit obedience, the characteristic virtue of the order, such a sincere respect for authority as to accept its decisions and comply with them, not merely by outward performance but in all sincerity with the conviction that compliance is best, and that the command expresses for the time the will of God, as nearly as it can be ascertained.

The noviceship lasts two years. On its completion the novice makes the usual vows of religion, the simple vow of chastity in the Society having the force of a diriment impediment to matrimony. During the noviceship but a brief time daily is devoted to reviewing previous studies. The noviceship over, the scholastic members, i. e. those who are to become priests in the Society, follow a special course in classics and mathematics lasting two years, usually in the same house with the novices. Then, in another house and neighbourhood, three years are given to the study of philosophy, about five years to teaching in one or other of the public colleges of the Society, four years to the study of theology, priestly orders being conferred after the third, and, finally, one year more to another probation or noviceship, intended to help the young priest to renew his spirit of piety and to learn how to utilize to the best of his ability all the learning and experience he has acquired. In exceptional cases, as in that of a priest who has finished his studies before entering the order, allowance is made, and the training period need not last over ten years, a good part of which is spent in active ministry.

The object of the order is not limited to practising any one class of good works, however laudable (as preaching, chanting office, doing penance, etc.) but to study, in the manner of the Spiritual Exercises, what Christ would have done, if He were living in our circumstances, and to carry out that ideal. Hence elevation and largeness of aim. Hence the motto of the Society: "Ad Majorem Dei Gloriam". Hence the selection of the virtue of obedience as the characteristic of the order, to be ready for any call and to keep unity in every variety of work. Hence, by easy sequence, the omission of office in choir, of a specially distinctive habit, of unusual penances. Where the Protestant Reformers aimed at reorganizing the Church at large according to their particular conceptions, Ignatius began with interior self-reform; and after that had been thoroughly established, then the earnest preaching of self-reform to others. That done, the Church would not, and did not, fail to reform herself. Many religious distinguished themselves as educators before the Jesuits; but the Society was the first order which enjoined by its very Constitutions devotion to the cause of education. It was, in this sense, the first "teaching order".

The ministry of the Society consists chiefly in preaching; teaching catechism, especially to children; administering the sacraments, especially penance and the Eucharist; conducting missions in parishes on the lines of the Spiritual Exercises; directing those who wish to follow these exercises in houses of retreat, seminaries, or convents; taking care of parishes or of collegiate churches; organizing pious confraternities, sodalities, unions of prayer, Bona Mors associations in their own and in other parishes; teaching in schools of every grade—academic, seminary, university; writing books, pamphlets, periodical articles; going on foreign missions among uncivilized peoples. In liturgical functions the Roman Rite is followed. The proper exercise of all these functions is provided for by rules carefully framed by the general congregations or the generals. All these regulations command the greatest respect on the part of every member. In practice the superior for the time being is the living rule—not that he can alter or abrogate any rule, but because he must interpret and determine its application. In this fact and in its consequences, the Society differs from every religious order antecendent to its foundation; to this principally it owes its life, activity, and power to adapt its Institute to modern conditions without need of change in that instrument or of reform in the body itself.

The story of the foundation of the Society is told in the article Ignatius Loyola. Briefly, after having inspired his companions Peter Faber, Francis Xavier, James Lainez, Alonso Salmerón, Nicolas Bobadilla, Simon Rodriguez, Claude Le Jay, Jean Codure, and Paschase Brouet with a desire to dwell in the Holy Land imitating the life of Christ, they first made vows of poverty and chastity at Montmartre, Paris, on 15 August, 1534, adding a vow to go to the Holy Land after two years. When this was found to be impracticable, after waiting another year, they offered their services to the pope, Paul III. Fully another year was passed by some in university towns in Italy, by the others at Rome, where, after encountering much opposition and slander, all met together to agree on a mode of life by which they might advance in evangelical perfection and help others in the same task. The first formula of the Institute was submitted to the pope and approved of viva voce, 3 September, 1539, and formally, 27 September, 1540.

Constitutions.—*Corpus institutorum Societatis Jesu* (Antwerp, Prague, Rome, 1635, 1702, 1705, 1707, 1709, 1869–70; Paris, partial edition, 1827–38); Gagliardi, *De cognitione instituti* (1841); Lancicius, *De præstantia instit. Soc. Jesu* (1644); Nadal, *Scholia in constitutiones* (1883); Suarez, *Tract. de religione Soc. Jesu* (1625); Humphrey, *The Religious State* (London, 1889), a digest of the treatise of Suarez; Oswald, *Comment. in decem partes constit. Soc. Jesu* (3rd ed., Brussels, 1901); *Rules of the Society of Jesus* (Washington, 1839; London, 1863).

Generals Prior to the Suppression of the Society.—(1) St. Ignatius Loyola (q. v.), 19 April, 1541–31 July, 1556. The Society spread rapidly and at the time of St. Ignatius's death had twelve provinces: Italy, Sicily, Portugal, Aragon, Castile, Andalusia, Upper Germany, Lower Germany, France, India (including Japan), Brazil, and Ethiopia, the last-mentioned province lasting but a short time. It met with opposition at the University of Paris; while in Spain it was severely attacked by Melchior Cano.

(2) *James Lainez* (q. v.), 2 July, 1558–19 January, 1565. Lainez served two years as vicar-general, and was chosen general in the first general congregation, retarded till 1558 (19 June–10 Sept.), owing to the unfortunate war between Paul IV and Philip II. Paul IV gave orders that the Divine Office should be recited in choir, and also that the generalate should only last for three years. The pope died on 18 August, 1559, and his orders were not renewed by his successor, Pius IV; indeed he refused Father Lainez leave to resign when his first triennium closed. Through Pius's nephew, St. Charles Borromeo, the Society now received many privileges and openings, and progress was rapid. Father Lainez himself was sent to the "Colloquy of Poissy", and to the Council of Trent (1563–4), Saint Francis Borgia being left in Rome as his vicar-general. At the death of Lainez the Society numbered 3500 members in 18 provinces and 130 houses.

(3) *St. Francis Borgia* (q. v.), 2 July, 1565–1 October, 1572. One of the most delicate tasks of his government was to negotiate with Pope St. Pius V, who desired to reintroduce the singing of Office. This was in fact begun in May, 1569, but only in professed houses, and it was not to interfere with other work. Pius also ordained (Christmas, 1566) that no candidate of any religious order for the priesthood should be ordained until after his profession; and this indirectly caused much trouble to the Society, with its distinct grades of professed and non-pro-

INTERIOR OF THE CHURCH OF THE GESU, ROME

fessed priests. All had therefore to be professed of three vows, until Gregory XIII (December, 1572) allowed the original practice to be restored. Under his administration the foreign missionary work of the order greatly increased and prospered. New missions were opened by the Society in Florida, Mexico, and Peru.

(4) *Everard Mercurian*, Belgian, 23 April, 1573–1 August, 1580. Fr. Mercurian was born in 1514 in the village of Marcour (Luxemburg), whence his name, which he signed Everard de Marcour. He became the first non-Spanish general of the Society. Pope Gregory XIII, without commanding, had expressed his desire for this change. This, however, caused great dissatisfaction and opposition among a number of Spanish and Portuguese members, which came to a crisis during the generalate of Father Mercurian's successor, Father Claudius Acquaviva. Father Tolet was entrusted with the task of obtaining the submission of Michael Baius to the decision of the Holy See; he succeeded, but his success served later to draw on the Society the hatred of the Jansenists. Father Mercurian, when general, brought the Rules to their final form, compiling the "Summary of the Constitutions" from the manuscripts of St. Ignatius, and drawing up the "Common Rules" of the Society, and the particular rules for each office. He was greatly interested in the foreign missions and established the Maronite and English missions, and sent to the latter Blessed Edmund Campion and Father Robert Persons. Father Everard Mercurian passed thirty-two years in the Society, and died at the age of sixty-six. At that time the Society numbered 5000 members in eighteen provinces.

(5) *Claudius Acquaviva*, or Aquaviva (q. v.), Neapolitan, 19 February, 1581–31 January, 1615 (for the disputations on grace, see CONGREGATIO DE AUXILIIS). After Ignatius, Acquaviva was perhaps the ablest ruler of the Society. As a legislator he reduced to its present form the final parts of the Institute, and the Ratio Studiorum (q. v.). He had also to contend with extraordinary obstacles both from without and within. The Society was banished from France and from Venice; there were grave differences with the King of Spain, with Sixtus V, with the Dominican theologians; and within the Society the rivalry between Spaniard and Italian led to unusual complications and to the calling of two extraordinary general congregations (fifth and sixth). The origin of these troubles is perhaps eventually to be sought in the long wars of religion, which gradually died down after the canonical absolution of Henry IV, 1595 (in which Fathers Georges, Toledo, and Possevinus played important parts). The fifth congregation in 1593 supported Acquaviva steadily against the opposing parties, and the sixth, in 1608, completed the union of opinions. Paul V had in 1606 re-confirmed the Institute, which from now onwards may be considered to have won a stable position in the Church at large, until the epoch of the Suppression and the Revolution. Missions were established in Canada, Chile, Paraguay, the Philippine Islands, and China. At Father Acquaviva's death the Society numbered 13,112 members in 32 provinces and 559 houses.

(6) *Mutius Vitelleschi* (q. v.), Roman, 15 November, 1615–9 February, 1645. His generalate was one of the most pacific and progressive, especially in France and Spain; but the Thirty Years' War worked havoc in Germany. The canonization of Sts. Ignatius and Francis Xavier (1622) and the first centenary of the Society (1640) were celebrated with great rejoicings. The great mission of Paraguay began, that of Japan was stamped out in blood. England was raised in 1619 to the rank of a province of the order, having been a mission until then. Missions were established in Tibet (1624), Tonkin (1627), and the Maranhão (1640).

(7) *Vincent Caraffa* (q. v.), Neapolitan, 7 January, 1646–8 June, 1649. A few days before Father Caraffa's election as general, Pope Innocent X published a brief "Prospero felicique statui", in which he ordered a general congregation of the Society to be held every nine years; it was ordained also that no office in the Society except the position of master of novices should be held for more than three years. The latter regulation was revoked by Innocent's successor, Alexander VII, on 1 January, 1658; and the former by Benedict XIV in 1746 by the Bull "Devotam", many dispensations having been granted in the meantime.

(8) *Francis Piccolomini*, of Siena, 21 December, 1649–17 June, 1651; before his election as general he had been professor of philosophy at the Roman College; he died at the age of sixty-nine, having passed fifty-three years in the Society.

(9) *Aloysius Gottifredi*, Roman, 21 January, 1652–12 March, 1652; Father Gottifredi died at the house of the professed Fathers, Rome, within two months after his election, and before the Fathers assembled for the election and congregation had concluded their labour. He had been a professor of theology and rector of the Roman College, and later secretary of the Society under Father Mutius Vitelleschi.

(10) *Goswin Nickel*, German, b. at Jülich in 1582; 17 March, 1652–31 July, 1664. During these years the struggle with Jansenism was growing more and more heated. The great controversy on the Chinese Rites (1645) was continued (see RICCI, MATTEO). Owing to his great age Father Nickel obtained from the eleventh congregation the appointment of Father John Paul Oliva as vicar-general (on 7 June, 1661), with the approval of Alexander VII.

(11) *John Paul Oliva*, Genoese (elected vicar *cum jure successionis* on 7 June, 1661), 31 July, 1664–26 November, 1681. During his generalate the Society established a mission in Persia, which at first met with great success, four hundred thousand converts being made within twenty-five years; in 1736, however, the mission was destroyed by violent persecution. Father Oliva's generalate occurred during one of the most difficult periods in the history of the Society, as the controversies on Jansenism, the *droit de régale*, and moral theology were being carried on by the opponents of the Society with the greatest acrimony and violence. Father John Paul Oliva laboured earnestly to keep up the Society's high reputation for learning, and in a circular letter sent to all the houses of study urged the cultivation of the oriental languages.

(12) *Charles de Noyelle*, Belgian, 5 July, 1682–12 December, 1686. Father de Noyelle was born at Brussels on 28 July, 1615; so great was his reputation for virtue and prudence that at his election he received unanimous vote of the congregation. He had been assistant for the Germanic provinces during more than twenty years; he died at the age of seventy, after fifty years spent in the Society. Just about the time of his election, the dispute between Louis XIV of France and Pope Innocent XI had culminated in the publication of the "Déclaration du clergé de France" (19 March, 1682). This placed the Society in a difficult position in France, as its spirit of devotion to the papacy was not in harmony with the spirit of the "Déclaration". It required all the ingenuity and ability of Père La Chaise and Father de Noyelle to avert a disaster. Innocent XI was dissatisfied with the position the Society adopted, and threatened to suppress the order, proceeding even so far as to forbid the reception of novices.

(13) *Thyrsus González* (q. v.), Spaniard, 6 July, 1687–27 Oct., 1705. He interfered in the controversy between Probabilism (q. v.) and Probabiliorism, attacking the former doctrine with energy in a book published at Dillingen in 1691. As Probabilism

was on the whole in favour in the Society, this caused discussions, which were not quieted until the fourteenth congregation, 1696, when, with the pope's approval, liberty was left to both sides. Father González in his earlier days had laboured with great fruit as a missionary, and after his election as general encouraged the work of popular home missions. His treatise "De infallibilitate Romani pontificis in definiendis fidei et morum controversiis", which was a vigorous attack on the doctrines laid down in the "Déclaration du clergé de France", was published at Rome in 1689 by order of Pope Innocent XI; however, Innocent's successor, Alexander VII, caused the work to be withdrawn, as its effect had been to render the relations between France and the Holy See more difficult. Father González laboured earnestly to spread devotion to the saints of the Society; he died at the age of eighty-four, having passed sixty-three years in the order, during nineteen of which he was general.

(14) *Michelangelo Tamburini*, of Modena, 31 January, 1706–28 February, 1730. The long reign of Louis XIV, so favourable to the Jesuits in many respects, saw the beginning of those hostile movements which were to lead to the Suppression. The king's autocratic powers, his Gallicanism, his insistence on the repression of the Jansenists by force, the way he compelled the Society to take his part in the quarrel with Rome about the *régale* (1684–8), led to a false situation in which the parts might be reversed, when the all-powerful sovereign might turn against them, or by standing neutral leave them the prey of others. This was seen at his death, 1715, when the regent banished the once influential father confessor Le Tellier, while the gallicanizing Archbishop of Paris, Cardinal de Noailles, laid them under an interdict (1716–29). Father Tamburini before his election as general had taught philosophy and theology for twelve years and had been chosen by Cardinal Renaud d'Este as his theologian; he had also been provincial of Venice, secretary-general of the Society, and vicar-general. During the disputes concerning the Chinese Rites (q. v.), the Society was accused of resisting the orders of the Holy See. Father Tamburini protested energetically against this calumny, and when in 1711 the procurators of all the provinces of the Society were assembled at Rome, he had them sign a protest which he dedicated to Pope Clement XI. The destruction of Port-Royal and the condemnation of the errors of Quesnel by the Bull "Unigenitus" (1711) testified to the accuracy of the opinions adopted by the Society in these disputes. Father Tamburini procured the canonization of Saints Aloysius Gonzaga and Stanislaus Kostka, and the beatification of St. John Francis Régis. During his generalate the mission of Paraguay reached its highest degree of success; in one year no fewer than seventy-seven missionaries left for it; the missionary labours of St. Francis de Geronimo and Blessed Anthony Baldinucci in Italy, and Venerable Manuel Padial in Spain, enhanced the reputation of the Society. Father Tamburini died at the age of eighty-two, having spent sixty-five years in religion. At the time of his death the Society contained 37 provinces, 24 houses of professed Fathers, 612 colleges, 59 novitiates, 340 residences, 200 mission stations; in addition one hundred and fifty-seven seminaries were directed by the Jesuits.

(15) *Francis Retz*, Austrian (born at Prague, in 1673), 7 March, 1730–19 November, 1750. Father Retz was elected general unanimously, his able administration contributed much to the welfare of the Society; he obtained the canonization of St. John Francis Régis. Father Retz's generalate was perhaps the quietest in the history of the order. At the time of his death the Society contained 39 provinces, 24 houses of professed Fathers, 669 colleges, 61 novitiates, 335 residences, 273 mission stations, 176 seminaries, and 22,589 members, of whom 11,293 were priests.

(16) *Ignatius Visconti*, Milanese, 4 July, 1751-4 May, 1755. It was during this generalate that the accusations of trading were first made against Father Antoine de La Valette, who was recalled from Martinique in 1753 to justify his conduct. Shortly before dying, Father Visconti allowed him to return to his mission, where the failure of his commercial operations, somewhat later, gave an opportunity to the enemies of the Society in France to begin a warfare that ended only with the Suppression (see below). Trouble with Pombal also began at this time. Father Visconti died at the age of seventy-three.

(17) *Aloysius Centurioni*, Genoese, 30 November, 1755—2 October, 1757. During his brief generalate the most noteworthy facts were the persecution by Pombal of the Portuguese Jesuits and the troubles caused by Father de La Valette's commercial activities and disasters. Father Centurioni died at Castel Gandolfo, at the age of seventy-two.

(18) *Lorenzo Ricci* (q. v.), Florentine, 21 May, 1758, till the Suppression in 1773. In 1759 the Society contained 41 provinces, 270 mission posts, and 171 seminaries. Father Ricci founded the Bavarian province of the order in 1770. His generalate saw the slow death agony of the Society; within two years the Portuguese, Brazilian, and East Indian provinces and missions were destroyed by Pombal; close to two thousand members of the Society were cast destitute on the shores of Italy and imprisoned in fetid dungeons in Portugal. France, Spain, and the Two Sicilies followed in the footsteps of Pombal. The Bull "Apostolicum" of Clement XIII in favour of the Society produced no fruit. Clement XIV at last yielded to the demand for the extinction of the Society. Father Ricci was seized, and cast a prisoner into the Castel San Angelo, where he was treated as a criminal till death ended his sufferings on 24 November, 1775. In 1770 the Society contained 42 provinces, 24 houses of professed Fathers, 669 colleges, 61 novitiates, 335 residences, 273 mission stations, and about 23,000 members.

HISTORY. *Italy.*—The history of the Jesuits in Italy was in general very peaceful. The only serious disturbances were those arising from the occasional quarrels of the civil governments with the ecclesiastical powers. Ignatius's first followers were immediately in great request to instruct the faithful, and to reform the clergy, monasteries, and convents. Though there was little organized or deep-seated mischief, the amount of lesser evils was immense; the possibility here and there of a catastrophe was evident. While the preachers and missionaries evangelized the country, colleges were established at Padua, Venice, Naples, Bologna, Florence, Parma, and other cities. On 20 April, 1555, the University of Ferrara addressed to the Sorbonne a most remarkable testimony in favour of the order. St. Charles Borromeo was, after the popes, perhaps the most generous of all their patrons, and they freely put their best talents at his disposal. (For the difficulties about his seminary and with Fr. Guilio Mazarino, see Sylvain, "Hist. de S. Charles", iii, 53.) Juan de Vega, ambassador of Charles V at Rome, had learnt to know and esteem Ignatius there, and when he was appointed Viceroy of Sicily he brought Jesuits with him. A college was opened at Messina; success was marked, and its rules and methods were afterwards copied in other colleges. After fifty years the Society counted in Italy 86 houses and 2550 members. The chief trouble in Italy occurred at Venice in 1606, when Paul V laid the city under interdict for serious breaches of ecclesiastical immunities. The Jesuits and some other religious retired from the city, and the Senate, inspired by Paolo Sarpi, the disaffected friar, passed a decree of perpetual banishment against them. In effect, though peace was made ere long with the pope, it was fifty years before the Society could return. Italy during the first two centuries of the Society was still the most cultured country of Europe, and the Italian Jesuits enjoyed a high reputation for learning and letters. The elder Segneri is considered the first of Italian preachers, and there are a number of others of the first class. Maffei, Torsellino, Strada, Pallavicino, and Bartoli (q. v.) have left historical works which are still highly prized. Between Bellarmine (d. 1621) and Zaccharia (d. 1795) Italian Jesuits of note in theology, controversy, and subsidiary sciences are reckoned by the score. They also claim a large proportion of the saints, martyrs, generals, and missionaries. (See also BELLECIUS; BOLGENI; BOSCOVICH; POSSEVINUS; SCARAMELLI; VIVA.) Italy was divided into five provinces, with the following figures for the year 1749 (shortly before the beginning of the movement for the Suppression of the Society): Rome, 848; Naples, 667; Sicily, 775; Venice, 707; Milan, 625; total, 3622 members, about one-half of whom were priests, with 178 houses.

Spain.—Though the majority of Ignatius's companions were Spaniards, he did not gather them together in Spain, and the first Jesuits paid only passing visits there. In 1544, however, Father Araoz, cousin of St. Ignatius and a very eloquent preacher, came with six companions, and then their success was rapid. On 1 September, 1547, Ignatius established the province of Spain with seven houses and about forty religious; St. Francis Borgia joined in 1548; in 1550 Lainez accompanied the Spanish troops in their African campaign. With rapid success came unexpected opposition. Melchoir Cano, O.P., a theologian of European reputation, attacked the young order, which could make no effective reply, nor could anyone get the professor to keep the peace. But, very unpleasant as the trial was, it eventually brought advantage to the order, as it advertized it well in university circles, and moreover drew out defenders of unexpected efficiency, as Juan de la Peña of the Dominicans, and even their general, Fra Francisco Romeo. The Jesuits continued to prosper, and Ignatius subdivided (29 September, 1554) the existing province into three, containing twelve houses and 139 religious. Yet there were internal troubles both here and in Portugal under Simon Rodriguez, which gave the founder anxieties. In both countries the first houses had been established before the Constitutions and rules were committed to writing. It was inevitable therefore that the discipline introduced by Araoz and Rodriguez should have differed somewhat from that which was being introduced by Ignatius at Rome. In Spain, the good offices of Borgia and the visits of Father Nadal did much to effect a gradual unification of system, though not without difficulty. These troubles, however, affected the higher officials of the order rather than the rank and file, who were animated by the highest motives. The great preacher Ramírez is said to have attracted 500 vocations to religious orders at Salamanca in the year 1564, about fifty of them to the Society. There were 300 Spanish Jesuits at the death of Ignatius in 1556; and 1200 at the close of Borgia's generalate in 1572. Under the non-Spanish generals who followed there was an unpleasant recrudescence of the nationalistic spirit. Considering the quarrels which daily arose between Spain and other nations, there can be no wonder at such ebullitions. As has been explained under ACQUAVIVA, Philip of Spain lent his aid to the discontented parties, of whom the virtuous José de Acosta was the spokesman, Fathers Hernández, Dionysius Vásquez, Henríquez, and Mariana the real leaders. Their ulterior object was to procure a separate commissary-general for Spain. This trouble was not quieted till the fifth congregation, 1593, after which ensued the great debates *de auxiliis* with the Dominicans, the protagonists on both sides being Spaniards. (See CONGREGATIO DE AUXILIIS; GRACE, CONTROVERSIES ON.)

THE GESÙ, ROME

Serious as these troubles were in their own sphere, they must not be allowed to obscure the fact that in the Society, as in all Catholic organizations of that day, Spaniards played the greatest rôles. When we enumerate their great men and their great works, they defy all comparison. This consideration gains further force when we remember that the success of the Jesuits in Flanders and in the parts of Italy then united with the Spanish crown was largely due to Spanish Jesuits; and the same is true of the Jesuits in Portugal, which country with its far-stretching colonies was also under the Spanish Crown from 1581 to 1640, though neither the organization of the Portuguese Jesuits nor the civil government of the country itself was amalgamated with those of Spain. But it was in the more abstract sciences that the Spanish genius shone with its greatest lustre; Toledo (d. 1596), Molina (1600), de Valentia (1603), Vásquez (1604), Suárez (1617), Ripalda (1648), de Lugo (1660) (qq. v.)—these form a group of unsurpassed brilliance, and there are quite a number of others almost equally remarkable. In moral theology, Sánchez (1610), Azor (1603), Salas (1612), Castro Palao (1633), Torres (Turrianus, 1635), Escobar y Mendoza (1669). In Scripture, Maldonado (1583), Salmerón (1585), Francisco Ribera (1591), Prado (1595), Pereira (1610), Sancio (1628), Pineda (1637). In secular literature mention may be made especially of de Isla (q. v.), and Baltasar Gracián (1584–1658), author of the "Art of Worldly Wisdom" (El oráculo) and "El criticon", which seems to have suggested the idea of "Robinson Crusoe" to Defoe.

Following the almost universal custom of the later seventeenth century, the kings of Spain generally had Jesuit confessors; but their attempts at reform were too often rendered ineffective by court intrigues. This was especially the case with the Austrian, Father, later Cardinal, Everard Nidhard (confessor of Maria Anna of Austria), and Père Daubenton, confessor of Philip V. After the era of the great writers, the chief glory of the Spanish

Jesuits is to be found in their large and flourishing foreign missions in Peru, Chile, New Granada, the Philippines, Paraguay, Quito, which will be noticed under "Missions", below. They were served by 2171 Jesuits at the time of the Suppression. Spain itself in 1749 was divided into five provinces: Toledo with 659 members, Castile, 718; Aragon, 604; Seville, 662; Sardinia, 300; total, 2943 members (1342 priests) in 158 houses.

Portugal.—At the time when Ignatius founded his order Portugal was in her heroic age. Her rulers were men of enterprise, her universities were full of life, her trade routes extended over the then known world. The Jesuits were welcomed with enthusiasm and made good use of their opportunities. St. Francis Xavier, traversing Portuguese colonies and settlements, proceeded to make his splendid missionary conquests. These were continued by his confrères in such distant lands as Abyssinia, the Congo, South Africa, China, and Japan, by Fathers Nunhes, Silveira, Acosta, Fernandes, and others. At Coimbra, and afterwards at Evora, the Society made the most surprising progress under such professors as Pedro de Fonseca (d. 1599), Luis Molina (d. 1600), Christovão Gil, Sebastião de Abreu, etc., and from here also comes the first comprehensive series of philosophical and theological textbooks for students (see CONIMBRICENSES). With the advent of Spanish monarchy, 1581, the Portuguese Jesuits suffered no less than the rest of their country. Luis Carvalho joined the Spanish opponents of Father Acquaviva, and when the Apostolic collector, Ottavio Accoramboni, launched an interdict against the Government of Lisbon, the Jesuits, especially Diego de Areda, became involved in the undignified strife. On the other hand they played an honourable part in the restoration of Portugal's liberty in 1640; and on its success the difficulty was to restrain King João IV from giving Father Manuel Fernandes a seat in the Cortes, and employing others in diplomatic missions. Amongst these Fathers was Antonio Vieira, one of Portugal's most eloquent orators. Up to the Suppression Portugal and her colonists supported the following missions, of which further notices will be found elsewhere. Goa (originally India), Malabar, Japan, China, Brazil, Maranhão. The Portuguese province in 1749 numbered 861 members (384 priests) in 49 houses. (See also VIEIRA. ANTONIO; MALAGRIDA, GABRIEL.)

FAÇADE OF THE ROMAN COLLEGE

France.—The first Jesuits, though almost all Spaniards, were trained and made their first vows in France, and the fortunes of the Society in France have always been of exceptional importance for the body at large. In early years its young men were sent to Paris to be educated there as Ignatius had been. They were hospitably received by Guillaume du Prat, Bishop of Clermont, whose *hôtel* grew into the Collège de Clermont (1550), afterwards known as Louis-le-Grand. Padre Viola was the first rector, but the public classes did not begin till 1564. The *Parlement* of Paris and the Sorbonne resisted vehemently the letters patent, which Henry II and, after him, Francis II and Charles IX, had granted with little difficulty. Meantime the same Bishop of Clermont had founded a second college at Billom in his own diocese, which was opened on 26 July, 1556, before the first general congregation. Colleges at Mauriac and Pamiers soon followed, and between 1565 and 1575 others at Avignon, Chambéry, Toulouse, Rodez, Verdun, Nevers, Bordeaux, Pont-à-Mousson; while Fathers Coudret, Auger, Roger, and Pelletier distinguished themselves by their apostolic labours. The utility of the order was also shown in the Colloquies at Poissy (1561) and St-Germain-en-Laye by Fathers Lainez and Possevinus, and again by Father Brouet, who, with two companions, gave his life in the service of the plague-stricken at Paris in 1562; while Father Maldonado lectured with striking effect both at Paris and Bourges.

Meantime serious trouble was growing up with the University of Paris due to a number of petty causes, jealousy of the new teachers, rivalry with Spain, Gallican resentment at the enthusiastic devotion of the Jesuits to Rome, with perhaps a spice of Calvinism. A lawsuit for the closing of Clermont College was instituted before the *Parlement*, and Estienne Pasquier, counsel for the university, delivered a celebrated *plaidoyer* against the Jesuits. The *Parlement*, though then favourable to the order, was anxious not to irritate the university, and came to an indecisive settlement (5 April, 1565). The Jesuits, in spite of the royal license, were not to be incorporated in the university, but they might continue their lectures. Unsatisfied with this, the university retaliated by preventing the Jesuit scholars from obtaining degrees; and later (1573–6), a feud was maintained against Father Maldonado (q. v.), which was eventually closed by the intervention of Gregory XIII, who had also in 1572 raised the College of Pont-à-Mousson to the dignity of a university. But meantime the more or less incessant wars of religion were devastating the land, and from time to time several Jesuits, especially Auger and Manare, were acting as army chaplains. They had no connexion with the Massacre of St. Bartholomew (1572); but Maldonado was afterwards deputed to receive Henry of Navarre (afterwards Henry IV) into the Church, and in many places the Fathers were able to shelter fugitives in their houses; and by remonstrance and intercession they saved many lives.

Immediately after his coronation (1575) Henry III chose Father Auger for his confessor, and for exactly two hundred years the Jesuit court confessor became an institution in France; and, as French fashions were then influential, every Catholic Court in time followed the precedent. Considering the difficulty of any sort of control over autocratic sovereigns, the institution of a court confessor was well adapted to the circumstances. The occasional abuses of the office which occurred are chiefly to be attributed to the exorbitant powers vested in the autocrat, which no human guidance could save from periods of decline and degradation. But this was more clearly seen later on. A crisis for French Catholicism was near when, after the death of François, Duke of Anjou, 1584, Henri de Navarre, now an apostate, stood heir to the throne, which the feeble Henry III could not possibly retain for long. Sides were taken with enthusiasm, and *La sainte ligue* was formed for the defence of the Church (see League, The; Guise, House of; France). It was hardly to be expected that the Jesuits to a man should have remained cool, when the whole populace was in a ferment of excitement. It was morally impossible to keep the Jesuit friends of the *exaltés* on both sides from participating in their extreme measures. Auger and Claude Matthieu were respectively in the confidence of the two contending parties, the Court and the League. Father Acquaviva succeeded in withdrawing both from France, though with great difficulty and considerable loss of favour on either side. One or two he could not control for some time, and of these the most remarkable was Henri Samerie, who had been chaplain to Mary Stuart, and became later army chaplain in Flanders. For a year he passed as diplomatic agent from one prince of the League to another, evading, by their means and the favour of Sixtus V, all Acquaviva's efforts to get him back to regular life. But in the end discipline prevailed; and Acquaviva's orders to respect the consciences of both sides enabled the Society to keep friends with all.

R. P. IOANNES PAVLVS OLIVA GENVENSIS PRÆPOSITVS GEN. XI SOCIE. IESV.
Electus in Congrega. Generali
7 July 1661
Obijt 26
Novem 1681
ætatis 81

John Paul Oliva, Eleventh General of the Society of Jesus, d. 1681

Henry IV made much use of the Jesuits (especially Toledo, Possevinus, and Commolet), although they had favoured the League, to obtain canonical absolution and the conclusion of peace; and in time (1604) took Père Coton (q. v.) as his confessor. This, however, is an anticipation. After the attempt on Henry's life by Jean Chastel (27 December, 1594), the *Parlement* of Paris took the opportunity of attacking the Society with fury, perhaps in order to disguise the fact that they had been among the most extreme of the Leaguers, while the Society was among the more moderate. It was pretended that the Society was responsible for Chastel's crime, because he had once been their student: though in truth he was then at the university. The librarian of the Jesuit College, Jean Guignard, was hanged, 7 January, 1595, because an old book against the king was found in a cupboard of his room. Antoine Arnauld, the elder, brought into his *plaidoyer* before the *Parlement* every possible calumny against the Society, and the Jesuits were ordered to leave Paris in three days and France in a fortnight. The decree was executed in the districts subject to the *Parlement* of Paris, but not elsewhere. The king, not being yet canonically absolved, did not then interfere. But the pope, and many others, pleaded earnestly for the revocation of the decree against the order. The matter was warmly debated, and eventually Henry himself gave the permission for its readmission, on 1 Sept., 1603. He now made great use of the Society, founded for it the great College of La Flèche, encouraged its missions at home, in Normandy and Béarn, and the commencement of the foreign missions in Canada and the Levant.

The Society immediately began to increase rapidly, and counted thirty-nine colleges, besides other houses, and 1135 religious before the king fell under Ravaillac's dagger (1610). This was made the occasion for new assaults by the *Parlement*, who availed themselves of Mariana's book "De rege" to attack the Society as defenders of tyrannicide. Suarez's "Defensio fidei" was burnt in 1614. The young king, Louis XIII, was too weak to curb the *parlementaires*, but both he and the people of France favoured the Society so effectively that at the time of his death in 1643 their numbers had trebled. They now had five provinces, and that of Paris alone counted over 13,000 scholars in its colleges. The confessors during this reign were changed not unfrequently by the manœuvres of Richelieu, and include Pères Arnoux de Séguiron, Suffren, Caussin (q. v.), Sirmond, Dinet. Richelieu's policy of supporting the German Protestants against Catholic Austria (which Caussin resisted) proved the occasion for angry polemics. The German Jesuit Jacob Keller was believed (though proof of authorship is altogether wanting) to have written two strong pamphlets, "Mysteria politica" and "Admonitio ad Ludovicum XIII", against France. The books were burned by the hangman, as in 1626 was a work of Father Santarelli, which touched awkwardly on the pope's power to pronounce against princes.

The politico-religious history of the Society under Louis XIV centres round Jansenism (see Jansenius and Jansenism) and the lives of the king's confessors, especially Pères Annat (1645–60), Ferrier (1660–74), La Chaise (q. v.) (1674–1709), and Michel Le Tellier, (q. v.), (1709–15). On 24 May, 1656, Blaise Pascal (q. v.) published the first of his "Provinciales". The five propositions of Jansenius having been condemned by papal authority, Pascal could no longer defend them openly, and found the most effective method of retaliation was satire, raillery, and countercharge against the Society. He concluded with the usual evasion that Jansenius did not write in the sense attributed to him by the pope. The "Provinciales" were the first noteworthy example in the French language of satire written in studiously polite and moderate terms; and their great literary merit appealed powerfully to the French love of cleverness. Too light to be effectively answered by refutation, they were at the same time sufficiently envenomed to do great and lasting harm; although they have frequently been proved to misrepresent the teaching of the Jesuits by omissions, alterations, interpolations, and false contexts, notably by Dr. Karl Weiss, of Gratz, "P. Antonio de Escobar y Mendoza als Moraltheologe in Pascals Beleuchtung und im Lichte der Wahrheit".

CLAVDIVS AQVAVIVA NEAPOLIT. V. GENERALIS

Claudius Acquaviva, Fifth General of the Society of Jesus, d. 1615
From an engraving by Hieronymus Wierx

The cause of the Jesuits was also compromised by the various quarrels of Louis XIV with Innocent XI, especially concerning the *régale* and the Gallican articles of 1682. (See LOUIS XIV and INNOCENT XI. The different standpoints of these articles may help to illustrate the differences of view prevalent within the order on this subject.) At first there was a tendency on both sides to spare the French Jesuits. They were not at that time asked to subscribe to the Gallican articles, while Innocent overlooked their adherence to the king, in hopes that their moderation might bring about peace. But it was hardly possible that they should escape all troubles under a domination so pressing. Louis conceived the idea of uniting all the French Jesuits under a vicar, independent of the general in Rome. Before making this known, he recalled all his Jesuit subjects, and all, even the assistant, Père Fontaine, returned to France. Then he proposed the separation, which Thyrsus González firmly refused. The provincials of the five French Jesuit provinces implored the king to desist, which he eventually did. It has been alleged that a papal decree forbidding the reception of novices between 1684–6 was issued in punishment of the French Jesuits giving support to Louis (Crétineau-Joly). The matter is alluded to in the Brief of Suppression; but it is still obscure, and would seem rather to be connected with the Chinese rites than with the difficulties in France. Except for the interdict on their schools in Paris, 1716–29, by Cardinal de Noailles, the fortunes of the order were very calm and prosperous during the ensuing generation. In 1749 the French Jesuits were divided into five provinces with members as follows: France, 891; Aquitaine, 437; Lyons, 773; Toulouse, 655; Champagne, 594; total, 3350 (1763 priests) in 158 houses.

Germany.—The first Jesuit to labour here was Bl. Peter Faber (q. v.), who won to their ranks Bl. Peter Canisius (q. v.), to whose lifelong diligence and eminent holiness the rise and prosperity of the German provinces are especially due. In 1556 there were two provinces, South Germany (*Germania Superior*, up to and including Mainz) and North Germany (*Rhenana*, or *Germania Inferior*, including Flanders). The first residence of the Society was at Cologne (1544), the first college at Vienna (1552). The Jesuit colleges were soon so popular that they were demanded on every side, faster than they could be supplied, and the greater groups of these became fresh provinces. Austria branched off in 1563, Bohemia in 1623, Flanders had become two separate provinces by 1612, and Rhineland also two provinces in 1626. At that time the five German-speaking provinces numbered over 100 colleges and academies. But meanwhile all Germany was in turmoil with the Thirty Years War, which had so far gone, generally, in favour of the Catholic powers. In 1629 came the *Restitutionsedikt* (see COUNTER-REFORMATION), by which the emperor redistributed with papal sanction the old church property, which had been recovered from the usurpation of the Protestants. The Society received large grants, but was not much benefited thereby. Some bitter controversies ensued with the ancient holders of the properties, who were often Benedictines; and many of the acquisitions were lost again during the next period of the war.

The sufferings of the order during the second period were grievous. Even before the war they had been systematically persecuted and driven into exile by the Protestant princes, whenever these had the opportunity. In 1618 they were banished from Bohemia, Moravia, and Silesia; and after the advent of Gustavus Adolphus the violence to which they were liable was increased. The fanatical proposal of banishing them for ever from Germany was made by him in 1631, and again at Frankfort in 1633; and this counsel of hatred acquired a hold which it still exercises over the German Protestant mind. The initial successes of the Catholics of course excited further antipathies, especially as the great generals Tilly, Wallenstein, and Piccolomini had been Jesuit pupils. During the siege of Prague, 1648, Father Plachy successfully trained a corps of students for the defence of the town, and was awarded the mural crown for his services. The province of Upper Rhine alone lost seventy-seven Fathers in the field-hospitals or during the fighting. After the Peace of Westphalia, 1648, the tide of the Counter-Reformation had more or less spent itself. The foundation period had passed, and there are few external events to chronicle. The last notable conversion was that of Prince Frederick Augustus of Saxony (1697), afterwards King of Poland. Fathers Vota and Salerno (afterwards a cardinal) were intimately connected with his conversion. Within the walls of their colleges and in the churches throughout the country the work of teaching, writing, and preaching continued unabated, while the storms of controversy rose and fell, and the distant missions, especially China and the Spanish missions of South America, claimed scores of the noblest and most high-spirited. To this period belong Philipp Jenigen (d. 1704) and Franz Hunolt (d. 1740), perhaps the greatest German Jesuit preachers; Tschupick, Joseph Schneller, and Ignatius Wurz acquired an almost equally great reputation in Austria. In 1749 the German provinces counted as follows: *Germania Superior*, 1060; Lower Rhine, 772; Upper Rhine, 497; Austria, 1772; Bohemia, 1239; total, 5340 members (2558 priests) in 307 houses. (See also the Index volume under title "Society of Jesus", and such names as Becan, Byssen, Brouwer, Drechsel, Lohner, etc.)

Hungary was included in the province of Austria. The chief patron of the order was Cardinal Pázmány (q. v.). The conversion of Sweden was several times attempted by German Jesuits, but they were not allowed to stay in the country. King John III, however, who had married a Polish princess, was actually converted (1578) through various missions by Fathers Warsiewicz and Possevinus, the latter accompanied by the English Father William Good; but the king had not the courage to persevere. Queen Christina (q. v.) in 1654 was brought into the Church, largely through the ministration of Fathers Macedo and Casati, having given up her throne for this purpose. The Austrian Fathers maintained a small residence at Moscow from 1684 to 1718, which had been opened by Father Vota. (See POSSEVINUS.)

Poland.—Bl. Peter Canisius, who visited Poland in the train of the legate Mantuato in 1558, succeeded in animating King Sigismund to energetic defence of Catholicism, and Bishop Hosius of Ermland founded the college of Braunsberg in 1584, which with that of Vilna (1569) became centres of Catholic activity in north-eastern Europe. King Stephen Bathory, an earnest patron of the order, founded a Ruthenian College at Vilna in 1575. From 1588 Father Peter Skarga (d. 1612) made a great impression by his preaching. There were violent attacks against the Society in the revolution of 1607, but after the victory of Sigismund III the Jesuits more than recovered the ground lost; and in 1608 the province could be subdivided into Lithuania and Poland. The animus against the Jesuits however vented itself at Cracow in 1612, through the scurrilous satire entitled "Monita secreta" (q. v.). King Casimir, who had once been a Jesuit, favoured the Society not a little; so too did Sobieski, and his campaign to relieve Vienna from the Turks (1683) was due in part to the exhortations of Father Vota, his confessor. Among the great Polish missionaries are numbered Benedict Herbst (d. 1593) and Bl. Andrew Bobola (q. v.). In 1756 the Polish provinces were readjusted into four:—Greater Poland; Lesser Poland; Lithuania; Massovia, counting in all 2359 religious. The Polish Jesuits, besides their own missions, had others in Stockholm, Russia, the Crimea, Constantinople, and Persia. (See Cracow, University of.)

Belgium.—The first settlement was at Louvain in 1542, whither the students in Paris retired on the declaration of war between France and Spain. In 1556 Ribadeneira obtained legal authorization for the Society from Philip II, and in 1564 Flanders became a separate province. Its beginnings, however, were by no means uniformly prosperous. The Duke of Alva was cold and suspicious, while the wars of the revolting provinces told heavily against it. At the Pacification of Ghent (1576) the Jesuits were offered an oath against the rulers of the Netherlands, which they firmly refused, and were driven from their houses. But this at last won for them Philip's favour, and under Alexander Farnese fortune turned completely in their favour. Father Oliver Manare became a leader fitted for the occasion, whom Acquiviva himself greeted as "Pater Provinciæ". In a few years a number of well-established colleges had been founded, and in 1612 the province had to be subdivided. The *Flandro-Belgica* counted sixteen colleges and the *Gallo-Belgica* eighteen. All but two were day-schools, with no preparatory classes for small boys. They were worked with comparatively small staffs of five or six, sometimes only three professors, though their scholars might count as many hundreds. Teaching was gratuitous, but a sufficient foundation for the support of the teachers was a necessary preliminary. Though preparatory and elementary education was not yet in fashion, the care taken in teaching catechism was most elaborate. The classes were regular, and at intervals enlivened with music, ceremonies, mystery-plays, and processions. These were often attended by the whole magistracy in robes of state, while the bishop himself would attend at the distribution of honours. A special congregation was formed at Antwerp in 1628, to organize ladies and gentlemen, nobles and bourgeois, into Sunday-school teachers, and in that year their classes counted in all 3000 children. Similar organizations existed all over the country. The first communion classes formed an extension of the catechisms. In Bruges, Brussels, and Antwerp between 600 and 1600 attended the communion classes.

Jesuit congregations of the Blessed Virgin were first instituted at Rome by a Belgian Jesuit, Jean Leunis, in 1563. His native country soon took them up with enthusiasm. Each college had normally four:—(1) for scholars (more often two, one for older, one for younger); (2) for young men on leaving; (3) for grown-up men (more often several)—for working-men, for tradesmen, professional classes, nobles, priests, doctors, etc., etc.; (4) for small boys. In days before hospitals, workhouses, and elementary education were regularly organized, and supported by the State; before burial-clubs, trade-unions, and the like provided special help for the working-man, these sodalities discharged the functions of such institutions, in homely fashion perhaps, but gratuitously, bringing together all ranks for the relief of indigence. Some of these congregations were exceedingly popular, and their registers still show the names of the first artists and savants of the time (Teniers, Van Dyck, Rubens, Lipsius, etc.). Archdukes and kings and even four emperors are found among the sodalists of Louvain. Probably the first permanent corps of army chaplains was that established by Farnese in 1587. It consisted of ten to twenty-five chaplains, and was styled the "Missio castrensis," and lasted as an institution till 1660. The "Missio navalis" was a kindred institution for the navy. The Flandro-Belgian province numbered 542 in 1749 (232 priests) in 30 houses: Gallo-Belgian, 471 (266 priests) in 25 houses.

England.—Founded at Rome after the English Schism had commenced, the Society had great difficulty in finding an entrance into England, though Ignatius and Ribadeneira visited the country in 1531 and 1558, and prayers for its conversion have been recited throughout the order from 1553 to the present day (now under the common designation of "Northern Nations"). Other early Jesuits exerted themselves on behalf of the English seminary at Douai and of the refugees at Louvain. The effect of Elizabeth's expulsion of Catholics from Oxford, 1562–75, was that many took refuge abroad. Some scores of young men entered the Society, several of these volunteered for foreign missions, and thus it came about that the forerunner of those legions of Englishmen who go into India to carve out careers was the English Jesuit missionary, Thomas Stephens. John Yate (*alias* Vincent, b. 1550; d. after 1603) and John Meade (see Almeida) were pioneers of the mission to Brazil. The most noteworthy of the first recruits were Thomas Darbishire and William Good, followed in time by Blessed Edmund Campion (q.v.) and Robert Persons. The latter was the first to conceive and elaborate the idea of the English mission, which, at Dr. Allen's request, was undertaken in December, 1578.

A Public Catechism at Vienna, 1599
From a contemporary print

Before this the Society had undertaken the care of the English College, Rome (see English College), by the pope's command, 19 March, 1578. But difficulties ensued, owing to the miseries inherent in the estate of the religious refugees. Many came all the way to Rome expecting pensions, or scholarships from the rector, who at first became, in spite of himself, the dispenser of Pope Gregory's alms. But the alms soon failed, and several scholars had to be dismissed as unworthy. Hence disappointments and storms of grumbling, the records of which read sadly by the side of the consoling accounts of the martyrdoms of men like Campion, Cottam, Southwell, Walpole, Page, and others, and the labours of a Heywood, Weston, or Gerard. Persons and Crichton too, falling in with the idea, so common abroad, that a counter-revolution in favour of Mary Stuart would not be difficult, made two or three political missions to Rome and Madrid (1582-84) before realizing that their schemes were not feasible (see Persons). After the Armada (q. v.), Persons induced Philip to establish more seminaries, and hence the foundations at Valladolid, St-Omer, and Seville (1589, 1592, 1593), all put in charge of the English Jesuits. On the other hand they suffered a setback in the so-called Appellant controversy (1598–1602), which French diplomacy in Rome eventually made into an opportunity for operating against Spain. (See BLACKWELL; GARNET.) The assistance of France and the influence of the French Counter-Reformation were now on the whole highly beneficial. But many who took refuge at Paris became accustomed to a Gallican atmosphere, and hence perhaps some of the regalist views about the Oath of Allegiance and some of the excitement in the debate over the jurisdiction of the Bishops of Chalcedon, of which more below. The feeling of tension continued until the missions of Pazani, Conn, and Rosetti, 1635–41. Though the first of these was somewhat hostile, he was recalled in 1637, and his successors brought about a peace, too soon to be interrupted by the Civil War, 1641–60.

Before 1606 the English Jesuits had founded houses for others, but neither they nor any other English order had yet erected houses for themselves. But during the so-called "Foundation Movement", due to many causes but especially perhaps to the stimulus of the Counter-Reformation (q. v.) in France, a full equipment of institutions was established in Flanders. The novitiate, begun at Louvain in 1606, was moved to Liège in 1614, and in 1622 to Watten. The house at Liège was continued as the scholasticate, and the house of third probation was at Ghent 1620. The "mission" was made in 1619 a vice-province, and on 21 January, 1623, a province, with Fr. Richard Blount as first provincial; and in 1634 it was able to undertake the foreign mission of Maryland (see below) in the old Society. The English Jesuits at this period also reached their greatest numbers. In 1621 they were 211, in 1636, 374. In the latter year their total revenue amounted to 45,086 *scudi* (almost £11,000). After the Civil War both members and revenue fell off very considerably. In 1649 there were only 264 members, and 23,055 *scudi* revenue (about £5760); in 1645 the revenue was only 17,405 *scudi* (about £4350).

Since Elizabeth's time the martyrs had been few—one only, the Ven. Edmund Arrowsmith (q. v.), in the reign of Charles I. On 26 October, 1623, had occurred "the Doleful Even-song". A congregation had gathered for vespers in the garrets of the French embassy in Blackfriars, when the floor gave way. Fathers Drury and Rediate with 61 (perhaps 100) of the congregation were killed. On 14 March, 1628, seven Jesuits were seized at St. John's, Clerkenwell, with a large number of papers. These troubles, however, were light, compared with the sufferings during the Commonwealth, when the list of martyrs and confessors went up to ten. As the Jesuits depended so much on the country families, they were sure to suffer severely by the war, and the college at St-Omer was nearly beggared. The old trouble about the Oath of Allegiance was revived by the Oath of Abjuration, and "the three questions" proposed by Fairfax, 1 August, 1647 (see WHITE, THOMAS). The representatives of the secular and regular clergy, amongst them Father Henry More, were called upon at short notice to subscribe to them. They did so, More thinking he might, "considering the reasons of the preamble", which qualified the words of the oath considerably. But the provincial, Fr. Silesdon, recalled him from England, and he was kept out of office for over a year; a punishment which, even if drastic for his offence, cannot be regretted, as it providentially led to his writing the history of the English Jesuits down to the year 1635 ("Hist. missionis anglicanæ Soc. Jesu, ab anno salutis MDLXXX", St-Omer, 1660).

With the Restoration, 1660, came a period of greater calm, followed by the worst tempest of all, Oates's plot (q. v.), when the Jesuits lost eight on the scaffold and thirteen in prison in five years, 1678–83. Then the period of greatest prosperity under King James II (1685–8). He gave them a college, and a public chapel in Somerset House, made Father Petre his almoner, and on 11 November, 1687, a member of his Privy Council. He also chose Father Warner as his confessor, and encouraged the preaching and controversies which were carried on with no little fruit. But this spell of prosperity lasted only a few months; with the Revolution of 1688 the Fathers regained their patrimony of persecution. The last Jesuits to die in prison were Fathers Poulton and Aylworth (1690–1692). William III's repressive legislation did not have the intended effect of exterminating the Catholics, but it did reduce them to a proscribed and ostracized body. Thenceforward the annals of the English Jesuits show little that is new or striking, though their number and works of charity were well maintained. Most of the Fathers in England were chaplains to gentlemen's families, of which posts they held nearly a hundred during the eighteenth century.

The church law under which the English Jesuits worked was to some extent special. At first indeed all was undefined, seculars and regulars living in true happy-family style. As, however, organization developed, friction between parts could not always be avoided, and legislation became necessary. By the institution of the archpriest (7 March, 1598), and by the subsequent modifications of that institution (6 April, 1599; 17 August, 1601; and 5 October, 1602), various occasions for friction were removed, and principles of stable government were introduced. As soon as Queen Henrietta Maria seemed able to protect a bishop in England, bishops of Chalcedon *in partibus infidelium* were sent, in 1623 and 1625. The second of these, Dr. Richard Smith, endeavoured, without having the necessary faculty from Rome, to introduce the episcopal approbation of confessors. This led to the Brief "Britannia", 9 May, 1631, which left the faculties of regular missionaries in their previous immediate dependence on the Holy See. But after the institution of vicars Apostolic in 1685, by a Decree of 9 October, 1695, regulars were obliged to obtain approbation from the bishop. There were of course many other matters that needed settlement, but the difficulties of the position in England and the distance from Rome made legislation slow and difficult. In 1745 and 1748 Decrees were obtained, against which appeals were lodged; and it was not till 31 May, 1753, that the "Regulæ missionis" were laid down by Benedict XIV in the Constitution "Apostolicum ministerium", which regulated ecclesiastical administration until the issue of the Constitution "Romanos Pontifices" in 1881. In the year of the Suppression, 1773, the English Jesuits numbered 274. (See COFFIN, EDWARD; CRESWELL; ENGLISH CONFESSORS AND MARTYRS; MORE, HENRY; PENAL LAWS; PERSONS, ROBERT; PETRE, SIR EDWARD; PLOWDEN; SABRAN, LOUIS DE; SOUTHWELL; SPENSER, JOHN; STEPHENS, THOMAS; REDFORD.)

Ireland.—One of the first commissions which the popes entrusted to the Society was that of acting as envoys to Ireland. Fathers Salmerón and Brouet managed to reach Ulster during the Lent of 1542; but the immense difficulties of the situation after Henry VIII's successes of 1541 made it impossible for them to live there in safety, much less to discharge the functions or to commence the reforms which the pope had entrusted to them. Under Queen Mary the Jesuits would have returned had there been men ready. There were indeed already a few Irish novices, and of these David Woulfe returned to Ireland on 20 January, 1561, with ample Apostolic faculties. He procured candidates for the sees emptied by Elizabeth, kept open a grammar school for some years, and sent several novices to the order; but he was finally imprisoned, and had to withdraw to the Continent. A little later the "Irish mission" was regularly organized under Irish superiors, beginning with Fr. Richard Fleming (d. 1590), professor at Clermont College, and then Chancellor of the University of Pont-à-Mousson. In 1609 the mission numbered seventy-two, forty of whom were priests, and eighteen were at work in Ireland. By 1617 this latter number had increased to thirty-eight; the rest were for the most part in training among their French and Spanish confrères. The foundation of colleges abroad, at Salamanca, Santiago, Seville, and Lisbon, for the education of the clergy, was chiefly due to Father Thomas White (d. 1622). They were consolidated and long managed by Fr. James Archer of Kilkenny, afterwards missionary in Ulster and chaplain to Hugh O'Neill. The Irish College at Poitiers was also under Irish Jesuit direction, as was that of Rome for some time (see Irish College, in Rome).

The greatest extension in Ireland was naturally during the dominance of the Confederation (1642–54), with which Father Matthew O'Hartigan was in great favour. Jesuit colleges, schools, and residences then amounted to thirteen, with a novitiate at Kilkenny. During the Puritan domination the number of Jesuits fell again to eighteen; but in 1685, under James II, there were twenty-eight with seven residences. After the Revolution their numbers fell again to six, then rose to seventeen in 1717, and to twenty-eight in 1755. The Fathers sprang mostly from the old Anglo-Norman families, but almost all the missionaries spoke Irish, and missionary labour was the chief occupation of the Irish Jesuits. Fr. Robert Rochford set up a school at Youghal as early as 1575; university education was given in Dublin in the reign of Charles I, until the buildings were seized and handed over to Trinity College; and Father John Austin kept a flourishing school in Dublin for twenty-two years before the Suppression.

Some account of the work of Jesuits in Ireland will be found in the articles on Fathers Christopher Holywood and Henry Fitzsimon; but it was abroad, from the nature of the case, that Irish genius of that day found its widest recognition. Stephen White, Luke Wadding, cousin of his famous Franciscan namesake, at Madrid; Ambrose and Peter Wadding at Dillingen and Gratz respectively; J. B. Duiggin and John Lombard at Ypres and Antwerp; Thomas Comerford at Compostella; Paul Sherlock at Salamanca; Richard Lynch (1611–76) at Valladolid and Salamanca; James Kelly at Poitiers and Paris; Peter Plunkett at Leghorn. Among the distinguished writers were William Bathe, whose "Janua linguarum" (Salamanca, 1611) was the basis of the work of Commenius. Bernard Routh (b. at Kilkenny, 1695) was a writer in the "Mémoires de Trévoux" (1734–43), and assisted Montesquieu on his death-bed. In the field of foreign missions O'Fihily was one of the first apostles of Paraguay, and Thomas Lynch was provincial of Brazil at the time of the Suppression. At this time also Roger Magloire was working in Martinique, and Philip O'Reilly in Guiana. But it was the mission-field in Ireland itself of which the Irish Jesuits thought most, to which all else in one way or other led up. Their labours were principally spent in the walled cities of the old English Pale. Here they kept the faith vigorous, in spite of persecutions, which, if sometimes intermitted, were nevertheless long and severe. The first Irish Jesuit martyr was Edmund O'Donnell, who suffered at Cork in 1575. Others on that list of honour are: Dominic Collins, a lay brother, Youghal, 1602; William Boyton, Cashel, 1647; Fathers Netterville and Bathe, at the fall of Drogheda, 1649. Fr. David Galway worked among the scattered and persecuted Gaels of the Scottish Isles and Highlands, until his death in 1643. (See also Fitzsimon; Malone; O'Donnell; Talbot, Peter; Irish Confessors and Martyrs.)

Scotland.—Father Nicholas de Gouda was sent to visit Mary Queen of Scots in 1562 to invite her to send bishops to the Council of Trent. The power of the Protestants made it impossible to achieve this object, but de Gouda conferred with the queen and brought back with him six young Scots, who were to prove the founders of the mission. Of these Edmund Hay soon rose to prominence and was rector of Clermont College, Paris. In 1584 Crichton returned with Father James Gordon, uncle to the Earl of Huntly, to Scotland; the former was captured, but the latter was extraordinarily successful, and the Scottish mission proper may be said to have begun with him, and Father Edmund Hay and John Drury, who came in 1585. The Earl of Huntly became the Catholic leader, and the fortunes of his party passed through many a strange turn. But the Catholic victory of Glenlivet, in 1594, aroused the temper of the Kirk to such a pitch that James, though averse to severity, was forced to advance against the Catholic lords and eventually Huntly was constrained to leave the country and, then returning, he submitted to the Kirk in 1597. This put a term to the spread of Catholicism; Father James Gordon had to leave in 1595, but Father Abercromby succeeded in reconciling Anne of Denmark, who, however, did not prove a very courageous convert. Meantime the Jesuits had been given the management of the Scots College founded by Mary Stuart in Paris, which was successively removed to Pont-à-Mousson and to Douai. In 1600 another college was founded at Rome and put under them, and there was also a small one at Madrid.

DE NOYELLE BRVXELLENSIS PRAEPOSITVS GEN

Charles de Noyelle, Twelfth General of the Society of Jesus, d. 1686

After reaching the English throne James was bent on introducing episcopacy into Scotland, and to reconcile the Presbyterians to this he allowed them to persecute the Catholics to their hearts' content. By their barbarous "excommunication", the suffering they inflicted was incredible. The soul of the resistance to this cruelty was Father James Anderson, who, however, becoming the object of special searches, had to be withdrawn in 1611. In 1614 Fathers John Ogilvie (q.v.) and James Moffat were sent in, the former suffering martyrdom at Glasgow, 10 March, 1615. In 1620 Father Patrick Anderson (q.v.) was tried, but eventually banished. After this, a short period of peace, 1625–7, ensued, followed by another persecution 1629–30, and another period of peace before the rising of the Covenanters and the civil wars, 1638–45. There were about six Fathers in the mission at this time, some chaplains with the Catholic gentry, some living the then wild life of the Highlanders, especially during Montrose's campaigns. But after Philiphaugh (1645) the fortunes of the royalists and the Catholics underwent a sad change. Among those who fell into the hands of the enemy was Father Andrew Leslie, who has left a lively account of his prolonged sufferings in various prisons. After the Restoration (1660) there was a new period of peace in which the Jesuit missionaries reaped a considerable harvest, but during the disturbances caused by the Covenanters (q.v.) the persecution of Catholics was renewed. James II favoured them as far as he could, appointing Fathers James Forbes and Thomas Patterson chaplains at Holyrood, where a school was also opened. After the Revolution the Fathers were scattered, but returned, though with diminishing numbers.

History.—A. General.—*Mon. historica Soc. Jesu*, ed. Rodeles (Madrid, 1894, in progress); Orlandini (continued in turn by Sacchini, Jouvancy, and Cordara), *Hist. Soc. Jesu, 1540–1632* (8 vols. fol., Rome and Antwerp, 1615–1750), and *Supplement* (Rome, 1859); Bartoli, *Dell' istoria della comp. di Gesù* (6 vols. fol., Rome, 1663–73); Crétineau-Joly, *Hist. de la comp. de Jésus* (3rd ed., 3 vols., Paris, 1859); B. N., *The Jesuits; their Foundation and History* (London, 1879); [Wernz], *Abriss der Gesch. der Gesellschaft Jesu* (Münster, 1876); Carrez, *Atlas geographicus Soc. Jesu* (Paris, 1900); Heimbucher, *Die Orden und Kongregationen der katholischen Kirche*, III (Paderborn, 1908), 2–258, contains an excellent bibliography; [Quesnel], *Hist. des religieux de la comp. de Jésus* (Utrecht, 1741). Non-Catholic:—Steiz-Zöckler in *Realencycl. für prot. Theol.*, s. v. *Jesuitenorden;* Hasenmüller, *Hist. jesuitici ordinis* (Frankfort, 1593); Hospinianus, *Hist. jesuitica* (Zurich, 1619).

B. Particular Countries.—Italy.—Tacchi-Venturi, *Storia della comp. di G. in Italia* (Rome, 1910, in progress); Schinosi and Santagata, *Istoria della comp. di G. appartenente al regno di Napoli* (Naples, 1706–57); Alberti, *La Sicilia* (Palermo, 1702); Aguilera, *Provinciæ Siculæ Soc. Jesu res gestæ* (Palermo, 1737–40); Cappelletti, *I gesuiti e la republica di Venezia* (Venice, 1873); Favaro, *Lo studio di Padora e la comp. de G.* (Venice, 1877).

Spain.—Astrain, *Hist. de la comp. de J. en la asistencia de España* (Madrid, 1902, 3 vols., in progress); Alcazar, *Chrono-historia de la comp. de J. en la provincia de Toledo* (Madrid, 1710); Prat, *Hist. du P. Ribadeneyra* (Paris, 1862).

Portugal.—Tellez, *Chronica de la comp. de J. na provincia de Portugal* (Coimbra, 1645–7); Franco, *Synop. annal. Soc. Jesu in Lusitania ab anno 1540 ad 1725* (Augsburg, 1726); Teixeira, *Docum. para a hist. dos Jesuitas em Portugal* (Coimbra, 1899).

France.—Fouqueray, *Hist. de la comp. de J. en France* (Paris, 1910); Carayon, *Docum. inéd. concernant la comp. de J.* (23 vols., Paris, 1863–86); Idem, *Les parlements et les jésuites* (Paris, 1867); Prat, *Mém. pour servir à l'hist. du P. Brouet* (Puy, 1885); Idem, *Recherches hist. sur la comp. de J. en France du temps du P. Coton, 1564–1626* (Lyons, 1876); Idem, *Maldonat et l'université de Paris* (Paris, 1856); Donarche, *L'univ. de Paris et les jésuites* (Paris, 1888); Piaget, *L'établissement des jésuites en France 1540–1660* (Leyden, 1893); Chossat, *Les jésuites et leurs œuvres à Avignon* (Avignon, 1896).

Germany, etc.—Agricola (continued by Flotto, Kropf), *Hist. prov. Soc. Jesu Germaniæ superioris (1540–1641)* (5 vols., Augsburg and Munich, 1727–54); Hansen, *Rhein. Akten zur Gesch. des Jesuitenordens 1542–82* (1896); Janssen, *Hist. of the German People*, tr. Christie (London, 1905–10); Duhr, *Gesch. der Jesuiten in den Ländern deutscher Zunge* (Freiburg, 1907); Kroess, *Gesch. der böhmischen Prov. der G. J.* (Vienna, 1910); Mederer, *Annal. Ingolstadiensis academ.* (Ingolstadt, 1782); Reiffenberg, *Hist. Soc. Jesu ad Rhenum inferiorem* (Cologne, 1764); Argento, *De rebus Soc. Jesu in regno Poloniæ* (Cracow, 1620); Pollard, *The Jesuits in Poland* (Oxford, 1882); Zalenski, *Hist. of the Soc. of Jesus in Poland* (in Polish, 1896–1906); Idem, *The Jesuits in White Russia* (in Polish, 1874; Fr. tr., Paris, 1886); Pierling, *Antonii Possevini missio moscovitica* (1883); Rostowski, *Hist. Soc. Jesu Lithuanicarum provincialium* (Wilna, 1765); Schmidl, *Hist. Soc. Jesu prov. Bohemiæ, 1555–1653* (Prague, 1747–59); Socher, *Hist. prov. Austriæ Soc. Jesu, 1540–1590* (Vienna, 1740); Steinhuber, *Gesch. des Coll. Germanicum-Hungaricum* (Freiburg, 1895).

Belgium.—Manare, *De rebus Soc. Jesu commentarius*, ed. Delplace (Florence, 1886); Waldack, *Hist. prov. Flandro-belgicæ Soc. Jesu anni 1638* (Ghent, 1867).

England, Ireland, Scotland.—Foley, *Records of the English Prov. of the Soc. Jesus*—includes Irish and Scotch Jesuits (London, 1877); Spillmann, *Die englischen Märtyrer unter Elizabeih bis 1583* (Freiburg, 1888); Forbes-Leith, *Narr. of Scottish Catholics* (Edinburgh, 1885); Idem, *Mem. of Scot. Cath.* (London, 1909); Hogan, *Ibernia Ignatiana* (Dublin, 1880); Idem, *Distinguished Irishmen of the XVI century* (London, 1894); Meyer, *England und die kath. Kirche unter Elisabeth* (Rome, 1910); More, *Hist. prov. Anglicanæ* (St-Omer, 1660); Persons, *Memoirs*, ed. Pollen in *Cath. Record Society*, II (London, 1896, 1897), iii; Pollen, *Politics of the Eng. Cath. under Elizabeth* in *The Month* (London, 1902–3); Taunton, *The Jesuits in England* (London, 1901).

Missions.—No sphere of religious activity is held in greater esteem among the Jesuits than that of the foreign missions; and from the beginning men of the highest gifts, like St. Francis Xavier, have been devoted to this work. Hence perhaps it is that a better idea may be formed of the Jesuit missions by reading the lives of its great missionaries, which will be found under their respective names (see Index vol.), than from the following notice, in which attention has to be confined to general topics.

India.—When the Society began, the great colonizing powers were Portugal and Spain. The career of St. Francis Xavier (q. v.), so far as its geographical direction and limits were concerned, was largely determined by the Portuguese settlements in the East and the trade routes followed by Portuguese merchants. Arriving at Goa in 1542, he evangelized first the western coast and Ceylon, in 1545 he was in Malacca, in 1549 in Japan. At the same time he pushed forward his few assistants and catechists into other centres; and in 1552 set out for China, but died at the year's end on an island off the coast. Xavier's work was carried on, with Goa as headquarters, and Father Barzæus as successor. Father Antonio Criminali, the first martyr of the Society, had suffered in 1549, and Father Mendez followed in 1552. In 1579 Blessed Rudolph Acquaviva visited the Court of Akbar the Great, but without permanent effect. The great impulse of conversions came after Ven. Robert de Nobili (q. v.) declared himself a Brahmin *Sannjâsî*, and lived the life of the Brahmins (1606). At Tanjore and elsewhere he now made immense numbers of converts, who were allowed to keep the distinctions of their castes, with many religious customs; which, however, were eventually (after much controversy) condemned by Benedict XIV in 1744. This condemnation produced a depressing effect on the mission, though at the very time Fathers Lopez and Acosta with singular heroism devoted themselves for life to the service of the Pariahs. The Suppression of the Society, which followed soon after, completed the desolation of a once prolific missionary field. (See Malabar Rites.) From Goa too were organized missions on the east coast of Africa. The Abyssinian mission under Fathers Nunhes, Oviedo, and Paes lasted with varied fortunes for over a century, 1555–1690 (see Abyssinia, I, 76). The mission on the Zambesi under Fathers Silveira, Acosta, and Fernandez was but short-lived; so too was the work of Father Govea in Angola. In the seventeenth century the missionaries penetrated into Tibet, Fathers Desideri and Freyre reaching Lhasa. Others pushed out in the Persian mission from Ormus as far as Ispahan. About 1700 the Persian missions counted 400,000 Catholics. The southern and eastern coasts of India, with Ceylon, were comprised after 1610 in the separate province of Malabar, with an independent French mission at Pondicherry. Malabar numbered forty-seven missionaries (Portuguese) before the Suppression, while the French missions counted 22. (See Hanxleden.)

Japan.—The Japanese mission (see Japan, VIII, 306) gradually developed into a province, but the seminary and seat of government remained at Macao. By 1582 the number of Christians was estimated at 200,000 with 250 churches and 59 missionaries, of whom 23 were priests, and 26 Japanese had been admitted to the Society. But 1587 saw the beginnings of persecution, and about the same period began the rivalries of nations and of competing orders. The Portuguese crown had been assumed by Spain, and Spanish merchants introduced Spanish Dominicans and Franciscans. Gregory XIII at first forbade this (28 Jan., 1585), but Clement VIII and Paul V (12 December, 1600; 11 June, 1608) relaxed and repealed the prohibition; and the persecution of Taïco-sama quenched in blood whatever discontent might have arisen in consequence. The first great slaughter of 26 missionaries at Nagasaki took place on 5 Feb., 1597. Then came fifteen years of comparative peace, and gradually the number of Christians rose to about 1,800,000 and the Jesuit missionaries to 140 (63 priests). In 1612 the persecution broke out again, increasing in severity till 1622, when over 120 martyrs suffered. The "great martyrdom" took place on 20 September, when Blessed Charles Spinola (q. v.) suffered with representatives of the Dominicans and the Franciscans. For the twenty ensuing years the massacre continued without mercy, all Jesuits who landed being at once executed. In 1644 Father Gaspar de Amaral was drowned in attempting to land, and his death brought to a close the century of missionary efforts which the Jesuits had made to bring the Faith to Japan. The name of the Japanese province was retained, and it counted 57 subjects in 1760; but the mission was really confined to Tonkin and Cochin-China, whence stations were established in Annam, Siam, etc. (see Indo-China, VII, 774–5; Martyrs, Japanese).

China.—A detailed account of this mission from 1552 to 1773 will be found under China (III, 672–4) and Martyrs in China, and in lives of the missionaries Bouvet, Brancati, Carneiro, Cibot, Fridelli, Gaubil, Gerbillon, Herdtrich, Hinderer, Mailla, Martini, Matteo Ricci, Schall von Bell, and Verbiest (qq. v.). From 1581, when the mission was organized, it consisted of Portuguese Fathers. They established four colleges, one seminary, and some forty stations under a vice-provincial, who resided frequently in Pekin; at the suppression there were 54 Fathers. From 1687 there was a special mission of the French Jesuits to Pekin, under their own superior; at the Suppression they numbered 23.

Central and South America.—The missions of Central and Southern America were divided between Portugal and Spain (see America, I, 414). In 1549 Father Nombrega and five companions, Portuguese, went to Brazil. Progress was slow at first, but when the languages had been learnt, and the confidence of the natives acquired, progress became rapid. Blessed Ignacio de Azevedo and his thirty-nine companions were martyred on their way thither in 1570. The missions, however, prospered steadily under such leaders as José Anchieta and John Almeida (qq. v.) (Meade). In 1630 there were 70,000 converts. Before the Suppression the whole country had been divided into missions, served by 445 Jesuits in Brazil, and 146 in the vice-province of Maranhão.

Paraguay.—Of the Spanish missions, the most noteworthy is Paraguay (see Guaraní Indians; Abipones; Argentine Republic; Reductions of Paraguay). The province contained 564 members (of whom 385 were priests) before the Suppression, with 113,716 Indians under their charge.

Mexico.—Even larger than Paraguay was the missionary province of Mexico, which included California, with 572 Jesuits and 122,000 Indians. (See also California Missions; Mexico, pp. 258, 266, etc; Añazco; Clavigero; Díaz; Ducrue; etc.) The conflict as to jurisdiction (1647) with Juan de Palafox y Mendoza (q.v.), Bishop of La Puebla, led to an appeal to Rome which was decided by Innocent X in 1648, but afterwards became a *cause célèbre*. The other Spanish missions, New Granada (Colombia), Chile, Peru, Quito (Ecuador), were administered by 193, 242, 526, and 209 Jesuits respectively (see Alegre; Araucanians; Arawaks; Barrasa; Moxos Indians).

United States.—Father Andrew White (q.v.) and four other Jesuits from the English mission arrived in territory now comprised in the State of Maryland, 25 March, 1634, with the expedition of Cecil Calvert (q. v.) For ten years they ministered to the Catholics, of the colony, converted many of its Protestant pioneers, and conducted missions among the Indians along Chesapeake Bay and the Potomac River, the Patuxents, Anacostans, and Piscataways, which last were especially friendly. In 1644 the colony was invaded by the Puritans from the neighbouring settlement of Virginia, and Father White was sent in chains to England, tried for being a Catholic, and on his release took refuge in Belgium. Although the Catholic colonists soon regained control, they were constantly menaced by their Puritan neighbours and by malcontents in the colony itself, who finally in 1692 succeeded in seizing the government, and in enacting penal laws against the Catholics, and particularly against their Jesuit priests, which kept growing more and more intolerable until the colony became the State of Maryland in November, 1776. During the 140 years between their arrival in Maryland and the Suppression of the Society, the missionaries, averaging four in number the first forty years and then gradually increasing to twelve and finally to about twenty, continued to work among the Indians and the settlers in spite of every vexation and disability, though prevented from increasing in number and extending their labours during the dispute with Cecil Calvert over retaining the tract of land, Mattapany, given to them by the Indians, relief from taxation on lands devoted to religious or charitable purposes, and the usual ecclesiastical immunity for themselves and their households. The controversy ended in the cession of the Mattapany tract, the missionaries retaining the land they had acquired by the conditions of plantation. Prior to the Suppression they had established missions in Maryland, at St. Thomas, White Marsh, St. Inigoes, Leonardtown, still (1912) under the care of Jesuits, and also at Deer Creek, Frederick, and St. Joseph's Bohemia Manor, besides the many less permanent stations among the Indians in Pennsylvania, Philadelphia, Conewago, Lancaster, Goshenhoppen, and excursion stations as far as New York where two of their number, Fathers Harvey and Harrison, assisted for a time by Father Gage, had, under Governor Dongan, ministered as chaplains in the forts and among the white settlers, and attempted unsuccessfully to establish a school, between 1683–89, when they were forced to retire by an anti-Catholic administration.

Matteo Ricci
From a Chinese portrait preserved in the College of Propaganda

The Suppression of the Society altered but little the status of the Jesuits in Maryland. As they were the only priests in the mission, they still remained at their posts, most of them, the nine English members, until death, all continuing to labour under Father John Lewis, who after the Suppression had received the powers of vicar-general from Bishop Challoner of the London District. Only two of them survived until the restoration of the Society—Robert Molyneux and John Bolton. Many of those who were abroad, labouring in England or studying in Belgium, returned to work in the mission. As a corporate body they still retained the properties from which they derived support for their religious ministrations. As their numbers decreased some of the missions were abandoned, or served for a time by other priests but maintained by the revenues of the Jesuit properties even after the Restoration of the Society. Though these properties were regarded as reverting to it through its former members organized as the Corporation of Roman Catholic Clergymen, a yearly allowance from the revenues made over to Archbishop Carroll became during Bishop Maréchal's administration (1817–34) the basis of a claim for such a payment in perpetuity and the dispute thus occasioned was not settled until 1838, under Archbishop Eccleston.

French Missions.—The French missions had as bases the French colonies in Canada, the Antilles, Guiana, and India; while French influence in the Mediterranean led to the missions of the Levant, in Syria, among the Maronites (q. v.), etc. (See also Guiana; Haiti; Martinique; China, III, 673.) The Canadian mission is described under Canada, and Missions, Catholic Indian, of Canada. (See also the accounts of the mission given in the articles on Indian tribes like the Abenakis, Apaches, Cree, Hurons, Iroquois, Ottawas; and in the biographies of the missionaries Bailloquet, Brébeuf, Casot, Chabanel, Chastellain, Chaumonot, Cholonec, Crépieul, Dablon, Druillettes, Garnier, Goupil, Jogues, Lafitau, Lagrené, Jacques-P. Lallemant, Lamberville, Lauzon, Le Moyne, Râle, etc.) In 1611 Fathers Biard and Massé arrived as missionaries at Port Royal, Acadia. Taken prisoners by the English from Virginia, they were sent back to France in 1614. In 1625 Fathers Massé, Brébeuf, and Charles Lalemant came to work in and about Quebec, until 1629, when they were forced to return to France after the English captured Quebec. Back again in 1632 they began the most heroic missionary period in the annals of America. They opened a college at Quebec in 1635, with a staff of most accomplished professors from France. For forty years men quite as accomplished, labouring under incredible hardships, opened missions among the Indians on the coast, along the St. Lawrence and the Saguenay, and on Hudson Bay; among the Iroquois, Neutral Nation, Petuns, Hurons, Ottawas, and later among the Miamis, Illinois, and among the tribes east of the Mississippi as far south as the Gulf of Mexico. When Canada became a British possession in 1763, these missions could no longer be sustained, though many of them, especially those that formed part of parochial settlements, had gradually been taken over by secular priests. The college at Quebec was closed in 1768. At the time of the Suppression there were but twenty-one Jesuits in Canada, the last of whom, Rev. John J. Casot, died in 1800. The mission has become famous for its martyrs, eight of whom, Brébeuf, Gabriel Lalemant, Daniel, Garnier, Chabanel, Jogues and his lay companions Goupil and Lalande, were declared venerable on 27 Feb., 1912. It has also become noted for its literary remains, especially for the works of the missionaries in the Indian tongues, for their explorations, especially that of Marquette, and for its "Relations".

Jesuit Relations.—The collections known as the "Jesuit Relations" consist of letters written from members of the Society in the foreign mission fields to their superiors and brethren in Europe, and contain accounts of the development of the missions, the labours of the missionaries, and the obstacles which they encountered in their work. In March, 1549, when St. Francis Xavier confided the mission of Ormus to Father Gaspar Barzæus, he included among his instructions the commission to write from time to time to the college at Goa, giving an account of what was being done in Ormus. His letter to Joam Beira (Malacca, 20 June, 1549) recommends similar accounts being sent to St. Ignatius at Rome and to Father Simon Rodriguez at Lisbon and is very explicit concerning both the contents and the tone of these accounts. These instructions were the guide for the future "Relations" sent from all the foreign missions of the order. The "Relations" were of three kinds: Intimate and personal accounts sent to the father-general, to a relative, a friend, or a superior, which were not meant for publication at that time, if ever. There were also annual letters, intended only for members of the order, manuscript copies of which were sent from house to house. Extracts and analy[illegible] of these letters were compiled in a volume entitled: "Litteræ annuæ Societatis Jesu ad patres et fratres ejusdem Societatis". The rule forbade the communication of these letters to persons not members of the order, as is indicated by the title. The publication of the annual letters began in 1581, was interrupted from 1614 to 1649, and came to an end in 1654, though the provinces and missions continued to send such letters to the father-general. The third class of letters, or "Relations" properly so called, were written for the public and intended for printing. Of this class were the famous "Relations de la Nouvelle-France", begun in 1616 by Father Biard. The series for 1626 was written by Father Charles Lalemant. Forty-one volumes constitute the series of 1632–72, thirty-nine of which bear the title "Relations", and two (1645–55 and 1658–59) "Lettres de la Nouvelle-France". The cessation of these publications was the indirect outcome of the controversy concerning Chinese Rites, as Clement X forbade (16 April, 1673) missionaries to publish books or writings concerning the missions without the written consent of Propaganda.

Letters from the missions were instituted by Saint Ignatius. At first they circulated in MS. and contained home as well as foreign news; e. g. *Litteræ quadrimestres* (5 vols.), lately printed in the *Monumenta* series, mentioned above. Later on *Litteræ annuæ*, in yearly or triennial volumes (1581 to 1614) at Rome, Florence, etc., index with last vol. Second Series (1650–54) at Dillingen and Prague. The *Annual Letters* were continued, and still continue, in MS., but very irregularly. The tendency was to leave home news in MS. for the future historian, and to publish the more interesting reports from abroad. Hence many early issues of *Avvisi* and *Litteræ*, etc., from India, China, Japan, and later on the celebrated *Relations* of the French Canadian missions (Paris, 1634 —). From these ever-growing printed and MS. sources were drawn up the collections—*Lettres édifiantes et curieuses écrites par quelques missionaires de la comp. de Jésus* (Paris, 1702; frequently reprinted with different matter, in 4 to 34 volumes. The original title was *Lettres de quelques missionaires*); *Der Neue-Weltbott mit allerhand Nachrichten deren Missionar. Soc. Jesu*, ed. Stocklein and others (36 vols., Augsburg, Gratz, 1728—); Huonder, *Deutsche jesuiten Missionäre* (Freiburg, 1899). For literature of particular missions see those titles. Leclercq, *Premier établissement de la foy dans la Nouvelle-France* (Paris, 1619), tr. Shea (New York, 1881); Campbell, *Pioneer Priests of North America* (New York, 1908–11); Bourne, *Spain in America* (New York, 1904); Parkman, *The Jesuits in North America* (Boston, 1868); Rochemonteix, *Les jésuites et la Nouvelle-France au xvii^e siècle* (Paris, 1896); Charlevoix, *Hist. de la Nouvelle-France* (Paris, 1744); Campbell (B.U.), *Biog. Sketch of Father Andrew White and his Companions, the first Missionaries of Maryland* in the *Metropolitan Catholic Almanac* (Baltimore, 1841); Idem, *Hist. Sketch of the Early Christian Missions among the Indians of Maryland* (Maryland Hist. Soc., 8 Jan., 1846); Johnson, *The Foundation of Maryland* in *Maryland Hist. Soc., Fund Publications*, no. 18; Kip, *Early Jesuit Missions in North America* (New York, 1882); Idem, *Hist. Scenes from the Old Jesuit Missions* (New York, 1875); *The Jesuit Relations*, ed. Thwaites (73 vols., Cleveland, 1896–1901); Shea, *Jesuits, Recollects, and Indians* in Winsor, *Narrative and critical Hist. of America* (Boston, 1889); Hughes, *Hist. of the Soc. of Jesus in North America, Colonial and Federal* (Cleveland, 1908—); Shea, *Hist. of the Cath. Church within the limits of the United States* (New York, 1886–92); Schall, *Hist. relatio de ortu et progressu fidei orthod. in regno Chinesi 1581–1669* (Ratisbon, 1672); Ricci, *Opere storiche*, ed. Venturi (Macerata, 1911).

Suppression. 1750–73.—We now approach the most difficult part of the history of the Society. Having enjoyed very high favour among Catholic peoples, kings, prelates, and popes for two and a half centuries, it suddenly becomes an object of frenzied hostility, is overwhelmed with obloquy, and overthrown with dramatic rapidity. Every work of the Jesuits—their vast missions, their noble colleges, their churches—all is taken from them or destroyed. They are banished, and their order suppressed, with harsh and denunciatory words even from the pope. What makes the contrast more striking is that their protectors for the moment are former enemies—the Russians and Frederick of Prussia. Like many intricate problems, its solution is best found by beginning with what is easy to understand. We look forward a generation and we see that every one of the thrones, the pope's not excluded, which had been active in the Suppression, is overwhelmed. France, Spain, Portugal, and Italy become, indeed still are, a prey to the extravagances of the Revolutionary movement. The Suppression of the Society was due to the same causes which in further development brought about the French Revolution. These causes varied somewhat in different countries. In France many influences combined, as we shall see, from Jansenism and Free-thought to the then prevalent impatience with the old order of things (see FRANCE, VI, 172). Some have thought that the Suppression was primarily due to these currents of thought. Others attribute it chiefly to the absolutism of the Bourbons. For, though in France the king was averse to the Suppression, the destructive forces acquired their power because he was too indolent to exercise control, which at that time he alone possessed. Outside France it is plain that autocracy, acting through high-handed ministers, was the determining cause.

Portugal.—In 1750 Joseph I of Portugal appointed Sebastian Joseph Carvalho, afterwards Marquis of Pombal (q. v.), as his first minister. Carvalho's quarrel with the Jesuits began over an exchange of territory with Spain. San Sacramento was exchanged for the seven Reductions of Paraguay, which were under Spain. The Society's wonderful missions there were coveted by the Portuguese, who believed that the Jesuits were mining gold. So the Indians were ordered to quit their country, and the Jesuits endeavoured to lead them quietly to the distant land allotted to them. But owing to the harsh conditions imposed, the Indians rose in arms against the transfer, and the so-called war of Paraguay ensued, which, of course, was disastrous to the Indians. Then step by step the quarrel with the Jesuits was pushed to extremities. The weak king was persuaded to remove them from Court; a war of pamphlets against him was commenced; the Fathers were first forbidden to undertake the temporal administration of the missions, and then they were deported from America.

On 1 April, 1758, a Brief was obtained from the aged pope, Benedict XIV (q. v.), appointing Cardinal Saldanha to investigate the allegations against the Jesuits, which had been raised in the King of Portugal's name. But it does not follow that the pope had forejudged the case against the order. On the contrary, if we take into view all the letters and instructions sent to the cardinal, we see that the pope was distinctly sceptical as to the gravity of the alleged abuses. He ordered a minute inquiry, but one conducted so as to safeguard the reputation of the Society. All matters of serious importance were to be referred back to himself. The pope died five weeks later on 3 May. On 15 May, Saldanha, having received the Brief only a fortnight before, omitting the thorough, house-to-house visitation which had been ordered, and pronouncing on the issues which the pope had reserved to himself, declared that the Jesuits were guilty of having exercised illicit, public, and scandalous commerce both in Portugal and in its colonies. Three weeks later, at Pombal's instigation, all faculties were withdrawn from the Jesuits throughout the Patriarchate of Lisbon. Before Clement XIII (q v.) had become pope (6 July, 1758) the work of the Society had been destroyed, and in 1759 it was civilly suppressed. The last step was taken in consequence of a plot against the chamberlain Texeiras, but suspected to have been aimed at the king, and of this the Jesuits were supposed to have approved. But the grounds of suspicion were never clearly stated, much less proved. The height of Pombal's persecution was reached with the burning (1761) of the saintly Father Malagrida (q. v.) ostensibly for heresy; while the other Fathers, who had been crowded into prisons, were left to perish by the score. Intercourse between the Church of Portugal and Rome was broken off till 1770.

France.—The suppression in France was occasioned by the injuries inflicted by the English navy on French commerce in 1755. The Jesuit missionaries held a heavy stake in Martinique. They did not and could not trade, that is, buy cheap to sell dear, any more than any other religious. But they did sell the products of their great mission farms, in which many natives were employed, and this was allowed, partly to provide for the current expenses of the mission, partly in order to protect the simple, childlike natives from the common plague of dishonest intermediaries. Père Antoine La Valette, superior of the Martinique mission, managed these transactions with no little success, and success encouraged him to go too far. He began to borrow money in order to work the large undeveloped resources of the colony, and a strong letter from the governor of the island dated 1753 is extant in praise of his enterprise. But on the outbreak of war, ships conveying goods of the estimated value of 2,000,000 *livres* were captured and he suddenly became a bankrupt for a very large sum. His creditors were egged on to demand payment from the procurator of the Paris province: but he, relying on what certainly was the letter of the law, refused responsibility for the debts of an independent mission, though offering to negotiate for a settlement, of which he held out assured hopes. The creditors went to the courts, and an order was made (1760) obliging the Society to pay, and giving leave to distrain in case of non-payment.

The Fathers, on the advice of their lawyers, appealed to the *Grand'chambre* of the *Parlement* of Paris. This turned out to be an imprudent step. For not only did the *Parlement* support the lower court, 8 May, 1761, but, having once got the case into its hands, the Society's enemies in that assembly determined to strike a great blow at the order. Enemies of every sort combined. The Jansenists were numerous among the *gens-de-robe*, and at that moment were especially keen to be revenged on the orthodox party. The Sorbonnists, too, the university rivals of the great teaching order, joined in the attack. So did the Gallicans, the *Philosophes*, and *Encyclopédistes*. Louis XV was weak, and the influence of his Court divided; while his wife and children were earnestly in favour of the Jesuits, his able first minister, the Duc de Choiseul (q. v.), played into the hands of the *Parlement*, and the royal mistress, Madame de Pompadour, to whom the Jesuits had refused absolution, was a bitter opponent. The determination of the *Parlement* of Paris in time bore down all opposition. The attack on the Jesuits, as such, was opened by the Jansenistic Abbé Chauvelin, 17 April, 1762, who denounced the Constitutions of the Jesuits as the cause of the alleged defalcations of the order. This was followed by the *compte-rendu* on the Constitutions, 3–7 July, 1762, full of misconceptions, but not yet extravagant in hostility. Next day Chauvelin descended to a vulgar but efficacious means of exciting odium by denouncing the Jesuits' teaching and morals, especially on the matter of tyrannicide.

In the *Parlement* the Jesuits' case was now desperate. After a long conflict with the Crown, in which the indolent minister-ridden sovereign failed to assert his will to any purpose, the *Parlement* issued its well-known "*Extraits des assertions*", a blue-book, as we might say, containing a congeries of passages from Jesuit theologians and canonists, in which they were alleged to teach every sort of immorality and error, from tyrannicide, magic, and Arianism to treason, Socinianism, and Lutheranism. On 6 August, 1762, the final *arrêt* was issued condemning the Society to extinction, but the king's intervention brought eight months' delay. In favour of the Jesuits there had been some striking testimonies, especially from the French clergy in the two convocations summoned on 30 November, 1761, and 1 May, 1762. But the series of letters and addresses published by Clement XIII afford a truly irrefragable attestation in favour of the order. Nothing, however, availed to stay the *Parlement*. The king's counter-edict delayed indeed the execution of its *arrêt*, and meantime a compromise was suggested by the Court. If the French Jesuits would stand apart from the order, under a French vicar, with French customs, the Crown would still protect them. In spite of the dangers of refusal, the Jesuits would not consent; and upon consulting the pope, he (not Ricci) used the since famous phrase, *Sint ut sunt, aut non sint* (de Ravignan, "Clément XIII", I, 105, the words are attributed to Ricci also). Louis's intervention hindered the execution of the *arrêt* against the Jesuits until 1 April, 1763. The colleges were then closed, and by a further *arrêt* of 9 March, 1764, the Jesuits were required to renounce their vows under pain of banishment. Only three priests and a few scholastics accepted the conditions. At the end of November, 1764, the king unwillingly signed an edict dissolving the Society throughout his dominions, for they were still protected by some provincial *parlements*, as Franche-Comté, Alsace, and Artois. But in the draft of the edict he cancelled numerous clauses, which implied that the Society was guilty; and, writing to Choiseul, he concluded with the weak but significant words: "If I adopt the advice of others for the peace of my realm, you must make the changes I propose, or I will do nothing. I say no more, lest I should say too much".

Spain, Naples, and Parma.—The Suppression in Spain and its quasi-dependencies, Naples and Parma, and in the Spanish colonies was carried through by autocratic kings and ministers. Their deliberations were conducted in secrecy, and they purposely kept their reasons to themselves. It is only of late years that a clue has been traced back to Bernardo Tanucci, the anti-clerical minister of Naples, who acquired a great influence over Charles III before that king passed from the throne of Naples to that of Spain. In this minister's correspondence are found all the ideas which from time to time guided the Spanish policy. Charles, a man of good moral character, had entrusted his Government to the Count Aranda and other followers of Voltaire; and he had brought from Italy a finance minister, whose nationality made the government unpopular, while his exactions led in 1766 to rioting and to the publication of various squibs, lampoons, and attacks upon the administration. An extraordinary council was appointed to investigate the matter, as it was declared that people so simple as the rioters could never have produced the political pamphlets. They proceeded to take secret informations, the tenor of which is no longer known; but records remain to show that in September the council had resolved to incriminate the Society, and that by 29 January, 1767, its expulsion was settled. Secret orders, which were to be opened at midnight between the first and second of April, 1767, were sent to the magistrates of every town where a Jesuit resided. The plan worked smoothly. That morning 6000 Jesuits were marching like convicts to the coast, where they were deported first to the Papal States, and ultimately to Corsica.

Tanucci pursued a similar policy in Naples. On 3 November the religious, again without trial, and this time without even an accusation, were marched across the frontier into the Papal States, and threatened with death if they returned. It will be noticed that in these expulsions the smaller the state the greater the contempt of the ministers for any forms of law. The Duchy of Parma was the smallest of the so-called Bourbon Courts, and so aggressive in its anti-clericalism that Clement XIII addressed to it (30 January, 1768) a *monitorium*, or warning, that its excesses were punishable with ecclesiastical censures. At this all parties to the Bourbon "Family Compact" turned in fury against the Holy See, and demanded the entire destruction of the Society. As a preliminary Parma at once drove the Jesuits out of its territories, confiscating as usual all their possessions.

Clement XIV.—From this time till his death (2 February, 1769) Clement XIII was harassed with the utmost rudeness and violence. Portions of his States were seized by force, he was insulted to his face by the Bourbon representatives, and it was made clear that, unless he gave way, a great schism would ensue, such as Portugal had already commenced. The conclave which followed lasted from 15 Feb. to May, 1769. The Bourbon Courts, through the so-called "crown cardinals", succeeded in excluding any of the party, nicknamed *Zelanti*, who would have taken a firm position in defence of the order, and finally elected Lorenzo Ganganelli, who took the name of Clement XIV. It has been stated by Crétineau-Joly (Clement XIV, p. 260) that Ganganelli, before his election, engaged himself to the crown cardinals by some sort of stipulation that he would suppress the Society, which would have involved an infraction of the conclave oath. This is now disproved by the statement of the Spanish agent Azpuru, who was specially deputed to act with the crown cardinals. He wrote on 18 May, just before the election, "None of the cardinals has gone so far as to propose to anyone that the Suppression should be secured by a written or spoken promise"; and just after 25 May he wrote, "Ganganelli neither made a promise, nor refused it". On the other hand it seems he did write words, which were taken by the crown cardinals as an indication that the Bourbons would get their way with him (de Bernis's letters of 28 July and 20 November, 1769).

No sooner was Clement on the throne than the Spanish Court, backed by the other members of the "Family Compact", renewed their overpowering pressure. On 2 August, 1769, Choiseul wrote a strong letter demanding the Suppression within two months; and the pope now made his first written promise that he would grant the measure, but he declared that he must have more time. Then began a series of transactions, which some have not unnaturally interpreted as devices to escape by delays from the terrible act of destruction, towards which Clement was being pushed. He passed more than two years in treating with the Courts of Turin, Tuscany, Milan, Genoa, Bavaria, etc., which would not easily consent to the Bourbon projects. The same ulterior object may perhaps be detected in some of the minor annoyances now inflicted on the Society. From several colleges, as those of Frascati, Ferrara, Bologna, and the Irish College at Rome, the Jesuits were, after a prolonged examination, ejected with much show of hostility. And there were moments, as for instance after the fall of Choiseul, when it really seemed as though the Society might have escaped; but eventually the obstinacy of Charles III always prevailed.

In the middle of 1772 Charles sent a new ambassador to Rome, Don Joseph Moñino, afterwards Count Florida Blanca, a strong, hard man, "full of artifice, sagacity, and dissimulation, and no one more set on the suppression of the Jesuits". Heretofore the negotiations had been in the hands of the clever, diplomatic Cardinal de Bernis, French ambassador to the pope. Moñino now took the lead, de Bernis coming in afterwards as a friend to urge the acceptance of his advice. At last, on 6 Sept., Moñino gave in a paper suggesting a line for the pope to follow, which he did in part adopt, in drawing up the Brief of Suppression. By November the end was coming in sight, and in December Clement put Moñino into communication with a secretary; and they drafted the instrument together, the minute being ready by 4 January, 1773. By 6 February Moñino had got it back from the pope in a form to be conveyed to the Bourbon Courts, and by 8 June, their modifications having been taken account of, the minute was thrown into its final form and signed. Still the pope delayed, until Moñino constrained him to get copies printed; and as these were dated, no delay was possible beyond that date, which was 16 August, 1773. A second Brief was issued to determine the manner in which the Suppression was to be carried out. To secure secrecy one regulation was introduced which led, in foreign countries, to some unexpected results. The Brief was not to be published *Urbi et Orbi*, but only to each college or place by the local bishop. At Rome, the father-general was confined first in the English College, then in Castel S. Angelo, with his assistants. The papers of the Society were handed over to a special commission, together with its title deeds and store of money, 40,000 *scudi* (about $50,000), which belonged almost entirely to definite charities. An investigation of the papers was begun, but never brought to any issue.

In the Brief of Suppression the most striking feature is the long list of allegations against the Society, with no mention of what is favourable; the tone of the Brief is very adverse. On the other hand the charges are recited categorically; they are not definitely stated to have been proved. The object is to represent the order as having occasioned perpetual strife, contradiction, and trouble. For the sake of peace the Society must be suppressed. A full explanation of these and other anomalous features cannot yet be given with certainty. The chief reason for them no doubt is that the Suppression was an administrative measure, not a judicial sentence based on judicial inquiry. We see that the course chosen avoided many difficulties, especially the open contradiction of preceding popes, who had so often praised or confirmed the Society. Again, such statements were less liable to be controverted; and there were different ways of interpreting the Brief, which commended themselves to *Zelanti* and *Borbonici* respectively. The last word on the subject is doubtless that of St. Alphonsus di Liguori—"Poor Pope! What could he do in the circumstances in which he was placed, with all the sovereigns conspiring to demand this Suppression? As for ourselves, we must keep silence, respect the secret judgment of God, and hold ourselves in peace".

Crétineau-Joly, *Clément XIV et les jésuites* (Paris, 1847); Danvilla y Collado, *Reinado de Carlos III* (Madrid, 1893); Delplace, *La suppression des jésuites* in *Etudes* (Paris, 5–20 July, 1908); Ferrer del Rio, *Hist. del reinado de Carlos III* (Madrid, 1856); de Ravignan, *Clément XIII et Clément XIV* (Paris, 1854); Rosseau, *Règne de Charles III d'Espagne* (Paris, 1907); Smith, *Suppression of the Soc. of Jesus* in *The Month* (London, 1902–3); Theiner, *Gesch. des Pontificats Clement XIV* (Paris, 1853; French tr., Brussels, 1853); Kobler, *Die Aufhebung der Gesellschaft Jesu* (Linz, 1873); Weld, *Suppression of the Soc. of Jesus in the Portuguese Dominions* (London, 1877); Zalenski, *The Jesuits in White Russia* (in Polish, 1874; Fr. tr., Paris, 1886); Carayon, *Le père Ricci et la suppression de la comp. de Jésus* (Poitiers, 1869); Saint-Priest, *Chute des jésuites* (Paris, 1846); Nippold, *Jesuitenorden von seiner Wiederherstellung* (Mannheim, 1867).

The Interim (1773–1814).—The execution of the Brief of Suppression having been largely left to the local bishops, there was room for a good deal of variety in the treatment which the Jesuits might receive in different places. In Austria and Germany they were generally allowed to teach (but with secular clergy as superiors); often they became men of mark as preachers, like Beauregard, Muzzarelli, and Alexandre Lanfant (b. at Lyons, 6 Sept., 1726, and massacred in Paris, 3 Sept., 1793) and writers like François-X. de Feller (q. v.), Zaccharia, Ximenes. The first to receive open official approbation of their new works were probably the English Jesuits, who in 1778 obtained a Brief approving their well-known Academy of Liège (now at Stonyhurst). But in Russia, and until 1780 in Prussia, the Empress Catherine and King Frederick II desired to maintain the Society as a teaching body. They forbade the local bishops to promulgate the Brief until their *placet* was obtained. Bishop Massalski in White Russia, 19 September, 1773, therefore ordered the Jesuit superiors to continue to exercise jurisdiction till further notice. On 2 February, 1780, with the approbation of Bishop Siestrzencewicz's Apostolic visitor, a novitiate was opened. To obtain higher sanction for what had been done, the envoy Benislaski was sent by Catherine to Rome. But it must be remembered that the animus of the Bourbon Courts against the Society was still unchecked; and in some countries, as in Austria under Joseph II, the situation was worse than before. There were many in the Roman Curia who had worked their way up by their activity against the order, or held pensions created out of former Jesuit property. Pius VI declined to meet Catherine's requests. All he could do was to express an indefinite assent by word of mouth, without issuing any written documents, or observing the usual formalities; and he ordered that strict secrecy should be observed about the whole mission. Benislaski received these messages on 12 March, 1783, and later gave the Russian Jesuits an attestation of them (24 July, 1785).

On the other hand, it can cause no wonder that the enemies of the Jesuits should from the first have watched the survival in White Russia with jealousy, and have brought pressure to bear upon the pope to ensure their suppression. He was constrained to declare that he had not revoked the Brief of Suppression, and that he regarded as an abuse anything done against it, but that the Empress Catherine would not allow him to act freely (29 June, 1783). These utterances were not in real conflict with the answer given to Benislaski, which only amounted to the assertion that the escape from the Brief by the Jesuits in Russia was not schismatical, and that the pope approved of their continuing as they were doing. Their existence therefore was legitimate, or at least not illegitimate, though positive approval in legal form did not come till Pius VII's Brief "Catholicæ Fidei" (7 March, 1801). Meantime the same or similar causes to those which brought about the Suppression of the Society were leading to the disruption of the whole civil order. The French Revolution (1789) was overthrowing every throne that had combined against the Jesuits, and in the anguish of that trial many were the cries for the re-establishment of the order. But amid the turmoil of the Napoleonic wars, during the prolonged captivities of Pius VI (1798–1800) and of Pius VII (1809–14), such a consummation was impossible. The English Jesuits, however (whose academy at Liège, driven over to England by the French invasion of 1794, had been approved by a Brief in 1796), succeeded in obtaining oral permission from Pius VII for their aggregation to the Russian Jesuits, 27 May, 1803. The permission was to be kept secret, and was not even communicated by the pope to Propaganda. Next winter, its prefect, Cardinal Borgia, wrote a hostile letter, not indeed cancelling the vows taken, or blaming what had been done, but forbidding the bishops "to recognize the Jesuits", or "to admit their privileges", until they obtained permission from the Congregation of Propaganda.

Considering the extreme difficulties of the times, we cannot wonder at orders being given from Rome which were not always quite consistent. Broadly speaking, however, we see that the popes worked their way towards a restoration of the order by degrees. First, by approving community life, which had been specifically forbidden by the Brief of Suppression (this was done for England in 1778). Second, by permitting vows (for England in 1803). Third, by restoring the full privileges of a religious order (these were not recognized in England until 1829). The Society was extended by Brief from Russia to the Kingdom of Naples, 30 July, 1804; but on the invasion of the

French in 1806, all houses were dissolved, except those in Sicily. The superior in Italy during these changes was the Venerable Giuseppe M. Pignatelli (q. v.). In their zeal for the re-establishment of the Society some of the ex-Jesuits united themselves into congregations, which might, while avoiding the now unpopular name of Jesuits, preserve some of its essential features. Thus arose the Fathers of the Faith (Pères de la Foi), founded with papal sanction by Nicolas Paccanari in 1797. A somewhat similar congregation, called the "Fathers of the Sacred Heart", had been commenced in 1794 in Belgium, under Père Charles de Broglie, who was succeeded by Père Joseph Varin as superior. By wish of Pius VI, the two congregations amalgamated, and were generally known as the Paccanarists. They soon spread into many lands; Paccanari, however, did not prove a good superior, and seemed to be working against a reunion with the Jesuits still existing in Russia; this caused Père Varin and others to leave him. Some of them entered the Society in Russia at once; and at the Restoration the others joined *en masse.* (See Sacred Heart of Jesus, Society of the.)

The Restored Society.—Pius VII had resolved to restore the Society during his captivity in France; and after his return to Rome did so with little delay, 7 August, 1814, by the Bull "Sollicitudo omnium ecclesiarum," and therewith the general in Russia, Thaddæus Brzozowski, acquired universal jurisdiction. After the permission to continue given by Pius VI, the first Russian congregation had elected as vicar-general Stanislaus Czerniewicz (17 Oct., 1782-7 July, 1785), who was succeeded by Gabriel Lenkiewicz (27 Sept., 1785-10 Nov., 1798) and Francis Kareu (1 Feb., 1799-20 July, 1802). On the receipt of the Brief "Catholicæ Fidei", of 7 March, 1801, his title was changed from vicar-general to general. Gabriel Gruber succeeded (10 Oct., 1802-26 March, 1805), and was followed by Thaddæus Brzozowski (2 Sept., 1805). Almost simultaneously with the death of the latter, 5 Feb., 1820, the Russians, who had banished the Jesuits from St. Petersburg in 1815, expelled them from the whole country. It seems a remarkable providence that Russia, contrary to all precedent, should have protected the Jesuits just at the time when all other nations turned against them, and reverted to her normal hostility when the Jesuits began to find toleration elsewhere. Upon the decease of Brzozowski, Father Petrucci, the vicar, fell under the influence of the still powerful anti-Jesuit party at Rome, and proposed to alter some points in the Institute. The twentieth general congregation took a severe view of his proposals, expelled him from the order, and elected Father Aloysius Fortis (18 Oct., 1820-27 Jan., 1829) (q. v.); John Roothaan succeeded (9 July, 1829–8 May, 1853); and was followed by Peter Beckx (q. v.) (2 July, 1853–4 March, 1887). Anton Maria Anderledy, vicar-general on 11 May, 1884, became general on Fr. Beckx's death and died on 18 Jan., 1892; Luis Martin (2 Oct., 1892–18 Apr., 1906). Father Martin commenced a new series of histories of the Society, to be based on the increased materials now available, and to deal with many problems about which older annalists, Orlandini and his successors, were not curious. Volumes by Astrain, Duhr, Fouqueray, Hughes, Kroess, Tacchi-Venturi have appeared. The present general, Francis Xavier Wernz, was elected on 8 Sept., 1906.

Though the Jesuits of the nineteenth century cannot show a martyr-roll as brilliant as that of their predecessors, the persecuting laws passed against them surpass in number, extent, and continuance those endured by previous generations. The practical exclusion from university teaching, the obligation of military service in many countries, the wholesale confiscations of religious property, and the dispersion of twelve of its oldest and once most flourishing provinces are very serious hindrances to religious vocations. On a teaching order such blows fall very heavily. The cause of trouble has generally been due to that propaganda of irreligion which was developed during the Revolution and is still active through Freemasonry in those lands in which the Revolution took root.

France.—This is plainly seen in France. In that country the Society began after 1815 with the direction of some *petits séminaires* and congregations, and by giving missions. They were attacked by the Liberals, especially by the Comte de Montlosier in 1823 and their schools, one of which, St-Acheul, already contained 800 students, were closed in 1829. The Revolution of July (1830) brought them no immediate relief; but in the visitation of cholera in 1832 the Fathers pressed to the fore, and so began to recover influence. In 1845 there was another attack by Thiers, which drew out the answer of de Ravignan (q. v.). The Revolution of 1848 at first sent them again into exile, but the liberal measures which succeeded, especially the freedom of teaching, enabled them to return and to open many schools (1850). In the later days of the Empire greater difficulties were raised, but with the advent of the Third Republic (1870) these restrictions were removed and progress continued, until, after threatening measures in 1878, came the decree of 29 March, 1880, issued by M. Jules Ferry. This brought about a new dispersion and the substitution of staffs of non-religious teachers in the Jesuit colleges. But the French Government did not press their enactments, and the Fathers returned by degrees; and before the end of the century their houses and schools in France were as prosperous as ever. Then came the overwhelming Associations laws of M. Waldeck-Rousseau, leading to renewed though not complete dispersions and to the reintroduction of non-religious staffs in the colleges. The right of the order to hold property was also violently suppressed; and, by a refinement of cruelty, any property suspected of being held by a congregation may now be confiscated, unless it is proved *not* to be so held. Other clauses of this law penalize any meeting of the members of a congregation. The order is under an iron hand from which no escape is, humanly speaking, possible. For the moment nevertheless public opinion disapproves of its rigid execution, and thus far, in spite of all sufferings, of the dispersal of all houses, the confiscation of churches, and the loss of practically all property and schools, the numbers of the order have been maintained, nay slightly increased, and so too have the opportunities for work, especially in literature and theology, etc. (See also Carayon; Deschamps; Du Lac; Olivaint; Ravignan.)

Spain.—In Spain the course of events has been similar. Recalled by Ferdinand VII in 1815, the Society was attacked by the Revolution of 1820; and twenty-five Jesuits were slain at Madrid in 1822. The Fathers, however, returned after 1823 and took part in the management of the military school and the College of Nobles at Madrid (1827). But in 1834 they were again attacked at Madrid, fourteen were killed, and the whole order was banished on 4 July, 1835, by a Liberal ministry. After 1848 they began to return and were re-settled after the Concordat, 26 Nov., 1852. At the Revolution of 1868 they were again banished (12 Oct.), but after a few years they were allowed to come back, and have since made great progress. At the present time, however, another expulsion is threatened (1912). In Portugal the Jesuits were recalled in 1829, dispersed again in 1834; but afterwards returned. Though they were not formally sanctioned by law they had a large college and several churches, from which, however, they were driven out in October, 1910, with great violence and cruelty.

Italy.—In Italy they were expelled from Naples (1820–21); but in 1836 they were admitted to Lombardy. Driven out by the Revolution of 1848 from almost the whole peninsula, they were able to return when peace was restored, except to Turin. Then with the gradual growth of United Italy they were step by step suppressed again by law everywhere, and finally at Rome after 1871. But though formally suppressed and unable to keep schools, except on a very small scale, the law is so worded that it does not press at every point, nor is it often enforced with acrimony. Numbers do not fall off, and activities increase. In Rome they have charge *inter alia* of the Gregorian University, the "Institutum Biblicum", and the German and Latin-American Colleges.

Germanic Provinces.—Of the Germanic Provinces, that of Austria may be said to have been recommenced by the immigration of many Polish Fathers from Russia to Galicia in 1820; and colleges were founded at Tarnopol, Lemberg, Linz (1837), and Innsbruck in 1838, in which they were assigned the theological faculty in 1856. The German province properly so called could at first make foundations only in Switzerland at Brieg (1814) and Freiburg (1818). But after the *Sonderbund* they were obliged to leave, being then 264 in number (111 priests). They were now able to open several houses in the Rhine provinces, etc., making steady progress till they were ejected during Bismarck's *Kulturkampf* (1872), when they numbered 755 members (351 priests). They now count 1150 (with 574 priests) and are known throughout the world by their many excellent publications. (See Antoniewicz; Deharbe; Hasslacher; Pesch; Roh; Spillmann.)

Belgium.—The Belgian Jesuits were unable to return to their country till Belgium was separated from Holland in 1830. Since then they have prospered exceedingly. In 1832, when they became a separate province, they numbered 105; at their seventy-five years' jubilee, in 1907, they numbered 1168. In 1832, two colleges with 167 students: in 1907, 15 colleges with 7465 students. Congregations of the Blessed Virgin, originally founded by a Belgian Jesuit, still flourish. In Belgium 2529 such congregations have been aggregated to the *Prima Primaria* at Rome, and of these 156 are under Jesuit direction. To say nothing of missions and of retreats to convents, dioceses, etc., the province had six houses of retreats, in which 245 retreats were given to 9840 persons. Belgium supplies the foreign mission of Eastern Bengal and the Diocese of Galle in Ceylon. In the bush-country of Chota Nagpur there began, in 1887, a wonderful movement of the aborigines (Kôles and Ouraons) towards the Church, and the Catholics in 1907 numbered 137,120 (i. e. 62,385 baptized and 74,735 catechumens). Over 35,000 conversions had been made in 1906, owing to the penetration of Christianity into the district of Jashpur. Besides this there are excellent colleges at Darjeeling and at Kurseong; at Kandy in Ceylon the Jesuits have charge of the great pontifical seminary for educating native clergy for the whole of India. In all they have 442 churches, chapels, or stations, 479 schools, 14,467 scholars, with about 167,000 Catholics, and 262 Jesuits, of whom 150 are priests. The Belgian Fathers have also a flourishing mission on the Congo, in the districts of Kwango and Stanley Pool, which was begun in 1893; in 1907 the converts already numbered 31,402.

England.—Nowhere did the Jesuits get through the troubles inevitable to the Interim more easily than in conservative England. The college at Liège continued to train their students in the old traditions, while the English bishops permitted the ex-Jesuits to maintain their missions and a sort of corporate discipline. But there were difficulties in recognizing the restored order, lest this should impede emancipation (see Roman Catholic Relief Bill), which remained in doubt for so many years. Eventually Leo XII on 1 Jan., 1829, declared the Bull of restoration to have force in England. After this the Society grew, slowly at first, but more rapidly afterwards. It had 73 members in 1815, 729 in 1910. The principal colleges are Stonyhurst (St. Omers, 1592, migrated to Bruges, 1762, to Liège, 1773, to Stonyhurst, 1794); Mount St. Mary's (1842); Liverpool (1842); Beaumont (1861); Glasgow (1870); Wimbledon, London (1887); Stamford Hill, London (1894); Leeds (1905). In 1910 the province had in England and Scotland, besides the usual novitiate and houses of study, two houses for retreats, 50 churches or chapels, attended by 148 priests. The congregations amounted to 97,641; baptisms, 3746; confessions, 844,079; Easter confessions, 81,065; Communions, 1,303,591; converts, 725; extreme unctions, 1698; marriages, 782; children in elementary schools, 18,328. The Guiana mission (19 priests) has charge of about 45,000 souls; the Zambesi mission (35 priests), 4679 souls. (See also the articles Morris; Plowden; Porter; Stevenson; Coleridge; Harper.)

Luis Martin
Twenty-eighth General of the Society of Jesus

Ireland.—There were 24 ex-Jesuits in Ireland in 1776, but by 1803 only two. Of these Father O'Callaghan renewed his vows at Stonyhurst in 1803, and he and Father Betagh, who was eventually the last survivor, succeeded in finding some excellent postulants who made their novitiate in Stonyhurst, their studies at Palermo, and returned between 1812 and 1814, Father Betagh, who had become Vicar-General of Dublin, having survived to the year 1811. Father Peter Kenny (d. 1841) was the first superior of the new mission, a man of remarkable eloquence, who when visitor of the Society in America (1830-1833) preached by invitation before Congress. From 1812–13 he was vice-president of Maynooth College under Dr. Murray, then coadjutor Bishop of Dublin. The College of Clongowes Wood was begun in 1813; Tullabeg in 1818 (now a house of both probations); Dublin (1841); Mungret (Apostolic School, 1883). In 1883, too, the Irish bishops entrusted to the Society the University College, Dublin, in connexion with the late Royal University of Ireland. The marked superiority of this college to the richly endowed Queen's Colleges of Belfast, Cork, and Galway contributed much to establish the claim of the Irish Catholics to adequate university education. When this claim had been met by the present National University, the University College was returned to the Bishops. Five Fathers now hold teaching posts in the new university, and a hostel for students is being provided. Under the Act of Catholic Emancipation (q. v.) 58 Jesuits were registered in Ireland in 1830. In 1910 there were 367 in the province, of whom 100 are in Australia, where they have 4 colleges at and near Melbourne and Sydney, and missions in South Australia.

United States of America.—Under the direction of Bishop Carroll the members of the Corporation of Roman Catholic Clergymen in Maryland were the chief factors in founding and maintaining Georgetown College (q. v.) from 1791 to 1805, when they resumed their relations with the Society still existing in Russia, and were so strongly reinforced by other members of the order from Europe that they could assume full charge of the institution, which they have since retained. On the Restoration of the Society in 1814 these nineteen fathers constituted the mission of the United States. For a time (1808 to 1817) some of them were employed in the Diocese of New York just erected, Father Anthony Kohlmann (q. v.) administering the diocese temporarily, the others engaging in school and parish work. In 1816 Gonzaga College, Washington, D. C., was founded. In 1833 the mission of the United States became a province under the title of Maryland. Since then the history of the province is a record of development proportionate with the growth of Catholicity in the various fields specially cultivated by the Society. The colleges of the Holy Cross, Worcester (founded in 1843), Loyola College, Baltimore (1852), Boston College (1863) have educated great numbers of young men for the ministry and liberal professions. Up to 1879 members of the Society had been labouring in New York as part of the New York-Canada mission. In that year they became affiliated with the first American province under the title of Maryland-New York. This was added to the old province, besides several residences and parishes, the colleges of St. Francis Xavier and St. John (now Fordham University), New York City, and St. Peter's College, Jersey City, New Jersey. St. Joseph's College, Philadelphia, was chartered in 1852 and the Brooklyn College opened in 1908. In the same year Canisius College, and two parishes in Buffalo, and one parish in Boston for German Catholics, with 88 members of the German province were affiliated with this province, which has now (1912) 863 members with 12 colleges and 13 parishes, 1 house of higher studies for the members of the Society, 1 novitiate, in the New England and Middle States, and in the Virginias, with the Mission of Jamaica, British West Indies.

The Missouri province began as a mission from Maryland in 1823. Father Charles Van Quickenborne, a Belgian, led several young men of his own nationality who were eager to work among the Indians, among them De Smet (q. v.), Van Assche, and Verhaegen. As a rule the tribes were too nomadic to evangelize, and the Indian schools attracted only a very small number of pupils. The missions among the Osage and Pottawatomie were more permanent and fruitful. It was with experience gathered in these fields that Father De Smet started his mission in the Rocky Mountains in 1840. A college, now St. Louis University, was opened in 1829. For ten years, 1838–48, a college was maintained at Grand Coteau, Louisiana; in 1840 St. Xavier's was opened at Cincinnati. With the aid of seventy-eight Jesuits, who came from Italy and Switzerland in the years of revolution 1847–8, two colleges were maintained, St. Joseph's, Bardstown, 1848 until 1861, another at Louisville, Kentucky, 1849–57. In this last year a college was opened at Chicago. The mission became a province in 1863, and since then colleges have been opened at Detroit, Omaha, Milwaukee, St. Mary's (Kansas). By the accession of part of the Buffalo mission when it was separated from the German province in 1907, the Missouri province acquired an additional 180 members, and colleges at Cleveland, Toledo, and Prairie du Chien, besides several residences and missions. Its members work in the territory west of the Alleghanies as far as Kansas and Omaha, and from the Lakes to the northern line of Tennessee and Oklahoma, and also in the Mission of British Honduras (q. v.).

New Orleans.—For five years, 1566–1571, members of the Peruvian province laboured among the Indians along the coast of Florida, where Father Martínez was massacred near St. Augustine in 1566. They penetrated into Virginia, where eight of their number were massacred by Indians at a station named Axaca, supposed to be on the Rappahannock River. Later, Jesuits from Canada, taking as their share of the Louisiana territory the Illinois country and afterwards from the Ohio River to the gulf east of the Mississippi, worked among the Choctaw, Chickasaw, Natchez, and Yazoo. Two of their number were murdered by the Natchez and one by the Chickasaw. Their expulsion in 1763 is the subject of a monograph by Carayon, "Documents inédits", XIV. Originally evangelized by Jesuits from the Lyons province, the New Orleans mission became a province in 1907, having 7 colleges and four residences. It has now 255 members working in the territory north of the Gulf of Mexico to Missouri as far east as Virginia.

California.—In 1907 a province was formed in California comprising the missions of California, the Rocky Mountains, and Alaska (United States). The history of these missions is narrated under California Missions; Missions, Catholic Indian, of the United States; Alaska; Idaho; Sioux Indians.

New Mexico.—In the mission of New Mexico ninety-three Jesuits are occupied in the college at Denver, Colorado, and in various missions in that state, Arizona, and New Mexico; the mission depends on the Italian province of Naples.

In all the provinces in the United States there are 6 professional schools, with 4363 students; 26 colleges with full courses, with 2417, and 34 preparatory and high schools with 8735 pupils.

Canada.—Jesuits returned to Canada from St. Mary's College, Kentucky, which had been taken over, in 1834, by members of the province of France. When St. Mary's was given up in 1846 the staff came to take charge of St. John's College, Fordham, New York, thus forming with their fellows in Montreal the New York-Canada mission. This mission lasted until 1879, the Canadian division having by that year 1 college, 2 residences, 1 novitiate, 3 Indian missions with 131 members. In 1888 the mission received $160,000 as its part of the sum paid by the Province of Quebec in compensation for the Jesuit estates appropriated under George III by imperial authority, and transferred to the authorities of the former Province of Canada, all parties agreeing that the full amount, $400,000, thus allowed was far short of the value of the estates, estimated at $2,000,000. The settlement was ratified by the pope and the Legislature of the Province of Quebec, and the balance was divided among the archdioceses of Quebec, Montreal, and other dioceses, the Laval University besides receiving, in Montreal, $40,000 and, in Quebec, $100,000.

In 1907 the mission was constituted a province. It has now 2 colleges in Montreal, one at St. Boniface with 263 students in the collegiate and 722 in the preparatory classes, 2 residences and churches in Quebec, one at Guelph, Indian missions, and missions in Alaska, and 309 members.

Mexico.—In Mexico (New Spain) Jesuit missionaries began their work in 1571 and prior to their expulsion, in 1767, they numbered 678 members, of whom 468 were natives. They had over 40 colleges or seminaries, 5 residences, and 6 missionary districts, with 99 missions. The mission included Cuba, Lower California, and as far south as Nicaragua. Three members of the suppressed society who were in Mexico at the time of the Restoration formed a nucleus for its re-establishment there in 1816. In 1820 there were 32, of whom 15 were priests and 3 scholastics, in care of 4 colleges and 3 seminaries. They were dispersed in 1821. Although invited back in 1843, they could not agree to the limitations put on their activities by

General Santa Anna, nor was the prospect favourable in the revolutionary condition of the country. Four of their number returning in 1854, the mission prospered, and in spite of two dispersions, 1859 and 1873, it has continued to increase in number and activity. In August, 1907, it was reconstituted a province. It has now 326 members with 4 colleges, 12 residences, 6 mission stations among the Tarahumara, and a novitiate (see also MEXICO; PIOUS FUND OF THE CALIFORNIAS).

APOLOGETIC.—The accusations brought against the Society have been exceptional for their frequency and fierceness. Many indeed would be too absurd to deserve mention, were they not credited even by cultured and literary people. Such for instance are the charges that the Society was responsible for the Franco-Prussian war, the *affaire* Dreyfus, the Panama scandal, the assassination of popes, kings, princes, etc.—statements found in books and periodicals of some pretence. Such likewise is the so-called Jesuit Oath, the clumsy fabrication of the forger Robert Ware, exposed by Bridgett in "Blunders and Forgeries". The fallacy of such accusations may often be detected by general principles. A. *Jesuits are fallible*, and may have given some occasion to the accuser. The charges laid against them would never have been brought against angels, but they are not in the least inconsistent with the Society being a body of good but fallible men. Sweeping denials here and an injured tone would be misplaced and liable to misconception. As an instance of Jesuit fallibility, one may mention that writings of nearly one hundred Jesuits have been placed on the Roman "Index". Since this involves a reflection upon the Jesuit book-censors as well, it might appear to be an instance of failure in an important matter. But when we remember that the number of Jesuit writers exceeds 120,000, the proportion of those who have missed the mark cannot be considered extraordinary; the censure inflicted moreover has never been of the graver kind. Many critics of the order, who do not consider the Index censures discreditable, cannot pardon so readily the exaggerated *esprit de corps* in which Jesuits of limited experience occasionally indulge, especially in controversies or while eulogizing their own confrères; nor can they overlook the narrowness or bias with which some Jesuit writers have criticized men of other lands, institutions, education, though it is unfair to hold up the faults of a few as characteristic of the entire body.

B. *The Accusers.*—(1) In an oft-recited passage about the martyrs St. Ambrose tells us: "Vere frustra impugnatur qui apud impios et infidos impietatis arcessitur cum fidei sit magister" (He in truth, is impugned in vain who is accused of impiety by the impious and the faithless, though he is a teacher of the faith). The personal equation of the accuser is a correction of great moment; nevertheless it is to be applied with equally great caution; on no other point is an accused person so liable to make mistakes. Undoubtedly, however, when we find a learned man like Harnack declaring roundly (but without proofs) that Jesuits are not historians, we may place this statement of his beside another of his professorial dicta, that the Bible is not history. If the same principles underlie both propositions, the accusation against the order will carry little weight. When an infidel government, about to assail the liberties of the Church, begins by expelling the Jesuits, on the allegation that they destroy the love of freedom in their scholars, we can only say that no words of theirs can counterbalance the logic of their acts. Early in this century the French Government urged as one of their reasons for suppressing all the religious orders in France, among them the Society, that the regulars were crowding the secular clergy out of their proper spheres of activity and influence. No sooner were the religious suppressed than the law separating Church and State was passed to cripple and enslave the bishops and secular clergy.

(2) Again it is perhaps little wonder that heretics in general, and those in particular who impugn church liberties and the authority of the Holy See, should be ever ready to assail the Jesuits, who are especially bound to the defence of that see. It seems stranger that the opponents of the Society should sometimes be within the Church. Yet it is almost inevitable that such opposition should at times occur. No matter how adequately the canon law regulating the relations of regulars with the hierarchy and clergy generally may provide for their peaceful co-operation in missionary, educational, and charitable enterprises, there will necessarily be occasion for differences of opinion, disputes over jurisdiction, methods, and similar vital points, which in the heat of controversy often embitter and even estrange the parties at variance. Such unfortunate controversies arise between other religious orders and the hierarchy and secular clergy; they are neither common nor permanent, not the rule but the exception, so that they do not warrant the sinister judgment that is sometimes formed of the Society in particular as unable or unwilling to work with others, jealous of its own influence. Sometimes, especially when troubles of this kind have affected broad questions of doctrine and discipline, the agitation has reached immense proportions and bitterness has remained for years. The controversies *De auxiliis* led to violent explosions of temper, to intrigue, and to furious language which was simply astonishing; and there were others, in England for instance about the faculties of the archpriest, in France about Gallicanism, which were almost equally memorable for fire and fury. *Odium theologicum* is sure at all times to call forth excitement of unusual keenness; but we may make allowance for the early disputants, because of the pugnacious character of the times. When the age quite approved of gentlemen killing each other in duels on very slight provocation, there can be little wonder that clerics, when aroused, should forget propriety and self-restraint, sharpen their pens like daggers, and, dipping them in gall, strike at any sensitive point of their adversaries which they could injure. Charges put about by such excited advocates must be received with the greatest caution.

(3) The most embittered and the most untrustworthy enemies of the Society (they are fortunately not very numerous) have ever been deserters from its own ranks. We know with what malice and venom some unfaithful priests are wont to assail the Church, which they once believed to be Divine, and not dissimilar has been the hatred of some Jesuits who have been untrue to their calling.

C. *What is to be expected?* The Society has certainly had some share in the beatitude of suffering for persecution's sake; though it is not true, however, to say that the Society is the object of *universal detestation*. Prominent politicians, whose acts affect the interests of millions, are much more hotly and violently criticized, more freely denounced, caricatured, and condemned in the course of a month than the Jesuits singly or collectively in a year. When once the politician is overthrown, the world turns its fire upon the new holder of power, and it forgets the man that is fallen. But the light attacks against the Society never cease for long, and their cumulative effect appears more serious than it should, because people overlook the long spans of years which in its case intervene between the different signal assaults; Another principle to remember is that the enemies of the Church would never assail the Society at all, were it not that it is conspicuously popular with large classes of the Catholic community. Neither universal odium therefore nor freedom from all assault should be expected, but charges which, by exaggeration, inversion, satire, or irony, somehow correspond with the place of the Society in the Church.

Not being contemplatives like the monks of old, Jesuits are not decried as lazy and useless. Not being called to fill posts of high authority or to rule, like popes and bishops, Jesuits are not seriously denounced as tyrants, or maligned for nepotism and similar misdeeds. Ignatius described his order as a flying squadron ready for service anywhere, especially as educators and missionaries. The principal charges against the Society are misrepresentations of these qualities. If they are ready for service in any part of the world, they are called busybodies, mischief-makers, politicians with no attachment to country. If they do not rule, at least they must be grasping, ambitious, scheming, and wont to lower standards of morality, in order to gain control of consciences. If they are good disciplinarians, it will be said it is by espionage and suppression of individuality and independence. If they are popular schoolmasters, the adversary will say they are good for children, good perhaps as crammers, but bad educators, without influence. If they are favourite confessors, their success is ascribed to their lax moral doctrines, to their casuistry, and above all to their use of the maxim which is supposed to justify any and every evil act: "the end justifies the means". This perhaps is the most salient instance of the ignorance or ill-will of their accusers. Their books are open to all the world. Time and again those who impute to them as a body, or to any of their publications, the use of this maxim to justify evil of any sort have been asked to cite one instance of such usage, but all to no purpose. The signal failure of Hoensbroech to establish before the civil courts of Trier and Cologne (30 July, 1905) any such example of Jesuit teaching should silence this and similar accusations forever.

D. *The Jesuit Legend.*—It is curious that at the present day even literary men have next to no interest in the objective facts concerning the Society, not even in those supposed to be to its disadvantage. All attention is fixed on the Jesuit legend; encyclopedia articles and general histories hardly concern themselves with anything else. The legend, though it reached its present form in the middle of the nineteenth century, began at a much earlier period. The early persecutions of the Society (which counted some 100 martyrs in Europe during its first century) were backed up by fiery, loud, unscrupulous writers such as Hasenmüller and Hospinian, who diligently collected and defended all the charges brought against the Jesuits. The rude, criminous ideal which these writers set forth received subtler traits of deceitfulness and double-dealing through Zahorowski's "Monita secreta Societatis Jesu" (Cracow, 1614), a satire misrepresenting the rules of the order, which is freely believed to be genuine by credulous adversaries (see MONITA SECRETA). The current version of the legend is late French, evolved during the long revolutionary ferment which preceded the Third Empire. It began with the denunciations of Montlosier (1824–27), and grew strong (1833–45) in the University of Paris, which affected to consider itself as the representative of the Gallican Sorbonne, of Port-Royal, and of the *Encyclopédie*. The occasion for literary hostilities was offered by attempts at university reform, which, so the Liberals affected to believe, were instigated by Jesuits. Hereupon the "Provinciales" were given a place in the university curriculum, and Villemain, Thiers, Cousin, Michelet, Quinet, Libri, Mignet, and other respectable scholars succeeded by their writings and denunciations in giving to anti-Jesuitism a sort of literary vogue, not always with scrupulous observance of accuracy or fairness. More harmful still to the order were the plays, the songs, the popular novels against them. Of these the most celebrated was Eugène Sue's "Juif errant" (Wandering Jew) (1844), which soon became the most popular anti-Jesuit book ever printed, and has done more than any thing else to give final form to the Jesuit legend.

The special character of this fable is that it has hardly anything to do with the order at all, its traits being simply copied from masonry. The previous Jesuit bogey was at least one which haunted churches and colleges, and worked through the confessional and the pulpit. But this creation of modern fiction has lost all connexion with reality. He (or even she) is a person, not necessarily a priest, under the command of a black pope, who lives in an imaginary world of back stairs, closets, and dark passages. He is busy with plotting and scheming, mesmerizing the weak and corrupting the honest, occupations diversified by secret crimes or melodramatic attempts at crime of every sort. This ideal we see is taken over bodily from the real, or rather the supposed, method of life of the Continental mason. Yet this is the sort of nonsense about which special correspondents send telegrams to their papers, about which revolutionary agitators and crafty politicians make long inflammatory speeches, which standard works of reference discuss quite gravely, which none of our popular writers dares to expose as an imposture (see Brou, op. cit. infra, II, 199–247).

E. *Some Modern Objections*.—(1) Without having given up the old historical objections (for the study of which the historical sections of this article may be consulted), the anti-Jesuits of to-day arraign the Society as out of touch with the modern *Zeitgeist*, as hostile to liberty and culture, and as being a failure. Liberty, next to intelligence (and some people put it before), is the noblest of man's endowments. Its enemies are the enemies of the human race. Yet it is said that Ignatius's system, by aiming at "blind" obedience, paralyses the judgment and by consequence scoops out the will, inserting the will of the superior in its place, as a watchmaker might replace one mainspring by another (cf. Encyc. Brit., 1911, XV, 342); *perinde ac cadaver*, "like a corpse", again "similar to an old man's staff"—therefore dead and listless, mere machines, incapable of individual distinction (Böhmer-Monod, op. cit. infra, p. lxxvi).

The cleverness of this objection lies in its bold inversion of certain plain truths. In reality no one loved liberty better or provided for it more carefully than Ignatius. But he upheld the deeper principle that true freedom lies in obeying reason, all other choice being licence. Those who hold themselves free to disobey even the laws of God, who declare all rule in the Church a tyranny, and who aim at so-called free-love, free divorce, and free thought—they, of course, reject his theory. In practice his custom was to train the will so thoroughly that his men might after a short time be able to "level up" others (a most difficult thing) from laxity to thoroughness, without themselves being drawn down (a most easy thing), even though they lived outside cloisters, with no external support for their discipline. The wonderful achievement of staying and rolling back the tide of the Reformation, in so far as it was due to the Jesuits, was the result of the increased will-power given to previously irresolute Catholics by the Ignatian methods.

As to "blind" obedience, we should note that all obedience must be blind to some extent—"Theirs not to reason why, Theirs but to do and die." Ignatius borrowed from earlier ascetic writers the strong metaphors of the "blind man", "the corpse", "the old man's staff", to illustrate the nature of obedience in a vivid way; but he does not want those metaphors to be run to death. Not only does he want the subject to bring both head and heart to the execution of the command, but, knowing human nature and its foibles, he recognizes that cases will arise when the superior's order may appear impracticable, unreasonable, or unrighteous to a free subject and may possibly really be so. In such cases it is the acknowledged duty of the subject to appeal, and his judgment as well as his conscience, even when it may happen to be ill-formed, is to be respected; provision is made in the Constitutions for the clearing up of such troubles by discussion and arbitration, a provision which would be inconceivable, unless a mind and a free will, independent of and possibly opposed to that of the superior, were recognized and respected. Ignatius wishes his subjects to be "dead" or "blind" only in respect of sloth, of passion, of self-interest, and self-indulgence, which would impede the ready execution of orders. So far is he from desiring a mechanical performance that he explicitly disparages "obedience, which executes in work only", as "unworthy of the name of virtue" and warmly urges that "bending to, with all forces of head and heart, we should carry out the commands quickly and completely" (Letter on Obedience, § 5, 14).

GABRIEL GRUBER
Twenty-second General of the Society of Jesus

Further illustrations of Ignatian love of liberty may be found in the Spiritual Exercises and in the character of certain theological doctrines, as Probabilism and Molinism (with its subsequent modifications) which are commonly taught in the Society's schools. Thus, Molinism "is above all determined to throw a wall of security round free will" (see GRACE, CONTROVERSIES ON), and Probabilism (q. v.) teaches that liberty may not be restrained unless the restraining force rests on a basis of certainty. The characteristic of both theories is to emphasize the sacredness of free will somewhat more than is done in other systems. The Spiritual Exercises, the secret of Ignatius's success, are a series of considerations arranged, as he tells the exercitant from the first, to enable him to make a choice or election on the highest principles and without fear of consequences. Again the priest, who explains the meditations, is warned to be most careful not to incline the exercitant more to one object of choice than to another (Annot. 15).

It is notoriously impossible to expect that anti-Jesuit writers of our day should face their subject in a common-sense or scientific manner. If they did, one would point out that the only rational manner of inquiring into the subject would be to approach the persons under discussion (who are after all very approachable) and to see whether they are characterless, as they are reported to be. Another easy test would be to turn to the lives of their great missionaries Brébeuf, Marquette, Silveira, etc. Any men more unlike "mere machines" it would be impossible to conceive. The Society's successes in education confirm the same conclusion. It is true that lately, as a preparatory measure to closing its schools by violence, the French anti-Jesuits asserted both in print and in the Chamber that Jesuit education produced mere pawns, spiritless, unenterprising nonentities. But the real reason was notoriously that the pupils of the Jesuit schools were exceptionally successful at the examinations for entrance as officers into the army, and proved themselves the bravest and most vigorous men of the nation. In a controverted matter like this, the most obvious proof that the Society's education fits its pupils for the battle of life is found in the constant readiness of parents to entrust their children to the Jesuits even when, from a merely worldly point of view, there seemed to be many reasons for holding back. (A discussion of this matter, from a French standpoint, will be found in Brou, op. cit. infra, II, 409; Tampe in "Etudes", Paris, 1900, pp. 77, 749.) It is hardly necessary to add that methods of school discipline will naturally differ greatly in different countries. The Society would certainly prefer to observe *mutatis mutandis* its well-tried "Ratio Studiorum"; but it is far from thinking that local customs (as for instance those which regard surveillance) and external discipline should everywhere be uniform.

(2) Another objection akin to the supposed hostility to freedom is the alleged *Kulturfeindlichkeit*, hostility to what is cultured and intellectual. This cry has been chiefly raised by those who scornfully reject Catholic theology as dogmatism, who scoff at Catholic philosophy as Scholastic, and at the Church's insistence on Biblical inspiration as retrograde and unscholarly. Such men make little account of work for the ignorant and the poor, whether at home or on the missions, they speak of evangelical poverty, of practices of penance and of mortification, as if they were debasing and retrograde. They compare their numerous and richly endowed universities with the few and relatively poor seminaries of the Catholic and the Jesuit, and their advances in a multitude of physical sciences with the intellectual timidity (as they think it) of those whose highest ambition it is not to go beyond the limits of theological orthodoxy. The Jesuits, they say, are the leaders of the *Kulturfeindliche;* their great object is to bolster up antiquated traditions. They have produced no geniuses, while men whom they trained, and who broke loose from their teaching, Pascal, Descartes, Voltaire, have powerfully affected the philosophical and religious beliefs of large masses of mankind; but respectable mediocrity is the brand on the long lists of the Jesuit names in the catalogues of Alegambe and de Backer. Under Bismarck and M. Waldeck-Rousseau arguments of this sort were accompanied by decrees of banishment and confiscation of goods.

This objection springs chiefly from prejudice—religious, worldly, or national. The Catholic will think rather better than worse of men who are decried and persecuted on grounds which apply to the whole Church. It is true the modern Jesuit's school is often smaller and poorer than the establishment of his rival, who at times is ensconced in the academy which the Jesuits of previous times succeeded in founding and endowing. It is not to be questioned that the sum total of learned institutions in the hands of non-Catholics is now greater than those in the hands of our co-religionists, but the love of culture surely is not extinguished in the exiled French, German, or Portuguese Jesuit, who, robbed perhaps of all he possesses, at once settles down again to his task of study, of writing, or of education. Very rare are the cases where Jesuits, living among enterprising people, have acquiesced in educational inferiority. For superiority to others, even in sacred learning, the Society does not and should not contend. In their own line, that is in Catholic theology, philosophy, and exegesis, they would hope that they are not inferior to the level of their generation, and that, far from acquiescing in intellectual inferiority, they aim at making their schools as good as circumstances allow them. They may also claim to have trained many good scholars in almost every science.

The objection that Jesuit teachers do not influence masses of mankind, while men like Descartes and Voltaire, after breaking with Jesuit education, have done so, derives its force from passing over the main work of the Jesuits, which is the salvation of souls, and any lawful means that helps to this end, as, for instance, the maintenance of orthodoxy. It is easy to overlook this, and those who object will perhaps despise it, even if they recognize it. The work is not showy, whereas that of the satirist, the iconoclast, and free-lance compels attention. Avoiding comparisons, it is safe to say that the Jesuits have done much to maintain the teaching of orthodoxy, and that the orthodox far outnumber the followers of men like Voltaire and Descartes.

It would be impossible, from the nature of the case, to devise any satisfactory test to show what love of culture, especially of intellectual culture, there was in a body so diversified and scattered as the Society. Many might be applied, and one of the most telling is the regularity with which every test reveals refinement and studiousness somewhere in its ranks, even in poor and distant foreign missions. To some it will seem significant that the pope, when searching for theologians and consultors for various Roman colleges and congregations, should so frequently select Jesuits, a relatively small body, some thirty or forty per cent of whose members are employed in foreign missions or among the poor of our great towns. The periodicals edited by the Jesuits, of which a list is given below, afford another indication of culture, and a favourable one, though it is to be remembered that these publications are written chiefly with a view of popularizing knowledge. The more serious and learned books must be studied separately. The most striking test of all is that offered by the great Jesuit bibliography of Father Sommervogel, showing over 120,000 writers, and an almost endless list of books, pamphlets, and editions. There is no other body in the world which can point to such a monument. Cavillers may say that the brand-mark is "respectable mediocrity"; even so, the value of the whole will be very remarkable, and we may be sure that less prejudiced and therefore better judges will form a higher appreciation. Masterpieces, too, in every field of ecclesiastical learning and in several secular branches are not rare.

The statement that the Society has produced few geniuses is not impressive in the mouths of those who have not studied, or are unable to study or to judge, the writers under discussion. Again the objection, whatever its worth, confuses two ideals. Educational bodies must necessarily train by classes and schools and produce men formed on definite lines. Genius on the other hand is independent of training and does not conform to type. It is unreasonable to reproach a missionary or educational system for not possessing advantages which no system can offer. Then it is well to bear in mind that genius is not restricted to writers or scholars alone. There is a genius of organization, exploration, enterprise, diplomacy, evangelization, and instances of it, in one or other of these directions, are common enough in the Society.

Men will vary of course in their estimates as to whether the amount of Jesuit genius is great or not according to the esteem they make of those studies in which the Society is strongest. But whether the amount is great or little, it is not stunted by Ignatius's strivings for uniformity. The objection taken to the words of the rule "Let all say the same thing as much as possible" is not convincing. This is a clipped quotation, for Ignatius goes on to add "juxta Apostolum", an evident reference to St. Paul to the Philippians, iii, 15, 16, beyond whom he does not go. In truth Ignatius's object is the practical one of preventing zealous professors from wasting their lecture time in disputing small points on which they may differ from their colleagues. The Society's writers and teachers are surely never compelled to the same rigid acceptation of the views of another as is often the case elsewhere, e. g. in politics, diplomacy, or journalism. Members of a staff of leader-writers have constantly to personate convictions not really their own, at the bidding of the editor; whereas Jesuit writers and teachers write and speak almost invariably in their own names, and with a variety of treatment and a freedom of mind which compare not unfavourably with other exponents of the same subjects.

(3) Failure.—The Society never became "relaxed" or needed a "reform" in the technical sense in which these terms are applied to religious orders. The constant intercourse which is maintained between all parts enables the general to find out very soon when anything goes wrong, and his large power of appointing new officials has always sufficed to maintain a high standard both of discipline and of religious virtue. Of course there have arisen critics, who have inverted this generally acknowledged fact. It has been said that: (a) failure has become a note of Jesuit enterprises. Other religious and learned institutions endure for century after century. The Society has hardly a house that is a hundred years old, very few that are not quite modern. Its great missionary glories, Japan, Paraguay, China, etc., passed like smoke and even now, in countries predominantly Catholic, it is banished and its works ruined, while other Catholics escape and endure. Again, that (b), after Acquaviva's time, a period of decay ensued; (c) disputes about Probabilism, tyrannicide, equivocation, etc., caused a strong and steady decline in the order; (d) the Society after Acquaviva's time began to acquire enormous wealth, and the professed lived in luxury; (e) religious energy was enervated by political scheming and by internal dissensions.

(a) The word "failure" is here taken in two different ways—failure from internal decay and failure from external violence. The former is discreditable, the latter may be glorious, if the cause is good. Whether the failures of the Society, at its Suppression and in the violent ejections from various lands even in our own time, were discreditable failures is a historical question treated elsewhere. If they were, then we must say that such failures tend to the credit of the order, that they are rather apparent than real, and God's Providence will, in His own way, make good the loss. In effect we see the Society frequently suffering, but as frequently recovering and renewing her youth. It would be inexact to say that the persecutions which the Society has suffered have been so great and continuous as to be irreconcilable with the usual course of Providence, which is wont to temper trial with relief, to make endurance possible (I Cor., x, 13). Thus, while it may be truly said that many Jesuit communities have been forced to break up within the last thirty years, others have had a corporate existence of two or three centuries. Stonyhurst College, for instance, has been only 116 years in its present site, but its corporate life is 202 years older still; yet the most glorious pages of its history are those of its persecutions, when it lost, three times over, everything it possessed and, barely escaping by flight, renewed a life even more honourable and distinguished than that which preceded, a fortune probably without its equal in the history of pedagogy. Again the Bollandists (q. v.) and the Collegio Romano may be cited as well-known examples of institutions which, though once smitten to the ground, have afterwards revived and flourished as much as before if not more. One might instance, too, the German province, which, though driven into exile by Bismarck, has there more than doubled its previous numbers. The Christianity which the Jesuits planted in Paraguay survived in a wonderful way, after they were gone, and the rediscovery of the Church in Japan affords a glorious testimony to the thoroughness of the old missionary methods.

(b) Turning to the point of decadence after Acquaviva's time, we may freely concede that no subsequent generation contained so many great personalities as the first. The first fifty years saw nearly all the Society's saints and a large proportion of its great writers and missionaries. But the same phenomenon is to be observed in almost all orders, indeed in most other human institutions whether sacred or profane. As for internal dissensions after Acquaviva's death, the truth is that the severe troubles occurred before, not after, it. The reason for this is easily understood. Internal troubles came chiefly with that conflict of views which was inevitable while the Constitutions, the rules, and general traditions of the body were being moulded. This took till near the end of Acquaviva's generalate. The worst troubles came first, under Ignatius himself in regard to Portugal, as has been explained elsewhere (see IGNATIUS LOYOLA). The troubles of Acquaviva with Spain come next in seriousness.

(c) After Acquaviva's time we find indeed some warm theological disputations on Probabilism and other points; but in truth this trouble and the debates on tyrannicide and equivocation had much more to do with outside controversies than with internal division. After they had been fully argued and resolved by papal authority, the settlement was accepted throughout the Society without any trouble.

(d) The allegation that the Jesuits were ever immensely rich is demonstrably a fable. It would seem to have arisen from the vulgar prepossession that all those who live in great houses or churches must be very rich. The allegation was exploited as early as 1594 by Antoine Arnauld, who declared that the French Jesuits had a revenue of 200,000 *livres* (£50,000, which might be multiplied by six to get the relative buying power of that day). The Jesuits answered that their twenty-five churches and colleges, having a staff of 500 to 600 persons, had in all only 60,000 *livres* (£15,000). The exact annual revenues of the English province for some 120 years are published by Foley (Records S. J., VII, Introd., 139). Duhr (Jesuitenfabeln, 1904, 606, etc.) gives many figures of the same kind. We can, therefore, tell now that the college revenues were, for their purposes, very moderate. The rumours of immense wealth acquired still further vogue through two occurrences, the *Restitutionsedikt* of 1629 and the licence, sometimes given by papal authority, for the procurators of the foreign missions to include in the sale of the produce of their own mission farms the produce of their native converts, who were generally still too rude and childish to make bargains for themselves. The *Restitutionsedikt*, as has been already explained (see above: *Germany*), led to no permanent results, but the sale of the mission produce came conspicuously before the notice of the public at the time of the Suppression, by the failure of Father La Valette (see, in article above, SUPPRESSION, *France*). In neither case did the money transactions, such as they were, affect the standard of living in the Society itself, which always remained that of the *honesti sacerdotes* of their time (see Duhr, op. cit. infra, pp. 582–652).

During the closing months of 1761 many other prelates wrote to the king, to the chancellor, M. de Lamoignon, protesting against the *arrêt* of the *Parlement* of 6 August, 1761, and testifying to their sense of the injustice of the accusations made against the Jesuits and of the loss which their dioceses would sustain by their suppression. De Ravignan gives the names of twenty-seven such bishops. Of the minority five out of the six rendered a collective answer, approving of the conduct and teaching of the Jesuits. These five bishops, the Cardinal de Choiseul, brother of the statesman, Mgr de La Rochefoucauld, Archbishop of Rouen, and Mgrs Quiseau of Nevers, Choiseul-Beaupré of Châlons, and Champion de Cice of Auxerre, declared that "the confidence reposed in the Jesuits by the bishops of the kingdom, all of whom approve them in their diocese, is evidence that they are found useful in France", and that in consequence they, the writers, "supplicate the king to grant his royal protection, and keep for the Church of France a society commendable for the service it renders to the Church and State and which the vigilance of the bishops may be trusted to preserve free from the evils which it is feared might come to affect it". To the second and third of the king's questions they answer that occasionally individual Jesuits have taught blameworthy doctrines or invaded the jurisdiction of the bishops, but that neither fault has been general enough to affect the body as a whole. To the fourth question they answer that "the authority of the general, as it is wont to be and should be exercised in France, appears to need no modification; nor do they see anything objectionable in the Jesuit vows". In fact, the only point on which they differ from the majority is in the suggestion that "to take away all difficulties for the future it would be well to solicit the Holy See to issue a Brief fixing precisely those limits to the exercise of the general's authority in France which the maxims of the kingdom require".

Testimonies like these might be multiplied indefinitely. Among them one of the most significant is that of Clement XIII, dated 7 January, 1765, which specially mentions the cordial relations of the Society with bishops throughout the world, precisely when enemies were plotting for the suppression of the order. In his books on Clement XIII and Clement XIV de Ravignan records the acts and letters of many bishops in favour of the Jesuits, enumerating the names of nearly 200 bishops in every part of the world. From a secular source the most noteworthy testimony is that of the French bishops when hostility to the Society was rampant in high places. On 15 November, 1761, the Comte de Florentin, the minister of the royal household, bade Cardinal de Luynes, the Archbishop of Sens, convoke the bishops then at Paris to investigate the following points: (1) The use which the Jesuits can be in France, and the advantages or evils which may be expected to attend their discharge of the different functions committed to them. (2) The manner in which in their teaching and practice the Jesuits conduct themselves in regard to opinions dangerous to the personal safety of sovereigns, to the doctrine of the French clergy contained in the Declaration of 1782, and in regard to the Ultramontane opinions generally. (3) The conduct of the Jesuits in regard to the subordination due to bishops and ecclesiastical superiors, and as to whether they do not infringe on the rights and functions of the parish priests. (4) What restriction can be placed on the authority of the General of the Jesuits, so far as it is exercised in France. For eliciting the judgment of the ecclesiastics of the kingdom on the action of the *Parlement*, no questions could be more suitable, and the bishops convoked (three cardinals, nine archbishops, and thirty-nine bishops, that is fifty-one in all) met together to consider them on 30 November. They appointed a commission consisting of twelve of their number, who were given a month for their task and reported duly on 30 December. Of these fifty-one bishops, forty-four addressed a letter to the king, dated 30 December, 1761, answering all the four questions in a sense favourable to the Society and giving under each head a clear statement of their reasons.

To the first question the bishops reply that the "Institute of the Jesuits . . . is conspicuously consecrated to the good of religion and the profit of the State". They begin by noting how a succession of popes, St. Charles Borromeo, and the ambassadors of princes, who with him were present at the Council of Trent, together with the Fathers of that Council in their collective capacity, had pronounced in favour of the Society after an experience of the services it could render; how, though in the first instance there was a prejudice against it in France, on account of certain novelties in its constitutions, the sovereign, bishops, clergy, and people had, on coming to know it, become firmly attached to it, as was witnessed by the demand of the States-General in 1614 and 1615 and of the Assembly of the Clergy in 1617, both of which bodies wished for Jesuit colleges in Paris and the provinces as "the best means adapted to plant religion and faith in the hearts of the people". They refer also to the language of many letters-patent by which the kings of France had authorized the various Jesuit colleges, in particular that of Clermont, at Paris, which Louis XIV had wished should bear his own name, and which had come to be known as the College of Louis-le-Grand. Then, coming to their own personal experience, they bear witness that "the Jesuits are very useful for our dioceses, for preaching, for the guidance of souls, for implanting, preserving, and renewing faith and piety, by their missions, congregations, retreats, which they carry on with our approbation, and under our authority". Whence they conclude that "it would be difficult to replace them without a loss, especially in the provincial towns, where there is no university".

To the second question the bishops reply that, if there were any reality in the accusation that the Jesuit teaching was a menace to the lives of sovereigns, the bishops would long since have taken measures to restrain it, instead of entrusting the Society with the most important functions of the sacred ministry. They also indicate the source from which this and similar accusations against the Society had their origin. "The Calvinists", they say, "tried their utmost to destroy in its cradle a Society whose principal object was to combat their errors . . . and disseminated many publications in which they singled out the Jesuits as professing a doctrine which menaced the lives of sovereigns, because to accuse them of a crime so capital was the surest means to destroy them; and the prejudices against them thus aroused had ever since been seized upon greedily by all who had had any interested motives for objecting to the Society's existence (in the country)." The bishops add that the charges against the Jesuits which were being made at that time in so many writings with which the country was flooded were but rehashes of what had been spoken and written against them throughout the preceding century and a half.

To the third question they reply that the Jesuits have no doubt received numerous privileges from the

Holy See, many of which, however, and those the most extensive, have accrued to them by communication with the other orders to which they had been primarily granted: but that the Society has been accustomed to use its privileges with moderation and prudence.

The fourth and last of the questions is not pertinent here, and we omit the answer. The Archbishop of Paris, who was one of the assembled bishops, but on some ground of precedent preferred not to sign the majority statement, endorsed it in a separate letter which he addressed to the king.

(e) It is not to be denied that, as the Society acquired reputation and influence even in the Courts of powerful kings, certain domestic troubles arose, which had not been heard of before. Some jealousies were inevitable, and some losses of friendship; there was danger too of the faults of the Court communicating themselves to those who frequented it. But it is equally clear that the Society was keenly on its guard in this matter, and it would seem that its precautions were successful. Religious observance did not suffer to any appreciable extent. But few people of the seventeenth century, if any, noticed the grave dangers which were coming from absolute government, the decay of energy, the diminished desire for progress. The Society like the rest of Europe suffered under these influences, but they were plainly external, not internal. In France the injurious influence of Gallicanism must also be admitted (see above, *France*). But even in this dull period we find the French Jesuits in the new mission-field of Canada showing a fervour worthy of the highest traditions of the order. The final and most convincing proof that there was nothing seriously wrong in the poverty or in the discipline of the Society up to the time of its Suppression is offered by the inability of its enemies to substantiate their charges, when, after the Suppression, all the accounts and the papers of the Society passed bodily into the adversaries' possession. What an unrivalled opportunity for proving to the world those allegations which were hitherto unsupported! Yet, after a careful scrutiny of the papers, no such attempt was made. The conclusion is evident. No serious fault could be proved.

Neither at the middle of the eighteenth century nor at any previous time was there any internal decline of the Society; there was no loss of numbers, but on the contrary a steady growth; there was no falling off in learning, morality, or zeal. From 1000 members in 12 provinces in 1556, it had grown to 13,112 in 27 provinces in 1615; to 17,665 in 1680, 7890 of whom were priests, in 35 provinces with 48 novitiates, 28 professed houses, 88 seminaries, 578 colleges, 160 residences, and 106 foreign missions; and, in spite of every obstacle, persecution, expulsion, and suppression during the seventeenth and eighteenth centuries, in 1749 it numbered 22,589 members, of whom 11,293 were priests, in 41 provinces, with 61 novitiates, 24 professed houses, 176 seminaries, 669 colleges, 335 residences, 1542 churches, and 273 foreign missions. That there was no falling off in learning, morality, or zeal historians generally, whether hostile or friendly to the Society, attest (see Maynard, "The Jesuits, their Studies and their Teaching").

On this point the testimony of Benedict XIV will surely be accepted as incontrovertible. In a letter dated 24 April, 1748, he says that the Society is one "whose religious are everywhere reputed to be in the good odour of Christ, chiefly because, in order to advance the young men who frequent their churches and schools in the pursuit of liberal knowledge, learning, and culture, as well as in deeds and habits of the Christian religion and piety, they zealously exert every effort greatly to the advantage of the young". In another bearing the same date he says: "It is a universal conviction confirmed by pontifical declaration [Urban VIII, 6 August, 1623] that as Almighty God raised up other holy men for other times, so He has raised up St. Ignatius and the Society established by him to oppose Luther and the heretics of his day: and the religious sons of this Society, following the luminous way of so great a parent, continue to give an unfailing example of the religious virtues and a distinguished proficiency in every kind of learning, more especially in sacred, so that, as their co-operation is a great service in the successful conduct of the most important affairs of the Catholic Church, in the restoration of morality, and in the liberal culture of young men, they merit new proofs of Apostolic favour." In the paragraph following he speaks of the Society as "most deserving of the orthodox religion", and further on he says: "It abounds in men skilled in every branch of learning." On 27 September, 1748, he commended the General of the Society and its members for their "strenuous and faithful labours in sowing and propagating throughout the whole world Catholic faith and unity, as well as Christian doctrine and piety, in all their integrity and sanctity". On 15 July, 1749, he speaks of the members of the Society as "men who by their assiduous labour strive to instruct and form all the faithful of both sexes in every virtue, and in zeal for Christian piety and doctrine". "The Society of Jesus", he wrote on 29 March, 1753, "adhering closely to the splendid lessons and examples set them by their founder, St. Ignatius, devote themselves to this pious work [spiritual exercises] with so much ardour, zeal, charity, attention, vigilance, labour . . .", etc.

For the early controversies see the articles *Annat*, *Cerrutti*, *Forer*, *Gretser*, *Grou*, and *Reiffenberg* in SOMMERVOGEL and the full list of Jesuit apologies, *ibid.*, X, 1501.

DISTINGUISHED MEMBERS.—Saints: Ignatius Loyola; Francis Xavier; Francis Borgia; Stanislaus Kostka; Aloysius Gonzaga; Alphonsus Rodriguez; John Berchmans; John Francis Regis; Peter Claver; Francis de Geronimo, and Paul Miki, John Goto, James Kisai, Japanese martyrs (1597).

Blessed.—The blessed number 91; among them are Peter Faber; Peter Canisius; Anthony Baldinucci; the martyrs Andrew Bobola; John de Britto (qq. v.); Bernardino Realini; Ignatius de Azevedo (q. v.) and companions (known as the Forty Martyrs of Brazil), viz. Didacus de Andrada (priest); Antonio Suares; Benedictus a Castro; Francisco Magalhães; João Fernandes; Luiz Correa; Manoel Rodrigues; Simon Lopes; Manoel Fernandes; Alvaro Mendes; Pedro Nunhes; Andreas Gonçalves; Juan a S. Martino (scholastics); Gonzalvo Henriques; Didaco Pires; Ferdinand Sancies; Francisco Pérez Godoi; Antonio Correa; Manoel Pacheco; Nicolas Diniz; Alexius Delgado; Marco Caldeira; Sanjoannes (scholastic novices); Manoel Alvares; Francisco Alvares; Domingos Fernandes; Gaspar

Alvares; Amarus Vaz; Juan de Majorga; Alfonso de Vaena; Antonio Fernandes; Stefano Zuriare; Pedro Fontoura; Gregorio Scrivano; Juan de Zafra; Juan de Baeza; Blasio Ribeiro; João Fernandes; Simon Acosta (lay brothers); the Japanese martyrs: John Baptist Machado, 1617; Sebastian Chimura, 1622; Camillo Costanzo, 1622; Charles Spinola, 1622; Paul Navarro, 1622; Jerome de Angelis, 1623; Didacus Carvalho, 1624; Michael Carvalho, 1624; Francisco Pacheco and his companions Baltasar de Torres and Giovanni Battista Zola, 1626; Thomas Tzugi, 1627; Anthony Ixida, 1632 (priests); Augustine Ota, 1622; Gonzalvus Fusai and his companions, Anthony Chiuni, Peter Sampò, Michael Xumpò, Louis Cavara, John Chingocu, Thomas Acafoxi, 1622; Denis Fugixima and Peter Onizuchi (companions of Bl. Paul Navarro), 1622; Simon Jempo (companion of Bl. Jerome de Angelis), 1623; Vincent Caun and his companions: Peter Rinxei, Paul Chinsuche, John Chinsaco; Michael Tozò, 1626; Michael Nacaxima, 1628 (scholastics); Leonard Chimura, 1619; Ambrosio Fernandes, 1620; Gaspar Sandamatzu (companion of Bl. Francis Pacheco, 1626), lay brothers; the English martyrs: Thomas Woodhouse, 1573; and John Nelson, Edmund Campion, Alexander Briant (qq. v.); Thomas Cottam, 1582 (priests); the martyrs of Cuncolim (q. v.): Rudolph Acquaviva; Alfonso Pacheco; Pietro Berno; Antonio Francisco (priests); and Francisco Aranha, 1583 (lay brother); the Hungarian martyrs: Melchior Grodecz and Stephen Pongracz, 7 Sept., 1619.

Venerables.—The venerables number fifty and include, besides those whose biographies have been given separately (see Index vol.), Claude de La Colombière (1641–82), Apostle of the devotion to the Sacred Heart; Nicholas Lancicius (1574–1653), author of "Gloria Ignatiana" and many spiritual works, and, with Orlandini, of "Historia Societatis Jesu"; Julien Maunoir (1606–83), Apostle of Brittany.

Though the Jesuits, in accordance with their rules, do not accept ecclesiastical dignities, the popes at times have raised some of their numbers to the rank of cardinal, as Cardinals Bellarmine, Franzelin, de Lugo, Mai, Mazzella, Odescalchi, Pallavicino, Pázmány, Tarquini, Toledo, Tolomei (qq. v.); also Cardinals Casimir V, King of Poland, created 1647; Alvaro Cienfuegos (1657–1739), created 1720; Johann Eberhard Nidhard (1607–81), created 1675; Giambattista Salerno (1670–1729), created 1709; Andreas Steinhuber (1825–1907), created 1893; and Louis Billot (b. 1846), created 27 Nov., 1911.

As reference is made in most of the articles on members of the Society to Sommervogel's monumental "Bibliothèque de la Compagnie de Jésus" a brief account of its author is given here. Carlos, fourth son of Marie-Maximilien-Joseph Sommervogel and Hortense Blanchard, was born on 8 Jan., 1834, at Strasburg, Alsace, and died in Paris on 4 May, 1902. After studying at the *lycée* of Strasburg, Carlos entered the Jesuit novitiate at Issenheim, Alsace, 2 Feb., 1853, and was sent later to Saint-Acheul, Amiens, to complete his literary studies. In 1856 he was appointed assistant prefect of discipline and sub-librarian in the College of the Immaculate Conception, Rue Vaugirard, Paris. Here he discovered his literary vocation. The "Bibliothèque" of PP. Augustin and Aloys de Backer was then in course of publication, and Sommervogel, noting in it occasional errors and omissions, made a systematic examination of the whole work. Four years later P. Aug. de Backer, seeing his list of addenda and errata, a MS. of 800 pages containing over 10,000 entries, obtained leave to make use of it. Sommervogel continued at Rue Vaugirard till 1865, reviewing his course of philosophy meanwhile. He then studied theology at Amiens, where he was ordained in Sept., 1866. From 1867 till 1879 he was on the staff of the "Etudes", being managing editor from 1871 till 1879. During the Franco-German War he served as chaplain in Faidherbe's army, and was decorated in 1871 with a bronze medal for his self-sacrifice.

P. de Backer in the revised edition of his "Bibliothèque" (1869–76) gave Sommervogel's name as co-author, and deservedly, for the vast improvement in the work was in no small measure due to the latter's contributions. From 1880 till 1882 P. Sommervogel was assistant to his father provincial. Before 1882 he had never had any special opportunity of pursuing his favourite study; all his bibliographical work had been done in his spare moments. In 1884 he published his "Dictionnaire des ouvrages anonymes et pseudonymes publiés par des religieux de la Compagnie de Jésus". In 1885 he was appointed successor to the PP. de Backer and went to Louvain. He determined to recast and enlarge their work and after five years issued the first volume of the first part (Brussels and Paris, 1890); by 1900 the ninth volume had appeared; the tenth, an index of the first nine, which comprised the bibliographical part of the "Bibliothèque" was unfinished at the time of his death but has since been completed by P. Bliard, with a biographical notice by P. Brucker, from which these details had been drawn. P. Sommervogel had intended to compile a second, or historical, part of his work, which was to be a revision of Carayon's "Bibliographie historique". He was a man of exemplary virtue, giving freely to all the fruit of his devoted labours and content to lead for years a busy obscure life to which duty called him, until his superiors directed him to devote himself to his favourite study during the last fifteen years of his life. He re-edited a number of works by old writers of the Society and, in addition to his articles in the "Etudes", wrote: "Table méthodique des Mémoires de Trévoux" (3 vols., Paris, 1864–5); "Bibliotheca Mariana de la Comp. de Jésus" (Paris, 1885); "Moniteur bibliographique de la Comp. de Jésus" (Paris, 1894–1901).

MENOLOGIES, BIOGRAPHIES.—ALEGAMBE, *Mortes illustres et gesta eorum de Soc. Jesu qui in odium fidei necati sunt* (Rome, 1657); IDEM, *Heroes et victimæ charitatis* (Rome, 1658); DREWS, *Fasti Soc. Jesu* (Braunsberg, 1728); CHANDLERY, *Fasti breviores Soc. Jesu* (London, 1910); GUILHERMY, *Ménologe de la comp. de J.: Portugal* (Paris, 1867); *France* (Paris, 1892); *Italie* (Paris, 1893); *Germanie* (Paris, 1898); MACLEOD, *Menol. for the English Assistancy* (London); BOËRO, *Menologio* (Rome, 1859); STÖGER, *Historiographie Soc. Jesu* (Ratisbon, 1851); NIEREMBERG, *Claros varones de la comp. de J.* (Madrid, 1643); PATRIGNANI, *Menol. d'alcuni religiosi della comp. di G.* (Venice, 1730); TANNER, *Soc. Jesu apostolorum imitatrix* (Prague, 1694); IDEM, *Soc. Jesu usque ad mortem militans* (Prague, 1675); THOELEN, *Menol. der deutschen Ordensprovinz* (Roermond, 1901). Bibliographies of particular persons, on a larger scale than can be given here, will be found under the separate articles devoted to them. (See also Index volume.) The best-arranged historical bibliography is that of CARAYON, *Bibliographie de la compagnie de Jésus* (Paris, 1864). See also SOUTHWELL, *Bibl. scriptorum Soc. Jesus* (Rome, 1676); DE BACKER, *Bibliothèque des écriv. de la comp. de Jésus* (Liège, 1853); SOMMERVOGEL, *Bibl. des écriv. de la comp. de Jésus* (10 vols., Brussels, 1890–1910); HURTER, *Nomenclator literarius* (Innsbruck, 1892–9); DELPLACE, *Acta S. Sedis in causa Soc. Jesu* (Florence, 1887–95); HAMY, *Iconographie de la comp. de Jesus* (Paris, 1875); IDEM, *Galerie illustrée de la comp. de J.* (8 vols., Paris, 1893); DE URIARTE, *Catál. razonado de obras . . . de autores de la comp. de Jesús* (Madrid, 1904).

JESUIT PERIODICALS.—*Mémoires de Trévoux* (Trevoux and Paris, 1701–67, 265 vols.), *Table méthodique*, by SOMMERVOGEL (3 vols., Paris, 1864–65); *Civiltà cattolica* (Rome, 1850); *Etudes hist., litt., et relig.* (Paris, 1854);—began as *Etudes de théol.*, *intermittent*, 1880–8; *Table générale, 1888-1900* (Paris, 1901); *Précis historiques* (Brussels, 1852), *Tables, 1862–72* (Brussels, 1894), in 1899 it became the *Missions belges; The Month* (London, 1864), *Index (1864–1908); Stimmen aus Maria-Laach* (Freiburg, 1871), began as *Die Encyclika* (1864). In connexion with this is issued a series of *Ergänzungshefte.* Also *Register I, 1871–86; Register II, 1886–99; Studien* (Utrecht, 1868); *Rev. des questions historiques* (Brussels, 1877); *Przeglad powszechny* (General Review, Cracow); *Zeitsch. für kath. Theol.* (Innsbruck, 1876); *Razón y Fe* (Madrid, 1901). Besides the above, which deal with topics of all sorts, there are a host of minor periodicals devoted to special subjects; scientific, liturgical, social, college, mission, and parochial magazines are more numerous still. The *Messenger of the Sacred Heart* has editions for many countries and in numerous languages. It is the organ of the Apostleship of Prayer; most of these editions are edited by members of the Society; *America* (New York, 1909). (See also BOLLANDISTS; RATIO STUDIORUM; RETREATS; SPIRITUAL EXERCISES OF SAINT IGNATIUS; THEATRE.)

J. H. POLLEN.

Society of the Blessed Sacrament, The, a congregation of priests founded by Venerable Pierre-Julien Eymard (q. v.) in Paris, 1 June, 1856. His aim was to create a society whose members should devote themselves exclusively to the worship of the Holy Eucharist. Pius IX approved the society by Briefs of 1856 and 1858 and by a Decree of 3 June, 1863, approved the rule *ad decennium.* On 8 May, 1895, Leo XIII approved it *in perpetuum.* The first to join the founder was Père de Cuers, whose example was soon followed by Père Champion. The community prospered, and in 1862 Père Eymard opened a novitiate, which was to consist of priests and lay brothers. The former recite the Divine Office in choir and perform all the other duties of the clergy; the latter share in the principal end of the society—perpetual adoration, and attend to the various household employments peculiar to their state. The Blessed Sacrament is always exposed for adoration, and the sanctuary never without adorers in surplice, and if a priest, the stole. Every hour at the sound of the signal bell, all the religious kneel and recite a prayer in honour of the Blessed Sacrament and of Our Lady. Since 1856, the following houses have been established: France—Paris (1856), Marseilles (1859), Angers, (1861), Saint Maurice (1866), Trevoux (1895), Sarcelles (1898); Belgium—Brussels (1866), Ormeignies (1898), Oostduinkerke (1902), Bassenge (1902), Baronville (1910), Baelen Post Eupen on the Belgian frontier for Germans (1909); Italy—Rome (1882), Turin (1901), Castel-Vecchio (1905); Austria—Botzen (1896); Holland—Baarle-Nassau, now Nijmegen (1902); Spain—Tolosa (1907); Argentina—Buenos-Ayres (1903); Chile—Santiago (1908); Canada—Montreal (1890), Terrebonne (1902); United States—New York (1900); Suffern, N. Y. (1907). All the houses in France were closed by the Government in 1900, but Perpetual Adoration is still held in their chapel in Paris, which is in charge of the secular clergy, by the members of "The People's Eucharistic League". The first foundation in the United States took place in 1900, under the leadership of Père Estevenon, the present superior-general, in New York City, where the Fathers were received in the Canadian parish of Saint-Jean-Baptiste, 185 East 76th Street. A new church is under construction. In September, 1904, the Fathers of the Blessed Sacrament opened a preparatory seminary at Suffern, Rockland Co., N. Y. Here young boys who give evidence of a vocation are trained to the religious life, while pursuing a course of secular study. From the seminary the youths pass to the novitiate, where, after two years, they make the three vows of religion, and then enter upon their first theological course preparatory to ordination.

From every house of the Fathers of the Blessed Sacrament emanates a series of Eucharistic works, all instituted by their founder. They are: "The Eucharistic Weeks, or, Lights and Flowers", a society whose members devote themselves to the proper adornment of the altar; "The People's Eucharistic League", which numbers over 500,000; "The Priests' Eucharistic League", with a membership of 100,000; "The Priests' Communion League", an association of priests under the title of "Sacerdotal Eucharistic League", established at Rome in the church of San Claudio, July, 1906, and at once raised by Pius X to the dignity of an archconfraternity. Its object is to spread the practice of frequent and daily Communion, in conformity with the Decree of the Sacred Congregation of the Council, "De quotidiana SS. Eucharistiæ sumptione" (20 December, 1905). The means there highly recommended refer to the following points: (1) To instruct, refute objections, spread writings favouring daily Communion; (2) To encourage assistance at Holy Mass; (3) To promote Eucharistic triduums; (4) To induce children especially to approach the Holy Table frequently. "The Society of Nocturnal Adoration", the members of which for an entire night keep watch before the Host, reciting the Office of the Blessed Sacrament, and offering various acts of reparative homage; "The Work of First Communion for Adults". The apostolate of the press is a prominent feature in the labours of these religious. In the United States, they publish "Emmanuel", the organ of "The Priests' Eucharistic League", and "The Sentinel of the Blessed Sacrament".

For bibliography see Eymard, Pierre-Julien, Venerable.

A. Letellier.

Society of the Sacred Heart of Jesus, The, an institution of religious women, taking perpetual vows and devoted to the work of education, founded 21 Nov., 1800, by Madeleine-Sophie Barat (q. v.). One of the signs of returning vigour in the Church in France after 1792 was the revival of the religious life. Religious orders had been suppressed by the laws of 18 August, 1792, but within a few years a reaction set in; the restoration of some orders and the foundations of new congregations ushered in "the second spring". One of the first was the Society of Jesus. Under the provisional title of "Fathers of the Sacred Heart" and "Fathers of the Faith", some devoted priests banded themselves together and in due time returned from their exile or emigration to devote themselves to the spiritual welfare of their country. Father Léonor De Tournély was among the founders of the Fathers of the Sacred Heart, and the first to whom it occurred that an institute of women bearing the same name and devoting themselves to the education of girls, would be one of the most efficacious means of restoring the practice of religion in France. Though many difficulties intervened, two attempts were made. Princess Louise de Bourbon Condé, before the Revolution a Benedictine abbess, and the Archduchess Mary Anne of Austria both tried to form an institute according to his idea; but neither succeeded, and he died before anything could be accomplished. He had confided his views to Father Varin who succeeded him as superior of the Fathers of the Sacred Heart. A short time afterwards Father Varin found in Madeleine-Sophie Barat, sister of Father Louis Barat, the instrument to execute his plans. The first members of the new society began their community life in Paris, under the guidance of Father Varin. The first convent was opened at Amiens in 1801, under Mademoiselle Loquet. A school which had already existed there was made over to the new institute, and some who had worked in it offered themselves as postulants for the "Dames de la Foi" or "De L'Instruction Chrétienne", the name which the new society had assumed, as that of the "Society of the Sacred Heart" might be supposed to indicate a connexion with the royalist party of La Vendée. As Mlle. Loquet, who had been acting as superior, lacked the requisite qualities, by the advice of Father Varin and with the assent of the community Sophie Barat was named superior By education and temperament, the new superior was especially fitted for the work of foundation. In 1804 a second house was opened and a new member, Philippine Duchesne, received, who was destined to carry the work of the society beyond the limits of France. Formerly a novice of the Visitation convent at Ste. Marie d'en Haut, near Grenoble, Mlle. Duchesne found it impossible to reconstruct the religious life of the Visitation in the convent which she purchased after the Revolution. Father Varin made her acquaintance and reported to Mother Barat that the house was offered to her, and that she could find there some who wished to join her.

The first plan of the institute was drawn up by

Fathers Roger and Varin, and with a memorial composed by Mothers Barat and Duchesne was presented to the Bishop of Grenoble and approved by him. This plan and memorial set forth the end of the association, which was the perfection of its members and the salvation of souls; the spirit aimed at detachment from the world, purity of intention for the glory of the Sacred Heart, gentleness, zeal, and obedience; the means, for the religious, the training of the novitiate, and spiritual exercises, for others, boarding schools for the upper classes, free schools for the poor, and spiritual retreats. The rule in this preliminary stage was simple; the houses were to be under one superior-general, everything was to be in common, the office of the Blessed Virgin was to be recited, the time appointed for mental prayer was specified. The manner of life was to be simple without the prescribed austerities of the older orders, which would be incompatible with the work of education. On Mother Barat's return to Amiens in 1806 the first general congregation was assembled for the election of the superior-general, and she was chosen for the office. Father Varin then withdrew from the position he had held as superior of the new institute which was now regularly constituted, but he continued for years to help the young superior-general with his advice and support. The first serious trouble which arose nearly wrecked the whole undertaking. At the end of 1808 the "Dames de la Foi" had six houses; Amiens, Grenoble, Poitiers, Niort, Ghent, and Cuigniers. The first house at Amiens was governed at this time by Mother Baudemont, who fell under the influence of a priest of the Diocese of Amiens, Abbé de St-Estève, who took that house under his control and even drew up a set of rules drawn from those of the monastic orders and entirely foreign to the spirit of Father Varin and the foundress. The devotion to the Sacred Heart which was to be its very life scarcely appeared in the new rules and they were in consequence not acceptable to any of the houses outside Amiens. Abbé de St-Estève was determined to force the matter. He went to Rome and from thence sent orders, ostensibly from the Holy See. The name of the Society of the Sacred Heart was to be abandoned for that of "Apostolines", and he wrote vehement letters condemning Father Varin and the superior-general and her work. The most important letter in the case proved to be a forgery. The institute recovered its balance, but the house at Ghent had been already lost to the society.

The second general congregation (1815) examined the constitutions which had been elaborated by Father Varin and Mother Barat (they were an expansion of the first plan presented to the Bishop of Grenoble) and they were accepted by all the houses of the society. It was decided to have a general novitiate in Paris. The third general congregation (1820) drew up the first uniform plan of studies which has been developed and modified from time to time to bring it into harmony with present needs, without losing the features which have characterized it from the beginning. In 1826 the society obtained the formal approbation of Leo XII and the first cardinal protector was appointed, in place of an ecclesiastical superior whose authority would have depended too much upon local conditions. The sixth general congregation was anxious to bring the constitutions into closer conformity with those of the Society of Jesus. Mother Barat foresaw that the proposed changes were unsuitable for a congregation of women, but permitted an experimental trial of them for three years. Finally the whole affair was submitted to Gregory XVI, who decided that the society should return in all points to the constitution approved by Leo XII. The last changes in the constitutions were made in 1851 with the sanction of the Holy See. Superiors-vicar were named to help the superior-general in the government of the society by taking the immediate supervision of a certain number of houses forming a vicariate. The superiors-vicar assembled with the mother general and the assistants general, form the general congregation of the society. In 1818 Mother Philippine Duchesne introduced the society into the United States and the first houses were founded in Missouri and Louisiana. The society under the guidance of Mother Mary Aloysia Hardey (q. v.) spread rapidly, and in 1910 counted twenty-seven houses and more than eleven hundred members The extension in Europe was confined to France until 1827 when a school was opened at the Trinità dei Monti, Rome. Houses were founded in Belgium (Jette), 1836; England (Berrymead, now Roehampton) and Ireland (Roscrea), both in 1841; Canada (Montreal), 1842; Austria (Lemberg), 1843; Spain (Sarria, near Barcelona), 1846. Mother du Rousier was the pioneer in South America (Santiago de Chile in 1854). Other foundations were made in the West Indies (1858); New Zealand (1880); Australia (1882); Egypt (1903); Japan (1908). The Revolution of 1830 disturbed the house in Paris but did not destroy it; the novitiate was removed elsewhere. In 1848 the house in Switzerland had to be abandoned; the religious were expelled from Genoa, Turin, Saluzzo, and Pignerol while the houses in Rome were searched and pillaged. In 1860 Loreto, St. Elpidio, and Perugia were suppressed. The German houses were closed by the May Laws of 1873. Between 1903 and 1909 forty-seven houses in France were closed and many of them confiscated by the French Government. The mother-house was transferred to Brussels in 1909. This wholesale destruction increased the extension in foreign countries; for almost every house that has been closed another has been opened elsewhere. At present the society counts 139 houses and about 6500 religious.

The society aims at a twofold spirit—contemplative and active. It is composed of choir religious and lay sisters. Enclosure is observed in a manner adapted to the works; the Office of the Blessed Virgin is recited in choir. The choice of subjects is guided by the qualifications laid down in the constitutions. In addition to the indication of a true religious vocation there is required respectable parentage, unblemished reputation, a good or at least sufficient education with some aptitude for completing it, a sound judgment, and above all a generous determination to make an entire surrender of self to the service of God through the hands of superiors. The candidate is not allowed to make any conditions as to place of residence or employment, but must be ready to be sent by obedience to any part of the world, even the privilege of going on foreign missions is not definitely promised in the beginning to those who aspire to it. Postulants are admitted to a preliminary probation of three months, at the end of which they may take the religious habit and begin their novitiate of two years, which are spent in studying the spirit and the rules of the society, exercising themselves in its manner of living, and in the virtues which they will be called upon to practice; the second year is devoted to a course of study which is to prepare them for their educational work. To each novitiate there is attached a teaching and training department where the first course of studies may be taken, and when it is possible the young religious pass a year in this, after their vows, before they are sent to teach in the schools. The first vows, simple perpetual vows of poverty, chastity and obedience, are taken at the end of two years of noviceship, after which follow five years spent in study, teaching, or other duties. At the end of this period follows for those who have special aptitude for the work of teaching, another short course of study, and for all a period of second novitiate or probation lasting six months, at the end of which, that is to say, seven years after their admission to the society, the aspirants take their final vows and are received as professed religious. The vow of stability, that is, of perseverance in the society, is then added, and for the choir religious a vow to consecrate themselves to education of youth; provision is made, however, that this vow may be accomplished even if obedience should prescribe other duties than those of direct teaching, and may be fulfilled by concurrence in any way in the work of the society. The vow of stability binds the society to the professed until death, as well as the professed to the society; this bond can only be broken by the Holy See. The society is governed by a superior general, elected for life by the assistants general and superiors vicar. The assistants general are elected for six years, the superiors vicar and local superiors are nominated by the mother general, and may be changed at her discretion; their usual period of government is three years, but it may be prolonged or shortened according to circumstances. The superior general assembles the superiors vicar in a general congregation every six years, and with the help of the assistants general transacts with them all business connected with the general government of the society. These periodical assemblies, the occasional visits of the superior general to the houses in different countries, the regular reports and accounts sent in from every vicariate, the free access of all to the mother general by writing, and in particular the organization of the house of last probation, which as far as possible brings the young religious for six months into touch with the first superiors of the society—all tend to unity. Its union is what is most valued, and if it had been possible to define it sufficiently it is said that a fourth vow of charity would have been added to the obligations of the members.

Four principal works give scope to the activities of the society. (1) Education of the upper classes in the boarding schools and of late years in day schools. Originally the plan of studies was more or less uniform in all the houses, but it has become necessary to modify it according to the needs and educational ideals of different countries and the kind of life for which the pupils have to be prepared. The character of the education of the Sacred Heart, however, remains the same, based on the study of religion and of Christian philosophy and laying particular stress on history, literature, essay-writing, modern languages, and such knowledge of household management as can be taught at school. (2) Free or parochial schools. In some countries, as in England, these are aided by the State, and follow the regulations laid down for other public elementary schools; in others they are voluntary and adapt their teaching to the needs and circumstances of the children. Between these two classes of schools have arisen in England secondary schools, aided by the State, which are principally feeding schools for the two training colleges in London and Newcastle, where Catholic teachers are prepared for the certificates entitling them to teach in elementary state-supported schools. This work is of wider importance than the teaching of single elementary schools, and is valued as a means of reaching indirectly a far greater number of children than those with whom the religious themselves can come into contact. It likewise leavens the teaching profession with minds trained in Catholic doctrine and practice. This work for Catholic teachers also exists at Lima in a flourishing condition. (3) A work which is taking rapid development is that of spiritual retreats for all classes of persons. The spiritual exercises are given to considerable numbers of ladies who spend a few days within the convents of the Sacred Heart; in other cases the exercises are adapted for poor girls and peasant women. Retreats for First Communion in Rome, and retreats for Indian women in Mexico are special varieties of this work. (4) The congregations of Children of Mary living in the world which have their own rules and organization (see CHILDREN OF MARY OF THE SACRED HEART, THE).

JANET STUART.

Socinianism, the body of doctrine held by one of the numerous Antitrinitarian sects to which the Reformation gave birth. The Socinians derive their name from two natives of Siena, Lelio Sozzini (1525–62) and his nephew Fausto Sozzini (1539–1604). The surname is variously given, but its Latin form, Socinus, is that currently used. It is to Fausto, or Faustus Socinus, that the sect owes its individuality, but it arose before he came into contact with it. In 1546 a secret society held meetings at Vicenza in the Diocese of Venice to discuss, among other points, the doctrine of the Trinity. Among the members of this society were Blandrata, a well-known physician, Alciatus, Gentilis, and Lelio, or Lælius Socinus. The last-named, a priest of Siena, was the intimate friend of Bullinger, Calvin, and Melanchthon. The object of the society was the advocacy not precisely of what were afterwards known as Socinian principles, but of Antitrinitarianism. The Nominalists, represented by Abelard, were the real progenitors of the Antitrinitarians of the Reformation period, but while many of the Nominalists ultimately became Tritheists, the term *Antitrinitarian* means expressly one who denies the distinction of persons in the Godhead. The Antitrinitarians are thus the later representatives of the Sabellians, Macedonians, and Arians of an earlier period. The secret society which met at Vicenza was broken up, and most of its members fled to Poland. Lælius, indeed, seems to have lived most at Zurich, but he was the mainspring of the society, which continued to hold meetings at Cracow for the discussion of religious questions. He died in 1562 and a stormy period began for the members of the party.

The inevitable effect of the principles of the Reformation was soon felt, and schism made its appearance in the ranks of the Antitrinitarians—for so we must call them all indiscriminately at this time. In 1570 the Socinians separated, and, through the influence of the Antitrinitarian John Sigismund, established themselves at Racow. Meanwhile Faustus Socinus had obtained possession of his uncle's papers and in 1579 came to Poland. He found the various bodies of the sect divided, and he was at first refused admission because he refused to submit to a second baptism. In 1574 the Socinians had issued a "Catechism of the Unitarians", in which, while much was said about the nature and perfections of the Godhead, silence was observed regarding those Divine attributes which are mysterious. Christ was the Promised Man; He was the Mediator of Creation, i. e. of Regeneration. It was shortly after the appearance of this catechism that Faustus arrived on the scene and, in spite of initial opposition, he succeeded in attaching all parties to himself and thus securing for them a degree of unity which they had not hitherto enjoyed. Once in possession of power, his action was high-handed. He had been invited to Siebenburg in order to counteract the influence of the Antitrinitarian bishop Francis David (1510–79). David, having refused to accept the peculiarly Socinian tenet that Christ, though not God, is to be adored, was thrown into prison, where he died. Budnæus, who adhered to David's views, was degraded and excommunicated in 1584. The old catechism was now suppressed and a new one published under the title of the "Catechism of Racow". Though drawn up by Socinus, it was not published until 1605, a year after his death; it first appeared in Polish, then in Latin in 1609.

Meanwhile the Socinians had flourished; they had established colleges, they held synods, and they had a printing press whence they issued an immense amount of religious literature in support of their views; this was collected, under the title "Bibliotheca Antitrinitarianorum", by Sandius. In 1638 the Catholics in Poland insisted on the banishment of the Socinians, who were in consequence dispersed. It is evident from the pages of Bayle that the sect was dreaded in Europe; many of the princes were said to favour it secretly, and it was predicted that Socinianism would overrun Europe. Bayle, however, endeavours to dispel these fears by dwelling upon the vigorous measures taken to prevent its spread in Holland. Thus, in 1639, at the suggestion of the British Ambassador, all the states of Holland were advised of the probable arrival of the Socinians after their expulsion from Poland; while in 1653 very stringent decrees were passed against them. The sect never had a great vogue in England; it was distasteful to Protestants who, less logical, perhaps, but more conservative in their views, were not prepared to go to the lengths of the Continental Reformers. In 1612 we find the names of Leggatt and Wightman mentioned as condemned to death for denying the Divinity of Christ. Under the Commonwelath, John Biddle was prominent as an upholder of Socinian principles; Cromwell banished him to the Scilly Isles, but he returned under a writ of habeas corpus and became minister of an Independent church in London. After the Restoration, however, Biddle was cast again into prison, where he died in 1662. The Unitarians are frequently identified with the Socinians, but there are fundamental differences between their doctrines (for which see next section).

Fundamental Doctrines.—These may be gathered from the "Catechism of Racow", mentioned above and from the writings of Socinus himself, which are collected in the "Bibliotheca Fratrum Polonorum". The basis was, of course, private judgment; the Socinians rejected authority and insisted on the free use of reason, but they did not reject revelation. Socinus, in his work "De Auctoritate Scripturæ Sacræ", went so far as to reject all purely natural religion. Thus for him the Bible was everything, but it had to be interpreted by the light of reason. Hence he and his followers thrust aside all mysteries; as the Socinian John Crell (d. 1633) says in his "De Deo et ejus Attributis", "Mysteries are indeed exalted above reason, but they do not overturn it; they by no means extinguish its light, but only perfect it". This would be quite true for a Catholic, but in the mouth of Socinian it meant that only those mysteries which reason can grasp are to be accepted. Thus both in the Racovian Catechism and in Socinus's "Institutiones Religionis Christianæ", only the unity, eternity, omnipotence, justice, and wisdom of God are insisted on, since we could be convinced of these; His immensity, infinity, and omnipresence are regarded as beyond human comprehension, and therefore unnecessary for salvation. Original justice meant for Socinus merely that Adam was free from sin as a fact, not that he was endowed with peculiar gifts; hence Socinus denied the doctrine of original sin entirely. Since, too, faith was for him but trust in God, he was obliged to deny the doctrine of justification in the Catholic sense; it was nothing but a judicial act on the part of God. There were only two sacraments, and, as these were held to be mere incentives to faith, they had no intrinsic efficacy. Infant baptism was of course rejected. There was no hell; the wicked were annihilated.

Christology.—This point was particularly interesting, as on it the whole of Socinianism turns. God, the Socinians maintained, and rightly, is absolutely simple; but distinction of persons is destructive of such simplicity, therefore, they concluded, the doctrine of the Trinity is unsound. Further, there can be no proportion between the finite and the infinite, hence there can be no incarnation of the Deity, since that would demand some such proportion. But if, by an impossibility, there were distinction of persons in the Deity, no Divine person could be united to a human person, since there can be no unity between two individualities. These arguments are of course puerile and nothing but ignorance of Catholic teaching can explain the hold which such views obtained in the sixteenth and seventeenth centuries. As against the first argument, see St. Thomas, Summa, I, Q. xii, a. 1, ad 4am; for the solution of the others see Petavius. But the Socinians did not become Arians, as did Campanus and Gentilis. The latter was one of the original society which held its meetings at Vicenza; he was beheaded at Berne in 1566. They did not become Tritheists, as Gentilis himself was supposed by some to be (cf. "A Short History of Valentius Gentilis the Tritheist", London, 1696). Nor did they become Unitarians, as might have been expected. Socinus had indeed many affinities with Paul of Samosata and Sabellius; with them he regarded the Holy Spirit as merely an operation of God, a power for sanctification. But his teaching concerning the person of Christ differed in some respects from theirs. For Socinus, Christ was the Logos, but he denied His pre-existence; He was the Word of God as being His Interpreter (*interpres divinæ voluntatis*). The passages from St. John which present the Word as the medium of creation were explained by Socinus of regeneration only. At the same time Christ was miraculously begotten: He was a perfect man, He was the appointed mediator; but He was not God, only deified man. In this sense He was to be adored; and it is here precisely that we have the dividing line between Socinianism and Unitarianism, for the latter system denied the miraculous birth of Christ and refused Him adoration. It must be confessed that, on their principles, the Unitarians were much more logical.

Redemption and Sacraments.—Socinus's views regarding the person of Christ necessarily affected his teaching on the office of Christ as Redeemer, and consequently on the efficacy of the sacraments. Being purely man, Christ did not work out our redemption in the sense of satisfying for our sins; and consequently we cannot regard the sacraments as instruments whereby the fruits of that redemption are applied to man. Hence Socinus taught that the Passion of Christ was merely an example to us and a pledge of our forgiveness. All this teaching is syncretized in the Socinian doctrine regarding the Last Supper; it was not even commemorative of Christ's Passion, it was rather an act of thanksgiving for it.

The Church and Socinianism.—Needless to say, the tenets of the Socinians have been repeatedly condemned by the Church. As Antitrinitarianists, they are opposed to the express teaching of the first six councils; their view of the person of Christ is in contradiction to the same councils, especially that of Chalcedon and the famous "Tome" (Ep. xxviii) of St. Leo the Great (cf. Denzinger, no. 143). For its peculiar views regarding the adoration of Christ, cf. can. ix. of the fifth Œcumenical Synod (Denz., 221). It is opposed, too, to the various creeds, more especially to that of St. Athanasius. It has also many affinities with the Adoptionist heresy condemned in the Plenary Council of Frankfort, in 794, and in the second letter of Pope Hadrian I to the bishops of Spain (cf. Denz., 309–314). Its denial of the Atonement is in opposition to the decrees against Gotteschalk promulgated in 849 (cf. Denz., 319), and also to the definition of the Fourth Lateran Council against the Albigensians (Denz., 428; cf. also Conc. Trid., Sess. xxii., cap. i. de Sacrificio Missæ, in Denz., 938). The condemned propositions of Abelard (1140) might equally well stand for those of the Socinians (cf. Denz., 368 sqq.). The same must be said of the Waldensian heresy: the Profession of Faith drawn up against them by Innocent III might be taken as a summary of Socinian errors. The formal condemnation of Socinianism appeared first in the Constitution of Paul IV, "Cum quorundam", 1555 (Denz., 993); this was confirmed in 1603 by Clement VIII, or "Dominici gregis", but it is to be noted that both of these condemnations appeared before the publication of the "Catechism of Racow" in 1605, hence they do not adequately reflect the formal doctrines of Socinianism. At the same time it is to be remarked, that according to many, this catechism itself does not reflect the doctrines really held by the leaders of the party; it was intended for the laity alone. From the decree it would appear that in 1555 and again in 1603 the Socinians held (a) that there was no Trinity, (b) that Christ was not consubstantial with the Father and the Holy Spirit, (c) that He was not conceived of the Holy Spirit, but begotten by St. Joseph, (d) that His Death and Passion were not undergone to bring about our redemption, (e) that finally the Blessed Virgin was not the Mother of God, neither did she retain her virginity. It would seem from the Catechism that the Socinians of 1605 held that Christ was at least miraculously conceived, though in what sense they held this is not clear.

HUGH POPE.

Sociology.—The claims of sociology (*socius, companion*; λόγος, science) to a place in the hierarchy of sciences are subjected to varied controversy. It has been held that there is no distinct problem for a science of sociology, no feature of human society not already provided for in the accepted social sciences. Again it has been claimed that while the future may hold out prospects for a science such as sociology, its present condition leaves much to be desired. Furthermore, among sociologists themselves discussion and disagreement abound concerning aims, problems, and methods of the science. Beyond this confusion in scientific circles, misunderstanding results from the popular habit of confounding sociology with philanthropy, ethics, charity, and relief, social reform, statistics, municipal problems, socialism, sanitation, criminology, and politics. It is hardly to be expected that differences of opinion would not occur when scholars endeavour to describe in simple terms the complex social processes; to pack a vast array of historical and contemporaneous facts in rigid logical classes, and to mark off for research purposes sections of reality which in fact overlap at a hundred points. Nevertheless, efforts to create a science of sociology have led to notable results. Minds of a very high order have been attracted to the work; abundant literature of great excellence has been produced; neighbouring sciences have been deeply affected by the new point of view which Sociology has fostered; and the teaching of the science has attained to undisputed recognition in the universities of the world.

It is the aim of economic science to investigate the forms, relations, and processes that occur among men in their associated efforts to make immediate or mediate provision for their physical wants. The science deals with the phenomena resulting from the production, distribution, and consumption of wealth. The science of politics is concerned with the stable social relations resulting from the efforts of sovereign social units to maintain themselves in integrity in their internal and external relations and to promote human progress. The state is the institution in which these activities centre. Hence, the forms in which sovereignty is clothed, the processes of change which occur among them, and the varying functions of government are central problems in this field of investigation. The science of religions aims at describing the stable social relations which occur when men collectively endeavour to understand the law of their relation to a Supreme Being and to adjust their worship and conduct to His supreme will. The science of law is concerned with those principles, relations, and institutions through which the more important relations between the one and the many are defined, directed, and sanctioned by the sovereign state. The science of ethics aims at expounding the principles and sanctions by which all human conduct, both individual and social, is adjusted to the supreme end of man; or, in the Christian sense of the term, to the will of God. The science of history, which assumes the law of continuity in human society, endeavours to look out over its whole surface, to discover and describe in a large way the processes of change that have occurred in social relations of whatsoever kind. Each of these social sciences is analytical or descriptive, but in its complete development it should have a normative or directive side. To use the technical phrase, it is teleological. The complete function of each of them should include the setting forth of a purpose for human conduct and should offer direction towards it, which is modified by the relations in which each stands to the others.

Some sociologists endeavour to locate their science as logically antecedent to all of these. According to this view sociology should occupy itself with general phases of the processes of human association and should furnish an introduction to the special social sciences. Others endeavour to locate sociology as the philosophical synthesis of the results of the special social sciences, in which view it resembles somewhat the philosophy of history. Giddings includes both functions in his description of the science. He says in his "Principles of sociology": "While Sociology in the broadest sense of the word is the comprehensive science of society, coextensive with the entire field of the special social sciences, in a narrower sense and for the purposes of university study and of general exposition it may be defined as the science of social elements and first principles. . . . Its far-reaching principles are the postulates of special sciences and as such they co-ordinate the whole body of social generalizations and bind them together in a large scientific whole" (p. 33).

There is a general tendency towards the establishment of a single dominant interest in social groups. Periods of unstable equilibrium tend to be followed by constructive epochs in which some one social interest tends to dominate. This is the case when social groups are primitive and isolated as well as when they are highly organized and progressive. It may be the food interest, the maintenance of the group against invasion, the thirst for conquest incarnate in a leader, or the establishment of the Kingdom of God on earth that serves as the basis of social unity. In any case, the tendency of social groups towards unity is practically universal. In earlier stages of civilization the process is relatively simple, but to-day, when differences of climate, race, environment, type, and place are overcome by progress in transportation, travel, communication, and industry, the process is highly complex. Political institutions, languages, and race traditions no longer bound the horizon of the thinker. To-day all states are submerged in the larger view of humanity. All cultures, civilizations, centuries, all wars, and armaments, all nations and customs are before the social student. Origins heretofore hidden are exposed to his confused gaze. Interpretations, venerable with age and powerful from heretofore unquestioning acceptance, are swept away and those that are newer are substituted. Dozens of social sciences flow with torrential impatience, hurling their discoveries at the feet of the student. Thousands of minds are busy day and night gathering facts, offering interpretations, and seeking relations. The social sciences have become so overburdened with facts and so confused by varying interpretations that they tend to split into separate subsidiary sciences in the hope that the mind may thus escape its own limitations and find help in its power of generalization. Economic factors and processes are studied more industriously than ever before, but they are found to have in themselves vital bearings other than economic. Political, religious, educational, and social facts are found saturated with heretofore unsuspected meanings, which in each particular case the science itself is unable to handle.

In this situation three general lines of work present themselves. (1) There is the need of careful study of commonplace social facts from a point of view wider than that fostered in each particular social science. (2) The results obtained within the different social sciences and among them should be brought together in general interpretations. (3) A social philosophy is needed which will endeavour to take the established results of these sciences and put them together through the cohesive power of metaphysics and philosophy into an attempted interpretation of the whole course of human society itself. Professor Small thus describes the situation: "We need a genetic, static, and teleological account of associated human life; a statement which can be relied upon as the basis of a philosophy of conduct. In order to derive such a statement it would be necessary to complete a programme of analyzing and synthesizing the social process in all of its phases."

On the whole the sociological treatment of social facts is much wider than that found in the other social sciences and its interpretations are consequently broader. An endeavour is made in following out the social point of view to study social facts in the full complement of their organic relations. Thus, for instance, if the sociologist studies the question of woman suffrage, it appears as a phase in a world-movement. He goes back through the available history of all times and civilizations endeavouring to trace the changing place of woman in industry, in the home, education, and before the law. By looking outward to the horizon and backwards to the vanishing point of the perspective of history, the sociologist endeavours to discover all of the relations of the suffrage movement which confronts us to-day and tries to interpret its relation to the progress of the race. He will discover that the marriage rate, the birth rate, the movement for higher education, the demand for political and social equality are not unrelated facts but are organically connected in the processes that centre on woman in human society. The student of economics, politics, ethics, or law will be directly interested in particular phases of the process. But the sociologist will aim at reaching an all-inclusive view in order to interpret the entire movement in its organic relations to historical and actual social processes. Likewise, whether the problem be that of democracy, liberty, equality, war, armaments and arbitration, tariffs or inventions, the organization of labour, revolution, political parties, centralization of wealth, conflicts among social classes, the sociologist will endeavour to discover their wider bearings and their place in the social processes of which they are part.

The method employed in sociology is primarily inductive. At times ethnological and biological methods have predominated but their sway has been diminished in recent years. Sociology suffers greatly from its failure to establish as yet a satisfactory basis of classification for social phenomena. Although much attention has been given to this problem the results achieved still leave much to be desired. The general point of view held in sociology, as distinct from the particular point of view held in the special social sciences, renders this problem of classification particularly difficult and causes the science to suffer from the very mass of indiscriminate material which its scholarship has brought to view. Hence, the process of observation and interpretation has been somewhat uncertain and results have been subjected to vehement discussion. The fundamental problem for sociology is to discover and to interpret coexistences and sequences among social phenomena. In its study of origins and of historical development of social forms, sociology necessarily makes use of ethnological methods. It resorts extensively to comparative methods in its endeavour to correlate phenomena related to the same social process as they appear in different times and places. The statistical method is of the highest importance in determining quantities among social phenomena, while the prevailing tendency to look upon society from a psychological point of view has led to the general method of psychological analysis. The efforts to develop a systematic sociology deductively have not yet led to any undisputed results although the evolutionary hypothesis prevails widely. The range of methods to be found among sociologists might be fairly well illustrated among American writers by a comparison of the works of Morgan, Ward, Giddings, Baldwin, Cooley, Ross, Sumner, Mayo-Smith, and Small.

In as far as modern sociology has been developed on the philosophical side it has naturally been unable to remain free of metaphysics. It shows a marked tendency towards Agnosticism, Materialism, and Determinism. "He would be a bold man", says Professor Giddings, addressing the Amer. Economic Association in 1903, "who to-day after a thorough training in the best historical scholarship should venture to put forth a philosophy of history in terms of the divine ideas or to trace the plan of an Almighty in the sequence of human events. On the other hand, those interpretations that are characterized as materialistic . . . are daily winning serious respect." Even when the science has been confined to the humbler rôle of observation and interpretation of particular social facts and processes, its devotees have been unable to refrain from assumptions which are offensive to the Christian outlook on life. Theoretically, social facts may be observed as such, regardless of philosophy. But social observation which ignores the moral and social interpretation of social facts and processes is necessarily incomplete. One must have some principle of interpretation when one interprets, and one always tends towards interpretation. Thus it is that even descriptive sociology tends to become directive or to offer interpretations, and in so doing it often takes on a tone with which the Christian cannot agree.

If, for instance, the sociologist proposes a standard family of a limited number of children in the name of human progress, by implication he assumes an attitude towards the natural and Divine law which is quite repugnant to Catholic theology. Again, when he interprets divorce in its relation to supposed social progress alone and finds little if any fault with it, he lays aside for the moment the law of marriage given by Christ. When, too, the sociologist studies the relation of the State to the family and the individual or the relations of the Church and the State he comes into direct contact with the fundamental principles of Catholic social philosophy. When he studies the religious phenomena of history, he cannot avoid taking an attitude toward the distinctive claims of Christianity in his interpretation of the facts of its history. Thus it is that sociology, not only on its philosophical side but also on the side of observation, interpretations, and social direction, tends to take on a tone that is often foreign to and as often antagonistic to Catholic philosophy. Professor Ward would forbid pure sociology to have anything to do with the direction of human conduct. He says, for instance, in his "Pure Sociology": "All ethical considerations in however wide a sense that expression may be understood must be ignored for the time being and attention concentrated upon the effort to determine what actually is. Pure Sociology has no concern with what Sociology ought to be or with any social ideals. It confines itself strictly with the present and the past, allowing the future to take care of itself." But he would give to what he terms Applied Sociology the function of directing society toward its immediate ideals. He says: "The subject matter of Pure Sociology is achievement, that of Applied Sociology is improvement. The former relates to the past and the present, the latter to the future." Sociology can scarcely avoid interpretation and direction of human conduct and hence it can hardly be expected to avoid taking very definite attitudes towards the Christian outlook on life.

Modern sociology hopes to arrive at a metaphysics through the systematic observation and interpretation of present and past social facts and processes. In the Christian view of life, however, the social sciences are guided by a sanctioned metaphysics and philosophy. This philosophy is derived not from induction but from Revelation. This view of life accepts at the outset as Divinely warranted the moral and social precepts taught or re-enforced by Christ. Thus, it looks out upon the real largely from the standpoint of the ideal and judges the former by the latter. It does not, of course, for a moment forget that the systematic observation of life and knowledge of its processes are essential to the understanding and application of the Divine precepts and to the establishment of the sanctioned spiritual ideals which it professes. But Christian social philosophy did not, for example, derive its doctrine of human brotherhood by induction; it received it directly from the lips of Christ. And the consequences of that Christian principle in human history are beyond all calculation. The Christian view of life does not confound the absolute with the conventional in morality, although in the literature of Christianity too much emphasis may at times be placed upon what is relative. A Christian sociology, therefore, would be one that carries with it always the philosophy of Christ. It could not look with indifference on the varied and complicated social processes amid which we live and move. In all of its study and interpretation of what is going on in life—which is largely the function of sociology—it never surrenders concern for what ought to be, however clearly or dimly this "ought" is seen. While modern sociology is seeking descriptive laws of human desires and is endeavouring to classify human interests and to account for social functions, it is seeking merely for changes, uniformities, and interpretations unconcerned with any relation of these to the Divine law. Christian sociology, on the contrary, is actuated mainly by concern about the relations of social changes to the law and Revelation of God. It classifies processes, institutions, and relations as right or wrong, good or bad, and offers to men directive laws of human desire and distinctive standards of social valuations by which social conduct should be governed.

Economics as it developed under Christian influences related largely to the search for justice in property relations among men rather than to the evolution of property itself. Whatever attempts were made to correlate and interpret economic phenomena, they were inspired largely by the search for justice and by the hope of holding industrial relations true to the law of justice as it was understood. Political science as it developed under Christian influence never lost sight of the Divine sanction of civil authority. The study of the forms and changes of government, little as the underlying processes were then understood, never departed far from the thought of the state as a natural and Christian phenomenon and the exercise of its authority as a delegated power from on high. Thus, whatever there was of social science, rudimentary because of the static view of society which obtained, it grew out of the study and application of the moral and social principles derived from the Revelation of God and presented to the believer through the instrumentality of the Church. The great emphasis placed in our days of wonderful social investigation and of world-views of social processes causes those earlier attempts at social science to appear crude, yet they developed organically out of their historical surroundings, retaining, for all time, titles to no mean consideration. Scattered here and there throughout theological and moral treatises in Christian literature there is a vast amount of sociological material, which has its value in our own time. The present-day endeavours of sociology to classify human desires and fundamental interests appear to have been anticipated in a modest way in the work of the medieval Scholastics. Theological treatises on human acts and their morality reveal a very practical understanding of the influence of objective and subjective environment on character. Treatises on sin, on the virtues, on good and bad example touch constantly on social facts and processes as then understood. The mainspring of all of this work, however, was not to show forth social processes as such, not to look for theretofore unknown law, but to enable the individual to discover himself in the social process and to hold his conduct true to his ideals.

To some extent there is confusion in speaking of sociology in this way since reference appears to be made rather to moral direction than to social investigation. The relations between all of the social sciences are intimate. The results established in the fields of the social sciences will always have the greatest importance for Christian ethics. It must take up the undisputed results of sociological investigation and widen its definitions at times. It must restate rights and obligations in the terms of newer social relations and adjust its own system to much that it can welcome from the hands of the splendid scholarship now devoted to social study. Bouquillon (q. v.), who was a distinguished theologian, complained that we had not paid sufficient attention to the results of modern social research. Illustration may be found in the problem of private property, which is a storm centre in modern life and is the object of most acute study from the standpoint of the social sciences. *Suum cuique* may be called the law of justice that is back of all social changes and is sanctioned for all time. But the social processes which change from time to time the content of *suum* may not be neglected. Changes in the forms of property, varied consequences from the failure to have it at all and from the having of it in excess, are seen about us every day. It is undeniably the business of ethics to teach the sanctions of private property and defend them, but it must willingly learn the sociological meaning of property, the significance of changes in its forms, and the laws that govern these changes. This is largely the work of other social sciences. Ethics must proclaim the inviolable natural rights of the individual to private property in certain forms. It must proclaim the pernicious moral consequences that may flow from certain property conditions, but it will fail of its high mission unless in its indispensable ethical work it take account of the established results of social investigation. Economics, ethics, sociology, politics are drawn together by the complex problems of property and each has much to learn from the others. And so, whether the problem be that of the Christian family, the relations of social classes, altruism, the modification of the forms of government, the changing status of woman, the representative of the Christian outlook on life may not for a moment ignore the results of these particular social sciences.

Closer relations have been established between Christian ethics and sociology in modern days. Modern social conditions with their rapid changes, accompanied by ethical and philosophical unrest, have set up a challenge which the Christian Church must meet without hesitation. The Catholic Church has not failed to speak out definitely in the circumstances. The School of Catholic Social Reform, which has reached such splendid development on the European continent, represents the closer sympathy between the old Christian ethics and the later sociological investigation. Problems of poverty seen in its organic relations to social organization as a whole, problems and challenges raised by the modern industrial labouring class, demand for a widening of the definitions of individual and social responsibility to meet the facts of modern social power of whatsoever kind, reaffirmations of the rights of individuals have been taken account of in this whole Christian modern movement with the happiest result. There has been produced an abundant literature in which traditional Christian ethics take ample account of modern social investigations and the theories thus formulated have created a movement for social amelioration which is playing a notable part in the present-day history of Europe.

Since all of the social sciences are concerned with the same complex fact of human association, it is but to be expected that the older sciences would have contained in their literature much that in the long run is turned over to the newer ones. Sociological material is found, therefore, throughout the history of the other social sciences. The word "sociology" comes from Auguste Comte, who used it in his course of positive philosophy, to indicate one of the sections in his scheme of sciences. Spencer sanctioned the use of the word and gave it a place in permanent literature by using it unreservedly in his own system of philosophy. He undertook to explain all social changes as phases in the great inclusive process of evolution. Society was conceived of as an organism. Research and exposition were directed largely by the biological analogy. Schaeffle, Lilienfeld, and René Worms were later exponents of this same view. Later schools in sociology have emancipated themselves from the sway of the biological analogy and have turned toward ethnological, anthropological, and psychological aspects of the great problems involved. Repeated attempts have been made to discover the fundamental unifying principle by which all social processes may be classified and explained, but none of them have met general acceptance. The drift to-day is largely toward the psychological aspects of human association. Professors Giddings and Baldwin may be looked upon as its representatives in the United States. Aside from these attempts at systematic or philosophical sociology there is scarcely an aspect of human association which is not now under investigation from the sociological standpoint. That this activity in a field of such great interest to the welfare of the human race promises much for human progress is beyond question. Even now statesmen, religious teachers, educators, and leaders in movements for social amelioration do not fail to take advantage of the results of sociological research.

See Ethics; Psychology; Church; and articles on the other social sciences.

The following text-books summarize the field of sociology from various standpoints: Ward, *Outlines of Sociology* (New York, 1898); Dealy, *Sociology* (New York, 1909); Gumplowicz, *Outlines of Soc.* (tr. Moore), pub. by *Amer. Acad. of Soc. and Pol. Sc.* (1899); Giddings, *Elem. of Soc.* (New York, 1898); Bascom, *Sociology*; Blackmar, *Elem. of Soc.* (New York, 1905); Stuckenberg, *Sociology* (New York, 1903).

The following general treatises aim to present the new sociological point of view: Ross, *Social Control* (New York, 1901); Idem, *Soc. Psychology* (New York, 1908); Cooley, *Soc. Organization* (New York, 1909); Small, *General Soc.* (Chicago, 1905); Idem, *Meaning of Social Science* (Chicago, 1910); McDougal, *Soc. Psychology* (London); Baldwin, *Social and Ethical Interpretations* (New York, 1902); Kidd, *Soc. Evolution* (New York, 1894).

Systematic Treatises: Spencer, *Principles of Soc.;* Schaeffle, *Bau und Leben des sozialen Korpers;* Lilienfeld, *Gedanken über die Sozialwissenschaft der Zukunft* (5 vols., Mitau, 1873); Letourneau, *La sociologie*, tr. Trallope (Paris, 1884); Tarde, *The Laws of Imitation*, tr. Parsons (New York, 1903); Simmel, *Soziologie* (Leipzig, 1908); Ward, *Pure Soc.* (New York, 1903); Idem, *Applied Soc.* (New York, 1906); Giddings, *Principles of Soc.* (New York, 1899); Idem, *Inductive Soc.* (New York, 1901).

Discussions of the nature and relations of sociology will be found in Reports of meetings of economic, historical, and political sciences associations and in text-books on the various social sciences. For discussion of the science from a Catholic standpoint, see Slater, *Modern Sociology* in the *Irish Theo. Quart.*, VI, nos. 21, 22.

William J. Kerby.

Socorro, Diocese of (de Succursu), established in 1895 as a suffragan see of the Archdiocese of Bogota, in the Republic of Colombia, South America. The Catholic population in 1910 numbered 230,000. The city of Socorro arose at Chiancon, the settlement of an Indian chief of the same name, in 1540 defeated and captured by the discoverer Martin Galeano. In 1681 the village moved to its present site under the auspices of Our Lady of Succour (Socorro), with which name the rank of parish was given it in 1683, and it was definitively constructed eight years later. In 1771 it was raised to the rank of a town. This city was one of the first in starting the Colombian movement for independence, for as late as 1781 there was a revolt against the Spanish authorities. Socorro is the capital of the province of the same name, in the Department of Santander. The present bishop is the Rt. Rev. Evaristo Blanco. (See Colombia, Republic of.)

Julian Moreno-Lacalle.

Socrates, a historian of the Early Church, b. at Constantinople towards the end of the fourth century. Nothing is known of his parentage and his early years with the exception of a few details found in his own works. He tells us himself (Hist. eccl., V, xxiv) that he studied under the grammarians Helladius and Ammonius, and from the title of *scholasticus* which is given to him it has been concluded that he belonged to the legal profession. The greater part of his life was spent in Constantinople, for which reason, as he admits, the affairs of that city occupy such a large part in his works. From the manner in which he speaks of other cities and from his references as an eyewitness to events which happened outside Constantinople, he is credited with having visited other countries in the East. Though a layman he was excellently qualified to recount the history of ecclesiastical affairs. Love of history, especially the history of his own time, and a warm admiration for Eusebius of Cæsarea impelled him to undertake the task in which he was sustained by the urgent solicitation of a certain Theodorus to whom his work is dedicated. His purpose was to continue the work of Eusebius down to his own time; but in order to round out his narrative and to supplement and revise some statements of

Eusebius, he began at the year 306, when Constantine was declared emperor. His work ends with the seventeenth consulate of Theodosius the Younger, 439. The division of his history into seven books was based on the imperial succession in the Eastern Empire. The first book embraces events in the reign of Constantine (306-37): the second those in the reign of Constantius (337-60): the third includes the reigns of Julian and Jovian (360-4): the fourth deals with the reign of Valens (364-78): the fifth with that of Theodosius the Great (379-95): the sixth with that of Arcadius (393-408): the seventh with the first thirty-one years of the reign of Theodosius the Younger (408-39).

The general character of the work of Socrates can be judged from his attitude on doctrinal questions. Living as he did in an age of bitter polemics, he strove to avoid the animosities and hatred engendered by theological differences. He was in entire accord with the Catholic party in opposing the Arians, Eunomians, Macedonians, and other heretics. The moderate tone, however, which he used in speaking of the Novatians, and the favourable references which he makes to them, have led some authors into the belief that he belonged to this sect, but it is now generally admitted that the expressions which he used were based on his desire for impartiality and his wish to give even his enemies credit for whatever good he could find in them. His attitude towards the Church was one of unvarying respect and submission. He honoured clerics because of their sacred calling, and entertained the profoundest veneration for monks and the monastic spirit. His ardent advocacy and defence of Christianity did not, nevertheless, prevent him from using the writings of pagan authors, nor from urging Christians to study them. Though he entitled his work Ἐκκλησιαστικὴ Ἱστορία, Socrates did not confine himself merely to recounting events in the history of the Church. He paid attention to the military history of the period, because he considered it necessary to relate these facts, but principally "in order that the minds of the readers might not become satiated with the repetition of the contentious disputes of bishops, and their insidious designs against one another; but more especially that it might be made apparent that, whenever the affairs of the State were disturbed, those of the Church, as if by some vital sympathy, became disordered also" (Introd. to Book V). Though thus recognizing the intimate relation of civil and ecclesiastical affairs, Socrates had no well-defined theory of Church and State.

Socrates had a restricted idea of the scope and function of history. To his mind the task of the historian consisted in recording the troubles of mankind, for as long as peace continues, those who desire to write histories will find no materials for their purpose (VII, xlviii). As an example of historical composition the work of Socrates ranks very high. The simplicity of style which he cultivated, and for which he was reproached by Photius, is entirely in keeping with his method and spirit. Not the least among his merits is the sedulousness he exhibited in the collection of evidence. He had a truly scientific instinct for primary sources, and the number of authors he has drawn on proves the extent of his reading and the thoroughness of his investigations. In addition to using the works of such men as Athanasius, Evagrius, Palladius, Nestorius, he drew freely on public and official documents, conciliar Acts, encyclical letters, etc. As might be expected when writing of events so close to his own time, he had to depend frequently on the reports of eyewitnesses, but even then he used their evidence with prudence and caution. Notwithstanding his industry and impartiality, however, his work is not without serious defects. Though restricting himself so largely to the affairs of the Eastern Church, he is guilty of many serious omissions in regard to other parts of Christendom. Thus, when he speaks of the Church in the West, he is frequently guilty of mistakes and omissions. Nothing for instance is said in his history about St. Augustine. In questions of chronology, too, he is frequently at fault, but he is by no means a persistent sinner in this respect. The objection most frequently made in respect to Socrates as a historian is that he was too credulous and that he lent too ready an ear to stories of miracles and portents. This, however, is a fault of the time rather than of the man, and was shared by pagan as well as Christian authors. His most notable characteristic, however, is his obvious effort to be thoroughly impartial, as far as impartiality was consistent with conviction. He held the scales equitably, and even when he differed widely from men on matters of doctrine, he did not allow his dissent from their views to find expression in denunciation or abuse. His "Church History" was published by Stephen (Paris, 1544) and by Valesius (Paris, 1668, reprinted at Oxford by Parker, 1844, and in P. G., LXVII). A good translation is given in the Post-Nicene Fathers, II (New York, 1890), with an excellent memoir on Socrates by Zenos.

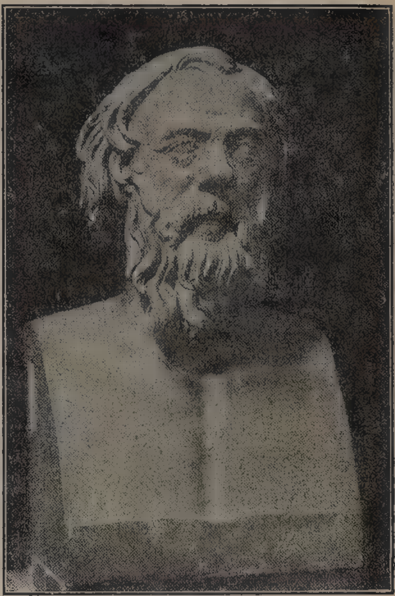
PATRICK J. HEALY.

Socrates, Greek philosopher and educational reformer of the fifth century B.C., b. at Athens, 469 B.C.; d. there, 399 B.C. After having received the usual Athenian education in music (which included literature), geometry, and gymnastics, he practised for a time the craft of sculptor, working, we are told, in his father's workshop. Admonished, as he tells us, by a divine call, he gave up his occupation in order to devote himself to the moral and intellectual reform of his fellow-citizens. He believed himself destined to become "a sort of gadfly" to the Athenian State. He devoted himself to this mission with extraordinary zeal and singleness of purpose. He never left the City of Athens except on two occasions, one of which was the campaign of Potidea and Delium, and the other a public religious festival. In his work as reformer he encountered, indeed he may be said to have provoked, the opposition of the Sophists and their influential friends. He was the most unconventional of teachers and the least tactful. He delighted in assuming all sorts of rough and even vulgar mannerisms, and purposely shocked the more refined sensibilities of his fellow-citizens. The opposition to him culminated in formal accusations of impiety and subversion of the existing moral traditions. He met these accusations in a spirit of defiance and, instead of defending himself, provoked his opponents by a speech in presence of his judges in which he affirmed his innocence of all wrongdoing, and refused to retract or apologize for anything that he had said or done. He was condemned to drink the hemlock



SOCRATES
Antique Fragment, Uffizi Gallery

and, when the time came, met his fate with a calmness and dignity which have earned for him a high place among those who suffered unjustly for conscience sake. He was a man of great moral earnestness, and exemplified in his own life some of the noblest moral virtues. At the same time, he did not rise above the moral level of his contemporaries in every respect, and Christian apologists have no difficulty in refuting the contention that he was the equal of the Christian saints. His frequent references to a "divine voice" that inspired him at critical moments in his career are, perhaps, best explained by saying that they are simply his peculiar way of speaking about the promptings of his own conscience. They do not necessarily imply a pathological condition of his mind, nor a superstitious belief in the existence of a "familiar demon".

Socrates was, above all things, a reformer. He was alarmed at the condition of affairs in Athens, a condition which he was, perhaps, right in ascribing to the Sophists. They taught that there is no objective standard of the true and the false, that that is true which seems to be true, and that that is false which seems to be false. Socrates considered that this theoretical scepticism led inevitably to moral anarchy. If that is true which seems to be true, then that is good, he said, which seems to be good. Up to this time morality was taught not by principles scientifically determined, but by instances, proverbs, and apothegms. He undertook, therefore, first to determine the conditions of universally valid knowledge, and, secondly, to found on universally valid moral principles a science of human conduct. Self-knowledge is the starting-point, because, he believed, the greatest source of the prevalent confusion was the failure to realize how little we know about anything, in the true sense of the word know. The statesman, the orator, the poet, think they know much about courage; for they talk about it as being noble, and praiseworthy, and beautiful, etc. But they are really ignorant of it until they know what it is, in other words, until they know its definition. The definite meaning, therefore, to be attached to the maxim "Know thyself" is "Realize the extent of thine own ignorance."

Consequently, the Socratic method of teaching included two stages, the negative and the positive. In the negative stage, Socrates, approaching his intended pupil in an attitude of assumed ignorance, would begin to ask a question, apparently for his own information. He would follow this by other questions, until his interlocutor would at last be obliged to confess ignorance of the subject discussed. Because of the pretended deference which Socrates payed to the superior intelligence of his pupil, this stage of the method was called "Socratic Irony". In the positive stage of the method, once the pupil had acknowledged his ignorance, Socrates would proceed to another series of questions, each of which would bring out some phase or aspect of the subject, so that when, at the end, the answers were all summed up in a general statement, that statement expressed the concept of the subject, or the definition. Knowledge through concepts, or knowledge by definition, is the aim, therefore, of the Socratic method. The entire process was called "Heuristic", because it was a method of finding, and opposed to "Eristic", which is the method of strife, or contention. Knowledge through concepts is certain, Socrates taught, and offers a firm foundation for the structure not only of theoretical knowledge, but also of moral principles, and the science of human conduct. Carried away by his enthusiasm for conceptional knowledge as a basis of conduct, Socrates went so far as to maintain that all right conduct depends on clear knowledge, that not only does a definition of a virtue aid us in acquiring that virtue, but that the definition of the virtue is the virtue. A man who can define justice is just, and, in general, theoretical insight into the principles of conduct is identical with moral excellence in conduct; knowledge is virtue. Contrariwise, ignorance is vice, and no one can knowingly do wrong. These principles are, of course, only partly true. Their formulation, however, at this time was of tremendous importance, because it marks the beginning of an attempt to build up on general principles a science of human conduct.

Socrates devoted little attention to questions of physics and cosmogony. Indeed, he did not conceal his contempt for these questions when comparing them with questions affecting man, his nature and his destiny. He was, however, interested in the question of the existence of God and formulated an argument from design which was afterwards known as the "Teleological Argument" for the existence of God. "Whatever exists for a useful purpose must be the work of an intelligence" is the major premise of Socrates' argument, and may be said to be the major premise, explicit or implicit, of every teleological argument formulated since his time. Socrates was profoundly convinced of the immortality of the soul, although in his address to his judges he argues against the fear of death in such a way as apparently to offer two alternatives: "Either death ends all things, or it is the beginning of a happy life." His real conviction was that the soul survives the body, unless, indeed, we are misled by our authorities, Plato and Xenophon. In the absence of primary sources—Socrates, apparently, never wrote anything—we are obliged to rely on these writers and on a few references of Aristotle for our knowledge of what Socrates taught. Plato's portrayal of Socrates is idealistic; when, however, we correct it by reference to Xenophon's more practical view of Socrates' teaching, the result cannot be far from historic truth.

WILLIAM TURNER.

Sodality.—I. The sodalities of the Church are pious associations (see ASSOCIATIONS, PIOUS) and are included among the confraternities and archconfraternities (q. v.). It would not be possible to give a definition making a clear distinction between the sodalities and other confraternities; consequently the development and history of the sodalities are the same as those of the religious confraternities. A general sketch of these latter has been already given in the account of the medieval confraternities of prayer (see PURGATORIAL SOCIETIES). They are also mentioned in the article SCAPULAR. Confraternities and sodalities, in the present meaning of the word, the only ones which will be here mentioned, had their beginnings after the rise of the confraternities of prayer in the early Middle Ages, and developed rapidly from the end of the twelfth century, i. e. from the rise of the great ecclesiastical orders. Proofs of this are to be found in the Bullaria and annals of these orders, as those of the Dominicans, the Carmelites, and the Servites. [Cf. Armellini, "Le chiese di Roma" (2nd ed., Rome, 1891), 20 sqq.; "Historisch-politische Blätter", cxlviii (Munich, 1911), 759 sqq., 823 sqq.; Ebner, "Die acht Brüderschaften des hl. Wolfgang in Regensburg" in Mahler, "Der hl. Wolfgang" (Ratisbon, 1894), 182 sq.; Villanueva, "Viage literario a las Iglesias de España", VIII (Valencia, 1821), 258 sqq., Apéndice XXIII; ibid., XI (Madrid, 1850), 185 sq., Apéndice IV; Gallia Christ., XI, instr. 253 sq., n. XXVII; ibid., VI, instr. 366, n. XXXIV; Mabillon, "Annales Ordinis Benedicti", VI, Lucca, 1745, 361 sqq., ad an. 1145; Martène, "Thesaurus novus anecdotorum", IV (Paris, 1717), 165 sqq. "Confraternitas Massiliensis an. 1212 instituta"; "Monumenta

“O. Servorum B.M.V.”, I, 107, ad an. 1264; Gianius, “Annales O. Serv. B.M.V.”, I (2nd ed., Lucca, 1719), 384, ad an. 1412; “Libro degli ordinamenti de la Compagnia di Santa Maria del Carmine scritto nel 1280” (Bologna, 1867)]. Pious associations of this kind, however, soon appeared, which were solely under the bishop and had no close connexion with an order. An interesting example of such an association of the year 1183 is described in the “Histoire générale du Languedoc” (VI, Toulouse, 1879, 106 sqq.), as an “association formed at Le Puy for the restoration of peace”. A carpenter named Pierre (Durant) is given as the founder of this society. In regard to a “Confraternity of the Mother of God” which existed at Naupactos in Greece about 1050, see “La Confraternità di S. Maria di Naupactos 1048”, in the “Bullettino dell' Istituto storico italiano”, no. 31 (Rome, 1910, 73 sqq.).

From the era of the Middle Ages very many of these pious associations placed themselves under the special protection of the Blessed Virgin, and chose her for patron under the title of some sacred mystery with which she was associated. The main object and duty of these societies were, above all, the practice of piety and works of charity. The decline of ecclesiastical life at the close of the Middle Ages was naturally accompanied by a decline of religious associational life, the two being related as cause and effect. However, as soon as the Church rose to renewed prosperity in the course of the sixteenth century, by the aid of the Counter-Reformation and the appearance of the new religious congregations and associations, once more there sprang up numerous confraternities and sodalities which laboured with great success and, in many cases, are still effective.

Of the sodalities which came into existence just at this period, particular mention should be made of those called the Sodalities of the Blessed Virgin Mary (*congregationes seu sodalitates B. Mariæ Virginis*), because the name *sodality* was in a special manner peculiar to these, also because their labours for the renewal of the life of the Church were more permanent and have lasted until the present time, so that these sodalities after fully three hundred years still prosper and flourish. Even the opponents of the Catholic Church seem to recognize this. The article “Bruderschaften, kirchliche” in Herzog-Hauck, “Realencyklopädie für protestantische Theologie”, discusses almost exclusively the Sodalities of the Blessed Virgin Mary as the pattern of Catholic sodalities. It cannot, indeed, be denied that these sodalities are, by their spirit and entire organization, better equipped than other confraternities to make their members not only loyal Catholics but also true lay apostles for the salvation and blessing of all around them. In the course of time other pious Church societies sprang from the Sodalities of the Blessed Virgin Mary, or were quickened by these to new zeal and fruitful labours, e. g. the work of foreign missions, the “Society of St. Vincent de Paul”, the “Society of St. Francis Regis”, and many others. While all other confraternities and sodalities have as their chief end a single pious devotion or exercise, a single work of love of God or of one's neighbour, the peculiar aim of the Sodalities of the Blessed Virgin Mary is, by means of the true veneration of the Blessed Virgin, to build up and renew the whole inner man in order to render him capable of and zealous for all works of spiritual love and charity. Consequently these sodalities are described below in detail separately from the others.

II. All sodalities, pious associations, and confraternities may be divided into three classes, although these classes are not absolutely distinct from one another. The first class, A, includes the confraternities which seek mainly to attain piety, devotion, and the increase of love of God by special veneration of God, of the Blessed Virgin, the angels, and the saints. The second class, B, consists of those sodalities which are founded chiefly to promote the spiritual and corporal works of mercy. The third class, C, may be considered to include those associations of the Church the main object of which is the well-being and improvement of a definite class of persons.

A.—The first class includes: (1) The “Confraternity of the Most Holy Trinity with the White Scapular” (see Scapular). (2) The Confraternities of the Holy Ghost. In 1882 such a confraternity was established for Austria-Hungary in the church of the Lazarists at Vienna, and in 1887 it received the right of aggregation for the whole of Germany. Special mention should here be made of the “Archconfraternity of the Servants of the Holy Ghost”. It was first established in 1877 at the Church of St. Mary of the Angels, Bayswater, London. In 1878 it received the papal confirmation and special indulgences, in the following year it was raised to an archconfraternity with unlimited power of aggregation for the whole world. The director of the archconfraternity, to whom application for admission can be made personally or by letter, is the superior of the Oblates of St. Charles Borromeo, at the Church of St. Mary of the Angels, Bayswater, London, W. A third confraternity for the glorification of the Holy Ghost, especially among the heathen, was established in the former collegiate Church of Our Lady at Knechtsteden, Germany. It is directed by the Fathers of the Holy Ghost and of the Immaculate Heart of Mary. Its organ is the missionary monthly, “Echo aus Knechtsteden”. (3) There is no special confraternity in honour of the Heavenly Father. There is, however, an “Archconfraternity of the Most Holy Name of God and of the Most Holy Name of Jesus”. Originally this formed two distinct confraternities, which owed their origin to the Dominicans. At a later date they combined and were united into one society, the establishment of which is under the control of the general of the Dominicans. Paul V cancelled the indulgences previously granted to the confraternity and granted new ones. It is probable that the Brief of 21 Sept., 1274, of Gregory IX, addressed to the general of the Dominicans, gave the first impulse to the founding of the above-mentioned confraternities. In this Brief the pope called upon the father-general to promote, by preaching, the veneration of the Holy Name of Jesus among the people. In America especially this society has spread widely and borne wonderful fruit. It has a periodical, “The Holy Name Journal,” and has been granted new indulgences for those of its members who take part in its public processions [Analecta Ord. Fratr. Prædic., XVII (1909), 325 sq. See Holy Name, Society of the]. There are other confraternities and sodalities, especially in France, and also in Rome and Belgium, for the prevention of blasphemy against the name of God and of the desecration of Sundays and feast days (Beringer, “Les indulgences”, II, 115 sqq.; cf. Act. S. Sed., I, 321).

(4) A triple series of confraternities has been formed about the Person of the Divine Saviour for the veneration of the Most Holy Sacrament, of the Sacred Heart, and of the Passion.

The confraternities of the Most Holy Sacrament were founded and developed, strictly speaking, in Italy from the end of the fifteenth century by the apostolic zeal of the Franciscans, especially by the zeal of Cherubino of Spoleto and the Blessed Bernardine of Feltre (“Acta SS.”, Sept., VII, 837, 858). Yet as early as 1462 a confraternity of the Most Holy Sacrament existed in the Duchy of Jülich, in the Archdiocese of Cologne; other Confraternities of the Most Holy Sacrament were also founded in the Archdiocese of Cologne in the course of the fifteenth century (cf. “Köln. Pastoralblatt”, 1900, 90). At Rome the Confraternity of the Most Holy Sacrament was founded (1501) in the Church of San Lorenzo in Damaso by the devotion and zeal of a poor priest and four plain citizens. Julius II confirmed this sodality by a Brief of 21 Aug., 1508, and wished to be entered himself as a member in the register of the confraternity. It is not, however, this sodality but another Roman confraternity that has been the fruitful parent of the countless confraternities of the Most Holy Sacrament which exist to-day everywhere in the Catholic world (cf. Quétif-Echard, I, 197 sq.). This second confraternity, due to the zeal of the Dominican Father, Thomas Stella, was erected by Paul III on 30 Nov., 1539, in the Dominican Church of Santa Maria sopra Minerva. This confraternity alone is understood when mention is simply made of the Confraternity of the Sacrament. Along with the honorary title of archconfraternity it received numerous indulgences and privileges by the Bull of 30 Nov., 1539. The indulgences were renewed by Paul V. It was made known at its inception that this confraternity could be established in parish churches, and that such confraternities should share in the indulgences of the archconfraternity without formal connexion with the Roman confraternity. This privilege was reconfirmed at various times by the popes, who expressed the wish that the bishops would establish the confraternity everywhere in all parish churches (cf. Tacchi-Venturi, "La vita religiosa in Italia durante la prima età della Compagnia di Gesù", Rome, 1910, 191 sqq.).

In the nineteenth century, however, confraternities for the adoration of the Most Holy Sacrament were also established in other countries, and these now extend all over the Catholic world. Mention is made in the article PURGATORIAL SOCIETIES of the "Archconfraternity of the Perpetual Adoration of the Blessed Sacrament under the Protection of St. Benedict." This association, that was founded in 1877 under Pius IX in Austria, was transferred to North America in 1893 during the pontificate of Leo XIII, and in 1910 received from Pius X the right of extension throughout the entire world.

In 1848 a pious woman, Anne de Meeûs, established at Brussels in Belgium a religious society which had as its object to unite the adoration of the Most Holy Sacrament with work for poor churches. In 1853 this society was raised to an archconfraternity for Belgium; soon after this separate archconfraternities of the same kind were erected for Bavaria, Austria, and Holland. At the same time there sprang from the original society a female religious congregation which, after receiving papal confirmation, established itself at Rome, and since 1879 has conducted the archconfraternity from Rome. It has authority to associate everywhere with itself confraternities of the same name and purpose, and to share with these all its indulgences. The archconfraternity has received large indulgences and privileges, and labours with much success in nearly all parts of the world. Entrance into this confraternity is especially to be recommended to all altar societies. The full title of the confraternity is "The Archconfraternity of the Perpetual Adoration of the Blessed Sacrament and Work of Poor Churches". Any information desired as to the working of the confraternity and the conditions of its establishment may be obtained from its headquarters, Casa delle Adoratrici perpetue, 4 Via Nomentana, Rome. Since 1900 the religious association of the Sisters of the Perpetual Adoration has had a house with a chapel at Washington, U. S. A., from which they extend and conduct the confraternity in America.

The "Society of the Most Holy Sacrament", founded by the Venerable Pierre-Julien Eymard (d. 1868) also sought, by means of a new confraternity established by it, to incite the faithful to adoration and zeal for the glorification of Jesus Christ in the Holy Eucharist. In 1897 this society was raised to an archconfraternity with the right of aggregation throughout the world. In 1898 its summary of indulgences was confirmed by the Congregation of Indulgences. The main condition of membership is a continuous hour of adoration of the Most Holy Sacrament once a month. The headquarters of the confraternity are at Rome, in the church of the Fathers of the Most Holy Sacrament, whence the society has the name of "The Archconfraternity of the Most Holy Sacrament in the Church of Sts. Andrew and Claudius at Rome" (San Claudio, 160 Via del Pozzetto, Rome).

"The Perpetual Adoration of Catholic Nations" was founded at Rome in 1883, its purpose being the union of the nations and peoples of the world for perpetual solemn expiatory prayer in order to avert God's just wrath and to implore His aid in the grievous troubles of the Church. The association is conducted by the Redemptorist Fathers in the Church of St. Joachim at Rome, lately built in memory of the jubilee of Leo XIII as priest and bishop. Special countries are assigned to each one the different days of the week for the adoration of reparation, e. g. Thursday, North and Central America; Friday, South America. The rector of the Church of St. Joachim (Prati di Castello, Rome) is the director-general of the association, which has the right to appoint diocesan directors in all countries, including missionary ones. In order to enter the association, application should be made to one of these directors or to the director general. Two other associations were founded in France for the purpose of expiation and atonement; these have already extended over the world. One is the "Association of the Communion of Reparation", the other the "Archconfraternity of the Holy Mass of Reparation". The "Association of the Communion of Reparation", established in 1854 by Father Drevon, S.J., was canonically erected in 1865 at Paray-le-Monial, in the monastery where the Divine Saviour had commanded Blessed Margaret Mary Alacoque to make reparation by Holy Communion for the ingratitude of men. This is also the purpose of the entire association, which can be canonically erected anywhere. The "Archconfraternity of the Holy Mass of Reparation" owes its origin to a poor widow of Paris, in June, 1862. Each member makes it his duty to attend a second Mass on Sundays and feast-days as expiation for those who sinfully fail to attend Mass on these days. In 1886 the confraternity was erected into an archconfraternity with the right of aggregation for France. At a later date other countries received in like manner a similar archconfraternity. Even in parts of the world where no such archconfraternity exists it is easy to be received into the confraternity. By a Decree of 7 Sept., 1911, of the Holy Office, all former indulgences were cancelled, and richer ones, to be shared equally by all the archconfraternities and confraternities of the Holy Mass of Reparation, were granted (Ad. Apost. Sed., III, 476 sq.). In this class belongs also the "Ingolstadt Mass Association". (See PURGATORIAL SOCIETIES.)

(5) As early as 1666 confraternities of the Blessed Jean Eudes for the united veneration of the Heart of Jesus and the Heart of Mary were established. It was not until after the death of Blessed Margaret Mary Alacoque that there arose confraternities for the promotion of the adoration of the Sacred Heart of Jesus in the manner desired by her. During the years 1697–1764 more than a thousand such confraternities were erected by papal Briefs and granted indulgences. At Rome the first "Confraternity of the Sacred Heart of Jesus" was established in 1729 by the efforts of Father Joseph Gallifet, S. J. This confraternity still exists at the Church of St. Theodore, at the foot of the Palatine. The membership of this "Confraternity of the Sacconi" has included celebrated and holy men. Only men, however, can belong to it.

Consequently it was given to another confraternity of the Sacred Heart to spread from Rome over the entire world. This is the sodality established in 1797 by Father Felici, S.J., in the little Church of Our Lady *ad Pineam*, called *in Cappella*. The sodality was raised in 1803 to an archconfraternity, and was afterward transferred by Leo XII to the Church of Santa Maria della Pace. Application to join this confraternity is made at the church. More than 10,000 confraternities have already united with it. The confraternities of the Sacred Heart erected in Belgium can unite with the archconfraternity of Paray-le-Monial, those established in France can either join this archconfraternity or that at Moulins. In addition a new confraternity of the Sacred Heart of Jesus was established in 1876 at Montmartre, Paris. In 1894 this society received the right to incorporate into itself other confraternities of the same name and object in any part of the world and to share its indulgences with these. The object of this confraternity, like that of the great church at Montmartre, is expiatory, and the society is to pray for the freedom of the pope and the salvation of human society.

The "Archconfraternity of Prayer and Penance in honour of the Heart of Jesus", founded at Dijon in 1879 with the right of aggregation for the entire world, has, since 1894, been established at the church of Montmartre. A wish expressed by the Divine Saviour long before to Blessed Margaret Mary Alacoque was fulfilled on 14 March, 1863. On this day the "Guard of Honour of the Most Sacred Heart of Jesus" was founded in the monastery of the Visitation at Bourg-en-Bresse, France. The name expresses the object of this sodality, which is to collect faithful hearts around the Saviour for constant adoration and love and to make reparation to him for the ingratitude of men. In 1864 the association at Bourg-en-Bresse was confirmed as a confraternity, and in 1878 was made an archconfraternity for France and Belgium. In 1879 the confraternity was established at Rome in the Church of Sts. Vincent and Anastasius, and defined as an archconfraternity for Italy and all countries which have no archconfraternity of their own. In 1883 the confraternity of Brooklyn, New York, conducted by the Sisters of the Visitation, was confirmed by Leo XIII as an archconfraternity, with the right of aggregation for the United States. For the "Apostleship of Prayer" see The Catholic Encyclopedia, vol. I, 633; Hilgers, "Das Goldene Büchlein", Ratisbon, 1911. In 1903 Leo XIII established at the Church of St. Joachim at Rome a special "Archconfraternity of the Eucharistic Heart of Jesus", granting it the right to unite sodalities bearing the same name as itself. The confraternity is intended to offer in a special manner adoration, gratitude, and love to the Heart of Jesus for the institution of the Holy Eucharist. Mention should also be made of the "Archconfraternity of the Holy Agony of Our Lord Jesus Christ", conducted by the Lazarist Fathers in Paris, which was established in 1862 in the Diocese of Lyons and was defined in 1865 as an archconfraternity for this diocese. In 1873 the confraternity at Paris was declared an archconfraternity for all France, and in 1894 it received the right of aggregation for the whole world. The "Archconfraternity of the Holy Hour" is also connected with a wish expressed by the Saviour and a revelation of Himself given in 1673. At that time the Saviour demanded of Blessed Margaret Mary Alacoque an hour of union with Himself in prayer at midnight on Thursdays in memory of His Agony on the Mount of Olives. In 1829 this sodality was founded at Paray-le-Monial, and finally in 1911 it received the right of aggregation for the entire world (Acta Apost. Sed., III, 157). The members can observe the holy hour of prayer from Thursday afternoon onwards. A similar society was founded at Toulouse in 1885 and canonically erected in 1907, under the title of "The Holy Perpetual Hour of Gethsemani". In 1909 it received indulgences from Pius X (Acta. Ap. Sed., I, 483), and in 1912 new indulgences with the right of aggregation for the whole of France.

(6) The confraternities mentioned above are also in part sodalities of the Passion, particularly those which especially venerate Christ's Agony. Besides these should be mentioned particularly "The Archconfraternity of the Most Precious Blood". This society was founded on 8 Dec., 1808, in the Church of S. Nicola in Carcere at Rome by the saintly Francesco Albertini, who died in 1819 as Bishop of Terracina. The members pledge themselves to a special veneration of Christ's Passion, and in particular to offer the Precious Blood to the Heavenly Father for the expiation of sins, for the conversion of sinners, for the needs of the Church, and for the consolation of the poor souls. In 1809 the confraternity was canonically erected; in 1815 it was richly endowed with indulgences, and in the same year was raised to an archconfraternity. Applications for membership can be made to the director of the archconfraternity at S. Nicola in Carcere, or to the Missioners of the Precious Blood, 1 Via Poli Crociferi, Rome, for since 1851 the general of these missioners has had all necessary powers. Blessed Caspar of Buffalo, founder of the mission houses of the Precious Blood, did much to promote this confraternity. He was beatified in 1894. A rescript of 3 Aug., 1895, of the Congregation of Indulgences granted in perpetuity that the bishops of the United States of North America and Canada *pro suo arbitrio et prudentia* might erect the Confraternity of the Precious Blood in all parish churches without regard to their location, that these then could unite with the society at Rome, the "Unio Prima-Primaria", in the church of the Missioners of the Precious Blood, and could share in its indulgences and privileges (cf. "Amerikan Pastoralblatt", 1897,104). See Precious Blood, Archconfraternity of the Most.

Religious associations have also been formed to encourage the practice of the Holy Way of the Cross, especially the "Pious Association of the Perpetual Way of the Cross", and the "Association of the Living Way of the Cross". Both societies are under the care of the Franciscans (cf. Mocchegiani, "Collectio Indulg.", no. 1264, sqq.). In 1884 the "Archconfraternity of the Holy Face" was formed at Tours as a work of expiation. It was provided with indulgences and in 1885 was erected into an archconfraternity for the whole world. The insignia of the brotherhood is the Face of the Suffering Saviour on the veil of St. Veronica. The members wear this picture on a scapular, a cross, or a medal. Lastly, there was founded in 1904 at the congress in honour of the Blessed Virgin at Rome the "Pious Union of the Crucifix of Pardon". This association has for its object the reconciliation with God of nations, families, and individuals. The headquarters of the association are in the Church of the Annunciation at Lyons. The badge of the members is a specially-consecrated crucifix (cf. Beringer, op. cit., Appendice by Hilgers, Paris, 1911).

(7) The Confraternities of the Mother of God, which have been confirmed for the entire Church, exist in such large numbers that all cannot be given here. Especially numerous are the sodalities and associations erected in honour of the Blessed Virgin in individual cities, dioceses, districts, or countries. The most important, most widely extended, and best-known of the confraternities of the Blessed Virgin are: (a) the "Confraternity of the Holy Rosary" (q. v.); in the article concerning it the "Perpetual Rosary" and the "Living Rosary" are also mentioned; (b) the "Confraternity of the Scapular of Our Lady of Mount Carmel" (see Scapular); (c)

the Sodalities of the Blessed Virgin Mary (see below).

In addition, mention has already been made of: the "Confraternity of the Black Scapular of the Seven Dolours of Our Lady" (see SCAPULAR); the "Archconfraternity of the Immaculate Conception of the Blessed Virgin Mary", which is now combined with the Blue Scapular (see SCAPULAR); the "Pious Union of Our Lady of Good Counsel and the Scapular of Our Lady of Good Counsel" (see OUR LADY OF GOOD COUNSEL, FEAST OF; SCAPULAR); the "Archconfraternity of Our Lady of the German Campo Santo at Rome" (see PURGATORIAL SOCIETIES); the "Archconfraternity for the relief of the Souls in Purgatory, established under the title of the Assumption of the Blessed Virgin, in the Church of Santa Maria in Monterone, at Rome" (see PURGATORIAL SOCIETIES).

Furthermore, mention should be made of the "Archconfraternity of Our Lady of the Sacred Heart." This society was established in 1864 at Issoudun, France, by the Missioners of the Sacred Heart of Jesus. Since 1872 its headquarters as an archconfraternity have been at Rome, and in 1897 they were transferred to the newly-built Church of Our Lady of the Heart of Jesus, in the Piazza Navona. Only this confraternity at Rome has the right to incorporate in itself confraternities of the same title erected in any part of the world and to share with these its indulgences. The object of the confraternity is the veneration of the Blessed Virgin in her intimate relation to the Heart of Jesus. The "Confraternity of the Immaculate Conception of the Blessed Virgin Mary", established at Lourdes in 1872, in 1873 was raised to an archconfraternity, and in 1878 was made an archconfraternity for the entire world by Leo XIII. The head of the archconfraternity is the Bishop of Tarbes.

The "Association of the Children of Mary", under the protection of the Immaculate Virgin and St. Agnes, was established for girls alone. It was canonically erected in 1864, in the Church of S. Agnese fuori le mura, Rome; in 1866 it received its indulgences and privileges with the right of aggregation for all similar societies. Since 1870 this power of aggregation has belonged to the abbot-general of the Reformed Augustinian Canons of the Lateran, near San Pietro in Vincoli, Rome. The intention of the society is to keep Christian young women under the standard of the Blessed Virgin, and to promote the loyal fulfilment by its members of their duties. (See CHILDREN OF MARY; CHILDREN OF MARY OF THE SACRED HEART.) For the "Archconfraternity of Our Lady of Compassion for the Return of England to the Catholic Faith", see UNIONS OF PRAYER. The miraculous picture of Our Lady of Perpetual Succour, venerated at Rome in the Church of St. Alphonsus, is known everywhere. In 1871 a confraternity was erected in this church, and in 1876 was made an archconfraternity under the title of the "Archconfraternity of Our Lady of Perpetual Succour and of St. Alphonsus Liguori". The general of the Redemptorists has the power to incorporate everywhere confraternities of the same name in the archconfraternity and to grant these the same indulgences. There are also various confraternities of the Cord, whose members wear a cord as insignia just as members of other confraternities wear a scapular. The oldest and most celebrated of these Confraternities of the Cord is probably the "Archconfraternity of the Black Leathern Belt of St. Monica, St. Augustine and St. Nicholas of Tolentino", also called the "Archconfraternity of Our Lady of Consolation". This society has particularly extensive indulgences (cf. "Rescr. authent. S. Congr. Indulg.", II, no. 40, and especially the lately-issued summary of indulgences in the "Acta S. Sedis", XXXV, 630). The headquarters of the society are at Rome, in the Church of St. Augustine where the body of St. Monica lies.

(8) There are also numerous confraternities in honour of angels and saints which are dedicated to the patron saints of individual districts, countries, cities, and localities; these are consequently more local in their character, e. g. the "Boniface Association" in Germany and Austria (see BONIFACE ASSOCIATION). However, there are also such for the whole world, e. g. the "Confraternity of St. Benedict" (see SCAPULAR), the "Archconfraternity of the Girdle of St. Francis of Assisi", and the "Pious Union in honour of St. Anthony of Padua", as also the "Young Men's Sodality of St. Anthony of Padua", which, through a Brief (10 March, 1911) of Pius X (Act. Apost. Sedis, III, 128 sq.), was granted indulgences and recommended to the faithful [cf. Acta Ord. Fratr. Min., XXX (1911) 177 sqq.]. Only a few more of these confraternities can be noticed here. In 1860 the "Confraternity of St. Michael" was founded at Vienna to implore the protection of the archangel for the pope and the Church, and to collect gifts as Peterspence for the oppressed pope. There is another "Confraternity of St. Michael", with a scapular (see SCAPULAR). In 1860 the "Confraternity in honour of St. Joseph" was established at Rome in the Church of St. Roch. In 1872 it received indulgences and was raised to an archconfraternity with the right of incorporation for the whole world. The members also wear a consecrated cord in honour of St. Joseph. Special indulgences are connected with the wearing of this cord. There is also another Archconfraternity of the Cord of St. Joseph, which was erected in 1860 at Verona and to which Pius IX granted indulgences. There are besides many confraternities of St. Joseph for individual countries. Several were founded especially for France (cf. Beringer, op. cit.). In 1892 an "Archconfraternity of St. Joseph" was erected in the Church of St. Joseph, West de Père, Wisconsin, U. S. A., that is already widely spread over America. Connected with it is a children's league under the patronage of St. Joseph [cf. Seeberger, "Key to the Spiritual Treasures" (2nd ed., 1897), 20 sqq.]. In 1866 the "Confraternity of St. Peter's Chains" was canonically erected at Rome in the Basilica of San Pietro in Vincoli. In 1866 and 1867 the confraternity was granted indulgences and at the same time received as an archconfraternity the right of aggregation for the entire world. The purpose of the society is to promote loyalty to the pope, and to pray and work for the real freedom of the papacy, by the veneration of the Holy Chains of St. Peter. The "Militia Angelica", or the "Confraternity of the Cord of St. Thomas Aquinas", has been in existence a long time. It possesses indulgences granted it in 1586 by Sixtus V. Its purpose is the protection of purity by the intercession and aid of the Angelic Doctor who, according to tradition, was girt in his youth with a cord by angels after an heroic and successful struggle for purity. The father-general of the Dominicans has charge of the administration and erection of the "Militia Angelica". The members receive a consecrated cord which they wear constantly.

B.—In this second class, which contains those confraternities that have been established to promote the work of zeal for souls and Christian charity, there are a number of societies that are named after an angel or saint, and thus could also be included in the previous class. On the other hand a number of confraternities, such as the "Confraternity of St. Michael" and the "Confraternity of St. Peter's Chains", and even all confraternities of expiation that have already been described in the first class, could also quite properly be included here in the second class. Besides these, special mention should be made of the following:—

(1) All confraternities or sodalities for the relief of the poor souls (see PURGATORIAL SOCIETIES). (2) The "Bona Mors Confraternity", i. e. the Confraternity of the Agony of Christ. The object of this con-

gregation is the preparation of the faithful for a holy death. It was established in 1648 by the Jesuit general Caraffa in the Church of the Gesù, under the title of "The Congregation of the Bona Mors in honour of Jesus Dying on the Cross and His Sorrowing Mother". The contemplation of the Passion is one of the chief means of attaining the object of the sodality. In 1729 this congregation was raised to the rank of an archcongregation, with power to erect similar sodalities everywhere in Jesuit churches and to share its indulgences with these. In 1821 this privilege was reconfirmed, and in 1827 the general of the Jesuits received authority for the erection and aggregation of such sodalities in other churches also. In order to share in the indulgences of the Roman chief congregation, these sodalities must be incorporated with this congregation by the general of the Jesuits. Pius X increased the indulgences and privileges of the congregation, and confirmed anew its entire summary of indulgences on 20 March, 1911. The "Archiconfrérie du Cœur agonisant de Jésus et du Cœur compatissant de Marie pour le salut des mourants" (Archconfraternity of the Agonizing Heart of Jesus and the Compassionate Heart of Mary for the help of the Dying), erected in 1864 at the place which was the scene of the Agony in the Garden, has the same object as the above-mentioned confraternity. In 1867 it was raised to an archconfraternity and received the right to incorporate other societies with itself throughout the world. Since this date it has grown and spread steadily. In 1897, 1901, and 1907 it received new indulgences.

(3) The "Archconfraternity of the Most Holy and Immaculate Heart of Mary for the Conversion of Sinners" founded in 1836 by the parish priest of the Church of Our Lady of Victories, Paris. In 1838 it was raised to an archconfraternity with the right of aggregation throughout the world. The confraternity includes many millions of members, and has had remarkable success in the conversion of sinners. The special veneration of the Immaculate Heart of Mary, which is the first aim of the confraternity, is also the chief means of attaining the second aim, the conversion of sinners. In this class may be included the Confraternity of Our Lady of Compassion already noticed, which has as its aim the return of England and all English-speaking peoples to the Catholic Church. For the "Pious Union of Prayer to Our Lady of Compassion for the Conversion of Heretics" and the "Archconfraternity of Prayers and Good Works for the Reunion of the Eastern Schismatics with the Church, under the patronage of Our Lady of the Assumption, founded at the Church of the Anastasis at Constantinople", see UNIONS OF PRAYER.

(4) The "Pious Work of St. Francis of Sales for the Defence and Preservation of the Faith", established first at Nemours and then in 1857 at Paris. The association soon spread through other countries and other peoples, and especially in America. It aids the clergy in all possible ways in home missions. It was praised, blessed, and granted indulgences by Pius IX and Leo XIII. The society has already spent more than thirty million francs for its noble aims. The "Association of St. Francis Xavier", founded at Brussels, Belgium, in 1854, for the training of lay apostles to aid the priests in home missions. The members at first were only men and youths, but women can also enter it and give apostolic aid by their prayers, especially for the conversion of sinners. In 1855 and 1856 the association received indulgences and was made an archconfraternity for Belgium, and in 1878 was raised to the same for the entire world. It is now widespread and exerts an apostolic influence in the spirit of its great patron. Applications for membership are made to the director of the archconfraternity at Brussels (Collège Saint-Michel). (5) The "Society of St. Francis Regis for the Revalidation of Pagan Marriages", founded at Paris in 1826. It has laboured with great success in many cities, provinces, and countries for the increase of peace, morality, and sanctity in family life. At Paris the society settles nine hundred and more of such matrimonial cases annually; at the Paris Exhibition of 1900 it received a gold medal.

(6) The "Confraternity of Christian Doctrine, or Association of Jesus, Mary, and Joseph for the promotion of Instruction in the principal truths of the Faith". This is a long-established society, having been founded in the sixteenth century by the Fathers of Christian Doctrine (the Doctrinaires). In 1607 it was erected by Paul V into an archconfraternity for the entire world, with its seat at St. Peter's, and granted large indulgences. Its duty is to give religious instruction to the children of the Church, and to encourage the reception of the sacraments. Since 1610 this confraternity can be erected in all parish churches. In 1686 Innocent XI in an Encyclical urgently exhorted all bishops to establish this society as far as possible. Pius X in an Encyclical in 1905 directed that the confraternity should be established everywhere in the parish churches. To obtain the indulgences for all the confraternities of a diocese it suffices if a single canonically erected confraternity of this diocese unites with the Roman archconfraternity that is now established in the Church of Santa Maria del Pianto. New societies of Christian doctrines were formed in the second half of the nineteenth century and were granted indulgences. In particular such associations were founded after the year 1851 by the Ladies of the Perpetual Adoration of Brussels, who established there the Confraternity of the Adoration mentioned above. In these societies of Christian doctrine ladies, students, and men have taught many thousands of boys and girls, and, in particular, have prepared many for First Communion. In 1894 the "Pious Union of Christian Doctrine" of Brussels was made an archconfraternity for Belgium and in 1900 for Holland also. (7) The Society of St. Teresa, which was founded at Salamanca in 1882, as a general society of prayer, and is already widespread in Spain, Germany, and Austria. (8) The "General Association of St. Cecilia for the Promotion of Religious Music", established in 1887 in Germany for the encouragement of Catholic Church music. It flourishes chiefly in the dioceses of Germany, Austria, Switzerland, and Italy. (9) Temperance societies, for encouraging abstinence from alcoholic drinks, are treated elsewhere (see LEAGUE OF THE CROSS; TEMPERANCE; TEMPERANCE MOVEMENTS). In Germany the confraternity that has existed since 1851, in the parish of Deutsch-Pickar belonging to the Diocese of Breslau, was raised to an archconfraternity in 1901 under the name of the "Purification of Mary", and given a general right of aggregation. (10) The St. Vincent de Paul Societies; these are fully described under VINCENT DE PAUL, SAINT. See also ELIZABETH ASSOCIATIONS. (11) The confraternities founded for the aid and defence of the pope and the Church have been noticed above. Another society having the same purpose is the "Leo Association", founded at St. Louis, U. S. A. It was approved by Leo XIII and in 1891 was granted indulgences.

(12) Finally, some account should be given here of the many missionary societies, and especially of: (a) "The Society for the Propagation of the Faith", also called the "Missionary Society of Lyons", or the "Society of St. Francis Xavier". Twelve laymen, led by a priest, formed the plan of establishing a society for all the nations of the earth, and for the benefit of all the missions in the world. The society was formed at Lyons 3 May, 1822. Mademoiselle Jaricot may be called the real founder, because she organized the system of contributions. The society was formally confirmed in 1840 by Gregory XVI; each

succeeding pope has distinguished it by praise and renewed approval. Finally in 1904 Pius X made St. Francis Xavier its patron, and raised the feast of the saint to a greater double for the entire Church. The society has received many indulgences and privileges. It is directed by two general councils composed of ecclesiastics and laymen, the one council having its seat at Lyons (12 Rue Sala), the other at Paris (20 Rue Cassette). These directorates and their presidents settle together the apportionment of the funds to the various missions. In the dioceses there are diocesan or administrative councils, and in the parishes or cities directors who are at the head of each 10, 100, or 1000 members, in order to collect and remit the contributions of the respective divisions. The conditions for reception and membership are very simple, the main ones being the daily repetition of an Our Father and a Hail Mary with the addition "St. Francis Xavier, pray for us", and a monthly contribution of at least five cents paid to the director. More than 300,000 copies of the bi-monthly issued by the society are published in twelve languages. It gives regularly the most interesting and edifying news from the missions of the entire world. The annual income of the society is more than $1,200,000; in 1890 for the first time it was over $1,400,000. In 1904 the income was $1,352,017, of which sum more than half was collected in France. These figures give clear evidence of the beneficial labours of the society. (b) The "Association of the Holy Childhood", in connexion with the Guardian Angel societies. This society was established in 1843 at Paris by the Bishop of Nancy, Charles de Forbin-Janson. Its aim is to teach Christian children from earliest childhood to exercise Christian charity for the temporal and eternal salvation of poor heathen children and for the joy thereby given to the Divine Child Jesus. In 1858 the society was canonically erected by Pius IX; he, as well as Leo XIII and Pius X, praised the great services of the society and recommended it to all the faithful. In order to be a member of the society a monthly contribution of one cent for the heathen children must be paid and a Hail Mary must be said daily, with the addition "Holy Virgin Mary, pray for us, and the poor little pagan children". The constitution and organization of the society is very simple and practical. The society is widely spread over the Catholic world, and has accomplished a great work. The first year (1843) the income of the society was $4,580; the annual amount now is about $712,500. In 1900 and 1901 the income was nearly $950,000, of which amount Germany alone gave nearly one-third. In 1904 the society aided 223 missions, with 1112 orphanages, 7207 schools, 2805 industrial schools; altogether 11,134 institutions. There were 401,059 heathen children baptized, and 359,053 children were taught and cared for. In Germany since 1895 it has become customary to unite the Societies of the Holy Childhood with the Societies of the Guardian Angel, for the benefit of poor Catholic children in the mission districts of Germany. The members pay about one cent more monthly, and collect money at their own First Communion in order that the many poor children in the missions may also have the blessing of the First Communion and receive good religious instruction. About $19,000 were collected in this way in 1896, and in 1904 more than $23,750. The seat of the central committee of the Association of the Holy Childhood is at 146, Rue de Bac, Paris; there are managing committees for the different countries, each diocese having its own diocesan committee, with which the parish committees are connected. (c) The "Missionary Union of Catholic Women and Girls". This sodality was first founded in 1893 for the African missions; then in 1902 it was reorganized for the support of all missions. It has changed its headquarters from Fulda to Coblenz, in the Diocese of Trier. In 1910 it received a new summary of indulgences from Pius X, containing large indulgences and privileges especially for priests who conduct or promote the society. The whole body of sodalities of different countries, as those of Austria, Switzerland, and Rumania, have united with the main society, and this action is contemplated for the United States also. (d) In 1894, at Salzburg, Austria, the "St. Peter Claver Sodality" was founded by Countess M. Theresia Ledóchowska to aid the African missions and to foster the pious work of freeing slaves. Leo XIII favoured the organization by granting indulgences and privileges the very same year. The sodality includes: (1) the members of a female religious institute who devote themselves totally as helpers of the work of the African missions. These lead a community life in civilized countries and have their headquarters at Rome (via dell' Olmàte 16); (2) laymen and women, who devote themselves, as far as their state in life permits, to the work of the sodality, especially by managing the succursals; (3) common helpers of either sex, who foster the work by contributions and other means. From the outset the work of the sodality was carried on with great zeal and has borne much fruit.

C.—The third class includes those sodalities which have for their chief aim the promotion of the prosperity of certain classes of society.

(1) There are sodalities for the benefit of the Christian family. In 1861 Father Francoz, S.J., founded such a society at Lyons. As the labours of this society proved very beneficial Leo XIII in 1892 enlarged it, with some changes, to embrace the whole world. The pope personally confirmed the new statutes, and granted new indulgences and privileges. The title of the sodality is: "The General Pious Association of Christian Families in Honour of the Holy Family of Nazareth". Another similar sodality, which existed before the founding of this one, and still exists, is the "Archconfraternity of the Holy Family of Jesus, Mary, and Joseph" (see HOLY FAMILY, ARCHCONFRATERNITY OF THE).

(2) The "Archconfraternity of Christian Mothers, under the patronage of Our Lady of the Seven Dolours, established at Notre-Dame de Sion, Paris", having for its object the development of truly Christian mothers, who will bring up their children according to the will of God and under the direction of the Church. A sodality of this kind was first formed at Lille in 1850; in 1856 this was raised to an archconfraternity. This society has now unlimited power of aggregation, and has its seat at Paris in the chapel of the Sisters of Our Lady of Sion (Notre-Dame des Champs). The Sodality of Christian Mothers, founded in 1863 at Rome in the Church of St. Augustine, has also a general power of aggregation. In 1865 this sodality was raised to the rank of a *societas primaria* Similar associations have appeared in Germany also since 1860, especially one in 1868 at Ratisbon. In 1871 this society was raised to an archconfraternity, and since 1883 it has had the right in all places where German is the most commonly-spoken language to incorporate with itself confraternities having the same name. The title of the sodality is: "The Society of Christian Mothers under the Patronage and Intercession of the Sorrowing Virgin Mary". Since 1878 there has been a confraternity of Christian mothers for the United States at Pittsburg, Pennsylvania. In 1881 it was made an archconfraternity for the whole of North America. Its headquarters are at the Church of St. Augustine at Pittsburg. A monthly periodical is published at New York, under the title "The Christian Mother".

(3) To bring the great blessing of the True Faith to poor heathen children, "The Association of the Holy Childhood" was established for Catholic children, and has richly blessed both (see above). A Confra-

ternity of the Child Jesus was also established at Bethlehem somewhat later than 1905 by the Christian Brothers. In 1908 the society received its indulgences and in 1909 Pius X made it an archconfraternity with the right of aggregation for the whole world. Since 1910 not only children but also their parents, and in general all who are interested in the training of children, can become members. The noble aim of the sodality is to implore the Divine Child to protect and bless all children, especially those in schools where religion is not taught. Applications for membership are made to the director of the Archconfraternity of the Child Jesus, Bethlehem, Palestine ("Acta Ap. Sed.", I, 757 sq.; Hilgers, "Appendice" in Beringer, op. cit.). In 1889 the Capuchin Father Cyprian founded at Ehrenbreitstein the "Seraphic Charity" for endangered youth. Its object is the rescue of religiously and morally endangered children, and their protection also in later years after the periods of school and apprenticeship are over. The members pay two and one-half cents monthly. In twenty-two years more than 10,000 poor children have been aided, and seven new institutions have been founded, at a total expenditure of $1,118,000. In Germany the society has 350,000 members; it is also established in Austria, Switzerland, Italy, and the United States, and has a total membership of over 500,000. The money is collected by 12,000 patrons and patronesses, who aid in the housing and supervision of the children. The society received its indulgences in 1902 from Leo XIII, who blessed and recommended it (cf. "Analecta Ord. Min. Cap.", 1902, 171).

(4) There are a number of sodalities very beneficial in their results for the sanctification and perfection of priests. Not only have Congregations of the Blessed Virgin Mary been formed especially for priests, but there are also other special associations of priests. Mention has already been made in the article PURGATORIAL SOCIETIES of the "Priests' Association under the Protection of St. Benedict for the Relief of the Poor Souls in Purgatory". See also PRIESTS' EUCHARISTIC LEAGUE; PRIESTS' COMMUNION LEAGUE. For the "Pious Union of St. Paul the Apostle", see PRIESTS, CONFRATERNITIES OF. See also APOSTOLIC UNION OF SECULAR PRIESTS. For "Associatio perseverantiæ sacerdotalis" see PRIESTS, CONFRATERNITIES OF, III. There are also the "Associatio sacerdotalis reparationis" and the "League for Sacerdotal Holiness", for priests who strive after higher perfection. Cf. "Acta S. Sedis", XLI, 170 sqq.; "Acta Apost. Sedis", I, 739; II, 474 sqq.; also the pamphlet "Ligue de Sainteté sacerdotale", 4th ed., 1909; and Hilgers, "Appendice" in Beringer, "Les Indulgences", 72 sqq. After the death of the founder of the league, P. Feyerstein, P. Reimsbach (28 rue Werby, Bar-le-Duc, France) became its director. Communications may be addressed to the sub-director of the League, Abbé Lachambre (101 rue du Pont à la Faulx, Peruwelz, Hainaut, Belgium). Those desiring further knowledge as to the origin and history of such confraternities of priests are referred to the article PURGATORIAL SOCIETIES, and for the history of the "Fraternitas Romana" in particular to Armellini, "Le chiese di Roma" (2nd ed., Rome, 1891), 20 sqq. (5) The "Pious Association of Mass-servers and Sacristans, under the protection of St. John Berchmans of the Society of Jesus", an association for acolytes and sacristans. This society was confirmed in 1865 by Pius IX, and, with the permission of the bishop, can be introduced anywhere without further formalities. Pius X also granted indulgences to the society (cf. "Acta S. Sed.", I, 689 sq., 699 sqq.). (6) The Catholic Journeymen's Societies, established by Adolph Kolping, the father of these associations, are well known (see GESELLENVEREINE). (7) The "Society of St. Raphael", for the protection of emigrants, established in 1871, originally for German emigrants. In 1883 the "American Raphael Society" was founded; other countries also have their special associations of this name, as Austria, Belgium, and Italy. Since its establishment the society has proved a great blessing to many thousands of poor emigrants (see EMIGRANT AID SOCIETIES). (8) Book societies have been founded, especially in Austria and Germany, for the spread of good books (cf. Beringer, op. cit.). Concerning the "Society of St. Charles Borromeo", see BORROMEO, THE SOCIETY OF ST. CHARLES. Various other church societies of similar nature have been founded, especially in France, as societies for the sick, for labourers and mechanics, for young working-women, for country people, and even for travellers (Beringer, op. cit.).

(9) The "Confraternity of the Worthy First Communion and of Perseverance", established at Prouille, France, in 1891. In 1893 the Dominicans took charge of its direction. In 1896 the society was confirmed by Leo XIII; in 1910 Pius X transferred its headquarters to Rome, where the general of the Dominicans is entrusted with the entire guidance of this association. The object of this confraternity is to obtain for children the grace of a good First Communion and further perseverance in goodness. It can be established anywhere, and all, without exception, who desire to work for the aims of the confraternity can become members of the same and share in the indulgences and privileges. Applications for the establishment of such confraternities or for the personal right to take members into the society should be made to the general of the Dominicans at Rome (Collegio Angelico, 15 Via San Vitale). A similar confraternity was erected at Rome in the Church of San Claudio, and by Brief of Pius X (4 Jan., 1912) was raised to the Unio Primaria with the right of aggregation for the whole world (Act. Apost. Sed., IV, 49 sq.). Little requires to be said as to the value and advantages of the sodalities. Their aims are undoubtedly the highest; the means used to attain these aims are the noblest. Consequently the results are always the best, and often astonish both friends and foes; therefore the most competent judges, the popes and the saints, have repeatedly recommended these associations to Catholics. The history of the sodalities and the results of their labours, as publicly exhibited and known to all the world, loudly proclaim the usefulness of these associations for all eras. As new times bring new demands, fresh and noble branches full of strength and renewed vitality grow on the fruitful tree of the associational life of the Catholic Church. Without exaggeration it may be said that ordinarily the most zealous and active Catholics are brought together in the sodalities in order to pursue the noblest aims. It is true that the influence of the sodalities, especially of the first group, cannot be estimated by measure and weight. However, the Christian and Catholic who knows why man is upon earth, knows also that a single act of love of God is of inestimable value. He knows also what a power there is in united prayer, what miracles it can work. As proof need only be mentioned the "Apostleship of Prayer" and the "Messengers of the Heart of Jesus". Moreover, these societies of piety and prayer labour ordinarily in the most unselfish, self-sacrificing manner, and are filled with a most noble-minded zeal for souls. This is shown by the innumerable hosts of poor souls who owe their release from Purgatory to the Confraternities for Poor Souls, and by the hundreds of thousands of poor sinners who owe their eternal salvation to the sodalities. The salvation of innumerable souls of poor heathens is attributable to the single Society of St. Francis Xavier and the single Association of the Holy Childhood. The society mentioned above for the Propagation of the Faith alone has collected since its foundation $90,000,000 for heathen missions. (Beringer, op. cit.; Seeberger, "Key to the

Spiritual Treasures"; Migne, "Dictionnaire des Confrèries".)

III.—The Sodality of the Blessed Virgin Mary was founded in 1563 at Rome in the Roman College of the Society of Jesus. The actual founder was John Leunis (Lat. *Leonius* or *Leonis*), b. at Liège, Belgium; received into the Society of Jesus by St. Ignatius on 13 Jan., 1556; and died at Turin, 19 Nov., 1584, the year in which his Roman Sodality was erected into an archsodality by the Bull, "Omnipotentis Dei", of Gregory XIII. Leunis distinguished himself in the last years of his life by heroic charity towards the sick. In the afternoon, when school was over, and especially on Sundays and feast days, Leunis gathered together, while teacher of grammar at the Roman College, the most zealous of his pupils for prayer and pious exercises, especially for devotions in honour of the Blessed Virgin. Pupils of other classes soon joined the company and in this way a foundation was laid for a school of devotion and virtue, the Marian Sodalities. As in the following year the members numbered already seventy, the first rules were drawn up. The sodality was placed under the special protection of the Blessed Virgin, and the object was declared to be personal perfection in virtue and study, as well as works of charity and zeal for souls. The members generally met on Sundays and feast days, and the meetings were conducted by a Jesuit Father, who delivered an address. The council was chosen from the members, and aided the director in the administration by counsel and other help.

In 1569 a division of the sodality in the Roman College became necessary on account of the large number of members. The older pupils, those over eighteen years of age, formed a sodality for themselves, while the younger were formed into another. Soon there were three sodalities in the Roman College. The meetings of the sodality composed of the older pupils were held regularly in the college church, which bore the title of the Annunciation. From this church the sodality received the title of Primary Sodality (*Prima-Primaria*) of the Annunciation. This title was given in the Bull, "Omnipotentis Dei", of 5 Dec., 1584, issued by Gregory XIII. At the same time the pope gave the general of the order in this Bull the power to receive as members of the the Primary Sodality (*Prima-Primaria*) not only pupils of the college, but also other persons, and also the power to erect similar sodalities in the colleges and churches of the society, which were to be connected with the Primary Sodality and to share in its indulgences and privileges. Before this sodalities had also been formed in France, Germany, the Netherlands, Spain, and elsewhere. These societies did much good among students and the laity, were a protection against the new erroneous teaching, and strengthened loyal Catholics in their faith.

The permission to erect more than one sodality in each college was granted by Sixtus V and powers for Jesuit residences were added by Clement VIII and Gregory XV. The latter, moreover, declared explicitly that the sodalities of the Blessed Virgin were not to be placed under the control of the regulations for confraternities contained in the Bull of Clement VIII, "Quæcunque". Lastly, Benedict XIV confirmed all earlier indulgences and privileges, and added to these in the Golden Bull (27 Sept., 1748), which is, in a certain sense, the crowning glory of the sodalities. "It is almost incredible", says Benedict XIV, "what results have sprung from this pious and praiseworthy institution for the faithful of all classes". Finally, by a Brief of 8 Sept., 1751, he granted the Jesuit general authority to unite with the Roman main sodality other sodalities of either sex that had been canonically erected in the Jesuit churches. These sodalities were to share in all the indulgences and privileges of the *Prima-Primaria*. After the suppression of the Jesuits in 1773 the sodalities were kept in existence by the solicitude of the pope and the efforts of zealous priests. The Society of Jesus was re-established in 1814, and Leo XII restored to the Jesuit general his old rights and privileges as regards the Sodalities of the Blessed Virgin by a Brief of 17 May, 1824. In addition, by a Rescript of March, 1825, addressed to the Jesuit general, the same pope granted the right to unite all sodalities to the Roman archsodality, even if they existed outside of Jesuit houses, and to share with these subsidiary sodalities all its indulgences and privileges. Leo XIII further granted to the general of the Jesuits the authority even to erect canonically such sodalities everywhere, with the permission or consent of the diocesan bishops. He also declared all sodalities of every kind independent and exempted from the regulations of the Constitution, "Quæcunque", of Clement VIII.

Leo XIII also granted other favours to the sodalities of the Blessed Virgin, which he called "excellent schools of Christian piety and the surest protection of youthful innocence". Finally, Pius X not only gave the sodalities the highest praise, but also granted them new privileges and indulgences, and confirmed the new summary of indulgences on 21 July, 1910. On 8 Dec. of the same year the general of the Society of Jesus approved new general rules for the sodalities under Jesuit direction. These rules were intended to serve as a model for all other Sodalities of the Blessed Virgin; they give the clearest statement as to the nature and purpose, organization and working of all such bodies. These sodalities aim at making genuine Christians of their members by a profound devotion to, and childlike love of, the Blessed Virgin; the members are not merely to strive to perfect themselves, but are also, as far as their social position permits, to seek the salvation and perfection of others and to defend the Church of Jesus Christ against the attacks of godless men (cf. tit. I, reg. 1). The entire tendency of the sodalities and the councils (which are selected from the sodality), the regular meetings and lectures, the careful control and supervision of all members, in addition to all the various exercises and works prescribed or advised, and the constant close personal intercourse of the members with the director, serve to make the members noble, moral human beings, who, with the aid of the Blessed Virgin, lead others to Christ. In general the spirit and occupation of the members is not to be a vaguely enthusiastic piety and asceticism, but a sober, genuinely Catholic devotion and a joyous, zealous effectiveness for good in the sphere in which each member moves. Consequently, in separate sections the members should have all possible opportunity to develop all the capabilities of mind and heart, in order to attain as completely as possible the high aim of the society (cf. Reg., 12–14). The history of the sodalities of the Blessed Virgin gives clear proof of their great and beneficial influence in all epochs of their existence. These beneficial results have been recognized by both State and Church. The enemies of Christianity and of the Church have also shown their recognition of these results by their particular hatred and persecution of sodalities.

The sodalities developed rapidly even at the very beginning. After thirteen years of existence they included 30,000 members. Wherever the Society of Jesus went to establish colleges or missions, a sodality of the Blessed Virgin was soon erected in that place. In all the larger cities of Europe where the Jesuits established themselves firmly, they founded not merely one, but as many as seven or even twenty different sodalities. During the period that the sodalities were connected with the houses and churches of the Jesuits the membership rose to many hundred thousands. The number increased when, from 1751, married women and girls were admitted. After the restoration of the Society of Jesus the sodalities grew enormously. In the fifty years after the declaration of the dogma of the Immaculate Conception nearly 35,000 new sodalities were united with the Roman main sodality. In the year 1910, 1132 new sodalities were established, of which 178 were in North America. At various times and in various countries emperors, kings, and princes have been zealous members of sodalities, and have encouraged the growth of these bodies. In the seventeenth century alone eighty cardinals and seven popes came from them. In all Catholic countries the Sodalities of the Blessed Virgin include among their most faithful members, the greatest and noblest men of every position in life, generals and scholars of the highest rank. St. Stanislaus Kostka, St. John Berchmans, St. Francis de Sales, St. Fidelis of Sigmaringen, St. Leonard of Port Maurice, St. Peter Fourier, St. John Baptist de Rossi, the Venerable Jean Eudes, and many other saints, blesseds, and venerables, were proud to belong to the sodalities of the Blessed Virgin. For six years St. Francis de Sales worked, during his student life, in the sodality of the College of Clermont at Paris as member, assistant, and prefect. Others, like St. Alphonsus Liguori and St. Charles Borromeo, praised and recommended the Sodalities of the Blessed Virgin as nurseries for youth and for growth in perfection. Above all it has always been the teachers and shepherds of the entire Catholic Church, the popes, who have, in their words and actions, highly honoured these sodalities, and who have earnestly recommended them to all the faithful, e. g. Gregory XIII, Sixtus V, Gregory XV, Benedict XIV, Leo XIII, Pius X.

Giovanni Antonio Bazzi, Called Sodoma
Self-portrait, Uffizi Gallery

Undoubtedly a well-conducted Sodality of the Blessed Virgin is in itself the best method of spiritual development for the members and also the best aid to the priest in his anxiety for the well-being of his entire flock. In addition these sodalities are the most universally extended of all pious associations and confraternities, for they can be and are erected separately for each sex, for every age, and every station in life, so that they include in themselves the advantages of all unions for different positions in life. Moreover, as has been already clearly shown, they seek to attain as fully as possible in their members the twofold object which all other confraternities, in a certain sense, only strive for partially, namely, to attain to true love of God by the exercises of the Divine service, prayer and reception of Holy Communion, and to attain to true charity by exercising the most universal possible zeal for souls.

Sodoma (Giovanni Antonio Bazzi, or De'Bazzi, often miscalled Razzi, more usually known by his nickname, Sodoma), Piedmontese and Florentine painter, b. at Vercelli in Piedmont, 1477; d. at Siena, 1549. His father, Giacono da Bazzi, was a shoemaker who had settled in Vercelli. The son was in 1490 apprenticed for seven years to a glass-painter from Casale, named Spanzotti, and with him the young Sodoma went to Milan, where he came under the influence of Leonardo da Vinci, although it is exceedingly doubtful whether he ever entered his studio. He executed his first important decorative work in 1503 for a small Olivetan convent near Pienza, and, two years after, he passed on to the mother-convent of the same order, known as Monte Oliveto Maggiore, to continue the work commenced by Signorelli. There he not only painted twenty-five large frescoes, but many other smaller ones; these constitute his most notable and perhaps his greatest works. Two years later he was at Rome, one of a number of artists employed by Julius II to decorate the Vatican. He then went to Siena, and, returning to Rome, executed important commissions for Agostino Chigi in the Villa Farnisena. Having completed that work he returned to Siena, where he spent a considerable time, painting some wonderful pictures, including his "Christ Bound to the Column". We do not know where he was between 1518 and 1525, but in the latter year he was at work at fresco decoration, painting a world-renowned panel, now in the Uffizi Gallery at Florence, with its almost unapproachable figure of San Sebastian; and various smaller pictures. In 1526 he was back at Siena, painting his famous frescoes in the Chapel of St. Catherine and St. Domenico, following them by other fresco works in the Palazzo Pubblico, and then by his decorations in the Chapel of San Spirito. It was these latter works which obtained honours for him from the Emperor Charles V, who created him a count palatine. He then wandered to Volterra, Pisa, Lucca, and various other places, leaving behind him traces of fine artistic work, and finally returned to Siena in his old age. He was an erratic and extraordinary man. Vasari gives various malicious reports about him, many of which are palpably untrue, and others probably exaggerated. There is little doubt, however, that his moral character was not above reproach, and at the very least coarse and lascivious. He drew perfectly, and with great ease, his colouring is delightful, sumptuous, and at times sensuous; he was greatly influenced by Leonardo, and to a certain extent by Raphael, and there is a remarkable charm and poetic feeling running through all his works, while at times the beauty of the faces of his women and children is almost irresistible. His works are scattered all over Italy, perhaps the greatest being those which are at or near Siena, the painting already alluded to in Florence, and examples of his work at Milan, Munich, London, and Rome. Every possible scrap of information respecting him has been gathered together in a memoir issued in 1906 by R. H. H. Cust. This is the standard book on Sodoma, and contains the very latest information concerning him. It is more important than his original statements, to form a proper judgment concerning the artist, because it contains all that Vasari states, together with many important documents and new pieces of information, dealing with the life of the painter, and refuting many of the statements which have been made concerning him. He must be regarded as an extraordinary genius, because at times he reached the very highest of his ideals, and then at times completely failed. He must also be regarded as a man against whom many writers have thrown mud, and who now can be safely considered as a far greater man than his contemporaries regarded him, and not so evil in disposition as many were prepared to believe him to be.

George Charles Williamson.

Sodom and Gomorrha.—Sodom, a city of Pentapolis (Wisd., x, 6; Gen., xiv, 2): Sodom, Gomorrha, Adama, Seboim, and Bala—later called Segor (Gen., xix, 22). They were situated in "the country about the Jordan" (Gen., xiii, 10); their exact location is unknown (cf. Gen., xiv, 3, 8, 10, 17; xix, 20–22, 30, 37; Deut., xxxiv, 3). Josephus identifies Segor with "Zoara of Arabia" at the south end of the Dead Sea ("Bel. Jud.", IV, viii, 4; cf. "Ant. Jud.", I, xi, 4; XIII, xv, 4; XIV, i, 4). Conder identifies it with Tell esh-Shaghûr, seven miles north of the Dead Sea; Burkhard, Wetstein, and others with Chirbet es-Safîeh, three miles south of the Dead Sea; E. Robinson puts it on Lisan, etc. For the unnatural sins of their inhabitants Sodom, Gomorrha, Adama, and Seboin were destroyed by "brimstone and fire from the Lord out of heaven" (Gen., xiii, 13; xviii, 20; xix, 24, 29; Osee, xi, 8). Since then, their names are synonymous with impenitent sin, and their fall with a proverbial manifestation of God's just wrath (Deut., xxix, 23; xxxii, 32; Is., i, 10 sqq.; Ezech., xvi, 49; Matt., xi, 23 sq.; II Peter, ii, 6; Jude, 7). The Septuagint rendering of ויהפך by *κατέστρεψε* (Gen., xix, 25) probably led to the erroneous opinion that the destruction of Sodom was accompanied by great upheavals of the earth, and even to the formation of the Dead Sea (see Dead Sea).

Sodor and Man, Ancient Diocese of (Sodorensis).—The early history of this see is extremely obscure. The Scandinavian diocese, which included Man and the western isles of Scotland (the Southern Hebrides), was called *Sodor* (*Suðr-eyjar*) in contradistinction to *Nordr* (*Norðr-eyjar*)—the Orkneys and Shetland. It is not known when Man was united with Sodor, but it may have been in the time of Magnus Barefoot (1098). Before that Man seems to have been a distinct see dependent on Dublin. When Man became the head of a separate kingdom, under the suzerainty of Norway, the joint Diocese of Sodor and Man was placed under the Archiepiscopate of Nidaros (Trondhjem) in Norway by Eugenius III (1152), an arrangement which was confirmed by Anastasius IV (1154). From then till 1458 Man remained under Drontheim, when Calixtus III transferred it to York.

The political connexion of Man with Norway had been severed in 1266, after which it depended on Scotland till 1334 and finally on England. In the reign of Henry IV the king gave the island to the Stanleys, who thus acquired the patronage of the bishoprics, but the bishops never attained the status of spiritual lords of Parliament. The last Catholic bishop was Thomas Stanley, who was appointed during the reign of Mary and was recognized as a bishop till his death in 1568. It is uncertain whether he accepted Elizabeth's changes or enjoyed immunity under the protection of the Stanleys. The cathedral, dedicated to St. Germain, was situated on St. Patrick's Isle and was built in 1245 on the site of an earlier building. It is now in a ruined state. There were only seventeen parishes in the island, all comprised in one archdeaconry. The arms of the see were: upon three ascents, the Virgin Mary standing with her arms distended between two pillars, on the dexter whereof a church, in base the ancient arms of Man.

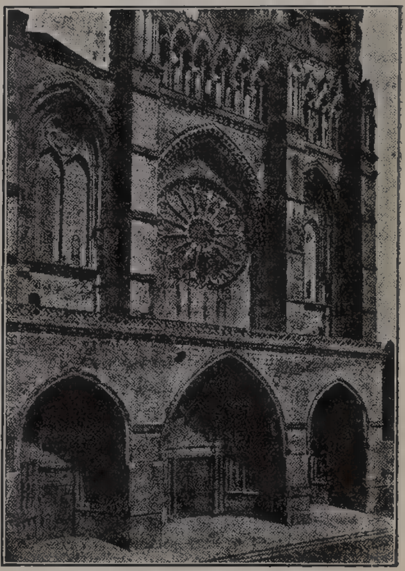
Edwin Burton.

Sofia and Philippopolis, Vicariate Apostolic of. See Bulgaria; Sardica.

Soissons, Diocese of (Suessionensis), includes, with the exception of two hamlets, the entire Department of Aisne. It was re-established by the Concordat of 1802 as suffragan of Paris, but in 1821 it became suffragan of Reims. It consists of (1) all the ancient Diocese of Soissons, except the civil district of Compiègne, which went to the Diocese of Beauvais; (2) all the Diocese of Laon, except two parishes, which went to Reims; (3) that portion of Vermandois which formerly belonged to the Diocese of Noyon (see Beauvais); (4) a few parishes which formerly belonged to Cambrai, Meaux, Troyes, Reims. After a vain attempt made by the unexecuted Concordat of 1817 to re-establish the See of Laon, the bishops of Soissons were authorized by Leo XII (13 June, 1828) to join the title of Laon to that of their own see; by Leo XIII (11 June, 1901) they were further authorized to use the title of St-Quentin, which was formerly the residence of the bishops of Noyon. The territory of Soissons and Laon played an important political part under the Merovingians. After the death of Clovis (511), Soissons was the capital of one of the four kingdoms into which his states were divided. The kingdom of Soissons, which ceased to exist in 558, when Clotaire I reunited all the Frankish states, came into being again in 561 when the death of Clotaire led to the redivision of the territory. It finally disappeared in 613 when the Frankish lands were once more reunited under Clotaire II.



West Front of the Cathedral, Soissons

I. The See of Soissons.—Concerning the traditions that make St. Sixtus and St. Sinicius the earliest apostles of Soissons as envoys of St. Peter, see Reims. Sts. Crepinus and Crepinianus martyrs (c. 288) are patrons of the diocese. According to Mgr Duchesne, the establishment of a see at Soissons dates from about 300. Among its bishops are: St. Divitianus (c. 310–20); St. Onesimus (c. 350–61); St. Edibius (c. 431–62); St. Principius (462–505), brother of St. Remi of Reims; St. Lupus (505–35); St. Baudarinus (Baudry) (535–45), whom Clotaire I exiled for seven years to England, where he served as gardener in a monastery; St. Ansericus or Anscher (623–52); St. Drausinus (657–76), founder of the monastery of

Notre Dame de Soissons and of the Abbey of Rethondes; St. Adolbertus (677–85); St. Gaudinus (685–707), assassinated by usurers; Rothadius (832–869), famous for his quarrel with Hincmar (q. v.); Riculfus (884–902), whose pastoral issued in 889 is one of the greatest extant treasures of the ecclesiastical literature of the period; St. Arnoul de Pamèle (1081–1082), elected through the efforts of Hugues de Die, legate from Gregory VII, and who was disturbed in the possession of his see by two bishops nominated successively by Philip I; Jocelyn de Vierzy (1126–52), who aided in the victory of Innocent II over the antipope Anacletus, and wrote an explanation of the Apostles' Creed and the Lord's Prayer; Hugues de Champfleury (1159–75), chancellor of Louis VII; Gui de Château Porcien (1245–50), who accompanied St. Louis on the Crusade and was killed in Palestine; Languet de Gergy (1715–30), who wrote the life of Mary Alacoque. In 1685 Louis XIV nominated the famous *littérateur* Huet Bishop of Soissons, but the strained relations existing then between France and Rome prevented him from receiving his Briefs, and he exchanged that see for Avranches in 1689.

II. THE SEE OF LAON.—The Diocese of Laon was evangelized at an uncertain date by St. Beatus; the see was founded in 497 by St. Remi who cut it off from Reims and made his nephew St. Genebaldus bishop. Among the bishops of Laon are: St. Chagnoaldus (c. 620–3), brother of St. Faro, Bishop of Meaux, and of St. Fara; Hincmar (857–76); Adalbero Ascelin (977–1030), driven from his see (981) by the Carlovingian Louis V who accused him of undue intimacy with Emma, widow of Lothaire, and who was afterwards very loyal to the interests of Hugh Capet, to whom he handed over the Carlovingian Charles of Lorraine and Arnoul, Archbishop of Reims. He was the author of a satirical poem addressed to King Robert; Gaudri (1106–12), who held out against the commune movement, and who was slain in a brawl at Laon; Barthélemy de Jura, de Vir, or de Viry (1113–51), who attracted St. Norbert to the diocese; Gautier de Mortagne (1155–74), author of six small theological treatises; Robert Le Cocq (1352–8), who in October, 1356, and March, 1357, after the imprisonment of John II by the English held an important position in the States General, took the side of Stephen Marcel, conspired with him and Charles the Bad, King of Navarre, against the dauphin, the future Charles V and then fled to Aragon, where he became Bishop of Calahorra; Pierre de Montaigut (1371–86), cardinal in 1383; the historian Jean Juvenel des Ursins (1444–9), afterwards Archbishop of Reims; Louis de Bourbon Vendôme (1510–52), cardinal in 1517; César d' Estrées (1653–81), cardinal in 1672, was elected to the French Academy, and in Rome was involved in the difficulties between Louis XIV and Innocent XI, Alexander VIII, and Innocent XII; Jean de Rochechouart de Faudoas (1741–77), cardinal in 1761. Louis Séguier, nominated by Henry IV, Bishop of Laon in 1598, refused the nomination to make room for his young nephew Peter de Bérulle, afterwards cardinal, and founder of the Oratorians; de Bérulle refused the see.

The Bishop of Soissons as senior suffragan of Reims had the privilege during a vacancy of the metropolitan see to replace the archbishop at the ceremony of anointing a King of France. The Bishop of Laon ranked as duke and peer from the twelfth century. As second ecclesiastical peer he had the privilege of holding the *ampulla* during the anointing of the king. The chapter of Laon was one of the most illustrious of the kingdom. From the twelfth century its members numbered eighty-four; it had to engage in bitter struggles with the communal regime; three popes, Urban IV, Nicholas III, and Clement VI, sixteen cardinals, and more than fifty archbishops and bishops belonged to it. Jacques Pantaléon who became pope as Urban IV was a choir boy, then canon of the cathedral of Laon. He arranged the *cartularium* of the church of Laon, and was commissioned by Gregory IX to settle the dispute between the chapter and Enguerrand de Coucy. As archdeacon of Laon he assisted, in 1245, at the Council of Lyons. Under the direction of St. Anselm of Laon (q. v.), appointed by Eugene III to restore theological studies in France, the school in connexion with the Laon cathedral drew young men from all parts of Europe.

THE CATHEDRAL, LAON

The Abbey of St-Médard at Soissons, founded in 557 by Clotaire I to receive the body of St. Médard, was looked upon as the chief Benedictine Abbey in France; it held more than two hundred and twenty fiefs. Hilduin, abbot (822–30), in 826 obtained from Eugene II relics of St. Sebastian and St. Gregory the Great; he caused the relics of St. Godard and St. Remi to be transferred to the abbey; he rebuilt the church which was consecrated 27 Aug., 841, in the presence of Charles the Bald and seventy-two prelates. The king bore the body of St. Médard into the new basilica. The church was pulled down but rebuilt and reconsecrated in 1131 by Innocent II, who granted those visiting the church indulgences known as "St. Médard's pardons". In this abbey Louis the Pious was imprisoned in 833, and there he underwent a public penance. Among the abbots of St. Médard are: St. Arnoul, who in 1081 became Bishop of Soissons; St. Gerard (close of the eleventh century); Cardinal de Bernis, made commendatory abbot of St. Médard in 1756. The Benedictine Abbey of Notre Dame de Soissons was founded in 660 by Ebroin and his wife Leutrude. The Cistercian Abbey of Longpont, founded in 1131, counted among its monks the theologian Pierre Cantor (q. v.), who died in 1197, and Blessed John de Montmirail (1165–1217), who abandoned the court of Philippe-Auguste in order to become a monk. The abbey of St. Vincent at Laon was founded in 580 by Queen Brunehaut. Among its earlier monks were: St.

Gobain, who, through love of solitude, retired to a desert place near the Oise and was slain there; St. Chagnoaldus, afterwards Bishop of Laon, who wished to die in his monastery; St. Humbert, first abbot of Maroilles in Hainaut. The abbey adopted the Rule of St. Benedict. It was reformed in 961 by Blessed Malcaleine, a Scotchman, abbot of St. Michael at Thierache, and in 1643 by the Benedictines of St. Maur. Among the abbots of St. Vincent were: St. Gerard (close of the eleventh century), who wrote the history of St. Adelard, abbot of Corbie; Jean de Nouelles (d. 1396), who wrote a history of the world, and began the cartulary of his monastery. The Abbey of St. John at Laon was founded about 650 by St. Salaberga, who built seven churches there; she was its first abbess; St. Austruda (d. 688) succeeded her. In 1128 the abbey became a Benedictine monastery. The Abbey of Nogent sous Coucy was founded in 1076 by Albéric, lord of Coucy. Among its abbots were St. Geoffroy (end of eleventh century) and the historian Guibert de Nogent, who died in 1124 and whose autobiography "De Vita Sua" is one of the most interesting documents of the century. Under the title "Gesta Dei per Francos" he wrote an account of the First Crusade. The Abbey of Cuissy in the Diocese of Laon was founded in 1116 by Blessed Lucas de Roucy, dean of Laon, and followed the rule of Premonstratensians. In the Diocese of Soissons the Premonstratensians had the abbeys: Chartreuve, Valsery, St. Yved de Braine, Villers Cotterets, Val Secret, Vauchrétien, Lieurestauré. (See Premontré, Abbey of.)

The portion of the ancient Diocese of Noyon within the jurisdiction of the present Diocese of Soissons includes the town, St-Quentin (Augusta Veromanduorum), where St-Quentin was martyred under Diocletian. It was the chief town of a diocese until 532, when St. Médard, the titular, removed the see to Noyon. Abbot Fulrade built the Church of St-Quentin in the eighth century, and Pope Stephen II blessed it (816). From the time of Charles Martel until 771, and again from 844 the abbots of St-Quentin were laymen and counts of Vermandois. During the Middle Ages a distinct type of religious architecture sprang up in the region of Soissons; Eugène Lefèvre Pontalis has recently brought out a work dealing with its artistic affiliations. After investigation Canon Bouxin concludes that the cathedral of Laon, as it exists, is not the one consecrated in 1114 and visited by Innocent II in 1132; that was the restored ancient Romanesque building; the present one was built 1150–1225. Louis d'Outremer (936), Robert the Pious (996), Philip I (1059) were anointed in Notre Dame de Laon; in the twelfth century Hermann, Abbot of St. Martin's of Tournai, wrote a volume on the miracles of Notre Dame of Laon. The Hôtel-Dieu of Laon, once known as Hôtellerie Notre Dame, was founded in 1019 by the Laon chapter. The Hôtel-Dieu of Château Thierry was founded in 1304 by Jeanne, wife of Philip the Fair.

Besides the saints already mentioned, the following are specially honoured as connected with the religious history of the diocese: St. Montanus, hermit, who foretold the birth of St. Remi (fifth century); St. Marculfus, Abbot of Nanteuil (sixth century) in the Diocese of Coutances, whose relics, transferred to Corbeny in the Diocese of Laon, were visited by the kings of France who, after their anointing at Reims, were wont to go to the tomb of St. Marculfus to cure the king's evil (see Reims, Archdiocese of); St. Sigrada, mother of St. Leodagarius, exiled by Ebroïn to the monastery of Notre Dame at Soissons (seventh century); St. Hunegundis, a nun from the monastery of Homblières (d. c. 690); St. Grimonia, an Irishwoman martyred at La Chapelle (date uncertain); St. Boetianus (Bosan), husband of St. Salaberga, and St. Balduinus, martyr, his son (seventh century); St. Voël, or Vodoalus, hermit (d. c. 720). Among the natives of the diocese may be mentioned: Pierre Ramus (1515–72), Racine (1639–99), La Fontaine (1621–95), Dom Luc d'Achéry (1609–85), Charlevoix (1683–1761), Camille Desmoulins (1760–1794). The chief pilgrimages are: Notre Dame de Liesse, a shrine founded in the thirteenth century, and replaced at the end of the fourteenth century by the present church; Notre Dame de Paix at Fieulaine, which dates back to 1660. Before the application of the Congregations Law (1901), there were in the Diocese of Soissons Jesuits, Trinitarians, and several teaching congregations of brothers. Some congregations of women had their origin in the diocese: the Nursing and Teaching Sisters of the Child Jesus, with mother-house at Soissons, founded in 1714 by Madame Brulard de Genlis; the Sisters of Notre Dame de Bon Secours, a nursing and teaching order, founded in 1806, with mother-house at Charly; Sisters of Notre Dame, nursing and teaching order, with mother-house at St-Erme, founded in 1820 by the Abbé Chrétien; the Franciscan nuns of the Sacred Heart, a nursing order founded in 1867, with mother-house at St-Quentin; the servants of the Heart of Jesus, of whom there are two branches, the "Marys" who lead a contemplative life and the "Marthas" who nurse the sick; they were founded at Strasburg in 1867 and brought to St-Quentin after the war of 1870–1.

At the close of the nineteenth century the religious congregations in the diocese had charge of 40 nurseries, 2 deaf and dumb schools, 1 orphanage for boys, 14 for girls, 6 work bureaus, 1 home for the poor, 29 hospitals, 10 district nursing homes, 1 retreat house, and 1 lunatic asylum. In 1905, when the Concordat was broken, there were in the Diocese of Soissons: 535,583 inhabitants, 39 parishes, 538 auxiliary parishes, and 15 curacies recognized by the State.

Georges Goyau.

Solari (Solario), a family of Milanese artists, closely connected with the cathedral and with the Certosa near Pavia. (1) Guiniforte Solari, b. 1429; d. 1481. He was the son of Giovanni (b. c. 1400; d. 1480), superintendent of the building of the cathedral and of the Certosa. Guiniforte was one of the architects of the Certosa (1465), was employed on the Ospedale Maggiore, and was also one of the architects of the fortified castle of the Sforza family and of several of the churches of Milan. His son Pietro Antonio (d. 1493) worked also for a time on the cathedral; there is proof that in 1476 he was still there. Later he was called to Moscow where he was employed on the rebuilding of the Kremlin. (2) Andrea Solari, painter, b. at Milan about 1465; d. 1515. From 1490 he was a pupil of Giovanni Bellini at Venice and his early works recall this painter, as for example a Madonna with Saints, painted in 1495 for the Church of San Pietro at Murano and now in the Brera at Milan. After his return to Milan he copied the style of Leonardo da Vinci so closely that he was considered the latter's best pupil. He is very like Leonardo, especially in the treatment of the heads, plastic modelling, and colouring. A beautiful Descent from the Cross, painted in 1503, is still in existence. About this date he also painted many portraits and in this way came into connexion with Cardinal Charles d'Amboise, for whom he painted a number of pictures during the years 1507–9 at Gaillon in Normandy. These works are now in galleries in England. During the second half of his working period he changed his style to a brighter tone and his works are easily recognized by the clear, luminous colours and the manner in which they flow into and blend with one another. The School of Leonardo, however, is always perceptible. Among other paintings belonging to this time is a Madonna with a Child lying on a cushion to whom she offers the breast; the figures are surrounded by a beautiful landscape. This picture is in the Louvre and the same gallery has another of his works, a Salome receiving from the executioner the head of John the Baptist, with the delicate face turned away from the object. The Poldi-Pezzoli Gallery of Milan contains a large number of his works; among these are: "Repose on the Flight to Egypt" (1515), one of the best pictures of Leonardo's school; "St. Catherine"; "St. Anthony"; "The Crowning with Thorns". His last and most important work is the "Assumption of the Blessed Virgin", at the Certosa near Pavia, which, however, he was not able to complete.

(3) Andrea's brother Cristoforo Solari, called Il Gobbo, sculptor and architect, b. at Milan before 1475; d. in 1527. In 1490 he went with Andrea to Venice where some sculptures executed by him are still in existence. In 1498 he returned to Milan and entered the service of Ludovico Sforza at whose order he executed his chief work, the tomb of Ludovico's wife. The figures of Beatrice d'Este and Ludovico upon the tomb belong in their massive severity, individuality of treatment, and technical excellencies to the best works of the early Renaissance in Lombardy. The monument was erected in the Church of Maria delle Grazie, but was unfortunately destroyed at a later era; in 1821 the two statues were taken to the Certosa near Pavia. Besides these, a number of statues in the cathedral of Milan are ascribed to him: four doctors of the Church, Adam and Eve, Sebastian, Christ bound to the pillar. They are marked by a less vigorous naturalism, the influence of a stay at Rome, whither he went after the overthrow of the Sforza family. From 1503 he was again in Milan, where he took charge of the construction of the cathedral. He also designed the great cupola of Santa Maria della Passione at Milan. (4) Antonio Solari, b. in 1382; d. 1445. He is called Il Zingaro (the gypsy), a nickname probably given him either because his father was apparently a Bohemian blacksmith who had emigrated to Venice, or from the wandering life he himself led until he settled permanently in Naples. He is said to have worked at his father's trade until his love for the beautiful daughter of an artist led him to turn to art. As at Naples he was very soon able to win the favour of Queen Joanna, it was not long before he became the most important painter of the capital. He founded a school which produced a number of masters of moderate ability. His most important work, which is also the best production of Neapolitan painting at that period, is a series of twenty frescoes in the court of a monastery near San Severino which show traces of the influence of the schools of Venice and Ferrara. They represent the life of St. Benedict and contain a large number of lifelike figures in dignified and graceful positions. His "Carrying of the Cross" in the Church of San Domenico Maggiore and a "Madonna" in the museum at Naples show nobility of conception combined with a vigorous realism. (5) Santino Solari, architect and sculptor, b. at Como, Upper Italy; d. 1646. He is best known by his share in the construction of the cathedral at Salzburg; he ornamented the palace and the gardens of the Bishop of Salzburg with statues.

Beda Kleinschmidt.

Solemnity (from Lat. *solet* and *annus*), a yearly celebration, is used to denote the amount of intrinsic or extrinsic pomp with which a feast is celebrated. Intrinsic solemnity arises from the fact that the feast is *primarium* for the entire Church, or for a special place, because in it a saint was born, lived, or died; or because his relics are honoured there. Extrinsic solemnity is added by *feriatio*, by the number of sacred ministers, decoration of the church or adjoining streets, the ringing of bells, the number of candles, costly vestments, etc. In the "Roman Martyrology" Easter Sunday is announced as the "solemnity of solemnities"; the first Sunday of October, as the solemnity of the Rosary of the Most Blessed Virgin Mary. The term "solemnity" is also used in contracts, especially matrimony, in votive Masses, in vows, and in ecclesiastical trials.

Francis Mershman.

Solesmes, Abbey of, a Benedictine monastery in Department of Sarthe, near Sablé, France. It was founded in 1010 by Geoffrey, seigneur of Sablé, as a priory dependent on the Abbey of St-Pierre de la Couture at Le Mans. During the Hundred Years' War it was twice pillaged and once almost entirely destroyed by fire. Apart from these disasters its history was uneventful for several centuries. Towards the end of the fifteenth century the rebuilding of the church was commenced, Prior Philibert de la Croix changing it from basilica form to that of a Latin cross. His successor, Jean Bougler (1505–1556), completed the restoration of the church, added the tower, and rebuilt the cloisters, sacristy, and library. Under his direction two famous groups of statuary, known as the "Saints of Solesmes", were set up in the church. It is not known for certain who the sculptors were, but the groups were probably the work of several hands. They are placed in the two transeptal chapels and form one of the chief attractions of the place. One represents the entombment of Our Lord and the other various episodes of the Dolours of Our Lady. The groups contain eight and fifteen life-size figures respectively, besides various subsidiary figures, and are adorned with bas-reliefs and other sculptural ornamentation. Some of the faces, notably that of Mary Magdalen, are wonderfully expressive; that of Joseph of Arimathea is supposed to be a portrait of King René (d. 1480). In the sixteenth century these masterpieces were in danger of being destroyed by the Huguenots and other Iconoclasts, but the monks saved them by erecting barricades. Jean Bougler was the last Regular Prior of Solesmes, a succession of commendatory priors being appointed after his death. In 1664 the monastery was absorbed by the Congregation of St. Maur, and in 1722 it was, with the exception of the church, entirely rebuilt on a larger scale. In 1791 it was suppressed and the buildings passed into private hands, so remaining for forty years. In 1831 the property was put up for sale, and Dom Prosper Guéranger, then a young priest of twenty-seven, who had been born in the neighbourhood and had long lamented its state of desecration, was inspired to acquire it and restore it to God and the Church as a home of monastic life. He set about raising the necessary funds, bought the entire property, and, with five other like-minded zealous priests, took possession in 1833. Three years later, with the full approval of the Bishop of Le Mans, they commenced the Benedictine life. In 1837 Dom Guéranger was professed at Rome and a few months later Pope Gregory XVI raised Solesmes to the rank of an abbey, naming Dom Guéranger first abbot and formally erecting at the same time the new "Congregation of France" with Solesmes as the mother-house and its abbot as superior-general. In course of time daughter-houses have been founded from Solesmes, viz: Ligugé (1853), Silos in Spain (1880), Glanfeuil (1892), and Fontanelle (1893),—these four being old monasteries restored; also new foundations at Marseilles (1865), Farnborough in England and Wisque (1895), Paris (1893), and Kergonan (1897). Since its restoration Solesmes has been dissolved by the French Government no less than four times. In 1880, 1882, and 1883 the monks were ejected by force but, receiving hospitality in the neighbourhood, succeeded each time in re-entering their abbey. At the final expulsion in 1903 they were, like all the other religious of France, obliged to leave the country. Between the years 1890 and 1900 an entirely new and imposing monastery had been added to the existing buildings, which had become too small for the growing community. Hardly, however, had the monks got settled in it when they were driven forth. They then established themselves in the Isle of Wight, where, after a few years' sojourn in a rented house at Appuldurcombe, they have now nearly completed the building of a new abbey at Quarr, on what was formerly monastic property.

The community of Solesmes has achieved a world-wide reputation for its erudition and its devotion to monastic and liturgical studies, the foundation for which was laid by Dom Guéranger himself. Amongst those who have thus brought fame to the abbey may be mentioned Dom Pitra, afterwards cardinal and Librarian at the Vatican, Dom Pothier, Dom Cabrol, Dom Férotin, Dom Mocquereau, Dom Besse, Dom Quentin, and Dom Leclercq. But the greatest work, perhaps, done by the monks of Solesmes, and that for which they are best known, has been the restoration of the true Gregorian chant of the Church. Dom Guéranger set himself the task of resuscitating sound liturgical traditions in France at a time when such were at their lowest ebb. He revived the accent and rhythm of plainsong, which had been lost, and in restoring the true text of the chant he laid down the principle, which has since been always strictly adhered to, that when various manuscripts of different periods and places agreed on a version, there existed the most correct text. He entrusted the work to Dom Jansions and Dom Pothier, the latter producing his "Les Mélodies Grégoriennes" in 1880 and the "Liber Gradualis" in 1883. These, as well as many other publications, were all printed at the Solesmes Imprimerie, which for many years was an important appanage of the abbey. Unfortunately the entire plant was confiscated by the French government at the suppression and since then the Solesmes books have been printed by Desclée of Tournai. Dom Pothier followed the Reims-Cambrai edition as far as possible, so as to shelter himself under the authority it still possessed, though the still higher authority of Ratisbon proved an obstacle in his way. Through this desire to be conciliatory, and also the insufficiency of manuscripts, the absence of any competent check, and the want of practical preparatory trial, the earlier Solesmes editions were bound to be defective. But they served their purpose in the return to antiquity and have formed the basis for further research. Dom Pothier's pioneer labours have been followed by those of Dom Mocquereau, whose great work has been the personal training of the Solesmes *Schola*, which has indirectly influenced many others, and the publication of the "Paléographie Musicale". By means of photographic reproductions of scores of manuscripts from all the principal libraries of Europe, a far greater degree of exactness has been secured than was possible with mere transcripts which might contain copyists' errors. These reproductions have been brought together and studied at Solesmes and the variants of the different melodies classified according to their school or church of origin, date, etc. Intrinsic qualities also have been carefully considered in deciding on the most correct and universal version, but when these criteria have proved insufficient preference has been given to the Roman version, when there has happened to be one. This method of selection is described in detail, with examples, in the little brochure of Dom Cagin and Dom Mocquereau referred to in the bibliography. The labours of the Solesmes fathers received the highest possible recognition in 1904, when Pope Pius X (Motu Proprio, 25 April, 1904) entrusted "particularly to the monks of the French Congregation and to the monastery of Solesmes" the work of preparing an official Vatican edition of the Church's Chant, and appointed a Commission for the purpose with Dom Pothier as its president. The Gradual has already appeared and the Antiphonal is in preparation. (See GUÉRANGER, PROSPER LOUIS PASCAL.)

G. CYPRIAN ALSTON.

Soli, a titular see in Cyprus, suffragan of Salamis. Soli was an important port on the Clarius, on the southern side of the western portion of Cyprus. It was an Athenian colony founded by Demophon, son of Theseus, or, according to another tradition, by Phalerus and Acamas. At first called Œpea, it was transferred to a better site by Philocyprus, King of Œpea, on the suggestion of Solon, from whom it got its new name, becoming the capital of one of the nine kingdoms in the island. It possessed temples of Aphrodite and Isis. The rest of its history is unknown, though it is mentioned by many ancient geographers. Its ruins, called *Palœa Chora*, or old town, are near the village of Karavostasi, about two miles north-west of Lefka. Its first bishop was St. Auxibius, whose name occurs in the "Roman Martyrology" on 19 February; he is said to have been baptized by John Mark, the companion of St. Barnabus, and to have had for successors another Auxibius, his disciple, and his brother Themistagoras. The feasts of two other bishops of Soli, St. Marcellus and St. Eutychius, are celebrated in the Greek Church. Another, Peter, probably a legendary character, is mentioned in the calendar of the Abyssinian Church on 2 January. We find later: Evagrius, 431; Epiphanius, 451; Stratonicus, 680; Eustathius, 787; Leontius, 1222; Nibo, 1260; Neophytus, died in 1301; Leo, his successor; Theophanes, towards the close of the Venetian occupation. During this occupation Soli was the residence of the Bishop of Leucosia. We hear also of a Benjamin, Bishop of Soli in 1660, owing doubtless to a temporary restoration of the see by the Greeks.

S. PÉTRIDÈS.

Solicitation (Lat. *sollicitare*), technically in canon law the crime of making use of the Sacrament of Penance, directly or indirectly, for the purpose of drawing others into sins of lust. The Church legislation on this point is very severe, and numerous popes have denounced this crime vehemently and decreed punishments for its commission. The principal document on the subject is that of Gregory XV, "Universi Gregis" (30 Aug., 1622), confirmed by the

Constitution of Benedict XIV, "Sacramentum pœnitentiæ" (1 June, 1721). There are, in addition, a number of other pontifical Constitutions and Decrees of the Holy Office on the same subject, notably those of 27 Sept., 1724, 20 Feb., 1867, and 20 July, 1890. The crime of *sollicitatio ad turpia* is defined as the soliciting any person to carnal sin, to be committed with himself or another, by any priest secular or regular, immediately before, during, or immediately after sacramental confession, or on the occasion of or under pretext of confession, or in the confessional itself or in any other place generally used for hearing confessions, or in a place chosen by the penitent to make a confession, and this whether a sacramental confession be actually made or not. Moreover, the crime of solicitation may be committed not merely by words, but also by signs or other expressive actions, or by a letter to be read then or afterwards. If any penitent has been thus solicited to sin, he or she cannot be absolved by any confessor until the penitent actually denounces the delinquent priest to the proper ecclesiastical authority or promises to make such denunciation as soon as possible. Even though the wicked confessor has since amended his life, or though the crime of solicitation took place many years ago, the obligation of denouncing him still remains, because the law is made, not merely to procure amendment, but also to inflict punishment. If the penitent, without sufficient cause, does not make the denunciation within a month from the time he or she has learned the obligation to do so, excommunication is incurred *ipso facto*. When the negligence has been repaired, any approved priest may absolve from the excommunication. If the penitent has reasonable ground for fearing serious damage to self or family from a formal denunciation, some other method of informing on the delinquent priest may be sought for. The denunciation is to be made to the bishop of the place where the penitent lives. If the soliciting priest be of another diocese, the ordinary of the person solicited will forward the denunciation to the bishop of the accused confessor. The denunciation must be sworn to and be made personally and by word of mouth if possible. It may also be done, in special cases, by writing or by a third party. When the denunciation is made by letter, it must be signed with full name and address, and must be a circumstantial account of the alleged crime. Whether the penitent has consented to the solicitation or not need not be expressed. Bishops are directed to pay no attention whatever to anonymous letters of denunciation. On the receipt of the accusation, the ecclesiastical authority makes inquiry as to the reputation and reliability of the accuser. If the confessor be found guilty, he is subject to suspension from the exercise of his orders, privation of his benefices, dignities, and offices with perpetual inability to receive such again. Regulars, in addition, lose the right of voting or being voted for in the chapter of their religious order. Benedict XIV added perpetual exclusion from celebrating Mass. While the Church is thus severe on delinquent confessors, she is equally careful to protect innocent priests from calumnious charges. If any one falsely denounce a confessor on the charge of solicitation, the caluminator can obtain absolution for the perjured falsehood only from the pope himself, except at the point of death.

WILLIAM H. W. FANNING.

Solimôes Superiore.—A prefecture Apostolic in the State of Amazonas, Brazil, erected by a decree of the Sacred Congregation of Consistory, 23 May, 1910. The territory of this prefecture forms a part of the extensive Diocese of Manaos or of Amazonas, from which it was separated at the same time with the territory of Toffé, which last forms another prefecture Apostolic. Solimôes is situated between the left bank of the Amazon and the River Jacura, a tributary of the former; the territory is traversed by a great number of watercourses and natural canals. The region has as yet been little explored, and little has been done in the way of preaching the Gospel, as is the case with all the regions along the tributaries of the Amazon. In recent years the Holy See has devoted its attention to the problem of evangelizing these vast but sparsely populated regions. The mission of Solimôes is intrusted to the Capuchin Fathers. (See "Acta S. Sedis", Rome, 1 July, 1910.)

U. BENIGNI.

Solomon.—Our sources for the study of the life, reign, and character of Solomon are III Kings i–xii; and II Par. i–ix. Solomon (Heb. שׁלמה "peaceful"), also called Jedidiah, i. e., "beloved of Yahweh", was the second son of David by his wife, Bathsheba, and the acknowledged favourite of his father. This may have been due partly to the fact that he, as a late offspring, considerably younger than David's other sons, was born in his father's old age, and partly to the intense love of David for Bathsheba and the beautiful qualities of Solomon himself. Solomon was not the logical heir to the throne, but David conferred it upon him instead of his other brothers, and in doing so he committed no wrong according to Israelitish ideas. Solomon was eighteen years old when he ascended the throne, or at least no older than this, and his successful reign of forty years speaks well for his intelligence, ability, and statesmanship. His reign offers a striking contrast to that of his father. It was almost entirely devoid of incident, and was marked by none of the vicissitudes of fortune which were so notable a feature in the career of David. Enjoying for the most part peaceful relations with foreign powers, and set free from the troubles that menaced him at home, Solomon was enabled to devote himself fully to the internal organization of his kingdom and the embellishment of his Court. In particular he gave much attention to the defence of the country (including the construction of fortresses), the administration of justice, the development of trade, and the erection of a national temple to the Almighty.

The territory over which sovereignty is claimed for Solomon by the historian of III Kings extended from the Euphrates to the River of Egypt (*el Arish*), or, to name the cities at the limits of his realms, from Tiphsah (Thapsacus) to Gaza (III Kings, iv, 24). The account of his reign shows that even his father's dominions were not retained by him unimpaired. But if some of the outlying portions of David's empire, such as Damascus and Edom, were lost by Solomon, the integrity of the actual soil of Israel was secured alike by the erection of fortresses in strong positions (including Hazor, Megiddo, one or both of the Beth-horons, and Baalath) and by the maintenance of a large force of war-chariots. Of the cities selected for fortification Hazor guarded the northern frontier, Megiddo protected the plain of Esdrælon, whilst the Beth-horons, with Baalath, commanded the Valley of Aijalon, thus defending the capital against an attack from the maritime plain. Additional security in this direction was obtained by the acquisition of Gezer. This city had hitherto been left in the hand of the Canaanites, and came into Solomon's power by a marriage alliance with Egypt. Under David, Israel had become a factor to be reckoned with in Eastern politics, and the Pharaoh found it prudent to secure its friendship. The Pharaoh was probably Psieukhannit (Psebkhan) II, the last king of the 21st dynasty, who had his capital at Zoan (Tanis), and ruled over the Delta. Solomon wedded his daughter; and the Egyptian sovereign, having attacked and burnt Gezer and destroyed the Canaanite inhabitants, bestowed it as a dowry upon the princess. It was now rebuilt and made a fortified city of Solomon. In Jerusalem itself additional defences were constructed, and the capital was further adorned by the erection of the temple and the royal palaces described below. In view of the trade route to the Red Sea, which the possession of the ports of Edom gave to Israel, Tamar (perhaps Hazezon Tamar) was likewise fortified. Cities had also to be built for the reception and support of the force of chariots and cavalry which the king maintained, and which he seems to have been the first to introduce into the armies of Israel. This force is stated to have consisted of 1400 chariots and 12,000 horsemen (III Kings, x, 26). The numbers of the foot-soldiery are not given, perhaps because, being a militia and not a standing army, it was only mustered when there was occasion for its services; but the levies available were, probably, not inferior to those which the nation could raise at the close of David's reign.

Solomon's foreign policy was one of international friendship and peace. His relation with the Pharaoh of Egypt has already been alluded to, and the same may be said of his relation with his other great neighbour, Hiram, King of Tyre, and lord of the Phœnician Riviera which lies between Lebanon and the sea. To him belonged the famous cedar forests, and the no less famous artisans of Gabal were his subjects. Solomon formed with him a commercial treaty, surrendering certain towns on the northern frontier (III Kings, ix, 11) in exchange for floats of timber conveyed to Joppa and skilled workmen lent him for wood-carving, stone-fashioning, and bronze-casting. What Solomon gained by the alliance was knowledge of the Phœnician manner of trading. As ruler of Edom he had possession of the port of Eloth, at the head of the Gulf of Akaba. Here he built ships and sent his own servants, under Phœnician masters, to trade with Arabia. The profits went into the king's coffers. As Arabia was a gold-producing country, we need not suppose that South Africa was reached by these fleets. Whether the commerce of India reached him by this route is not certain. The list of products imported has sometimes been interpreted in this sense. But one or two obscure words in a comparatively late text can hardly establish the conclusion. The money value of the importations, four hundred and twenty talents in a single voyage, must be viewed with suspicion.

Solomon's internal policy was one of justice and concentration of power and authority. In the administration of justice David's policy and reign of remissness and incoherence was improved upon by Solomon's stern administration and equanimity. He also took steps to make the royal authority stronger, more efficient, and more far-reaching, chiefly, as far as our records go, with a view to the collection of revenue and the maintenance of an army, which latter, apparently, he did not know how to use. We have a longer list of ministers. David's government included a commander-in-chief, a captain of the mercenary guard, a superintendent of forced labour, a recorder, a scribe and priests, and a "king's friend". In addition to these, Solomon had a superintendent of prefects and a master of the household. A more striking innovation was the division of the country into twelve districts, each under a royal representative or prefect, charged with the duty of provisioning the Court month by month. This division largely ignored the ancient tribes, and seems to show that the tribal system was passing away. Like most powerful rulers, Solomon signalized his reign by numerous splendid buildings, and for this purpose made extensive use of the corvee or forced labour. This again led to increased exertion of authority by the central government; and, incidentally, the complete subjugation of the Canaanites was shown by the fact that they had to bear the main portion of this burden. According to our present biblical data, Solomon went beyond any ancient monarch in the luxury of the harem. The enormous number of wives (700) and concubines (300) attributed to him must be made up by counting all the female slaves of the palace among the concubines. Even then the figures must be grossly exaggerated. Klostermann has wisely remarked that the two items are not in the right proportion, and he is inclined, and we think with good reason, to suspect that 70 wives and 300 concubines was the original statement of the sacred narrator.

The building operations of Solomon were on a large scale and of a remarkable magnitude and splendour. Besides the erection of a magnificent temple he succeeded in emulating the great kings of Western Asia and Egypt by building for himself in the city of Jerusalem, palaces, houses, and gardens. (See TEMPLE OF JERUSALEM.) In the erection of these, thirteen years were spent as well as a large sum of money, while thousands of labourers and craftsmen were employed. The royal residence embraced several distinct structures: (1) The house of the forest of Lebanon (so named from the quantity of cedar-wood used in it), which measured 100x50x30 cubits, and rested upon three rows (so Sept.) of pillars (each row being composed of fifteen columns) in addition to the external walls; (2) the porch of pillars, 50x30 cubits; (3) the porch of the throne (to which the last-mentioned may have served as an ante-chamber), forming a judgment hall where the king's throne of ivory and gold (III Kings, x, 18–20) was placed when he dispensed justice; (4) the king's private palace, surrounded by a court; (5) the palace of Pharaoh's daughter, probably included within the court just named. All these were built of costly hewn stone, the wood employed being cedar. Of Solomon's closing years nothing further is recorded. His reign is stated to have lasted forty years; but it is probable that this is merely a round number employed to indicate a considerable period (perhaps a full generation) and the actual duration of his rule is unknown. The year of his death may be approximately fixed between 938 and 916 B. C., a date arrived at from a consideration of the number of years assigned by the Bible to his successors, corrected by the chronology of certain Assyrian inscriptions.

In the view of the Hebrew historian, Solomon was unsurpassed for sagacity and knowledge. On his accession to the throne, it is related that Jehovah appeared to him at Gibeon in a dream, and bade him choose a boon; and the young king, instead of asking for long life or riches or success in war, prayed to be endowed with an understanding heart that he might judge the people committed to him. His request was granted; and riches and honour were added thereto, with a promise of length of days if he kept Jehovah's commandments. In consequence of this endowment, he was reputed to be wiser than all men; people flocked from all quarters to hear his wisdom; and the Queen of Sheba, in particular, came to prove him with hard questions. He was at once a philospher and a poet. He spake 3000 proverbs; his songs were 1005; and his utterances embraced references alike to the vegetable and the animal kingdoms. So great, indeed, was his reputation for practical insight that in later times the bulk of the Hebrew Gnomic literature was ascribed to him. In the light of after-events, it is impossible fully to endorse the historian's estimate of his sagacity, or even to clear his memory from imputations of criminal folly. To his oppressive exactions, in furtherance of his schemes of luxury and magnificence, was due the discontent which in the reign of his son broke his kingdom in two, and ultimately led to the destruction in detail of the Hebrew nation by the power of Assyria and Babylon. It is clear likewise that, besides being fond of display, he was voluptuous and sensual, and that he was led by his wives and concubines to worship strange gods.

The fact that Solomon's reign was passed in tranquillity, except for the attempts of Edom and Damascus to regain their independence, testifies to the care he displayed for the defence of the realm. That he showed no ambition to undertake foreign conquests redounds to his credit; after the exhausting wars of David the nation needed repose. And if he spent his people's wealth lavishly, his commercial policy may have helped to produce that wealth, and perhaps even given to the Jewish people that impulse towards trade which has been for centuries so marked a trait in their character. Nor can the indirect effects of the commerce he fostered be overlooked, inasmuch as it brought the people into closer contact with the outside world and so enlarged their intellectual horizon. And in two other respects he profoundly influenced his nation's after-history, and thereby mankind in general. In the first place, whatever the burdens which the construction of the temple entailed upon the generation that saw it erected, it eventually became the chief glory of the Jewish race. To it, its ritual, and its associations, was largely due the stronger hold which, after the disruption, the religion of Jehovah had upon Judah as contrasted with Northern Israel; and when Judah ceased to be a nation, the reconstructed temple became in a still higher degree the guardian of the Hebrew faith and hope. And secondly, the Book of Proverbs, though parts are expressly ascribed to other authors than Solomon, and even those sections which are attributed to him may be complex of origin, is nevertheless the product of Solomon's spirit and example, and much that it contains may actually have proceeded from him. And as Proverbs served as a model for many works of a similar character in later times, some of which, as has been said, were popularly ascribed to him (Ecclesiastes, Wisdom), the debt which the world of literature indirectly owes to the Hebrew king is considerable. The works named do not exhaust the list of productions with which Solomon's name is connected. The Song of Songs is attributed to him; two of the Canonical psalms are entitled his; and a book of Psalms of quite late date also goes by his name.

Gabriel Oussani.

Solomon, Psalms of, eighteen apocryphal psalms, extant in Greek, probably translated from a Hebrew, or an Aramaic original, commonly assigned to the first century B. C. They contain little of originality and are, for the most part, no more than *centos* drawn from the Psalms of David. In them Messianic hope is not bright; a gloom enshrouds that hope—the gloom caused by Pompey's siege of Jerusalem [see Apocrypha, I, (3)].

Solomon, Odes of, forty-two lyric poems, an apocryphal work, recently discovered and published (1909) by J. Rendel Harris. *History.*—The existence of these apocryphal odes was known by various references. The pseudo-Athanasian Synopsis Sanctæ Scripturæ (sixth century) lists the "Antilegomena" and adds *σὺν ἐκείνοις δὲ καὶ ταῦτα ἠρίμηνται . . . . . ψαλμοὶ καὶ ᾠδη Σολομῶντος*. The "Stichometry" of Nicephorus, Patriarch of Constantinople (beginning of ninth century), in like manner includes among the "Antilegomena", "the Psalms and Odes of Solomon containing 2100 *στίχοι*". It may be that these odes are the new psalm-book written for Marcion and excluded from the Muratorian Canon (end of second century). The *ψαλμοὶ ἰδιώτικοί*, prohibited as non-canonical by the Council of Laodicea (c. A. D. 360), if taken as "psalms of personal experience", might readily be the "Odes of Solomon". Lactantius (Div. instit., IV, xii) writes: "Solomon ita dicit: Infirmatus est uterus Virginis et accepit fœtum et gravata est, et facta est in multa miseratione mater virgo". In the MSS. of Lactantius the gloss is added *in Ode undevigesimo*, or *in Psalmo undevigesimo*. Ode XIX, verse 6, of the Syriac translation (discovered by Harris) reads: "(The Spirit) opened the womb of the Virgin, and she conceived and brought forth, and the Virgin became a Mother with many mercies". Lactantius is clearly citing a Latin translation of the Odes of Solomon, done by the beginning of the fourth century A. D. The Sahidic "Pistis Sophia", a Gnostic work of the Copts of the latter part of the third century, uses the "Odes of Solomon" as canonical Scripture. Harris (p. 81) thinks he has found traces of the Odes in Saints Irenæus and Clement of Alexandria. These important apocryphal writings had been lost for centuries till they were discovered and published (1909) by J. Rendel Harris, after they had lain on his shelves two years in a heap of Syriac MSS. brought from the neighbourhood of the Tigris. The Syriac MS. of the odes is of paper probably three or four hundred years old, contains the "Psalms of Solomon", the odes (incomplete in the beginning and the end), coarsely written, pointed here and there in the Nestorian manner, and at times with the Jacobite vowels.

Original Text.— (a) The language of the odes may have been Hebrew or Aramaic. Our Syriac version is probably from a Greek text, which in turn was a translation of an original Hebrew or Aramaic text. This opinion is warranted by the continual grouping of the odes with the "Psalms of Solomon", the constant reference of them to Solomon as author, and the Semitic spirit which equally permeates both sets of lyrics. (b) The time of composition would seem to have been not later than the middle of the second century, nor earlier than the beginning thereof. The *terminus ad quem* is set by the fact that there is some doubt as to the canonicity of the odes. Such doubt is scarcely intelligible, especially in the third-century author of "Pistis Sophia", unless the odes were composed before the middle of the second century. The *terminus a quo* is set by the content of Ode XIX. The painlessness of the Virgin birth (verse 7), though a logical corollary to the dogma of the supernatural character of the Divine birth of Jesus, is an idea which we find no trace of even so late as the Johannine writings. Whereas the absence of a midwife from the Virgin birth (verse 8) is a detail which clearly parallels these odes with the apocryphal Gospels of the Infancy and prohibits us from assigning Ode XIX to a period earlier than the beginning of the second century. (c) The author is considered by Harris and Hausleiter (Theol. Litbl., XXXI, no. 12) to have been a gentile in a Palestine Judeo-Christian community. Harnack thinks that the *Grundschrift* is Jewish and all Christian sentiments are the superadded work of a Christian interpolator. Cheyne (Hibbert Journal, Oct., 1910) agrees with Harnack.

Importance.—This latest find of Mr. Harris is one of the most important contributions ever made to extant apocryphal Biblical literature. The importance has been greatly exaggerated by Harnack. With his usual keen sense of sources, the Berlin professor scents here a unique source of the Johannine tradition; in the "Odes of Solomon", he tells us, we have the very "quarry wherefrom the Johannine blocks have been hewn" (p. 111). We have already given two ideas of Ode XIX which are most decidedly post-Johannine; others still could be given. The points common to both odes and the Fourth Gospel are striking,—for instance, adopted sonship founded on love of Jesus,—"because I love Him, the Son, I shall be a son" (Ode III, 9). Odes IV and VI have much of Christian thought. An hypothesis, hitherto unsuggested, yet far likelier than Harnack's wild quarry-dream, is that the odes are a new link, long lost, of the Johannine tradition; that they draw their Christian sentiment from St. John's Gospel. The traditional view in regard to the Apostolic authority of the Gospel is strengthened by a new witness,—a Judeo-Christian genius, who perhaps works over some pre-existing and baser Jewish metal. Whoever the author is, he very likely tried to combine the ideas of the Sapiential Books with those of the Fourth Gospel.

Harris, *The Odes and Psalms of Solomon now first published from the Syriac version* (Cambridge, 1909); *Ein Jüdisch-christliches Psalmbuch aus dem ersten Jahrhundert*, tr. from the Syrian by Flemming, edited and published by Harnack in *Texte und Untersuchungen*, XXXV (Leipzig, 1910), 4.

Walter Drum.

Solomon Islands, Prefecture Apostolic of the Northern, established on 23 May, 1898, by separation from the Vicariate Apostolic of New Pomerania (q. v.), includes the Islands of Ysabel, Choiseul, Bougainville, and all the islets under German protectorate (see Solomon Islands, Prefecture Apostolic of the Southern). In 1897 the islands were put under the jurisdiction of Mgr Broyer, Vicar Apostolic of Samoa, and in 1898 formed into a new prefecture under Mgr Joseph Forestier, who resides at Kieta, on Bougainville Island. In 1911 the mission contained: 3 churches; 3 stations; 10 Marist Fathers; 5 lay brothers; 7 Sisters of the Third Order of Mary; 2 Samoan catechists; 5 Catholic schools, with 140 pupils; 2 orphanages; and a few hundred Catholics. The Marist missionaries belong to the Province of Oceania, the superior of which resides at Sydney, New South Wales. Fever is very prevalent at the mission, and most of the fathers who went to the islands in 1898 have been carried off by disease.

Piolet, *Les missions françaises*, IV (Paris, 1902), 343–68; *Australasian Catholic Directory* (Sydney, 1911), 165.

Solomon Islands, Prefecture Apostolic of the Southern (Insularum Solomoniarum).—The Solomon Islands are in the Pacific Ocean, lying between 154° 40′ and 162° 30′ East long., and 5° and 11° South lat. The Spanish navigator Alvaro Mendaña de Neyra discovered the Islands of Ysabel, Guadalcanar, and San Christoval in 1567. Impressed by the natural riches of the islands, he called that group after King Solomon. Mass was celebrated by the Franciscan chaplain of the expedition, but the soldiers and sailors were not in sufficient number to organize a permanent settlement. Mendaña and his expedition returned to Peru, 26 July, 1569. On 5 April, 1595, Mendaña, with three hundred and sixty-eight emigrants, men, women, and children, started for the Solomon Islands, and landed at Santa Cruz, a small archipelago between the Solomon Islands and the New Hebrides. He died two months after; his widow Dona Ysabel, and Quiros, the chief pilot, took command of the expedition, and returned to Spain with the remainder of the colony. Thereafter for two centuries, the existence of the Solomon Islands came to be doubted, although seamen spoke of them as a rich and marvellous country. In 1781 M. Buaché, a French geographer, presented a paper to the Académie des Sciences, showing that the Solomon Islands discovered by the Spaniards should be sought about 12° 30′ South latitude, between Santa Cruz and New Guinea, and that those islands discovered by Carteret in 1767, Bougainville in 1768, and by Surville in 1769 were the same. D'Entrecasteaux found later that the surmises of the French geographer were correct, and many of the names bestowed by the Spaniards were restored. The group, which is the most important of the Pacific, lies about five hundred miles east of New Guinea and covers an area of 17,000 square miles. The names of the principal islands, proceeding from the south-east in a north-westerly direction, are San Christoval, Malaita, Guadalcanar, Florida, New Georgia, Vella Lavella, Ysabel, Choiseul, and Bougainville.

A Brief dated 19 July, 1844, and signed by Gregory XVI, entrusted the Society of Mary with the evangelization of the country which extends from New Guinea to the Gilbert group. Towards the end of October, 1845, Mgr Epalle, S.M., sailed from Sydney with eighteen missionaries. The ship sighted San Christoval on 1 December at the southern extremity of the Solomon group. Thanks to the kindness of the captain, the bishop was able to survey the coast for a few days, but on discovering that the position was not a central one, the party decided to steer for Ysabel. On 12 December they were lying at anchor in the Bay of Astrolabe. The vicar Apostolic, three priests, and a handful of sailors went ashore, to be met by the aborigines, who, at a signal from their chief, mortally struck Bishop Epalle and dangerously wounded a Marist Father and a seaman. The rest of the party escaped and interred the remains of Bishop Epalle in a lonely islet, where fifty-six years after Father Rouillac, S.M. was fortunate enough to recover and identify them. Mgr Collomb, S.M., embarked on the "Arche d'Alliance", a barque which had been specially fitted out for Catholic propaganda work by a French naval officer, Commander Marceau, and joined the missionaries at San Cristoval. Three Fathers had been killed and eaten by the cannibals, another succumbed to malarial fever. Determined not to uselessly court massacre any longer on that spot, they set out for Woodlark and Rook Islands, where the new bishop and some of his followers died. Of the eighteen who had left Port Jackson, ten years before, five only now survived. On the representations of Propaganda, the Society of Mary gave up the Solomons temporarily. In 1852 Propaganda committed the care of these unhappy islands to the Fathers of the Foreign Missions of Milan; but they also were obliged to leave. In 1897 Rome asked the Marist authorites to make a new effort towards the civilization of the Solomon tribes. Mgr Vidal, S.M. (Vicar Apostolic of Fiji), on 21 May, 1898, landed with three Fathers at Rua-Sura, near Guadalcanar. On 22 August, 1903, the mission was made a prefecture Apostolic, comprising the Islands of New Georgia, Florida, Guadalcanar, Malaita, San Christoval, the Santa Cruz archipelago, and all the islets under British protectorate. Rev. E. M. Bertreux, S.M., was appointed prefect Apostolic, and at the present time (1912) seventeen priests, ten sisters, and a lay brother labour with him in that portion of the Solomon group. They attend to nine principal churches, forty-eight chapels, nine schools, numbering each from twenty to seventy pupils. Several hundred natives have been baptized, and a fair proportion are sufficiently prepared to be admitted to the sacraments every month. The nuns teach eighty girls in three schools. About three hundred women are regular catechumens, and assemble every Sunday for instruction in Christian doctrine. There are about three thousand neophytes.

Solsona, Diocese of (Celsonensis), in Lerida, Spain, suffragan of Tarragona, erected by Clement VIII, 19 July, 1593, from the Dioceses of Urgel and Vich, suppressed in 1851, by virtue of the Concordat, after a vacancy of eleven years (the last bishop being

Mgr. de Tessada). It was to have been joined to Vich, but the union was not effected, and it has been governed since by an administrator Apostolic. It is bounded on the north and west by the See of Urgel, on the south by those of Lérida and Tarragona, and on the east by the Diocese of Vich. It contains 152 parishes, 330 priests and clerics, 259 churches, 16 chapels, and about 120,000 inhabitants. There are many religious communities—men: Religious of the Immaculate Heart of Mary (Solsona); Misioneros Paules (Bellpuig, Cervera); Cistercians of Senanque (Casserras, Tarrega); Mercedarians (Portell); Benedictines (Riner); Piarists (Tárrega)—nuns: Carmelites of Charity, 11 houses; Discalced Carmelite Tertiaries, 2 houses; Dominican Tertiaries, 6 houses; Sisters of the Holy Family of Urgel, Hermanitas de Ancianos desamparados, Sisters of the Holy Family, 1 house each. The cathedral of Solsona is dedicated to the Assumption of the Blessed Virgin; the apse, in Roman style, dates probably from the twelfth century, the façade is Baroque, and the nave and transept Gothic; the church contains the highly venerated Virgen de Solsona, an excellent specimen of Byzantine work. The present ordinary, Mgr. Amigo y Ferrer, titular Bishop of Thagaste, succeeded Mgr. Benlloch y Vivó, transferred on 6 Dec., 1906, to the See of Urgel. Solsona, the Xelsa of the Lacetani, Setelsis of the Romans, and later Selsona, lies about fifty miles from Lérida and Barcelona on the Rio Negro and Rio Cardoner. It was a military post of strategic importance and was frequently besieged. In 819 it was captured by the Moors; in 1520, a university, transferred later to Cervera, was established there. On 30 July, 1590, Solsona was made a city by Philip II. In the following century it rebelled against the Madrid Government and was captured, 7 Dec., 1655. In the War of Succession it sided with the archduke. The Carlists attacked it unsuccessfully in 1835 and 1837. Solsona has important manufactures of thread, lace, gloves, and hardware.

Battandier, *Annuaire pontifical catholique.*

A. A. MacErlean.

Somaliland, a triangular-shaped territory in the north-eastern extremity of Africa, projecting into the ocean towards the Island of Socotra; its apex is Cape Guardafui. It is bounded on the north by the Gulf of Aden, on the east by the Indian Ocean, on the west by the hills of Harrar and Shoa. It has an area of about 356,000 square miles, and a population of 1,000,000. The Greek navigators called it the "Country of aromatic gums"; at the present time it is called Somaliland from the name of the people who inhabit it. Its exploration was begun in the sixteenth century by Portuguese employed in the service of Ethiopia, was interrupted for a long time, and was recommenced in the nineteenth century by Burton, von der Decken, Brenner, Menges, Georges Révoil, etc. Our knowledge of it is still imperfect: the severity of the climate, aridity of the soil, lack of means of transportation, and above all the fanatical, treacherous, and thieving character of the natives have always made Somaliland one of the most inhospitable places of residence in the world. The country has more or less the appearance of a desert. The lower section bordering on the sea is naturally dry and barren and barely supports a poor and scanty flora. The mountain slopes have a fine vegetation, which includes the coffee-tree. The central region, called Ogaden, has an average elevation of 3000 feet and is a large plateau covered with steppes and affording pasturage. The chief rivers are the Daror, which empties into the Indian Ocean between Cape Guardafui and Ras Hafun, Webi, which, descending from the Harrar district, flows along the coast and loses itself in the ground, and Juba, which was explored in 1873 by the American Chaillé-Long who was in the service of the Khedive of Egypt.

The people called Somali, who have remained untouched by exterior influences, are remarkably homogeneous. Ethnographers connect them with the Ethiopic, Cushitic, or Hamitic group represented by the Ethiopians, or Abyssinians, Bedjas or Nubians, the Danakil, the Oromo or Gallas. Taken generally the Somali type is very interesting: slight in figure, with limbs well-proportioned, regular and remarkably delicate features, wavy hair, a fine black skin. They dress elegantly in the classic manner; the poorest know how to carry themselves with a naturalness, ease, and pride that are not lacking in dignity. They are intelligent, but fickle, and their industries are rudimentary; they disdain tilling the soil. They work chiefly as herdsmen, fishers, boatmen, traders; above all they prefer travel, adventure, and robbing strangers. They are, moreover, divided into a great number of clans forming three or four main groups which unite and separate according to the vicissitudes of the alliance and of war and have no national cohesion. Their language, which has been made known by the Capuchin missionaries, is related to that of the Gallas; it has incorporated a large number of Arabic idioms.

However, European influence has made itself felt in Somaliland since 1829 when the Red Sea was first used as a route to India; but it is only of late years that France, England, and Italy have taken actual possession of the Somali coast. France acquired Obok in 1882, then took the entire Bay of Tajurrah, and finished by taking Jibuti as the chief town of the "Protectorate of the French Coast of Somali", which contains an area of about 80 square miles. Jibuti has been united by a railway with the fertile districts of the Harrar and of Abyssinia. England is established to the east on the entire coast facing Arabia as far as Cape Guardafui; its principal towns are Zeila and Berbera. Lastly, Italy, called by England to these latitudes in 1894, occupies the principal towns of the eastern coast known under the name of Benadir (Arabic *Al Banader*, the gateways), where the Sultan of Zanzibar formerly maintained small garrisons: Obbia, Warsheik, Mogdishu, Merka, Barawa, Kisima-yu (the last name is of Swahilic origin, *Kisima* meaning wells, *yu* meaning upper). The Somali are all Mohammedans. Those of the north and of the towns on the coast are rigorous and fanatical observers of the principles of Islam and despise "the infidels" whether white or black. The Somali of the interior unite some of the beliefs and practices of ancient fetishism with their Mohammedan faith. There are, however, few populations of the world that are more difficult to bring to the Gospel. Properly speaking there is no Christianity in Somaliland. The few Christians, perhaps one or two hundred, that can actually be counted, have come from the schools and orphanages of the Catholic missions of Aden, Jibuti, and of Berbera. As Somaliland is divided into three zones of influence, French, English, and Italian, there are three distinct mission centres: the French Somali coast is under the care of the Vicariate Apostolic of the Gallas, which is entrusted to the French Capuchins of the Province of Lyons; English Somaliland is under the care of the Vicariate Apostolic of Arabia, also confided to the Capuchins; Italian Somaliland was detached in 1904 from the Vicariate Apostolic of Zanzibar, erected into the Prefecture Apostolic of Benadir, and confided to the ancient Order of the Holy Trinity or Trinitarians.

A. Le Roy.

Somaschi, name of a charitable religious congregation of regular clerics, founded in the sixteenth century by St. Jerome Emiliani with the motherhouse at Somasca (Venice), whence the name. For all particulars on development and history of the order see JEROME EMILIANI, SAINT. Following are the latest statistics, obtained from F. Gius. Landini of the Somaschi at the Curia Generalitia at Rome. The order counts in three provinces (Rome, Lombardy, and Liguria) 16 houses, all but one (in Bellinzona, Switzerland) in Italy, and about 180 members, of whom 100 are priests, 50 clerics, and 30 lay brothers. At Rome they have three houses: San Girolamo della Carità, residence of the general and one of the three novitiates (the other two being in Genoa and Somasca); Santa Maria in Aquiro with a parish and orphanage; San Alessio on the Aventine for blind boys. The congregation manages three colleges with classical and technical studies at Spello, Como, Nervi, and finally, including those already mentioned, three orphanages and five parishes.

LIVARIUS OLIGER.

Somerset, THOMAS, confessor, b. about 1530; d. in the Tower of London, 27 May, 1587; second son of Henry, second Earl of Worcester. He was committed to the Fleet, 10 June, 1562, "for translating an oratyon out of Frenche, made by the Cardinall of Lorraine", Charles de Guise, Archbishop of Reims, "and putting the same without authority in prynte". On 27 June, 1562, he was summoned before the Lords of the Council at Greenwich, who expected "an humble submission, for wante whereof, and for that he seamed to go about to justifye his cause, he was returned to the Flete, there to remaine untill he" should "have better considered of himself". After an imprisonment of close on twenty years he was released on bail, 28 Feb., 1581-82, to attend to legal business in Monmouthshire. On 2 May, 1582, he was too ill to travel, and was permitted to remain at liberty till he should recover. By 22 October, 1585, he was in the Tower on a charge of high treason. Being possessed of properties in Gloucestershire and Monmouthshire, he paid the costs of his imprisonment, and his name therefore is not to be found in the Tower Bills.

Song, RELIGIOUS (or SACRED), is the general designation given to the numerous poetical and musical creations which have come into existence in the course of time and are used in connexion with public Divine worship, but which are not included in the official liturgy on account of their more free and subjective character. It has its origin in the desire on the part of the faithful, a desire ever encouraged but always guided and controlled by the Church, to participate actively in the public religious ceremonies of the Church. While the psalms were sung in traditional fashion during the early Eucharistic celebrations at the public meetings, and the love-feasts, or agapæ, of the early Christians, there soon sprang up the custom of improvising songs, participated in by the whole assembly, which, though religious in burden, by their spontaneity and freedom stood in contrast to the psalms and other lyric parts of the Holy Scripture in use at the Eucharistic celebration. These creations in course of time lost their spiritual character, dignity, and fervour as the institution which gave them birth and of which they formed an important part degenerated in character, departed from its original purpose, and became an occasion for pleasure and dissipation. The songs thus originated continued in use long after the institution had lost official sanction, and have become known in history by the name of the institution which gave rise to them.

As Christianity spread, there was an ever greater increase of spontaneous creations of this kind originating in the desire on the part of their authors to get nearer to the people and to convey to them by this means instruction as well as edification. As early as the fourth century there had come into use so many chants, hymns, and songs, in various parts of the Christian world, and abuses and aberrations had become so general, that the Council of Laodicea (360–381) forbade the singing of any text not taken from Holy Scripture. The hymns by St. Hilary and St. Ambrose of Milan (especially the latter)—which now form a part of the liturgy—had for their original purpose the instruction of the people by having them sing in striking metrical form and to vigorous melodies the fundamental truths of religion. The sequences and tropes which came into existence with such exuberance in the early Middle Ages, while popular in form, sprang directly from the liturgy and always partook of its character. In those regions where the liturgical language remained at the same time the tongue of the people, at least in a modified form, participation in the official chant of the Church on the part of all was general for many centuries, and in consequence the influence of the spirit of the liturgy and its music prevented the early development of a more subjective religious poetry and music than was to be the case in later times in other regions. This is probably the reason why in Italy, Spain, and the other Latin countries the religious song in the vernacular has never taken root.

While this was also true of France, for a considerable time, we find there an early and rapid growth of songs of every kind, bearing a strong national character. Every important event in the domestic and religious life of the people soon found expression in song. The festivals of the Church inspired them and became by these means in turn impressed upon the popular imagination. One of these characteristically French songs is the *noël*, or Christmas song, which had great vogue in the eleventh century, a vogue which reached its height in the seventeenth century and has survived in a certain form, even to our day. The *noël*, the words of which were often paraphrases of liturgical texts, set to melodies naïve and pastoral in character, was popular in every section of the kingdom and sung in every dialect in use. Processions, pilgrimages, and especially the mystery and miracle plays gave rise to many forms of songs. The troubadours in the south and trouvères in the north exerted great influence on the development and propagation not only of secular but of religious songs as well. Among the many forms in use was the complaint, a song in narrative form of which the "Story of the Resurrection" (O filii et filiæ) is a prominent type. The pastorale was another form which flourished from the twelfth to the sixteenth century, sometimes having religious texts and then again voicing secular sentiments. With the sixteenth century began the custom of substituting secular airs in use at the time for the melodies to which the sacred texts of the *noëls*, complaints, etc., had thus far been sung; they were not only modelled on the Gregorian chant but had a distinctively nïave simple character. This substitution sometimes involved even the partial taking over of the profane text as well. This was the beginning of the decadence which finally, in some places, reached the point where *chansons de galanterie*, or love songs, were completely transformed into *cantiques*, or religious songs, by merely substituting the name of the Blessed Virgin or that of Jesus Christ, for the name of the beloved one mentioned in the original. The modern French *cantique*, which has taken the place of the traditional religious songs, is sentimental, quasi-military, and savours of the world, plainly showing the influence of the favourite French musical form, the opera.

On account of their total unfamiliarity with the Latin language, the Germanic races were prevented from participating in the liturgical chant introduced with Christianity itself by their first missionaries. At most they joined in singing the Kyrie Eleison, and that in the form of a refrain. This primitive practice became so general that it survived long after songs in the vernacular had come into universal use. The latter would frequently end with the above invocation, which was gradually abbreviated into "Kyrieleis". The songs or hymns in the vernacular were themselves called later on "Kyrieleis" and "Leisen". The word "lay", which designates a vast song literature of a whole subsequent period, is derived from "Leisen". To wean their neophytes from pagan beliefs and practices, the early missionaries were wont to make use of melodies familiar to the people, apply Christian texts to them, and turn them into effective means of instruction. This practice soon led the naturally emotional and subjective race to give vent to their growing religious feelings in words and melodies of their own invention, so that as early as the latter part of the ninth century words in the vernacular were mixed with those of liturgical chants, the former forming a sort of glossary to the latter. From this time on there is a constant growth in songs of all kinds in honour of Jesus Christ, the Blessed Virgin, the saints, inspired by the great feasts; songs called forth by national events, the Crusades, and, as elsewhere, processions and pilgrimages, many of them created and all of them fostered by the minnesingers and poets of the day. The texts in the vernacular and the melodies originated from the earliest days of Christianity up to the Reformation in Germanic countries; they were usually sung by the whole congregation, and belong to what is most sturdy and profound in sentiment and expression in this field. The fact that some 1500 melodies, antedating the Reformation, have come down to us gives us some idea of the hold the religious song had upon the people. The Reformers, like the Arians of the fourth century, availed themselves of the love for song on the part of the people, and converted it into an insidious and powerful means for the dissemination of their erroneous doctrines. The impetus thus given to singing exclusively in the vernacular by the leaders of Protestantism was so widespread and powerful that it soon reacted upon those who remained loyal to the faith of their fathers. It resulted not only in the creation of a large number of new hymn books but also in the custom, which has not yet been rooted up in all places. of singing in German during liturgical services.

A number of influences have contributed to the degeneration of the hymn in the vernacular which reached its limit in the eighteenth century. The most potent factors in its decay were the growth of Rationalism affecting even those within the fold and the ever-increasing ascendancy of secular music, resulting in the seventeenth century in the abandonment of the Gregorian modes, upon which practically all hymn melodies had been modelled, and the substitution of the modern keys. With the revival of the Catholic spirit at the beginning of the nineteenth century came a return to early ideals. Poets and musicians of the right stamp, both clerical and lay, inspired by the spirit of the Church and later fostered by the powerful agency of the Saint Cecilia Society, have restored to the Catholic people of German-speaking countries a song literature in the vernacular tongue, which is as rich in variety as it is sturdy in its expression of faith. In France a vigorous effort is being made, as part of the Gregorian restoration, to reconstruct a sound and wholesome taste among the people by the republication and propagation of proses, *rhythmes*, sequences, and other chants in honour of Jesus Christ, the Blessed Virgin, the saints, or the church festivals, written in one or other of the Gregorian modes, and in vogue during the ages of simple and lively faith. Competent church musicians and Gregorianists are successfully creating similar new melodies to standard texts. Their use is becoming widespread.

There is very little trace of the existence in early times in most English-speaking countries of religious songs in the vernacular. The missionaries sent from Rome in the sixth century introduced the liturgical chant into the British Isles and seem to have made but little effort to utilize any characteristically national melodies already existing. Unlike their colleagues in regions across the Channel, the gleemen, harpers, and bards of old continued to cultivate chiefly the secular field, and their productions and activity had not much influence on the creation and development of a national religious song literature, nor does Celtic musical and poetical culture seem to have been directed into that channel. While polyphonic music had attained a highly flourishing state before the sixteenth century, it was only at the time of the Reformation that singing in the vernacular assumed greater importance in England. As in the other Protestant countries the song in the vernacular became a great factor in British national worship. On account of most unpropitious conditions during several hundred years English-speaking Catholics had created but very little of any permanent value until, about the middle of the last century, a new era was inaugurated by religious poets like Faber and Newman. Unfortunately their lyrics have as yet seldom found adequate musical interpretation. What is true of transatlantic English-speaking Catholics holds good in a greater degree in the United States of America. Partly on account of the scarcity of suitable and worthy hymns in the English vernacular and partly on account of incompetency on the part of those who undertake to supply the deficiency, the taste of the people has been formed by trivial and superficial tunes, generally echoes of the opera, the shallow popular air, and even the drinking-song set to sentimental and often trivial texts. Of late years, however, several collections of hymns in the vernacular, indicating a return to what is best in religious poetry and in popular sacred song, have come into existence and are gradually making their way into general use.

Joseph Otten.

Songish Indians.—A tribe of some importance formerly holding the south coast of Vancouver Island, B. C., in the immediate vicinity of the present Victoria and now gathered upon small reservations at Songhees, Cheerno (Beecher Island), Discovery Island, and Esquimalt, within their former territory, and under the Cowichan agency. Their proper name is Lkungen, the other being a corruption of Stsangés, the name of a former principal division. They are of Salishan linguistic stock and speak the same language as the Sanetch and Sooke of Vancouver Island and the Czalam and Lummi of Washington. From 1000 souls they have wasted away from small-pox and diseases induced by dissipation on the first advent of the whites about fifty years ago. In 1895 they still numbered 215, but by 1910 had decreased to 171, and within another generation will probably cease to exist. Although visited by several of the early voyagers their first regular communication with the whites dates from the establishment of Fort Camoby the Hudson's Bay Company in 1843 at the present site of Victoria and close to the village of the principal Songish chief. The secular priest, Father John B. Bolduc (d. 1889), already known for his missionary work among the tribes of Puget Sound, had been requested to accompany the expedition, and through his good offices a friendly meeting was arranged with the Indians. On Sunday, 19 March, the whole tribe thronged to attend Mass and a sermon, which was held in a temporary chapel, after which over one hundred children were baptized. No continuous work was undertaken until the arrival of the Oblate vicar, Father L. J. d'Herbomez, who established a residence at Esquimalt in 1857 and was joined two years later by several Sisters of Saint Ann. In 1859 the distinguished Oblate missionary Father Casimir Chirouse, beloved by all the tribes of Puget Sound, arrived from the Columbia Country, and was soon joined by two younger workers of the same order, almost equally noted later, Fathers Pierre P. Durieu and Léon Fouquet. Protestant work was begun by the Episcopalian Rev. John B. Good in 1861. In the meantime the discovery of gold on the mainland had resulted in an influx of miners and dissolute adventurers, which made Victoria a centre of dissipation and for a long time virtually nullified missionary effort. In 1862 a small-pox epidemic swept over the whole region and terribly wasted all the tribes. Of the whole number two-thirds are now Catholic, most of the others being Methodists. They are reported as industrious and prosperous farmers, fishermen, and labourers, moral and fairly temperate.

In their primitive condition the Songish had the clan system, with twelve clans, each of which had its own fishing and hunting territory. Chiefship was hereditary in the male line and they had the three castes of nobles, commons, and slaves. Salmon-fishing and berry-picking were the chief dependence for subsistence. They lived in large rectangular communal houses of cedar planks, adorned with carved and jointed totem posts. They had large dug-out canoes of cedar, and wove blankets from dogs' hair, duck down, and the wool of the mountain goat. They had the potlatch or ceremonial gift distribution, common to all the tribes of the north-west coast. Head flattening was also practised. There were many curious customs, beliefs, and taboos concerning births, puberty, marriage, and death. The dead were buried in canoes or boxes upon the surface of the ground, or laid away in trees. Slaves were frequently sacrificed at the grave. The names of the dead were never mentioned. As with other tribes of the region their culture hero was the Great Transformer. The religion was animism, each man having his protecting dream spirit, and the tribal life and ceremonial were dominated by two secret societies.

Song of Solomon. See Canticle of Canticles.

Sonnius, Franciscus, theologian, b. at Zon in Brabant, 12 August, 1506; d. at Antwerp, 30 June, 1576, His real name was Van de Velde, but in later years he called himself after his native place. He went to school at Bois-le-Duc and Louvain, and afterwards studied medicine for a time, then theology; in 1536 he received the licentiate and in 1539 the doctorate in theology. After labouring for a short time as a parish priest at Meerbeek and Louvain he became professor of theology at Louvain in 1544, and attended the Council of Trent in 1546, 1547, and 1551. He was sent to the council first by Bishop Karl de Croy van Doornik, then by Maria of Hungary, the regent of the Netherlands. In 1557 he also took an active part in the religious disputation of Worms. Not long after this Philip II sent him to Rome to negotiate with Paul IV in regard to ecclesiastical matters in the Netherlands, especially as to increasing the number of dioceses and separating the Belgian monasteries from the German, as in the latter heresy was rapidly spreading. In acknowledgment of his successful labours he was appointed Bishop of Bois-le-Duc in 1566, but he was not consecrated until two years later, by Cardinal Granvella. In 1569 he was appointed the first Bishop of Antwerp and in the following year came into possession of his diocese. He did much to strengthen the Church, founding an ecclesiastical court and personally visiting all the parishes of his diocese. He proclaimed at once the decisions of the Council of Trent and established regular meetings of the deaneries. As Bishop of Antwerp, he held two diocesan synods, setting an example that exerted influence far beyond the boundaries of the Archbishopric of Mechlin. He showed particular zeal in combatting the errors of Calvinism and wrote for this purpose a clear summary of its teachings for the use of the clergy, under the title "Succincta demonstratio errorum confessionis Calvinistæ recenter per has regiones sparsæ" (Louvain, 1567). He also wrote a textbook of dogmatics: "Demonstrationum religionis christianæ libri tres" (Antwerp, 1564), to which in 1577, after his death, a fourth book was added, "De sacramentis". In 1616 the cathedral chapter and the city erected a monument to him.

FRANCISCVS SONNIVS, PRIMVS ANTVERPIENSIVM EPISCOPVS.

En nouus hic tenebras dispellit Phœbus ab orbe
Belgarum, hinc nomen Belgica lingua dedit.
Eia age, pressa diu, Virtus animosa resurge,
Atra nec hæreseos nubila commoueant.
An verò, Impietas didicit sic temnere Solem,

Patricius Schlager.

Son of God. In the Old Testament.—The title "son of God" is frequent in the Old Testament. The word "son" was employed among the Semites to signify not only filiation, but other close connexion or intimate relationship. Thus, "a son of strength" was a hero, a warrior, "son of wickedness" a wicked man, "sons of pride" wild beasts, "son of possession" a possessor, "son of pledging" a hostage, "son of lightning" a swift bird, "son of death" one doomed to death, "son of a bow" an arrow, "son of Belial" a wicked man, "sons of prophets" disciples of prophets, etc. The title "son of God" was applied in the Old Testament to persons having any special relationship with God. Angels, just and pious men, the descendants of Seth, were called "sons of God" (Job, i, 6; ii, 1; Ps. lxxxviii, 7; Wisd., ii, 13; etc.). In a similar manner it was given to Israelites (Deut., xiv, 1); and of Israel, as a nation, we read: "And thou shalt say to him: Thus saith the Lord: Israel is my son, my firstborn. I have said to thee: Let my son go, that he may serve me" (Ex., iv, 22 sq.).

The leaders of the people, kings, princes, judges, as holding authority from God, were called sons of God. The theocratic king as lieutenant of God, and especially when he was providentially selected to be a type of the Messias, was honoured with the title "son of God". But the Messias, the Chosen One, the Elect of God, was *par excellence* called the Son of God (Ps. ii, 7). Even Wellhausen admits that Ps. ii is Messianic (see Hast., "Dict. of the Bible", IV, 571). The prophecies regarding the Messias became clearer as time went on, and the result is ably summed up by Sanday (*ibid.*): "The Scriptures of which we have been speaking mark so many different contributions to the total result, but the result, when it is attained, has the completeness of an organic whole. A Figure was created—projected as it were upon the clouds—which was invested with all the attributes of a person. And the minds of men were turned towards it in an attitude of expectation. It makes no matter that the lines of the Figure are drawn from different originals. They meet at last in a single portraiture. And we should never have known how perfectly they meet if we had not the New Testament picture to compare with that of the Old Testament. The most literal fulfilment of prediction would not be more conclusive proof that all the course of the world and all the threads of history are in one guiding Hand." The Messias besides being the Son of God was to be called Emmanuel (God with us), Wonderful, Counsellor, God the Mighty, the Father of the world to come, Prince of Peace (Is., viii, 8; ix, 6) (see MESSIAS).

IN THE NEW TESTAMENT.—The title "the Son of God" is frequently applied to Jesus Christ in the Gospels and Epistles. In the latter it is everywhere employed as a short formula for expressing His Divinity (Sanday); and this usage throws light on the meaning to be attached to it in many passages of the Gospels. The angel announced: "He shall be great, and shall be called the Son of the most High . . . the Holy which shall be born of thee shall be called the Son of God" (Luke, i, 32, 35). Nathaniel, at his first meeting, called Him the Son of God (John, i, 49). The devils called Him by the same name, the Jews ironically, and the Apostles after He quelled the storm. In all these cases its meaning was equivalent to the Messias, at least. But much more is implied in the confession of St. Peter, the testimony of the Father, and the words of Jesus Christ.

Confession of St. Peter.—We read in Matt., xvi, 15, 16: "Simon Peter answered and said: Thou art Christ, the Son of the living God. And Jesus answering, said to him: Blessed art thou, Simon Bar-Jona: because flesh and blood hath not revealed it to thee, but my Father who is in heaven." The parallel passages have: "Thou art the Christ" (Mark, viii, 29), "The Christ of God" (Luke, ix, 20). There can be no doubt that St. Matthew gives the original form of the expression, and that St. Mark and St. Luke in giving "the Christ" (the Messias), instead, used it in the sense in which they understood it when they wrote, viz. as equivalent to "the incarnate Son of God" (see Rose, VI). Sanday, writing of St. Peter's confession, says: "the context clearly proves that Matthew had before him some further tradition, possibly that of the Logia, but in any case a tradition that has the look of being original" (Hastings, "Dict. of the Bible"). As Rose well points out, in the minds of the Evangelists Jesus Christ was the Messias because He was the Son of God, and not the Son of God because He was the Messias.

Testimony of the Father.—(1) At the Baptism.—"And Jesus being baptized, forthwith came out of the water: and lo, the heavens were opened to him: and he saw the Spirit of God descending as a dove, and coming upon him. And behold a voice from heaven, saying: This is my beloved Son, in whom I am well pleased" (Matt., iii, 16, 17). "And there came a voice from heaven: Thou art my beloved Son; in thee I am well pleased" (Mark, i, 11; Luke, iii, 22). (2) At the Transfiguration.—"And lo, a voice out of the cloud, saying: This is my beloved Son, in whom I am well pleased: hear ye him" (Matt., xvii, 5; Mark, ix, 6; Luke, ix, 35). Though Rose admits that the words spoken at the Baptism need not necessarily mean more than what was suggested by the Old Testament, viz. Son of God is equal to the Messias, still, as the same words were used on both occasions, it is likely they had the same meaning in both cases. The Transfiguration took place within a week after St. Peter's confession. and the words were used in the meaning in which the three disciples would then understand them; and at the Baptism it is probable that only Christ, and perhaps the Baptist, heard them, so that it is not necessary to interpret them according to the current opinions of the crowd. Even so cautious a critic as the Anglican Professor Sanday writes on these passages: "And if, on the occasions in question, the Spirit of God did intimate prophetically to chosen witnesses, more or fewer, a revelation couched partly in the language of the ancient Scriptures, it would by no means follow that the meaning of the revelation was limited to the meaning of the older Scriptures. On the contrary, it would be likely enough that the old words would be charged with new meaning—that, indeed the revelation . . . would yet be in substance a new revelation. . . . And we may assume that to His (Christ's) mind the announcement 'Thou art my Son' meant not only all that it ever meant to the most enlightened seers of the past, but, yet more, all that the response of His own heart told Him that it meant in the present. . . . But it is possible, and we should be justified in supposing—not by way of dogmatic assertion but by way of pious belief—in view of the later history and the progress of subsequent revelation, that the words were intended to suggest a new truth, not hitherto made known, viz. that the Son was Son not only in the sense of the Messianic King, or of an Ideal People, but that the idea of sonship was fulfilled in Him in a way yet more mysterious and yet more essential; in other words, that He was Son, not merely in prophetic revelation, but in actual transcendent fact before the foundation of the world" (Hastings, "Dict. of the Bible").

Testimony of Jesus Christ.—(1) The Synoptics.—The key to this is contained in His words, after the Resurrection: "I ascend to my Father and to your Father" (John, xx, 17). He always spoke of *my* Father, never of *our* Father. He said to the disciples: "Thus then shall *you* pray: Our Father", etc. He everywhere draws the clearest possible distinction between the way in which God was His Father and in which He was the Father of all creatures. His expressions clearly prove that He claimed to be of the same nature with God; and His claims to Divine Sonship are contained very clearly in the Synoptic Gospels, though not as frequently as in St. John.

"Did you not know, that I must be about my father's business?" (Luke, ii, 49); "Not every one that saith to me, Lord, Lord, shall enter into the kingdom of heaven: but he that doth the will of my Father who is in heaven, he shall enter into the kingdom of heaven. Many will say to me in that day: Lord, Lord, have not we prophesied in thy name, and cast out devils in thy name, and done many miracles in thy name? And then will I profess unto them, I never knew you: depart from me you, that work iniquity" (Matt., vii, 21–23). "Everyone therefore that shall confess me before men, I will also confess him before my Father who is in heaven" (Matt., x, 32). "At that time Jesus answered and said: I confess to thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them to little ones. Yea, Father; for so hath it seemed good in thy sight. All things are delivered to me by my Father. And no one knoweth the Son, but the Father: neither doth any one know the Father, but the Son, and he to whom it shall please the Son to reveal *him*. Come to me, all you that labour, and are burdened, and I will refresh you" (Matt., xi, 25–30; Luke, x, 21, 22). In the parable of the wicked husbandmen the son is distinguished from all other messengers: "Therefore having yet one son, most dear to him; he also sent him unto them last of all, saying: They will reverence my son. But the husbandmen said one to another: This is the heir; come let us kill him" (Mark, xii, 6). Compare Matt., xxii, 2, "The kingdom of heaven is likened to [illegible] king, who made a marriage for his son." In Matt., xvii, 25, He states that as Son of God He is free from the temple tax. "David therefore himself calleth him Lord, and whence is he then his son?" (Mark, xii, 37). He is Lord of the angels. He shall come "in the clouds of heaven with much power and majesty. And he shall send his angels" (Matt., xxiv, 30, 31). He confessed before Caiphas that he was the Son of the blessed God (Mark, xiv, 61–2). "Going therefore, teach ye all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost . . . and behold I am with you all days, even to the consummation of the world" (Matt., xxviii, 19, 20).

The claims of Jesus Christ, as set forth in the Synoptic Gospels, are so great that Salmon is justified in writing (Introd. to New Test., p. 197): "We deny that they [Christ's utterances in the Fourth Gospel] are at all inconsistent with what is attributed to Him in the Synoptic Gospels. On the contrary, the dignity of our Saviour's person, and the duty of adhering to Him, are as strongly stated in the discourses which St. Matthew puts into His mouth as in any later Gospel. . . . The Synoptic Evangelists all agree in representing Jesus as persisting in this claim [of Supreme Judge] to the end, and finally incurring condemnation for blasphemy from the high-priest and the Jewish Council. . . . It follows that the claims which the Synoptic Gospels represent our Lord as making for Himself are so high . . . that, if we accept the Synoptic Gospels as truly representing the character of our Lord's language about Himself, we certainly have no right to reject St. John's account, on the score that he puts too exalted language about Himself into the mouth of our Lord."

(2) St. John's Gospel.—It will not be necessary to give more than a few passages from St. John's Gospel. "My Father worketh until now; and I work. . . . For the Father loveth the Son, and sheweth him all things which he himself doth: and greater works than these will he shew him, that you may wonder. For as the Father raiseth up the dead, and giveth life: so the Son also giveth life to whom he will. For neither doth the Father judge any man, but hath given all judgment to the Son. That all may honour the Son, as they honour the Father" (v, 17, 20–23). "And this is the will of my Father that sent me: that everyone who seeth the Son, and believeth in him, may have life everlasting, and I will raise him up in the last day" (vi, 40). "Father, the hour is come, glorify thy Son, that thy Son may glorify thee. . . . And now glorify thou me, O Father, with thyself, with the glory which I had, before the world was, with thee" (xvii, 1, 5).

(3) St. Paul.—St. Paul in the Epistles, which were written much earlier than most of our Gospels, clearly teaches the Divinity of Jesus Christ, and that He was the true Son of God; and it is important to remember that his enemies the Judaizers never dared to attack this teaching, a fact which proves that they could not find the smallest semblance of a discrepancy between his doctrines on this point and that of the other Apostles.

C. Aherne.

Son of Man.—In the Old Testament "son of man" is always translated in the Septuaginst without the article as *υἱὸς ἀνθρώπου*. It is employed (1) as a poetical synonym for man, or for the ideal man, e. g. "God is not as a man, that he should lie, nor as a son of man, that he should be changed" (Num., xxiii, 19). "Blessed is the man that doth this and the son of man that shall lay hold on this" (Is., lvi, 2). "Let thy hand be upon the man of thy right hand: and upon the son of man whom thou hast confirmed for thyself" (Ps. lxxix, 18). (2) The Prophet Ezechiel is addressed by God as "son of man" more than ninety times, e. g. "Son of man, stand upon thy feet, and I will speak to thee" (Ezech., ii, 1). This usage is confined to Ezechiel except one passage in Daniel, where Gabriel said: "Understand, O son of man, for in the time of the end the vision shall be fulfilled" (Dan., viii, 17).

(3) In the great vision of Daniel, after the appearance of the four beasts, we read: "I beheld therefore in the vision of the night, and lo, one like a son of man came with the clouds of heaven, and he came even to the Ancient of days: and they presented him before him. And he gave him power, and glory, and a kingdom: and all peoples, tribes, and tongues shall serve him: his power is an everlasting power that shall not be taken away: and his kingdom shall not be destroyed" (vii, 13 sq.). The person who appears here as son of man is interpreted by many non-Catholics as representing the Messianic kingdom, but there is nothing to prevent the passage from being taken to represent not only the Messianic kingdom, but *par excellence* the Messianic king. In the explanation, verse 17, the four beasts are "four kings" R.V., not "four kingdoms" as translated by D. V., though they appear to signify four kingdoms as well, for the characteristics of oriental kingdoms were identified with the characters of their kings. So when it is said in verse 18: "But the saints of the most high God shall take the kingdom: and they shall possess the kingdom for ever and ever", the king is no more excluded here than in the case of the four beasts. The "son of man" here was early interpreted of the Messias, in the Book of Henoch, where the expression is used almost as a Messianic title, though there is a good deal in Drummond's argument that even here it was not used as a Messianic title notwithstanding the fact that it was understood of the Messias. It has to be added that in the time of Christ it was not very widely, if at all, known as a Messianic title.

The employment of the expression in the Gospels is very remarkable. It is used to designate Jesus Christ no fewer than eighty-one times—thirty times in St. Matthew, fourteen times in St. Mark, twenty-five times in St. Luke, and twelve times in St. John. Contrary to what obtains in the Septuagint, it appears everywhere with the article, as *ὁ υἱὸς τοῦ ἀνθρώπου*. Greek scholars are agreed that the correct translation of this is "the son of man", not "the son of the man". The possible ambiguity may be one of the reasons why it is seldom or never found in the early Greek Fathers as a title for Christ. But the most remarkable thing connected with "the Son of Man" is that it is found only in the mouth of Christ. It is never employed by the disciples or Evangelists, nor by the early Christian writers. It is found once only in Acts, where St. Stephen exclaims: "Behold, I see the heavens opened, and the Son of Man standing on the right hand of God" (vii, 55). The whole incident proves that it was a well-known expression of Christ's. Though the saying was so frequently employed by Christ, the disciples preferred some more honorific title and we do not find it at all in St. Paul nor in the other Epistles. St. Paul perhaps uses something like an equivalent when he calls Christ the second or last Adam. The writers of the Epistles, moreover, probably wished to avoid the Greek ambiguity just alluded to.

The expression is Christ's, in spite of the futile attempts of some German Rationalists and others to show that He could not have used it. It was not invented by the writers of the Gospels to whom it did not appear to be a favourite title, as they never use it of Christ themselves. It was not derived by them from what is asserted was a false interpretation of Daniel, because it appears in the early portions of the public ministry where there is no reference to Daniel. The objection that Christ could not have used it in Aramaic because the only similar expression was *bar-nasha*, which then meant only "man", *bar* having by that time lost its meaning of "son", is not of much weight. Only little is known of the Aramaic spoken in Palestine in the time of Christ; and as Drummond points out special meaning could be given to the word by the emphasis with which it was pronounced, even if *bar-nasha* had lost its primary meaning in Palestine, which is not at all proved. As the same writer shows, there were other expressions in Aramaic which Christ could have employed for the purpose, and Sanday suggests that He may have occasionally spoken in Greek.

The early Fathers were of the opinion that the expression was used out of humility and to show Christ's human nature, and this is very probable considering the early rise of Docetism. This is also the opinion of Cornelius a Lapide. Others, such as Knabenbauer, think that He adopted a title which would not give umbrage to His enemies, and which, as time went on, was capable of being applied so as to cover His Messianic claims—to include everything that had been foretold of the representative man, the second Adam, the suffering servant of Jehovah, the Messianic king.

C. AHERNE.

Sonora, DIOCESE OF (DE SONORA), in the Republic of Mexico, suffragan of the Archdiocese of Durango. Its area is that of the state of the same name, 76,619 sq. miles, and its population (1910) 262,545. The bishop and the governor of the state reside at Hermosillo, a city situated 681 ft. above sea level, containing (1910) about 14,518 inhabitants. The Gospel was first preached in the territory of the Diocese of Sonora by the celebrated Father Niza, who accompanied the daring expeditions of the first explorers and conquerors of Mexico. The Spaniards settled at different places in this section; they evangelized the numerous tribes who lived in that region in the beginning of the seventeenth century, after having established the new See of Durango, to which all these lands were given. The Jesuits, who were assigned the task of converting to Christianity the people of these lands, founded the famous missions of Rio Yaqui, Rio Mayo, and Upper and Lower Pimeria. Notable among these priests was the celebrated Father Kino (q. v.). When the Jesuits were expelled from all the Spanish colonies (1767) they had the following residences: Mission of the Upper and Lower Pimeria (Guazaves, Aconche, Mátape, Oposura, Movas, S. Ignacio, Arizpe, Aribechi, Batuco, Onavas, Cucurupe, Cumuripa, Saguaripa, Sta Maria Soanca, Tubutama, Odope, Saric, Tecoripa, Ures, Caborca, Babispe, Baca de Guachi, Cuquiarachi, Onapa, Banamichi); S. Javier del Bac, Santa Maria Basoraca, and Guebabi, which were then in the territory now belonging to the United States; Mission del Rio Yaqui (Huirivis, Belem, Rahum, Torim, Bacum); Mission del Rio Mayo (Santa Cruz, Caamoa, Nabojoa, Conicari, Batacosa).

On 7 May, 1779, Pius VI established the Diocese of Sonora, to which belonged at that time the present states of Sinaloa and Sonora and the two Californias (Upper and Lower). It was suffragan of the then immense Archdiocese of Mexico. This territory was divided in 1840 when the See of S. Francisco de California was founded. In 1863 it ceased to be a suffragan of Mexico and became suffragan of the new metropolitan see established at Guadalajara. In 1873 it was separated from Lower California, which became a vicariate Apostolic, and in 1883, when the See of Sinaloa was created, the See of Sonora was reduced to its present limits. In 1891 Leo XIII, by the Bull *Illud in Primis*, separated this See from the ecclesiastical Province of Guadalajara and made it a suffragan of the new Archdiocese of Durango. The bishop's residence was first situated in the city of Arizpe, but owing to the uprising of the Indians it was removed to Alamos and later to Culiacan, the present capital of the State of Sinaloa. When the new See of Sinaloa was created the Bishop of Sonora made his residence at Hermosillo.

This diocese has 1 seminary with 10 students, 17 parochial schools, 2 Catholic colleges with about 700 students. Protestants have founded 11 churches. Among the 221,000 inhabitants a great number of Indians from the Seris, Yaquis, Apaches, Papagos, and other tribes are to be found; these have unfortunately returned in large numbers to barbarism since the missionaries abandoned them. Few Apaches and Papagos Indians remain in the Sonora territory. The Seris Indians are more numerous and live in the large island of Tiburon in the Gulf of California and in a large part of the territory along the banks of the Rio Sonora. Those who live on the island are savage and opposed to civilization, while those on the continent have formed agricultural colonies and are quite subdued since the last uprising. As to the Yaqui Indians, the Federal Government of Mexico has had some serious trouble with them. It appears, however, that had they not been deprived of their lands a more peaceful people could hardly be found.

Soothsaying. See DIVINATION.

Sophene, a titular see, suffragan of Melitene in Armenia Secunda. In the sixth century "Notitiæ episcopatuum" of Antioch, Sophene is a suffragan of Amida in Mesopotamia ("Echos d'Orient", X, 145). Justinian in a letter to Zetas, "magister militum" of Armenia and Pontus Polemoniacus, grants him jurisdiction over various provinces, among them Sophene and Sophenene, "in qua est Martyropolis" ("Codex. Just.", I, 29, 5). At the beginning of the seventh century George of Cyprus ("Descriptio orbis romani", ed. Gelzer, 49) mentions Sophene in Armenia Quarta, and we know elsewhere that Arsamosata was the capital of the latter province. From these texts we conclude, first, that there were two distinct districts, Sophene situated more to the north and very well known to the classical writers as an Armenian province, subject to the Roman Empire, and, second, Sophenene, situated near Martyropolis and Amida. The latter is probably the titular see. Le Quien ("Oriens christianus", II, 1001), mentions two bishops of Sophene: Arsaphus, present at the Council of Constantinople in 381; Euphemius, at Chalcedon, 451. The exact situation of this bishopric is unknown.

S. VAILHÉ.

Sophists, a group of Greek teachers who flourished at the end of the fifth century B. C. They claimed to be purveyors of wisdom—hence the name σοφισταί, which originally meant one who possesses wisdom—but in reality undertook to show that all true certitude is unattainable, and that culture and preparation for the business of public life are to be acquired, not by profound thinking, but by discussion and debate. In accordance with this principle, they gathered around them the young men of Athens, and professed to prepare them for their career as citizens and as men by teaching them the art of public speaking and the theory and practice of argumentation. They did not pretend to teach how the truth is to be attained. They did not care whether it could be attained or not. They aimed to impart to their pupils the ability to make the better cause seem the worse, and the worse the better. If we are to believe their opponents, Plato and Aristotle, they affected all kinds of refinement, in dress, speech, gesture, etc., and carried their love of argumentation to the point where all seriousness of purpose ceased and quibbling and sophistry began.

The principal Sophists were: Protagoras of Abdera, called the Individualist; Gorgias of Leontini, surnamed the Nihilist; Hippias of Elis, the Polymathist; and Prodicus of Ceos, the Moralist. Gorgias was called the Nihilist because of his doctrine "nothing exists: even if anything existed, we could know nothing about it, and, even if we knew anything about anything, we could not communicate our knowledge". Hippias was called the Polymathist because he laid claim to knowledge of many out-of-the-way subjects, such as archæology, and used this knowledge for the sophistical purpose of dazzling and embarrassing his opponent in argument. Prodicus, called the Moralist because in his discourses, especially in that which he entitled "Hercules at the Cross-roads", he strove to inculcate moral lessons, although he did not attempt to reduce conduct to principles, but taught rather by proverb, epigram, and illustration. The most important of all the Sophists was Protagoras, the Individualist, so called because he held that the individual is the test of all truth. "Man is the measure of all things" is a saying attributed to him by Plato, which sums up the Sophists' doctrine in regard to the value of knowledge.

The Sophists may be said to be the first Greek sceptics. The materialism of the Atomists, the idealism of the Eleatics, and the doctrine of universal change which was a tenet of the School of Heraclitus —all these tendencies resulted in a condition of unrest, out of which philosophy could not advance to a more satisfactory state until an enquiry was made into the problem of the value of knowledge. The Sophists did not undertake that enquiry—a task reserved for Socrates (q. v.)—however, they called attention to the existence of the problem, and in that way, and in that way only, they contributed to the progress of philosophy in Greece. The absurdities to which the Sophistic method was carried by the later Sophists was due in part to the Megarians, who made common cause with them, and substituted the method of strife (Eristic method) for the Socratic method of discovery (Heuristic method). It was inevitable, therefore, that the name Sophist should lose its primitive meaning, and come to designate, not a man of wisdom, but a quibbler, and one who uses fallacious arguments. The Sophists represent a phase of Greek thought which, while it had no constructive value, and is, indeed, a step backward and not forward, in the course of Greek speculation is nevertheless of great importance historically, because it was the evil influence of the Sophists that inspired Socrates with the idea of refuting them by showing the conditions of true knowledge. It was, no doubt, their methods, too, that Aristotle had in mind when he wrote his treatise of the fallacies, and entitled it "De Sophisticis Elenchis".

William Turner.

Sophonias, the ninth of the twelve Minor Prophets of the Canon of the Old Testament, preached and wrote in the second half of the seventh century B. C. He was a contemporary and supporter of the great Prophet Jeremias. His name (Heb. *Zephanja*, that is "the Lord conceals", "the Lord protects") might, on the analogy of Gottfried, be most briefly translated by the words God protect. The only primary source from which we obtain our scanty knowledge of the personality and the rhetorical and literary qualities of Sophonias, is the short book of the Old Testament (containing only three chapters), which bears his name. The scene of his activity was the city of Jerusalem (i, 4–10; iii, 1 sqq.; 14 sqq.).

I. Date.—The date of the Prophet's activity fell in the reign of King Josias (641–11). Sophonias is one of the few Prophets whose chronology is fixed by a precise date in the introductory verse of the book. Under the two preceding kings, Amon and Manasse, idolatry had been introduced in the most shameful forms (especially the cult of Baal and Astarte) into the Holy City, and with this foreign cult came a foreign culture and a great corruption of morals. Josias, the king with the anointed sceptre, wished to put an end to the horrible devastation in the holy places. One of the most zealous champions and advisers of this reform was Sophonias, and his writing remains one of the most important documents for the understanding of the era of Josias. The Prophet laid the axe at the root of the religious and moral corruption, when, in view of the idolatry which had penetrated even into the sanctuary, he threatened to "destroy out of this place the remnant of Baal, and the names of the . . . priests" (i, 4), and pleaded for a return to the simplicity of their fathers instead of the luxurious foreign clothing which was worn especially in aristocratic circles (i, 8). The age of Sophonias was also a most serious and decisive period, because the lands of Anterior Asia were overrun by foreigners owing to the migration of the Scythians in the last decades of the seventh century, and because Jerusalem, the city of the Prophets, was only a few decades before its downfall (586). The far-seeing watchman on Sion's battlements saw this catastrophe draw near: "for the day of the Lord is near" is the burden of his preaching (i, 7). "The great day of the Lord is near, it is near and exceeding swift: . . . That day *is* a day of wrath, a day of tribulation and distress, a day of calamity and misery, a day of darkness and obscurity, a day of clouds and whirlwinds" (i, 14–15).

II. Contents.—The book of the Prophet naturally contains in its three chapters only a sketch of the fundamental ideas of the preaching of Sophonias. The scheme of the book in its present form is as follows:

(a) i, 2–ii, 3.—The threatening of the "day of the Lord", a *Dies iræ dies illa* of the Old Testament. The judgment of the Lord will descend on Juda and Jerusalem as a punishment for the awful degeneracy in religious life (i, 4–7a); it will extend to all classes of the people (i, 7b–13), and will be attended with all the horrors of a frightful catastrophe (i, 14–18); therefore, do penance and seek the Lord (ii, 1–3).

(b) ii, 4–15.—Not only over Jerusalem, but over the whole world (*urbi et orbi*), over the peoples in all the four regions of the heavens, will the hand of the Lord be stretched—westwards over the Philistines (4–7), eastwards over the Moabites and Ammonites (8–11), southwards over the Ethiopians (12), and northwards over the Assyrians and Ninivites (13–15).

(c) With a special threat (iii, 1–8), the Prophet then turns again to Jerusalem: "Woe to the provoking, and redeemed city. . . . She hath not hearkened to the voice, neither hath she received discipline"; the severest reckoning will be required of the aristocrats and the administrators of the law (as the leading classes of the civil community), and of the Prophets and priests, as the directors of public worship.

(d) iii, 9–20.—A consolatory prophecy, or prophetic glance at the Kingdom of God of the future, in which all the world, united in one faith and one worship, will turn to one God, and the goods of the Messianic Kingdom, whose capital is the daughter of Sion, will be enjoyed. The universality of the judgment as well as of the redemption is so forcibly expressed in Sophonias that his book may be regarded as the "Catholic Epistle" of the Old Testament.

(e) The last exhortation of Sophonias (iii, 9–20) also has a Messianic colouring, although not to an extent comparable with Isaias.

III. CHARACTER OF THE PROPHET.—Sophonias' prophecy is not strongly differentiated from other prophecies like that of Amos or Habacuc, it is confined to the range of thought common to all prophetic exhortations: threats of judgment, exhortation to penance, promise of Messianic salvation. For this reason Sophonias might be regarded as the type of Hebrew Prophets and as the final example of the prophetic terminology. He does not seek the glory of an original writer, but borrows freely both ideas and style from the older Prophets (especially Isaias and Jeremias). The resemblances to the Book of Deuteronomy may be explained by the fact that this book, found in the Josian reform, was then the centre of religious interest. The language of Sophonias is vigorous and earnest, as became the seriousness of the period, but is free from the gloomy elegiac tone of Jeremias. In some passages it becomes pathetic and poetic, without however attaining the classical diction or poetical flight of a Nahum or Deutero-Isaias. There is something solemn in the manner in which the Lord is so frequently introduced as the speaker, and the sentence of judgment falls on the silent earth (i, 7). Apart from the few plays on words (cf. especially ii, 4), Sophonias eschews all rhetorical and poetical ornamentation of language. As to the logical and rhythmical build of the various exhortations, he has two strophes of the first sketch (i, 7 and 14) with the same opening ("the day of the Lord is near"), and closes the second sketch with a hymn (ii, 15)—a favourite practice of his prototype, Jeremias. A graduated development of the sentiment to a climax in the scheme is expressed by the fact that the last sketch contains an animated and longer lyrical hymn to Jerusalem (iii, 14 sqq.). In Christian painting Sophonias is represented in two ways; either with the lantern (referring to i, 12: "I will search Jerusalem with lamps") or clad in a toga and bearing a scroll bearing as text the beginning of the hymn "Give praise, O daughter of Sion" (iii 14).

IV. CRITICAL PROBLEMS OFFERED BY SOPHONIAS.—The question of authorship is authoritatively answered by the introductory verse of the book. Even radical higher critics like Marti acknowledge that no reason exists for doubting that the author of this prophecy is the Sophonias (Zephaniah) mentioned in the title ("Das Dodekapropheton", Tübingen, 1904, 359). The fact that this Prophet's name is mentioned nowhere else in the Old Testament does not affect the conclusive force of the first verse of the prophecy. Sophonias is the only Prophet whose genealogy is traced back into the fourth generation. From this has been inferred that the fourth and last ancestor mentioned Ezechias (Hizkiah) is identical with the king of the same name (727–698). In this case, however, the explanatory phrase "King of Judah" would undoubtedly have been put in apposition to the name. Consequently the statement concerning the author of the book in the first part of the introductory verse appears entirely worthy of belief, because the statement concerning the chronology of the book given in the second half of the same verse is confirmed by internal criteria. The descriptions of customs, especially in the first chapter, showing the state of religion and morals at Jerusalem are, in point of fact, a true presentation of conditions during the first years of the reign of King Josias. The worship of the stars upon the flat roofs, mentioned in i, 5, an imitation of the Babylonian worship of the heavens that had become the fashion in Palestine from the reign of Manasses is also mentioned by the contemporary Prophet, Jeremias (xix, 13; xxxii, 29), as a religious disorder of the Josianic era. All this confirms the credibility of the witness of i, 1, concerning the authorship of Sophonias.

Critical investigations, as to where the original texts in the Book of Sophonias end and the glosses, revisions of the text, and still later revisions begin, have resulted in a unanimous declaration that the first chapter of the book is the work of Sophonias; the second chapter is regarded as not so genuine, and the third still less so. In separating what are called the secondary layers of the second chapter nearly all the higher critics have come to different conclusions,—*quot capita, tot sensus*. Each individual verse cannot be investigated here as in the detailed analysis of a commentator. However, it may be pointed out in general that the technical plan in the literary construction of the speeches, especially the symmetrical arrangement of the speeches mentioned in section II, and the responses spoken of in section III, forbid any large excisions. The artistic form used in the construction of the prophetic addresses is recognized more and more as an aid to literary criticism.

The passage most frequently considered an addition of a later date is iii, 14–20, because the tone of a herald of salvation here adopted does not agree with that of the prophecies of the threatening judgment of the two earlier chapters. It is, however, the custom of the Prophets after a terrifying warning of the judgments of Jahve to close with a glimpse of the brilliant future of the Kingdom of God, to permit, as it were, the rainbow to follow the thunder-storm. Joel first utters prophetic denunciations which are followed by prophetic consolations (Joel in Vulgate, i–ii, 17; ii, 18–iii); Isaias in ch. i calls Jerusalem a city like Sodom and directly afterwards a city of justice, and Micheas, whose similarity to Sophonias is remarked upon by critics, also allows his threats of judgment to die away in an announcement of salvation. One of the guiding eschatological thoughts of all the Prophets is this: The judgment is only the way of transition to salvation and the consummation of the history of the world will be the salvation of what is left of the seed. For this reason, therefore, Sophonias, iii, 14–20 cannot be rejected. The entire plan of the book seems to be indicated in a small scale in the first address, which closes ii, 1–3, with an exhortation to seek the Lord that is with a consolatory theme directly after the terrible proclamation of the Day of the Lord.

The queries raised by the textual criticism of the Book of Sophonias are far simpler and nearer solution than those connected with the higher criticism. The condition of the text, with exception of a few doubtful passages, is good and there are few books of the Biblical canon which offer so few points of attack to Biblical hypercriticism as the Book of Sophonias.

M. FAULHABER.

Sophronius, SAINT, Patriarch of Jerusalem and Greek ecclesiastical writer, b. about 560 at Damascus of noble parentage; d. probably 11 March, 638, at

Jerusalem. In company with John Moschus he travelled extensively through the East and also went to Rome. He probably became a monk in Egypt about 580 and later removed to Palestine. From the year 633 until his death he was the principal opponent of Monothelitism. Conspicuous for his learning and piety he became in 634 Patriarch of Jerusalem, and sorrowfully witnessed during his reign the conquest of Palestine by the Arabs and their capture of Jerusalem. He must very probably be identified with the Sophronius known as the rhetorician (σοφιστής), and was the author of biographies, homilies, and hymns. Among the first named are: his Life of John the Almoner, written in collaboration with J. Moschus and only partly preserved in Symeon Metaphrastes; the lives of Sts. Cyrus and John; and probably a Life of St. Mary of Egypt. Ten homilies which have been preserved deal chiefly with ecclesiastical festivals, and are remarkable for their dogmatic contents and oratorical style. Numerous anacreontic odes entitle him to a place among Greek ecclesiastical poets. A large work in which he collected 600 testimonies of the Fathers in favour of the two wills of Christ has perished.

The most comprehensive collection of the works of Sophronius is found in *P. G.*, LXXXVII, iii, 3147–4014; VENABLES in *Dict. Christ. Biog.*, s. v. *Sophronius (12)*; VAILHÉ, *Sophrone le sophiste et Sophrone le patriarche* in *Revue de l'Orient Chrétien*, VII (1902), 360–85; VIII (1903), 32–69, 356–87; BARDENHEWER-SHAHAN, *Patrology* (St. Louis, 1908), 559–61, 564–66.

N. A. WEBER.

Sophronius, Bishop of Constantina or Tella in Osrhoene, was a relative of Ibas, Bishop of Edessa, and apparently of the same theological tendency, i. e. strongly anti-Monophysite and liable to be suspected of Nestorianism. He was present at a synod held at Antioch in 445 at which Athanasius, Bishop of Perrha, was deposed on charges of misconduct, the chief among which was that he had purloined some silver pillars belonging to the church. We have no means of judging whether these charges were true; very possibly, if not trumped up, they were too easily credited from partisan motives. Four years later at the Robber Council of Ephesus (q. v.) most extraordinary charges of magic and sorcery were brought against Bishop Sophronius. For some reason or other, perhaps because it was foreseen that the charges would break down, perhaps because he was not worth crushing in view of the more important personages being pursued, Sophronius's case was referred to the new Bishop of Edessa, when one should be appointed in place of Ibas whom the Conciliabulum had deposed. Sophronius is next heard of at the Council of Chalcedon. At the eighth session, after Theodoret had anathematized Nestorius, "the most reverend bishops cried out 'Let Sophronius also anathematize'. Sophronius, the most reverend bishop of Constantina, said 'anathema to Nestorius and Eutyches'".

The charges against Sophronius have only been brought to light in recent years by the discovery of a Syriac version of the Acts of the Robber Council. They were made by a priest and two deacons of Tella (Constantina), who claimed to represent the rest of the clergy of that city. The bishop, they declared, practised astrology and other vaticinative arts of the pagans. The miserable heresy of Nestorius which he had learnt from Ibas was not enough for him, so he threw himself into those other abominations. He once lost some money, and not content with making the suspected persons swear on the Gospels, "he, further testing them by the ordeal of bread and cheese, compelled them to eat". This not succeeding, he had recourse to the divining cup. He used the son of one of his servants as a medium, and with two others, after some incantations, placed the youth before a vessel containing oil and water. In this mixture the youth first saw flames of fire, then "a man sitting on a throne of gold, and clad in purple and a crown upon his head". After this they put the oil and water in a hole near the door, and the medium saw the bishop's son Habib who was returning home from Constantinople "seated on a black mare-mule that is blind-folded; and behind him two men on foot". The lad confessed these and other like things on oath. He was haunted by seven men dressed in white and lost his reason, and was with difficulty cured by being brought into holy places and anointed with oil. Many persons, among others the copyists, could testify to Sophronius's astrological writings. A deacon who came to him, to have a ticket of alms signed, found him inspecting a brass sphere. His son Habib introduced a Jew into his father's house and ate with him after the manner of the Jews. "During the week of Lent, when we fast, he feasted with this Jew, and kept him at table till ten o'clock; and even carried his audacity (so far as) to bring him into the Sanctuary of the Apostles, at the time that Service was being held. The city and the clergy, shocked by this conduct, chased both the Jew and Habib, who sought refuge in the Prætorium of the Commandant (Duke) Florus. The impious and pagan Florus rushed upon the city, where (his people) laid violent hands on a great number of men and children—certainly more than a hundred. In despair, these took refuge near the Tabernacle; but the arrows reached their bodies, their blood was shed before the Altar, and many died in the act of embracing it."

FRANCIS J. BACCHUS.

Sora. See AQUINO, SORA, AND PONTECORVO, DIOCESE OF.

Sora, a titular see in Paphlagonia, suffragan of Gangra. Sora must have been an insignificant town; an inscription discovered at Zorah, a village in the vilayet of Castamouni, in which a local era and the worship of Zeus Epicarpios are mentioned, has enabled its exact position to be fixed. (Doublet in "Bull. de correspondance hellénique", 1889, p. 310.) It was placed later under the government of the Prætor of Paphlagonia (Novel., 29, 1; Hierocles, 695, 7). It is spoken of by Constantine Porphyrogenitus, "De themat.", I, 7. Le Quien ("Oriens christ.", I, 557), mentions six of its bishops: Theodore, represented by his metropolitan at the Council of Chalcedon (451); Olympius, who signed the letter of the bishops of the province to Emperor Leo in 458; John, present at the Council of Constantinople (692); Theophanes, at the Seventh Œcumenical Council of Nicæa (787); Phocas, at the eighth general Council at Constantinople (869); Constantine, at the Photian Council of Constantinople (879). The Greek "Notitiæ episcopatuum" mentions the see till the thirteenth century.

S. PÉTRIDÈS.

Sorbait, PAUL DE, physician, b. in Hainault, 1624; d. at Vienna, 19 April, 1691. He went to school at Paderborn, then attended the University of Padua, where apparently he obtained his degree of Doctor of Philosophy and Medicine. He practised as a physician at Rome, Cologne, and Arnheim, and in August, 1652, was made a member of the medical faculty of the University of Vienna. In 1655 he became professor of theoretical medicine at the same university, and in 1666 professor of practical medicine. In 1658 he was appointed court-physician to the Empress-Dowager Eleonora. In 1676 he rebuilt at his own expense the students' hall "Goldberg" and added a chapel to it. During the year of the pest (1679), the

Emperor Leopold I appointed him official councillor and chief supervisor of sanitary conditions in Vienna. Soon after this he was ennobled. In 1681 he resigned his professorship and founded a scholarship for medical students. During the siege of Vienna by the Turks in 1683 he commanded the company formed of students as chief sergeant-major. His tomb is in the Cathedral of St. Stephen at Vienna. In 1909 the national association of the official doctors of Austria selected Sorbait's portrait as the insignia of the association. He gained a high reputation as a teacher at Vienna by zealous encouragement of anatomy and botany, as well as by firm adherence to the Hippocratic school. His prominent position in the year 1679 gave him the opportunity to organize sanitary conditions in Vienna. His writings show a harmonious mixture of profound thinking, strong piety, and a merry wit. His style frequently recalls that of the Augustinian monk and Viennese preacher Abraham a Santa Clara, but Sorbait was not an imitator of the latter, as the orations delivered upon receiving a higher position were delivered in part before 1666, consequently before Father Abraham's appearance as a speaker at Vienna.

Sorbait's works are the following: "Universa medicina tam theorica quam practica" etc. (Nuremberg, 1672, 1675); this is his chief work. It was issued in a revised and enlarged form under the title: "Praxios medicæ tractatus VII" (Vienna, 1680 and 1701); "Commentaria et controversiæ in omnes libros aphorismorum Hippocratis" (Vienna, 1660); "Nova et aucta institutionum isagoge" (Vienna, 1678); "Modus promovendi doctores in archilycæo Viennensi" (Vienna, 1667), in "Praxios medicæ tract.", 553–577; "Encomiastica neoprofessuræ prolegomena", oration delivered on entrance to his professorship, 31 January, 1655; "Discursus academicus in renovatione magistratus civici", 7 Jan., 1669, in German; "Resignatio rectoratus", 25 Nov., 1669; "Exhortatio in honorem St. Barbaræ", 25 Jan., 1664; all these are to be found in the "Prax. med. tract.", 578–90; "Die Johann Wilhelm Mannagellasche Pestordnung im Auftrag der Regierung von P. Sorbait herausgegeben und vermehrt" (1679); "Consilium medicum seu dialogus loimicus de peste Viennensi" (Vienna, 1679; also in German, 1679; 1713; Berlin, 1681), Sorbait's most popular book; "Catalogus rectorum" (Vienna, 1669 and 1670). He also wrote short articles which are to be found in the "Miscellanea curiosa academiæ cæsareæ Leopoldinæ II, III".

Oesterreichischer Galenus, dass ist Lob- Leich- und Ehrenpredig Thro Magnificenz dess Wohl-Edel Gebohrnen und hochgelehrten Pauli de Sorbait von P. Emericus Pfendtner O.F.M., 10 Mai, 1691 (Vienna); SENFELDER, *Paul de Sorbait* in *Wiener klinische Rundschau* (1906), nos. 21–27, 29–30.

LEOPOLD SENFELDER.

Sorbonne.—This name is frequently used in ordinary parlance as synonymous with the faculty of theology of Paris. Strictly speaking it means, as in this article, the celebrated theological college of the French capital. The title was adopted from the name of the university institute founded by Robert de Sorbon, a native of Le Réthelois, a distinguished professor and famous preacher who lived from 1201 till 1274. Sorbon found that there was a defect in the primitive organization of the University of Paris. The two principal mendicant orders—the Dominicans and the Franciscans—had each at Paris a college and delivered lectures at which extern students might attend without fee. In order that the university, which was already engaged in a struggle with the religious, might offer the same advantages, Robert de Sorbon decided that it also should provide gratuitous instruction and that this should be given by a society of professors following, except as regards the matter of vows, the rules of the cenobitic life. This important work was rendered possible by the high esteem in which Robert was held at Paris, together with his brilliant parts, his great generosity, and the assistance of his friends. The foundation dates from the year 1257 or the beginning of 1258. Nor was the aid he received merely pecuniary; Guillaume de Saint-Amour, Gérard d'Abbeville, Henry of Ghent, Guillaume des Grez, Odo or Eudes of Douai, Chrétien de Beauvais, Gérard de Reims, Nicolas de Bar are but a few of the most illustrious names inseparably connected either with the first chairs in the Sorbonne, or with the first association that constituted it. These savants were already attached to the university staff.

The constitution of the society as conceived by Robert was quite simple: an administrator (*provisor*), associates (*socii*), and guests (*hospites*). The provisor was the head; nothing could be done without consulting him; he installed the members selected by the society, and confirmed the statutes drawn up by it; in a word, as his title signifies, he had to provide for everything. The associates formed the body of the society. To be admitted to it, the candidate was required to have taught a course of philosophy. There were two kinds of associates, the *bursaires* and the *pensionnaires*. The latter paid forty (Paris) pounds a year, the former were provided for by the house, which expended a like sum from its revenues. The burse could be granted only to persons not having an income of forty (Paris) pounds. There was a *primus inter pares*, the prior, who presided over all internal affairs of the house. Doctors and bachelors were alike eligible, but, owing to the number of the latter, the custom rapidly grew up of selecting only bachelors. Other persons were candidates for admission to the society rather than members of it. From the material and intellectual point of view they enjoyed the same privileges as the members: board, lodging, books, spiritual and scholastic exercises; but they had no votes. When they had fulfilled the condition of teaching philosophy, they were admissible as members. The course of studies lasted ten years, during which time their burses continued; but, if at the end of ten years, they had not given proof of their ability, either as teachers or

CHAPEL OF THE SORBONNE

as preachers, their burse was vacated. The ordinary lectures were public, and consequently were attended by students who belonged to neither of the divisions of the society. The doctors and bachelors were authorized to give shelter to other poor pupils. Besides the work of the classroom, there was the duty of preaching or labouring in the parishes. In preparation for this, the associates, on certain days, had to deliver sermons or conferences (*collationes*) in presence of the community. The purely spiritual side was not forgotten. Conferences, usually delivered by the prior, on this important part of the Christian and priestly life were given, if not exclusively, at least specially, to the interns. For twenty years the ability of the administrator, or provisor, corresponded to the foreseeing devotedness of the founder. This lapse of time showed the wisdom of the regulations and administrative measures, which Robert had adopted, after taking the best possible advice, and which he laid down in thirty-eight articles. This rule was directed towards the maintaining of common life, from silence in the refectory, which was not very strict, to simplicity of the authorized dress. As soon as circumstances permitted, Robert (about 1271) added to the theological college a literary college: this was the Collège de Calvi or the "little Sorbonne".

Fruit of deep thought and personal experience, the constitution given by Robert de Sorbon to his college received the consecration of time, for it lasted throughout centuries. If Héméré saw in the project the conception of a powerful intellect, "Hoc primus in lyeaco Parisiensi vidit Robertus", its realization was surely a work of genius. That this was so appears from the fact that, while Robert united in his work whatever good he found in the university, his college when completed served as a model to the others. It is unnecessary to dwell on each word of the original title, for some persons rather enigmatical, of the society. The expression "Pauvres maîtres étudiants en théologie" seems to emphasize the two primary or essential characteristics of the society: equality in poverty, an equality so perfect between masters and pupils that it designated them by a common name; the poverty of the pupils, since most of them were *bursaires;* the poverty of the masters, since, content with what was strictly necessary, they renounced all other professional remuneration. This equality was always maintained with scrupulous care; the Sorbonnists repeated as an axiom, "Omnes nos sumus socii et æquales", and referred to the college as "pauperem nostram Sorbonem".

From the outset the college enjoyed the favour of the Holy See. Alexander IV (1259) urged the French bishops to support it, Urban IV (1262) recommended it to the goodwill of the whole Christian world, and Clement IV (1268) granted it papal approbation. Wealthy benefactors provided it with ample endowment. A high standard of scholarship was maintained and the severity of the "actus Sorbonnicus", or examination for degrees, including the defence of the "thesis Robertina", became proverbial. The professorial corps was highly respected, and from all parts of Europe different theological and even political questions were sent to it for solution. As the other teachers of theology in the university became members of the Sorbonne, its staff, at the beginning of the sixteenth century, was practically identical with the university faculty. Robert de Sorbon had realized the necessity of a library and had taken measures to supply one. This increased rapidly, owing chiefly to numerous gifts. In 1470 the Sorbonne introduced the art of printing into France by calling to Paris three of Gutenberg's associates, Gering, Friburger, and Crantz. Among its principal patrons and benefactors was Cardinal Richelieu, who held for a time the office of provisor and who, in 1635, laid the cornerstone of an edifice to be built at his expense for the use of the college. He was buried in the church of the Sorbonne, where his tomb is still preserved. The doctors of the college were loyal defenders of the Catholic faith against the inroads of Protestantism and against the so-called Enlightenment. On the other hand, they gave their support to Gallicanism and obliged their members to subscribe the "four articles". This attitude naturally weakened the prestige of the Sorbonne as a theological school, and obliged ecclesiastical students to seek their education in the seminaries. The Sorbonne itself was suppressed by decree of 5 April, 1792, but was restored by Napoleon in 1808 as the theological faculty of the newly organized university. It did not, however, regain its former standing or influence, though it continued in existence until 1882, when it was finally suppressed. In 1884 the construction of the present building was begun and it was completed in 1889. It is now occupied by the various departments of letters and science which form the "Ecole des Hautes Etudes".

Sorin, Edward, the founder of Notre Dame, Indiana; b. 6 Feb., 1814, at Ahuillé, near Laval, France; d. 31 Oct., 1893, at Notre Dame, U. S. A. His early education was directed by his mother, a woman remarkable for intelligence as well as virtue. After completing his classical studies, his vocation for the priesthood being marked, M. Sorin at once entered the diocesan seminary, where he was distinguished for superior ability and exemplary life. Among his fellow students were Cardinal Langénieux and others who shed lustre on the Church.

Father Sorin
From a Photograph

At the time of Father Sorin's ordination, glowing reports of missionary enterprise in foreign lands had fired afresh the hearts of the French clergy, and inspired numerous vocations, not a few of which were those of future martyrs, particularly in China and Japan. It was to the first of these countries that the Abbé Sorin felt attracted; and to the end of his long life accounts of the trials and triumphs of Chinese missionaries had for him a singular fascination. He was influenced by circumstances to enroll himself in the Congregation of the Holy Cross, a community of priests, brothers, and sisters lately founded at Le Mans by the Abbé Moreau. The need of missionaries in the United States, so earnestly represented in letters from bishops in this country and in addresses by others who had occasion to visit Europe, was not to be disregarded by the heads of religious orders; and although France had not as yet recovered from the effects of the Revolution, she generously contributed men and means for the support and spread of American missions. Father Sorin, but recently

ordained, was selected by his superiors to establish the Congregation of the Holy Cross in what was then considered a remote district of the United States.

Accompanied by six brothers, he arrived in New York in the autumn of 1841, and immediately set out for Indiana, which was destined to be the field, the centre rather, of his apostolate for upwards of half a century. After a short stay at St. Peter's, in the Diocese of Vincennes, he proceeded northward with five of his confrères. In the beginning of an exceptionally rigorous winter, in poverty and privation he began the foundation of Notre Dame, which, under his fostering care, from an Indian missionary station, developed into one of the largest religious and educational institutions in the New World, the centre of far-reaching activities for the work of the Church. Several colleges which Father Sorin founded elsewhere are also in a flourishing condition.

It is a far cry from Indiana to India; but the flourishing mission in Eastern Bengal, in charge of the Congregation of the Holy Cross, owes much of its success to Father Sorin's ardent zeal and active cooperation. Thither he sent its former bishop and other priests whose services could ill be spared, together with a band of sisters, the superior of whom, a native of New York, died at her distant post, a victim of her self-sacrifice. The founding of the Congregation of the Sisters of the Holy Cross in the United States is rightly regarded as one of Father Sorin's most important services to religion. Under his administration and care, this community, at first a handful, has become a host, with flourishing establishments in a dozen states. During the Civil War, thanks to Father Sorin's forethought, this sisterhood was able to furnish nearly fourscore nurses for sick and wounded soldiers on transports and in hospitals. A number of priests of the Congregation of the Holy Cross served as chaplains at the front. Another of Father Sorin's many claims to the grateful remembrance of English-speaking Catholics is the "Ave Maria", which he founded in 1865.

Father Sorin was elected superior-general of his order in 1868, and held this important office during the rest of his life. In recognition of his work in educational lines, the French Government conferred upon him the insignia of an Officer of Public Instruction (1888). Soon after the celebration of his sacerdotal golden jubilee (the same year), the venerable founder of Notre Dame entered upon a long period of mental and physical suffering, which closed with a peaceful and painless death on the eve of All Saints', 1893.

DANIEL E. HUDSON.

Sorrento, ARCHDIOCESE OF, in the Province of Naples, with one suffragan, Castellamare. The city is situated on the southern arm of the Gulf of Naples and is protected towards the south by Mount Sant' Angelo, which makes Sorrento a popular summer resort. The peninsula is bounded on the one side by the Gulf of Naples, on the other side by the Gulf of Amalfi, and was in Roman antiquity dotted with villas. Sorrento is situated at a considerable altitude above the sea, as it were on a peak. The churches are more ornate than beautiful. There are also ruins of certain temples: of Ceres, described by Vitruvius (a few columns and mosaics); of Venus, near the Marina grande; of Sirena; and of Minerva, the latter said to have been built by Ulysses, the reputed founder of the city, which in ancient times had its own coins and was autonomous. In 312 B. C. it became the ally of Rome; but Hannibal captured it in the Second Punic War. Augustus sent a colony thither. In A. D. 645 Radolfo, Duke of Beneventum, besieged it in vain; it remained Byzantine, and as late as the eighth century had probably a *dux* (chief magistrate) of its own, and was almost completely independent of Constantinople. In 890 the Sorrentines won a naval victory over the inhabitants of Amalfi. In 1035 it was conquered by Guaimario IV, Duke of Salerno, who made his brother Guido Duke of Sorrento; but forty years afterwards it fell with Salerno under Norman domination. Sorrento is the birthplace of Torquato Tasso. The Gospel was preached at Sorrento probably as early as the first century; the martyrs Quartus, Quartillus, and their companions are venerated there. Among the known bishops the first is St. Renatus, a native of Angers, at the beginning of the fifth century. His successor was St. Valerius, who died in 453; Rosarius was present at Rome in 499. The Sorrentines venerate other bishops of the see: St. Athanasius, St. Johannes (about 594), St. Amandus (d. 617), St. Baculus (seventh century), St. Hyacinthus (679). In the tenth century it became a metropolitan see, the first archbishop being Leo Parus. Among its bishops were Francesco Remolino (1501), who was made a prisoner by the Turks and ransomed with the treasures of the church (in part his own donations), and Filippo Strozzi (1525), said to have been three times rescued from prison in the sack of Rome in 1527. In 1558 the Turks under Pialy Pasha effected a landing at Salerno, and plundered and burned the city, on which occasion the archives perished. The new bishop, Giulio Pavesi, sought to repair the damages. Diego Pietra (1680) founded the seminary, afterwards enlarged by Filippo Anastasi (1699); the latter defended the immunities of the Church and was forcibly exiled to Terracina. In 1861 Francesco Apuzzo was, by order of the new Government, exiled to France. In 1818 the Dioceses of Massa Lubrense, Vico Equense, a suffragan of Amalfi, and Capri were united with Sorrento. Massa is an ancient city, the fame of whose celebrated temple (*delubrum*) of Juno Argiva is still preserved in the title of the church known as the Madonna della Lobra. It became an episcopal see probably when Sorrento was made metropolitan; the first known bishop was Pietro Orsi, in 1289 delivered from prison in Sicily. Vico Equense, the ancient Æqua, destroyed in the Social War, probably had a bishop at the same time as Massa Lubrense; the first known was Bartolomeo (1294). Paolo Regi (1582), a renowned legist, compiled the lives of the Neapolitan saints, and was a prolific writer. The last bishop was Michele Natali (1797), condemned to death in 1799 for having taken part in the revolution of that year.

The Island of Capri was even in antiquity celebrated for its climate. Augustus acquired it from the Neapolitans, and Tiberius built there his famous villa. Commodus banished thither his wife Crispina. Justinian gave the island to the Benedictines. In 868 it was captured by the inhabitants of Amalfi; from 1806–1808 it was in possession of the English. The Archbishop of Amalfi named its first bishop (987), a certain Johannes. Sorrento has thirty-six parishes, 267 secular and 34 regular clergy, and 56,900 souls; 8 monasteries for men and 21 convents for women, 3 institutes for boys and 10 for girls.

U. BENIGNI.

Sorrows of the Blessed Virgin Mary, FEASTS OF THE SEVEN.—(1) Friday before Palm Sunday, major double; (2) third Sunday in September, double of the second class. The object of these feasts is the spiritual martyrdom of the Mother of God and her compassion with the sufferings of her Divine Son. (1) The seven founders of the Servite Order, in 1239, five years after they established themselves on Monte Senario, took up the sorrows of Mary, standing under the Cross, as the principal devotion of their order. The corresponding feast, however, did not originate with them; its celebration was enacted by a provincial synod of Cologne (1413) to expiate the crimes of the iconoclast Hussites; it was to be kept on the Friday after the third Sunday after Easter under the title: "Commemoratio angustiæ et doloris B. Mariæ V.". Its object was exclusively the sorrow of Mary during the Crucifixion and Death of Christ. Before the sixteenth century this feast was limited to the dioceses of North Germany, Scandinavia, and Scotland. Being termed "Compassio" or "Transfixio", "Commendatio, Lamentatio B. M. V.", it was kept at a great variety of dates, mostly during Eastertide or shortly after Pentecost, or on some fixed day of a month (18 July, Merseburg; 19 July, Halberstadt, Lübeck, Meissen; 20 July, Naumburg; cf. Grotefend, "Zeitrechnung", II, 2, 166). Dreves and Blume (Analecta hymnica) have published a large number of rhythmical offices, sequences, and hymns for the feast of the Compassion, which show that from the end of the fifteenth century in several dioceses the scope of this feast was widened to commemorate either five dolours, from the imprisonment to the burial of Christ, or seven dolours, extending over the entire life of Mary (cf. XXIV, 122–53; VIII, 51 sq.; X, 79 sq., etc.). Towards the end of the sixteenth century the feast spread over part of the south of Europe; in 1506 it was granted to the nuns of the Annunciation under the title "Spasmi B. M. V.", Monday after Passion Sunday; in 1600 to the Servite nuns of Valencia, "B. M. V. sub pede Crucis", Friday before Palm Sunday. After 1600 it became popular in France and was termed "Dominæ N. de Pietate", Friday before Palm Sunday. To this latter date the feast was assigned for the whole German Empire (1674). By a Decree of 22 April, 1727, Benedict XIII extended it to the entire Latin Church, under the title "Septem dolorum B. M. V.", although the Office and Mass retain the original character of the feast, the Compassion of Mary at the foot of the Cross. At both Mass and Office the "Stabat Mater" of Giacopone da Todi (1306) is sung.

(2) The second feast was granted to the Servites, 9 June and 15 September, 1668, double with an octave for the third Sunday in September. Its object from the beginning has been the popular devotion of the seven dolours of Mary (according to the responsories of Matins: the sorrow (a) at the prophecy of Simeon; (b) at the flight into Egypt; (c) having lost the Holy Child at Jerusalem; (d) meeting Jesus on his way to Calvary; (e) standing at the foot of the Cross; (f) Jesus being taken from the Cross; (g) at the burial of Christ). This feast was extended to Spain (1735); to Tuscany (double of the second class with an octave, 1807). After his return from his exile in France Pius VII extended the feast to the Latin Church (18 September, 1814, major double); it was raised to the rank of a double of the second class, 13 May, 1908. The Servites celebrate it as a double of the first class with an octave and a vigil. Also in the Passionist Order, at Florence and Granada (N. S. de las Angustias), its rank is double of the first class with an octave. The hymns which are now used in the Office of this feast were probably composed by the Servite Callisto Palumbella (eighteenth century). On the devotion, cf. Kellner, "Heortology", p. 271. The old title of the "Compassio" is preserved by the Diocese of Hildesheim in a simple feast, Saturday after the octave of Corpus Christi. A feast, "B. M. V. de pietate", with a beautiful medieval office, is kept in honour of the sorrowful mother at Goa in India and Braga in Portugal, on the third Sunday of October; in the ecclesiastical province of Rio de Janeiro in Brazil, last Sunday of May, etc. (cf. the corresponding calendars). A special form of devotion is practised in Spanish-speaking countries under the term of "N. S. de la Soledad", to commemorate the solitude of Mary on Holy Saturday. Its origin goes back to Queen Juana, lamenting the early death of her husband Philip I, King of Spain (1506).

To the oriental churches these feasts are unknown; the Catholic Ruthenians keep a feast of the sorrowful Mother on Friday after the octave of Corpus Christi.

Soter, SAINT, POPE. See CAIUS AND SOTER, SAINTS.

Soto, DOMINIC, Dominican, renowned theologian, b. at Segovia, 1494; d. at Salamanca, 15 Nov., 1560. His first studies were made in his native city. He next studied at the University of Alcalá under St. Thomas of Villanova, and later went to Paris, where he obtained his baccalaureate in philosophy. Having studied theology for a time at Paris, he returned to Alcalá about 1520, and was made professor of philosophy in the College of San Ildelfonso. In this capacity he distinguished himself by securing a complete triumph of moderate Realism over the errors of Nominalism. Already enjoying a wide reputation as a professor, and apparently destined for higher honours, he was suddenly moved in 1524 to abandon his chair as teacher and join a religious order. Straightway he made a retreat at the Benedictine monastery of Montserrat, and then sought admission into the Order of Preachers at Burgos, where he was received and entered upon his novitiate in the Convent of St. Paul. The following year (23 July, 1525) he was admitted to profession, and was made at once professor of dialectics in his convent. In 1529 appeared his first work called "Summulæ", which in simplicity, precision, and clearness was a decided improvement on the manuals of logic then in use. After teaching in his convent for seven years, he was called to a chair of theology in the University of Salamanca on 27 Nov., 1532, and continued to teach there till 1545, when he was chosen by Charles V imperial theologian at the Council of Trent. During his labours at the council he rendered great service in helping to formulate dogmatic decrees and in solving theological difficulties. The general of his order, Albertus Casaus, having died just before the opening of the council, it fell to Soto to represent his order during the first four sessions. In the following sessions he represented the newly-elected general, Franciscus Romæus. It was at Trent that Soto wrote and dedicated to the fathers of the council his treatise "De natura et gratia", in which he clearly and ably expounds the Thomistic teaching on original sin and grace. When the council was interrupted in 1547, Soto was summoned by Charles V to Germany as his confessor and spiritual director. He refused the Bishopric of Segovia offered him by the emperor, and in 1550 was permitted to return to his convent at Salamanca, where he was elected prior the same year. Two years later he succeeded Melchior Cano in the principal chair of theology at the University of Salamanca, at that time the metropolis of the intellectual world. In 1556 Soto resigned his professorial chair. Chief among his philosophical works, besides the "Summulæ", are: "In dialecticam Aristotelis commentarii" (Salamanca, 1544); "In VIII libros physicorum" (Salamanca, 1545). The following are his best-known theological works: "De natura et gratia libri III (Venice, 1547); "De ratione tegendi et detegendi secretum" (Salamanca, 1541); "De justitia et jure libri X" (Salamanca, 1556); "Comment. in Ep. ad Romanos" (Antwerp, 1550); "In IV sent. libros comment." (Salamanca, 1555-56).

Soul (Gr. ψυχή; Lat. *anima;* Fr. *âme;* Ger. *Seele*).—The question of the reality of the soul and its distinction from the body is among the most important problems of philosophy, for with it is bound up the doctrine of a future life. Various theories as to the nature of the soul have claimed to be reconcilable with the tenet of immortality, but it is a sure instinct that leads us to suspect every attack on the substantiality or spirituality of the soul as an assault on the belief in existence after death. The soul may be defined as the ultimate internal principle by which we think, feel, and will, and by which our bodies are animated. The term "mind" usually denotes this principle as the subject of our conscious states, while "soul" denotes the source of our vegetative activities as well. That our vital activities proceed from a principle capable of subsisting in itself, is the thesis of the substantiality of the soul: that this principle is not itself composite, extended, corporeal, or essentially and intrinsically dependent on the body, is the doctrine of spirituality. If there be a life after death, clearly the agent or subject of our vital activities must be capable of an existence separate from the body. The belief in an animating principle in some sense distinct from the body is an almost inevitable inference from the observed facts of life. The lowest savages arrive at the concept of the soul almost without reflection, certainly without any severe mental effort. The mysteries of birth and death, the lapse of conscious life during sleep and in swooning, even the commonest operations of imagination and memory, which abstract a man from his bodily presence even while awake—all such facts invincibly suggest the existence of something besides the visible organism, internal to it, but to a large extent independent of it, and leading a life of its own. In the rude psychology of the savage, the soul is often represented as actually migrating to and fro during dreams and trances, and after death haunting the neighbourhood of its body. Nearly always it is figured as something extremely volatile, a perfume or a breath. Often, as among the Fijians, it is represented as a miniature replica of the body, so small as to be invisible. The Samoans have a name for the soul which means "that which comes and goes". Many savage peoples, such as the Dyaks and Sumatrans, bind various parts of the body with cords during sickness to prevent the escape of the soul. In short, all the evidence goes to show that Dualism, however uncritical and inconsistent, is the instinctive creed of "primitive man" (see Animism).

The Soul in Ancient Philosophy.—Early literature bears the same stamp of Dualism. In the "Rig-Veda" and other liturgical books of India, we find frequent references to the coming and going of *manas* (mind or soul). Indian philosophy, whether Brahminic or Buddhistic, with its various systems of metempsychosis, accentuated the distinction of soul and body, making the bodily life a mere transitory episode in the existence of the soul. They all taught the doctrine of *limited immortality*, ending either with the periodic world-destruction (Brahminism) or with attainment of Nirvana (Buddhism). The doctrine of a world-soul in a highly abstract form is met with as early as the eighth century before Christ, when we find it described as "the unseen seer, the unheard hearer, the unthought thinker, the unknown knower, the Eternal in which space is woven and which is woven in it".

In Greece, on the other hand, the first essays of philosophy took a positive and somewhat materialistic direction, inherited from the pre-philosophic age, from Homer and the early Greek religion. In Homer, while the distinction of soul and body is recognized, the soul is hardly conceived as possessing a substantial existence of its own. Severed from the body, it is a mere shadow, incapable of energetic life. The philosophers did something to correct such views. The earliest school was that of the Hylozoists; these conceived the soul as a kind of cosmic force, and attributed animation to the whole of nature. Any natural force might be designated ψυχή: thus Thales uses this term for the attractive force of the magnet, and similar language is quoted even from Anaxagoras and Democritus. With this we may compare the "mind-stuff" theory and Pan-psychism of certain modern scientists. Other philosophers again described the soul's nature in terms of substance. Anaximander gives it an aeriform constitution; Heraclitus describes it as a fire. The fundamental thought is the same. The cosmic ether or fire is the subtlest of the elements, the nourishing flame which imparts heat, life, sense, and intelligence to all things in their several degrees and kinds. The Pythagoreans taught that the soul is a harmony, its essence consisting in those perfect mathematical ratios which are the law of the universe and the music of the heavenly spheres. With this doctrine was combined, according to Cicero, the belief in a universal world-spirit, from which all particular souls are derived.

All these early theories were cosmological rather than psychological in character. Theology, physics, and mental science were not as yet distinguished. It is only with the rise of dialectic and the growing recognition of the problem of knowledge that a genuinely psychological theory became possible. In Plato the two standpoints, the cosmological and the epistemological, are found combined. Thus in the "Timæus" (p. 30) we find an account derived from Pythagorean sources of the origin of the soul. First the world-soul is created according to the laws of mathematical symmetry and musical concord. It is composed of two elements, one an element of "sameness" (ταὐτόν), corresponding to the universal and intelligible order of truth, and the other an element of distinction or "otherness" (θάτερον), corresponding to the world of sensible and particular existences. The individual human soul is constructed on the same plan. Sometimes, as in the "Phædrus", Plato teaches the doctrine of plurality of souls (cf. the well-known allegory of the charioteer and the two steeds in that dialogue). The rational soul was located in the head, the passionate or spirited soul in the breast, the appetitive soul in the abdomen. In the "Republic", instead of the triple soul, we find the doctrine of three elements within the complex unity of the single soul. The question of immortality was a principal subject of Plato's speculations. His account of the origin of the soul in the "Timæus" leads him to deny the *intrinsic* immortality even of the world-soul, and to admit only an immortality conditional on the good pleasure of God. In the "Phædo" the chief argument for the immortality of the soul is based on the nature of intellectual knowledge interpreted on the theory of reminiscence; this of course implies the pre-existence of the soul, and perhaps in strict logic its eternal pre-existence. There is also an argument from the soul's necessary participation in the idea of life, which, it is argued, makes the idea of its extinction impossible. These various lines of argument are nowhere harmonized in Plato (see Immortality). The Platonic doctrine tended to an extreme Transcendentalism. Soul and body are distinct orders of reality, and bodily existence involves a kind of violence to the higher part of our composite nature. The body is the "prison", the "tomb", or even, as some later Platonists expressed it, the "hell" of the soul. In Aristotle this error is avoided. His definition of the soul as "the first entelechy of a physical organized body potentially possessing life" emphasizes the closeness of the union of soul and body. The difficulty in his theory is to determine what degree of distinctness or separateness from the matter of the body is to be conceded to the human soul. He fully recognizes the spiritual element in thought and describes the "active intellect" (νοῦς ποιητικός) as "separate and impassible", but the precise relation of this active intellect to the individual mind is a hopelessly obscure question in Aristotle's psychology. (See Intellect; Mind.)

The Stoics taught that all existence is material, and described the soul as a breath pervading the body. They also called it Divine, a particle of God (ἀπόσπασμα τοῦ θεοῦ); it was composed of the most refined and ethereal matter. Eight distinct parts of the soul were recognized by them: (a) the ruling reason (τὸ ἡγεμονικόν); (b) the five senses; (c) the procreative powers. Absolute immortality they denied; relative immortality, terminating with the universal conflagration and destruction of all things, some of them (e. g. Cleanthes and Chrysippus) admitted in the case of the wise man; others, such as Panætius and Posidonius, denied even this, arguing that, as the soul began with the body, so it must end with it.

Epicureanism accepted the Atomist theory of Leucippus and Democritus. Soul consists of the finest grained atoms in the universe, finer even than those of wind and heat which they resemble: hence the exquisite fluency of the soul's movements in thought and sensation. The soul-atoms themselves, however, could not exercise their functions if they were not kept together by the body. It is this which gives shape and consistency to the group. If this is destroyed, the atoms escape and life is dissolved; if it is injured, part of the soul is lost, but enough may be left to maintain life. The Lucretian version of Epicureanism distinguishes between *animus* and *anima:* the latter only is soul in the biological sense; the former is the higher, directing principle (τὸ ἡγεμονικόν) in the Stoic terminology, whose seat is the heart, the centre of the cognitive and emotional life.

The Soul in Christian Thought.—Græco-Roman philosophy made no further progress in the doctrine of the soul in the age immediately preceding the Christian era. None of the existing theories had found general acceptance, and in the literature of the period an eclectic spirit nearly akin to Scepticism predominated. Of the strife and fusion of systems at this time the works of Cicero are the best example. On the question of the soul he is by turns Platonic and Pythagorean, while he confesses that the Stoic and Epicurean systems have each an attraction for him. Such was the state of the question in the West at the dawn of Christianity. In Jewish circles a like uncertainty prevailed. The Sadducees were Materialists, denying immortality and all spiritual existence. The Pharisees maintained these doctrines, adding belief in pre-existence and transmigration. The psychology of the Rabbins is founded on the Sacred Books, particularly the account of the creation of man in Genesis. Three terms are used for the soul, *nephesh, nuah,* and *neshamah;* the first was taken to refer to the animal and vegetative nature, the second to the ethical principle, the third to the purely spiritual intelligence. At all events, it is evident that the Old Testament throughout either asserts or implies the distinct reality of the soul. An important contribution to later Jewish thought was the infusion of Platonism into it by Philo of Alexandria. He taught the immediately Divine origin of the soul, its pre-existence and transmigration; he contrasts the *pneuma,* or spiritual essence, with the soul proper, the source of vital phenomena, whose seat is the blood; finally he revived the old Platonic Dualism, attributing the origin of sin and evil to the union of spirit with matter.

It was Christianity that, after many centuries of struggle, applied the final criticisms to the various psychologies of antiquity, and brought their scattered elements of truth to full focus. The tendency of Christ's teaching was to centre all interest in the spiritual side of man's nature; the salvation or loss of the soul is the great issue of existence. The Gospel language is popular, not technical. Ψυχή and πνεῦμα are used indifferently either for the principle of natural life or for spirit in the strict sense. Body and soul are recognized as a dualism and their values contrasted: "Fear ye not them that kill the body . . . but rather fear him that can destroy both soul and body in hell."

In St. Paul we find a more technical phraseology employed with great consistency. Ψυχή is now appropriated to the purely natural life; πνεῦμα to the life of supernatural religion, the principle of which is the Holy Spirit, dwelling and operating in the heart. The opposition of flesh and spirit is accentuated afresh (Rom., i, 18 etc.). This Pauline system, presented to a world already prepossessed in favour of a quasi-Platonic Dualism, occasioned one of the earliest widespread forms of error among Christian writers—the doctrine of the Trichotomy. According to this, man, perfect man (τέλειος), consists of three parts: body, soul, spirit (σῶμα, ψυχή, πνεῦμα). Body and soul come by natural generation; spirit is given to the regenerate Christian alone. Thus, the "newness of life", of which St. Paul speaks, was conceived by some as a superadded entity, a kind of oversoul sublimating the "natural man" into a higher species. This doctrine was variously distorted in the different Gnostic systems. The Gnostics divided man into three classes (a) *pneumatici* or spiritual, (b) *psychici* or animal, (c) *choici* or earthy, ascribing to each class a different origin and destiny. The spiritual were of the seed of Achemoth, and were destined to return in time whence they had sprung, viz. into the *pleroma.* Even in this life they are exempted from the possibility of a fall from their high calling; they therefore stand in no need of good works, and have nothing to fear from the contaminations of the world and the flesh. This class consists of course of the Gnostics themselves. The *psychici* are in a lower position: they have capacities for spiritual life which they must cultivate by good works. They stand in a middle place, and may either rise to the spiritual or sink to the *hylic* level. In this category stands the Christian Church at large. Lastly, the earthy souls are a mere material emanation, destined to perish: the matter of which they are composed being incapable of salvation (μὴ γὰρ εἶναι τὴν ὕλην δεκτικὴν σωτηρίας). This class contains the multitudes of the merely natural man.

Two features claim attention in this the earliest essay towards a complete anthropology within the Christian Church: (1) an extreme spirituality is attributed to "the perfect"; (2) immortality is *conditional* for the second class of souls, not an intrinsic attribute of all souls. It is probable that originally the terms *pneumatici, psychici,* and *choici* denoted at first elements which were observed to exist in all souls, and that it was only by an afterthought that they were employed, according to the respective predominance of these elements in different cases, to represent supposed real classes of men. The doctrine of the four temperaments and the Stoic ideal of the Wise Man afford a parallel for the personification of abstract qualities. The true genius of Christianity, expressed by the Fathers of the early centuries, rejected Gnosticism. The ascription to a creature of an absolutely spiritual nature, and the claim to endless existence asserted as a strictly *de jure* privilege in the case of the "perfect", seemed to them an encroachment on the incommunicable attributes of God. The theory of Emanation too was seen to be a derogation from the dignity of the Divine nature. For this reason, St. Justin, supposing that the doctrine of natural immortality logically implies eternal existence, rejects it, making this attribute (like Plato in the "Timæus") dependent on the free will of God; at the same time he plainly asserts the *de facto* immortality of every human soul. The doctrine of *conservation*, as the necessary complement of creation, was not yet elaborated. Even in Scholastic philosophy, which asserts natural immortality, the abstract possibility of annihilation through an act of God's absolute power is also admitted. Similarly, Tatian denies the simplicity of the soul, claiming that absolute simplicity belongs to God alone. All other beings, he held, are composed of matter and spirit. Here again it would be rash to urge a charge of Materialism. Many of these writers failed to distinguish between corporeity in strict essence and corporeity as a necessary or natural concomitant. Thus the soul may itself be incorporeal and yet require a body as a condition of its existence. In this sense St. Irenæus attributes a certain "corporeal character" to the soul; he represents it as possessing the form of its body, as water possesses the form of its containing vessel. At the same time, he teaches fairly explicitly the incorporeal nature of the soul. He also sometimes uses what seems to be the language of the Trichotomists, as when he says that in the Resurrection men shall have each their own body, soul, and spirit. But such an interpretation is impossible in view of his whole position in regard to the Gnostic controversy.

The dubious language of these writers can only be understood in relation to the system they were opposing. By assigning a literal divinity to a certain small aristocracy of souls, Gnosticism set aside the doctrine of Creation and the whole Christian idea of God's relation to man. On the other side, by its extreme dualism of matter and spirit, and its denial to matter (i. e. the flesh) of all capacity for spiritual influences, it involved the rejection of cardinal doctrines like the Resurrection of the Body and even of the Incarnation itself in any proper sense. The orthodox teacher had to emphasize: (1) the soul's distinction from God and subjection to Him; (2) its affinities with matter. The two converse truths, viz. those of the soul's affinity with the Divine nature and its radical distinction from matter, were apt to be obscured in comparison. It was only afterwards and very gradually, with the development of the doctrine of grace, with the fuller recognition of the supernatural order as such, and the realization of the Person and Office of the Holy Spirit, that the various errors connected with the *pneuma* ceased to be a stumbling-block to Christian psychology. Indeed, similar errors have accompanied almost every subsequent form of heterodox Illuminism and Mysticism.

Tertullian's treatise "De Anima" has been called the first Christian classic on psychology proper. The author aims to show the failure of all philosophies to elucidate the nature of the soul, and argues eloquently that Christ alone can teach mankind the truth on such subjeects. His own doctrine, however, is simply the refined Materialism of the Stoics, supported by arguments from medicine and physiology and by ingenious interpretations of Scripture, in which the unavoidable materialism of language is made to establish a metaphysical Materialism. Tertullian is the founder of the theory of Traducianism, which derives the rational soul *ex traduce*, i. e. by procreation from the soul of the parent. For Tertullian this was a necessary consequence of Materialism. Later writers found in the doctrine a convenient explanation of the transmission of original sin. St. Jerome says that in his day it was the common theory in the West. Theologians have long abandoned it, however, in favour of Creationism, as it seems to compromise the spirituality of the soul (cf. TRADUCIANISM). Origen taught the pre-existence of the soul. Terrestrial life is a punishment and a remedy for pre-natal sin. "Soul" is properly degraded spirit: flesh is a condition of alienation and bondage (cf. Comment. ad Rom., i, 18). Spirit, however, finite spirit, can exist only in a body, albeit of a glorious and ethereal nature.

Neo-Platonism, which through St. Augustine contributed so much to spiritual philosophy, belongs to this period. Like Gnosticism, it uses emanations. The primeval and eternal One begets by emanation *nous* (intelligence); and from *nous* in turn springs *psyche* (soul), which is the image of *nous*, but distinct from it. Matter is a still later emanation. Soul has relations to both ends of the scale of reality, and its perfection lies in turning towards the Divine Unity from which it came. In everything, the neo-Platonist recognized the absolute primacy of the soul with respect to the body. Thus, the mind is always active, even in sense-perception; it is only the body that is passively affected by external stimuli. Similarly, Plotinus prefers to say that the body is in the soul rather than vice versa: and he seems to have been the first to conceive the peculiar manner of the soul's location as an undivided and universal presence pervading the organism (*tota in toto et tota in singulis partibus*). It is impossible to give more than a very brief notice of the psychology of St. Augustine. His contributions to every branch of the science were immense; the senses, the emotions, imagination, memory, the will, and the intellect—he explored them all, and there is scarcely any subsequent development of importance that he did not forestall. He is the founder of the introspective method. *Noverim Te, noverim me* was an intellectual no less than a devotional aspiration with him. The following are perhaps the chief points for our present purpose: (1) he opposes body and soul on the ground of the irreducible distinction of thought and extension (cf. DESCARTES). St. Augustine, however, lays more stress on the volitional activities than did the French Idealists. (2) As against the Manichæans he always asserts the worth and dignity of the body. Like Aristotle he makes the soul the final cause of the body. As God is the Good or *Summum Bonum* of the soul, so is the soul the good of the body. (3) The origin of the soul is perhaps beyond our ken. He never definitely decided between Traducianism and Creationism. (5) As regards spirituality, he is everywhere most explicit, but it is interesting as an indication of the futile subtleties current at the time to find him warning a friend against the controversy on the corporeality of the soul, seeing that the term "corpus" was used in so many different senses. "Corpus, non caro" is his own description of the angelic body.

Medieval psychology prior to the Aristotelean revival was affected by neo-Platonism, Augustinianism, and mystical influences derived from the works of pseudo-Dionysius. This fusion produced sometimes, notably in Scotus Eriugena, a pantheistic theory of the soul. All individual existence is but the development of the Divine life, in which all things are destined to be resumed. The Arabian commentators, Averroës and Avicenna, had interpreted Aristotle's psychology in a pantheistic sense. St. Thomas, with the rest of the Schoolmen, amends this portion of the Aristotelean tradition, accepting the rest with no important modifications. St. Thomas's doctrine is briefly as follows: (1) the rational soul, which is one with the sensitive and vegetative principle, is the form of the body. This was defined as of faith by the Council of Vienne of 1311; (2)

the soul is a substance, but an incomplete substance, i. e. it has a natural aptitude and exigency for existence in the body, in conjunction with which it makes up the substantial unity of human nature; (3) though connaturally related to the body, it is itself absolutely simple, i. e. of an unextended and spiritual nature. It is not wholly immersed in matter, its higher operations being intrinsically independent of the organism; (4) the rational soul is produced by special creation, at the moment when the organism is sufficiently developed to receive it. In the first stage of embryonic development, the vital principle has merely vegetative powers; then a sensitive soul comes into being, educed from the evolving potencies of the organism; later yet, this is replaced by the perfect rational soul, which is essentially immaterial and so postulates a special creative act. Many modern theologians have abandoned this last point of St. Thomas's teaching, and maintain that a fully rational soul is infused into the embryo at the first moment of its existence.

THE SOUL IN MODERN THOUGHT.—Modern speculations respecting the soul have taken two main directions, Idealism and Materialism. Agnosticism need not be reckoned as a third and distinct answer to the problem, since, as a matter of fact, all actual agnosticisms have an easily recognized bias towards one or other of the two solutions aforesaid. Both Idealism and Materialism in present-day philosophy merge into Monism, which is probably the most influential system outside the Catholic Church.

History.—Descartes conceived the soul as essentially thinking (i. e. conscious) substance, and body as essentially extended substance. The two are thus simply disparate realities, with no vital connexion between them. This is significantly marked by his theory of the soul's location in the body. Unlike the Scholastics he confines it to a single point—the pineal gland—from which it is supposed to control the various organs and muscles through the medium of the "animal spirits", a kind of fluid circulating through the body. Thus, to say the least, the soul's biological functions are made very remote and indirect, and were in fact later on reduced almost to a nullity: the lower life was violently severed from the higher, and regarded as a simple mechanism. In the Cartesian theory animals are mere automata. It is only by the Divine assistance that action between soul and body is possible. The Occasionalists went further, denying all interaction whatever, and making the correspondence of the two sets of facts a pure result of the action of God. The Leibnizian theory of Pre-established Harmony similarly refuses to admit any inter-causal relation. The superior monad (soul) and the aggregate of inferior monads which go to make up the body are like two clocks constructed with perfect art so as always to agree. They register alike, but independently: they are still two clocks, not one. This awkward Dualism was entirely got rid of by Spinoza. For him there is but one, infinite substance, of which thought and extension are only attributes. Thought comprehends extension, and by that very fact shows that it is at root one with that which it comprehends. The alleged irreducible distinction is transcended: soul and body are neither of them substances, but each is a property of the one substance. Each in its sphere is the counterpart of the other. This is the meaning of the definition, "Soul is the Idea of Body". Soul is the counterpart within the sphere of the attribute of thought of that particular mode of the attribute of extension which we call the body. Such was the fate of Cartesianism.

English Idealism had a different course. Berkeley had begun by denying the existence of material substance, which he reduced merely to a series of impressions in the sentient mind. Mind is the only substance. Hume finished the argument by dissolving mind itself into its phenomena, a loose collection of "impressions and ideas". The Sensist school (Condillac etc.) and the Associationists (Hartley, the Mills, and Bain) continued in similar fashion to regard the mind as constituted by its phenomena or "states", and the growth of modern positive psychology has tended to encourage this attitude. But to rest in Phenomenalism as a theory is impossible, as its ablest advocates themselves have seen. Thus, J. S. Mill, while describing the mind as merely "a series [i. e. of conscious phenomena] aware of itself as a series", is forced to admit that such a conception involves an unresolved paradox. Again, W. James's assertion that "the passing thought is itself the Thinker", which "appropriates" all past thoughts in the "stream of consciousness", simply blinks the question. For surely there is something which in its turn "appropriates" the passing thought itself and the entire stream of past and future thoughts as well, viz. the self-conscious, self-asserting "I", the substantial ultimate of our mental life. To be in this sense "monarch of all it surveys" in introspective observation and reflective self-consciousness, to appropriate without itself being appropriated by anything else, to be the genuine owner of a certain limited section of reality (the stream of consciousness), this is to be a free and sovereign (though finite) personality, a self-conscious, spiritual substance in the language of Catholic metaphysics.

Criticism.—The foregoing discussion partly anticipates our criticism of Materialism (q. v.). The father of modern Materialism is Hobbes, who accepted the theory of Epicurus, and reduced all spirits either to phantoms of the imagination or to matter in a highly rarefied state. This theory need not detain us here. Later Materialism has three main sources: (1) Newtonian physics, which taught men to regard matter, not as inert and passive, but as instinct with force. Why should not life and consciousness be among its unexplored potencies? (Priestley, Tyndall, etc.) Tyndall himself provides the answer admitting that the chasm that separates psychical facts from material phenomena is "intellectually impassable". Writers, therefore, who make thought a mere "secretion of the brain" or a "phosphorescence" of its substance (Vogt, Moleschott) may be simply ignored. In reply to the more serious Materialism, spiritualist philosophers need only re-assert the admissions of the Materialists themselves, that there is an impassable chasm between the two classes of facts. (2) Psychophysics, it is alleged, shows the most minute dependence of mind-functions upon brain-states. The two orders of facts are therefore perfectly continuous, and, though they may be superficially different, yet they must be after all radically one. Mental phenomena may be styled an epiphenomenon or by-product of material force (Huxley). The answer is the same as before. There is no analogy for an epiphenomenon being separated by an "impassable chasm" from the causal series to which it belongs. The term is, in fact, a mere verbal subterfuge. The only sound principle in such arguments is the principle that essential or "impassable" distinctions in the effect can be explained only by similar distinctions in the cause. This is the principle on which Dualism, as we have explained it, rests. Merely to find relations, however close, between mental and physiological facts does not advance us an inch towards transcending this Dualism. It only enriches and fills out our concept of it. The mutual compenetration of soul and body in their activities is just what Catholic philosophy (anticipating positive science) had taught for centuries. Man is two and one, a divisible but a vital unity. (3) Evolutionism endeavours to explain the origin of the soul from merely material forces. Spirit is not the basis and principle; rather it is the ultimate efflorescence of the Cosmos.

If we ask then "what *was* the original basis out of which spirit and all things arose?" we are told it was the Unknowable (Spencer). This system must be treated as Materialistic Monism. The answer to it is that, as the outcome of the Unknowable has a spiritual character, the Unknowable itself (assuming its reality) must be spiritual.

As regards monistic systems generally, it belongs rather to cosmology to discuss them. We take our stand on the consciousness of individual personality, which consciousness is a distinct deliverance of our very highest faculties, growing more and more explicit with the strengthening of our moral and intellectual being. This consciousness is emphatic, as against the figments of a fallaciously abstract reason, in asserting the self-subsistence (and at the same time the finitude) of our being, i. e. it declares that we are *independent* inasmuch as we are truly *persons* or *selves*, not mere attributes or adjectives, while at the same time, by exhibiting our manifold limitations, it directs us to a higher Cause on which our being depends.

Such is the Catholic doctrine on the nature, unity, substantiality, spirituality, and origin of the soul. It is the only system consistent with Christian faith, and, we may add, morals, for both Materialism and Monism logically cut away the foundations of these. The foregoing historical sketch will have served also to show another advantage it possesses, viz. that it is by far the most comprehensive, and at the same time discriminating, synthesis of whatever is best in rival systems. It recognizes the physical conditions of the soul's activity with the Materialist, and its spiritual aspect with the Idealist, while with the Monist it insists on the vital unity of human life. It enshrines the principles of ancient speculation, and is ready to receive and assimilate the fruits of modern research. Michael Maher.
Joseph Boland.

South Carolina, one of the thirteen original colonies of the United States, has an area of 30,570 square miles throughout its 35 counties, with an extreme breadth of 235 miles and an extreme width of 215. It is bounded eastward by North Carolina and the Atlantic, with a coast line of 200 miles; Georgia lies to the west and North Carolina bounds it on the north. Columbia is the capital.

Physical Characteristics.—South Carolina rises from marshland in its eastern tidewater section to a mountainous region in the extreme western portion of the state. The Pedee and the Santee are navigable rivers flowing into the Atlantic and reaching the sea through deltas in the marsh regions. It is probable that more than half of the state was at one time in dense timber.

Population.—The state is twenty-sixth in rank of population according to the census of 1910. The population in 1820 was 502,741; in 1840, 594,398; in 1860, 703,708; in 1880, 995,577; in 1900, 1,340,316; in 1910, 1,515,400. Beaufort County is the fifth county in the United States in point of density of negro population, having a percentage of 90.5. In 1790 South Carolina was second only to Virginia in the number of its slaves, having 107,097. The largest cities with their respective populations are as follows: Charleston, 58,833; Columbia, 26,319; Spartanburg, 17,517; Greenville, 15,741.

Resources.—More than one-third of the cultivated land is devoted to cotton. It is the fourth cotton state in the Union, producing in 1910, 1,116,000 bales. The islands along the coast and the swampy tidewater region from the very beginning yielded much rice, the state ranking second in the Union in this product. Much attention is given to the production of early fruit and vegetables for northern markets and a more recent industry is the planting and shipping of tea. From the pine forests lumber and naval supplies are obtained, and a great deal of phosphate rock is dug in the southern tidewater region, yielding a rich supply of fertilizer for export. The chief manufacturing industries are cotton weaving, lumber milling, turpentine distilling, rice cleaning, and fertilizer. According to the state census of 1905 the capital invested in its manufacturing industries was $113,422,224, employing 59,441 wage earners who were paid $13,868,950. The value of the product totalled $79,376,262. The cereal crop of 1910 was oats, 4,599,000 bushels; corn, 44,733,000; wheat, 4,983,000; rye, 40,000. The railway mileage of the state in 1907 was 3,324.41. Charleston has long been one of the leading cities of the South, owing its prosperity largely to its fine harbour. Its imports in 1907 were $3,528,553; in 1908, $3,375,997; its exports in 1907, $1,082,466, and in 1908, $2,510,965. Columbia, the capital, is on the Congaree River, and its fine water power is used for several large cotton factories. Greenville and Spartanburg manufacture cotton cloth. The banks of the state are in a prosperous condition, and scarcely a town of any consequence is without its banks, either national, state, or private. There is a State Bank Examiner, who regularly watches the operations of all these institutions, and a bank failure is rarely chronicled. There are 19 national banks with a capital of $2,713,000; 143 state banks with a capital of $6,332,871, and 9 private banks with a capital of $106,000.

Seal of South Carolina

Education.—The supervision of public instruction is vested in a state superintendent of education, elected for two years; a state board of education, composed of the governor, the state superintendent of education, and not above seven persons appointed by the governor; a county superintendent, elected for four years, and, in each county, a county board of education of three members, one of whom shall be the county superintendent and the other two appointees of the state board, whose terms of office are two years. The General Assembly makes provision for the election or appointment of all other necessary school officers, provides a system of free public schools for all children between the ages of six and twenty-one, and divides the county into school districts. The main school fund derives from a three-mill tax on all taxable property, an annual dog tax of fifty cents, and the poll tax assessed and collected in the various school districts. In addition to these sources the school fund drew, up to 1907, the state dispensary tax, the most unique feature of the law. School districts are allowed to vote for special taxation. No public money from whatever source derived shall be used, either directly or indirectly, in aid or maintenance "of any college, school, hospital, orphan house or other institution, society or organization of whatever kind which is wholly or in part under the direction or control of any church or of any religious or sectarian denomination, society or organization". Separate schools are provided for children of the white and coloured races, and no child of either race is ever permitted to attend the school provided for children of the other race.

Section 1201a of the General Code reads: "That the nature of alcoholic drinks and narcotics and special instruction as to their effect upon the human system, in connection with the several divisions of the subject of Physiology and Hygiene, shall be included in the branches of study taught in the common or public schools in the State of South Carolina and shall be studied and taught as thoroughly and in the same manner as other like required branches are in said schools, by the use of text books in the hands of pupils where other branches are thus studied in said schools, and orally in the case of pupils unable to read, and shall be taught by all teachers and studied by all pupils in all said schools supported wholly or in part by public money . . . and any officer, school director, committee, superintendent or teacher who shall refuse or neglect to comply with the requirements of this Act, or shall neglect or fail to make proper provisions for the instruction required and in the manner specified by the first section of this Act, for all pupils in each and every school under his jurisdiction shall be removed from office and the vacancy filled as in other cases." Schools must be kept open and the exercises continued in each school district for a period of at least three months in each year. "Arbour Day", the third Friday in November, and Calhoun's Birthday, 18 March, "South Carolina Day", are observed in an appropriate manner. The age limit of pupils—between the ages of six and twenty-one—has been ruled under an opinion of the attorney-general as prohibiting the establishing of free kindergartens.

For white children there are 2712 public schools in the state (1909), employing 933 men teachers and 3247 women, and reaching 153,807 pupils with an average attendance of 107,368. For negro children there are 2354 public schools, employing 894 men teachers and 1802 women, and teaching 181,095 pupils, with an average attendance of 123,481. The total revenue for both white and negroes was $2,345,647.72; out of which there was expended $1,590,732.51 for whites and $308,153.16 for negroes. The state's *per capita* expenditure, according to enrolment, was in 1899, $4.90 for white, $1.42 for negro, $2.69 average for both; in 1904, $6.88 for white, $1.47 for negro, $4.08 for both; in 1909, $10.34 for white, $1.70 for negro, $5.67 for both. There are 27 institutions of higher education for whites and 11 for negroes. Of the 27 institutions for whites, 5, non-sectarian, receive a total state support of $355,994.88; 5 are Presbyterian, 3 Methodist, 3 Baptist, and 2 Lutheran. The remainder are non-sectarian seminaries or technical colleges. The University of South Carolina, chartered in 1801, is located at Columbia, has 29 officers and members of faculty, 298 students and a total income of $97,385.18. Clemson Agricultural College, chartered in 1889, located at Clemson, has 47 officers and members of the faculty, 665 students, and a total income of $201,477.28. The Winthrop Normal and Industrial College, chartered in 1891, located at Rock Hill, has 45 officers and members of faculty, and a total income of $94,685.37.

HISTORY.—A. *Civil.*—Owing in part to presumably unfavourable climatic conditions, in part to the fact that the land lay in the disputed zone between the English and Spanish settlements, colonization in the Carolinas was tardy and spasmodic. In 1629, a patent to the territory had been granted by Charles I and forfeited through inaction on the part of the patentees. Virginia assumed to make grants without any permanent results, though a small company of dissenters, in 1653, migrated from that colony and began the Albemarle settlement, with a considerable number of Quakers; while New Englanders, a few years later, purchased land from the Indians on Cape Fear River, but abandoned the settlement with disgust. At last, in 1663, Charles II granted to the Earl of Clarendon and seven other of his favourites all Carolina from the 36° to 31° north, and Cape Fear was settled under this grant by colonists from Barbadoes. The proprietors were nearly absolute in their power, though the "advice, consent, and approbation" of the freemen were necessary before laws could become valid and there was to be freedom of religious worship. The colony, however, did not prosper, and the relations between proprietors and colonists were further strained by an attempt to govern the colony under a constitution framed by the Earl of Shaftesbury, with more or less assistance from the philosopher Locke. This document was a remarkably impractical product, based, quaintly, upon medieval and aristocratic ideas with one of its principal and avowed motives—"to avoid erecting a numerous democracy". Its model was the independent Palatinate of Durham; officials were called palatines, chancellors, high stewards, and admirals. Two-fifths of the land was to belong to the nobility. There was to be a Parliament, which was to consider nothing but what was referred to it by the Proprietory Council. Freedom of worship was granted, but citizens must profess their belief in God and the obligation to worship, and, contrary to the wish of Locke, the Church of England was to be an Established Church. Dissatisfaction with this Constitution, which was never enforced, and with the Navigation Acts, kept the Carolinas in a perpetual ferment.

In 1670 the foundation of South Carolina was laid in the settlement of the Ashley River and an independent governor was appointed. Locke's Constitution was abandoned, and a mode of government was adopted limiting the powers of the executive and outlining a legislature of elected delegates. In 1672 Charleston was fixed as the permanent site for the settlement, a number of Dutch immigrants from New York having arrived the year before, as well as a shipload of slaves, the latter only too soon to outnumber the whites. The colony was further augmented by Presbyterian Scotch-Irish in 1683, but the most important addition to the little colony was the coming of the French Huguenots, upon the revocation of the Edict of Nantes, who settled on the Cooper River, and were later admitted to the political rights of the colony. But worthless settlers, selfish and unenlightened proprietors, tactless governors, religious dissent with the party of the Church and the king, and the uneasy proximity of the Spanish settlements, led to open revolt, the banishment of a governor, and, in 1689, the declaration of martial law. Trouble was averted by the appointment of Archdale, one of the proprietors and a Quaker, as governor, who made many important concessions, as did his successor, Blake. In 1697 religious liberty was accorded to all "except Papists". An attempt was made in 1704 to exclude Dissenters from the Assembly, but the law was annulled by Queen Anne. From now on until the Revolution the course of South Carolina was a succession of cumulatively forcible resistances to interference on the part of the proprietors, and, after 1721, when the Crown assumed control, on the part of the sovereign and the royal governors, interspersed with the dissolving of popular assemblies, the annulment of governmental decrees, and a series of bloody campaigns against the Indians, with the gradual formation of two distinct social classes, the rise of Charleston as a mart of trade, a seat of wealth and fashion, and a virile and cosmopolitan community. The colony warmly sympathized with the northern colonies, the royal governor being forced to abdicate, taking refuge on a British man-of-war in September, 1775. A State Constitution was first adopted on 26 March, 1776, and, by a vote of 149 to 73, the national Constitution was ratified on 23 May, 1788.

Early in its state history South Carolina evinced a feeling for States' Rights, which made it the leader in the southern agitation that led up to the Civil War. A Nullification Act was passed in 1832 in opposition to the high tariff upon importations passed by the Federal Government; but the trouble was temporarily relieved by the passing of a compromise tariff in the succeeding session of Congress. Serious difficulties arose upon the election of Lincoln to the presidency. On the day of his election both Houses of the State Legislature in joint session passed a resolution providing for a state convention to consider the withdrawal of the state from the Union. In November the Legislature passed an act authorizing such a convention, declaring that "a sovereign State of the Union had a right to secede from it; that the States of the Union are not subordinate to the national government, were not created by it, and do not belong to it; that *they* created the national government; that from them it derives its power; that to them it is responsible; and that when it abuses the trust reposed in it they, as equal sovereigns, have a right to resume the powers respectively delegated to it by them." Orators now stumped the state, vigilance committees were organized, assemblages of negroes were dispersed, and the delegates chosen on 3 December, 1860, met at Columbia on the 17th, adjourning to Charleston, owing to the prevalence of smallpox. On 20 December an ordinance declaring that "the union now subsisting between South Carolina and other States under the name of the United States of America is hereby dissolved" was unanimously adopted forty-five minutes after it was submitted. A proclamation to this effect was read and adopted amid scenes of the wildest enthusiasm. All federal office-holders at once resigned. A new banner was adopted for "The Independent Commonwealth". A committee was appointed to wait on the president and treat for the possession of public lands within the state. They urged the president to immediately withdraw all national troops from Charleston harbour and presented him with a resolution of secession. Lincoln was courteous but firm. He replied that he would present their demands to Congress, but gave them to understand that he should defend Fort Sumter. A taunting reply was forthcoming from the commissioners which the president declined to answer. The commissioners returned and, on 12 April, 1861, South Carolinians attacked Fort Sumter, compelled its evacuation by federal troops, and the state for four years became one of the most energetic and zealous defenders of the Confederacy.

At the close of the war a provisional government was set up by the president on 30 June, 1865, and a state convention, in the fall of the same year, repealed the ordinance of secession and declared slavery abolished. An election was held in November and a state government was elected which continued in office until superseded by the military government in 1867—South and North Carolina being included in one military district. The state passed safely through the terrors of the Reconstruction Period. On 14 January, 1868, at a convention composed of 34 whites and 63 blacks the Constitution was adopted and ratified at an election the following year, which chose 85 negroes and 72 white men for the State Legislature. On 13 July, 1868, the Fourteenth Amendment was ratified and the military authorities were withdrawn. The Fifteenth Amendment was ratified by the State Legislature, 11 March, 1869.

In the city of Charleston, from 1 December, 1901, to 1 May, 1902, a "South Carolina Interstate and West Indian Exposition" was held, which eloquently demonstrated the development of the Southern states since the Civil War and the industries and resources of Cuba, Porto Rico, Mexico, and South America.

B. *Ecclesiastical.*—In the stormy period of religious dissent that characterized the early colonial years of the Carolinas, Catholics bore no part; nor indeed does there appear any evidence of the presence of a single active Catholic in South Carolina until after the Revolution. This religious dissent came from the Quakers and a growing class of colonists, indifferent to religious ideals, who objected to the enforced establishment of the Church of England, involving on their part the payment of three-fourths share for the maintenance of a religious establishment representing a minority. But the hypothetical presence of Catholics was duly provided for in the Acts of 1696 renewing toleration, by the usual parenthetical intrusion of the phrase—"Papists only excepted". Indeed it was not until a generation after the Revolution, with its disestablishment of the Anglican Church in the states of North and South Carolina, that the Metropolitan of the United States solicited the pope to erect a southern diocese for the bands of Catholics scattered through Georgia and the Carolinas who were already becoming indifferent and malcontent, if not actually heretical. To include these states in its territory, the See of Charleston was erected by Pius VII, 11 July, 1820, and the Rev. John England, the parish priest of Killorgan and Ballymoodan, Ireland, was consecrated its bishop at the Cathedral of St. Finnbar, refusing at the same time to take a special oath of allegiance to the King of England. The bishop embarked for the United States on 22 October; set about his onerous duties with indefatigable assiduity; founded the first Catholic newspaper of America, "The United States' Catholic Miscellany", which, with a slight intermission, endured up to the Civil War; established The Philosophical and Classical Seminary of Charleston for Catholics and non-Catholics alike; organized, in 1830, the Sisters of Our Lady of Mercy; drew up a model Constitution for the Church, and incorporated its trustees. Bishop England combined in a remarkable degree practical insight, indomitable energy, and wide culture, while struggling against baffling difficulties.

In 1850, during the episcopate of Bishop Reynolds, the See of Savannah was erected with jurisdiction over Georgia and Eastern Florida, and the Diocese of Charleston henceforth comprised the Carolinas with a Catholic population estimated at 8000. The Civil War wrought terrible havoc with Catholic lives and Church property, culminating in the horrors of Sherman's march to the sea, and Bishop Lynch displayed remarkable energy in building up again his ruined and penniless diocese. The Vicariate Apostolic of North Carolina was erected by a Papal Bull, 3 March, 1868, so that under the present episcopate of Bishop Henry P. Northrop, the Diocese of Charleston comprises simply the State of South Carolina. There are in the diocese 108 religious women, novices and postulants, 19 secular priests, 12 churches with resident priests, 17 missions with churches, 75 stations and 8 chapels; 5 academies for young ladies with 395 pupils; 9 parishes with parochial schools providing for 859 pupils; one hospital, the Infirmary and Sanitarium of St. Francis Xavier, under the Sisters of Mercy, at Charleston. The diocese supports and cares for 72 orphans and the estimated Catholic population of the state is 9650.

DENOMINATIONAL STATISTICS (1908)

Legislation Affecting Religion.—The State allows a rectory and two acres of land with building to be exempt from taxation. Nor are religious houses taxed. Teaching orders have special privileges exempting their schools, as the parochial schools, from taxation. Full liberty of conscience is granted in South Carolina, but it has been held that this does not legalize wilful or profane swearing or scoffing or prevent legislation prohibiting the conduct of secular business, not of an imperative nature, on Sunday. South Carolina recognizes as legal holidays 1 January, 19 January, Lee's Birthday, 11 May, Confederate Memorial Day, 3 June, Jefferson Davis' Birthday, 4 July, Labour Day, Election Day, Christmas, and Thursday of Fair Week, but no Church holy days, as such, are recognized as holidays. The law allows the same privileges to communications made to a priest under the seal of a confession as it does to confidential communications made by a client to his counsel or by a patient to his physician. The statutes contain no provisions making any exception between the rights and privileges of civil or ecclesiastical corporations. The property of the Church in the diocese is held by the bishop and his successors in office. The sessions of the Legislature are opened with prayer; those of the Courts are not.

Marriage and Divorce.—The marriage laws of South Carolina prohibit all marriages within the Levitical degree, of white with negro, or white with Indian. It is one of the few states in the Union that does not require the taking out of marriage licenses. A startling feature of the South Carolina law is the fact that no divorces are granted. All laws permitting divorce were repealed in 1878 and have never been re-enacted. From 1867 to the repeal of the Divorce Law South Carolina had granted but 163 divorces, which was at the rate of 1 per 100,000 of population.

Excise and Dispensary Act.—Quite the most unique feature of the prohibition legislation of South Carolina—indeed one of the most unique excise features of any state legislation—was the passing of the Dispensary Act which placed the entire control of the liquor traffic in the hands of the Government, the profits from which accrued to the state school fund. This Act was abolished in 1907 under the pressure of a temperance movement that was sweeping through the Southern states and local option was adopted with the result that in 1909 eighteen counties had voted prohibition. The Dispensary Law had scarcely been enacted in 1892 when it met with fierce opposition, receiving, however, hearty official support from Governor Tillman. In 1894 the Supreme Court of the State decided that it was unconstitutional, but successive Legislatures modified the original act in conformity to the ruling of the Court. In 1897, the United States Supreme Court decided that the section forbidding the importation of liquor into the state by private persons violated the inter-state commerce laws of Congress.

Wills.—Every person is entitled to make a will unless insane, under age, or labouring under some disability of law arising from want of capacity or want of perfect liberty of action. Married women deal, in every respect, as though they were single, and have the same power to make contracts with regard to their separate property as do their husbands. All wills shall be in writing and signed by the party devising, or by some other person in his presence and by his express direction, and shall be attested and subscribed, in the presence of said devisor, by three or more credible witnesses, each in the presence of the other. No noncupative will shall be good, where the estate exceeds fifty dollars, unless the same is provided by the oaths of three witnesses who were present at the making thereof and bid by the testator to bear witness that such was his will, or words to that effect; nor unless such will was made during the last sickness of the deceased, in the house or place where he shall have died. No testimony shall be admitted to prove such a will, if six months shall have elapsed after speaking the testamentary words, except such testimony, or the substance thereof, was committed to writing within six days after the making of said will, and not then, unless such will shall be presented for probate within twelve months. The assets which come into the hands of the executors or administrators shall be applied to the payment of the debts of the estate in the following order: (1) Funeral and other expenses of last sickness, charges of probate or letters of administration; (2) Debts due to public; (3) Judgments, mortgages, and executions—the oldest first; (4) Rent; (5) Bonds, debts by speciality and debts by simple contract.

South Dakota, the thirty-ninth state, admitted to the Union on 2 November, 1889, is officially bounded as follows: "Beginning at the point of intersection of the western boundary of Minnesota with the northern boundary of Iowa and running thence northerly along the western boundary of Minnesota to its intersection with the 7th standard parallel, thence west on the line of the 7th standard parallel produced due west to the intersection with the 27th meridian of longitude west of Washington (Approx. 104 W. Greenwich) thence south on the 27th meridian of longitude to its intersection with the northern boundary line of Nebraska, thence easterly along said northern boundary line of Nebraska to its intersection with the western boundary line of Iowa, thence north along the western boundary line of the State of Iowa to the north-west corner of said State of Iowa, thence east along the northern boundary line of Iowa to the place of beginning."

The state contains 76,850 square miles. Generally the surface is undulating prairie lands, except in the south-western portion which is occupied by the Black Hills. The general altitude is about fifteen hundred feet above sea level. The lowest point, Bigstone Lake on the eastern boundary, is 962 feet, and Harney's Peak in the Black Hills rises to 7216 feet. The Missouri River divides the state into nearly equal portions having quite distinct soil characteristics; the portion east of the river being glacial clay, and the portion west being in part covered with a tenacious clay formed by the disintegration of Fort Pierre Shales, and the remainder with Laramie loam eroded from the western mountains. The population numbers 583,888 (1910) and is chiefly of American origin. The chief foreign elements are German and Scandinavian. There are about 18,000 Sioux Indians residing upon lands in severalty in the state.

Resources.—Agriculture is the chief resource and the main products for 1910 were:

Corn	54,050,000	bushels	—$21,620,000
Wheat	46,720,000	"	— 41,581,000
Oats	35,075,000	"	— 10,522,000
Barley	18,655,000	"	— 10,633,000
Rye	595,000	"	— 363,000
Flaxseed	3,300,000	"	— 7,557,000
Potatoes	2,420,000	"	— 2,057,000
Hay	2,750,000	tons	— 19,000,000

The Black Hills region is rich in minerals and gold mining is an important industry. There are extensive lime and cement works in the state and considerable stone quarries. The mineral product of 1909 was as follows: gold, $6,447,093; mica, $1,000,000; lime, cement and other minerals, and stone, $2,552,917. In 1910 the value of gold produced fell to $5,187,070. Manufacturing is but little developed. Flour milling and the manufacture of butter in creameries are the leading industries. The last figures are for 1905 when the total product of manufactories was $13,085,333, of which $2,182,653 was produced by creameries and $6,519,354 by flour mills. A considerable wholesaling is done from Aberdeen, Sioux Falls, Watertown, and other points. Agricultural products in 1909 shipped to markets outside the state returned $123,706,000. South Dakota is well provided with railroad communication for intra state and interstate transportation, the total mileage (1910) being 3953 miles.

Education.—The public education system is correlated from the common schools through the high schools to the state university. For the maintenance of public education in the state, Congress granted a total of 3,531,174 acres of land. About one-eighth of this has been sold for the sum of $7,725,637, which returns an annual revenue of interest and rentals of a half million dollars. The school fund is most carefully guarded by the constitution and laws. It is believed the ultimate school fund will maintain public education without taxation. The total expenditure for public school purposes (1909) was $3,152,000.09. There were 169,706 persons of school age (between 6 and 21 years), of whom 121,165 attended school in 1909. There were then 4358 schoolhouses and 5555 teachers. The state university, located at Vermilion, was first opened and endowed by the territory in 1882. It has colleges of letters, arts and sciences, law, medicine, engineering, and music, each presided over by a dean under the general direction of the president. There are 48 members of the faculty and 445 students. The State College of Agriculture and Mechanic Arts, located at Brookings, is supported jointly by the State and Federal governments. It was opened in the autumn of 1884. There were forty-three members of the faculty and 525 students (1909).

The State maintains four normal schools, located respectively at Madison, Spearfish, Springfield, and Aberdeen; the latter institution has industrial features. The State likewise maintains a school for the deaf at Sioux Falls, for the blind at Gary, and for the feeble-minded at Redfield; the training school for incorrigible boys and girls is at Plankinton. The schools for the deaf, blind, feeble-minded, and incorrigibles are under the supervision of the State Board of Charities, but the university and other schools of higher education are under the State Regents of Education. Several religious denominations maintain colleges in the state; the Baptists at Sioux Falls, the Catholics at Chamberlain, the Congregationalists at Yankton and Redfield, the Scandinavian Lutherans at Canton and German Lutherans at Eureka, the Mennonites at Freeman, the Methodist Episcopals at Mitchell, the Presbyterians at Huron. The Episcopalians maintain a seminary for young ladies at Sioux Falls, and the Free Methodists have a seminary at Wessington Springs. The Catholic Church has academies at Aberdeen, Bridgewater, Bristol, Dell Rapids, Elkton, Epiphany, Farmer, Turton, Hoven, Howard, Jefferson, Kranzburg, Marion, Milbank, Mitchell, Parkston, Salem, Sioux Falls, Sturgis, Tabor, Vermilion, Webster, Woonsocket, Watertown, Yankton, and Zell. The Scandinavian Lutherans have a normal school at Sioux Falls. Columbus College, the Catholic institution at Chamberlain, was founded in 1909, when Bishop O'Gorman purchased from the Federal Government the plant of the Government Indian School, but very shortly after the establishment of the college the main building was burned. A reorganization was effected in time to reopen with the regular college year for 1910–11.

STATE OF SOUTH DAKOTA.
UNDER GOD THE PEOPLE RULE
GREAT SEAL.
1889

Seal of South Dakota

History.—*Civil.*—The first settlers within the present boundaries of South Dakota were French fur traders, who established a fur post on Cedar Island in the Missouri River thirty miles below the present capital in 1796. The next year a second post was established at a point near the present Greenwood post office in Charles Mix County. These posts were discontinued after several years, but in 1817 Joseph La Frambois established Ft. Teton on the present site of Ft. Pierre and the settlement at that place has been continuous since. The first agricultural settlement was made at Sioux Falls in 1857. Owing to the hostility of the Indians, settlement was slow until the discovery of gold in the Black Hills in 1874, and until that time was confined to narrow strips along the Missouri and the Lower Big Sioux. About 1877 began a great influx of homesteaders, and within five years most of the land east of the Missouri had been settled upon, and all of the chief towns date from that period. The Constitution of South Dakota was made by a convention authorized by the territorial Legislature, which met in Sioux Falls in September, 1885. This Constitution was revised to meet certain requirements of the Enabling Act of 1889 and adopted by the people on 1 October, 1889.

Ecclesiastical.—The first Catholics to come into South Dakota were probably the men of Charles Pierre Le Sueur, who visited the Sioux Valley in 1800. The Verendrye brothers were here in 1745 on an exploration trip and were accompanied by a priest. In June, 1842, Father Ravoux of St. Paul made a trip to the Missouri River to baptize the families of French Catholics living at Fort Pierre. In 1845 Father Ravoux visited Vermilion for the same purpose. In 1848 Father DeSmet came among the Indians of the Dakota country and laboured with them until his death, about 1866. Father DeSmet was assisted in his work among the Dakotas by

Fathers Christian and Adrian Hoecken. The first permanent mission plant in South Dakota was made at Jefferson in 1867. A considerable number of French Catholic families had settled in that neighbourhood, and Bishop Grace sent Father Pierre Boucher among them as Apostolic missionary, and he organized and built St. Peter's Church at Jefferson, the first Catholic church building in the state. From that time there had been a steady growth in Catholic population, distributed among the Germans, Irish, and French, with a few Italians and other South Europe immigrants. The original Vicariate Apostolic of Dakota was established with the episcopal seat at Yankton, but upon the division of the territory and the admission of South Dakota in 1889, the Diocese of Sioux Falls was established to embrace the entire state. Rt. Rev. Martin Marty was the first bishop and he was succeeded, after an interval during which the diocese was administered by Rt. Rev. Henry Wensing, by Rt. Rev. Thomas O'Gorman, the present incumbent. In 1902 the diocese was divided, and that portion of the state west of the Missouri River became the Diocese of Lead with Rt. Rev. John Stariha as bishop; in 1909 Bishop Stariha resigned and was succeeded by Bishop Busch. There are in the two dioceses, 150 priests, 208 churches, 13 chapels, 71 stations, 28 parochial schools, with 3530 pupils, and a Catholic population of about 68,000. While Catholics have been largely represented in the Legislature and county offices, not many, in proportion to their numerical strength have held state office. Peter C. Shannon was chief justice of the territory (1873–81); John E. Kelley represented the state in Congress (1896–98); Beotius H. Sullivan was surveyor general (1889–93); Patrick F. Wickham, internal revenue collector (1893); and John A. Bowler, warden of the penitentiary (1897–1901).

The latest religious census of South Dakota, taken in 1906, is as follows:

DENOMINATION	No. CHURCHES	No. MEMBERS
Adventists	40	1,042
Baptists	92	6,198
Brethren (Plymouth)	1	3

United Brethren	7	257
Universalists	1	13
Total	1,798	161,961

MATTERS AFFECTING RELIGION.—The Constitution guarantees complete freedom of worship. A chapter of the penal code defines crimes against religion and conscience, especially making blasphemy, profane swearing, and desecration of the Sabbath, misdemeanors. No religious holidays are observed by law as such, except Thanksgiving Day. Christmas is a holiday. Every session of the Legislature is opened with prayer. One of the chaplains in sessions of 1907 and 1909 was a Catholic priest. Church societies may incorporate under a simple and inexpensive statutory provision. All property used for religious and educational purposes is exempt from taxation; clergymen are exempt from jury and military duty and poll taxes; marriages may be celebrated by any regular minister of the Gospel, or before justices of the peace and the judges of the courts; a rigid marriage license law is enforced; and consanguineous marriages are forbidden; all marriages are finally recorded in the State Vital Statistics Division at Pierre. Divorces are allowed for adultery, extreme cruelty, wilful desertion, wilful neglect, habitual intemperance, or conviction of felony. The plaintiff must have been in good faith a resident of the state one year and of the county three months before bringing action for divorce. Free education is offered every person and elementary education is compulsory; training in parochial schools may be substituted for compulsory training in public schools. The Bible may be read in the public schools but all sectarian teaching is forbidden. All state-supported charitable institutions, prisons, and reformatories are under the control of the State Board of Charities and Corrections. These institutions are the Hospital for the Insane at Yankton, the School for Feeble-minded at Redfield, the School for the Deaf, Sioux Falls, the School for the Blind at Gary, the Training School for Incorrigibles at Plankinton, the penitentiary at Sioux Falls, and sanatorium for tuberculous patients at Custer. The Catholic Church maintains fine hospitals at Aberdeen, Cascade Springs, Deadwood, Pierre, Mitchell, Sioux Falls, Webster, and Yankton. The Scandinavian Lutherans maintain an orphanage at Beresford, and the State Children's Home at Sioux Falls is maintained as a public benevolence. The last-named is not a church institution, though Bishop O'Gorman of the Catholic Diocese of Sioux Falls is a member of its board of control.

The sale of liquor is strictly regulated by law; a high license system prevails; $1000 per year is the minimum license fee. Every person of sound mind may dispose of all his property by will, but a corporation cannot make a will; there is no provision of law regulating or affecting charitable bequests. Cemetery corporations or individuals may provide cemeteries; burial upon a cemetery lot renders the title thereto inalienable; no corpse may be buried within the state without a permit from a justice of the peace.

DOANE ROBINSON.

Southerne, WILLIAM, VENERABLE, English martyr, suffered at Newcastle-under-Lyme, 30 April, 1618. An alumnus and priest of the English College at Douai, he laboured mainly at Baswich, near Stafford, which then belonged to a branch of the Fowler family. He was arrested while saying Mass, and committed by a neighbouring justice to Stafford gaol. He was immediately sentenced to death for being a priest and refusing to take the oath of allegiance; he remained in prison for six days after condemnation, no hangman being forthcoming.

CHALLONER, *Missionary Priests*, II, no. 159.

JOHN B. WAINEWRIGHT.

Southwark, DIOCESE OF (SOUTHWARCENSIS), suffragan of Westminster, England, comprises the south-eastern counties of Kent, Surrey, and Sussex south of the Thames, including the southern half of the administrative County of London. Southwark, the principal borough in South London, is the episcopal city. This diocese was founded on the restoration of the hierarchy in England in 1851, and when first erected included Berkshire, Hampshire, and the Channel Islands in addition to Surrey, Kent and Sussex. Previous to this these five counties formed part of the London District, which district was governed by a vicar Apostolic, to whom also was committed episcopal jurisdiction over North America and the Bahama Islands. In 1850 London, even at that time a comparatively small city, which, owing to the exigencies of the times, had previously been under the jurisdiction of a single bishop, was now divided between the two new Dioceses of Westminster (north of the Thames) and Southwark (south of the Thames), the newly-erected Church of St. George, Southwark, a stately and magnificent structure in the Gothic style designed by the elder Pugin, being designated as the cathedral of the newly-erected see. On 6 July, 1851, Right Rev. Thomas Grant, D.D., vice-rector of the English College, Rome, was consecrated as first bishop at the early age of thirty-five. He was succeeded 25 March, 1871, by Right Rev. James Danell, formerly his vicar-general. The next occupant of the see was Bishop Robert Coffin, who at the time of his appointment in 1882 was Provincial of the Redemptorists in Great Britain and Ireland. On his demise in 1885 the choice of the Holy See fell upon his auxiliary, Bishop John Butt, who governed the diocese for twelve years until his resignation in 1897, when he was succeeded by his coadjutor, Bishop Francis Bourne, who became Archbishop of Westminster in 1903.

Interior of St. George's Cathedral, Southwark

The present bishop, Right Rev. Peter Emmanuel Amigo, was born at Gibraltar, 26 May, 1864. He studied at St. Edmund's, Ware, and St. Thomas's, Hammersmith: was ordained priest, 25 Feb., 1888; was for a short time at Stoke Newington, then professor at St. Edmund's from Sept., 1888, to July, 1892. He was then appointed assistant priest at Hammersmith from Sept., 1892, to June, 1896. He was afterwards at St. Mary's and St. Michael's, Commercial Road, first as assistant priest, then as rector from June, 1896, to April, 1901. He was then appointed rector of the mission at Walworth in the Diocese of Southwark, and remained there until his consecration as Bishop of Southwark, 25 March, 1904. He is strenuously engaged in carrying on to their fullness the various important works initiated by his predecessors by multiplying much-needed churches and schools in all parts of this important diocese, as well as endeavouring to pay off the enormous liabilities that in past years have had to be incurred in emergencies when there would have been the gravest danger of loss of faith, especially to the destitute little ones of the diocese, if the large and magnificently-equipped orphanages and poor-law schools of the diocese had not been promptly erected. In addition to the debts on the institutions there are also enormous debts incurred in the building of new churches and schools in new and rapidly-growing centres of population, which were necessary if work for the good of souls was to be adequately carried on in the midst of the huge population of South London and its environs. There is every prospect that the efforts of the present bishop in this direction will be crowned with complete success, as he has already succeeded in securing for the important work of safeguarding the poorer children of the diocese from loss of faith the united and cordial co-operation of not only the whole of the clergy, but also of every class of the laity, which is eloquently attested by the totals of the subscriptions and collections for this purpose, which go on steadily increasing from year to year. As a consequence of this united support of clergy and laity, joined with the establishment of a sinking fund for the gradual extinction of mission debts, Bishop Amigo looks forward to handing over to his successor at the close of his life a splendid array of churches, schools, and institutions, all entirely free from debt.

Southwark in many ways occupies a notable position amongst the dioceses of England. First of all, South London, with its enormous population of close on two million inhabitants (census of 1911, 1,844,310) is one of the largest cities in the world as well as one of the poorest. Being for the most part a place of residence for the salaried workers of London north of the Thames, where all trade and business is concentrated, South London, with its immense population, has scarcely a single hotel above the level of the third class to be found within its area. Outside the boundaries of South London proper there stretches towards the south a fringe of more sparsely populated residential districts, inhabited chiefly by the well-to-do professional and business people of the City of London, amongst whom there are very few Catholics. Between this residential zone and the English Channel lies, still further to the south, a pleasant well-wooded agricultural district that is also day by day becoming more residential in character, until the sea-coast is reached with its chain of watering places, girdling the coast line of Kent and Sussex from the mouth of the Thames on the north to beyond Selsey Bill on the south. These resorts are really suburbs of London by the sea, and in the summer months especially are filled by visitors drawn from all parts of London.

The County of Kent, one of the most important of the rural divisions of this diocese, will always have an interest for English-speaking Catholics of all times, as the district in which Christianity was first preached in the Saxon tongue by St. Augustine and his followers, who landed near Richborough on the coast of Kent in 597. The actual church in which the Apostle of England offered up the Holy Sacrifice is still to be seen to this very day at Canterbury, which, once the Primatial See of England, is now an unimportant and dwindling country town of this large diocese. The Diocese of Southwark, it may be noted, includes within its present boundaries not only the whole of the territories formerly belonging to the former Dioceses of Canterbury, Rochester, and Chichester, but also a large portion of the former Diocese of Winchester. The Church may also be said to owe the world-wide devotion of the Brown Scapular to this diocese, as St. Simon Stock, its propagator, was born in the Weald of Kent towards the end of the twelfth century.

Another striking characteristic of this diocese is the very marked increase shown in the numbers of churches, clergy, and Catholic population. Thus in 1882 the Diocese of Southwark comprised South London, the five counties of Kent, Surrey, Sussex, Berkshire, and Hampshire, and the Channel Islands. On the appointment of Bishop Coffin in 1882 the diocese was divided, and the Counties of Berkshire and Hampshire, together with the Isle of Wight and the Channel Islands, were separated from the diocese and erected into the new Diocese of Portsmouth. Before the division Southwark had 148 public churches, chapels, and stations, with 247 priests. After the division the present diocese started afresh with only 93 public churches, chapels, and stations, served by 198 priests. The diocese now has 218 public churches, chapels, and stations, with a population of almost 120,000 Catholics, whilst the number of priests attached to or working in the diocese amounts to 591, a higher total than any other English diocese. Besides the above-mentioned public places of worship, there are also 160 private chapels, either belonging to religious communities or in private houses, where Mass is as a rule celebrated daily.

As might be expected from the foregoing facts, the clergy of this diocese, owing to the encouragement they have always received from a succession of broad-minded and progressive bishops with high ideals and exceptional gifts of organization, have always been noted for their zeal, initiative, and gift of combination amongst themselves for the furtherance of every good work. It has always been their pride to have the most up-to-date and best-equipped schools in the country, and they led the way in the foundation of voluntary pupil-teachers' centres, for the training of the coming generation of teachers, before the work was made a public charge. The clergy of South London especially have also distinguished themselves by the active share they have always taken, with their bishop's hearty approval, in the great work of local government and administration, many of them having done splendid work for religion on public bodies such as the former London School Board, as well as upon the Boards of Guardians and the local councils. The South London League, a non-political body for the protection of Catholic interests in South London, with the bishop as president, bears witness to the very successful way in which the clergy as well as the laity of all parties have discovered the secret of successful organization on a purely Catholic platform, to the exclusion of party or national politics.

Ever since 1891, when it was first started, "Pastoralia", the popular little clergy review for the discussion of pastoral topics, has been edited by a committee mainly of South London clergy, and has a large circulation amongst the clergy of English-speaking lands. Its pages are full of interest as giving an insight into problems and difficulties the Church has to face in great cities, as well as the practical means by which new methods are evolved to meet present-day exigencies.

Synodi Diœcesis Southwarcensis, 1850–1868 (London, 1868); *The Catholic Directory* (London, 1850–1911), passim; *Pastoralia* (London, 1891–1911), passim.

W. M. Cunningham.

Southwell (Sotwel), Nathan. See Bacon, Nathaniel.

Southwell, Robert, Venerable, poet, Jesuit, martyr, b. at Horsham St. Faith's, Norfolk, England, in 1561; hanged at Tyburn, 21 Feb., 1595. His grandfather, Sir Richard Southwell, had been a wealthy man and a prominent courtier in the reign of Henry VIII. It was Richard Southwell who in 1547 had brought the poet Henry Howard, Earl of Surrey, to the block, and Surrey had vainly begged to be allowed to "fight him in his shirt". Curiously enough their respective grandsons, Father Southwell and Philip, Earl of Arundel, were to be the most devoted of friends and fellow-prisoners for the Faith. On his mother's side the Jesuit was descended from the Copley and Shelley families, whence a remote connexion may be established between him and the poet Percy Bysshe Shelley. Robert Southwell was brought up a Catholic, and at a very early age was sent to be educated at Douai, where he was the pupil in philosophy of a Jesuit of extraordinary austerity of life, the famous Leonard Lessius. After spending a short time in Paris he begged for admission into the Society of Jesus—a boon at first denied. This disappointment elicited from the boy of seventeen some passionate laments, the first of his verses of which we have record. On 17 Oct., 1578, however, he was admitted at Rome, and made his simple vows in 1580. Shortly after his noviceship, during which he was sent to Tournai, he returned to Rome to finish his studies, was ordained priest in 1584, and became prefect of studies in the English College. In 1586 he was sent on the English mission with Father Henry Garnett, found his first refuge with Lord Vaux of Harrowden, and was known under the name of Cotton.

Two years afterwards he became chaplain to the Countess of Arundel and thus established relations with her imprisoned husband, Philip, Earl of Arundel, the ancestor of the present ducal house of Norfolk, as well as with Lady Margaret Sackville, the earl's half-sister. Father Southwell's prose elegy, "Triumphs over Death", was addressed to the earl to console him for this sister's premature death, and his "Hundred Meditations on the Love of God", originally written for her use, were ultimately transcribed by another hand, to present to her daughter Lady Beauchamp ("The Month", June, 1900, p. 600). Some six years were spent in zealous and successful missionary work, during which Father Southwell lay hidden in London, or passed under various disguises from one Catholic house to another. For his better protection he affected an interest in the pursuits of the country gentlemen of his day (metaphors taken from hawking are common in his writings), but his attire was always sober and his tastes simple. His character was singularly gentle, and he has never been accused of taking any part either in political intrigues or in religious disputes of a more domestic kind. In 1592 Father Southwell was arrested at Uxenden Hall, Harrow, through the treachery of an unfortunate Catholic girl, Anne Bellamy, daughter of the owner of the house. The notorious Topcliffe, who effected the capture, wrote exultingly to the queen: "I never did take so weighty a man, if he be rightly used." But the atrocious cruelties to which Southwell was subjected did not shake his fortitude. He was examined thirteen times under torture by members of the Council, and was long confined in a dungeon swarming with vermin. After nearly three years in prison he was brought to trial and the usual punishment of hanging and quartering was inflicted.

Father Southwell's writings, both in prose and verse, were extremely popular with his contemporaries, and his religious pieces were sold openly by the booksellers though their authorship was known. Imitations abounded, and Ben Jonson declared of one of Southwell's pieces, "The Burning Babe", that to have written it he would readily forfeit many of his own poems. "Mary Magdalen's Tears", the Jesuit's earliest printed work, licensed in 1591, probably represents a deliberate attempt to employ in the cause of piety the euphuistic prose style, then so popular. "Triumphs over Death", also in prose, exhibits the same characteristics; but this artificiality of structure is not so marked in the "Short Rule of Good Life", the "Letter to His Father", the "Humble Supplication to Her Majesty", the "Epistle of Comfort" and the "Hundred Meditations". Southwell's longest poem, "St. Peter's Complaint" (132 six-line stanzas), is imitated, though not closely, from the Italian "Lagrime di S. Pietro" of Luigi Tansillo. This with some other smaller pieces was first printed, with license, in 1595, the year of his death. Another volume of short poems appeared later in the same year under the title of "Mæoniæ". The early editions of these are scarce, and some of them command high prices. A poem called "A Foure-fold Meditation", which was printed as Southwell's in 1606, is not his, but was written by his friend the Earl of Arundel (see "The Month", Jan., 1896). Perhaps no higher testimony can be found of the esteem in which Southwell's verse was held by his contemporaries than the fact that, while it is probable that Southwell had read Shakespeare, it is practically certain that Shakespeare had read Southwell and imitated him (Camb. Hist. Eng. Lit., IV, 129).

The best edition of Southwell's poems still remains that of Grosart in the *Fuller Worthies Library* (London, 1872).

Herbert Thurston.

Southworth, John, Venerable, English martyr, b. in Lancashire, 1592, martyred at Tyburn, 28 June, 1654. A member of a junior branch of the Southworths of Samlesbury Hall, Blackburn, he was ordained priest at the English College, Douai, and was sent on the mission, 13 October, 1619. He was arrested and condemned to death in Lancashire in 1627, and imprisoned first in Lancaster Castle, and afterwards in the Clink, London, whence he and fifteen other priests were, on 11 April, 1630, delivered to the French Ambassador for transportation abroad. In 1636 he had been released from the Gatehouse, Westminster, and was living at Clerkenwell, but frequently visited the plague-stricken dwellings of Westminster to convert the dying. In 1637 he seems to have taken up his abode in Westminster, where he was arrested, 28 November, and again sent to the Gatehouse. Thence he was again transferred to the Clink and in 1640 was brought before the Commissioners for Causes Ecclesiastical, who sent him back there 24 June. On 16 July he was again liberated, but by 2 December he was again in the Gatehouse. After his final apprehension he was tried at the Old Bailey, and as he insisted on pleading "guilty" to being a priest, he was reluctantly condemned by the Recorder of London, Serjeant Steel. He was allowed to make a long speech at the gallows, and his remains were permitted to pass into the possession of the Duke of Norfolk's family, who had them sent to the English College at Douai. The wonderful recovery in 1656 of Francis Howard, seventh son of Henry Frederick, Earl of Arundel, was attributed to these relics, which were secreted during the French Revolution, and the present location of which is now unknown.

Sovana and Pitigliano, Diocese of (Suanensis et Pitilianensis).—The two towns, Sovana and Pitigliano, are situated in the Province of Grosseto, Central Italy. Sovana was an ancient Etruscan city, and preserved a certain importance till the end of the thirteenth century, having been from the days of Charlemagne the capital of the counts of Aldobrandeschi, lords of Southern Tuscany. In 1240 the city withstood a siege by Frederick II. Later it passed under the sway of the Orsini, who transferred their residence to Pitigliano, a more salubrious locality, mentioned for the first time in 1081. In 1401 it fell into the power of the Republic of Siena. In 1434 Count Gentile Orsini having been killed at Sovana, the people of Pitigliano put the town to fire and sword, and brought about its complete decay, so that in 1833 it contained only 64 inhabitants. The territory of this diocese includes the celebrated Vallombrosan Abbey of Monte Calvello, which was transferred in 1496 to within the city limits. St. Gregory VII was born at Sovana. Its first known bishop is Mauritius (680); other bishops were: Raineri (963), who re-introduced common life among the canons; Pier Nicolò Blandinelli (1380), who had the doors of the cathedral made; Apollonio Massaini (1439), under whom the relics of S. Mamiliano, Bishop of Palermo, were translated from the Island of Giglio; Alfonso Petrucci (1498), son of the Tyrant of Siena, later a cardinal, condemned to death by Leo X in 1537; his successor, Lattanzio Petrucci, was accused of high treason and forced to flee, but he was acquitted by Adrian VI; Carvajal Simoncelli (1535) ruled the diocese for sixty-one years; Francesco Pio Santi (1776) resisted the innovations of Leopold and the Synod of Pistoia. For a long time the bishops of Sovana have resided at Pitigliano. In 1844 that city was made an episcopal see and united *æque principaliter* to that of Sovana. The diocese is suffragan of Siena, and contains 47 parishes, with 90 secular and 8 regular priests; 2 Franciscan convents, 4 convents of nuns, and 38,500 inhabitants.

U. Benigni.

Sozomen, Salaminius Hermias, one of the famous historians of the early Church, b. at Bethelia, a small town near Gaza in Palestine, in the last quarter of the fourth century; d. probably in 447 or 448. What the epithet Salaminius means cannot be determined. The supposition that it had some connexion with Salamis in Cyprus has no foundation. On the authority of Sozomen himself ("Hist. eccl.", V, xv) we learn that his grandfather became a Christian through witnessing a miracle wrought by St. Hilarion. Through many years of persecution the family remained faithful, and Sozomen thus enjoyed the advantage of being trained in a Christian household. His early education was directed by the monks in his native place. It is impossible to ascertain what curriculum he followed in these monastic schools, but his writings give clear evidence of the thoroughness with which he was grounded in Greek studies. A reference to Berytos has led to the mistaken supposition that he pursued legal studies in the famous law school of that place. Wherever his professional training was acquired, he settled in Constantinople, probably about the beginning of the fifth century, to commence his career as a lawyer. While thus engaged he conceived the project of writing a history of the Church. A preliminary study containing a summary of the history of Christianity from the Ascension to 323 has been lost. He purposed to continue the history of Eusebius, and to deal with the period between 323 and 439. The period actually covered in his work ends at 425. Sozomen dedicated his work (Historia ecclesiastica) to Theodosius the Younger. It is divided into nine books, distributed according to the reigns of the emperors. Books I and II embrace the reign of Constantine (323–37); III and IV the reigns of his sons (337–61); books V and VI the reigns of Julian, Jovian, Valentinian I, and Valens (361–75);

books VII and VIII the reigns of Gratian, Valentinian II, Theodosius I, and Arcadius (375–408). Book IX deals with the reign of Theodosius the Younger (408–39). As the work of Socrates appeared at the same time as that of Sozomen and dealt with the same subject and the same period, an important question arises as to the relation, if any, which existed between the two authors. There can be no doubt that the work of Socrates antedated that of Sozomen, and that the latter made use of the work of his predecessor. The extent of this dependence cannot be accurately determined. At most it would appear that, while Sozomen used the work of Socrates as a guide, as well in regard to materials as to order, and while at times he did not hesitate to use it as a secondary source, he was, nevertheless, neither an indiscriminate borrower nor a plagiarist. In some matters, however, as in regard to the Novatians, Sozomen is entirely dependent on Socrates. The ninth book, which Sozomen expressly declared would terminate at the year 439, is manifestly incomplete. There is no reason to think that portion of it has been lost. It is more likely that, because of advancing age or some other cause, he was unable to carry the work to the date he had set before himself. Internal evidence points to the fact that Sozomen undertook to write his history about 443, and that what he succeeded in doing was accomplished in a comparatively short time

The work of Sozomen suffers in many ways by comparison with that of Socrates. Though the style is reputed to be better, the construction of the work is inferior, and the author's grasp of the significance of historical movements is less sure. Nevertheless, Sozomen made a painstaking effort to be acquainted with all the sources of information on the subjects which he touched, and he had a passionate desire for the truth. He was filled with a profound conviction of the Providential purpose of Christianity, and of its mission, under Divine guidance, for the regulation of the affairs of mankind. In doctrinal matters he aimed constantly at being in thorough accord with the Catholic party, and was a consistent opponent of heresy in all its forms. But, while he maintained a constant attitude of hostility to Arianism, Gnosticism, Montanism, Apollinarianism, etc., he never assailed the leaders of these heresies or allowed himself to indulge in bitter personal attacks. "Let it not be accounted strange", he says, "if I have bestowed commendations upon the leaders or enthusiasts of the above-mentioned heresies. I admire their eloquence and their impressiveness in discourse. I leave their doctrines to be judged by those whose right it is" (III, xv).

The work of Sozomen is interesting and valuable for many reasons. In the first place he pays more attention than any of the older historians to the missionary activity of the Christians, and to him we are indebted for much precious information about the introduction of Christianity among the Armenians, the Saracens, the Goths, and other peoples. The history is especially rich in information regarding the rise and spread of monasticism. His account of the labours of the early founders of monasteries and monastic communities, though sympathetic, cannot be said to be overdrawn. The history as a whole is fairly comprehensive, and though his treatment of affairs in the Western Church is not full, his pages abound in facts not available elsewhere and in documentary references of the highest importance. In his attitude towards the Church, in his treatment of the Scriptures, and in his views of the hierarchy and ecclesiastical order and dignity, he is always animated by feelings of submission and respect. There are many faults and shortcomings in his work. Of many of these he himself was conscious, but it was not in his power to correct them. Frequently it was hard for him to know the truth because of the mass of divergent evidence with which he had to deal, frequently there was not enough evidence, but in every case he aimed at expressing the truth and at making his work serve some useful purpose in the defence or elucidation of Christian ideas. The work of Sozomen was printed at Paris in 1544. There are later editions by Christophorson and Ictrus (Cologne, 1612) and by Valesius (Paris. 1668). The text of Valesius was reprinted by Hussey (Oxford, 1860), and by Migne (P. G., LXVII). There is an excellent English translation by Hartranft, with a learned though somewhat diffuse introduction, in the "Nicene and Post-Nicene Fathers", II (New York, 1890).

PATRICK J. HEALY.

Sozopolis, titular see in the Balkans, suffragan of Adrianopolis. The town, at first called Antheia, was founded in Thrace on the shore of the Pontus Euxinus, principally on a little island, by Anaximander (b. 610–609 B.C.) at the head of Milesian colonists. The name was soon changed to Apollonia, on account of a temple to Apollo in the town, containing a statue of the god 30 cubits high, transported later to Rome by Lucullus and placed in the Capitol. The coins, which begin in the fourth century B.C., bear the name Apollonia and the image of Apollo; the imperial coins, which continue to the first half of the third century A.D., and the "Tabula Peutinger" also contain the name Apollonia; but the "Periplus Ponti Euxini", 85, and the "Notitiæ episcopatuum" have only the new name Sozopolis. In 1328 Cantacuzene (ed. Bonn, I, 326) speaks of it as a large and populous town. The islet on which it stood is now connected with the mainland by a narrow tongue of land. Sozopolis, in Turkish Sizebolou, in Bulgarian Sozopol, is in the Department of Bourgas, Bulgaria. Its 3000 inhabitants, almost exclusively Greeks, lived by fishing and agriculture. Le Quien (Oriens christianus, I, 1181) knows only eight of its bishops: Athanasius (431); Peter (680); Euthymius (787); Ignatius (869); Theodosius (1357); Joannicius, who became Patriarch of Constantinople (1524); Philotheus (1564); Joasaph (1721). This list might be easily lengthened, the see still existing among the Greeks. From being suffragan to Adrianopolis it became in the fourteenth century a metropolis without suffragan sees; it disappeared perhaps temporarily with the Turkish conquest, but reappeared later; in 1808 it was united to the See of Agathopolis and has remained so. The titular resides at Agathopolis, now Akhtébolou, in the vilayet of Adrianopolis, in Turkey. Its relations to the new Bulgarian kingdom are not yet settled. Eubel (Hierarchia catholica medii ævi, I, 194) mentions four Latin bishops of the fourteenth century.

S. PÉTRIDÈS.

Sozusa, a titular see of Palestina Prima, suffragan of Cæsarea. The town, at first called Apollonia, is mentioned by Pliny, "Hist. nat.", V, 14, and Ptolemy, V, xv, 2, between Cæsarea and Joppa, and by other geographers. According to Josephus, "Ant. jud.", XIII, xv, 4, it belonged at first to the Phœnicians. From Appianus, "Hist. rom. Syr.", 57, it seems to have been founded by a King Seleucus, whose name it was given, but the history of this maritime city and the date of its establishment, are entirely unknown. The Roman proconsul, Gabinius, found it ruined in 57 B.C. and had it rebuilt (Josephus, "Bel. jud.", I, viii, 4). On the arrival of the Crusaders it was called Arsur or Azuffium, and was protected by strong walls; Godfrey de Bouillon attempted to capture it, but failed for want of ships (William of Tyre, IX, x). King Baldwin I took it in 1102, after a siege by land

and sea, allowing the inhabitants to withdraw to Ascalon. Occupied in 1191 by Saladin, the town was captured by Richard Cœur de Lion after his victory at Rochetaillée. In 1251 St. Louis re-erected its ramparts, and fourteen years later, in 1265, after a siege of forty days, it was stormed by the sultan Bibars; the inhabitants were killed or sold as slaves and the town completely razed. It never recovered, and in the fourteenth century the geographer Abulfeda said it contained no inhabitants ("Tabula Syriæ", 82). Its name Apollonia was replaced by Sozusa at an early period; in 449 at the Robber Council of Ephesus Baruchius signs with this title; its bishops, Leontius in 518, and Damianus in 553, are also known (Le Quien, "Oriens christianus", III, 595). Under the name of Sozusa it occurs in the Byzantine geographers Hierocles and George of Cyprus. In the Middle Ages it was confused with Antipatris, situated more inland, and it is under this name that some of its titular bishops are to be sought. To-day its ruins may be seen at Arsûf, north of Jaffa.

S. VAILHÉ.

Space (Lat. *spatium*).—The idea of space is one of the most important in the philosophy of the material world; for centuries it has preoccupied and puzzled philosophers and psychologists, and even to-day the views as to its nature are far from being harmonious.

It is important first to ascertain the exact meaning of the term. In ordinary language space means empty extension occupied by bodies, and in which local motion takes place. This notion of emptiness is so closely connected with it, that the word is often used to mean the distance between bodies. Space is thus put in contrast with bodies, and we imply, more or less unconsciously, that space by itself contains no body—in a word, that it is empty. Evidently space in this popular sense is the extension of the world. It surpasses in magnitude all that the strongest imagination can picture, and consequently it is assigned no limits. Not indeed that space, in the popular sense, is considered strictly infinite; but rather it is conceived as something "indefinite". Again, space, in the popular mind, is clearly conceived as being tri-dimensional, that is, we can draw in it three straight lines each of which is perpendicular to both of the others, and which exhaust all its dimensional possibilities.

The concept which mathematicians form of space does not correspond in every respect with the popular notion. The geometrician is concerned only accidentally with the space of the world. From it he derives his idea of mathematical space; but he eliminates from it all predicates which are not absolutely necessary to establish his geometrical relations. Mathematical space therefore abstracts from all existence. It is conceived as an extensive, continuous, abstract quantity, in which geometrical points and places can be determined. Mathematical space is said to be infinite—not a metaphysical infinity, which affirms the positive absence of all limits, and with which the mathematician has no concern, but that mathematical infinity, which signifies that the nature of a reality is such that no limit can be assigned to it. The distinction beween mathematical and metaphysical infinity is somewhat subtle, but it is real; it prevents much confusion and facilitates the solution of difficult problems. It may be remarked here that mathematical space is not necessarily tri-dimensional or homogeneous, matters to which we shall refer presently.

Philosophers cannot be satisfied with mathematical space, an abstract construction useful for theoretical purposes, for they wish to arrive at the real space of nature. Nor can they restrict themselves to the popular notion, for their task is precisely to purify the data of common sense from all the extraneous factors modifying them and giving rise to latent contradictions. But in their efforts to discover pure and real space, they have sometimes arrived at the most perplexing results; so that many philosophers, while not subscribing to the doctrines of Kantian criticism, consider the idea of space as hopelessly contradictory, as a purely illusory fancy. To recall all the successive explanations of the nature of real space given by the great philosophers it would be necessary to go through the history of philosophy; but, leaving aside the complete negation of extension, all the doctrines, from Hesiod (cf. Aristotle, IV Phys., vi, 213b) to our day, fluctuate between the idea of absolute space, a real substance independent of the bodies it contains, and purely relative space, a mental fiction based on the real extension of material bodies. The most radical expressions of these two conflicting views are those of Newton and Clarke, on the one hand, who consider space as the *sensorium* of God, and on the other, of Leibniz, who asserts that there is no space independent of extended bodies, and reduces it to "the order of co-existing things".

The traditional philosophy of the Catholic schools rejects absolute space. Newton's idea is incompatible with the concept which the great doctors of the school, following Aristotle, formed of quantity. Suarez declares that space is only "a conceptual entity [*ens rationis*], not, however, formed at will like chimeras, but extracted from bodies, which by their extension are capable of constituting real spaces" (Met. disp., 51). The expression *ens rationis* may be equivocal, but it expresses somewhat exaggeratedly the very active part played by the human intellect in the construction of space. Space is not material bodies themselves, since it appears to be rather a receptacle containing them. From this point of view it must be pure extension, an unqualified quantity. In the strict sense of the terms a quantity without quality is contradictory; for quantity is only the multiplicity of the homogeneous parts in the unity of a body; it is the distribution of an essence, simple in its formal determination. Multiplicity implies a thing that is multiplied, and distribution something that is distributed. Every quantity is the quantity of something; all extension is therefore, in itself, the extension of an extended substance. Yet quantity is something more than a modal accident; it is in truth the absolute accident *par excellence* (see ACCIDENT); it confers on a substance a perfection such that, granted the existence of a substance, the corporeal body is measured by its quantity. It is none the less true that quantity postulates a quantitative substance; and, in a sense, entirely different however from the fancies of ancient physics, it may always be said that an empty quantity is a contradiction in terms. From this we must conclude that extension is only a derivative of quantity; a non-qualified extension, pure extension, pure space in the reality of the corporeal world is contradictory. We conceive it, however, and what is, properly speaking, contradictory is inconceivable. The contradiction arises when we add the condition of existence to pure space. Space is not contradictory in the mind, though it would be contradictory in the real world, because space is an abstraction. Extension is always the extension of something; but it is not the thing extended. Mentally we can separate extension from the substances from which we distinguish it; and it is extension thus separated, conceived apart, which constitutes the space of the universe. Space is therefore as real, as objective, as the corporeal world itself, but in itself it exists apart only in the human mind, seeing that in the reality of existing things it is only the extension of bodies themselves.

Space thus conceived avoids many of the difficulties raised against its reality. But there still remain questions that have taxed the ingenuity of philosophers. What is to be thought of the infinity of space, which to many philosophers seems to be an indisputable postulate? Here we must carefully distinguish the two ideas to which we alluded above. Mathematicians do not understand infinity in the same sense as philosophers. The latter consider absolute infinity as the plenitude of being, being itself; spatial infinity for them can signify only plenitude of extension. There are no limits to an infinite space, nowhere can there exist a definite relation to its extremities or even to itself. It is impossible to add even mentally anything to such extension, for it would be an absurdity to conceive anything greater than infinite extension. Mathematical infinity is something quite different. It is not considered solely in relation to the being to which it is attributed, but in relation to this being and to the determinations of limits possible to the intellect. Whatever by its nature surpasses all the limits we can assign it, that is mathematically infinite. It must be carefully noted that these two ideas in no way coincide, since it is possible that the intellect may not grasp the nature of a being fully enough to determine its limits: the possibility that this nature may surpass all assignable limits does not involve the conclusion that the being is in itself unlimited. Mathematical infinity introduces into the problem a factor extrinsic to the nature of the being: the relative perfection, or rather the imperfection, of the human idea; and it is noteworthy that in all problems concerning quantity our intellect is, to a very great extent, dependent on our senses and our imagination. This distinction being established, we may remark that real space evidently surpasses all that experience can teach us. We are forced, consequently, to solve the problem by analysis.

Mathematical space is abstract and mathematically infinite; but we are dealing here with the real universe. The notion of mathematical infinity may be applied to it in a secondary sense. The nature of real space is such as not to demand any definite dimensions. No part of space in itself needs be the last. For all we know, or do not know, about it, space may be greater than any limits whatsoever we might assign. But space cannot be metaphysically infinite. It is impossible to have an actual quantitive infinite being composed of finite parts. To infinite extension nothing can be added, and from it nothing can be taken away, even mentally. For if, by hypothesis, infinite extension is divided in two, neither of the parts is infinite since neither by itself contains the plenitude of extension. Both therefore are finite; by their union they would form the original whole, but it is absurd to imagine that an infinite whole is formed by the union of two finite parts. It is clear that we can mentally take way a portion of space. Hence it is clear that space cannot be metaphysically infinite. An actually infinite quantity is a contradiction in terms. Here of course our imagination cannot follow our intellect. We cannot represent exactly to ourselves what may be the limits of the world; and it is clear that in this case certain physical laws, those of motion, for instance, cannot be fully applied. It is useless to discuss the subject further because, owing to the limitations of our experience, we are apt to indulge in mere fantastic and arbitrary speculations.

A still more abstruse subject is reached when we come to deal with the number of dimensions of space and its homogeneity. Our imagination always represents real space as having but three dimensions. We reach this intuitive space (see below) spontaneously; it seems to us so natural, so inevitable, that we have great difficulty in freeing ourselves from the domination of this image, and in conceiving (to imagine it is impossible) a space with more than three dimensions. However, the question has been raised; for geometricians reason frequently about a space of four, of five, or of *n* dimensions. The problem is not of the experimental order. Our sensory experiences and everything in practical life reveal only three dimensions. But does experience exhaust the possibilities of real space? and can this space have no more than three dimensions? Nothing obliges us to believe that such is the case. The material world requires essentially only quantity, and this is not identical with extension. Quantity confers on substance a multiplicity of parts; extension supposes this multiplicity and gives a relative position to the parts. Quantity implies a distinction of parts, extension adds extraposition, i. e. the placing of part outside of part; hence it will be seen that, in a strict sense, material beings do not necessarily postulate extension. It would then be quite arbitrary to declare a priori that they must have extension according to three mutually perpendicular directions, and that they cannot have any more. The word *dimensions* is here used, of course, only by analogy with the three dimensions perceived by experience; we can get at pure quantity only through extension. But the intellect in its analysis goes beyond the data offered to it by sense, and it is forced to conclude that space of more than three dimensions implies no contradiction.

By a very similar process we can solve the problem, so perplexing for the average mind, of the homogeneity of space. The essential properties of quantity require no definite number of dimensions. The same may be said of the quality, or rather intensity, of extension: the parts may be more or less extraposed. The parts, remaining the same, may give a greater or a less extension in the ordinary sense of the word. There is nothing contradictory, therefore, in all the parts of space being everywhere equally extraposed, in which case space would be homogeneous. But, on the other hand, there is no reason why space should not be differently extraposed in different parts, and if this be so, space would be heterogeneous; and if the variation be simple and constant, we can formulate the laws of these spaces and determine the properties of the figures formed therein. This explains why geometry, so rigorous in its methods and simple in its postulates, is not necessarily one. The ancient geometry of Euclid takes for granted the homogeneity of space; but it is well known that non-Euclidian geometries have been constructed, notably those of Riemann and of Lobatchewski, differing from Euclid's and yet free from all incoherency.

These speculations on the nature of space cannot, however, do away with the fundamental fact that the human mind is dominated by an image, imposing irresistibly on it a homogeneous tri-dimensional space. One of the central questions of classic psychology concerns the origin of this representation. We dismiss Kant's well-known view, that space is an a priori form of sensory activity. But psychologists fluctuate between two extremes: on the one hand, nativism, represented by Johann Müller, Fichte, Sigwart, Mach, and many others; and on the other hand, empiricism. followed by Locke, Hume, Condillac, Maine de Biran, John Stuart Mill, Bain, Spencer, and others. The former hold that we obtain the image of space from the primordial subjective dispositions of our mentality; and many of them see therein a condition precedent of all experience. The second class, on the contrary, believe that this image is acquired, that it results from visual and tactile impressions and is only a result of association. Many authorities hesitate and try to discover an intermediate position. From the facts adduced and the analysis to which they have been subjected it seems clear that the image of space is in reality acquired like all other images: in very young children we see it, so to say, in process of formation. It is the result of the spontaneous interpretation of all the extensive sensations; and it is because this interpretation takes place in the simplest manner that our intuitive space is homogeneous and tri-dimensional. Evidently this elaboration supposes a special nature in the subject, the faculty of receiving extensive impressions, and that of combining them by synthesis. But this is natural to man, and there is nothing to justify us in speaking of an innate image of space.

Every philosopher and psychologist has treated the question of space; here merely a few important works are cited to help towards a deeper study of the question.—FARGES, *L'idée du continu dans l'espace et le temps* (Paris, 1892); HODGSON, *Time and Space* (London, 1865); JAMES, *Perception of Space* in *Mind*, XII (1887); FULLERTON, *The Doctrine of Space and Time* in *Philos. Rev.*, X (1901); GUTBERLET, *Die neue Raumtheorie* (Mainz, 1882); WILLEMS, *Institutiones philosophicæ*, II (Trier, 1906); NYS, *La notion d'espace au point de vue cosmologique et psychologique* (Louvain, 1901); WUNDT, *Grundriss der Psychologie* (Leipzig, 1907); IDEM, *Grundzüge der physiol. Psychologie*, II (Leipzig, 1903); HÖFFDING, *Esquisse d'une psychologie basée sur l'expérience* (Paris, 1906); EBBINGHAUS-DURR, *Grundzüge der Psychologie* (Leipzig, 1911); ZIEHEN, *Physiologische Psychologie* (Jena, 1911); EISLER, *Wörterbuch der philosophischen Begriffe* (Berlin, 1910); BERGSON, *Essai sur les données immédiates de la conscience* (Paris, 1908).

M. P. DE MUNNYNCK.

Spagni, ANDREA, educator and author, b. at Florence, 8 Aug., 1716; d. at Rome, 16 Sept., 1788. He entered the Society of Jesus, 22 Oct., 1731, and was employed chiefly in teaching philosophy and theology, though for a time he professed mathematics at the Roman College, and assisted Father Asclepi in his astronomical observations. The most noted of his writings is the work "De Miraculis" (Rome, 1777), which he carefully revised in two succeeding editions (Rome, 1779 and 1785). In this work, besides giving the positive doctrine on the nature and reality of miracles, he has marshalled together with great thoroughness the objections brought forward by the rationalists of his own and preceding times against the chief miracles of the Old and the New Testament, so that the work may be considered as a compendium of the literature of the subject, up to the last quarter of the eighteenth century. His other chief works are: "De Causa efficiente" (Rome, 1764); "De Bono, Malo et Pulchro" (Rome, 1766); "De Mundo" (Rome, 1770); "De Ideis Mentis humanæ" (Rome, 1772); "De Motu" (Rome, 1774); "De Anima Brutorum" (Rome, 1775); "De Signis Idearum" (Rome, 1781).

SOMMERVOGEL, *Bibl. de la C. de J.*, VII (Brussels, 1896).

EDWARD C. PHILLIPS.

Spagnoli. See BAPTISTA MANTUANUS, BLESSED.

Spain.—This name properly signifies the whole peninsula which forms the south-eastern extremity of Europe. Since the political separation of Portugal, however, the name has gradually come to be restricted to the largest of the four political divisions of the Peninsula: (1) Spain; (2) Portugal; (3) the Republic of Andorra; (4) the British possession of Gibraltar, at the southern extremity. The etymology of the name *Spain* (*España*) is uncertain. Some derive it from the Punic word *tsepan*, "rabbit", basing the opinion on the evidence of a coin of Galba, on which Spain is represented with a rabbit at her feet, and on Strabo, who calls Spain "the land of rabbits". It is said that the Phœnicians and Carthaginians found the country overrun with these rodents, and so named it after them. Another derivation is from *sphan*, "north", from the circumstance that the country was north of Carthage, just as the Greeks called Italy *Hesperia*, because it was their western boundary, or the land of sunset (*ἑσπέρα*). Again, some Bascophiles would assert a Basque origin for the name of Spain: *Espania*, "Land of the Shoulder", because it formed the western shoulder of ancient Europe. Padre Larramendi has remarked that, in the Basque language, *ezpaña* means "tongue", "lip", or "extremity", and might thus have been applied to the extreme south-western region of Europe. The Spanish Peninsula has also been called the Iberian, from its original inhabitants, and (by synecdoche) the Pyrenean, from the mountains which bound it on the north. As the Spaniards named one part of America—Mexico—*Nueva España* (New Spain), we speak of "the Spains", in the plural, to signify the Spanish possessions.

I. PHYSICAL CHARACTERISTICS AND STATISTICS.—The geographical boundaries of Spain are: on the north, the Pyrenees, the Republic of Andorra, and the Bay of Biscay (known in Spain as *Mar Cantabrico*, or "Cantabrian Sea"); on the east, the Mediterranean; on the south, the Mediterranean, the Straits of Gibraltar, and the Atlantic; on the west, Portugal and the Atlantic. Its four extreme points are: on the north, the Estaca de Vares, in N. lat. 43° 47′ 32″; on the south, the southern extremity of the Island of Tarifa, in S. lat. 35° 59′ 49″; on the east, Cape Creus, in longitude 3° 20′ 16″ E. of Greenwich, on the west, Cape Torinana, in longitude 9° 17′ 33″ W. of Greenwich. The total area of the Spanish territory in the Peninsula is 194,563 square miles, with a coast line of 2060 miles in length. The combined French and Portuguese frontiers measure 3094 miles.

The surface of Spain presents the most varied geological features. In the seas of the Cambrian epoch the first elements of the Peninsula appeared as a multitude of islands. The most important of these islands formed what is now Galicia and the North of Portugal, with parts of the Provinces of Caceres, Salamanca, and Zamora. To the south-east of this was another island, where is now Bejar and the Sierra de Gredos, comprising part of the Provinces of Avila, Segovia, and Toledo. To the north-east, the Pyrenees and the Catalonian coast took the form of islets, while in other directions other islets occupied the sites of Lisbon, Evora, Cáceres, Badajoz, Seville, Cordova, and Jaen. The upheaval of the land went on during the Devonian and Silurian epochs until it formed what is now the whole of Galicia, part of the Asturias, Leon, and Zamora, and as far down as Toledo, Ciudad Real, Cordova, Huelvas, and the Algarves, while, to the east and north, were formed the Catalonian coast and a great part of the Pyrenees. Large islands arose in the neighbourhoods of Burgos, Soria, Daroca, Granada, Malaga, and Gibraltar. No Permian formation is to be found in Spain, nor does there appear any Triassic worth mentioning, the formations of these two periods having been submerged during later periods. During the Jurassic period long parallel tracts were formed along the present courses of the Ebro and the Turia, as well as a great mass between Jaen, Granada, Malaga, Osuna, and Montilla. The eastern portions of the Peninsula were built up during the Cretacean period, while, between these formations and the Granitic and Silurian, extensive lakes were left which have since disappeared but which may still be traced in the level steppes of Aragon and the two Castiles. What is now the Ebro was then a vast lake extending through the Eocene and Pliocene formations of Lérida, Saragossa, and Logroño, and joining, in the regions of Sto. Domingo de la Calzada, Haro, and Briviesca, another lake which then covered the sites of Burgos, Valladolid, Leon, Zamora, and Salamanca. Another extension of the Eocene formation was from the region where Madrid now stands to that of Albacete and Murcia. The Quaternary formations are found chiefly on the east coast and the Provinces of Madrid (north-west), Segovia, Valladolid, Palencia, and Asturias, and the basins of the principal rivers. Down to this last period Spain does not seem to have been definitively separated from Africa, its formations—Eocene and Miocene, as well as Silurian—being continued in that region.

Owing to the diversity of formations described above, and the elevation of the central portions, the surface of the Peninsula is, in general, of an uneven character with a very unequally distributed irrigation, some regions enjoying a wonderful fertility, while others are nothing but steppes. In other parts, again, the abrupt slope of the ground is such that the rains produce torrential floods in the rivers and thus negative their beneficial action. The unevenness of the country at the same time results in great differences of climate. The arid prairies of certain parts of the Castiles and Estremadura are in as striking contrast with the fertile, though monotonous, plains of the Campos district and Lower Aragon, and the extremely rich arable lands and meadows of Andalusia and the eastern provinces, as are the perpetual snows of the Pyrenees, the Cantabrian Range, and the Sierra Nevada with the parched lowlands of Estremadura, Andalusia, Murcia, and Alicante. No less uneven is the distribution of rainfall—from the northern provinces, with their ever-clouded skies, to the almost invariably dry and transparent atmosphere of the south. The contrast extends even to the seas surrounding Spain—the tranquil Mediterranean, the stormy Bay of Biscay, and the Atlantic with a character midway between.

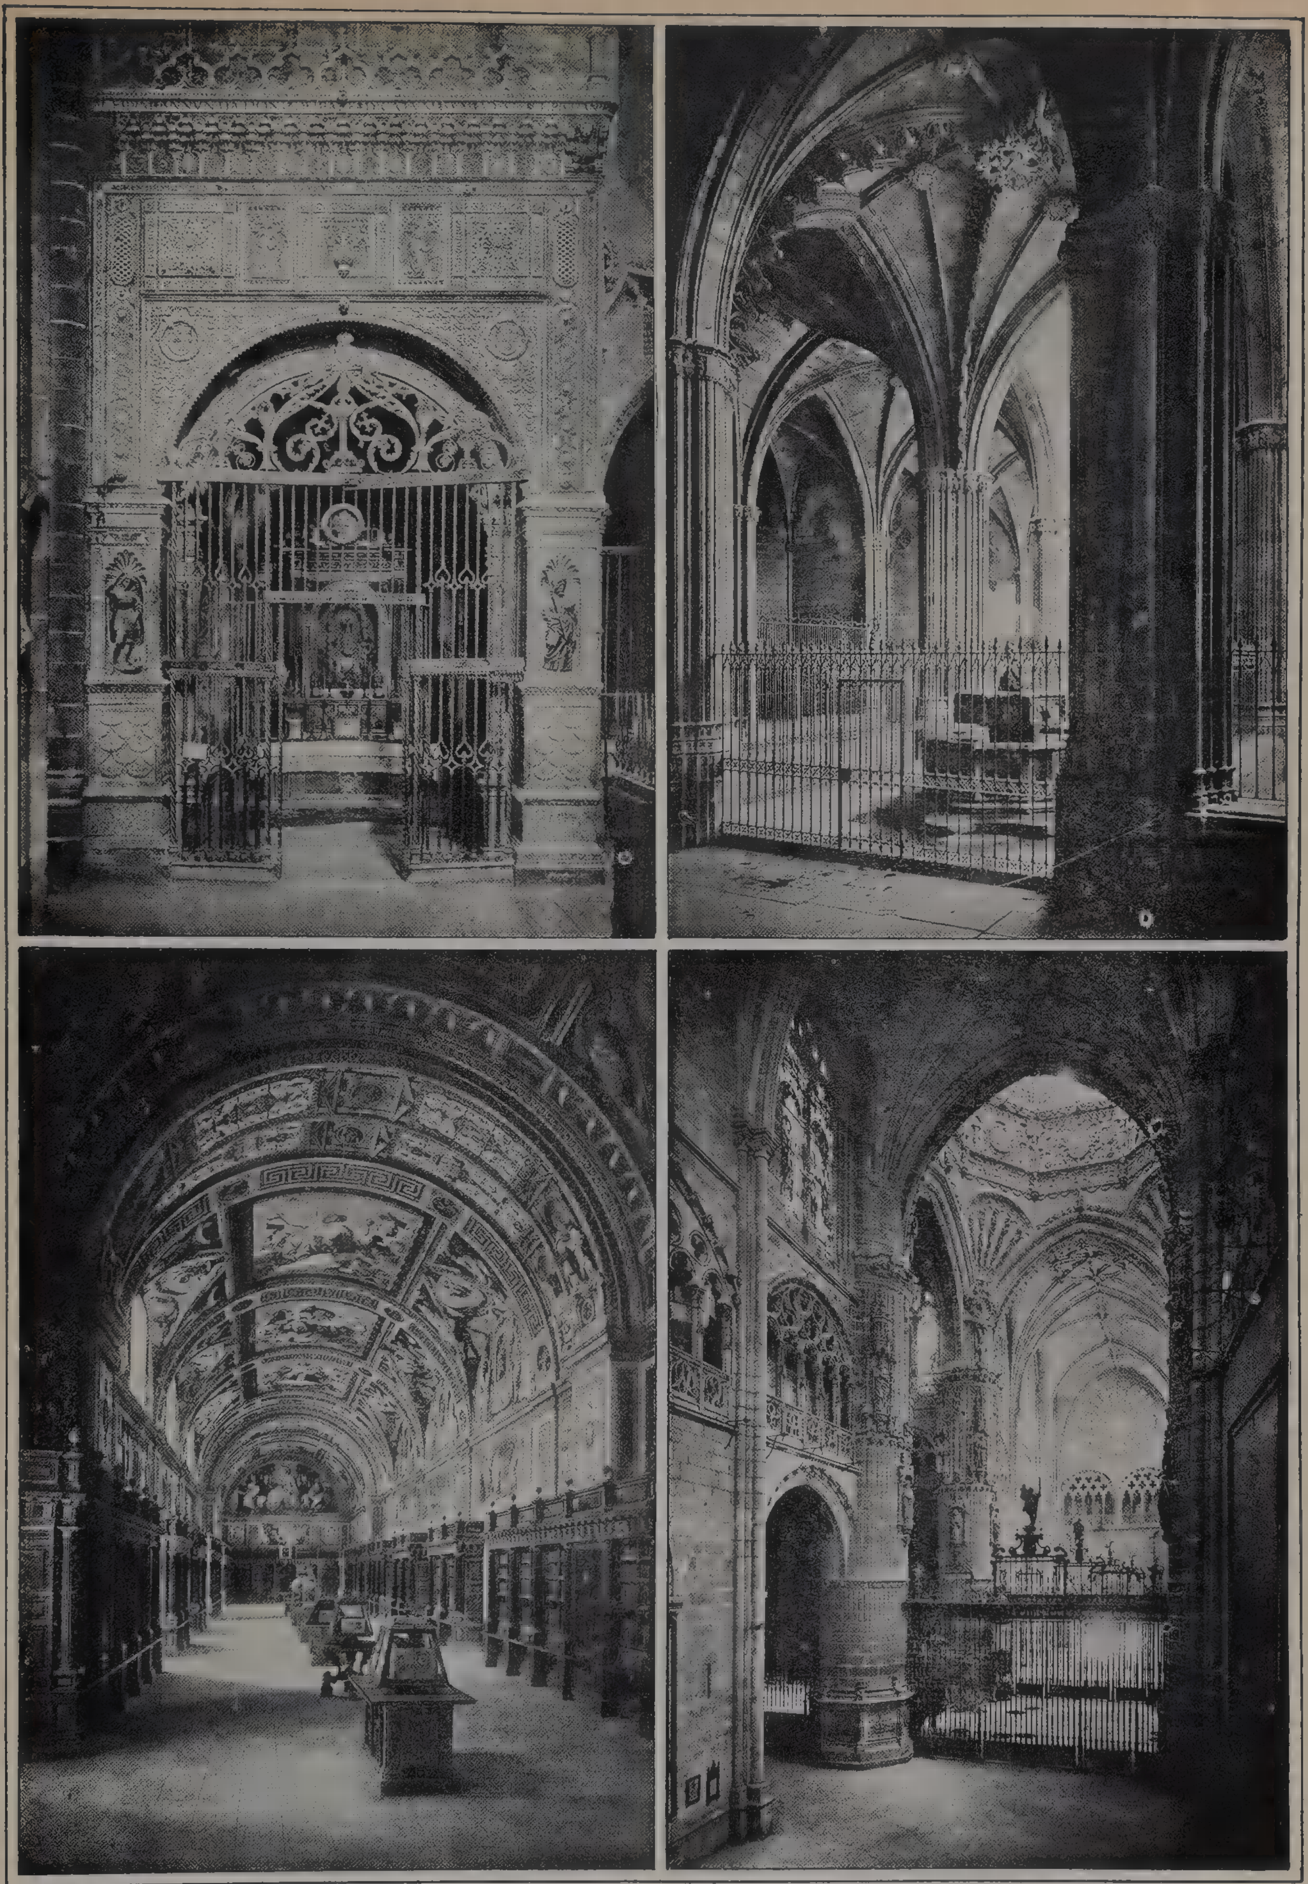
The general structural form of the Peninsula is somewhat that of a truncated pyramid, sloping abruptly towards the west, but gently towards the east. The elevated plains of the centre are intersected by mountain ranges. The mountain masses may be divided into six groups: (1) the northern, consisting of the Pyrenees on the east and the Cantabrian Range on the west, and terminated by Capes Creus and Finisterre; (2) the Iberic, or eastern, comprising the mountains which bound the basin of the Ebro and extend as far as Cape Gata; (3) the central system, the Carpetan, or Carpeto-Vetonic, Range, so called from the Carpetani and Vetones who inhabited its slopes in ancient times; (4) the Mountains of Toledo, or Cordillera Oretana; (5) the Betic system, or Cordillera Mariánica, forming the right-hand side of the basin of the Betis, or Guadalquivir, and the chief part of which is the Sierra Morena; (6) the Penibetic system, extending from the Sierra Nevada to Cape Tarifa. The highest elevations are: Maladeta (11,004 ft.) and Pico de Nethou (11,168 ft.), in the Pyrenees; Peña de Cerredo (8784 ft.), and Moncayo (7593 ft.), in the Cantabrian Range; Plaza del Moro Almanzor (8692 ft.), in the Carpetan Range; the plateau of Corocho de Rocigalgo (4750 ft.), in the Toledo Mountains; Estrella (4260 ft.), in the Betic Range; Mulhacen (11,417 ft.) and Veleta (11,382 ft.) in the Penibetic.

For hydrographic purposes the surface of Spain is divided by the Instituto Geográfico into the following ten basins: (1) the Eastern Pyrenees, basin of the Rivers Muga, Fluvía, Ter, Tordeva, Besós, Llobregat, Foix, and Francolí; (2) the basin of the Ebro, to the south and west of the preceding, containing the Nela, Zadorra, Ega, Arga, Aragón, Arba, Gallego, Cinea, and Segre, affluents of the Ebro, on its right side, and the Oca, Tiron, Oja, Najerilla, Iregua, Alhama, Jalón, Huerva, Aguas, Martin, Guadalope, Matarrana, and other smaller affluents on its left; the south-eastern region, watered by the Cenia, Migares, Palancia, Turia (or Guadalaviar), Jucar, Serpis, Vinalopó, Segura, and Almanzora; (4) the southern region, intersected by small streams, the most important rivers being the Almería, Adra, Guadalfeo, Guadalhorce, Guadiaro, and Guadalete; (5) the basin of the Guadalquivir, the affluents of which are, on the right, the Rivers Borosa, Guadalimar, Rumblar, Jándula, Yeguas, Guadamellato, Guadiato, the Brook of Huesna, the River Viar, and the Brooks of Cala, Huelva, and Guadiamar, and on the left, the Guadiana Menor, Genil, Guadabullón, Guadajoz, Corbones, Guadaira, and Salado de Morón; (6) the basin of the Guadiana, with its tributaries, the Záncara, or Cigüela, Bullaque, and Gévora, on the right, and the Javalón, Zujar, Ardila, and Chanza, on the left; (7) the basin of the Tagus, which river rises in the Province of Teruel, in the Sierra de Molina, and receives, on the right, the Gallo, Jarama, Guadarrama, Alberche, Tiétar, Alagón, and Eljas, and, on the left, besides other streams of slight importance, the Guadiela and the Almonte. The Jarama, in its turn, receives the Lozoya, Guadalix, Manzanares (which flows by Madrid), Henares, and Tajuña; (8) the basin of the Douro, which rises in the Peña (Rock) Urbión, in the Province of Logroño, 7216 feet above the sea level. The chief affluents of the Douro are, on the right, the Pisuerga and the Esla, and on the left, the Eresma and the Tormes. The Pisuerga, again, receives, on the right, the Burejo, Vallarna, Astudillo, and Carrión, and on the left, the Camesa, Odra, Arlanzón, Baltanás, and Esgueva. Affluents of the Esla, on the right, are the Curueño, Bernesga, Orbigo, Tera, and Aliste, and on the left, the Cea. (9) The western region of Galicia, the chief rivers of which are the Miño, Oitaben, Lerez, Umia, Ulla, Tambre, Jallas, Castro, Rio del Puerto, Allones, Mero, Mandeo, Lume, Jubia, Rio de Porto do Cabo, Mera, and Sor. (10) The northern basin, containing the Eo, Navia Nalón, and Sella, in the Asturias; the Deba, Nansa, Besaya, Mas, and Miera, in Santander; the Nervión, Oria, and Bidasoa, in the Basque country. The only important lakes in Spain are the lagoons: those of Gallocanta, in Aragon; the Alfaques, in Catalonia; the Albufera, in Valencia, and, in Cadiz, that of Janda, the scene of the battle which has been generally known as the battle of Guadalete, which put an end to the power of the Goths.

Silver, lead, and iron are abundant, the last especially in Biscay. Veins of quicksilver are found in Almadén, besides others of less importance elsewhere. There are also copper, tin, zinc, gold, cobalt, nickel, antimony, bismuth, and molybdenum. Spain is not rich in coal, which, however, is found in the Provinces of Gerona, Lérida, Santander, Asturias, León, Palencia, Burgos, Guadalajara, Cuenca, Ciudad Real, Badajoz, Cordova, and Seville. The most important carboniferous deposits are those of S. Juan de las Abadesas (Gerona), Mieres (Asturias), Barruelo and Orbó (Palencia), Puertollano (Ciudad Real), Bélmez and Espiel (Cordova), and Villanueva del Rio (Seville). There are also deposits of anthracite, lignite, asphalt, and turf, while springs of petroleum, though not of any importance, exist in Barcelona, Burgos, Cadiz, and Guadalajara. On the other hand, sulphur is abundant, as well as common salt, and waters impregnated with sulphates and with sulphur.

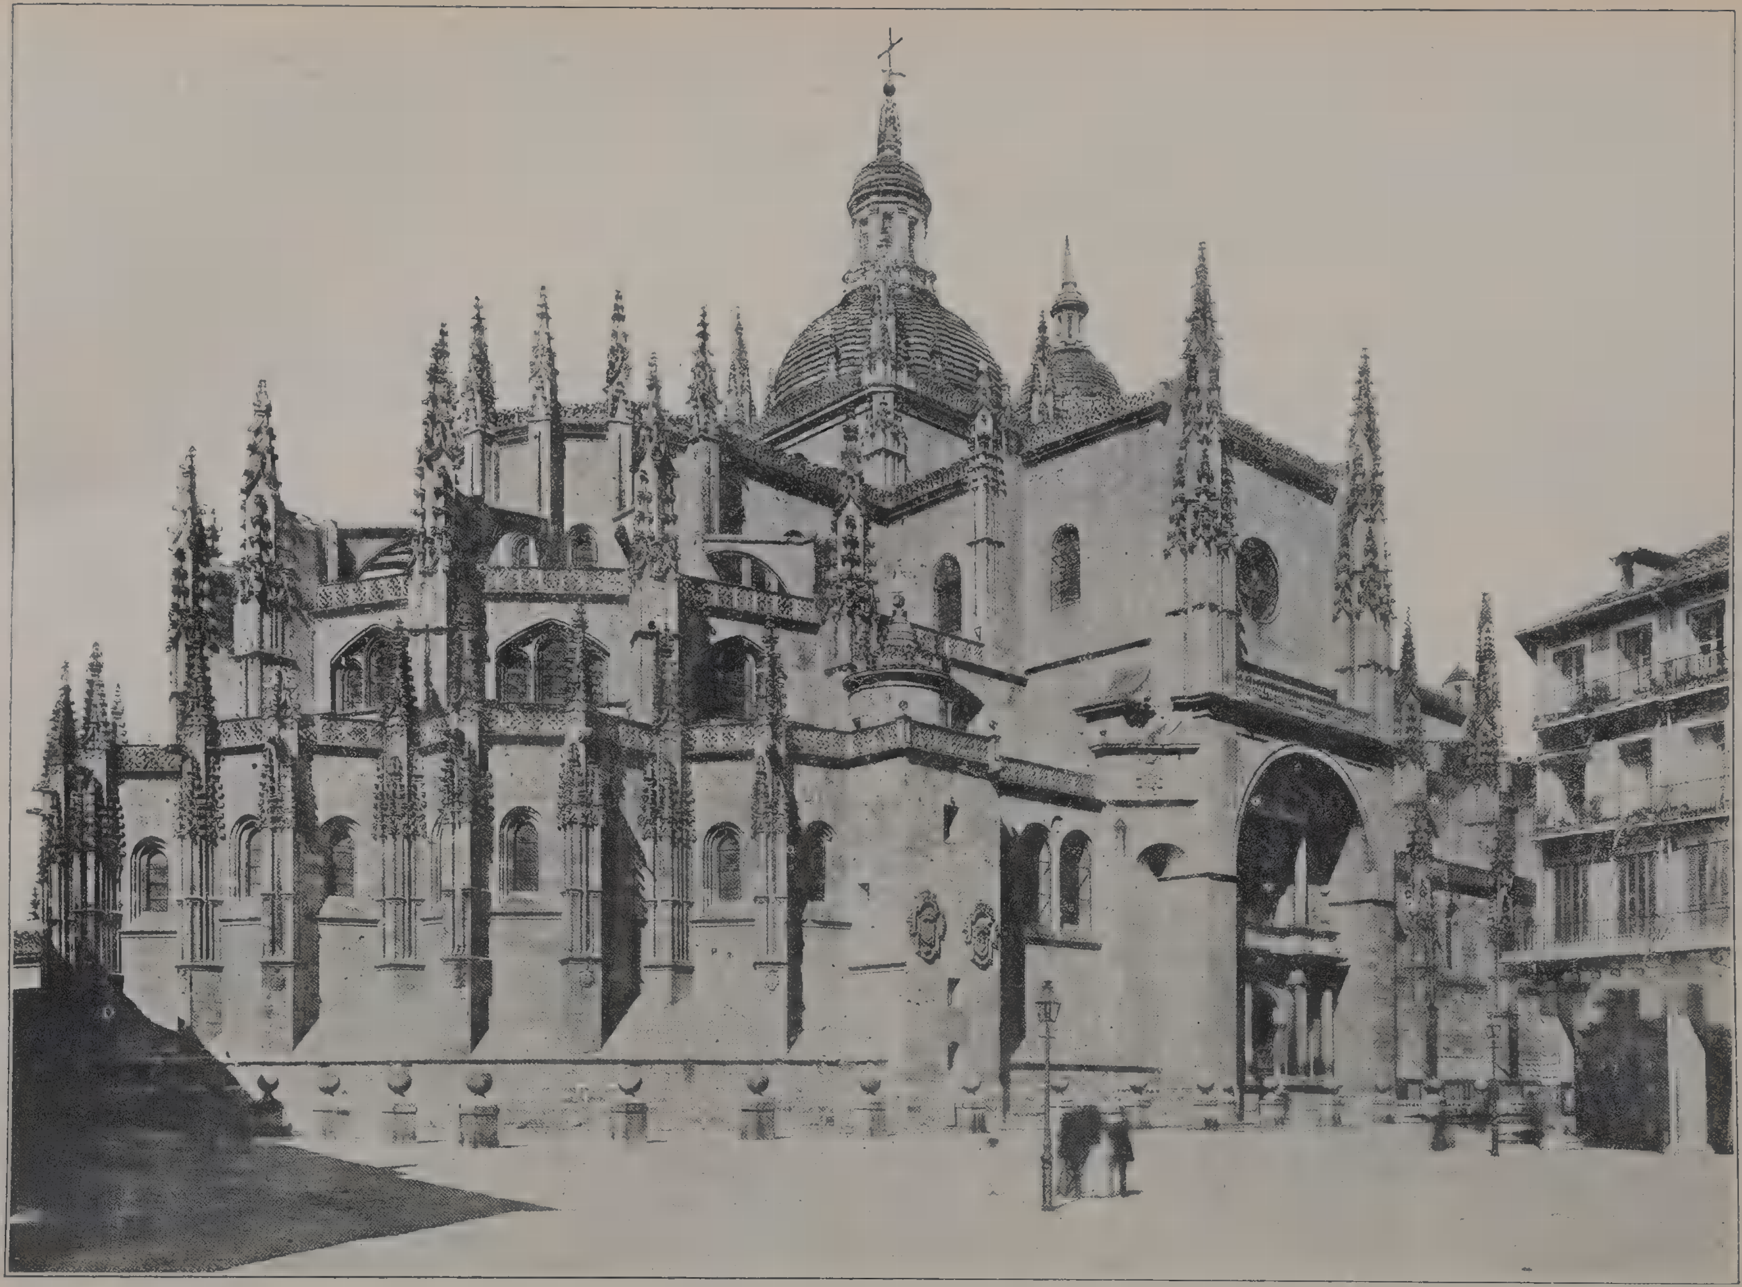
The botanical resources are abundant and various —the chestnut, the oak, the cork tree, the pine, and a number of other conifers. Castile produces a great quantity of cereals; Valencia, rice, oranges, lemons, *chufas* (the tuber of a variety of sedge), melons, and other fruits in immense variety; Catalonia, potatoes, oil, figs, filberts, carobs, pomegranates, alfalfa; Murcia, peppers, dates, saffron etc.; Andalusia, oil; Estremadura, pasturage etc. Excellent wines are produced in nearly all the provinces, the most highly esteemed being those of Jerez, Malaga, Montilla (Andalusia), Cariñena (Aragon), Valdepeñas, Rioja etc. The soil of Spain is apportioned agriculturally as follows:

	Acres.
Market gardens	391,128
Orchards	704,522
Grain	32,014,934
Vineyards	3,480,816
Olive groves	2,001,705
Meadows	1,803,809
Pasturage	6,307,100
Highways and woods	207,767
Mountain	11,608,197
Untilled, but fit for grazing	8,264,063
Waste	4,024,770
Total	70,808,811



SPAIN

A CHAPEL IN THE CATHEDRAL OF SIGÜENZA, 1520 FOUNTAIN IN THE CATHEDRAL CLOISTER, BARCELONA
THE LIBRARY OF THE ESCORIAL, 1563-84 INTERIOR OF THE TRANSEPT, CATHEDRAL OF BURGOS



EAST END OF THE CATHEDRAL, SEGOVIA

The normal agricultural production is:

	English bushels.		English gallons.
Wheat	90,167,965	Oil	73,947,467
Barley	47,895,912	Wine	509,712,819
Rye	20,337,766		
Maize	21,425,538		
Oats	7,245,315		
Total production of grain	187,072,496		

It is not easy to ascertain the number of head of stock bred in Spain; great pains are taken to conceal the statistics, owing to the increase of taxation. The following statement, may be taken as approximately correct: horses, 500,000; mules, 900,000; asses, 950,000; cattle, 2,500,000; sheep, 18,000,000; goats, 3,000,000; hogs, 3,000,000. At the end of the eighteenth century there were 19,000,000 head of sheep. One of the chief causes of the decline in this respect was the laicization of religious houses, which eventually resulted in the mountain slopes being denuded. It is estimated that 68,000,000 kilogrammes (66,830 English tons, or 74,849 American tons) of fish are caught annually on the sea coasts of Spain. Of this quantity 24,000,000 kilogrammes are salted, and 8,000,000 pickled. The quantity exported is 26,000,000 kilogrammes (25,590 English tons, or 28,660 American tons).

While Spain does not rank as a manufacturing nation, it has important manufactures of woollen, cotton, silk, linen, and hempen textiles; of paper, leather, porcelain, earthenware, and glass; of chocolate, soap, and chemicals. Weapons are manufactured at Toledo, Oviedo, Seville, Trubia (ordnance), Eibar, Plasencia, Saragossa, and Albacete (the famous Albacete *navajas*, or knives). There are also notable manufactures of bricks, glazed tiles (*azulejos*), and other ceramic products. The principal articles of importation are cotton, wheat, coal, timber, sugar, salted codfish, woollen fabrics, and machinery; of exportation, wine, oil, metals, and other mineral products, cork, and fruit, both dried and fresh. The principal banks are the Bank of Spain; the Bank of Barcelona, the Banco Hipotecario, the Sociedad Tabacalera de Filipinas, etc. The first-class maritime custom-houses are those of Aguilas, Alicante, Almería, Barcelona, Bilbao, Cadiz, Carril, Cartagena, Corunna, Gijon, Grao de Valencia, Huelva, Mahón, Malaga, Palamós, Palma in Majorca, Pasajes, Ribadeo, San Sebastián, Santander, Seville, Tarragona, Vigo, and Vinaroz. The first-class inland custom-houses are those of Junquera, Portbou, Irún, Canfranc, Benasque, Palau, Sallent, Torla, Les, Alós, Bosost, Farga de Moles, Dancharinea, and Valcarlos, on the French frontier, and, on the Portuguese frontier, those of Albuquerque, Badajo, Olivenza, San Vicente, Alcántara, Herrera de Alcántara, Valencia de Alcántara, Paimogo, Verín, Cadovos, Puente Barjas, La Guardia, Salvatierra, Tuy, Fregeneda, Alberguería, Aldea del Obispo, Barba del Puerco, Alcañices, Fermoselle and Pedralva.

According to the census for those years respectively, the population of Spain was: 15,464,340 in 1857; 15,673,481 in 1860; 16,634,345 in 1877; 17,565,632 in 1887; 18,132,475 in 1897; 18,618,086 in 1900. The last of these census shows a distribution according to sex of 9,087,821 males and 9,530,265 females, an excess of 442,444 females; there were 5,200,816 unmarried men, and 5,109,609 unmarried women; 7,021,512 married men and women; 391,452 widowers and 888,629 widows (excess of widows 497,177); condition not ascertained, 3615 men and 2453 women. In regard to age the married persons were divided as follows:

	Males.	Females.
Between 11 and 15 years of age	11	324
Between 16 and 20 years of age	3,700	55,296
Between 21 and 25 years of age	136,903	350,957
Between 26 and 30 years of age	461,439	557,630

Unmarried persons were divided as follows:

	Males.	Females.
Between 41 and 45 years of age	35,291	50,617
Between 46 and 50 years of age	32,549	59,067
Between 51 and 60 years of age	45,255	78,037

As to longevity, the figures were:

	Males.	Females.
Persons living between 71 and 80 years of age	174,815	184,504
Persons living between 81 and 90 years of age	28,075	35,948
Persons living between 91 and 100 years of age	1,656	3,048
Persons living over 100 years of age	28	124

II. GOVERNMENT.—A. *Civil and Military Organization.*—Spain was formed by the coalition of various states, which for many centuries had kept their own names and boundaries, and had differed considerably in laws (the *fueros*), customs, characteristics, and methods of government. These states were: The Kingdoms of Galicia, León, Old and New Castile, Estremadura, Andalusia, Murcia, Valencia, the Balearic Isles, Aragon, and Navarre, the two principalities of Asturias and Catalonia, and the Basque Provinces. The Bourbons, with their French propensity to centralize, made the government uniform, converting the ancient states into so many *intendencias*, or departments. In 1809, Joseph Bonaparte, the intruded occupant of the Throne, divided Spain into 38 departments, and the present division, into 49 provinces, was legally enacted in 1834. The ancient Kingdom of Galicia makes four provinces: Corunna (or Coruña), Lugo, Orense, and Pontevedra. The Principality of Asturias is the Province of Oviedo. Old Castile forms the eight provinces of Avila, Segovia, Soria, Valladolid, Palencia, Burgos, Logroño, and Santander; New Castile, those of Madrid, Toledo, Ciudad Real, Cuenca, and Guadalajara. The three Basque Provinces are: Alava, Guipuzcoa, and Vizcaya, their respective capitals being Vitoria, S. Sebastian, and Bilbao. Navarre forms a single province, with Pamplona for its capital. Aragon is divided into the three Provinces of Saragossa, Huesca, and Teruel; Catalonia forms those of Barcelona, Tarragona, Lérida, and Gerona; León, those of León, Zamora, and Salamanca; Estremadura, those of Cáceres and Badajoz; Valencia, those of Alicante and Castellón de la Plana; Murcia, those of Murcia and Albacete. Andalusia forms the eight Provinces of Cordova, Almería, Granada, Malaga, Jaen, Cadiz, Huelva and Seville. The Balearic Isles form one province, with Palma for its capital; the Canaries, another, with Las Palmas for its capital. This division has many inconveniences: it is ill-adapted to historical analysis; it is extremely unequal, some provinces being three times as large as others. Moreover, it does not fit in with the ecclesiastical organization of the country.

At the head of each province is a civil governor, the office being both administrative and political in character, and one of the few the incumbents of which change with the changes of political parties in power. Subject to the civil governor are all the departments of the provincial administration; the Exchequer, presided over by a delegate, the Police, etc. The civil governor also wields authority over the civil "facultative corps", as they are called—the engineers of highways, forests, and mines, and the agricultural experts—as well as over public instruction, charities, and so on. Each province is divided into municipalities, which are governed by municipal councils (*ayuntamientos*), with an *alcalde*, or mayor, at the head of each *ayuntamiento*. Each alcalde is dependent on the governor of the province, and in his turn controls the officials of his own municipal government. The total number of municipalities and *ayuntamientos* in Spain is 9290. Every village not large enough to form a municipality has a sub-mayor (*alcalde pedaneo*), governing the village in dependence upon the *ayuntamiento* of the municipality of which it forms a part. The theories of Centralism have made the municipal *ayuntamientos* organs of the central political power; but in practice these bodies aspire to be really representative, each of its own community, in relation to the Government, and this forms the programme of the Municipal Autonomy movement.

The central Government is administered by the various ministerial offices and the bureaux dependent upon them. These ministerial offices are: the Presidency of the Council of Ministers, with its administrative corps; the Ministry of State, with the diplomatic and consular corps, the corps of interpreters, and the auxiliary administrative corps; the Ministry of Grace and Justice, which has charge of ecclesiastical relations, of the judges, notaries, registrars of property, clerks (*escribanos*), and relators, and the direction of prisons and penal establishments; the Ministry of Finance, or the Exchequer (*Hacienda*), which controls the administration of the customs, the advocates of the State, and the examiners of accounts, besides its own special administrative bureau. The Ministerio de Gobernación (equivalent to Home Office or Department of the Interior) has charge of public health and the Police, as well as the Postal and Telegraph Services, and public charities. The Ministry of Public Instruction and Fine Arts has charge of the archives, libraries, copyright (*propiedad literaria*), geographical, topographical, and astronomical workers, independent industrial enterprises, and state professors and teachers. The Ministry of Public Works controls the state engineers and exercises supervision over highways, mines, agriculture, manufactures and commerce, and forests, besides special administration. The Ministry of War has charge of all that relates to national defence; the Ministry of Marine, of the whole administration of the Navy, both as to material and men. The Ministerio de Ultramar (Ministry of the Colonies) has ceased to exist since the loss of the colonies.

The ordinary administration of justice in Spain is carried on by judges of first instance, territorial courts (*audiencias*) of second instance, and the Supreme Court, sitting at Madrid, to which causes of great importance are taken in the last instance. There are fifteen territorial courts, or jurisdictions (*audiencias*): (1) at Albacete; (2) Barcelona; (3) Burgos; (4) Cáceres; (5) Corunna; (6) Granada; (7) Madrid; (8) Oviedo; (9) Palma (Majorca); (10) Las Palmas (Canary Islands); (11) Pamplona; (12) Seville; (13) Valencia; (14) Valladolid; and (15) Saragossa. Of these jurisdictions (1) comprises the Provinces of Albacete (eight judicial districts, eighty-five *ayuntamientos*), Ciudad Real (ten judicial districts), Cuenca (eight districts), and Murcia (ten districts); (2) of Barcelona (seventeen districts), Gerona (six districts), Lérida (eight districts), and Tarragona (eight districts); (3) of Alava (three districts), Burgos (twelve districts), Logroño (nine districts), Santander (eleven districts), Soria (five districts), and Biscay (five districts); (4) of Badajoz (fifteen districts), and Cáceres (thirteen districts); (5) of Corunna (fourteen districts), Lugo (eleven districts), Orense (eleven districts), and Pontevedra (eleven districts); (6) of Almería (ten districts), Granada (fifteen districts), Jaén (thirteen districts), and Malaga (fifteen districts); (7) of Avila (six districts), Guadalajara (nine districts), Madrid (seventeen districts), Segovia (five districts), and Toledo (twelve districts); (8) comprises the single province of Oviedo, divided into fifteen districts; (9) comprises the Balearic Isles, with six districts; (10) the seven districts of the Canary Islands; (11) the Provinces of Guipuzcoa (four districts), and Navarre (five districts); (12) of Cadiz (fourteen districts), Cordova (seventeen districts), Huelva (six districts), and Seville (fourteen districts); (13) of Alicante (fourteen districts), Castellon (nine districts), and Valencia (twenty-one districts); (14) of Leon (ten districts), Palencia (seven districts), Salamanca (eight districts), Valladolid (eleven districts), and Zamora (eight districts); (15) of Huesca (eight districts), Teruel (ten districts), and Saragossa (thirteen districts).

The Peninsula and its adjacent islands are divided into fourteen military districts, or captaincies-general (*capitanias generales*): New Castile, Catalonia, Andalusia, Valencia, Galicia, Aragon, Granada, Old Castile, Estremadura, Navarre, Burgos, the Basque District, the Balearic, and the Canary Islands. Each district is commanded by a lieutenant-general with the title of captain-general, to whom all the troops in the district, and all persons connected with the army, are subject. A general of division, called the *segundo cabo* (second chief), takes his place in case of absence or illness, and is also the military governor of the chief province of the district. There is also a commander-in-chief at Ceuta, who is not dependent upon any district commander. Each civil province also forms a military government, usually commanded by a general of brigade or, in the case of the principal ones, by a general of division. Every fortress or place of high strategic importance constitutes a special military government under a *comandante de plaza*.

B. *Ecclesiastical Organization.*—Spain is divided into the following ecclesiastical provinces: I. Burgos; II. Granada; III. Santiago; IV. Saragossa; V. Seville; VI. Tarragona; VII. Toledo; VIII. Valencia; IX. Valladolid. By the Concordat of 1851 it was agreed that eight sees should be suppressed. These eight were: Albarracín, Barbastro, Ceuta, Ciudad Rodrigo, Iviza, Solsoña, Tenerife, and Tudela. (See map.)

I. (1) The Archdiocese of Burgos (*Burgensis*), erected in 988, made metropolitan by Alfonso VI, numbers 1220 parishes, 47 rural deaneries, in the Provinces of Burgos, Santander, Palencia, and Soria. (2) The Diocese of Calahorra and La Calzada (*Calagurritana*) is of Apostolic origin. It has 266 parishes, 47 rural deaneries, in the Provinces of Logroño and Navarre. By the provisions of the Concordat its capital should have been transferred to Logroño, but, owing to difficulties which arose, it is at present (1910) administered by the Archbishop of Burgos. (3) The Diocese of León (*Legionensis*), founded in the third century, has 345 parishes, 37 rural deaneries, in the Provinces of León, Valladolid, and Oviedo. (4) The Diocese of Osma (*Oxomensis*) is of Apostolic origin. It was suppressed on account of the Arab invasion, and restored in the ninth century. It numbers 349 parishes, 28 rural deaneries, in the Provinces of Soria and Burgos. (5) The Diocese of Palencia (*Palentina*), founded in the third century, has 345 parishes, 24 rural deaneries, in the Provinces of Palencia, Valladolid, and Burgos. (6) The Diocese of Santander (*Santanderiensis*), erected in the year 1354, has 425 parishes, 26 rural deaneries, nearly all in the same province. (7) The Diocese of Vitoria (*Victoriensis*), erected in 1862, pursuant to the Concordat of 1851, has 930 parishes, 36 rural deaneries, in the three Basque provinces.

II. (1) The Archdiocese of Granada (*Gramatensis*), of very ancient origin, was restored and made metropolitan by the Catholic sovereigns in 1492. It numbers 182 parishes, 13 rural deaneries, nearly all in the Provinces of Granada and Almería. (2) The Diocese of Almería (*Almeriensis*), of very ancient origin, was restored by the Catholic sovereigns. It has 66 parishes, 7 rural deaneries, in the province of the same name. (3) The Diocese of Cartagena-Murcia (*Cartaginiensis*) is of unknown origin. Urban IV restored it and fixed its see in Murcia. It has 134 parishes, 17 rural deaneries, in the Provinces of Murcia, Alicante, Almería, and Albacete. (4) The Diocese of Guadix (*Accitana*) founded by St. Torquatus in the first century, restored at the end of the fifteenth century, has 61 parishes, 5 rural deaneries, in the Provinces of Almería and Granada. (5) The Diocese of Jaén (*Gienensis*), of very ancient origin, was restored by Innocent IV in 1249. It numbers 119 parishes, 12 rural deaneries, in its own province. (6) The Diocese of Malaga (*Malacitana*) dates from the Apostolic period and was restored by the Catholic Sovereigns. It has 131 parishes, 17 rural deaneries, in the Provinces of Malaga, Cádiz, and Seville, and the African possessions of Spain (Melilla).

Alminar, or Tower of the Cathedral, Cordova

III. (1) The Archdiocese of Santiago, or of Compostela (*Compostellana*) is of Apostolic origin. It has 788 parishes, 36 rural deaneries, in the Provinces of Corunna and Pontevedra. (See Compostela.) (2) The Diocese of Lugo (*Lucensis*), founded in the third century and restored by Alfonso I in 739, numbers 647 parishes, 40 rural deaneries, in the Provinces of Lugo and Pontevedra. (3) The Diocese of Mondoñedo (*Mindonensis*), of which nothing is known earlier than the sixth century, its see having been established at Mondoñedo by Doña Urraca, has 277 parishes, 18 rural deaneries, in the Provinces of Lugo and Coruña. (4) The Diocese of Orense (*Auriensis*), of very ancient, some say Apostolic, origin, has 519 parishes, 30 rural deaneries, nearly all in its own province. (5) The Diocese of Oviedo (*Ovetensis*) appears to have had its origin in the ninth century, although some attribute to it a higher antiquity. It numbers 969 parishes, 78 rural deaneries, in its own province and a part of León. (6) The Diocese of Tuy (*Tudensis*) is of Apostolic origin. It has 276 parishes, 14 rural deaneries, in the Provinces of Orense and Pontevedra.

IV. (1) The Archdiocese of Saragossa (*Cæsaraugustana*), founded in the first century, restored in 1117, made metropolitan in 1138, has 370 parishes, 15 rural deaneries, in its own province and that of Teruel. (2) The Diocese of Barbastro (*Barbastrensis*), erected in the reign of Pedro I of Aragon (1094–1104), is to be reunited, in pursuance of the Concordat, with the Diocese of Huesca, from which it was separated in the time of Philip II. It numbers 154 parishes, 10 rural deaneries, in the Province of Huesca. (3) The Diocese of Huesca (*Oscensis*) dates from the first century and was restored in 1086. It has 167 parishes, 9 rural deaneries, in the Provinces of Huesca and Saragossa. (4) The Diocese of Jaca (*Jacensis*), erected by Don Ramiro of Aragon (eleventh century) and separated in 1575, has 70 parishes, 8 rural deaneries, in the Provinces of Huesca, Saragossa, and Navarre. (5) The Diocese of Pamplona (*Pampilonensis*) is of Apostolic origin, its first bishop having been St. Ferminus. It has 567 parishes, 21 rural deaneries, in the Province of Navarre. (6) The Diocese of Tarazona (*Turiasonensis*) dates from the Gothic period and was restored in 1115. It has 138 parishes, 9 rural deaneries, in the Provinces of Logroño, Navarre, and Saragossa. (7) The Diocese of Teruel (*Turulensis*), founded in 1577 at the petition of Philip II, has 96 parishes, 5 rural deaneries, in the province of the same name. Its jurisdiction now includes that of Albarracin. (8) The Diocese of Tudela (*Tutelensis*) has had but four bishops, the last consecrated in 1819. It was suppressed by the Concordat, and its jurisdiction given to the Bishop of Tarazona. It has a collegiate church and 26 parishes in the Province of Navarre.

V. (1) The Archdiocese of Seville (*Hispalensis*) dates from the third century, and was restored by St. Ferdinand in 1248. It has 270 parishes, 21 rural deaneries, in the Provinces of Seville, Huelva, Cadiz, and Malaga. (2) The Diocese of Badajoz (*Pacensis*) is supposed to be of Apostolic origin, although there is no documentary proof of its existence earlier than the seventh century. It has 136 parishes, 13 rural deaneries, in the province of the same name. (3) The Diocese of Cadiz-Ceuta (*Gaditana*) founded by Alfonso X in 1263, has 32 parishes, 6 rural deaneries, in its own province and Ceuta. (4) The Diocese of the Canaries (*Canariensis*) erected by Innocent VII in 1406, has 42 parishes, 5 rural deaneries, in the Canary Islands. (See Canary Islands.) (5) The Diocese of Cordova (*Cordubensis*), dating from the first century, has 124 parishes, 17 rural deaneries, in the Provinces of Cordova and Badajoz. (6) The Diocese of Tenerife (*Nivariensis*), erected in 1819 by Pius VIII, is to be incorporated, according to the Concordat, with that of the Canaries. Its see is at La Laguna (Palma) and it numbers 62 parishes, 10 rural deaneries.

VI. (1) The Archdiocese of Tarragona (*Tarraconensis*) was erected in the first century, and disputes with Toledo the right of primacy. It was restored by Ramón Berenguer, Count of Barcelona, in 1088, and numbers 150 parishes, 6 rural deaneries, in the Provinces of Tarragona and Lérida. (2) The Diocese of Barcelona (*Barcinonensis*) is believed to be of Apostolic origin, and was restored in the twelfth century by Ramón Berenguer. By a recent concession of the Holy See, its bishop wears the pallium, like a metropolitan. It has 231 parishes, 10 rural deaneries, in the Provinces of Barcelona, Tarragona, Lérida, and Gerona. (3) The Diocese of Gerona (*Gerundensis*) dates from the third century, and was restored in the eighth. It has 363 parishes in the Provinces of Gerona and Barcelona. (4) The Diocese of Lérida (*Ilerdensis*) is one of the most ancient in Spain. It numbers 249 parishes, 12 rural deaneries, in the Provinces of Lérida and Huesca. (5) The Diocese of Solsona (*Excelsonensis*) was erected in 1593, suppressed by the Concordat, and again constituted as an Apostolic administration with a titular bishop. It has 152 parishes, 11 rural deaneries, in the Provinces of Barcelona, Lérida, and Gerona. (6) The Diocese of Tortosa (*Dertusensis*), believed to be of Apostolic origin, restored in 1141, has 159 parishes, 12 rural deaneries, in the Provinces of Tarragona, Teruel, and Castellón. The Concordat provides for the transfer of its capital to Castellón de la Plana. (7) The Diocese of Urgel (*Urgellensis*) is very ancient, and its bishop is the sovereign of the Valleys of Andorra. It has 395 parishes, 19 rural deaneries, in the

Provinces of Lérida and Gerona and in the Republic of Andorra. (8) The Diocese of Vich (*Vicensis*), in the ancient Ausona, was erected in 713, and restored by Ludovico Pio, and, later, by Vifredo the Hairy, Count of Barcelona. It has 248 parishes, 11 rural deaneries, in the Provinces of Barcelona, Gerona, and Tarragona.

VII. (1) The Archdiocese of Toledo (*Toletana*), erected in the first century, had for its first bishop St. Eugenius. In the fifth century the see was made metropolitan, and after the Reconquest it became the principal see of the Spains. The archdiocese contains 442 parishes divided into 20 rural deaneries, and covers the Province of Toledo and part of those of Jaén, Guadalajara, and Cáceres. (2) The Diocese of Coria (*Cauriensis*) existed as early as the year 589 and was restored in 1142 by Alfonso VIII. It comprises 124 parishes, divided into 11 rural deaneries, in the Provinces of Cáceres, Salamanca, and Badajoz. (3) The Diocese of Cuenca (*Conquensis*) was erected in 1179 by Pope Lucius III. It has 326 parishes, in 12 rural deaneries, in the Provinces of Cuenca and Guadalajara. (4) The Diocese of Madrid-Alcalá (*Matritensis-Complutensis*) was erected by the Bull of 7 March, 1885, in pursuance of the Concordat of 1851. It has 232 parishes, divided into 18 rural deaneries, in the Province of Madrid. (5) The Diocese of Plasencia (*Placentina*), erected in 1190 by Alfonso VIII, has 260 parishes, divided into 14 rural deaneries, in the Province of Cáceres, Salamanca, Badajoz, and Avila. (6) The Diocese of Sigüenza (*Saguntina*) existed in the time of the Goths, and was restored by Alfonso VIII. It has 350 parishes, 18 rural deaneries, in the Provinces of Guadalajara, Saragossa, and Soria.

VIII. (1) The Archdiocese of Valencia (*Valentina*) erected in the third century, and restored by Jaime I, the Conqueror, in 1238, has 313 parishes, 25 rural deaneries, in the Provinces of Alicante, Valencia, and Castellón. (2) The Diocese of Iviza (*Ebusensis*) is to be merged in that of Majorca, pursuant to the Concordat. It has 37 parishes. (3) The Diocese of Majorca (*Majoricensis*) was erected by Jaime, the Conqueror, in 1229. The see is at Palma, and its incorporation with the Diocese of Iviza is provided for by the Concordat. It has 59 parishes, 7 rural deaneries, in the Balearic Isles. (4) The Diocese of Minorca (*Minoricensis*), erected in 1795, has its see at Ciudadela and numbers 14 parishes. (5) The Diocese of Orihuela (*Oriolensis*) was erected in 1564. Its see should, by the terms of the Concordat, be transferred to Alicante. It has 60 parishes, 11 rural deaneries, in the Provinces of Alicante, Valencia, and Almeria. (6) The Diocese of Segorbe (*Segobricensis*) founded in the time of the Goths, restored in 1171, and again in 1245, has 65 parishes, 7 rural deaneries, in the Provinces of Castellón, Valencia, and Teruel.

IX. (1) The Archdiocese of Valladolid (*Vallisoletana*) was founded in 1595 and became metropolitan in 1859. It has 93 parishes, 9 rural deaneries, in the province of the same name. (2) The Diocese of Astorga (*Asturicensis*) is of Apostolic origin, and was restored by Alfonso I in 747. It has 582 parishes and 18 rural deaneries in the Provinces of León, Zamora, and Orense. (3) The Diocese of Avila (*Abulensis*) was erected by St. Secundus in Apostolic times, and restored after the Arab invasion, by Alfonso VI. It has 339 parishes, divided into 20 rural deaneries, in the Provinces of Avila, Toledo, and Valladolid. (4) The Diocese of Ciudad Rodrigo (*Civitatensis*), founded by Alexander III, in 1175, is one of those suppressed under the Concordat, its territory having been added to that of Salamanca since 1884 under an Apostolic administrator with episcopal character. It has 150 parishes, 11 rural deaneries, in the Province of Salamanca. (5) The Diocese of Salamanca (*Salmanticensis*) dates from the first century, and was restored by Alfonso I, the Great, in 901. It numbers 286 parishes, 19 rural deaneries, in the province of the same name. (6) The Diocese of Segovia (*Segoviensis*) was erected in the time of the Goths and restored by Alfonso VI. It has 276 parishes, 15 rural deaneries, in the Provinces of Segovia, Avila, and Valladolid. (7) The Diocese of Zamora (*Zamorensis*) was founded in the year 905. It has 265 parishes, 13 rural deaneries, in the Provinces of Zamora and Valladolid.

Besides these nine provinces, there is the Diocese-Priorate of the four military orders, or of Ciudad-Real (*Cluniensis*), which was erected as *vere nullius* by the Bull "Ad Apostolicum", put into execution by the Decree of August, 1876. It has 115 parishes, in 11 rural deaneries.

The privileged ecclesiastical jurisdictions are the Apostolic Nunciature and the Supreme Tribunal of the Rota, both at Madrid, and the Chapel Royal (*Clero de la Real Capilla y Patrimonio*), with a grand almoner (*capellan mayor*) to His Majesty, honorary chaplains, etc. The military chaplains are under the jurisdiction of a Vicar-General of the Army and Navy. There are four deputy vicars and a proportionate number of chaplains-general, and first-class and second-class chaplains.

Notwithstanding the measures of disamortization which have deprived them of their property, and the general expulsion effected a second time by the Revolution of 1868, the religious orders of both sexes prosper and possess many establishments in Spain. Owing, however, to their anomalous legal position, it is extremely difficult to obtain statistics of them, although an approximation may be made. The Liberals assert that, since the Concordat of 1851, only three religious orders of men have any right to be admitted to the country, while the Conservatives and Catholics in general understand that the Concordat places these three orders in a privileged position, but admits all the other orders conformably with the provisions of the canon law to which its stipulations are subject. In 1903 the religious orders in Spain numbered 597 communities of men and 2463 communities of women. The number of male religious was 10,630; of female 40,030. These communities were divided, according to the chief object of their institutions, as follows:—

	Communities:	
	Of Men.	*Of Women.*
The Contemplative life	75	717
Charitable works	39	1029
Teaching	294	717
The priesthood	97	....
Missions	92	....
Total	597	2463

Of late years there has been a notable increase in these figures, but statistics are not obtainable. The most numerous orders are the Jesuits, Franciscans, Capuchins, Augustinians, Piarists, Missionaries of the Heart of Mary, Brothers of the Christian Schools, Marist Brothers, and Lazarists.

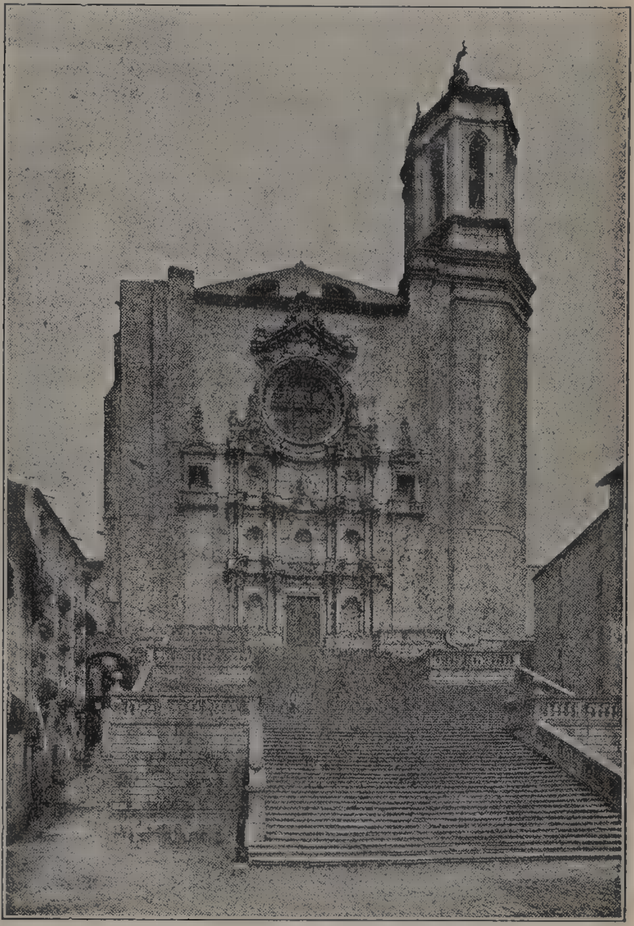
C. *Education.*—Three educational grades are recognized: the higher, intermediate, and primary. Higher education is divided into academical (*facultativa*) and technical (*special*): the former of these divisions is taught in the universities, with their faculties of law, philosophy and letters, sciences, medicine, and pharmacy. Technical education is given in the special schools of engineering, architecture, veterinary surgery, and manual-training, and in the military schools. There are three schools of industrial engineering (mechanics, chemistry, and electricity), at Madrid, Barcelona, and Bilbao. At Madrid are also a school of civil engineering (*Escuela de Ingenieros de Caminos, Canales y Puertos*), a school of mines, and a school of agriculture, while at the Escorial is a school of forestry (*Escuela de Ingenieros y de Montes*). There are schools of architecture at Madrid and at Barcelona; veterinary schools at Madrid, Saragossa, Leon, Cordova, and Santiago (Corunna). There are fourteen Government schools of commerce, besides many independent ones under Brothers of the Christian Schools, Marists, Jesuits, etc. Manual-training schools (*Escuelas de artes é industrias*, or *de artes y oficios*) are of recent origin in Spain; the national government maintains thirteen of them and gives subventions to many others which are supported by the municipalities or provincial governments. There are also schools of the fine arts, conservatories of music, etc. The military schools are: at Guadalajara, for the Engineers; at Segovia, for the Artillery; at Valladolid, for the Cavalry; at Toledo, for the Infantry; at Avila, for the Army Service Corps (*Administración Militar*); at Madrid, for the Army Medical Corps; and again at Madrid, for the Staff (*Estado Mayor*). Other institutions for military education are the College of the Guardias Civiles, at Valdemoro, that of the Carabineros, at the Escorial, etc. The schools of naval engineering and of marine artillery are at S. Fernando (Cadiz). There are schools and nautical institutes for the merchant marine, the practical examinations being under the supervision of the naval authorities. Preparation for teaching in the upper branches of literature is given in the normal schools established in the provincial capitals; the degrees are *Maestro Elemental*, *Maestro Superior*, and *Maestro Normal*. A higher school of pedagogy has recently been opened at Madrid.

Ecclesiastical education, since the suppression of the theological faculties in the universities, has been given in the conciliar seminaries established in all the dioceses, as prescribed by the Council of Trent. In some dioceses there are also lesser seminaries, which prepare students for the greater. The universities now in existence are: Madrid (formerly Alcalá), Salamanca, Barcelona, Granada, Seville, Valladolid, Valencia, Saragossa, Santiago, and Oviedo. In the last-named the only faculty in operation is that of law. There are intermediate schools in all the provincial capitals, as well as others in certain other localities—Baeza, Cabra, Figueras, Gijón, Jerez, Mahon, and Reus. The number of Government primary schools is very inadequate; the deficiency, however, is compensated by the number of private and religious institutions. By the School Census of 1903, there were in Spain altogether 31,838 schools (20,324 for boys; 10,970 for girls; 544 for infants). The following statistics of pupils are taken from the Census of 1900:

	Boys.	*Girls.*
Pupils of the age of 5 years	222,619	214,573
Pupils of the age of 6 years	214,174	215,737
Pupils of the age of 7 years	215,682	211,997
Pupils of the age of 8 years	217,572	211,840
Pupils of the age of 9 years	195,675	193,188
Pupils of the age of 10 years	213,911	211,939
Pupils of the age of 11 to 15 years	934,027	923,993
Total	2,213,660	2,183,267

making a total of 4,396,927 of both sexes. As it is estimated that two-thirds of the population of school age attend private or religious schools, it follows that the dearth of educational facilities in Spain is not so great as is commonly supposed. The number of absolutely illiterate has been much exaggerated, owing to the lack of proper statistics. That that number is as large as it really is may be explained by the ineffective enforcement of the legal school-attendance.

Although the Constitution of 1876, which is still in force, grants freedom of teaching, the right has been very much curtailed by legal enactments. There are but two independent universities, that of Deusto (Bilbao), directed by the Jesuits, and that of the Escorial, under the Augustinians. There are also, at Madrid, two independent institutions of university character, the Academia Universitaria Católica, under the presidency of the Bishop of Madrid-Alcalá, and the Institución Libre de Enseñanza (Free Institution of Education), directed by the Krausists. For intermediate, or gymnasium, education the religious orders have many colleges, some of which also take charge of interne pupils. The Jesuits, of whom there are three provinces in Spain, have colleges as follows: Province of Aragon.—With boarders at Sarriá (Barcelona), Saragossa, Valencia, and Orihuela (former Dominican university); half-boarding (*medio-pensionado*) school at Barcelona. Province of Castile.—For boarders at Gijon (Asturias), La Guardia (Pontevedra), Orduña (Vizcaya), Tudela (Navarre), and Valladolid; also day schools at Durango (Biscay), Carrión (Palencia), and Oña (Burgos). Province of Toledo.—Boarding schools at Charmarlín de la Rosa (Madrid), Seville, Malaga, Puerto de Sta. María (Cadiz), and Villafranca de los Barros (Badajoz); also a Catholic school of arts and crafts (*escuela técnica*), and a half-boarding school at Madrid. The Jesuits also conduct the following ecclesiastical colleges: For the formation of religious, houses of higher studies at Oña (Burgos), Tortosa (Tarragona), Granada, and S. Jeronimo; literary colleges at Loyola (Guipuzcoa), Veruela (Saragossa), Carrión (Palencia), Gandía (Valencia), and Burgos. The Province of Castile has a pontifical seminary at Comillas (Santander) and directs the episcopal seminary of Salamanca. It also has an Apostolic school at Xavier (Navarre).



FAÇADE OF THE CATHEDRAL, GERONA

The second religious institute in the work of teaching is that of the Piarists, or Fathers of the Pious Schools, which has been largely represented in Spain since the seventeenth century. As the Revolution has generally shown some respect for the Piarists, they have kept a larger number of their colleges than the Jesuits, who have been repeatedly expelled, and so obliged to establish their colleges over again.

There are Piarist colleges at Madrid, Barcelona, Valencia, Saragossa, etc., besides others at less important centres of population. In recent times some of the older orders which are not primarily teaching orders, such as the Augustinians, Dominicans, Franciscans, and Lazarists, have established boarding schools. In technical, commercial, and primary teaching, the Brothers of the Christian Schools of St. John Baptist de La Salle and Père Champagnat's Marist Brothers have attained a position of great importance; their establishments in Spain are numerous and have become more so since their expulsion from France. The Christian Brothers now have 53 colleges in Spain; the Marists, 67. The education of girls is to a great extent under the care of a number of congregations of religious women, who have boarding and half-boarding schools as well as day schools. The principal are: The Religious *de la Enseñanza* (Society of Our Lady) of Bl. Lestonac, who have 12 cloistered *pensions*. The Visitandines of St. Jeanne Françoise Frémoit de Chantal, established in Spain since 1758. The Religious of the Sacred Heart of Bl. Barat, with 15 houses, established in Spain since 1846. The Religious of Jesus and Mary, founded by M. Thévenet, entered Spain in 1850. The Ursulines have a college at Molina de Aragón (New Castile), and there are some colleges of the English Ladies and of Our Lady of Loreto. There are, in addition to these, numerous small schools for girls and many religious congregations for women—in particular, Carmelite Tertiaries, Franciscan Tertiaries, Augustinians, and Sisters of Charity.

III. History.—The old historians say that Spain was populated by the children of Tubal and of Tarsis, son and grandson of Japhet. These were the Iberians, who were divided into Iberians proper and Tartesians; the latter, in the South; the former, in the North. Some have held that the Iberians were Basques, and consequently were of the Uralo-Altaic, or Mongoloid, race, as the similarity of the Basque with the Finnish languages would seem to indicate. However this may be, the Iberians and Tartesians appear to have formed the aboriginal population, and the Celts, who occupied a great part of France, Great Britain, and Ireland, would seem to have come in upon them by way of the Bay of Biscay. The collision of the two races produced the population which later settlers and conquerors found in Spain: Celts in the North and West, Iberians in the East and South, and in the centre (Aragon and part of Castile) Celtiberians, whose very name indicates a fusion of the two races—no doubt, after a great deal of conflict.

It is very remarkable that the differences of language in the Iberian Peninsula still, partially, correspond to this first distribution of the inhabiting races. In the regions of the pure Iberians, Catalan is spoken, with its dialects, the Valencian and Balearic; in the regions conquered by the Celts, the languages are Gallego, Portuguese, and the *bable* of Asturias; in the Celtiberian and Tartesian portions, Castilian. This fact seems to support the theory of Padre Lorenzo Hervas y Panduro, that races, even when they change their grammar, never entirely change their own way of pronouncing the language which they use. Upon these first strata of population, which may be considered aboriginal, were superimposed the colonists and conquerors. The colonists were Greeks and Phœnicians; the conquerors, Carthaginians, Romans, Goths, and Arabs. Taking this as a guide, Spanish history may be divided into periods as follows: A. Colonies in Celtiberian Spain; B. Carthaginian Spain (third century B. C.); C. Roman Spain (third century B. C., to fifth century of our era); D. Visigothic Monarchy (fifth to eighth century); E. Arab Spain and Kingdoms of the Reconquest (eighth to fifteenth century); F. The Unification of Spain (fifteenth century to the present time).

A. *Colonies.*—The Phœnicians, who colonized all the Mediterranean coasts, established a great many colonies, or factories, in the South of Spain—Carteya, Calpe, Malaga, Sexi, and chief of all, Gades (Cádiz), the centre of their power in Spain and their cult of Hercules, which is symbolized on the Gaditanian coins. Soon after the Phœnicians, the Greeks began establishing their colonies, the chief colonizers being the Rhodians at Rosas, south of Cape Creus (910 B.C.), the Phocians, at Emporium (Ampurias, the present name, or Ampurdan, being derived from *Emporitanum*) and at Artemisium (Denia, from *Diana*, another name for Artemis), and the Zacynthians, who founded Saguntum and populated Iviza, giving it the name of Ophiusa.

B. *Carthaginian Spain.*—The Carthaginians settled in the Balearic Isles in the seventh century B. C. In the sixth century, having aided the Phœnicians of Cadiz against the Tartesians, they took possession of that city and began trading in Bætica. After the First Punic War they sought to indemnify themselves for their losses in Sicily by conquering Spain. The conquest was begun by Hamilcar Barca, and extended as far as the Ebro; then, too, began that struggle of the Spaniards for independence which was to last until the nineteenth century of the Christian Era. Istolacius and Indortes, the former a Celtic chieftain, the latter chief of certain Celtiberian tribes of the Ebro, raised an army, according to Diodorus Siculus, of 50,000 men; but they were defeated and condemned to death. However, Orison, another Iberian chief, achieved the rout and death of Hamilcar at Elice, or Elche (230). Hasdrubal, the founder of Cartagena, (New Carthage), was assassinated by a slave, and Hannibal, to complete the conquest of Spain, laid siege to Saguntum, which city then immortalized itself by its heroic act of self-destruction. The issue of the Second Punic War caused the Carthaginians to lose Spain, and the Romans succeeded to their mastery of the country.

C. *Roman Spain.*—But the Spaniards showed no more docility to the Romans than to the Carthaginians. Indibil and Mandonius commenced that course of resistance which ended only when Spain had been romanized—vanquished not so much by the arms as by the superior civilization of Rome, a culture which Spain assimilated to such a degree as to produce rhetoricians like Quintilian, poets like Lucan, Martial, and Silius Italicus, philosophers like Seneca, and emperors like Trajan, Hadrian, and Theodosius. Noteworthy among the wars of the Spaniards against Roman domination are those of Viriathus (150–140 B. C.), a Lusitanian chieftain; the struggle of Numantia (133), which imitated the example set by Saguntum; that of Sertorius, a partisan of Marius, who was proscribed by Sulla, fled to Spain, and there put himself at the head of the Spaniards. Sertorius did more than anyone else to romanize the country; he gave it Roman institutions, and founded at Huesca a high school with Greek and Latin teachers. After this, although the Spaniards took the side of Pompey against Cæsar, resistance to the Roman power as such was confined to the Cantabri and the Asturias, who were conquered, though not subdued, in the time of Augustus. The Romans at first divided their Spanish territories into Hither and Further Spain (*Hispania Citerior*, *Ulterior*), taking the Ebro as dividing line, but Augustus divided the country into *Tarraconensis*, *Lusitania*, and *Bætica*. Spain is covered with Roman remains, particularly aqueducts and bridges, but the most penetrating Roman influence was linguistic, giving to the inhabitants a neo-Latin tongue, which has survived in great perfection in Castile and, with greater modifications, owing to the aspirated utterance, in the East.

Under the Roman domination Spain received Christianity. There is a venerable tradition that the

Apostles Paul and James came to the country, as well [illegible] the Seven Apostolic Men (Torquatus, Ctesiphon, Secundus, Indalecius, Cæcilius, Hesychius, and Euphrasius) to whom the foundation of various churches [illegible] attributed. Connected with the coming of St. James is the very ancient tradition of Our Lady of the Pillar (*la Virgen del Pilar*) of Saragossa. Prudentius says that there were martyrs in Spain in every one of the persecutions. Of uncertain date are the martyrdoms of Sts. Facundus and Primitius in Galicia; of St. Firminus and Sts. Marcellus and Nonia, with their twelve children, in Leon; of Sts. Acisclus and Victoria at Cordova. Sts. Hemeterius and Celedonius suffered in the Decian persecution, as did Sts. Justa and Rufina, St. Laurence, St. Fructuosus, St. Augurius, and St. Eulogius. The most famous of Spanish martyrs, however, are those who suffered in the persecution of Diocletian, when Dacian was prefect; among them were Sts. Cucufatis, Eulalia, and Severus, Bishop of Barcelona, Sts. Felix, Poncius, and Victor, Narcissus, Bishop of Gerona, Engratia, Valerius, Bishop of Saragossa, and his deacon, Vincentius, Justus and Pastor of Alcalá, Leocadia of Toledo, Eulalia of Mérida, Cyricus and Paula of Malaga, Vincentius, Sabina, and Cristeta of Talavera. During this period, too, many councils were held in Spain, the most important being those of Elvira (or Illiberis) and of Saragossa, and the First Council of Toledo. At that of Elvira (300) the Acts, which are still extant, were signed by nineteen bishops, and, among other things, the celibacy of the clergy was insisted upon. At the Council of Saragossa (380) Priscillianism was condemned. The Priscillianists abjured their heresy at the Council of Toledo (400), where, also, the symbol was pronounced with the *Filioque*. Among illustrious Spaniards of the period may be mentioned Pope St. Damasus, the great Hosius, St. Pacianus, Bishop of Barcelona, and his son, Flavius Dexter, Juvencus, and Prudentius.

D. *Visigothic Spain.*—When the Germanic peoples invaded the provinces of the Roman Empire, the hordes, urged forward by the pressure of the Huns in their rear, hurled themselves for the first time upon the Pyrenean Peninsula—the Alani, a people of Scythian or Tatar, race; the Vandals and Suevians, Germanic races. The Alani were, for the most part, quickly brought into subjection. The Vandals, after establishing themselves in Bætica, to which they gave the name of Vandalusia (Andalusia), passed on into Africa, while the Visigoths hemmed in the Suevi in Galicia until the latter were completely brought under control. These Visigoths, or Western Goths, after sacking Rome under the leadership of Alaric (410), turned towards the Iberian Peninsula, with Ataulf for their leader, and occupied the north-eastern portion, which thereafter received the name of Gotha-landia (Catalaunia, later Catalonia). Valia extended his rule over most of the Peninsula, keeping the Suevians shut up in Galicia. Theodoret took part, with the Romans and Franks, in the battle of Châlons, where Attila was routed. Euric (466), who put an end to the last remnants of Roman power in the Peninsula, may be considered the first monarch of Spain, though the Suevians still maintained their independence in Galicia. Euric was also the first king to give written laws to the Visigoths.

The Alhambra, from the Silla del Moro

In the following reigns the Catholic kings of France assumed the rôle of protectors of the Hispano-Roman Catholics against the Arianism of the Visigoths, and in the wars which ensued Alaric II and Amalric lost their lives. Atanagild, having risen against King Agilas, called in the Byzantine Greeks and, in payment for the succour they gave him, ceded to them the maritime places of the South-East (554). Leovigild restored the political unity of the Peninsula, subduing the Suevians, but the religious divisions of the country, reaching even the royal family, brought on a civil war. St. Hermengild, the king's son, putting himself at the head of the Catholics, was defeated and taken prisoner, and suffered martyrdom for rejecting communion with the Arians. Recared, son of Leovigild and brother of St. Hermengild, added religious unity to the political unity achieved by his father, accepting the Catholic Faith in the Third Council of Toledo (589). The religious unity established by this council was the basis of that fusion of Goths with Hispano-Romans which produced the Spanish Nation. Sisebut and Suintila completed the expulsion of the Byzantines from Spain. Chindasvint and Recesvint laboured for legislative unity, and legalized marriages, hitherto prohibited, between Goths and Latins. After Wamba, famous for his opposition to his own election, an unmistakable decline of the Gothic monarchy set in. Manners were relaxed, immorality increased, and Witiza has stood in Spanish history for the type of that decay which, in the next reign, that of Roderic (710–14), ended in the ruin of the kingdom.

During this period many very important councils were held in Spain. Among the most memorable were: that of Tarragona (516), at which ten bishops assisted, the First Council of Barcelona (540), and those of Lérida and Valencia (546). But most important of all, and of a special character, were the Councils of Toledo and of Braga (Bracara). Eminent among the saints of the same period are the two holy brothers Leander, who presided at the Third Council of Toledo, and Isidore, who presided at the Fourth, and who wrote a celebrated encyclopedia (The Etymologies) and contributed to the upbuilding of Mozarabic literature, St. Saturius, the solitary, St. Emilian (Millán), the father of monks, St. Victorian, abbot of the monastery of Asana, St. Gaudiosus, Bishop of Tarazona, St. Toribius, St. Martin of Dumio, St. Ildefonsus, St. Braulius, St. Eugenius, and St. Tajón, Bishop of Saragossa. To this period, also, belong the poets Orentius and Dracontius, the chroniclers Idacius and John of Biclara, and the historian Paulus Orosius.

Triumphal Arch of Fernan Gonzalez, Burgos, 1539

E. *Arab Spain.*—(1) The Moslem Domination.—While the Gothic kingdom was decaying through effeminacy and the discord produced by the elective system of monarchy, the fanatical sectaries of the Koran were advancing through North Africa. Legend has it that Count Julian, the governor of Ceuta, in revenge for the violation of his daughter, Florinda (also called La Cara), by King Roderic, invited the Moslems and opened to them the gates of the Peninsula. The first expedition of the Arabs was led by Tarif, who gave his name to Tarifa; the second, by Tarik, who gave his name to Gibraltar (Gebal-Tarik, "Mountain of Tarik"). Roderic went forth to meet the invaders, and, in July, 711, the terrific battle was fought which is generally called the battle of Guadalete, but which really took place near the River Barbate. This river flows into the Lagoon of Janda and was known to the Arabs as Wadi Becca. The battle appears to have been lost through the treachery of partisans of Witiza, the last king. Roderic disappeared; it is not known whether he perished in the fight. The Arabs spread rapidly through Andalusia, soon reaching Toledo, the Gothic capital, while the Jews, who were numerous in the cities, facilitated their entrance. Musa, governor of Barbary, came to share the triumphs of Tarik. In 714 he captured Saragossa and followed up his conquests as far as Lugo and Gijon, while Tarik reached Leon and Astorga. Some of the Spaniards settled down to live under Arab rule, calling themselves Mozarabs; the rest fled to the mountains of the North, where they formed the four chief rallying-points for the Reconquest: Asturias, Navarre, Aragon, and Catalonia.

Arab Spain was at first governed by emirs whose authority was derived from the Omayyad Caliphs of Damascus. The most noted of these emirs were Abdelaziz, son of Musa, who recognized the independence of the little state, defended by Todmir, with its capital at Orihuela, and Abderraman el Gafequi, who, having penetrated into Aquitaine, was vanquished by Charles Martel at Poitiers (732). Before long, divisions arose among the Spanish Mussulmans, out of the antagonisms of Arabs and Berbers, Quelvites and Mahadites. At length Abderraman I, a scion of the Omayyad stock, who had escaped the slaughter of his family by the Abassids, when the latter founded the Caliphate of Bagdad, himself became the founder of the independent Emirate of Cordova. Here the culture of the Spanish Arabs reached its greatest splendour, influenced, in great measure, by the Mozarabs, who were more advanced in the sciences and arts. In 786 Abderraman began the famous mosque of Cordova (now the cathedral), one of the largest and most magnificent edifices of the Arab style. The first caliphs treated the Mozarabic Christians with comparative leniency; Abderraman II, however, initiated a policy of persecution, and his son Mohammed I continued it. In the city of Cordova there were seven Catholic churches and a monastery connected with the Church of S. Ginés, while in the neighbourhood were the monasteries of S. Cristóbal, S. Félix, S. Martín, Stos. Justo y Pastor, S. Salvador, S. Zoilo, Cuteclara, and Los Tábanos. In 839 a council of three archbishops and five bishops was held at Cordova. The epoch of the Martyrs here began with the decollation of the priest Perfecto, in 850. In the following year the monk Isaac spontaneously offered himself for martyrdom, and six monks and several laymen, among them the celebrated Paulo Cordobés, died for the Faith. In 852 Gumersindo and Servideo, with eight other monks and seculars, were martyred. The readiness with which martyrs offered themselves to the tribunals incensed the Caliph Abderraman II, and he caused the Council of Cordova of 852 to assemble under the presidency of Recafredo, Archbishop of Seville. In this council it was proposed to deny the credit of martyrdom to those who provoked persecution. But persecution recommenced in 853, under Mohammed I, and the monks Fandila and Felix, the virgin Digna, Benildis, Columba, and Pomposa shed their blood for the Faith, as did the presbyters Abundio and Elias, the monks Pedro, Paulo, Isidoro, and Argimiro, the youth Amador, Luis of Cordova, Witesindo, Rodrigo, Solomon, and the virgin Aurea in the following year. St. Eulogius, who had encouraged the martyrs, himself suffered on 11 March, 859, and the virgin Leocridia followed him. Distinguished as writers among the Mozarabs were St. Eulogius and Alvar Cordobés, and their master, the Abbot Speraindeo; also the Abbot Samson, who combated the anthropomorphism of the perverse Bishop Hostegesis and others. But the Mozarabs gradually died out in their Mohammedan environment, so that St. Ferdinand found hardly any traces of them in the cities he conquered.

After stifling an insurrection of the national party, the Arab aristocracy, and the Berbers, and reducing Toledo to obedience, Abderraman III established an absolute monarchy, the Caliphate of Cordova (929). His son, El Haken II, distinguished himself by fostering the arts of peace; he collected a vast number of books, and founded schools and academies. In the reign of Hixem II, both the home government and the armies were directed by his *haschib* Almanzor (the Victorious), who, by dint of almost annual incursions into the Christian kingdoms, well-nigh reduced them to the condition of the first days of the Reconquest, and indeed threatened them with total destruction. He took and burned Barcelona, mastered Leon, Zamora, and Pamplona, and razed Santiago de Compostela (997). At last the Christians, united, crushed him at Calatañazor (1002), and he went to Medina Celi to die. After its fleeting day of glory, the Caliphate fell into a rapid decay, until it was broken up into more than twenty states known as the Kingdoms of Taifas. Thus was the progress of the Reconquest favoured by circumstances; it would have been completed in the thirteenth century, had not divisions and discords among the Christians impeded it. The Spanish Mussulmans then sought aid from the Moors of Africa. This they received chiefly on three occasions; from the Almoravids, after the taking of Toledo by Alfonso VI (1085); from the Almohads, in the time of Alfonso VIII, who was defeated by them at Alarcos and defeated them at Las Navas de Tolosa (1212); from the Beni Merines, in the reign of Alfonso XI, who vanquished them in the battle of El Salado. From that time the Spanish Mussulmans were confined to the Kingdom of Granada, which had been founded by Mohammed Alhamar in 1238, and lasted until 1492, when Boabdil was conquered by Ferdinand and Isabella.

General View of the Bridge and City of Cordova

(2) The Reconquest.—All the elements of the Spanish People already existed in the kingdom of the Catholic Goths: the Latinized Celtiberian race, or Hispano-Romans, the Gothic element, and the Catholic Faith. These elements, however, were as yet uncombined, and still lacked that thorough fusion which was to make one people out of them, with a character and historical destiny of its own. The agency employed by Divine Providence to effect this fusion was the terrible force of the Mussulman invasion. Under its immense pressure the Goths and Hispano-Romans, in the mountains of the North, became one people with one religion and one national aspiration, to reconquer their Spanish fatherland and make the Cross triumph over the Crescent. Though already morally a unit, the Spanish people were still eight centuries away from political unity, and the Reconquest was begun from four distinct centres. Chief among these four centres was Asturias. The fugitive Goths found a retreat in those mountains where the Romans had never been able to effectively establish their authority: only a few years after the rout of Guadalete, they gained a victory over Alkama, the lieutenant of El Horr, in the portentous battle of Covadonga, where popular faith saw Divine aid fighting for the Christians. Here was erected a sanctuary of the Blessed Virgin which afterwards became a collegiate church and still exists. Don Pelayo, or Pelagius, the Gothic chieftain who was victor at Covadonga, was acclaimed king, and took up his residence at Cangas. His son Favila was killed while hunting, torn to pieces by a bear, and was succeeded by Alfonso I, son-in-law of Don Pelayo, who set about pushing the Reconquest as far as Galicia and Tierra de Campos (the "Gothic Fields" or *Campos Góticos*). Fruela I (727–

728) founded Oviedo. He was assassinated, and was succeeded by several insignificant kings (Aurelio, Silio, Mauregato, and Bermudo I, the Deacon) and at last by Alfonso I, the Chaste, who set up his Court at Oviedo, recommenced the great expeditions against the Arabs, and seems to have invited Charlemagne to come to Asturias, thus occasioning the Frankish monarch's expedition which ended in the disaster of Roncesvalles.

In this region occurred the discovery of the body of St. James (Santiago) at Compostela. Ramiro I repelled the Northmen who tried to effect a landing in Asturias. To him legend attributes the victory of Clavijo. According to this legend, Mauregato had promised the Moors a tribute of one hundred maidens, which Ramiro refused to pay. In the battle that ensued, the Apostle St. James, Patron of the Spaniards, was seen fighting, mounted on a white charger—"Es visus in Prælio, equoque et ense acerrimus, mauros furentes sternere" as the Spanish Breviary has it. This king is said to have made the "Vow of Santiago", by which he bound himself to pay a certain tribute to the Church of Compostela. Modern critics pronounce the document apocryphal, but the national tradition loses none of its force thereby. Ordoño I emulated the exploits of Ramiro, driving back the Northmen and defeating the Moors at Albelda; he also rebuilt Leon, Tuy, Astorga, and other cities. Alfonso III, the Great, continued the forays as far as the Sierra Morena, and founded Burgos, the future capital of Castile. His sons rebelled against him, and he abdicated the Crown, dividing his dominions among them. With him ended the Kingdom of Asturias, the territory of which soon became subject to Leon.

Another rallying-point of the Reconquest was Aragon; the other two, Navarre and Catalonia, were placed by the circumstances of their origin in peculiar relations with France. The Basques on either side of the Western Pyrenees, dissatisfied with Frankish rule, rebelled on several occasions. At Roncesvalles they annihilated the armies of Charlemagne, and in 824 another victory secured the independence of the Basques of Pamplona. The names and dates of their kings, or chieftains, are very uncertain until we come to Sancho II, Abarca. He abdicated in favour of his son Garcia III, the Trembler, in whose time the Leonese and Navarrese together were routed at Valdejunquera. Sancho III, the Great, was one of the monarchs who most influenced Spanish history; he was eventually King of Navarre, Castile, Aragon, and Sobrarbe. At his death (1035) he divided his kingdoms, giving Navarre to his eldest son Garcia, Castile, with the title of King, to Fernando, Aragon to Ramiro, and Sobrarbe to Gonzalo. This fashion of regarding the various states as patrimonial possessions—an idea borrowed from French feudalism, and previously unknown in the Spanish kingdoms—was introduced at this time; it resulted in the numerous divisions which led to so many wars and which long formed an obstacle to the unity of the Reconquest in the West. (On the origin of the Countship of Barcelona, the fourth centre of the Reconquest, see CATALONIA).

As the Reconquest advanced, the churches destroyed by the Mohammedan invasion were restored. The Reconquest went forward in the name of the Holy Faith. Alfonso I of Asturias, surnamed the Catholic, restored a great many churches; Alfonso II, the Chaste, founded the Diocese of Oviedo and built its first cathedral and the royal burial-place. The Dioceses of Pamplona and Sasave corresponded to the nascent Kingdoms of Navarre and Aragon, while in Catalonia the Diocese of Urgel seems never to have ceased to exist, and that of Gerona was soon restored. Unhappily distinguished among the bishops of Urgel is Felix, who, with Elipando of Toledo, embraced the Adoptionist heresy, asserting that Christ is the adoptive son of God. This heresy was combated by Theodulus, Bishop of Seville, by Etherius of Osma, and by St. Beatus of Liebana, and was condemned by the Council of Ratisbon. In the same period lived *el Pacense*, Isidore, Bishop of Beja, whose Chronicle, a continuation of St. Isidore's, begins at the year 610 and ends with 754.

As the year 1000 approached, it seemed that the Kingdom of Christ in Spain was about to be annihilated by the terrible and victorious expeditions of Almanzor. A second restoration began gloriously with Ferdinand (Fernando) I, who assembled the Council of Coyanza (Valencia de Don Juan), obtained from the King of Seville the relics of St. Isidore, which were translated to Leon, and fostered the Churches of Coimbra, Leon, Santiago, and Oviedo, and the monasteries of Oña, Arlanza, and Sahagún. Fernando González, Count of Castile, restored the monastery of Silos, which has now been reoccupied by French Benedictines. Sancho the Elder restored and reformed many monasteries, and brought the Cluniac monks into Spain. Alfonso VI transferred to Burgos the ancient See of Valpuesta. During the same period the Dioceses of Osma, Sigüenza (1102), Segovia (1120), Salamanca, and Zamora were restored. Ferdinand II of Leon erected the Diocese of Ciudad Rodrigo, restoring the old Diocese of Caliabria (1171), Alfonso VII re-established that of Coria, and Alfonso VIII of Castile founded that of Plasencia. St. Olegario prepared the way for the restoration of the metropolitan See of Tarragona, which had his successor, Gregorio, for its first archbishop (1137). But eminent above all the other churches of Spain was that of Santiago de Compostela, to which was united the ancient Bishopric of Iria. The famous Don Diego Gelmirez, having been elected bishop (1100), raised the number of canons from twenty-four to seventy-two, obtained from Rome the ratification of the Vow of Santiago, as well as the privilege of wearing mitres for the canons, and at last made Compostela the archiepiscopal see of the Province of Mérida, or Emérita.

As early as the eighth century there existed the monasteries of San Millán (or S. Emiliano), Sahagún (S. Facundo), S. Vicente de Oviedo, and Sta. Maria de Obona, and in Catalonia that of Sta. Maria de Lavax. In the ninth century two hundred monks of the monastery of Cardeña, near Burgos, suffered martyrdom. From the monastery of Moreruela, on the banks of the River Esla, its two founders, St. Froilan and St. Atilanus, went to occupy the Sees of Leon and Zamora. St. Eulogius has left us an account of the monasteries which he visited in the ninth century—S. Salvador of Leire, S. Zacarías, Urdax, S. Martín de Cillas, and S. Vicente de Igal. That of S. Cugat, in Catalonia, seems to date from Gothic times, while the first independent count founded those of Ripoll and Montserrat. In the eleventh century the Cluniac Reform was introduced into Spain. Bernard, formerly a monk of Saint-Orence at Aux, planted it at Sahagún, making the monastery there the mother-house of the reformed branch in Spain, as Cluny was in France. The migration of French monks into Spain made its influence felt in the famous reform of the Mozarabic Rite, for which the Roman was substituted. Known also as the Isidorean, or Spanish, Rite, the former was abolished in Aragon in 1071, through the exertions of the Cluniacs and the queen, who was a Frenchwoman, and the Roman Rite was first introduced in the Cluniac monastery of S. Juan de la Peña. The same innovation was made a little later in Catalonia, and in 1076 in Navarre. The Castilians offered a strong resistance to the supplanting of their ancient rite, and Pope John X, having sent the Legate Zanelo to examine and report on it, approved it. Fifty years later, Alexander II sent Cardinal Hugo Candido, but neither would he undertake to make any change. Gregory VII sent Cardinal Ricardo, who, together with Alfonso VI, the conqueror of Toledo, decreed the abolition of the ancient rite, although, according to the chronicle, appeal was made to the trial by combat, and Don Juan Ruiz, the champion of the Mozarabic Rite, was victorious. It was, nevertheless, permitted in certain churches, and is even yet preserved at Toledo as an historical monument of the ancient Spanish Church.

The Cistercian Reform, too, was introduced into Spain, during the lifetime of St. Bernard, and the cathedral chapters lived by the Rule of St. Augustine. The most characteristic development of this period, however, was that of the military orders. The oldest of them seems to have been that of the Knights of La Terraza, founded by Don García de Najera, in the eleventh century; but this order, as well as those of the Palms, of the Redeemer, and of the Crusaders, established by Alfonso I of Aragon in the twelfth century, disappeared, becoming merged with the orders which came from Palestine. The Order of Calatrava was founded by St. Raymond, Abbot of Fitero, in La Rioja, who, in 1158, undertook to defend the stronghold of Calatrava, abandoned by the Templars. Its habit is white with a red cross. The Order of Alcántara was at first known as that of St. Julian of the Peartree (del Pereiro), but it soon took the name of the town of Alcántara, which was ceded to it by the Knights of Calatrava. Its habit is white with a green cross. The order of Santiago was founded to protect pilgrims to Compostela, to which service thirteen knights vowed themselves. With these knights the Augustinian Canons of S. Eloy of Leon joined to form the famous order whose badge is an elongated red cross (1170). These three orders were all approved by Alexander III. The importance to which the Spanish military orders attained may be gathered from the fact that King Alfonso the Fighter (*El Batallador*) wished to hand over the Kingdom of Aragon to them, believing that there was no better way of securing the speedy completion of the Reconquest. The Aragonese, however, would not consent to their king's testamentary disposition of them, and had recourse to Ramiro, a monk of S. Ponce de Tomeras, who wore the Crown until a successor was forthcoming.

F. *The Unification of Spain.*—Several difficulties stood in the way of the union of the various states formed in Spain by the Reconquest: the diversity of its points of departure was the principal. Navarre and Catalonia were in particularly close contact with France, and the marriage of Ramón Berenguer the Great with Dulcia, heiress of Provence, made the relations between the peoples of the *langue d'oc* so close that the subsequent development of Catalonia was connected rather with that of the South of France. In Navarre, again, when the dynasty of Sancho the Elder became extinct, the Crown passed in succession to the houses of Champagne (1234), of France, and of Evreux (1349–1441), with the result that Navarre, until the fifteenth century, lived in much closer relations with the French monarchy than with the Spanish states. On the other hand, the feudal usages introduced in the Western Kingdoms by the House of Navarre brought about repeated partitions of states. Ferdinand I divided his kingdom into five parts, Castile, Leon, Galicia, Zamora, and Toro, though, in the event, his son Sancho the Strong despoiled his brothers and restored the kingdom to unity. But Alfonso VII, the Emperor, again separated Castile and Leon, leaving the former to his son Sancho, and the latter to Ferdinand.

Another result of feudal customs introduced by the Burgundian princes was the separation of Portugal. For Alfonso VI gave his daughters Urraca and Teresa in marriage to Raymond and Henry of Burgundy, who founded two dynasties: that of Portugal, and that of Castile and Leon, which began with Alfonso VII. The Kingdoms of Asturias, Galicia, Leon, and Castile were definitively united under St. Ferdinand, heir of Leon through his father Alfonso IX, and of Castile through his mother Berenguela. In the same way Catalonia and Aragon were definitively united by the marriage of Ramón Berenguer, the Saint, with Doña Petronila, daughter of Ramiro, the Monk, of Aragon, of whom legend says that he made the famous "Bell of Huesca" out of the heads of rebellious nobles. These three principal states, to which the divisions of the Peninsula had been reduced, completed the Reconquest; they were not united, to form Iberian national unity, until three centuries later.

The kingdom formed by the union of Aragon and Catalonia was the first to complete that portion of the Reconquest which the geographical conditions assigned to it; then it directed its strength eastward. Pedro II, the Catholic, sovereign of Aragon and Catalonia, went to Rome to seek the annulment of his marriage with Marie of Montpelier, and to have himself crowned by the pope. The former purpose he failed to accomplish; the latter occasioned him a great deal of trouble, as the Aragonese nobles refused to recognize the position of vassalage to the Holy See in which Pedro had placed his kingdom. These nobles then formed for the first time that union, or confederation, which was the cause of such serious disturbances until Pedro IV with his dagger cut in pieces the document which recorded it. Pedro II, the Catholic, fell in the battle of Muret (1213), defending his Albigensian kinsmen against Simon de Montfort, whom Innocent III had sent against them. His son, Jaime I, the Conqueror, completed the Catalan-Aragonese Reconquest, winning Majorca (1228) and Valencia (1238) besides helping his son-in-law, Alfonso X, the Wise, to complete the conquest of Murcia. His son and successor gave a new direction to Catalan-Aragonese policy by enforcing the rights of his wife, Doña Costanza of Suabia, to the kingdoms of Sicily and Naples. Profiting by the rising of the Sicilian Vespers against the Angevins (1282), he possessed himself of Sicily and attacked Naples.

This conquest, however, placed the kings of Aragon in a position of antagonism with the popes, who defended the rights of the House of Anjou. Martin IV having excommunicated Pedro III, the Aragonese nobles took advantage of the fact to extend their privileges at the expense of the royal power. The demands of the nobles increased in the reign of Alfonso III, who was forced to confirm to them the famous *Privilegio de la Unión*. Jaime II became reconciled with the Holy See, accepting Corsica and Sardinia in lieu of Sicily. Pedro IV, the Ceremonious, defeated the nobles at Epila (1348) and used his dagger to cut in pieces the charter they had extorted from his predecessors. In the meantime the Catalans and Aragonese who were left in Sicily offered themselves to the Emperor Andronicus Palæologus to fight the Turks. Having conquered these, they turned their arms against the Greeks, who treacherously slew their leaders; but for this treachery the Spaniards, under Bernard of Rocafort and Berenguer of Entença, exacted the terrible penalty celebrated in history as "The Catalan Vengeance" and moreover seized the Duchies of Athens and Naupatria (1313). The royal line of Aragon became extinct with Martin the Humane, and the Compromise of Caspe gave the Crown to the dynasty of Castile, thus preparing the final union. Alfonso V, the Magnanimous, once more turned Aragonese policy in the direction of Italy, where he possessed the Kingdom of Sicily and acquired that of Naples by having himself made adoptive son of Queen Joanna. With these events began the Italian wars which were not to end until the eighteenth century.

Meanwhile the Reconquest languished in Castile; at first, because of the candidacy of Alfonso the Wise for the imperial Crown of Germany, in which candidacy he had secured a majority of the electoral princes. This was followed by a disputed succession to the Throne, the rival claimants being the Cerda heirs (sons of Fernando, the eldest son of Alfonso X) and the second son of Sancho IV. Next came the minorities of Ferdinand IV, Alfonso XI, Henry III, and John II, and fresh civil strife in the reigns of Pedro the Cruel and of Henry IV. Ferdinand IV succeeded to the Throne at the age of nine, being under the tutelage of his mother Doña María de Molina. Alfonso XI was little more than one year old when his father died (1312); and though his reign was in many respects glorious, and he overcame the Beni-Merines in the battle of El Salado (1340), still his amours with Doña Leonor de Guzmán, by whom he had several children, resulted in the wars of the following reign, that of Pedro the Cruel, who was at last slain by his bastard brother, Henry of Trastamara, and succeeded on the Throne by him under the title of Henry II. John I, who married Beatriz of Portugal (1383), sought to unite the two kingdoms on the death of Ferdinand, the last King of Portugal of the Burgundian line. The Portuguese, however, defeated John of Castile at the battle of Aljubarota, and the Portuguese Crown went to the Master of Aviz, who became John I of Portugal (1385). Henry III, who married Catherine of Lancaster, was the first to take the title of Prince of Asturias as heir to the Crown, which he inherited during his minority, as did his son, John II.

National unity was eventually attained by the most unexpected means: Isabel of Castile, who was not the heiress of Henry IV, married Fernando (Ferdinand) of Aragon, who was not the heir of John II, and the tragic death of the Prince of Viana, on the one hand, and, on the other hand, the no less tragic fate of Juana la Beltraneja contributed to a result which no doubt entered into the designs of Providence (see ISABELLA THE CATHOLIC). Portugal, which failed to be united with Castile on the extinction of the House of Burgundy, was united with it when the Aviz dynasty ended, in the time of Philip II, to be again separated, however, under Philip IV, when the House of Braganza secured the Crown. But, before reviewing the civil history of united Spain, it will be well to glance at its ecclesiastical history during this period of transition.

G. *Religious Development.*—The great monarchs of the Reconquest were distinguished by their zeal in restoring and founding churches, or converting the conquered mosques into Catholic churches. St. Ferdinand re-established the ancient churches and sees of Jaén, Cordova (where the great mosque became the cathedral), and Seville, and began the erection of the magnificent cathedrals of Burgos and Toledo. His contemporary, Jaime the Conqueror, is said to have consecrated to God no fewer than 2000 churches; he founded the Cathedral of Majorca (1229) and restored the ancient See of Valencia, making it suffragan to Tarragona, though it afterwards, in the fifteenth century, became metropolitan. Its first bishop was Ferrer of San Martin. The thirteenth century was a very prosperous epoch for the Spanish Church: it was then that the Carmelites, Dominicans, and Franciscans were established in the Peninsula, as well as the Order of the Most Holy Trinity for the redemption of captives. For this same object, also, Jaime the Conqueror, St. Peter Nolasco, and St. Raymond of Penafort founded the Mercedarians (*Orden de la Merced*), at first a military order, but afterwards monastic (1228). When Philip the Fair brought about the extinction of the Templars, Jaime II of Aragon and the Councils of Salamanca and Tarragona asserted their innocence and, when obliged to carry out the decree of suppression, divided their possessions between the Orders of St. John of Jerusalem and Montesa, the latter created to defend the frontiers of Valencia previously defended by the Templars. The Knights of Montesa took for their device the plain red cross on a white mantle.

In the Great Schism of the West Spain played a great part, chiefly through the influence of the Aragonese, Pedro de Luna (antipope Benedict XIII). As a cardinal, his influence led Henry II of Castile and Pedro IV of Aragon to recognize Clement VII, and after his own election he ended by withdrawing to Spain, where he lived in the castle of Peñíscola. In 1399 an assembly held at Alcalá resolved to obey neither pope, as it was not known which of the two was legitimate. The antipope favoured the election of Ferdinand of Antequera in the Compromise of Caspe, in which St. Vincent Ferrer, an ardent partisan of Ferdinand, was arbitrator. In this way the antipope secured recognition from the Spaniards. At last, in 1416, St. Vincent Ferrer and the kings abandoned the cause of Benedict XIII and gave their adherence to the Council of Constance. Gil Sanchez Muñoz, a native of Teruel, was, on the death of Benedict XIII, elected by the cardinals of Peñíscola, who were supported by Alfonso V of Aragon; but he soon afterwards resigned his claims, in the Council of Tarragona, recognized Martin V, and was made Bishop of Majorca.

During this period the Jews in Spain became very numerous and acquired great power; they were not only the physicians, but also the treasurers of the kings. Don Jusaph de Ecija administered the revenues of Alfonso XI, and Samuel Leví was chief favourite of Pedro the Cruel. The Jews of Toledo then set on foot their migration (*Transito*) in protest against the laws of Alfonso X (*Las Partidas*), which prohibited the building of new synagogues. After the accession of Henry of Trastamara to the Throne, the populace, exasperated by the preponderance of Jewish influence, perpetrated a massacre of Jews at Toledo; in 1391 another general massacre took place, beginning at Seville; a little later, the jewries of Toledo, Burgos, Valencia, and Cordova were attacked, and the like scenes were enacted in Aragon, especially at Barcelona. St. Vincent Ferrer converted innumerable Jews, among them the Rabbi Josuah Halorqui, who took the name of Jeronimo de Santa Fe and in his town converted many of his former coreligionists in the famous Dispute of Tortosa (1413). Oppressed by vexatious laws, and abhorred by the people, whom they ruined with their usury, perverted, and scandalized with their sacrileges, they were finally expelled from Spain by the Catholic Sovereigns, who regarded them as dangerous to the religious unity and the security of the country on account of the relations which they maintained with the Moors.

Connected with the persecutions of the Jews is the institution of the Inquisition. It was introduced into Spain by Jaime I the Conqueror, King of Aragon, to stop the invasion of the same Albigensian heretics against whom it had been established by Innocent III. The Count of Foix and the Viscount of Castellbó, with many of their subjects, embraced the Albigensian errors. Arnaldo of Vilanova and some Beghards of Aragon were punished by the Inquisition. There were also in Catalonia Fraticelli and other heretics, like Raimundo of Tárrega, as the Holy Office was informed. In 1376 Padre Nicolas Eymerich published the "Directorium Inquisitorum". But the Spanish Inquisition did not acquire its true character and importance until the Catholic Sovereigns established it in Castile under authority obtained from Pope Sixtus IV (1478). It was a mixed tribunal, in which the ecclesiastical element took cognizance of the orthodoxy or heterodoxy of doctrines and, consequently, of offences against Catholic faith or morals; after sentence was pronounced, the culprit was handed over to the secular arm to be punished according to the laws of the realm. Such a law was that of title 26 of the seven *Partidas*, which provided the punishment of death by fire for heretics who refused to be converted, and, again, those of book IV, title 1, of the *Fuero Real*, which imposed the same penalty for heresy and apostasy. The laws regulating the processes of the Inquisition, indeed, were Spanish, and not laws of the Roman Church. The Spanish Inquisition, although established by virtue of a pontifical Bull, became to some extent independent of Rome, as appeals lay to the Archbishop of Seville, who passed sentence in the pope's name. The Tribunal of the Holy Office, as it was called, was made up of thirteen —afterwards fifteen—provincial tribunals, with territorial jurisdiction, and a supreme council, which supervised them and pronounced on appeals. The procedure was minutely regulated and was far superior to the procedure of other tribunals of its time. It is not certain that anonymous accusations were considered, although the names of the accusers and witnesses were concealed from the accused. Torture was not arbitrarily employed, but only when sufficient proof already existed, and even then it was applied less barbarously than in the contemporary civil tribunals. The prisons were of the most humane kind. The sentences pronounced were: abandonment to the temporal arm (*relajacion*) for the impenitent heretic; reconciliation for the repentant; abjuration, when there was a suspicion of heresy; and absolution. Only the impenitent were condemned to the stake, and the number of condemnations has been much exaggerated.

H. *Modern Period.*—The political and religious development which we have outlined above resulted in Spanish national unity, and explains the character of Spain as a Catholic nation. The struggle of eight centuries to recover the territory wrested from them by the Mussulmans, who were enemies at once of their land and of their faith, effected in the Spanish people that intimate fusion of patriotic and religious feeling which distinguished them during many centuries. *Non sine numine*, it may be said, did a Spanish pope (Alexander VI) give the title of Catholic, by eminence, to the sovereigns who first united reconquered Spain under their sceptre, for they and their successors deemed it the first duty of the Crown to maintain the purity of the Catholic Faith in their realms, to propagate it in the vast countries which they colonized, and defend it in Europe against the assaults of heretics. The same pope, Alexander VI, issued in 1493 a Bull, in which, to prevent the disputes that might arise between Spaniards and Portuguese in regard to their discoveries in the East Indies and (as America was then called) the West Indies, he established as a line of demarcation between them the meridian running 100 leagues west of the Azores, decreeing that the newly discovered lands west of that line should belong to the Spaniards, and those east of it to the Portuguese. Afterwards, in the Treaty of Tordesillas, another line, 360 leagues west of the Cape Verde Islands, was substituted—an arrangement which gave Brazil to Portugal.

The Catholic Sovereigns, by reuniting the Crowns of Castile and Aragon, annexing Navarre, and completing the Reconquest with the reduction of Granada (1492), established the political unity of Spain; with the Inquisition and the expulsion of the Jews they achieved its religious unity; the marriages of their children with the Kings of Portugal and of England and the son of the Emperor Maximilian, secured to Spain the friendship of the leading states; by the discovery of America and the conquests in Africa a broad road was opened for Spain's colonial expansion. But the death of their son Prince John caused the Crown to pass to Charles I (the Emperor Charles V), son of Juana la Loca, and entirely changed the course which the magnanimous Isabella had traced for Spanish policy. Charles V, attracted to Italy by the ancient strife with France for the possession of the Italian states, and to Germany by his inheritance of the imperial Throne from his grandfather Maximilian, was more the Emperor of Germany than the King of Spain, and completely diverted Spanish policy from America and Africa. Philip II, though he did not succeed his father in the empire, could not extricate himself from his father's European policy, and Spain was exhausted by the wars in Flanders against France and England. Nevertheless, unlike his father, Philip II was a thoroughly Spanish king, and united the whole Iberian Peninsula under his sway by the incorporation of Portugal.

THE OLD CATHEDRAL, SALAMANCA, FROM THE EAST

With the death of Philip II the decay of Spanish power began. The monarchy, which needed the shoulders of a giant to support it, fell upon those of the pious but feeble Philip III (1598–1621), who left the task of government to a favourite or minister—first, the Duque de Lerma and then his son the Duque de Uceda. In the Low Countries he arranged the Twelve Years' Peace. He brought aid to the Catholics of Ireland, sending an expedition under Aguilar (1602), and intervened in behalf of the German Catholics in the first period of the Thirty Years' War. While thus aiding Catholics abroad, he resolved to guard against the danger that threatened religious unity at home in the presence of the Moriscoes, or subjugated Moors, who were suspected of conspiring with the Moors of Africa; these he expelled from Spain. In this reign and the next, Castilian literature and art attained their finest flower. Philip IV (1621–65), less pious than his father, was nevertheless a better ruler. For his prime ministers and favourites he had, first, the Conde-Duque de Olivares and then Don Luis de Haro. In this reign the colossal monarchy of Philip II began to crumble. The Duke of Braganza was proclaimed King of Portugal as John IV; Catalonia rose and maintained a war lasting twelve years; Naples and Sicily also rebelled, the famous Spanish infantry regiments (*tercios españoles*) were beaten at Rocroy, and Spain, by the Peace of the Pyrenees with France, lost Roussillon and, by the Treaty of Westphalia (1648), a great part of her importance in Europe.

The weakening of Spain continued under the sickly Charles II (1665–1700), who succeeded his father at the age of four. The regency fell to the queen, Doña Mariana, who shifted the burden of government on her confessor, Padre Nithard, and, after him, on her favourite Valenzuela, the husband of one of her ladies-in-waiting. Spain, after intervening on the side of Catholicism in all the conflicts of the European states, now saw herself an object of ambition to foreigners. The failure of the king's health obliged him to leave the duties of government to ambitious ministers, while France reached her apogee in the reign of Louis XIV, and Spanish power abroad continued to decline. The king being without issue, the rivalries of France and Austria for the succession began even in his lifetime and led up to the project for the dismemberment of the Spanish monarchy. Following the advice of Cardinal Portocarrero, Charles disinherited his Austrian kindred and designated as his heir the Duke of Anjou, afterwards Philip V. Upon the death of Charles II, the reign of the House of Austria ended in Spain, and that of the House of Bourbon commenced, bringing French centralism into Spanish administration, and helping to change the national character by linking the nation more closely with France.

Philip V (1700–46) had to sustain the War of the Succession with French assistance. By the Peace of Utrecht, which terminated that war, Gibraltar and Minorca fell to the share of England; the Italian possessions and the Low Countries, to Austria. Catalonia, having vigorously defended the rights of the Archduke Charles, was despoiled of a part of her constitutional rights (*Fueros*). Philip V, who had been under French influence during the lifetime of his first wife, Maria Luisa of Savoy, gave himself up to Italian influence after his marriage with Isabel Farnese, being directed by Alberoni. To find possessions for the children of Isabel Farnese, the Italian claims of Spain were revived; Alberoni, however, fell before he succeeded in obtaining anything more than the cardinalate for himself and the Duchies of Parma and Tuscany for the Infante Don Carlos. In 1724 Philip abdicated in favour of his son Luis, but the death of the latter in the same year obliged his father to resume the Crown. By the Treaty of Vienna (1735) Naples and Sicily were given to the Infante Don Carlos. Unquestionably the most glorious reign of the Spanish Bourbons was that of Ferdinand VI, thanks to the care with which he maintained neutrality between France and England. The Peace of Aix-la-Chapelle (Aachen) ended the wars undertaken to find crowns for the children of Isabel Farnese: the Duchies of Parma, Piacenza, and Guastalla were given to Don Felipe (Philip). The king thenceforward left the task of government to his ministers, Carvajal and the Marques de la Ensenada, while he surrendered himself to the enchantment of Farinelli's music. By the concordat which he made with Benedict XIV, the *Real Patronato* (royal patronage) over all the Churches within the monarchy was recognized, as it had already been in force in the foreign possessions and the Kingdom of Granada. Although the English party, led by the ambassador, Keene, and the minister, Wall (successor to Carvajal), succeeded in overthrowing Ensenada, and although the French offered the restoration of Minorca, and the English of Gibraltar, the king persevered in his neutrality, with the result that the nation prospered, and the coffers of the treasury were filled almost to bursting.

Ferdinand died of a broken heart occasioned by the loss of his wife, Doña Barbara (1759). He was succeeded by his brother Charles III, who was already King of Naples, and whose greatest mistake was the abandonment of his predecessor's policy of neutrality by that fatal "Family Compact" (1761) which united the fortunes of Spain with those of the degenerate French Bourbons. With this began a war with England, issuing in the loss of Havana and Manila (1763). Meanwhile Spain was governed by two foreigners, Grimaldi and Esquilacce, and the people rose in the famous "Hat-and-Cloak Riots" (*motin de las capas y sombreros*), which led to the Madrileños being prohibited the use of the national dress. Pombal and Choiseul had driven the Jesuits out of Portugal and France, and their enemies in Spain exploited this tumult to persuade the king that the Society was a menace to public order. Adding other calumnies (such as the story that the Jesuits denied the king's being the legitimate son of Philip V), they succeeded in inducing Charles III to order the Jesuits out of his dominions without stating any reason, reserving "in his royal breast" the motive of their banishment. Under the ministry of Floridablanca Spain intervened in support of the independence of the United States. During this reign many public buildings were constructed—the Fine Arts Academy, the Botanical Gardens of Madrid, etc.—with money saved during the preceding reign. But the king's shortsightedness admitted to his counsels men imbued with Voltairean ideas, who, however little they may have been aware of it, were the allies of the Revolution that was to ruin the Bourbons.

Charles IV (1788–1808), even more deficient in ability and character than Charles III, had to suffer the consequences of political errors committed in the preceding reign. In his time the French Revolution broke out, and the Spanish Bourbons went so far as to ally themselves eventually with that Revolutionary France which had beheaded Louis XVI. The Aranda ministry, having overthrown that of Floridablanca, was in turn overthrown by Don Manuel Godoy, the queen's favourite no less than the king's, who made the Treaty of S. Ildefonso, allying Spain with France against England, and leading up to the disaster of Trafalgar (1805). This reign ended in a most disgraceful manner: Prince Ferdinand having rebelled against his father and the inept Godoy, the Aranjuez rising resulted in the abdication of Charles IV, when the French had already treacherously gained a footing in Spain. The king and queen having sought refuge at Bayonne, Napoleon made them surrender the Crown of Spain to him, intending it for his brother Joseph Bonaparte. But this humiliation the

Spanish people would not brook; rising, after the terrible Second of May, 1808, they fought the glorious War of Independence, in which Napoleon suffered his first reverses. The most celebrated battles of this war were those of Bruch, in the highlands of Montserrat, in which the Catalan *sometanes* (peasant soldiers) routed a French army; Bailén, where Castaños, at the head of the army of Andalusia, defeated Dupont; and the sieges of Saragossa and Gerona, which were worthy of the ancient Spaniards of Saguntum and Numantia. The British general, Wellington, gained the battles of Salamanca (1812) and Vittoria (1813), and helped to drive the French out of the Peninsula. But while the Spanish people were shedding their blood for their faith, their country, and their king, the Liberals, assembled in the Cortes of Cadiz (1812), were drafting a Constitution modelled on the French. Ferdinand VII, however, liberated by Napoleon, returned to Spain, refused to recognize this Constitution, and restored the old regime, thus initiating that struggle between Absolutists and Liberals which lasted throughout the nineteenth century. The old colonies of Spain in Mexico and South America took advantage of this conflict to make themselves independent.

That moral unity which the Catholic Sovereigns had restored in Spain by the expulsion of the Jews, the subjection of the Moors, and the establishment of Catholic unity, was broken by the influx of ideas from the French Revolution and English Liberalism. Face to face with the Spanish people, so strongly attached to their ancient traditions and forms of government, there arose the Constitutional Party, which at first proclaimed no further aim than the establishment of representative government, saving the principle of religious unity. But the Liberals, persecuted in 1812, pushed their ideas to extremes and, profiting by a military insurrection in 1820 (Don Rafael de Riego), finally proclaimed the Constitution and forced Ferdinand VII to swear to it. The Constitutionalists then split into the two parties—Extremes and Moderates (*Exaltados* and *Moderados*)—which have continued to the present time. The intervention of the Holy Alliance, however, which sent to Spain the "hundred thousand sons of St. Louis", restored the old order of things. The French soldiers, who had met with such desperate resistance at the hands of the Spaniards in the time of Napoleon, were then received as brothers and liberators, and the Constitution was abolished. But the Liberals took advantage of the dynastic question, which arose on the death of Ferdinand VII, to revive their party. The king had no male issue and only two daughters, who by the Salic Law (brought into Spain by the Bourbons), were incapable of succeeding to the Throne. The king accordingly proposed to set aside the Salic Law and re-establish the ancient Spanish law of succession, which admitted females, failing male issues. The question, whether the Salic Law was or was not legitimately abrogated, formed the legal basis of the dynastic quarrel between Don Carlos (Charles) V, brother of Ferdinand VII, and his daughter Doña Isabel II.

View of Salamanca, with the New Cathedral, from the River Tormes

The true animus of the conflict, however, arose from the division of Spaniards into Traditionalists who supported the cause of Don Carlos, and Liberals, who sided with Doña Isabel and her mother, Doña Cristina. This division—the origin of all the ills which Spain suffered in the nineteenth century—led to the Seven Years' War, from 1833, when Ferdinand VII died, to 1839, when the Convention of Vergara was signed. In the meantime the Liberals ruled, except in the provinces occupied by the Carlists, and the Moderate ministry of Martínez de la Rosa, during which the horrible massacre of friars took place at Madrid (17 July, 1834), was succeeded by those of Toreno and of Mendizábal, who put up the possessions of the Church for sale (1836). The predominance of the *Exaltados* culminated with the regency of Espartero (1841), who closed the Nunciature and broke off all relations with Rome. The queen having been declared of age, the Moderate Narvaez ministry came into power, exiled Espartero, and suspended the sale of church property. Relations with Rome were resumed, and Spain intervened in behalf of Pius IX, who had been driven to take refuge at Gaeta. In 1851 the Concordat, regulating the new conditions of the Spanish Church, was signed. From 1854 to 1856 (the *Bienio Liberal*) the Liberals, with Espartero and O'Donnell, were again in power, and O'Donnell acquired prestige in the African war of 1859. This ministry also re-established the Constitution of 1845 and stopped the sale of church property (1856).

It was succeeded by the Narvaez ministry (1866), and after these two generals, Prim and Serrano, who had been exiled, obtained the aid of the Navy, commanded by Topete, and effected the Revolution of September, 1868, which dethroned the Bourbons and summoned to the Throne Amadeus I (Duke of Aosta), of the House of Savoy. Prim having been assassinated just as Amadeus landed in the Peninsula, the new king was left without any solid support and, in February, 1873, was obliged to abdicate. On 8 June of the same year the Cortes proclaimed the republic, which lasted but two years and had four presidents: Figueras, Pí y Margall, Salmerón, and Castelar. In the mean time the Spanish Catholics, exasperated by the excesses of the Liberals, rallied round the Duke of Madrid, Don Carlos de Borbón, in whom the Traditionalists saw the legitimate heir of Ferdinand VII and Charles V, and the Third Carlist War began—the second having been nothing more than General Ortega's attempt in behalf of the Count of Montemolín. In the existing condition of political disorganization, the Carlists were enabled to gain substantial advantages, and were on the point of making themselves masters of the Government. But the aristocracy and the financial interests, making General Martínez Campos their instrument, effected the restoration of the female branch of the Bourbons, proclaiming Alfonso XII, in whose favour Isabel II had abdicated. Don Alfonso landed at Cadiz, 9 January, 1875, and in a short time the Carlist rising was suppressed, as well as that of Cuba (October, 1877). As a result of the Bourbon Restoration, and of an agreement between Antonio Cánovas, leader of the Conservatives (successors of the Moderates), and Práxedes Mateo Sagasta, leader of the Liberals, who had inherited the aspirations of the Revolution, there was created in Spain the political situation which has lasted until now (1910), establishing the legal alternation (*turno legal*) of the Alphonsist-Monarchical parties in power. Alfonso XII died 25 November, 1885, leaving the regency to Doña Maria Cristina of Habsburg, as mother of his posthumous son, Alfonso XIII (b. 17 May, 1886). During the regency the Cuban Insurrection, and that of the Philippines, gave rise to the war with the United States, which led to the loss of the last remnants of Spain's colonial empire.

IV. Actual Conditions.—A. *Legislation.*—The Spanish nationality being formed out of two elements, the Gothic and the Hispano-Roman, had at the outset two different legislative systems. Euric, in the code which bears his name, collected the laws of the Goths, while the "Breviarium" of Anianus (in the time of Alaric II) sums up the provisions of the Roman law for the government of the Hispano-Latins. But when the two races had become fused, there was also a fusion of the two systems of legislation in the "Forum Judicum", or "Fuero Juzgo" (completed in the Sixteenth Council of Toledo), which is the first of the Spanish Codes, and in which the Gothic element predominates in the law of persons, the Roman in that of contracts. During the Reconquest there arose the *fueros*, special laws, or privileges, granted by the kings to certain particular cities or provinces and which were also known (as in England and France) as *cartas*, or *cartas pueblas*, i. e., charters granted to those who populated a new city. Another general code for Castile was the "Fuero Viejo" (Old Privilege), of uncertain origin, but probably commenced in the time of Alfonso VIII and completed in that of Pedro I. Alfonso IX published the "Fueros Real", which included the declarations called the "Leyes del Estilo"—rules of style, or of procedure. The legislative work undertaken in the time of St. Ferdinand ended with Alfonso X, the Wise, author of the "Siete Partidas", or "Seven Parts". This king, however, being a man of theory rather than a practical man, modified the national laws and customs to excess, allowing himself to be carried away by his admiration for the Roman Law. Hence the "Siete Partidas" have never been in legal force, except as a supplementary code and as bearing on certain particular points—the succession of the Crown, for instance, until the Bourbons grafted upon the Spanish code the Salic Law which they brought from France.

Principal Façade, Church of S. Domingo, Salamanca

The fact that the "Siete Partidas" had not acquired legal force was the reason why Castilian legislation remained entangled with a mass of *fueros*, ordinances, and special provisions. One of these, the Ordinance of Alcalá, passed by the Cortes of Alcalá in the time of Alfonso XI, established, among other matters, the order of precedence of the Spanish codes. Others were the Laws of Toro and the Ordinances of Montalvo, made in the time of the Catholic Sovereigns. The other kingdoms of Spain continued to elaborate their own several legislations—Catalonia, with its very ancient "Usatges" and its "Consulat de Mar" (the oldest commercial code in Europe); Aragon, Navarre, and the rest, with their respective special *fueros*. Wishing to give the united monarchy a civil code, Philip II published the "Nueva Recopilación" (New Digest) of the Spanish laws, though, indeed the charter laws of the various provinces were at the same time left in full vigour. In the reign of Charles IV (1805), a "Novísima Recopilación" (Latest Digest) was published, also leaving untouched the charter laws of the provinces. Finally, in the nineteenth century, there arose the division of laws into political, civil, penal, and laws of procedure.

The Cortes of Cadiz, in 1812, formulated the first Liberal Constitution, which, however, showed some regard for Catholic unity. This Constitution was not accepted by the king, when he was released from his captivity by Napoleon, but Riego's military insurrection at Las Cabezas de S. Juan, in 1820, forced it upon him. It was overthrown by the French intervention in 1823. In 1834 the queen-regent authorized the Estatuto Real, a sort of moderate constitution. Next came the Liberal Constitution of 1837, in which Catholic unity is not stipulated for, although it is stated that the Catholic Religion is that professed by Spaniards. Again, in the Constitution of 1845 it is declared that the religion of Spain is the Catholic Apostolic, Roman. In the Constitution of 1856 toleration of other creeds is established much as it now exists. The Revolution of 1868 produced the Liberal Constitution of 1869, which established freedom of worship (art. xxi), maintaining, however, the Catholic Religion and its ministers. Finally, the Constitution of 1876, published under the Restoration, admitted religious toleration, but declared the Catholic Religion that of the State. In practice, there is in Spain a great deal of religious liberty, the only conditions being that dissenting places of worship must comply with certain outward forms—such as not having signs placed on their exteriors. This last Constitution places the legislative power in the Cortes with the king. The Cortes are composed of two chambers: the Senate and the Congress. Some of the senators sit of their own right (grandees, archbishops, etc.), others for life, others by election. The members of Congress (*diputados*) are all elected. The king can convoke or prorogue the Cortes. The executive power belongs to the king and his ministers, who are responsible for the conduct of the government. In the succession to the Throne the ancient order, superseded by the Salic Law, is followed. The heir to the Throne takes the title of Prince of Asturias. The king attains his majority at the age of sixteen and in minority is under the regency of his nearest relative: Alfonso XIII, posthumous son of Alfonso XII, was under the regency of his mother, Doña Cristina of Habsburg; on attaining his majority he was sworn king, but was not solemnly crowned. The judicial power is entrusted to tribunals which administer justice in the king's name. The latter has the prerogative of pardon.

The relations of Church and State in Spain have been regulated by various concordats. By law 13, title 1, Book I, of the "Novísima Recopilación", the Council of Trent is the law of the realm. The chief concordats with Spain are: that of 1737 (Clement XII and Philip V); 1752 (Benedict XIV and Ferdinand VI); 1851 (Pius IX and Isabel II). The last-named is still in force, although Liberal Governments violate it in various ways and pretend to modify it, invoking it, nevertheless, whenever convenient for their purposes. According to this concordat, which was intended to regulate the grave disorders consequent upon the confiscation of church property (disamortization), the Catholic is the only religion of the Spanish people. Public instruction is under the inspection of the bishops and other diocesan prelates. The number of dioceses is diminished (see above: Ecclesiastical Organization); the form of provision for bishoprics and other benefices is determined (*Patronato Real*), as also the remuneration of the clergy, maintenance of church buildings, etc. The Archbishop of Toledo receives 40,000 pesetas ($8000 or £1600); other archbishops, from 37,500 to 32,500 pesetas ($7500 to $6500); bishops, 25,000 to 20,000 pesetas ($5000 to $4000).

In the civil law of Spain the predominant tendency is to suppress the individualities of the charter law (*derecho foral*) in the various parts of the country. These local peculiarities are found especially in the law of family relations. In Catalonia the Roman Law prevailed, the father enjoyed freedom of testamentary disposition, and the right of the children was limited to the legal one-fourth; in Castile the right of testamentary disposition was limited to one-third and one-fifth of what could be disposed of for the individual advantage of one favoured child. Castile followed the Gothic custom by which the bridegroom paid *arras* to the bride at the wedding, while in Catalonia the Roman dowry system was in force. In other parts of the country other laws limited the power of testamentary disposition even more than in Castile. The unifying tendency was especially prevalent in the "Codigo Civil" published in 1888 by the minister, Alonso Martínez, and which came into force on 1 May, 1889. Although the charter law is preserved to some extent, modifications are introduced such as that bearing on the *bienes gananciales* of Castile, providing that the *ganancias*, or property acquired after marriage, must, when the estate is liquidated, be divided between husband and wife. Moreover, the fact that the magistrates belong to different provinces has its influence upon the process of unification, as also the spirit of the Supreme Tribunal, the decisions of which have the force of jurisprudence, and serve as norms for the adjudication of parallel cases. In criminal law the Penal Code, published in 1870 by the minister, Laureano Figuerola, is in force. In many respects it betrays the spirit of the Revolution, during which it originated, and for this reason the Catholic and Conservative elements are demanding its reform in many points. The commercial code now in force is that of 1885, published by the minister, Fr. Silvela. Judicial procedure is governed by the Law of Civil Suits (*Enjuiciamiento Civil*) published by the minister, Alvarez Bugallal, in 1881.

Main Doorway of the New Cathedral, Salamanca

Although the old privileged jurisdictions have been abolished, and all Spaniards are equal before the law, there is still the military jurisdiction (*fuero militar*), certain specified cases being reserved for the military tribunals, and the ecclesiastical jurisdiction (*fuero eclesiástico*), by which the rights of the Church to take cognizance of certain cases are safeguarded.

Canonical marriage has legal force for all Spanish Catholics, without the necessity of any civil marriage, provided the civil authorities are notified that Christian marriage has been contracted, such marriage being subject in Spain to the Decrees of the Council of Trent. Civil marriage exists only for non-Catholics, and Spaniards who wish to contract it must first make a declaration of having abandoned the Catholic Religion and Church. The Church also has jurisdiction over cemeteries, which are blessed canonically. For unbelievers, apostates, and other persons by law excluded from ecclesiastical sepulture, a separate cemetery is provided, usually near the Catholic cemetery, and under the control of the civil authority. In Spain, where feudalism took little root, the aristocracy has lost its exemptions and privileges, civil and political, but as a social distinction it still exists, together with certain titles of modern creation. The royal family consists of the king, the queen consort, and the queen-mother (collectively spoken of in Spanish as *los reyes*, literally, "the kings"), the Prince of Asturias (heir apparent), and the "infantes of Spain"— such relations of the king as may be granted that dignity. At the head of the nobility are the grandees of Spain of the first and the second class. The dukes, marquesses, counts, viscounts, and barons follow in order. The civil decorations most used are the American Order of Isabella the Catholic, and the Order of Charles III. There are grand crosses, commanderies (*encomiendas*), and simple crosses; those who wear the grand cross are given the title of *Excelentísimos Señores*. Of recent foundation is the Civil Order of Alfonso XII. The ancient military orders of Santiago, Alcántara, Montesa, and Calatrava also continue to exist as honorary distinctions.

B. *The Political Situation.*—The elements which go to make up the existing political situation in Spain are (besides the foreign influences, chiefly English Liberalism and French Jacobinism) the dynastic question, the *turno legal*, or alternation, of the two Restoration parties (see above), and the growth of Republicanism. The political parties form three groups: Dissidents of the Right, legal parties, and Dissidents of the Left. The Dissidents of the Right consist of the old Carlist party, dormant during the last years of the reign of Isabel II, but which developed extraordinary vigour under the Republic and the period of extreme Liberalism, maintaining a civil war. It is still ready and willing to defend the ideal of traditional Spain whenever the excesses of Liberalism destroy the equilibrium of Spanish society. By the death of Don Carlos de Borbón, whom the Carlists regarded as the lawful King of Spain, Don Jaime de Borbón has inherited his rights. In the summer of 1888 another division arose within the Traditionalist party, its Extreme Right being formed, owing to the approximation of Don Carlos to constitutionalist ideas. This division, not yet entirely healed, resulted in the Integrist Party, directed by Don Ramón de Nocedal and, after his death, by a *junta*, or committee.

Although all the political parties are recognized as Parliamentary minorities, only those are called *legal* which recognize the reigning dynasty and take turns in office. They are, at present, the Union Liberal-Conservatives, whose undisputed leader is Don Antonio Maura, and the Liberal Democratic Party, the leadership of which is disputed between Moret, Canalejas, and Montero Rios. The former of these two parties endeavours to find Catholic and Conservative solutions for political problems within the bounds of actually existing conditions; it is commonly charged with excessive tenderness for the accomplished facts left by the Liberals as the result of their period of supremacy. The Liberal Democratic Party, on the contrary, though unwilling to call itself anti-Catholic, calls itself anti-Clerical, and tends towards French Jacobinism. Its aims are the secularization of marriage and of burial, the laicization of education, and the repression of the natural growth of religious orders by legislative interference.

The Dissidents of the Left are the Republicans, whose numbers are increasing among the less educated, and who are divided into numberless factions, each more radical than the other. The Vandal proceedings of Barcelona, in July, 1909—when churches and sepulchres were burned and profaned, and persons consecrated to God were murdered and violated—exhibited the aspirations of these extremists. And yet their chief, Ferrer, who was shot for these crimes, has found sympathizers and defenders in Europe and America. In their general anarchy and lack of influential leaders, the Republicans are divided into Federals, Socialists, Anarchists, Acratists, etc. Besides these political parties there are the Regionalists of Catalonia and the Basque Provinces, whose aim is administrative decentralization.

Divisions among Catholics and the indifference of a great portion of the people have resulted in a feeble Catholic Press, particularly in the department of daily papers. There are three Catholic dailies at Madrid: "El Correo Español" (Carlist), "El Siglo Futuro" (Integrist), "El Universo" (Alfonsist Catholic). In the provinces there are many of similar tendencies, such as "El Correo Catalan" of Barcelona, "La Gaceta del Norte" of Bilbao, "El Noticiero" of Saragossa, "La Voz" of Valencia. Among the weeklies mention should be made of "La Lectura Dominical" (Madrid), and among scientific reviews "Razón y Fe" (Jesuit), "La Ciudad de Dios", and "España y América" (both Augustinian), "Los Estudios Franciscanos", "La Ilustración de Clero". The Moderate Liberals have good periodicals, such as "La Correspondencia de España", the "A. B. C.", "La Epoca", "El Diario de Barcelona"; weeklies such as "Blanco y Negro", "La Ilustración Española y Americana"; but their reviews are inferior to the Catholic, with the exception of their professional periodicals —for medicine, engineering, bulletins of scientific societies, etc. The periodicals of the Extreme Liberal Press are widely read—"El Imparcial", "El Liberal", and "El Heraldo" of Madrid (forming a newspaper trust), and many others in the provinces, "El Pais" is notable for its Atheistical impiety, and it is followed by "El Pueblo" of Valencia, "España Nueva", etc. The official organ is "La Gaceta de Madrid", while in each province there is the "Boletín Oficial", and a "Boletín" in each diocese.

C. *Educational and Social Improvement.*—Beside the educational institutions, there are various academies for the cultivation of the sciences, which are at the same time consultative adjuncts of the State. The principal of these is the Spanish Academy, or "Academia de la Lengua", founded in 1713 under the patronage of Philip V. The statutes which now govern it were approved by decree of 20 August, 1859. It is composed of 36 active academicians, who must reside at Madrid, 24 Spanish correspondents, who are honorary members, and an undetermined number of foreign correspondents. Its chief concern is the Castilian language, in which it is regarded as authoritative. It has published twelve editions of the Castilian Grammar and Dictionary, and many other important works, among the more recent being the complete Works of Lope de Vega, under the direction of Menendez Pelayo. The Academy of History was created in 1735 and approved by royal decree of 17 June, 1738, the former functions of the official chronicler of Spain and the Indies being vested in it. Its present statutes were approved by decree of May, 1856. It is charged with the preservation of national antiquities and monuments. The Academy of Fine Arts of St. Ferdinand was founded in 1752 under the name of "Real Academia de las tres nobles Artes de S. Fernando". Its present statutes were approved by the Decree of 3 December, 1873. Its function is the encouragement and direction of the study of painting, sculpture, architecture, and music, for which, at the same time, special conservatories exist. The Academy of Exact Sciences, Physical and Natural, created in 1847, has 36 academicians resident at Madrid and 36 corresponding members in Spain and abroad. The Academy of Moral and Political Sciences was established in 1857 by the Law of Public Instruction of the same year. It has 36 academicians resident at Madrid, 30 corresponding members in Spain and abroad, and 10 foreign honorary members. There are also Academies of Medicine at Madrid, Barcelona, and other leading cities, as well as Academies of Jurisprudence and Legislation, of the Fine Arts, etc. Notable among those of the provinces are the Literary Academy (Academia de Buenos Lettras) of Barcelona, dating from the end of the seventeenth century; the Literary Academy of Seville, the Academia Juridica Aragonesa, of Saragossa (1733), the Real Academia de las nobles y bellas Artes de S. Carlos, of Valencia, etc. The members of numerous American Academies are correspondents of the Spanish Academy—those of Colombia, Ecuador (Quito), Mexico, Salvador, Venezuela, Chile, Peru (Lima), Argentina, Guatemala, and the Republic of Honduras. For the study of astronomy there are several observatories, the principal being the two State observatories of S. Fernando, founded at Cadiz in 1754, by Don Jorge Juan, and transferred in 1779, and of Madrid, the project of which had already been formed in the reign of Charles III, though it was not realized until the reform of public education in 1845. Among the private observatories should be mentioned that of Tibidabo (Barcelona), that of the Ebro, and the Jesuit observatory at Tortosa, where the various branches of astro-physics, terrestrial magnetism, etc., are studied.

THE CHURCH OF THE KNIGHTS OF CALATRAVA, MADRID

It is very difficult to obtain correct statistics of the works of social improvement existing in Spain, owing to the persistent tendency of officials to suppress all mention of Catholic institutions. The Institute of Social Reforms, managed chiefly by the Krausist Free-Teaching Institution, published in 1907 the following account of workingmen's associations existing in the year 1904:—

Catholic associations	67	Political	86
For the amelioration of the conditions of labour	1147	For instruction and recreation	79
Co-operative	93	Musical (including choral)	84
Mutual benefit	309	Total	1865

In 1908 the following figures are given:—

Savings banks	13	Mutual insurance	42
Co-operative societies	274		
Mutual benefit	1691	Total	2020

The following statistics published by "La Paz Social" (a social review of Saragossa and Madrid) give a better idea of Catholic social enterprise:

	In 1904.	*1907.*	*1909.*
Catholic rural banks	38	112	373
Catholic agricultural syndicates	..	108	450

From this it appears that the number of Catholic social enterprises is rapidly increasing, which is due to the appreciation by the clergy of the importance of combining social work with the pastoral ministry, so as to meet both the spiritual and temporal needs of the people. For the general direction of these works there has been formed at Madrid a Central Committee (*Junta*) of Catholic Action. The duties of this committee are to co-operate with the prelates of the respective dioceses in the preparation of Catholic congresses in such dioceses, to carry out the resolutions of the congresses approved by the prelates, and to direct the Catholic propaganda in all its branches. It is made up of a president [at present (1910) the Bishop of Madrid-Alcalá] and 18 members, nine of whom represent the nine ecclesiastical provinces. Up to the present (1910) six Catholic congresses have been held: at Madrid (1887), Seville, Saragossa, Tarragona, Burgos, and Santiago (1902). Eucharistic congresses have also been held at Valencia, Lugo, and Madrid, and "congresses of the good Press" at Seville and Saragossa (1908). But political dissensions among Catholics have hindered the practical results which might have been expected. The "social weeks" are also held among some communities, to bring together those who are engaged in works of this kind and to spread the knowledge of them in the various provinces. In 1907 the "Social Popular Movement" was inaugurated at Barcelona, in imitation of the *Volksverein* at Munich-Gladbach, in Germany.

D. *Charity.*—Though the charity of Catholic Spain has flourished in all ages and been manifested by the foundation of numerous benevolent institutions, it is undeniable that the second half of the nineteenth century saw a greater number of such foundations than did many of the centuries preceding it. The cause of this was partly the reaction of religious feelings after the Revolution and partly the necessity for such works resulting from the destruction, by disamortization, of those which had previously existed. Under the administration of Señor La Cierva as Director-General, there was published in folio (cii–704 pages) "Memoranda for the Study and Organization of Benevolent and Provident Institutions" (Apuntes para el estudio . . . de las Instituciones de Beneficencia) from which the following data are extracted. The benevolent institutions may be classified as general, provincial, municipal, and private. The general institutions, supported by the State, are nine in number, and may be divided into hospitals, asylums, and schools, according to the objects for which they exist. The hospitals are those of La Princesa, with 300 beds, for acute cases in medicine and surgery; the Ophthalmic Institute, with 100 beds;

the insane asylum of Santa Isabel, at Leganés, with 130 beds for poor patients, 30 beds for paying patients of the first, and 40 for those of the second, class. The objects of these last two establishments are indicated by their names. The asylums are the Hospitals of Jesús Nazareno, the Carmen, the King's Hospital at Toledo, and that for superannuated workingmen, the first and second of these being for men and for women respectively, each with 250 beds; the third, mixed, 60 beds for either sex; the last, for men only, to the number of 80. The schools for the blind are: Santa Catalina (29 pupils); La Union, for 106 orphan girls.

The number of persons benefited in all these establishments was 30,606 during the five years from 1904 to 1908. Moreover, in the single year 1908, the public consulting-room of the Princesa Hospital prescribed for more than 8000 persons; that of the Ophthalmic Institute for more than 4000. The appropriation for charitable purposes in the general estimate of the Government amounted to 2,665,775 pesetas ($499,208), not including subventions to certain private establishments. The annual expenditure on the general establishments is 774,818 pesetas.

The charitable institutions, municipal and provincial, may be classified as follows:

	Number.	Cases.	Beds.	Expenses.	Alms Distributed.
Hospitals { Municipal	51	3,520,975	11,558	5,927,052	22,355.07
Hospitals { Provincial	339	4,342,354	18,263	7,243,964	155,370.56
Asylums	70	3,740,431	14,322	3,113,476	296,360.00
Insane Asylums	19	1,427,349	4,236	1,133,232	....
Leper Hospitals	7	10,650	104	....	....
Homes for the Aged	8	78,485	354	24,603	13,045.00
Poor Houses	34	3,351,662	9,944	3,508,893	82,710.00
Establishments of various kinds	53	3,056,709	11,052	5,031,436	88,979.00

The figures in the fourth and fifth columns of the above table represent Spanish pesetas. The peseta is approximately equivalent to 19 cents United States currency.

Besides these charitable institutions, the dispensaries, consulting stations and clinics, noted in the "Memoranda" above referred to as a single group, must be taken into consideration. They are 113 in number and exist in all the provinces except Cáceres, Cuenca, Gerona, Guadalajara, Huesca, Lérida, Logroño, Lugo, Orense, and Toledo. Through these institutions 1,261,361 persons have received assistance, 420,397 medical prescriptions have been given, 45,893 food rations, and 4762 articles of clothing distributed, 10,565 allowances provided for nursing mothers, amounting to 37,829 pesetas ($7,500), and 608,686 quarts of milk distributed. In the statistics of provincial and municipal charities may also be included gratuitous medical attendance and attention to sanitary precautions. The first is supplied by 7769 physicians who visit 813,815 families, approximately 3,257,260 individuals, that is to say that each physician has 419 persons under his care; the second is carried on by means of establishments in 23 of the provinces. The expenditure of the provinces on charities amounts to 26,436,273 pesetas (about $5,270,000), 44.72% of their budget; and of the municipalities, 18,206,329 pesetas ($3,600,000), 6.23% of their budget. The average for each individual is 2.26 pesetas (about 42⅔ cents). The provincial and municipal revenues for charitable purposes are respectively 5,961,794 pesetas ($1,190,000), and 2,387,347 pesetas ($470,000), a total of 8,349,141 ($1,660,000), a rate of 0.44 pesetas (about 8⅓ cents) per capita. These totals do not include Navarre and the Basque provinces.

In striking contrast with the insufficiency and scarcity of funds and resources which characterizes the official charities, is the enormous amount expended and the variety of institutions founded by private munificence in the endeavour to meet this need in Spain. Without counting the important donations with which it has contributed to more efficient service in the department of public charities, the alms given directly for the maintenance of many charitable associations, to the needy on the public highways, or privately to succour those who are ashamed to beg, it may be said that the capital expended by private charity in Spain for the relief of the physically and morally indigent is enormous. Indeed, were it not for the rapacity of many, the egoism of some, and the carelessness of all, this alone would suffice to counteract in great part the ravages of extreme poverty and to solve many of the problems of pauperism. The number of charitable institutions founded and sustained in Spain by private means is 9107. Large as this number is, it represents less than one-half the number of those that have existed and those that still exist without being known. Their capital amounts to 400,652,370.36 pesetas ($80,130,000), yielding an income of 10,405,872.18 pesetas ($2,081,000). Of this capital 152,417,413 pesetas ($30,480,000) are invested in registered bonds; 80,095,269 ($16,019,000) in certificates payable to bearer; 28,048,888 ($5,609,000) in city property; 31,951,114 ($6,390,000) in mortgages and country property; 17,753,815 ($3,550,000) in loans; and 27,694,432 ($5,538,000) in shares of the Bank of Spain. All this capital, however, does not produce the results intended by the donors. In Señor La Cierva's "Memoranda" the number of the institutions which are inoperative, with their properties, are summarized under one heading (No. 4). Fortunately they are not many—4631—with a capital of 6,862,380 pesetas ($1,372,000) and an income of 378,832 pesetas ($75,700).

It is to be noted, also, that the capital for charitable purposes increases continually and in no insignificant proportion. The reports of the registrars and notaries, and the data published by the "Dirección General de lo Contencioso", show that the acquisitions to charitable institutions, official and private, from 1899 to 1908 have netted 161,330,354.38 pesetas ($32,266,000) for the State, from taxes on inheritances and transfers of real estate, which gives a total annual average of 17,925,596.04 pesetas ($3,585,000), an annual average of .96 pesetas (nearly 18 cents) for each inhabitant. Chronologically the charitable foundations may be classified as follows:

FOUNDATIONS.	CENTURY.					
	XV	XVI	XVII	XVIII	XIX	XX
Religious	5	4	5	4	2	2
For the Poor	4	5	4	5	5	6
For the Sick	6	3	2	2	4	4
Economic and Social	.	1	1	1	3	3
Educational	2	2	3	6	6	5
For dowries and pensions	3	6	6	3	1	1

(The figures in this table are symbolical, representing only the proportionate numbers of the respective classes.)

From the foregoing table the change in the nature of the charitable works may be noted according to the various epochs. Those of a distinctly pious nature reached the maximum point from the fifteenth to the eighteenth centuries and decreased rapidly in the following centuries; with those dealing with social-economic problems exactly the contrary was the case. This is a natural consequence of the politico-social character of the respective periods. Similar is the development of the foundations for the benefit of women and similar causes serve to explain it. On the other hand, charities having for their object the relief of the sick and poor are not subject to decided variations, doubtless because this special form of need is constant. Grouped according to their objects, the foundations established down to the present are as follows:

	Active.	*Inoperative.*
For the Poor	797	716
For the Sick	696	714
Social and economic	120	55
Educational	757	549
Dowries and pensions	1153	1059
Religious	592	309

Ninety-five per cent of the beneficent foundations in Spain have had their mainspring in charity, have been sustained by Christian sentiments, and have suffered from the animosity of Radicals of all stamps. The four hundred and forty-two official charitable institutions (provincial or municipal) are attended by religious communities or by associations of women. In one hundred and eleven of these institutions these services are rendered gratuitously; and in two hundred and eighty-eight they receive a peseta (about 19 cents) daily for food and ten pesetas a month for clothing. All the private institutions are attended by religious communities and many of them supported by them as well. The organizations through which charities are operated are a Protectorate and Provincial and Municipal Committees. To the Protectorate, directed by the minister of the Interior and the president of the Council, pertain the functions of classifying, creating, enlarging, or modifying the various charitable institutions, the distribution of surplus funds, the authorization of representatives of the institutions to have recourse to courts of justice and to sell property, the appointment and suspension, dissolution and reorganization of committees (*juntas*), authorization of transfers of scrip in the public debt, approval of statements and accounts, etc. The *juntas*, as subordinate organs, have only to co-operate with the protectorate, acting as agents and distributors of the property of the various institutions.

Radical and sweeping reforms were introduced and carried through by Señor La Cierva. He began by reorganizing the protectorate, giving it a more numerous and better qualified personnel, creating the "Junta Superior de Beneficencia" to assist the Protectorate, and constituting a special bureau for the management of expenditures, liquidations, and savings effected by it in favour of the charitable institutions. Another measure was the formation of archives, provincial and municipal, with corresponding indexes, giving a great deal of correct, though incomplete, statistics, to serve as a basis for the knowledge of the work done in behalf of charity, the number, capital, and patronage of the various charitable institutions. In this way the Protectorate is ably assisted in the performance of its important duties. Further measures were also prescribed which completed the reform.

Religion, Morality, Customs.—The greatest diversity in all respects exists in Spain between the inhabitants of the various regions; but certain zones may be marked off in which some characteristics in common may be observed. Some similarity may be noted between the regions which were longest under the sway of Arab influences—Valencia, Murcia, and Andalusia—and also between those which in more recent times have come more directly in contact with foreigners, especially the maritime regions of Galicia and Andalusia, and the most populous centres of commerce.

The Spanish people are as a rule religious, and naturally inclined to the practices of Catholic worship. In their popular festivals secular diversions hold an equal place with religious observances. The morning is devoted to magnificent church functions, and the afternoon to balls, bull-fights, and other amusements, which are carried on into the night. A great variety may be noted in the character of the popular diversions in the different sections, while the religious features are uniform and universal. In Andalusia and Murcia the bull-fight still holds first place; in Valencia the enthusiasm for it is not so great, and still less in Catalonia, Aragon, and other regions. In the Basque provinces the favourite sports are *pelota, barra*, and others. Catalonia is much addicted to dancing, and its popular dances are very various; here the ancient and extremely artificial dance of the *Sardanas*, in which a great number of persons take part, dancing in the form of a great circle, is still the fashion. The name is connected with that of *Sardos* or *Cerdanes* of Sardinia. In Aragon the *jota*, where the partners, man and woman, dance facing each other, but without taking hands, is still popular. In Andalusia and other provinces they have similar dances where the partners do not take hands. But as a rule more modern dances—the waltz, etc.—are more common. There are many regions, however, where the people scarcely dance at all.

There is also great difference in the popular songs of various sections. In the sections where Arabic influences have prevailed, singing is very general, but without chorus, sometimes accompanied by the castanets, sometimes by the guitar. Another instrument very much used is the *gaita* (bagpipe), a goat-skin bag filled with air by means of which a kind of pipe is made to produce a continuous, monotonous sound. The inhabitants of the Basque provinces are noted for their good ear and the tunefulness of their songs, and of all the Spanish peoples they practice choral singing most. In Andalusia the *seguidillas, malagueñas*, etc. are very popular, some of them, as the *saetas* of Seville, being sung in religious processions. Religious feasts are celebrated with long church functions, solemn Mass, music, and sermons, besides processions and pilgrimages. There are processions which have become widely celebrated, to which the people of all the surrounding district flock, such as the festivities of Holy Week at Seville and of Our Lady of the Pillar in Saragossa. The most popular devotion of the Spaniards is to the Blessed Virgin, the Mother of God, particularly under her titles of the Immaculate Conception, of the Seven Dolours, of Mount Carmel, and of the Rosary. Innumerable Spanish women bear the name of Mary to which is added some distinguishing title, *de la Concepción, del Rosario, del Carmen, de los Dolores*. Commonly, however, they are addressed only by the particular invocation, hence the Carmens, Dolores, Rosarios, Conchas (Concepción), Mercedes, etc. There is scarcely a town which does not possess a chapel or sanctuary dedicated to the Blessed Virgin, to which pilgrimages are made once or more frequently during the year. Many of these images are considered miraculous and are the centres of poetic legends.

The sacraments are much frequented in Spain, especially in the more cultured sections—Catalonia, Valencia, Navarre, the Basque provinces, Old Castile, so that the Decree of Pius X with regard to daily communion was well received and the practice taken up. All kinds of pious congregations and confraternities, both ancient and modern,—such as those of Mount Carmel, the Rosary, the Third Orders, especially that of St. Francis—are very widely spread in Spain. Certain idiosyncrasies noticeable in the character of the people in some sections may easily be traced to the influence exercised by these pious practices. Nevertheless, impiety, incredulity, and indifferentism are making appreciable progress, mainly owing to the effects of pernicious journals, which are published and circulated with incredible freedom. It is difficult to determine to just what degree this propaganda has altered the traditional character of the Spanish people, and the Catholics of Spain seem not to agree in estimating the extent to which this damage has extended, some believing that it is deep and irremediable, others that it is superficial and could easily be arrested by repressive measures enacted against the agents of public immorality.

RAMÓN RUIZ AMADO.

Spanish Language and Literature.—Spanish, a Romance language, that is, one of the modern spoken forms of Latin, is the speech of the larger part of the Iberian or most westerly peninsula of Europe. It belongs to the more central part of the region: Portuguese is spoken in the western part, Basque in the Pyrenees district and adjacent territory, and Catalan in the east. By colonial operations Spanish has been carried to the Western Hemisphere, and over 40,000,000 of persons use it in South America (where Brazil and the Guianas are the most important tracts escaping its sway), in Central America, Mexico, Cuba, Porto Rico, and sporadically in southern parts of the United States, such as Texas, California, New Mexico, and places near by. As the official language it has long prevailed in the Philippines, although it has been far from supplanting the native dialects, for the reason that the Catholic missionaries, to whom the civilization of the islands is due, set themselves the task of learning the native Oriental dialects, rather than the easier one of teaching the inhabitants their own Spanish idiom. In the earliest period of Spanish geographical exploration the language was carried to the Canaries. The expulsion, from 1492 on, of the Spanish-speaking Arabs and Jews has led to the extension of Spanish dialects to various parts of Northern Africa, to Turkey, and to other places. On the whole, no fewer than 60,000,000 of persons use Spanish as their native language in widely separated parts of the universe. In the New World the Indian languages have reacted somewhat upon the Spanish vocabulary.

As a medium of literary expression Spanish asserted itself first in the twelfth century: it had been six or seven centuries in the process of evolution out of Latin. Now, while we properly call it a modern spoken form of Latin, we must recognize the fact that it does not represent the highly-refined language of such classic Latin writers as Vergil or Cicero. Quite on the contrary, it is the natural development of the common, every-day Latin of the masses in Italy and, in particular, of the speech used by the Latin soldiers and colonists who, as a result of the Roman conquest, settled in a part of the Iberian Peninsula. This Latin, generally called Vulgar Latin (and sometimes termed, less accurately, Low Latin), is no less respectable in point of antiquity than the noble Latin of our classics. Latin authors like Plautus, who introduce popular characters to our notice, make them exhibit in their diction features that the modern Romance languages have perpetuated. It was, of course, the severance of relations with Italy, incident upon the invasion of the barbarian tribes and the fall of imperial Rome, that led to the independent development of the various Romance tongues (Spanish, Portuguese, French, Provençal, etc.) out of Vulgar Latin. The more important elements of differentiation between this latter and classic Latin were these: phonologically, it made principles of vowel quality and syllabic stress superior to the classic distinction of quantitation; morphologically, it tended greatly toward simplification, since it ignored many of the classic flexional variations; syntactically, its analytical methods prevailed over the complicated system of word-order which the elaborate classic inflexions made possible. These differences are all reflected amply in Spanish. There is little need of concerning oneself with the Iberian and Celtic languages current in Spain before the time of the Roman colonization. So entire was the romanization of the land that they vanished wholly, except for some few and very doubtful survivals in the lexicon. The groundwork of the Spanish vocabulary is Vulgar Latin, with certain historical and literary additions from classic Latin, Germanic, Arabic, French, Italian, and, in a slighter degree, from the East and West Indian and other languages.

Vulgar Latin possessed these accented vowels: *a* (= Lat. *ā* and *ă*); open *e* (= Lat. *ĕ* and *ae*); close *e* (= Lat. *ē*, *ĭ*, and *oe*); close *i* (= Lat. *ī*); open *o* (= Lat. *ŏ*); close *o* (= Lat. *ō* and *ŭ*); the diphthong *au*; and close *u* (= Lat. *ū*). In the transition into Spanish, the open vowels (whether in a free or a protected position) became the diphthongs *ie* and *ue* respectively (as in *piedra*, "stone"; *fuerte*, "strong"). An adjoining palatal sound could, however, prevent the diphthongization. In general *a* and the close vowels maintained themselves in Spanish (*padre*, "father"; *seda*, "silk" from Lat. *sēta*; *lid*, "contest" from Lat. *lis*, *lītem*; *hora*, "hour"; *tu*, "thou"): the diphthong *au* became close *o* (*aurum*, Span. *oro*): but a neighbouring palatal could close the V. L. *a* to *e* (*leche*, "milk" from *lac*, *lacte*), the V. L. close *e* to *i* (*cirio*, "wax taper", Lat. *cēreum*, whose *e* in hiatus before the *u* provided the modifying palatal force), and the V. L. close *o* to *u*. For the substantive (noun and adjective) it should be said that a V. L. form corresponding to the Latin accusative case was the basis of the Spanish word.

The history of the V. L. unaccented vowels passing into Spanish varied according to the position of the vowel in the word: in the initial syllable it was more likely to be preserved; in the medial position or at the end (i. e. in the last syllable of the word) it often disappeared or underwent some modification. Distinctions of quality were unimportant for the V. L. unaccented *e* and *o* in Spain, so that we are now concerned with but five vowels sounds, *a*, *e*, *i*, *o*, and *u* (all of which tended to be close in value) and with the V. L. diphthong *au* (which became close *o* in Spanish). At the end of a word these sounds were reduced in Spanish to three, *a*, *e*, *o*, in the really popular pronunciation: unaccented final *i* and *u* are found now only in Spanish words of a more or less learned type (as in *crisis* and *tribu*). Here *a* and *o* have proved to be quite tenacious; *e* has disappeared except after certain consonantal sounds which Spanish does not tolerate as final. In the first syllable of a word, unaccented *a* was treated usually as it was treated under the accent; *e* remained unless closed to *i* by a following palatal or labial element of the accented syllable (as in *simiente*, "seed", Lat. *semens, semĕntem; igual*, "equal", Lat. *æqualis-em*, V. L. *equalem*); *i* generally was preserved, but through dissimilation from accented Lat. *ī* it sometimes became *e* (*vicinus, -um*, Span. *vecino*); *o* remained and V. L. *au* became *o*, but a preceding or following palatal (Lat. *jocari*, V. L. *iocare*, Span. *jugar*, "to play"; *dormiendum*, Span. *durmiendo*, "sleeping") could close the *o* to *u* and by dissimilation from a following accented *o* the unaccented *o* could become *e* (*formōsus-um*, Span. *hermoso*, "beautiful"). In the medial position *a* as a rule remained (*anas, anătem*, Span. *ánade*, "duck"); the other vowels were lost in the popular pronunciation, but in certain cases, of doubtful popular origin, they appear to have been kept in order to present the juxtaposition of consonants not easily pronounced together (*lacrĭma*, Span. *lágrima*, "tear"). In a great variety of cases analogy has interfered with the strictly phonological development of the Latin vowels into Spanish. Later borrowings have conformed either not at all, or only in part, to the laws of popular development.

JUAN BOSCAN

For the greater part the syllable entitled to the stress in Latin has retained it in Spanish: in the verb conjugation, however, no few exceptions are encountered. These are chiefly due to the operation of analogy: hence the dislocation of the accent in the 1st and 2nd persons plural of imperative tenses (*amabāmus*, but Span. *amábamos*, to accord with *amába, amábas, amában*). For obviously convenient purposes the Spanish Academy has devised a system of written accents. Ordinarily the mere aspect of the word is a sufficient index to the place of the syllable stress, since, properly, words ending in a vowel or in *n* or *s* stress the second last syllable, while those ending in a consonant (except *n* or *s*) stress the last syllable: all words violating these two leading principles and all stressing any syllable except the last or second last require the written accent (e. g. *amigo*, "friend"; *salud*, "health"; *aman*, "they love"; *llevas*, "thou bearest": but *bajá*, "bashaw"; *huésped*, "guest"; *nación*, "nation"; *interés*, "interest"; *huérfano*, "orphan").

Excepting such notable cases as *g* (before *e* or *i*) and *c* (before *e* or *i*), the V. L. consonants were practically those of classic Latin. As for the vowels, so for the V. L. consonants, their lot in Spanish being dependent upon their being in the initial, the medial, or the final position. In the initial position they resisted change to a large degree; in the medial position they simplified, if double, and in general they displayed a tendency to adapt themselves to the surrounding vocalic conditions (e. g. single voiceless consonants voiced, certain voiced consonants were absorbed, etc.); in the final position their enunciation sometimes became so weak as to lead to their disappearance. While the modern Spanish vowels have preserved much of the sonority of their Latin originals, the consonants have greatly weakened in the force and precision of their utterance; even refined and careful speakers often fail now to pronounce the intervocalic *d* of the past participial ending in *amado*, etc., which for them become *amao* (or *amau*), etc. At the beginning of the words these V. L. consonants remain: *p, b, t, d, c* (before *a, o, u*, or *r*), *g* (before *a, o, u*, or *r*), *l, r, m, n, s, v* (as in *padre*, *bebe* from *bĭbit*, *tanto* from *tantum*, *dar* from *dare*, *cadena* from *catena*, etc). While in the Old Spanish period, i. e. down to the fifteenth century, the initial *b* remained the stop or explosive (like English *b*) that it was in Latin, it has become in more recent times a bilabial spirant and as such is now co-equal with the Spanish *v*, which early gained this value both initially and medially. Still, if pronounced with emphasis in the initial position and everywhere after *m* and *n*, the *b* and *v* both have the stop sound. The *d*, too, initially, medially, and at the end of the word, has lost much of its explosive energy and become practically a spirant; in fact in the final position it is seldom heard in popular pronunciation. The initial *r* has a well-rolled trill of the tongue and is equivalent to the intervocalic *rr*, while the final *r* like the medial single *r* or *r* after a consonant (except *n, s, l*) has a feebler sound; even this latter, however, is stronger than the ordinary English *r*. Latin initial *h* was valueless in V. L. and usually was not written in Old Spanish (Lat. *habère*, O. Sp. *aver*, modern *haber*); its appearance in the modern speech is due to an unnecessary etymological restoration.

A characteristic change in really popular words is that of Latin initial *f* (except before *l, r* and *ue*) into a strong aspirate *h* sound, still incorrectly denoted by *f* in the Old Spanish period. Later on *h* was substituted in writing for this aspirate *f*, and still later, like the original Lat. *h*, this one lost all sound (Lat. *ferrum*, O. Sp. *fierro*, modern *hierro*). There is no real reason for supposing, as has been done, that this transformation of Lat. *f* was the result of an Iberian or Celto-Iberian inability to pronounce initial *f*. Before *r* and *ue* (from Lat. *ó*) and also, in quite a number of cases not well understood before any sound, the *f* remains, as in Latin, a labio-dental spirant (English *f*). When followed by *l* the history of *f* was like that of *c* and *g*: the result for all three was a palatalized *l* which soon began to be represented by *ll* (approximate to *li* in English "filial": *flamma*, Span. *llama, clamare*, Span. *llamar*, etc.). There are cases of the retention of the *f* and *p* (*flor, planta*, etc.). Before *e* or *i*, *g* had already in V. L., like Lat. *j* and like Lat. *d* before an *e* or an *i* in hiatus, the value of *y*: in all cases this *y* disappeared before unaccented *e* and *i* (*germanus-um*, O. Sp. *ermano*, modern *hermano* with meaningless *h*, etc.), before an accented *e* or *i* or the other unaccented or accented vowels the *y* might remain (*gener, generum*, Span. *yerno; jacet;* Span. *yace*, etc.) or become in O. Sp. a *j* (English *j* sound) which in the modern speech has developed into a velar sound (*jam, magis*, Span. *jamás*). Before *e* (Lat. *e, æ, œ*) and *i* the *c* had already begun to assibilate in Latin itself; in O. Sp. it yielded the voiceless dental sibilant

c (pronounced *ts*): in modern Castilian this sound has become the lisped one *th* (as in "thin"), and is written *c* before *e* or *i* (*centum*, Span. *ciento; civitas, civitatem*, Span. *ciudad*). In Andalusia and largely in Colonial Spanish the sound is now that of a voiceless *s*. The Lat. combination *qu* ceased in Spanish to have its *u* pronounced before *e* and *i*, and the spelling with *u* is only conventional (*quem*, Span. *quien*, etc.), before unaccented *a* and *o* the *u* disappeared absolutely (*quattuordecim*, Span. *catorce; quomo*[*do*], Span. *como*, treated as unaccented in the sentence); before accented *a* the *u* retains its value as a *w*, and the combination is now written *cu* (*quando*, Span. *cuando*). To every Latin word beginning with *s* + a consonant Spanish has prefixed an *e* (*scribo*, Span. *escribo*).

In the medial (intervocalic) position double *p, t,* and *c* (before *a, o, u,*) simplified (*cappa*, Span. *capa*, etc.); but single *p, t,* and *c* voiced to *b, d,* and *g* (*lupa*, Span. *loba*, etc.); and this voicing also occurred before *r* (*capra*, Span. *cabra*, etc.). If *i* or *u* in hiatus (i. e., a semi-consonant) followed the single *p, t, c,* the voicing did not occur (*sapiat*, Span. *sepa; sapui*, O. Sp. *sope*, modern *supe*). Between vowels *b* and *g* have usually been kept, the former as a bilabial spirant: in more popular treatment *d* has disappeared (*sedere*, O. Sp. *seer*, modern *ser*), but there are many instances of its retention (*sudare*, Span. *sudar*, etc.). After Lat. *i* the *v* disappeared (*rivus-um*, Span. *río*), but in most other cases it remained as a bilabial spirant equal in value to originally intervocalic *b* (*novus-um*, Span. *nuevo*). As in the initial position, *g* disappeared before *e* and *i* (*regina*, Span. *réina*) and remained before the other vowels (*negare*, Span. *negar*, etc.). While single *l, n,* and *r* remained unchanged, the double *r* remained as a very strongly-trilled sound (like initial single *r*) and double *n* and *l* ordinarily palatalized to the written *ñ* and *ll* (with sounds approximate to those of *ny* in English "canyon" and *li* in "filial"). In Latin the intervocalic *s* was voiceless (English *s* of "case"); in Spanish it voiced early to the sound of English *z*, but this *z* unvoiced again to the sharply hissing *s* in modern Spanish. If double, the Lat. *ss* continued to be so written in O. Sp., and remains a voiceless single *s* in modern Spanish, which tolerates no double consonantal sounds except in rare cases, those of *cc* and *nn*. Spanish (and already V. L.) developed new sibilant sounds out of intervocalic *t* and *c*+*y* (i. e. *e* or *i* in "hiatus"). For *ty*, O. Sp. had a voiced *dz* sound denoted by *z* (*ratio, rationem*, Span. *razon*) and for *cy* either that same sound or the corresponding voiceless one of *ts* denoted by O. Sp. *ç* (V. L. *capicia*, O. Sp. *cabeça*) and modern *z* (*cabeza*). The Lat. intervocalic *c* followed by *e* or *i*, likewise produced the voiced *dz* sound, written *z* in O. Sp. and now written *c* or *z* (in the final position) with the lisped sound *th* (*crux, crucem, cruces*, Span. *cruz, cruces*).

There are a great many other medial consonant combinations. Notable are the changes of *ct* to *ch* (pronounced as in English "church"; *nox, noctem*, Span. *noche*), of *l*+ consonant to u + consonant (*alter, alterum*, Span. *otro* though × *autro* × *outro*) or to a palatalization of the consonant (*multum*, Span. *mucho*, with *ch* like that in English "church"), of *ly* to *j* (*cilia*, Span. *ceja*) of *ny* to palatalized *n* (written *ñ*; *cuneus-um*, Span. *cuño* etc.). The variations in the cases of consonant combinations containing *l* have not yet been properly studied. Of the final consonants usual in Latin *s* and *n* remain, the former especially as a sign of the plural of substantives and of verbal inflexion; *t, d,* and *c* were lost (*amat*, Span. *ama; amant, aman; est*, Span. *es; ad*, Span. *a; nec*, Span. *ni*).

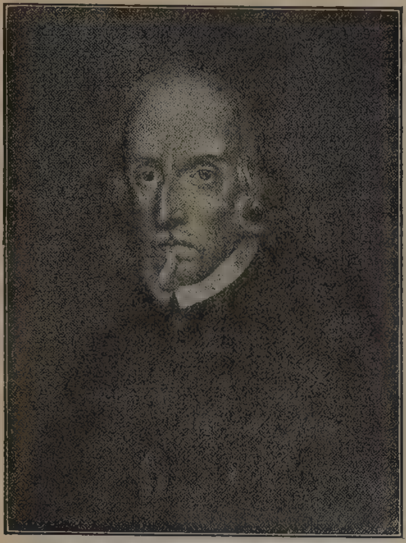
It is in its phonological development that Spanish differentiates itself most from the related Romance languages: in its morphological and syntactical development it is more closely akin to them and the problems that arise belong in general to comparative Romance Philology. Therefore much less attention need be devoted to them in an individual account of Spanish. As in general Romance, so in Spanish the Latin declensions are reduced practically to three, corresponding to the Latin first, second, and third; the neuter gender disappears in the noun (the Latin neuters usually figuring in the second declension as Spanish masculines) and remains only in the demonstrative pronoun (*esto, eso, aquello*) and the article (*lo*); for nouns and adjectives the only case and number distinctions left are those corresponding to the Lat. accusative singular and accusative plural, with retentions of the nominative (vocative) and other cases in only learned formations (*Dios* from *Deus*, *Carlos* from *Carolus*) or in petrefactions [as in *jueves*, "Thursday" from *Jovis* (*dies*); *ogaño* "this year" from *hoc anno*, etc.]. The pronoun has preserved more of the Latin cases (*ego*, V. L. × *eo*, Span. *yo;* acc. *me*, Span. *me; mihi*, Span. *mi*, etc.).

The passive and deponent voices of Latin have disappeared and are usually replaced by periphrases (e. g. a reflexive formation *el libro se lee=liber legitur* or by a combination of the verb "to be" or some equivalent auxiliary with the past participle of the main verb). The four regular conjugations of Latin have been reduced to three, which parallel the Lat. first, second, and fourth, and practically to two, since the second and the fourth differ in only four forms. A peculiarity of the language is the appearance of a number of so-called radical-changing verbs, which, regular as to their tense and personal endings, show a variation between *ie* and *ue* in the accented root syllable and *e* (upon occasion *i*) and *o* (upon occasion *u*) in that same syllable unaccented (*siento, sentir, sintamos*, etc.). There are many irregular (strong) verbs. Of the indicative tenses, the present abides; while the future has been supplanted by a periphrasis consisting of the infinitive of the main verb + the present (or endings of the present) indicative of *haber* Lat. *habere* (*amar* + *he*, "to love" + "I have", whence *amaré*, "I shall love"). In like manner a conditional (past future) has been formed by adding the endings of the imperfect indicative of *haber* to the infinitive of the main verb (*amar* + [*hab*]*ia*, whence *amaría*, "I should love"). The Lat. perfect indicative has become a simple preterite in ordinary use and a new perfect has been pro-

Miguel de Cervantes Saavedra

duced by combining the present indicative of *habeo* with the past participle of the verb in question (*amé* from *amavi*, "I loved"; *he amado* from *habeo amatum*, "I have loved"). The future perfect has coalesced with the present perfect of the subjunctive to form the future (or hypothetical) subjunctive, which tense, however, is now little used in spoken language.

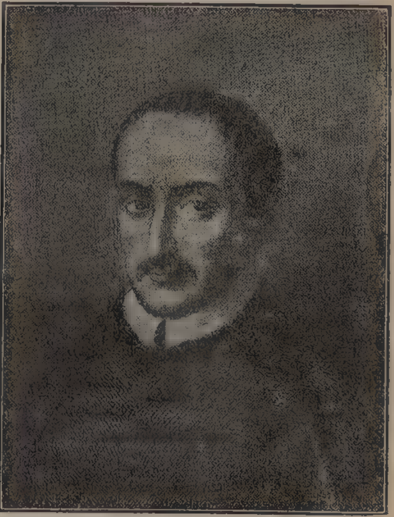
Of the Latin imperative only the second singular and plural present have remained (*ama*, Lat. *ama; amad*, Lat. *amate*), and these are of restricted service: their place is generally taken in polite usage by forms derived from the present subjunctive. To go with these latter there has been devised a new pronoun of ceremonious import, *usted, ustedes* (from *vuestra merced*, "Your Grace", etc.), which is frequently abridged to *Vd., Vds.* or *V., VV.* It may be said once for all that all the perfect tenses of the indicative and subjunctive both are made up of the requisite form of the auxiliary *haber* and the past participle of the principal verb. Of the Latin subjunctive tenses the present remains; the imperfect has vanished wholly; the pluperfect has become an imperfect in force (*amase*, "I should love", from *amavissem, amassem*); the perfect has been spoken of. A second subjunctive imperfect largely interchangeable in use with the other is one derived from the Latin pluperfect indicative (*amara*, "I should love", Lat. *amaveram, amaram*). This still has occasionally its original pluperfect (or even preterite) indicative force. Of the Latin non-finite forms, the infinitive, the gerund (with uninflected present participial use) and the past participle (originally passive, but in Spanish also active) alone survive. In the perfect tenses which it forms the past participle is invariable: when employed adjectively it agrees with the word to which it refers in both gender and number. The Latin present participle (in *ans, antem*, etc.) has become a mere adjective in Spanish.



Pedro Calderón de la Barca

A further peculiarity of Spanish is its possession of two verbs "to have", *tener* and *haber*, of which the latter can appear only as the auxiliary of perfect tenses or as the impersonal verb (*hay*, "there is", "there are", *había*, "there was", "there were", etc.) and of two verbs "to be", *ser* and *estar*, which are likewise kept apart in their uses (*ser* indicates permanency and *estar* only transiency when they predicate a quality; *estar* alone can be employed where physical situation is concerned; etc.). A striking syntactical fact in Spanish is the employment of the preposition, *á* "to", or "at", before the noun (or any pronoun except the conjunctive personal pronoun) denoting a definite personal object (*veo al hombre*, "I see the man"). The word-order is rather lax as compared with that existing in the sister-languages.

Literature.—As has been stated above, Spanish literature properly so-called began in the twelfth century. Of course Latin documents written in Spain and running through the Middle Ages from the fifth century on show, here and there, words which are obviously no longer Latin and have assumed a Spanish aspect, but these charters, deeds of gift, and like documents have no literary value. None attaches either to the linguistically interesting Old Spanish glosses of the eleventh century, once preserved in the Monastery of Santo Domingo de Silos at Burgos, and now at the British Museum in London. But in the epic "Poema del Cid" and in the dramatic "Auto de los reyes magos" of the twelfth century we find Spanish appropriated to the purposes of real literature. It is not absolutely certain which of these two compositions antedates the other; each is preserved in but a single MS. and in each case the MS. is defective. The little *auto*, or play, of "The Magian Kings" seems to have been based on an earlier liturgical Latin play written in France, and is certainly not the work of an apprentice hand, for in diction and versification it shows no little skill on the part of him who wrote it. In dramatic technic it marks an improvement upon the methods discernible in the group of Franco-Latin plays to which it is related. It deals of course with the visit of the Three Wise Men to the stable of the Child Jesus at Bethlehem, but the MS. breaks off at the point where they quit Herod. Thus in Spain, as in ancient Greece and as in the other lands of Modern Europe, the drama, in its inception, has close affiliations with religious worship. Curiously enough, we have no further absolutely certain records of a written Spanish play until the fifteenth century. We are certain, nevertheless, that plays were constantly acted in Spanish during this long interval, for the law-books speak of the presence of actors on the soil and brand some of them, especially those producing *juegos de escarnio* (a kind of farce), as infamous.



Agustín Moreto y Cabana

All the evidence tends to place the date of composition of the "Poema del Cid" (also called "Gesta de Myo Cid" or "Cantares de Myo Cid") at about the middle of the twelfth century. The fourteenth-century MS. containing it is in a deplorably garbled condition, having folios missing here and there and showing lines of very uneven length as well as assonating rhymes frequently imperfect. The chances are that it was written at first in regularly framed assonance verses of fourteen to sixteen syllables—each breaking normally into half-lines of seven to eight syllables, such as now form the usual *romance* or ballad line—and that these verses constituted stanzas or *laisses* of irregular length, such as we find in the Old French "Chanson de Roland" and other *chansons de geste*. The hero celebrated in the poem was the doughty warrior Rodrigo (Ruy) Díaz de Bivar, who died in 1099 and whom the Arabs styled *Cidy*—"My Lord". He had been exiled from his native Castile and, after serving now this and now that Moorish kingling in his wars against his neighbours, Rodrigo had been able to take Valencia from the infidels and establish himself there as an independent ruler. In the 3700 and more lines of the "Poema" although the historical element is large, the figure of the Cid is highly idealized; he is no longer fractious with respect to his monarch, Alfonso of Castile, as history shows him to have been, and when he has achieved independence he still avouches himself an adherent of that monarch. A great deal is made in the "Poema" of certain unhistorical marriages of the Cid's daughters to fictitious Infantes of Carrion, who desert their brides but are later degraded after being defeated in the lists by the Cid's champions. The poem breathes throughout the spirit of war; battle scenes are always described with great zest and the various conquests of the hero in his victorious progress through Moordom are enumerated fully. To the thirteenth century there may be ascribed another epic poem treating of the Cid. This, also preserved in a single late and garbled MS., is called by scholars the "Crónica rimada" or the "Rodrigo". It deals with wholly imaginary exploits of the youthful Cid. Here we find the germs of the story of Rodrigo and Ximena which grew into the plot of Guillén de Castro's Golden-Age play, "Las Mocedades del Cid", and passed thence to Pierre Corneille's famous French tragi-comedy, "Le Cid" (1636). The original metrical and rhyming scheme of the Rodrigo was probably that which we have assumed for the "Poema del Cid".

Luis de Granada

Another and earlier Castilian hero is the protagonist of a thirteenth-century epic poem, the "Poema de Fernán González", found in a defective fifteenth-century MS. As we have it, this "Poema" seems to be a redaction, made by a monk of the monastery of Arlanza, of an older popular epic. It is in the verse form called *cuaderna vía*, i. e. monorhymed quatrains of Alexandrines, a form much utilized by the didactic writers of the thirteenth century, when the Alexandrine was imported from France. The adventures of the battlesome tenth-century Count Fernán González in conflict with Moor and Christian and especially with the hated suzerain, the King of Leon, are described in detail. The latter part of the poem is missing, but we have the whole of its story narrated in an exceedingly important document, the "Crónica general" (or "Crónica de España") of Alfonso X (thirteenth century).

This ostensibly historical compilation became, in the form given to it by Alfonso and his assistants and in the later redactions made of it, a veritable storehouse of Old Spanish epic poetry. Dealing with historical or legendary figures, the "Crónica" will give what is regarded as the true record of fact in connexion with them and then proceeds to tell what the minstrels (*juglares*) sing about them, thus providing us with the matter of a number of lost poems. The "Crónica" is in prose, but in the portions concerned with the accounts attributed by it to the minstrels it has been discovered that the seeming prose will, in places, readily break up into assonanced verses of the epic type. So, while the "Poema del Cid", the "Rodrigo" and the "Fernán González" are the only monuments of Old Spanish epic verse preserved in compositions of any length, the "Crónica general" has snatches of other epic poems whose plots it has taken over into its prose. Interesting among these is the account which it contains of the fictitious Bernardo del Carpio, whose epic legend would appear to have been a Spanish re-fashioning of the story of the French epic hero, Roland. On this account some scholars have assumed that the Old Spanish epic was modelled from the inception on the French epopee; but it is probable that there were Spanish epics antedating the period of French influence (e. g. the Fernán González). French influence aided doubtless in the artistic development of the later Spanish epic legends. Elements of fact have been discovered in the *Leyenda* or "Legend of the Infantes of Lara", whose tragic deaths, as well as the revenge wrought for them by their Moorish half-brother, are described in the "Crónica general". The brilliant Spanish *savant*, Menéndez Pidal, has succeeded in re-casting in verse form an appreciable part of the "Crónica" narrative. Probably once made the subject of poetic treatment were Roderick the Goth and the foreign hero, Charlemagne, who had had much to do with Spain; the "Crónica" has no little to say of them. Before leaving this matter it is meet to advert to the theory once exploited that the Spanish epic was the outgrowth of of short epico-lyric songs of the type of certain of the extant ballads (*romances*) some of which deal with the heroes celebrated in the epics. But it has been shown that the ballads hardly go back of the fourteenth century and that the oldest among them were derived, in all likelihood, from episodes in the epic poem or were based upon the chronicle accounts.

In the thirteenth century a considerable amount of religious and didactic verse appeared. Now we meet with the first Spanish poet known to us by name, the priest Gonzalo de Bérceo, who was active during the first half of the century. Adopting the *cuaderna vía* as his verse form, he wrote several lives of Saints ("Vida de Sto. Domingo de Silos", "Estoria de S. Millán", etc.), a series of homely but interesting narrations of miracles performed by the Blessed Virgin (Milagros de Nuestra Señora), and other devout documents. In all of these he speaks in plain terms with the express purpose of reaching the common man. Of late there has been ascribed to him, but not with certainty, a lengthy poem in *cuaderna vía*, the "Libro de Alexandre", which brings together many of the ancient and medieval stories about the Macedonian warrior. A number of the writings of this period reflect, more or less faithfully, French or Provençal models. They include the "Libro de Apolonio", which may primarily have been of Byzantine origin, the "Vida de Santa María Egipciaqua" (dealing with the notorious sinner and later holy hermitess, St. Mary of Egypt), the "Book of the Three Kings of the East" (erroneously so called, and better termed the "Legend of the Good Thief": the MS. has no Castilian title), and the "Disputa del Alma y el Cuerpo" (a form of the frequent medieval debates between body and soul). Doubtless also borrowed from Gallic sources is a "Debate del Agua y el Vino", which is combined with a more lyrical composition, the "Razón feita d'Amor".

Fernando de Herrera

Prose composition on any large scale is posterior to that of verse. Apart from the "Fuero Juzgo" (1241: a Castilian version of the old Gothic laws) and some minor documents, no notable works in prose appeared before the advent of Alfonso X (1220-84), who began to reign in 1252. An unwise ruler, he was a great scholar and patron of scholarship, so much so as to be called *el Sabio* (the Learned) and he made his Court a great centre of scientific and literary activity, gathering about him scholars, Christian, Arabic, and Hebrew, of whom he made use in his vast labours. These he engaged in the compilation of his historical, legal, and astronomical works, toiling with them and taking especial pains to refine the literary forms. We have already spoken somewhat of his "Crónica de España" (more commonly known as the "Crónica general"), in which he sought, using all available earlier historical treatises, to make a record of the history of his own land down to his time. He thus inaugurated a series of Spanish chronicles which were continued uninterruptedly for several centuries after him. Another extensive historical document is the "Grande y general historia", which he seems to have intended to be a summary of the world's history; it remains unedited. In the "Siete partidas", so styled because of the seven sections into which it is divided, he codified all laws previously promulgated in the land, adding thereto philosophical disquisitions on the need of those laws and on multifarious matters of human interest. For astronomy he had a particular affection, as the extant Alphonsine Tables and other works demonstrate. Apparently he indited no verse in Castilian; he has left us some "Cantigas de Sta. Maria", written in Galician-Portuguese, in which at the time other Castilians and Leonese also composed lyric verse.

His example was followed by his son and successor Sancho IV, who had put together the didactic "Castigos de D. Sancho", as a primer of general instruction for his own son. To Sancho's reign (1284-95) or later belongs the "Gran Conquista de Ultramar", which adds to matter derived from William of Tyre's narrative of a crusade fabulous and romanesque elements of possible French and Provençal derivation. This work paved the way for narrative prose fiction in Spanish. In fact there came ere long the first original novel in Spanish, the "Caballero Cifar". Some prose Castilian versions of Oriental aphoristic and like didactic material were followed by the fruitful labours of Alfonso X's nephew, Juan Manuel (1282-1348). In spite of much time spent upon the battle-field or in administrative pursuits, Juan Manuel found the leisure to write or dictate about a dozen different treatises, whose interest is chiefly didactic, e. g. the "Libro de la caza" (on falconry), the "Libro del caballero y del escudero" (a catechism of chivalrous behaviour), etc. Some of these are not now discoverable. His masterpiece is the framework of tales, the "Conde Lucanor" (or "Libro de Patronio"). The stories told here by him are of various provenience, Oriental, and Occidental, and some reflect his own experience. Two of them contain the essentials of the plot of "The Taming of the Shrew". A collection of songs which, like Alfonso, he probably wrote in Galician, has passed from view.

Returning now to follow down the course of Spanish poetry we encounter in the fourteenth century, and in the first half of it, a real poet, Juan Ruiz, archpriest of Hita. He was a bad cleric and his bishop kept him long in prison for his misdeeds. As a poet he was the first to strike in Spanish the true lyrical and subjective note, revealing unblushingly his own inner man in his scabrous "Libro de buen amor", which is in part an account of his lubricous love adventures. He was a man of some reading, as his use of Ovidian or Pseudo-Ovidian matter and of French *fableaux*, *dits*, etc., shows. His rhymes and metres are varied according to his subject-matter and his mood. Rodrigo Yáñez's "Poema de Alfonso Onceno", a sort of chronicle of Alfonso XI's deeds, may be only a version from the Galician. The Rabbi Sem Tob's "Proverbios morales", a collection of rhymed maxims, is not devoid of grace. In the second half of the century there stands forth Pedro López de Ayala, statesman, satirical poet, and historian, who died Grand Chancellor of Castile, after serving four successive monarchs whose exploits he chronicled in his prose "Crónicas de los reyes de Castilla". His poetical work is the "Rimado de palacio", which is chiefly a satirical arraignment of the society of his time, and useful as a picture of living manners of the period. Besides his "Crónicas" he wrote other prose works and made versions of Latin compositions.

The fifteenth century is, throughout its first half, pre-eminently an age of court poetry. At the Court of Juan II of Castile (1419–54) hundreds of poetasters dabbled in verse; a few really gifted spirits succeeded occasionally in writing poetry. There was much debating on love and kindred themes, and, following up Provençal processes, the debating took often the form of versified plea, replication, rejoinder, sur-rejoinder, etc. Along with this arid, provençalizing, love speculation, we find two other factors of importance in the literature of the period: (1) an allegorizing tendency, which continued, generally in a pedestrian manner, the allegorical methods of the Italians Dante, Petrarch, and Boccaccio, and, doubtless, also of the "Roman de la Rose" and similar French works, and (2) a humanistic endeavour, which manifests itself especially by the rendering into Castilian of noted classical documents of Latin antiquity. The occasional pieces of the court poetizers will be found represented fully enough in the collection made by the king's physician, Juan Baena, in his "Cancionero". In general it is safe to say that the countless pallid, amorous effusions of the court poets transfer to the Castilian Court the earlier Galician aping of the conventionalized Provençal manner. And not only did the Castilians, gathered about their king, Juan II, trifle thus with the poetic muse: the Aragonese and the Castilian nobles who followed the Aragonese arms to the domination of Naples and Sicily engaged in the same practice, and their futilities are embalmed in the "Cancionero de Stúñiga", prepared at the Aragonese Court in Naples.

LEANDRO FERNANDEZ DE MORATIN

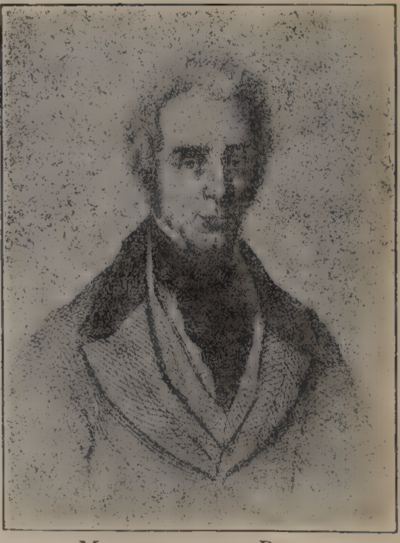
At the opening of the century, one man, Enrique de Villena, related to the royal houses of both Castile and Aragon, calls for particular attention. He did much to propagate the Provençal style of poetry, but at the same time he was a forerunner of the Spanish Humanists, for he made a version of the Æneid, and he declared his love of allegory by writing his "Doce trabajos de Hércules" and his love for the Italians by translating Dante. Francisco Imperial, a scion of a Genoese family settled in Spain, did much to spread the Dantesque evangel. A friend of Villena and, like him, a lover of Latin antiquity—though he read no Latin himself, he was a patron of those who did—and a venerator of the great Italian poets, whom he imitated, was the Marqués de Santillana, Iñigo López de Mendoza (1398 - 1458). He was the first to write in Spanish sonnets copying the Italian structure: in this respect his example was not followed. Not only did he allegorize in verse less tedious than that of most contemporaries, but he showed an unwonted eclecticism by imitating the popular songs of the mountains and pastoral folk. His interest in the literature of the people is avouched also by a collection of their rhymed proverbs which he made. Not the least admirable of his productions is a little prose letter, "Carta al condestable de Portugal", in which he provided the first account of the history of Spanish literature ever committed to writing. Another luminary of the age was Juan de Mena (1411–56), the royal historiographer, to whom we are indebted especially for the "Laberinto", in which he not only indulged his allegorizing propensities but also makes obvious his devotion to the ancient Spanish Latin poet Lucan. At times Mena soars to real poetic heights.

Alberto Lista y Aragon

The inevitableness of death had engaged the attention of the plastic and pictorial artist and the *littérateur* to no slight extent during the later Middle Ages: the French "Danse Macabre" shows what a hold this melancholy idea had taken upon thinking minds. One of the most finished examples of the literary treatment of the subject is the Spanish "Danza de la muerte", which is of the early fifteenth century. It surpasses in poetic vigour the French model which it is said to have followed. A not unworthy historian is Fernán Pérez de Guzmán, author of the "Mar de historias", who evinces no mean power as a portrayer of character in his "Generaciones y semblanzas", in which he describes famous personages of his time. The prose satire in all its virulence is represented by the "Corbacho" of the archpriest of Talavera, Martínez de Toledo (died about 1470), an invective upon womankind. Two noteworthy satires of the second half of the century are the anonymous "Coplas del provincial" and "Coplas de Mingo Revulgo", setting forth administrative vices and the wrongs done to the people at large. The renascence of the Spanish drama is now foreshadowed in some pieces of Gómez Manrique, whose nephew, Jorge Manrique (1440–78), gained enduring fame by his sweet and mournful "Coplas" on the death of his father, which Longfellow has skilfully rendered into English verse. An event of transcendent importance throughout the civilized world was the establishment at this time of the printing-press; it was set up in Spain in 1474.

Of all lands Spain has the richest supply of ballads (*romances*); no fewer than 2000 are printed by Durán in his "Romancero general". We have reason to suppose that they began to be written in the fourteenth century, but the earliest extant seem to date from the fifteenth century. The great majority, however, are of the sixteenth and seventeenth centuries. While the earlier among them are anonymous, the later ones are often by well-known writers and are clearly artificial in character. Towards the end of the century there appeared in print the first great modern novel, the "Amadis de Gaula", which soon begot many other novels of chivalry like unto itself, recounting the exploits of other Amadises, of Palmerins, etc. The vogue of the progeny of the first "Amadis"—which certainly existed in a more primitive form back in the fourteenth century and has been claimed, against the greater likelihood, for Portuguese literature—became a veritable plague, reaching down into the opening of the seventeenth century, when the success of the "Don Quixote" gave it its death stroke. Over against the idealism of the novels of chivalry there stands already, at the close of the fifteenth century, the crass realism of the "Celestina" (or Tragicomedia de Calisto y Melibea), a novel of illicit love to which the author, presumably Fernando de Rojas, gave a somewhat dramatic form. The work influenced later dramatic production and has decided graces of style. With the "Eglogas" of Juan del Encina (about 1469–1533), the old sacred drama, already timidly attempted by Gómez de Manrique, reappears without showing any clear advance over the ancient "Auto de los reyes magos". Encina also essayed the farce.

Soon after the dawn of the sixteenth century there commences the most glorious period in Spain's political history, that represented by the expansion of her foreign dominion during the reigns of Isabella and Ferdinand, Charles V, and Philip II. Wealth flowed in from the transatlantic colonies and provided the means for developing the arts on a grandiose scale. The literary art keeps pace with the others, and there now ensues what the Spaniards call the *siglo de oro*, the Golden Age of their literature, which extends even through the seventeenth century despite the political, social, and economic decay which that century so obviously shows. A dependence upon Italy and its Renaissance literary methods manifests itself in practically every form of literary composition. Italian verse-forms (the hendecasyllable, the octave, the sonnet, the *canzone*, etc.) are naturalized definitively by Juan Boscán (about 1490–1542) and Garcilaso de la Vega (1503–36), who inaugurate an Italianizing lyric movement, which triumphs over all opposition. After them the great poets use the imported Italian measures no less frequently than the native ones. Contemporary Italianates are the Portuguese Sâ de Miranda, Cetina, Acuña, and the versatile Hurtado de Mendoza; of but little effect was the reactionary movement of Castillejo and Silvestre. What the nascent drama of Spain in the sixteenth century owes to stimulus from the Italian drama has not yet been made out fully. Encina had been in Italy; Torres Naharro (died about 1530) published his "Propaladia", a collection of dramatic pieces, at Naples (then an Aragonese Court), in 1517. With him the punctilio, or point of honour, is already an important dramatic *motif*. In Lope de Rueda (about 1510–65)



Martinez de la Rosa

we see a genuinely dramatic spirit; he was an actor, playwright, and theatrical manager and understood fully how to appeal to a popular audience, as he clearly did in his *pasos*, or comic interludes, dealing with popular types. After him the dramatists became legion in number; it would be tedious and futile to enumerate them all; only the more prominent and successful need engage our attention.

Juan de la Cueva (about 1550–1609) brings historical and legendary subjects upon the boards; Cervantes (1547–1616), contrary to the real bent of his genius, seeks dramatic laurels; Lope de Vega (1562–1635), Tirso de Molina (Gabriel Téllez, 1571–1658), Calderón (1600–81), Guillén de Castro (1569–1631), Ruiz de Alarcón (about 1581–1639), Rojas Zorrilla (about 1590–1660), and Moreto (1618–1669) bring imperishable fame to the Spanish theatre and make it one of the most marvellously original and fascinating in the history of the world. Love of the Catholic religion and glorification of its practices, blind loyalty to the monarch and exaltation of the feeling called the point of honour, are among the leading characteristics animating the thousands of plays composed by these and lesser spirits. For the individual merits and defects of the chief writers reference may be had to the separate articles dealing with them. To us not the least attractive category of the plays is that dealing with living manners of the time (*comedias de capa y espada*), in the production of which Lope de Vega was the most successful. The form of the religious play called the *auto sacramental* (Eucharistic play) was carried to the height of its perfection by Calderón. It should be said that this enormous dramatic output is almost invariably in verse, and every single play interweaves in its make-up a considerable number of the possible measures. It was in this century, too, that Francisco de Guzman wrote his "Triunfos morales" and "Flor de sentencias de sabios" (1557).

Of the prose compositions of the age, the novel and tale are the most brilliant. The novels of chivalry continue to be written down to the end of the sixteenth century, but already at the end of the first quarter of that period they encounter a formidable rival in the extremely realistic novel of roguery (*novela picaresca*) or picaroon romance, the first and greatest example of which is the "Lazarillo de Tormes" which some scholars would deny to Hurtado de Mendoza, already mentioned as an Italianate. This record of the knavish deeds and peregrinations of a social outcast is paralleled at about 1602 by the "Guzmán de Alfarache" of Mateo Alemán (about 1548–1609), after which come the account of the female rogue contained in the "Pícara Justina" (1605) of the Toledan physician López de Ubeda, the "Buscón" (also called Pablo, el Gran Tacaño, about 1608) of Quevedo—the second best of its kind— and the "Marcos de Obregón" (1618) of Vicente Espinel. As the novel of roguery continued to be written, the element of adventurous travel became more prominent in it. There were many tale-tellers dealing with a matter-of-fact world never so good as it ought to be: notable among them were Timoneda, whose anecdotes come from Italian models, Salas Barbadillo, Castillo Solórzano, and María de Zayas, all of whom are greatly surpassed by Cervantes in his "Novelas ejemplares," to say naught of the "Don Quixote" (1605–15: see CERVANTES SAAVEDRA). Even more idealistic than the novel of chivalry is the pastoral romance, which, in the wake of the Italian Sannazzaro's "Arcadia" and the Portuguese Ribeiro's imitation of it, makes its first and best appearance in Spanish in the "Diana" (about 1558) of Jorge de Montemayor (or Montemôr, since he was a Portuguese by birth). Two sequels were written, that of Gil Polo being of much merit: in general, however, the pastoral romance was a fashionable pastime and had no popular appeal. Cervantes with his "Galatea" and Lope de Vega with his "Arcadia" are two of the many attempting this ultra-conventionalized literary form. There is one worthy representative of the historical novel, the "Guerras civiles de Granada" of Pérez de Hita.

In philosophical speculation the Spaniards, though active enough, at least in the sixteenth century, have not shown great initiative in dealing with modern problems. Mysticism, nevertheless, has informed some of their best thinking spirits, several of whom used both prose and verse. Noteworthy among them are the illustrious St. Theresa (1515–82), St. John of the Cross (1542–91), Luis de Granada (c. 1504–88), and the noble poet and prose-writer, Luis de León (1527–91). Luis de León was of Salamanca, at whose university he taught: at Seville an excellent poet was Fernando de Herrera (about 1534–97), whose martial odes and sonnets, celebrating Lepanto and Don John of Austria, are illustrative of his muse. The best lyricists of this age, besides León and Herrera, are Francisco de Rioja (1583–1659), Rodrigo Caro (1573–1647), and Francisco de Aldana, called by his contemporaries *el divino*. Several efforts are made now to revive the epic: while Lope de Vega and Barahona de Soto vie with the Italians Ariosto and Tasso to but little purpose, Alonso de Ercilla (1533–94) alone, out of those celebrating recent or current heroic happenings, achieves real success. His "Araucana" turns upon the Spanish campaigns against the Araucanian Indians in South America. Besides the epic poem of Ercilla, there are three more worthy of mention: the "Bernardo" of B. de Balbuena (1568–1627), the "Monserrat" of Cristóbal de Virués (1548–1616), and the "Cristiada" of Diego de Hojeda (d. 1611), who won by his work the title of "The Spanish Klopstock". Pedro de la Cerda y Granada and Francisco de Enciso Monzón are also authors of two epic poems on the life of Christ. The series of chronicles inaugurated back in the thirteenth century continues into the Golden Age, and in the work of the Jesuit Juan de Mariana (1537–1623) the dignity of real history-writing is achieved. He wrote his "Historia de España" in Latin and then translated it into excellent Spanish. We find also excellent historians of this period in Alonso de Ovalle (1610–88), Martin de Roa (1561–1637), Luis de Guzman (1543–1605), José de Acosta (1539–1600), whose "Historia natural y moral de las Indias" has been highly praised by A. Humbolt; Antonio de Solis (1610–88), author of the famous "Historia de Nueva España", Gonzalo de Illescas (d. 1569), who wrote a "Historia Pontifical", and Pedro de Rivadeneira (1526–1611), whose "Historia del Cisma de Inglaterra" was composed from most authentic documents. Care must be taken not to regard as real history the "Marco Aurelio con el reloj de príncipes" (1529) and the "Década de los Césares" (1539) of the Bishop Antonio de Guevara (died 1545). His "Epístolas familiares" (1539) and the "Marco Aurelio" (Dial of Princes) passed through a French version into English: without good reason the rise of euphuism in England has been attributed to imitation of the style of these works of Guevara.

Vices of style were, however, to become all too prominent and general in Spanish literature of the seventeenth century and to pervade verse and prose alike. The poet Góngora (1561–1627) gave currency to the literary excesses of style (bombast, obscurity, exuberance of tropes and metaphors, etc.) which is called Culteranism, or, after him, Gongorism, and they spread to all forms of composition. To Gongorism above all other things may be ascribed the wretched decay in letters which ensued upon the end of the seventeenth century: this canker-worm ate into the heart of literature and brought about its corruption. While even the great Lope de Vega and Cervantes (the many works of both of these are treated *in extenso* in the articles dealing with them), the masters of the whole age, yielded to the blandishments of Gongorism, the sturdy spirit Quevedo fought it strenuously. His satires (Sueños, 1627) and other writings, his political treatises ("Política de Dios", 1626, "Marco Bruto", 1644; etc.), and his multitudinous brief compositions in verse are fairly free from the Culteranistic taint. On the other hand he practised conceptism, another regrettable excess resulting from overmuch playing with concepts or philosophical ideas. A regular code of the principles of conceptism was prepared by the Jesuit Gracián (1601–58) in his "Agudeza y arte de ingenio" (1648); other notable writings of his are the "Héroe" and the "Criticón". As has been intimated, Spanish literature, infected with Gongorism, fell to a very low level at the end of the Golden Age.

Early in this period the Argensola brothers, Bartolomé Juan and Lupercio, flourished. The latter (d. 1613) produced three tragedies ("Isabela", "Filis", and "Alejandra") which Cervantes makes one of his characters in "Don Quijote" commend highly; Bartolomé Juan, a priest (d. 1631), is best known by his "Historia de la conquista de las Islas Molucas" and other works of contemporary history. Jerónimo Zurita y Castro (1512–80), called "the Tacitus of Spain", spent thirty years in preparing his "Anales". During the fifteenth century, too, the religious orders in Spain produced a vast amount of devotional and ecclesiological writing which deserves, in many cases, to rank with the most enduring monuments of Spanish Literature. The list of religious writers includes José de Sigüenza, a Hieronymite (1540–1606), of whose history of his own order a French critic said it made him regret that Sigüenza had not undertaken to write the history of Spain. The Dominican Alonso de Cabrera (1545–95) is considered to be the greatest preacher of Spain, which fact is tested by his numerous sermons and by his famous funeral oration on Philip II. In oratory B. Juan de Avila (1502–69), the Augustinian Juan Marquez (1564–1621), the Franciscan Gabriel de Toro, the Jesuit Florencia and the Archbishop of Valencia Sto. Tomás de Villanueva rank very high. Also worthy of mention is the Jesuit Juan Pineda (1557–1637), who has left, besides a panegyric on Doña Luisa de Caravajal, two masterly discourses on the Immaculate Conception. Another Juan Pineda, a Friar Minor, was the author of copious commentaries and of such Spanish devotional works as "Agricultura Christiana" (1589). Two other Jesuits, Luis de la Palma and Juan Eusebio de Nieremberg, have left works in Spanish which are still esteemed as gems of spiritual literature: the former, "Historia de la Sagrada Pasión" (1624); the latter, among others, the famous treatise "De la diferencia entre lo temporal y lo eterno" (1640). The "Ejercicio de perfección y virtudes cristianas" of Alonso Rodriguez (1526–1616) and the "Conquista del reino de Dios" of Fray Juan de los Angeles (d. 1595) rank among the most classic works of Spanish literature. The writings of Ven. Luis de la Puente (1554–1624), (see Lapuente, Luis de), of Malón de Chaide (1530–1592), Domingo García, and many other ascetic authors are also of much literary value.

In the first half of the eighteenth century—a period much troubled by the political turmoil resulting upon the establishment of the Bourbons on the throne of Spain—writers still abounded, but not a genius, not even a man of average talent, was to be found among them. The æsthetic sense had been ruined by Gongorism. To reform the taste of both writers and the public was the task which Ignacio de Luzán (1702–54) set himself in his "Poética", published in 1737. Here he argued for order and restraint and, addressing himself especially to dramatic writers, urged the adoption of the laws of French classicism, the three unities, and the rest. The doctrines thus preached by him were taken up by others (Nasarre, Montiano, etc.) and, despite some objection, they eventually prevailed. While they were applied with some felicity in the plays of the elder Moratín (Nicolás Fernández de M., 1737–80) and of Jove Llanos (1744–1811), it was only in the pieces, especially the prose plays, "El café" and "El sí de las niñas" (1806), of the younger Moratín (Leandro Fernández de M., 1760–1828) that their triumph was made absolute, for he really gained popular favour. A refinement of the poetic sense and a decided partiality for classicism is apparent in the lyrics of the members of the Salamancan School, whose head was Meléndez Valdés (1754–1817); they included also Cienfuegos, Diego González, and Iglesias. French influence extends to the two verse fabulists, Iriarte (1750–91) and Samaniego (1745–1801); they were familiar with La Fontaine as well as the Phædrus and the English fabulist Gay. An admirable figure is the Benedictine Feijóo (1726–1829), who, with the essays contained in his "Teatro crítico" and "Cartas eruditas y curiosas", sought to disseminate through Spain a knowledge of the advances made in the natural sciences. The name of Feijóo suggests that of his great contemporary José Rodriguez (1777), a man of great talent and literary skill, and also that of the famous Dominican Francisco Alvarado (1756–1814), commonly called *el filósofo rancio*. The Jesuit Isla (1703–81) attracts notice by the improvement of the pulpit oratory of the time which he brought about through the medium of his satirical novel, the "Fray Gerundio" (1758). Isla made a Spanish version of the picaroon romance, "Gil Blas", of the Frenchman Le Sage. In the writings of the young officer, José de Cadalso (1741–82), there are exhibited the workings of a charming eclectic sense: his "Noches lugubres" were inspired by Young's "Night Thoughts", his "Cartas Marruecas" repeat prettily the scheme of Montesquieu's "Lettres persanes" and Goldsmith's "Citizen of the World". Alone among the dramatists of the latter half of the century Ramón de la Cruz (1731–94) shows a fondness for the older native dramatic tradition, giving new life to the old *paso* (interlude) in his "Sainetes". The last part of the eighteenth century, during which the Jesuits were exiled by Charles III, was a flourishing literary period for them. Among those who deserve mention are: Estéban de Arteaga (1747–99), who, according to Menendez y Pelayo, was the best critic of æsthetics in his time; Juan Andrés (1740–1812), who wrote the first history of universal literature, Lorenzo Hervás y Panduro (1735–1809), founder of modern philological science, Francisco Masden, author of a comprehensive "Historia crítica de España". An excellent poet was Juan Clímaco Salazar (1744–1815), whose "Mardoque" is one of the best Spanish plays of that century. The Augustinian Enrique Florez began to publish in 1747 his monumental historical work entitled "España Sagrada"; in the mean time (1768–1785) the two brothers Rafael and Pedro Rodriguez Mohedano gave to Spain a literary history in ten volumes of the first centuries of her Roman civilization. Many other capable men devoted their labours to historical research, such as Andrés Burriel, Perez Bayer, Sarmiento, Rafael Floranes, and Antonio Capmany (1742–1813).

In the early years of the nineteenth century French influence remains predominant in the world of letters. Quintana (1772–1857) and the cleric Gallego (1777–1853), even in the very heroic odes in which they voice the Spanish patriotic protest against the invasion of the Napoleonic power, remain true to French classicist principles. In his various compositions Quintana is essentially a Rationalist of the type of the French encyclopedist of the eighteenth century. A growing tendency to break through the shackles of French classicism is manifest already in the literary endeavours of the men who formed what is usually called the School of Seville: the leaders among them were Lista, Arjona, Reinoso, and Blanco (known as Blanco White in England, whither he went later as an apostate priest). Under the despotic rule of Fernando VII many Liberals had fled the land. Going to England and France they had there become acquainted with the Romantic movement already on foot in those regions, and, when the death of the tyrant in 1833 permitted their return, they preached the Romantic evangel to their countrymen, some of whom, even though they had stayed at home, had already learned somewhat of the Romantic method. With his "Conjuración de Venecia" (1834) Martínez de la Rosa (1787–1862) shows Romantic tendencies already appearing upon the boards, although in most of his pieces (Edipo, etc.) he remains a classicist. Manuel Cabanyes (1808–33) and Monroy (1837–61) two of the greatest poets of this period, also remained classicists even amidst the Romantic tendencies. The Romantic triumph was really achieved by the Duque de Rivas (1791–1865), who won the victory all along the line for it, in his play, "Don Álvaro" (1835), his narrative poem, "El moro expósito" (1833) and his lyrical "Faro de Malta". The greatest poets of the Spanish Romantic movement are Espronceda (1809–42), in whom the revolt against classic tradition is complete, and Zorrilla (1817–93). The former is noted for his "Diablo mundo", a treatment of the Faust theme, his "Estudiante de Salamanca", reviving the Don Juan story, and a series of anarchical lyrics: the latter displays the Romanticist's liking for the things of the Middle Ages in his "Leyendas" and has provided one of the most famous and popular of modern Spanish plays in his "Don Juan Tenorio".

Towards the middle of the nineteenth century Romanticism began to wear away and to yield in Spain, as elsewhere, to a new movement of Realism. Even during the Romantic ferment the dramatist Bretón de los Herreros (1796–1873) had remained unaffected and sought fame simply as a painter of manners, while the Cuban playwright and poetess, Gertrudis de Avellaneda (1814–73), oscillated between Classicism and Romanticism. In the plays of Tamayo y Baus (1829–98) and Abelardo López de Ayala (1829–79) Realism and psychology take the upper hand: both assail the Positivism and Materialism of the time. In both the lyrics and the prose of Gustavo Adolfo Bécquer (1837–70) there comes to view the mournful subjectivity of the Teutonic north whence his ancestors had come. The essay, written with a particular attention to the customs and manners of the day, had flourished in the first half and about the middle of the century. Mariano José de Larra (Fígaro, 1809–37), Estébanez Calderón (1799–1867) and Mesonero Romanos (1803–82) with their character sketches and their pictures of daily happenings had paved the way for the novel of manners, which became an actuality in the stories written by Fernán Caballero (pseudonym for Cecilia Böhl de Faber; 1796-1877). Her stories ("La Gaviota"; "Clemencia"; etc.) are, so to speak, moral geographies of Southern Spain. The growth of the novel has been the particular pride of Spanish literature of the nineteenth century: it continues to be a gratifying spectacle still. The novel of manners, started by the authoress Fernán Caballero, has been treated with skill by José María de Pereda (1834–95), Luis Coloma (b. 1851), María Pardo Bazán (born 1851), Antonio de Trueba (1819–89), Pedro Antonio de Alarcón (1833–91), and the humourist Vital Aza (b. 1851). The historical novel has been cultivated with success by F. Navarro Villostada (1818–1895) in his "Amaya" and by Luis Coloma in his "Reina Martir" and "Jeromín". Amós Escalante (1831–1902) has also attempted this branch of fiction. Most of these show more or less of an inclination to indulge in naturalistic methods of the French order without, however, descending to the extremes of the Zolaesque method. While these story-tellers belong to the realistic category, Juan Valera (1824–1905) has been consistently an idealistic. However high his principles, his "Comendador Mendoza" and "Pepita Jiménez" by no means evidence high moral spirit in their author.

Not less than the development of fiction has been the advance of oratory, history, and belles-lettres in modern Spain, and to such an extent that since the Golden Age there has been neither such an abundance nor such excellence. With such men as Donoso y Cortés (1809–53), Aparisi y Guijarro (1815–72), Cándido Nocedal (1821–85), and Ramón Nocedal (1842–1907), political oratory has been raised to a high standard maintained at present by La-Cierva, Vasquez Mella, Maura, and Senante. As sacred orators those deserving mention are: José Vinuesa (1848–1903), Juan María Solá (b. 1853), and the Piarist Calasanz Rabaza. In the field of religious literature lasting fame has been acquired by Donoso Cortés, author of an "Ensayo sobre el Catolicismo, el Liberalismo y el Socialismo", Jaime Balmes (1810–48), whose "Protestantismo comparado con el Catolicismo" possesses all the charm of literary style, Francisco Mateos-Gago (1827–1890), Adolfo de Claravana, Manuel Ortí y Lara and D. F. Sardá y Salvany. Tomás Camara, Antonio Comellas y Cluet and José Mendive, in works as complete and sound in their learning and philosophy as they are cumulative in arguments, have refuted the doctrines of Mr. William Drapper introduced into Spain by the irreligious philosopher Salmerón. Historical and critical research has been carried on by such writers as Antonio Cavaniller (1805–1864), Modesto and Vicente La Fuente, who respectively have written the most comprehensive "Historia de España" and "Historia eclesiástica de España". Foremost in archæology were Aureliano Fernandez Guerra (1816–94), José María Quadrado (1819–96), Pedro de Madrazo (1816–98), Pablo Piferrer (1818–48), who have been succeeded by Eduardo de Hinojosa, Antonio Paz y Melia, Fidel Fita, and many others whose discoveries have brought light to bear on many obscure facts in the history of Spain. Literary research has been extended by the most capable men, such as by Laverde Ruiz (1840–90) to whom a great part of the present literary movement in Spain is to be attributed, J. Amador de los Rios (1818–78), author of a masterly "Historia de la literatura española", also M. Milá y Fontanals, L. A. Cueto, Gonzalez Pedroso, Alfonso Durán, and Adolfo de Castro have won a high name in criticism by their valuable works on literary investigation. Of living critics particular mention should be made of M. Menendez y Pelayo, Manuel Serrano y Sanz, and Ramón Menendez y Pidal, who combine literary graces with the methods of true scientific research. Juan Mir y Noguera (b. 1840) is one of the most prolific and remarkable writers of the present day. During the second half of the nineteenth century, high rank among the lyric poets was attained by Vicente W. Queral (1836–1889), J. Coll y Vetri (d. 1876), Federico Balart (1835–1903), Ram de Viu (d. 1907), José Selgas (1824–82), known as the poet of the flowers as J. M. Gabriel y Galán (1870–1905) is the poet of the fields. Nuñez de Arce (1834–1903) is also a lyricist of inspiration and author of the best historical drama of the period ("El Haz de leña", dealing with the Don Carlos tradition).

The literature of Spain has been greatly enriched by the modern Renaissance of the Catalan literature. The Renaissance period includes Mossen Jacinto Verdaguer (1843–1902), author of "Idilis y cants mistics", "Patria", "Canigo", and "Allantida", and perhaps the greatest poet of modern Spain; Francisco Casas y Amigó, Jaime Colell, Joan Maragall (1860–1912), Rubió y Ors, author of "Lo Gaiter del Llobregat", and M. Costa y Llobera, who has written both in Spanish and Catalan such works as "Poesías líricas" "Horacianes" and "Visions de Palestina". The inspired compositions of Teodoro Llorrente (1836–1911) are written both in Spanish and in his native Valencian dialect.

Spanish-American Literature, the literature produced by the Spanish-speaking peoples of Mexico, Central America, Cuba and adjacent islands, and of South America with the notable exceptions of Brazil (whose speech is Portuguese) and the Guianas. In the main the methods and the ideals of the Spanish-American writers, whether those of the colonial period or those of the period which has elapsed since the various American states achieved their independence, have not differed radically from those of Spain, the motherland. In spite of the acerbity due to political differences, the Spanish-American colonies and republics have never forgotten that they are of the same race, the same religion, and the same speech as the Spaniards. Quite unlike the settlers of North America, the colonists who came from the Latin countries of Southern Europe made no organized attempt to extirpate the aborigines, and the latter still remain to the extent of millions in number. Some of the aboriginal races still maintain their languages, more or less interlarded with Spanish words, but the intellectual development given to them has been limited. The literature of the indigenous Indian population, mixed or pure, is Spanish no less than that of the descendants of the Spanish colonists. Naturally, in the colonial period, when the work of discovery, exploration, and settlement was being carried on, the literary output was not very great; yet it compares favourably, to say the least, with the output in French and British North America.

In the early times of the colonies no few Spaniards, whom chance or an adventurous spirit brought to the new world, wrote their most notable works there. Among the number is one of considerable worth, Alonso de Ercilla (1533–94), the author of an epic poem, "La Araucana". This deals with the conflicts between the Araucanian Indians and the invading Spaniards, and has the honour of being the first distinguished piece of belles-lettres produced in the New World, antedating by far any comparable works written in North America. Just as men of Spanish birth composed their prose or verse documents in America, so, also, certain American-born colonials passed over to the motherland and, writing and publishing there, added lustre to the history of the literature of the Iberian Peninsula. A good example is Juan Ruiz de Alarcón, one of the most admired of Spanish dramatists of the *siglo de oro*, whose play, "La verdad sospechosa", furnished Corneille with the inspiration and the material for his "Menteur", which in its turn is the cornerstone of the classic comedy of France. The printing press was set up in the new regions in 1539, eighty years before the Pilgrims reached Massachusetts, and about 1550 Charles V signed the decree establishing the University of Mexico. To some among the explorers we are indebted for accounts of their journeys of discovery and conquest. These writings of scientific and historical interest were followed in later generations by others treating mainly of botanical and astronomical subjects, to the study of which the impetus was given by the labours, on the soil, of noted foreigners such as the Spanish botanist José Celestino Mutis (1732–1808), the Frenchmen La Condamine, de Jussieu etc., and, of course, the great German Alexander Humboldt.

As might be expected, Gongorism, the plague of the literature of the motherland, infected the compositions of the seventeenth and the early eighteenth centuries in America. That neo-Classicism, which Luzan and his followers established in Spain, was echoed by this or that poet of the Western world. In the revolutionary period patriotic verse flourished, being governed chiefly by the models provided by the Spaniards Quintana and Gallego, who, with their heroic odes, had voiced the peninsula protests against the Napoleonic invasion. In terms hardly less passionate than theirs the insurgent Spanish colonists celebrated their struggle against the domination from over the sea. The romantic movement, following in the wake of neo-Classicism, had owed its great success in European lands to its evocation of traditions of the medieval past. Naturally, none such existed for the colonists of the newly-found lands, and it is rather with respect to matters of external form than those of substance that romanticism found a reflex in the Spanish-American literature. In general, it may be said that, of the various genres, it is the lyric that had received the greatest development in the Spanish-American regions. The novel has been written with more or less success by an occasional gifted spirit; the drama has not fared equally well. For a more detailed consideration of the subject with which we are concerned it seems best to deal with it according to the geographical divisions marked by the existing states.

Mexico.—This was formerly the Viceroyalty of New Spain. It was the colony most favoured by the Spanish administration and in it culture struck its deepest roots. Here was set up the first printing press, and here was founded, as has been said, the first university, which, authorized by the Emperor Charles V, began its useful career in 1553. The first book was sent from the press in 1540; during the sixteenth century over a hundred works were published in Mexico. A number of Andalusian poets visited Mexico during the sixteenth and seventeenth centuries and influenced its literary productions. Among them were Diego Mejía (sixteenth century), who, shipwrecked on the coast of San Salvador, made there his Castilian version of the elegies of Ovid; Gutierre de Cetina (1520–60); Mateo Alemán, the well-known author of the picaroon novel, "Guzmán de Alfarache", who published in Mexico, in 1609, his "Ortografía castellana"; and possibly Juan de la Cueva, the first thorough-going dramatist, actor, and stage manager of the Spanish-speaking world. At Mexico City there was promoted in 1583 a poetical tournament (*certamen poético*) of the kind so much favoured in Latin Europe; about three hundred persons presented their verse compositions in this competition. Cervantes, in the "Canto de Caliope" printed with his "Galatea" in 1584, celebrates the Peruvian poet Diego Martínez de Ribera in equal terms with those in which he praises the Mexican Francisco de Terrazas, a contemporary of whom he says "tiene el nombre acá y allá tan conocido". Various occasional lyrics and an unfinished epic, "Nuevo Mundo y Conquista", constitute the known work of Terrazas. The

"Peregrino Indiano" of Antonio Saavedra Guzmán, printed at Madrid in 1599, gives in its twenty cantos a very pedestrian account of the conquest of the region. Apparently the earliest specimens of the drama actually written in Mexico are those contained in the "Coloquios espirituales y Poesías sagradas" of Hernán González de Eslava, published in 1610, years after the death of the author, who may have been an Andalusian by birth. His plays are little religious pieces of the category of the *auto* and seem to have been written between 1567 and 1600. It may be remarked that from the very beginning of the Spanish rule it had been the custom to perform the little religious pieces called *autos* (two of the *autos* of Lope de Vega had been translated into the Indian dialect called Nahuatl), and the Jesuits, who constantly fostered scenic performances in connexion with the work of higher education administered by them, did their best to develop an interest in the drama. Certainly a Spaniard by birth, but trained in Mexico and raised to the episcopacy as Bishop of Porto Rico, Bernardo de Balbuena (1568–1627) exhibits in his verse a love for both Spain and his adopted land, mingling therewith many reminiscences of his reading of classic poetry; he celebrates especially the beauty of external nature in his little poem "La Grandeza Mexicana" (Mexico, 1604 and 1860; Madrid, 1821–2; New York, 1828), which elicited praise from the Spanish poet and critic Quintana and which, in the opinion of Menéndez y Pelayo, is the poem from which we should date the birth of Spanish-American poetry properly so called. His chief work is "El Bernardo", an epic showing the influence of the Latin epic poets and also of Ariosto. A Mexican by birth, Juan Ruiz de Alarcón's (d. 1639) literary activity belongs to the history of the literature of Spain, where he passed the greater part of his life and died. His dramas are technically to be reckoned among the best in the Spanish classic répertoire.

Gongorism infected the compositions of the Jesuit Matías Bocanegra, known chiefly for his "Canción al desengaño". Carlos de Sigüenza y Góngora (1645–1700) was a scholar of importance who put forth documents dealing with matters of mathematical, philosophical, and antiquarian interest. Among his writings is his "Elogio fûnebre de sor Juana Inés de la Cruz", praising the virtues of one of the most distinguished of the authoresses in Spanish that either the Old World or the New World has produced, unequal though her genius was in its manifestations. Before becoming a nun she was Juana Inés de Asbaje (1651–91), noted for both her beauty and her learning at the viceregal Court. To her earlier career belong her love lyrics and the still popular *redondillas* championing the cause of woman against her detractor, man. Some of her verses are devout and mystical in character; an *auto sacramental* (El divino Narciso) and little comedy (Los empeños de una casa) deserve particular mention. Gongorism, which mars certain of the writings of Sor Inés de la Cruz, continued to exert its baneful influence during the first half of the eighteenth century. Some of the pedestrian poets of the period are Miguel de Reyna Zeballos, author of "La elocuencia del silencio" (Madrid, 1738), and Francisco Ruiz de León, whose "Hernandía" (1755) is hardly more than a versification of the "Conquista de México" of Solís. The "Poesías sagradas y profanas" (Puebla, 1832) of the cleric Jorge José Sartorio (1746–1828) are mostly translations. On a higher plane than any versifier since the time of Inés de la Cruz stands the Franciscan Manuel de Navarrete (1768–1809), who reflects in his "Entretenimientos poéticos" (Mexico, 1823) the manner of Cienfuegos, Diego González, and other members of the Salamancan School. The events of the revolutionary war were sung by mediocre poets, such as Andrés Quintana Roo (1787–1851), who was the President of the Congress which made the first declaration of independence; Manuel Sánches de Tagle (1782–1847); Francisco Ortega (1793–1849); and Joaquín María del Castillo (1781–1878). The priest Anastasio María Ochoa (1783–1833) translated poems from Latin, French, and Italian, and produced some original compositions of a satirical and humorous nature ("Poesías", New York, 1828; also two plays). More remarkable for his dramas than for his lyrics is Manuel Eduardo de Gorostiza (1789–1851, "Teatro original", Paris, 1822; and "Teatro escogido", Brussels, 1825). His plays are chiefly comedies of manners (see especially the "Indulgencia para todos" and "Contigo pan y cebolla"), and, having been written during his sojourn in Spain, form a kind of transition between the methods of the younger Moratín and Bretón de los Herreros.

Through imitation of Espronceda, Zorilla, and other Spanish romanticists, the movement of romanticism spread from Europe to Mexico. It has its representatives already in the lyric poets and dramatists, Ignacio Rodríguez Galván (1816–42; "Obras", Mexico, 1851; his verse "Profecías de Guarimoc" is the masterpiece of Mexican romanticism), and Fernández Calderón (1809–45; "Poesías", Mexico, 1844 and 1849). Eclectic restraint, with a tendency towards classicism, as well as great Catholic fervour, actuates the works of two writers who are among the most careful in form that Mexico has had. These are José Joaquín Pesado (1801–61), who is the best known Mexican poet, and the physician Manuel Carpio (1791–1860). Pesado translated from Latin (the "Song of Songs", the "Psalms", etc., from the Vulgate), Italian, and French, succeeding best in his version of the Psalms. In his composition entitled "Las Aztecas" he is supposed to have put into Spanish certain Aztec legends; like Macpherson in his dealing with Celtic tradition, Pesado doubtless added to the native legends matter of his own invention, but he certainly showed skill in doing this ("Poesías originales y traducciones", Mexico, 1839, 1849, and 1886). In his narrative and descriptive verse Carpio treats generally of Biblical subjects. An admirer and imitator of the Spanish mystic and poet Luis de Leon was Alejandro Arango (1821–83). Materialism and so-called Liberalism inspire the verse of Ignacio Ramírez (1818–79) and Manuel Acuña (1849–73), while eroticism prevails in the effusions of Ignacio M. Altamirano (1834–93) and Manuel María Flores (1840–85). Juan de Dios Peza (1852–1910) devoted himself to the task of embalming in verse, which is not always as correct as it might be, many of the popular traditions of his country ("Poesías completas", Paris, 1891–2). He is perhaps the most read Mexican poet of the second half of the nineteenth century. Some influence of the French school of Parnassiens may be detected in the "Poesías" (Paris, 1909) of Manuel Gutiérrez Najera (d. 1888).

Peru.—The position of pre-eminence occupied by Mexico in the Spanish part of the northern continent was held by Peru in the earlier history of the civilization of South America. But a gradual loss of territory and of political importance has greatly weakened the place of Peru among the Spanish-American states; and though Peru was once the heart of a great native Inca Empire, and Spanish governors ruled the greater part of South America from within its bounds during the colonial periods, its standing in the world of American politics and letters is to-day one of no great prestige. From the earliest period of the settlement there dates little of value. In the sixteenth century there comes to view Garcilasso de la Vega (1540–1616), surnamed the Inca, as he was of native origin on the side of his mother, a princess of the Inca race. He wrote in good Spanish prose his "Florida", an account of the discovery of that region, and his "Comentarios reales", dealing with the history of Peru and blending much legendary and fictitious matter with a statement of real events. During the golden age of Spanish letters both Cervantes and Lope de Vega praise a number of Peruvian poets. An unknown poetess of Huanuco, writing under the name of Amarilis, produced in her verses, addressed to Lope de Vega and praising him, the best poetical compositions of the early colonial time in Peru. Lope responded with his epistle, "Belardo á Amarilis". Another anonymous poetess of this period wrote in terzarima a "Discurso en loor de la poesía" in which she records the names of contemporary Peruvian poets. An Andalusian colouring was given to composition in Peru during the latter part of the sixteenth century and the early years of the seventeenth by the presence on her soil of certain Spanish writers hailing especially from Seville; among these were Diego Mexía, Diego de Ojeda, and Luis de Belmonte.

Gongorism penetrated into Peru as everywhere else in the Spanish-speaking world, and found a defender there in the person of Juan de Espinosa Medrano. An impetus was given to poetical composition by a Viceroy of Peru, the Marqués de Castell-dos-Rius (d. 1710), who had gatherings at his palace every Monday evening at which the invited *littérateurs* would recite their poems. A number of these poems appeared in the volume styled "Flor de Academias". A conspicuous member of the coterie thus formed was Luis Antonio de Oviedo-Herrera, the author of two long religious poems. A poem, "Lima fundada", and several dramas, especially "Rodoguna" an adaptation of Corneille's French play, are to be put to the credit of Pedro de Peralta Barnuevo (1695–1743), who combined with his activity in the field of belles-lettres much labour in the world of scholarship, winning renown as an historian and also as a geometrician and jurisconsult. Pablo Antonio de Olavide (1725–1803) was a Peruvian who went to the motherland and played a leading part in the Court of Charles III, to whom he suggested certain agricultural reforms. To literature he contributed the prose document, "El Evangelio en triunfo", in which, as a good Catholic, he makes amends for earlier indiscretions.

As a result of later geographical divisions, Olmedo, one of the very greatest of Spanish-American writers, became eventually a citizen of Ecuador and he will therefore be considered in connexion with the literature of that state. Mariano Melgar (1719–1814; shot by the Spaniards) attracted some attention by his endeavour to reproduce in Spanish the spirit of the *yaraví*, a lyric form of the native Quichua or language of the Incas. Next in importance to Olmedo as a poet among those born in the land is Felipe Pardo y Aliaga (1806–68). Trained in Spain by Alberto Lista, he shared the conservative and classic feelings of that poet and teacher. His political satires and his comedies of manners are clever and interesting. Of the nature of the modern *género chico* are the little farces of Manuel Ascensio Segura (1805–71). With much imitation of Espronceda and Zorilla and with considerable echoing of the manner of Lamartine and of Victor Hugo, there was inaugurated about 1848 a romantic movement. The leader in this was a Spaniard from Santander, Fernando Velarde, around whom gathered a number of young enthusiasts. These copied Velarde's own method as well as those of the great foreign romanticists. Among them were: Manuel Castillo (1814–70) of Arequipa; Manuel Nicolás Corpancho (1830–63), who met an untimely fate by shipwreck; Carlos Augusto Salaverry (1830–91); Manuel Adolfo García (1829–83), the author of a noted ode to Bolívar; Clement Althaus (1835–91); and Constantino Carrasco (1841–87), who put into Spanish verse the native Quichua drama, "Ollantay". With respect to the original play in Quichua it was long thought to be entirely of native origin, but now the critics tend to believe that it is an imitation of the Spanish classical drama written in the Quichua language by a Spanish missionary in the region. In an artificial way Quichua verse is still cultivated in Peru and Ecuador. Allied in spirit to the foregoing romanticists is Ricardo Palma, who owes his fame to his prose, "Tradiciones peruanas", rather than to his verse. The more recent writers have undergone in no slight measure the influence of French decadentism and symbolism; a good example of them is José S. Chocano (1867–1900).

Ecuador.—This region belonged to the Viceroyalty of Peru until 1721. Thereafter it was governed from Bogotá until 1824, when Southern Ecuador was annexed to the first Colombia. In 1830 it became a separate state. The first colleges were established in Ecuador about the middle of the sixteenth century by the Franciscans for the natives, and by the Jesuits, as elsewhere in America, for the sons of Spaniards. Some chronicles by clerical writers and other explorers were written during the earlier colonial period, but no poetical writing appeared before the seventeenth century. The Jesuit Jacinto de Evia, a native of Guayaquil, published at Madrid in 1675 a "Ramillete de varias flores poéticas" etc., containing a number of Gongoristic compositions due to himself and to two other versifiers, a Jesuit from Seville, Antonio Bastidas, and a native of Bogotá, Hernando Domínguez Canargo. The best verses of the eighteenth century were collected by the priest Juan Velasco (b. 1727; d. in Italy, 1819) and published in six volumes with the title of "Colección de poesías hecha por un ocioso en la ciudad de Faenza". These volumes contained poems by Bautista Aguirre of Guayaquil, José Orozco (b. 1773; author of an epic, "La conquista de Menorca", which is not without its graceful passages), Ramón Viescas and others, chiefly Jesuits. The Jesuits spared no effort to promote literary culture here and elsewhere in Spanish-America during the whole period down to 1767. The expulsion of them in that year, causing as it did the closing of several colleges, impeded greatly the work of classical education. To scientific study an incentive had been given already by the advent into the land of certain French and Spanish scholars who came to measure a degree of the earth's surface at the equator. A still further impetus to inquiry and research was given by the arrival of Humboldt in 1801. By 1779 the native doctor and surgeon, Francisco Eugenio de Santa Cruz y Espejo (1740–96), had written his "Nuevo Luciano", assailing the prevailing educational and economic systems and repeating ideas which the Benedictine Feijóo had already put forth in Spain.

JOSÉ CELESTINO MUTIS

As has been said above, Ecuador has given to Spanish-America one of her most gifted poets, José Joaquin de Olmedo of Guayaquil (1780–1847). Out of all the Spanish-American poetical writers there can be ranked with him only two others, the Venezuelan Bello and the Cuban Heredia. Guayaquil was still part of Peru when Olmedo was born, but he identified himself rather with the fortunes of Ecuador when his native place was permanently incorporated into that state. In form and spirit, which are semi-classical, Olmedo reminds us of the Spanish poet Quintana, whose artistic excellence and lyric grandiloquence he seems to parallel. The bulk of his preserved verse is not great, but it is marked by a lyric perfection hitherto unsurpassed in the New World. His masterpiece is the patriotic poem, "La victoria de Junín", which celebrates Bolívar's decisive victory over the Spaniards on 6 August, 1824. Its diction is pure, its versification harmonious, and its imagery beautiful, although at times rather forced and over-wrought. Other noteworthy poems of Olmedo are the "Canto al General Flores", praising a revolutionary general whom he later on assails in bitter terms, and "A un amigo en el nacimiento de su primogénito", in which he gives expression to his philosophical meditations. After reaching middle life he produced nothing, and when he became silent no inspired poet appeared to take his place. Gabriel García Moreno (1821–75), a sturdy Catholic, wrote some satires; Juan León Mera (1832–94), a literary historian and a critic of force as he evinces in his "Ojeada histórico-crítica sobre, la poesía ecuatoriana" (2nd ed., Barcelona, 1893), produced a popular novel, "Cumandà", besides his "Poesías" (2nd ed., Barcelona, 1893) and a volume of "Cantares del pueblo". This latter has, in addition to songs in Spanish, a few in the Quichua language. Mention may be made of a few more recent poets, such as Vicente Piedrahita, Luis Cordero, Quintiliano Sánchez, and Remigio Crespo y Toral.

Colombia.—The United States of Colombia was formerly known as New Granada. In 1819, soon after the beginning of the revolution, a state called Colombia was established, but this was later divided into three independent countries, Venezuela, New Granada, and Ecuador. In 1861 New Granada assumed the name Colombia; recently Colombia has lost the part of the territory running up on the Isthmus of Panama. It is generally admitted that the literary production of Colombia (including the older New Granada) has exceeded that of any other Spanish-American country. Menéndez y Pelayo, the Spanish critic, has called its capital, Bogotá, "the Athens of America". During the colonial period, however, New Granada produced but few literary works. The most important among them is the verse chronicle or pseudo-epic of the Spaniard Juan de Castellanos (b. 1552) which, because of its 150,000 lines, has the doubtful honour of being the longest poem in Spanish. Largely prosaic in character, it does reveal poetic flights and it is valuable for the light which it throws upon the lives of the early colonists. Its first three parts, entitled "Elegías de varones ilustres de Indias" (of these only the first was published in 1589), are to be found in the "Biblioteca de autores españoles" (vol. IV); the fourth part is published in two volumes of the "Escritores castellanos" as the "Historia del Nuevo Reino de Granada". The seventeenth century, too, was far from fertile. There appeared posthumously in 1696, at Madrid, a long epic poem, replete with Gongorism, and coming from the pen of Hernando Domínguez Camargo, already mentioned in connexion with Evia's "Ramillete". It is called the "Poema heroico de San Ignacio de Loyola" and treats, of course, of the career of the illustrious founder of the Jesuit Order.

Early in the eighteenth century a nun, Sor Francisca Josefa de la Concepción (d. 1742), wrote an account of her life and spiritual experiences reflecting the mysticism of St. Teresa. About 1738 the printing press was brought to Colombia by the Jesuits, and there ensued a great intellectual awakening. Many colleges and universities had already been founded, following the first of them established in 1554. The famous Spanish botanist José Celestino Mutis took, in 1762, the chair of mathematics and astronomy in the Colegio del Rosario, and there he trained many scientists, notably Francisco José de Caldas (1771–1816; shot by the Spaniards). An astronomical observatory was soon established and it was the first in America. As has already been said, the advent of Humboldt in 1801 fostered scientific research. In 1777 a public library was founded and in 1794 a theatre. Prominent among the works published in the second half of the eighteenth century are the "Lamentaciones de Pubén" of Canon José María Gruesso (1779–1835) and several compositions of José María Salazar (1785–1828), including his "Placer público de Santa Fé", his "Colombiada", and his Spanish verse translation of the "Art poétique" of Boileau. During the revolutionary period two poets of note made their appearance. They were José Fernández Madrid (d. 1830), whose lyrics praise Bolívar and show hate for Spain, and Luis Vargas Tejada (1802–29), whose patriotic verse was directed against Bolívar. The four most prominent poets of Colombia are J. E. Caro, Arboleda, Ortiz, and Gutiérrez González. Juan Eusebio Caro (1817–53) sang of God, love, and liberty with great fervour and his poems evince (Bogotá, 1873) no little philosophical meditation. He underwent the influence first of Quintana and then of Byron. Under the stress of romanticism and through his knowledge of English prosody he sought to introduce into Spanish verse writing certain metrical changes that have not found favour with the critics in the motherland.

Julio Arboleda (1817–61) was a friend of Caro and, like him, a representative of the most polished and aristocratic type of Colombian writers of the first half of the nineteenth century ("Poesías", New York, 1883). Assassinated before he could assume the office of President of the Republic to which he had been elected, he left in a fragmentary state his epic poem, "Gonzálo de Oyón", which, if completed, might have been the most distinguished work of its class produced in Spanish-America. Absolutely Catholic in the expression of his religious feeling, José Joaquín Ortiz (1814–92) favoured the romantic movement without ceasing to be partly neo-classic. Gregorio Gutiérrez González (1820–72), jurisconsult and poet, has no inconsiderable amount of sentimentalism in his verse of a lyric nature. His best work is the Georgic "Memoria sobre el cultivo del maíz en Antioquia", which is concerned with the rustic labours of the country-folk of his native Colombian region of Antioquia. Of lesser poets of the first half of the century there may be cited: Manuel María Madiedo (b. 1815); Germán Gutiérrez de Piñeres (1816–72); Joaquín Pablo Bosada (1825–80); Ricardo Carrasquilla (b. 1827); José Manuel Marroquín (b. 1827), notable as a humorist; José María Samper (b. 1828); José María Vergara (1831–72), noted for his Catholic devoutness; Rafael Pombo (b. 1833); Diego Fallón (b. 1834); Jorge Isaacs (1837–95), better known for his popular novel, "María". In the second half of the nineteenth century the most eminent man of letters has been Miguel Antonio Caro (b. 1834), a son of J. E. Caro. He has worked for classical ideals in literature, and his translation of Virgil ranks high among the Spanish versions. Of the many writers of the closing years of the century we may point out: Diógenes Arrieta (b. 1848), Ignacio Gutiérrez Ponce (b. 1850), José Rivas Groot (b. 1864), and the authoress Agripina Montes del Valle.

Venezuela.—This state, the old Captain-generalcy of Caracas, has the honour of having given to Spanish-America the great liberator, Simon Bolívar, and the eminent man of letters, Andrés Bello. The growth of literary culture in the region was slow, in part because politically and otherwise it was overshadowed by the neighbouring district of New Granada, to which for a while it was subject, and in part because the heterogeneous nature of its population, with a preponderance of native Indian and negro elements, largely lacking civilization, retarded the course of events. The Colegio de Santa Rosa was founded at

Caracas in 1696; it became a university in 1721. According to some accounts the printing press was not set up in Venezuela until after the beginning of the nineteenth century. But already her great man in the world of scholarship and letters had made his appearance: Andrés Bello was born at Caracas in 1781, two years before Bolivar. He early began to teach the humanities and philosophy. In 1810 he was sent to London, on a mission to the British Government, which the rebellious colonies desired to gain over to their interests. He remained there nineteen years, devoting himself in part to literary pursuits and founding two reviews, the "Biblioteca americana" and the "Repertorio americano". Then he left England to pass the rest of his life in Chile, the Government of which had called him to a post in the ministry of foreign affairs. He reorganized the University of Chile, of which he was made rector, and he did great service to the land by preparing an edition of its Civil Code. He died in 1865. In 1881 the Government began to publish his "Obras completas". His most finished literary production is the masterly "Silva á la agricultura de la Zona Tórrida", a Georgic celebrating the beauties of external nature in tropical America and urging his fellow-citizens to engage in agricultural pursuits. As a result of this work Bello ranks high among the imitators of Virgil; in the purity of its Spanish diction it has never been surpassed; in poetic force it is on the whole evenly maintained. A leading place among his other poetical compositions is occupied by the sonnet "Á la victoria de Bailén". His versions of the "Orlando innamorato" of Boiardo, and of different poems of Byron and Hugo (especially of the "Prière pour tous" of the last-named) are much admired. Not his least title to the admiration and gratitude of the Spanish-speaking peoples is his "Gramática castellana", first published at Santiago de Chile in 1847, still the most important of all Spanish grammars, especially in the revised form of it prepared by R. J. Cuervo. For his investigations into Spanish prosody and for his scholarly edition of the old Spanish "Poema del Cid" he will always be remembered favourably.

The names of the more recent Venezuelan authors pale greatly in the light of Bello's. Rafael María Baralt (1810–60), who prepared an "Historia de la Repûblica de Venezuela" and a useful "Diccionario de galicismos", passed over to Spain, where he was made a member of the Academy. Like him there also went to Spain, where he rose to the position of a general in the army, Antonio Ros de Olano (1802–87); Ros de Olano found time to produce some romantic writings, particularly his "Poesías" (Madrid, 1886) and several novels. Among the minor writers belong: José Heriberto García de Quevedo (1819–71), Abigail Lozano (1821–66), José Antonio Maitín (1804–74), Eloy Escobar (1824–89), and José Ramón Yépez (1822–81). As verse translators there have gained attention José Pérez Bonalde (1846–92), with a version of Heine, and Miguel Sánchez Pesquera, with one of part of Moore's "Lalla Rookh".

Chile.—A predominance of the practical sense over the imagination has greatly hindered the development of belles-lettres in Chile, which from first to last has been one of the least disturbed politically among the South American states and has been able to pursue rather calmly an even tenor of way. A profound respect for science and the didactic arts seems characteristic of the people of Chile. The history of real literature in the land begins with the epic, "La Araucana", of Alonso de Ercilla in the sixteenth century, but that work, since it was completed by its author in Spain, is usually treated under the head of the literature of Spain. On the model of Ercilla's poem a Chilian, Pedro de Oña, began, but did not finish, although it has 16,000 lines, his "Arauco domado" (Lima, 1596), in virtue of which he is the first native author in Chile. To the life and customs of the Araucanian Indians, already treated by Ercilla and Oña, Francisco Núñez de Pineda (1607–82) devoted himself in his poems and above all in his "Cautiverio feliz".

Much history writing of a serious nature followed these early attempts at an epic rendering of actual historical happenings, and no poets of greater importance than Oña and Núñez de Pineda appeared during colonial times. On the other hand, periodical literature flourished. In 1820 a theatre was set up for the purpose of providing an *espejo de virtud y vicio*, i. e. for purely didactic ends. The dramatic literature provided therefore was of slight account. Among the dramatists was Camilo Henríquez (1769–1825), whose pieces represent the pedantic tendencies. Some stimulus to general culture and to the study of the humanities, philosophy, and law was given by the coming to Santiago in 1828 of the Spanish *littérateur* José Joaquín de Mora, and of the Venezuelan Andrés Bello in 1829. In 1824 there was started the periodical "El Semanario de Santiago", in the management of which there collaborated many young men of letters; it led to the establishment of other literary journals. In 1843 the University of Santiago de Chile was inaugurated officially with Bello as its rector. In the fifth decade of the nineteenth century the French and Spanish dramas of romantic import invaded the theatre. The writers of the middle and second half of the century have not been preeminent in ability as regards literary creation. These may be listed, however: Doña Mercedes Marín del Solar (1810–66); Hermógenes de Irisarri, for his verse translations of French and Italian poets; Eusebio Lillo; Guillermo Blest Gana; Eduardo de la Barra, both poet and prosodist; etc. Among those cultivating the novel is Alberto Blest Gana. Of the scholars engaged in historical study and publication during the nineteenth century the more notable are: José Victoriana Lastarria (1817–88); Miguel Luis de Amunátegui (1828–88); Benjamín Vicuña Mackenna (1831–86); and José Toribio Medina.

Argentine Republic.—Literary culture developed later in Argentina than in most of the other states for the obvious reason that it was colonized later than the others. From the colonial period there comes but one work deserving of mention, and its literary value is scant; it is the "Argentina y conquista de la Plata" (1602) of the Spaniard Martín del Barco Centenera. Much patriotic verse of mediocre value was called forth by the British attack upon Buenos Aires in the first decade of the nineteenth century. During the revolutionary period there came to the fore a number of neo-classicists such as: Vicente López Planes (1784–1856), who wrote the Argentina national hymn; Esteban Luca (1786–1824); and Juan Cruz Varela (1794–1839), who was both a lyric poet and a dramatist. The first great poet of the Argentine Republic was Esteban Echeverría (1805–81), who was educated at the University of Paris and, returning thence in 1830, introduced romanticism directly from France. Of his various compositions "La cautiva" is full of local colour and distinctively American. Ventura de la Vega (1807–65) was born in Buenos Aires, but he spent most of his life in Spain and his admirable dramas are claimed by the mother country. To the authors of the earlier period of independence there belong: Juan María Gutiérrez (1809–78), a good literary critic; Claudio Mamerto Cuenca (1812–66); and José Marmol (1818–71), who produced some verse and also the best of Argentine novels, his "Amalia". In the language of the *gauchos* or cow-boys of the Rio de la Plata district, there has been published by José Fernández a collection of songs in "romances", entitled "Martín Fierro" (1872). These are very popular. In the second half of the nineteenth century the poets of prime importance have been Andrade and Obligado. Olegario Víctor Andrade (1838–82), the

author of "Prometeo" and "Atlantida", is one of the foremost of the recent poets of South America and probably the best poet that the Argentine Republic has yet produced. For poetic technic he harks back to Victor Hugo; his philosophy is that of modern progress; everywhere his verse is redolent of patriotic fervency. The "Atlántida" is a hymn to the future of the Latin race in America. Occasional incorrectness of diction mars his works. Rafael Obligado (1852—) is more correct and elegant than Andrade, but he is not equal to him in inspiration. He delights in poetical descriptions of the beauties of nature and in the legendary tales of his native land.

To the literary activity of Uruguay it is hardly necessary to devote a separate section, since geographical contiguity and other circumstances have bound up the history of the two lands. However, mention should be made of several writers as peculiarly Uruguayan. Bartolomé Hidalgo with his "Dialogos entre Chano y Contreras" (1822) really began the popular *gaucho* literature of the region of the Rio de la Plata. Francisco Acuña Figueroa (1790–1862) wrote in pure Spanish and, though his original lyrics do not soar to any poetical heights, he had some success in his versions of Biblical songs and odes of Horace. Many poets of modest power were prompted to indite poems when the romantic wave struck the land. A celebrity of recent times is Juan Zorrilla San Martín, the author of the epic poem "Tabaré" (Montevideo, 1888), which in certain respects has been compared to the famous Brazilian epic composition of Araujo Porto-Alegre. A novelist of the more immediate period is Carlos María Ramírez, the author of "Los amores de Marta".

Central America.—Scant is the output of the territory called Central America, and for this climatic and political considerations may easily be alleged. The Republic of Guatemala has surpassed the other Central American states in literary energy. The literary pioneer here is the Jesuit Rafael Landívar, who, expelled from Spain by the cruel edict of 1767, came to the New World and there anticipated Bello's Georgic composition with his Latin "Rusticatio Mexicana" which in diction and terms of description presents praiseworthy pictures of Central-American rustic life as he saw it. The Guatemalan José Batres y Montúfar (1809–44) tried his hand at narrative verse, emulating both the Italian Casti and the Englishman Byron. Romantic sentimentalism prevails in the lyrics of Juan Diéguez. The most interesting figure among the Central-American men of letters is Rubén Darío (b. 1864), a Nicaraguan who has lived much abroad and has cosmopolite and eclectic principles. He is an artist both in prose and in verse and has already his disciples among the Spanish-American writers of the present generation.

Cuba.—In the Island of Cuba the development given to literature in Spanish has been late but brilliant. Nothing cultural of real importance and deserving record occurred before the eighteenth century when, by a Bull of Innocent XIII, the University of Havana was established in 1721. A printing-press had been set up at Santiago de Cuba as early as 1698, but its activity was short-lived; it was re-established by 1792. At about this latter date periodical literature began. Properly speaking, the two first poets in Cuba are Manuel de Zequeira y Arango (1760–1846), who cultivated both the bucolic and the heroic ode, and Manuel Justo de Rubalcava (1769–1805), whose lyric worth was proclaimed in Spain by Lista and in France and England by several critics. Cuba's greatest poet and the peer of Bello and Olmedo is José María Heredia (1803–39). Exiled because of his association with the party hostile to the Spanish rule, he spent a brief period in the United States and went to Mexico, where he rose to a place of great importance in the judiciary. Despite the brevity of his life his verse is imperishable. A gentle melancholy pervades his lyrics, which are full of love for his native isle, forbidden to him. A keen sympathy with the moods of external nature is clear in some of his writings, e. g. his poems "En una tempestad", "Niágara", and "Al Sol", and makes him akin to the romanticists. The American landscape inspires also his beautiful "En el Teocalli de Cholula", which records as well the perishability of all the handiwork of man. His language and verse, although not at all impeccable, are in general satisfactory; the expression of his thought, free as it is from turgidity, appeals inevitably.

After Heredia six other Cuban poets of decided worth require notice; they are Avellaneda, Plácido, Milanés, Mendive, Luaces, and Zenea. Gertrudis Gómez de Avellaneda (1814–73) went to Spain about her twentieth year and there produced the lyrics, dramas, and novels that have made her justly famous throughout the Spanish-speaking territory. So great was her vogue in Spain that she was elected to membership in the Spanish Academy in which, however, she was prevented from taking her seat because it was discovered that the regulations forbade her entrance. Her career belongs to the history of Spanish literature. Plácido is the pseudonym of Gabriel de la Concepción Valdés (1809–44), a mulatto who triumphed over the rigours of fate, which deprived his youth of most of the advantages of education, and succeeded in composing verse which, if often incorrect in the preserved form, still bears the impress of genius. His best remembered lyric is the "Plegaria á Dios", written while he was under sentence of death for complicity in a conspiracy against the Spanish government in which he really had no part. Soft, melancholy strains or stirring patriotic notes resound throughout the verse of the other four poets mentioned: José Jacinto Milanés (1814–63); Rafael María Mendive (1847–86); Joaquín Lorenzo Luaces (1826–67); and Juan Clemente Zenea (1832–71). Milanés attempted the drama with some degree of good fortune. The novel has been cultivated more or less felicitously by Cirilo Villaverde ("Cecilia Valdés", 1838–1882) and Ramón Meza. A literary critic of undoubted distinction is Enrique Piñeyro, whose essays are received with acclaim in Europe and everywhere. By way of record it may be said that Porto Rico and Santo Domingo have not yet produced writers comparable to those listed for the other lands. In our own days, however, José Gautier Benítez of Porto Rico and Fabio Fialloa of Santo Domingo have met with praise for their verse.

J. D. M. Ford.

Spalato-Macarsca (Salona), Diocese of (Spalatensis et Macarscensis), suffragan of Zara. Salona is the most sacred ground in the Austrian monarchy, where Titus the pupil of St. Paul preached, where the followers of Jesus Christ first shed their blood as martyrs, and where beautiful examples of basilicas and other early Christian sculpture have been discovered. Byzantine art spread under Justinian I to the shores of the Adriatic Gulf, the baptistery in Salona dating from this period. Forty-seven bishops of Salona are known: Hesychius III is mentioned in the twentieth book of St. Augustine's "De Civitate Dei"; an epistle from Gelasius I is addressed to Honorius; Honorius III conducted a synod in 530; Natalis at a Council in 590, unjustly deposed his archdeacon Honoratus, but Gregory the Great took the latter's part. In 639 Salona was destroyed by the Slavs. In 647 the city of Spalato began to arise from the ruin of Salona, and after an interregnum of eleven years its archbishops took over the territory of the archbishops of Salona. Out of the long series of its seventy-nine archbishops may be mentioned St. Rayner (d. 1180), and the unfortunate Marcus Antonius de Dominis, who was deprived of his office after having filled it for fourteen years and died an apostate at Rome in 1624; Thomas, who resigned his office voluntarily (thirteenth century), is the author of a history of the bishops of Salona and Spalato.

The Piazza del Duomo, Spalato

The Great Court of the Palace of Diocletian, built A. D. 300. The Arcade shows the earliest ascertained example of arches springing directly from column without entablature

The Gregorian reform decrees were discussed at synods in Dalmatia as early as 1075 and executed in 1111 by Archbishop Ascentius. At the great provincial synod in St. Andrew's Church in 1185, Archbishop Petrus VII excommunicated the heretics and all who had taken possession of church property. He also prescribed the daily chanting of the Office of the Blessed Virgin. In the Council of 1292, John VII, Primate of Dalmatia, threatened to punish all bishops who interfered with other dioceses. With the death of Archbishop Lælius Cippico (1807) began another interregnum which lasted twenty-three years. The Church in Dalmatia was then reorganized, Macarsca united with Spalato, and the latter as a simple bishopric made subject to Zara. Paul Miossich was appointed first bishop of the new diocese in 1830.

The See of Spalato-Macarsca numbers 199,800 Catholics; 231 secular priests; 91 male religious in 15 stations; and 125 nuns in 9 stations.

Cölestin Wolfsgruber.

Spalding, Martin John, seventh Archbishop of Baltimore, b. Bardstown, Kentucky, 23 May, 1810; d., at Baltimore, 7 Feb., 1872. His forbears came from England and settled in Maryland about the middle of the seventeenth century; his grandfather removed to Kentucky in 1790. Martin Spalding entered St. Mary's College, Lebanon, Kentucky, in 1821, taught mathematics there at the age of fourteen, was graduated in 1826, and studied philosophy and theology during four years in the seminary at Bardstown. In 1830 he entered the Propaganda, Rome, where after a brilliant course he was ordained 13 Aug., 1834, and received the doctorate in theology at the close of a public defence of 256 theses. Upon his return to Bardstown, he became pastor of the cathedral and editor of the "Catholic Advocate", founded in 1835. After the transfer of the see to Louisville, he was appointed vicar-general (1844), coadjutor *cum jure* to Bishop Flaget (1848), and Bishop of Louisville (1850). The diocese, which then numbered over 30,000 Catholics, was well provided with schools for girls, but there were comparatively few schools for boys. To supply this need and to recruit the clergy, Bishop Spalding, shortly after the dedication of the cathedral in 1852, went to Europe and secured the services of the Xaverian Brothers who came to Louisville in 1854. During his visit to Belgium, the bishop conceived the idea of founding the American College at Louvain which, mainly through his efforts, was opened in 1857. Much of his time was devoted to lectures and controversial writings in defence of the Church, especially against the Know-Nothing movement and the common school system from which religious instruction was excluded. He had already published "Evidences of Catholicity", a series of lectures delivered in 1844–5, and the "Life, Times and Character of Benedict Joseph Flaget" (Louisville, 1852); these were followed by his "Miscellanea" (1853) and his "History of the Protestant Reformation" (1860) in which he enlarged his "Review of D'Aubigné's 'History of the Reformation'", published in 1840. He also lectured at the Smithsonian Institute, Washington, and in Baltimore, New York, Brooklyn, and other cities.

In 1864, on the death of Archbishop Kenrick, Bishop Spalding succeeded him in the See of Baltimore. Here he organized the St. Vincent de Paul Society, founded the House of the Good Shepherd and St. Mary's Industrial School, and completed the cathedral. In October, 1866, the Second Plenary Council assembled at Baltimore; Archbishop Spalding arranged the details and presided over the deliberations. He had previously suggested the idea of a Catholic university, and it was chiefly due to his efforts that the project was endorsed by the council. In 1867 he again visited Rome and took part in the celebration of the centenary of St. Peter's martyrdom. As the American College in Rome was in need of funds, Archbishop Spalding issued an appeal, which resulted in placing the college on a sound financial basis. His labours in behalf of religion and the spreading of Catholic truth were incessant. In 1868 he consecrated Bishop Becker for the See of Wilmington and Bishop Gibbons for the Vicariate Apostolic of North Carolina. Within one year (1868–9) he administered confirmation a hundred times, one eighth of the recipients being converts. He welcomed the Little Sisters of the Poor to Baltimore (1869), invited Father Herbert Vaughan to evangelize the negroes (1871), and aided Father Hecker in establishing the Catholic Publication Society of New York. At the Vatican Council he was a member of the Commission on Faith and of the Commission on "Postulata" which had to examine all the matters proposed for deliberation before they were presented to the council. He was a strong supporter of the doctrine of papal infallibility and he drew up a *postulatum* in which he favoured a definition by implication in preference to an explicit affirmation of the dogma. Immediately after the final vote on infallibility, Archbishop Spalding addressed a pastoral letter to the clergy and laity of his archdiocese, in which he set the action of the council in the proper light and cleared away numerous misrepresentations. Shortly after his return to America he spoke at Philadelphia in defence of the temporal power of the pope, and on 18 June, 1871, he commemorated with fitting observance the jubilee of the elevation of Pius IX to the papal chair, the last notable celebration in which he took part. Archbishop Spalding was a fine representative of the type of men who organized and developed the Church in the United States. To a strong faith he added sincere piety and tender devotion, to scholarship a high degree of administrative ability, and to his zeal for Catholicism a loyal interest in the welfare of his country. He enjoyed the esteem of those who were foremost in Church and State, and his death was the occasion of tributes from all classes of his fellow-citizens. His complete works were published at Baltimore in several editions.

Louis O'Donovan.

Spallanzani, Lazzaro, a distinguished eighteenth-century scientist, b. at Scandiano in Modena, Italy, 10 January, 1729; d. at Pavia, 12 February, 1799. His early education was received at the Jesuit College of Reggio. His scientific career began at the University of Bologna under the inspiration of his cousin, Laura Bassi, the famous woman professor of natural philosophy and mathematics. He gave up the study of law and was ordained a priest; at twenty-five he became professor of logic, metaphysics, and Greek in the University of Reggio. His favourite authors were Homer, Demosthenes, and St. Basil, and his work attracted so much attention that he was offered chairs at Coimbra (Portugal), Parma, and Cesena (Italy). He preferred a chair at Modena (1760) and devoted all his spare time to natural science. His work here brought offers of professorships at other Italian universities and from the Academy of St. Petersburg. In 1768, at the personal solicitation of the Empress Maria Theresa, he accepted the chair of natural history in the University of Pavia which was then being reorganized. He greatly enriched the museum here by collections made in journeys in Switzerland and along the Mediterranean. After the death of Vallisneri, whose chair at Padua had been the centre of interest in the natural sciences, Spallanzani was invited to take it, but the Austrian authorities doubled his salary and gave him a long leave of absence for a scientific expedition in Turkey to retain him. His home-coming was an ovation. He continued to make scientific journeys and special studies of Vesuvius and the volcanoes of Sicily and of the Lipari Islands. His contributions to every phase of physical science are valuable, but it was in biology that his work counted for most; his studies in regeneration are still classic. He showed experimentally that many animals like the lizard and the snail, if accidentally injured, regenerate important parts of their bodies; the land snail regenerates even its head. It was afterwards shown that this does not contain the brain, but it does contain eyes, mouth, tongue, and teeth, and these are all regenerated. Spallanzani made a long series of interesting experiments on artificial fecundation. His most important work is "Dissertazioni di fisica animale e vegetale" (Modena, 1780). His researches were so much appreciated that he was made a member of academies and learned societies in London, Madrid, Stockholm, Upsala, Göttingen, Holland, Lyons, Bologna, Milan, Siena, Turin, Padua, Mantua, Geneva, and Berlin. The University of Paris, then the most important of universities for the sciences, tempted him to come as a professor. His personal character was charming and he made many friends. His biological work brought him into controversies with Needham and Buffon over spontaneous generation, and with John Hunter over digestion. He came off victorious in both contests but with such gentle courtesy as not to offend, though his opponents in the taste of the time indulged in personalities. His family were devoted to him, and his sister Marianne herself became a distinguished naturalist while helping him. He was devoutly religious, and as Senebier says, "he perceived with firmness his end approaching and endeavoured by his piety and his faith to edify those who surrounded him."

Lazzaro Spallanzani

James J. Walsh.

Sparta, a celebrated town of the Peloponnesus, mentioned several times under this name or under that of Lacedæmon in the Bible (I Mach., xii, 2–23; xiv, 16–23; xv, 23; II Mach., v, 9). Letters were exchanged between Onias I, high priest of the Jews, and Arius I, King of Sparta, about the years 309 or 300 B. C. (I Mach., xii, 7–8, 19–23; Josephus, "Ant. Jud.", XII, iv, 10). Arius, who sought to maintain the independence of his country against the Syrian successors of Alexander by creating a diversion against them in Palestine, pretended to have found a writing relative to the Spartans, showing that they themselves and the Jews were two peoples—brothers both descending from Abraham. This assertion has little foundation, although perhaps there had been such a tradition. Later Jonathan wished to renew this friendship with the Spartans and sent them a letter by the delegates Numenius, son of Antiochus, and Antipater, son of Jason, recalling to them that "we therefore at all times without ceasing, both in our festivals, and other days, wherein it is convenient, remember you in the sacrifices that we offer" (I Mach., xii, 2, 5–18; Josephus, "Ant. Jud.", XIII, v, 8). After Jonathan's death the Spartans renewed with his brother Simon the friendship and alliance which they had concluded previously and sent him a letter on this subject by the same Numenius and Antipater who had undertaken the first embassy (I Mach., xiv, 16–23).

Although the relationship of the two peoples may well be called in question, there is no proof that the documents are not authentic—everything indicates the contrary, as the coexistence of the King Arius and the high-priest Onias, and the fact that under Jonathan the Bible does not speak of kings of Sparta, as in fact the last tyrant Nabis died in 192 B. C. We see again towards the year 170 B. C. the high priest Jason took advantage of the bonds of relationship of the Jews with Sparta to take refuge there—where he died (II Mach., v, 9). In 139 B. C. the Romans addressed to Sparta, and likewise to other kingdoms and cities a circular in favour of the Jews (I Mach., xv, 23); this would seem to prove that there was already a Jewish community established in this city. The belief in the consanguinity of the two peoples existed even in the time of Josephus (Bel. Jud., I, xxvi, 1), and Sparta participated in the generosities of Herod the Great (Bel. Jud., I, xxi, 11), perhaps because he had there a Jewish community.

Christianity was introduced into Sparta at an early date. Eusebius (Hist. eccl., IV, xxiii) reports that under Marcus Aurelius, the Bishop of Corinth, Denis, wrote to the Lacedemonians a letter which is "a catechism of orthodoxy and which has peace and unity for its object". Le Quien (Oriens christ., II, 189–92) mentions fifteen bishops, among them Hosius in 458, Theodosius in 681, Theocletus in 898, finally the metropolitan Chrysanthus, who must have become a Catholic in the seventeenth century. In the beginning suffragan of Corinth, then of Patras, the see was made a metropolis in 1082 and numbered several suffragan bishoprics, of which there were three in the fifteenth century (Gelzer, "Ungedruckte . . . Texte der Notitiæ episcopatuum", 635). In 1833, after the Peloponnesus had been included in the Kingdom of Greece, Sparta was reduced to the rank of a simple bishopric; it remains the same to-day, but the see is called Monembasia and Sparta. The bishop resides at Sparta and exercises his jurisdiction over all the district of this name. When the region fell into the power of the Franks, Honorius III established there in 1217 a Latin see which by degrees became a titular and finally disappeared (Eubel, "Hier. cath. med. ævi", I, 302; II, 188; III, 234). The city numbers to-day 5000 inhabitants.

Species, in scholastic terminology, the necessary determinant of every cognitive process. Few scholastic doctrines have been more frequently misunderstood, misrepresented, and ridiculed than that of the *species intentionales*. And yet few are more obvious and unobjectionable, although we are no longer accustomed to them. While using different terms, modern psychology offers an explanation of knowledge which, in its essential features, is identical with that which was proposed by the great thinkers of the Middle Ages.

Knowledge is essentially the union of an object with the mind. As the cognitive process takes place in the mind, it follows that the known object must in some manner be present in the mind. "Cognitio contingit secundum quod cognitum est in cognoscente" (St. Thomas, "Contra gentiles", II, c. lxxvii and xcviii). Any cognitive faculty is indetermined, or *in potentia* in two ways: (1) as we have no innate ideas, it is at first a mere aptitude to acquire knowledge, a power which is not always exercised; (2) the same faculty is capable of knowing many things. Thus the eye can perceive any colour; the ear, any sound; the intellect, any conceptual relation, etc. To pass from this state of twofold indetermination to a concrete and determined act of knowledge, the faculty needs a complement, a determining principle, or *actus* (see Actus et Potentia). It must be "informed", or acted upon, by its object. For this reason all faculties of knowledge were called passive, not in the sense that the mind is merely passive in its cognitive process, but in the sense that it must first be acted upon, and thence be enabled to exercise its own cognitive activity. In other words, knowledge is not a spontaneous activity springing from the mind alone, but a reaction in response to an external stimulation.

The "species", frequently also called *forma*, is the determinant of the mind in the process of knowledge. It partakes of the nature both of the object from which it proceeds, and of the faculty in which it is received, for, as the scholastic axiom expresses is: "Quidquid recipitur per modum recipientis recipitur." And more specifically: "Cognitum est in cognoscente secundum modum cognoscentis" (St. Thomas, "Summa theol.", I, Q. xii, art. 4). Hence the *species impressa* is the modification of the faculty by the action of the object. The *species expressa* is the reaction of the mind as a cognitive process. The former is impressed in the faculty which it determines, and corresponds to the passive phase of knowledge which is a necessary condition but is not yet actual knowledge. The latter is the active response of the faculty, the cognitive process itself by which the mind reaches the object. The species must not be conceived as a substitute for the object, but as a mere medium of knowledge. The mind reaches the object directly and immediately, not the species. The species is not that which is known, "id quod cognoscitur", but that by which the object is known, "id quo objectum cognoscitur" (St. Thomas, "Summa theol.", I, Q. xii, art. 9; Q. xiv, art. 5; Q. lxxxv, art. 2; "De Veritate", Q. x, art. 8, ad 2um, etc.). The object as acting on the faculty, and the faculty as acted on by the object, are one and the same reality. *Actio* and *passio* are the same thing with two aspects or phases. Hence there is no need of a bridge to pass from the subject to the object. The question: how can the mind know extramental objects? has no meaning when knowledge is conceived as the vital union of the known object with the knowing mind.

This general function of the species applies to both sensitive or organic and intellectual or spiritual faculties of knowledge. The *species sensibilis* is not an efflux from the object, not a physical miniature of it—a view which was accepted by some interpreters of Aristotle, but which the great scholastics, with St. Thomas, reject. It is a modification of the sense organ by the action of the object. It is sometimes called material because it results from the activity of material objects, and is a modification of a material organ. Sometimes also it is called intentional, or even spiritual, because it is not in itself a material representation, and is not received in physical matter, but in an organ which is animated by the soul. In other words, it is psychophysical. The *species intelligibilis* is the determinant of the intellectual act of knowledge. It is elaborated from the data of the senses by a special activity of the intellect (*intellectus agens*), and received in the *intellectus patiens* or *possibilis* which elicits the act itself of knowledge (see Intellect).

C. A. Dubray.

Speckbacher, Josef, a Tyrolean patriot of 1809, b. at Gnadenwald, near Hall, in the Tyrol, 13 July, 1767; d. at Hall, 28 March, 1820. Speckbacher was the son of a peasant and spent his youth in roaming, and he did not learn to read and write until later in life. At the age of twelve he was a poacher and was often involved in fights with the customs officers. When a little older, he worked in the imperial salt-mines at Hall. On 10 Feb., 1794, he married Maria Schmiederer of Judenstein, and in this way came into possession of her farm and house. At the beginning of the war with France he became one of the volunteers who sought to defend the fatherland; his first encounter with the enemy took place at the bloody skirmish near Spinges on 2 April, 1797. He was a fine sharp-shooter and one of the most zealous of the Tyrolean patriots. In 1805 he fought under Lieutenant-Colonel Swinburne against Marshal Ney, but was obliged like the other patriots to accept the cession of the Tyrol to Bavaria in 1806. When in 1808 the Archduke John entered into negotiations with Andreas Hofer for regaining the Tyrol, Speckbacher soon became one of the most trusted friends of Hofer and courageously supported the latter in preparing for the struggle for liberty. With the entrance of the Austrian army into the Pustertal in the month of April, 1809, began the heroic struggle of the Tyrolese. Speckbacher took a prominent part in the three efforts to free the country from the yoke of Napoleon. He showed himself to be not only a daring fighter, but above all a cautious, unterrified strategist. In this year, according to his own diary, he took part in thirty-six battles and skirmishes. On 12 April, 1809, he surprised the city of Hall early in the morning, made the garrison prisoners, and prevented the flight of the French into the valley of the lower Inn. On 31 May he commanded the left wing of the battle of Mount Isel, and fought victoriously near Hall and Volders. He conducted the siege of the castle of Kufstein (23 June–16 July). Here he gave countless proofs of personal courage, built batteries, destroyed the mills and boats, burnt the city, captured the train of provisions, and made his way as a spy into the castle. From 4 Aug. to 11 Aug. he was most of the time the commander in the battles between Sterzing and Franzensfeste against Marshal Lefebvre. He forced the marshal to retire and with Hofer and Haspinger commanded at the famous third battle of Mount Isel (13 and 15 August). After the enemy had been driven away, he and his men forced their way into the mountains of Salzburg, and stimulated there the defence of the country; on 25 Sept. he defeated the allied French and Bavarians at Lofer and with great loss fell back on Reichenhall. On 16 Oct. he was surprised at Melleck by a superior force of the enemy and was obliged to retire; his young son Andreas was taken prisoner, and he himself was severely wounded. At Waidring on 17 Oct. and at Volders on 23 Oct. he was able to maintain himself against the foe, escaped capture once more in a skirmish on 28 Oct., and captured a battalion of the enemy. After the last and unsuccessful fight on Mount Isel on 1 Nov., he wished to continue the struggle, but was obliged to abandon the unequal contest. He was proscribed, and a reward of five hundred florins was offered to anyone who would deliver him alive or dead.

Speckbacher spent the entire winter in the Tyrolese mountains, sometimes hid among friends at lonely farms, sometimes hid in Alpine huts and always hunted by enemies. He was betrayed only once, but he saved himself this time by a daring flight and hid himself until Jan., 1810, in the clefts of the rocks, being often near death from hunger. His wife and four children were also obliged to seek safety by flight and to hide in the mountains. Speckbacher's last hiding-place was near the summit of a high mountain in the Voldertal, where the only person who came to him was his faithful servant George Zoppel, who brought him food. On 14 March he was severely injured by an avalanche which overwhelmed him. He was brought by friends to his farm at Judenstein, where Zoppel hid him in the stable under the floor until 2 May. When scarcely well Speckbacher fled amid great dangers through the Pinzgau and Styria to Vienna, where he was warmly received by the Emperor Francis I. The emperor presented him with a chain of honour and a pension. The emperor's plan to settle the Tyrolean refugees in Hungary could not be carried out and in 1811 Speckbacher was made the superintendent of an estate near Linz given by the ruler to Hofer's son. Speckbacher's wife, who had been imprisoned thirteen weeks at Munich, however, remained on the farm in the Tyrol. In the autumn of 1813 Speckbacher returned to the Tyrol as a major of the Tyrolese volunteers in the imperial army under General Fenner. He shared with these troops in the garrisoning of Southern Tyrol against the French and in maintaining these garrisons against the enemy. On 12 Sept., however, the Bavarian government at Innsbruck once more set a price, 1000 florins, on his head, and it was not until the summer of 1814 that Speckbacher was able to return home unmolested. A year later he received a second gold chain of honour, and in 1816 at the time of the national demonstration he received the personal notice of the emperor. He joyfully met his son, who had been well educated at Munich, and looked forward to a peaceful old age, but the hardships he had undergone forced him to sell his farm and move to Hall, where he died after a short illness.

He was first buried at Hall, but in the summer of 1852, at the command of the Emperor Francis Joseph I, his remains were transferred to the Court church at Innsbruck, where they were placed by those of Hofer and Haspinger. In 1908 a bronze statue was erected to him at Hall. His widow received a pension from the emperor of 500 florins and a supplementary sum for the education of her children. She died in 1846. Speckbacher's eldest son Andreas only lived to the age of thirty-seven years. After conpleting his studies as a mining engineer he went to the iron works at Mariazell and Eisenerz in Styria, received positions at Pillersee, Brixlegg, and Jenbach in the Tyrol, where he did much to improve the methods of mining ore. He married Aloisia Mayr and died in 1834. His sons and his brother died at an early age, and the family is extinct in the male line. Speckbacher was one of the most striking of the men who shared in the struggle for freedom in the Tyrol. His character is well expressed in his epitaph: "In war wild but also human, in peace quiet and faithful to the laws, he was as soldier, subject, and man worthy of honour and love".

Heinrich von Wörndle.

Speculation, a term used with reference to business transactions to signify the investing of money at a risk of loss on the chance of unusual gain. The word is commonly used only when the risk of loss is greater than ordinary business methods and prudence warrant. A coal merchant who sees grounds for thinking that the coming winter will be severe, and that there will be a general strike among coal miners, shows enterprise if he lays in a large stock of coal with the expectation of reaping more than usual profit from its sale. He incurs the ordinary risks of business, he does not speculate. But if a man thinks, on trivial indications, that there is going to be a great development in the opening up of a new country, and buys large tracts of prairie land in the district on the chance of its rising rapidly in value, he would be said to speculate in land. More specifically, speculation is used to designate dealings in futures and options on the Exchanges, especially when the parties to the transaction do not intend any effective transference of commodities or securities,

but only the payment of differences between making-up prices and those agreed on. Such time-bargains are universally practised nowadays on the world's Exchanges, and the volume of business done in them vastly surpasses that where effective transfer of securities or commodities is contemplated. The transactions may vary indefinitely in character between *bona fide* and perfectly lawful buying and selling, on the one hand, and the merest gambling or betting on future prices, on the other.

Some of the ordinary types of such operations are the following. A speculator buys at the current rate a thousand dollars' worth of stock for the account at the end of the month. When the day for settlement arrives, if the price has risen, he is paid the difference between the price at which he bought and the making-up price. If the price is lower, the speculator loses and pays the difference to the broker. In the slang of the Exchange, this is a "future", or "time-bargain", or a deal in "differences"; and one who speculates for the rise of prices is called a "bull", while one who speculates for the fall is called a "bear". When the operator loses, he may prefer to extend the time of settling the account to the next settling day. This may be done by arrangement with the broker, and the transaction is known as "carrying over". A speculator may purchase at a fixed rate the right to receive or to refuse a certain amount of a certain stock or commodity at a future date. This is called an "option". If he purchases the right either to sell or to buy, it is a "put and call", or a "double option". Of course no objection can be raised against such contracts as these when they are entered into by merchants or others with a view to the effective transfer of what is bought and sold. A merchant or manufacturer requires a constant and steady supply of what he deals in so as to be able to conduct his business. Effective dealings in "futures" and "options" guarantee the steady supply which is needed, and that at fixed rates settled beforehand. Such business methods benefit the dealer and the public as well. They ensure a constant supply of commodities at medium rates. But the speculator does not intend effective transfer. His buying and selling are fictitious; he only pockets his differences if he wins, and pays them if he loses. His methods give rise to serious moral, economic, and political questions, which have been the subject of much discussion.

There is no great moral harm in the practices which have been mentioned if they are considered singly by themselves and in the abstract. Without incurring the reproach of great moral obliquity I may buy a thousand dollars' worth of stock at the current rate from a broker when neither buyer nor seller intends effective transfer of the stock, but merely the payment of differences when the settling day arrives. In essentials the transaction is a bet as to what the price of the stock will be on settling day. And if the buyer and the seller have the free disposal of the money which is staked on the bet, and there is no fraud, unfair dealing, or other evil adjuncts or effects of the transaction, the bet will not be morally wrong. (See BETTING; GAMBLING.) However, betting and gambling are almost always dangerous pastimes and often morally wrong. Just in the same way speculation tends to develop a passion which frequently leads to the ruin of a speculator and his family. The hope of becoming rich quickly and without the drudgery of labour distracts a man from pursuing the path of honest work. The speculator, even if he succeeds, produces nothing; he reaps the fruit of the toil of others, he is a parasite who lives by preying on the community. Moreover, in practice, the event on which the bet is laid by one who speculates in futures is seldom left to the operation of natural causes. When large sums of money are at stake the temptation to influence the course of prices becomes almost irresistible. Hence the fierce and frequent contests between "bulls" and "bears" on the Exchanges. Cliques of one party, interested to bring about a rise in prices, buy the stock in order that the increased demand may produce the effect desired. Often the buying is merely fictitious, but this fact is not known to the outside world. The purchases are published, industriously commented upon by the venal financial press, puffs and mendacious reports are inserted in the papers in order to raise the price of the stock and attract moneyed investors. The opposite party adopts the contrary, but equally immoral, tactics. They indulge in real or fictitious sales and do all they can to depreciate the stock in their favour by fair or foul means. Great financiers with command of large sums of money can and do influence the markets almost as they please, and the small speculator is usually swallowed up by them. Wealthy financiers and gigantic syndicates can often buy or obtain effective control over all the available supply of some stock or commodity and then charge monopoly prices. Such "rings", or "corners", even when they do not succeed entirely according to the intention of the operator, produce widespread inconvenience, hardship, and ruin. The result is that in practice speculation deserves all the evil reputation which attaches to the word.

Speculation indeed has its defenders and advocates, especially among brokers and jobbers, who claim that it equalizes prices and prevents the fluctuations which would otherwise be inevitable. Some affirm that speculative dealings have little appreciable effect on buying and selling for transfer. In volume and number speculative transactions are very much larger than those for effective transfer, but the two are conducted separately and to a great extent between different parties. It is asserted that the speculative market is to a large extent separate and distinct from the real market. These two arguments in favour of speculative dealings mutually destroy each other. If speculative dealings equalize prices, it cannot be true that they have little appreciable effect on the markets. As the result of the speculation depends on the actual market price of the security or commodity in question at the time agreed upon, it cannot be said that speculative transactions are independent of effective buying and selling for transfer. It is patent that the various devices to which "bulls" and "bears" have recourse do produce some effect. The acute and experienced men who devote themselves to speculative business, and who frequently have recourse to the methods described above in order to influence the market in their favour, would be the last people in the world to expend uselessly time, effort, and money. The contention, then, of producers and consumers that speculation has a disastrous effect on real business transactions seems to be well grounded. They maintain that speculators denaturalize prices. These should be regulated, and are naturally regulated, by the varying costs of production and by the mutual interaction of supply and demand; but the artificial dealings of speculators tend to fix prices without reference to those natural factors. Hence, producers and consumers are robbed by clever men, who manipulate the markets in their own interests, produce nothing, perform no useful social service, and are parasites on commerce. In Germany the Exchange Law of June, 1896, forbade gambling in options and futures in agricultural produce, and after a severe struggle with the Berlin Exchange the Government succeeded in maintaining the law. A similar law was passed in Austria in January, 1903. America and Great Britain as yet have no special laws on the matter, though more measures than one have been proposed to Congress. The great difficulty of distinguishing between transactions for effective delivery and mere time-bargains, and the ease with which positive laws on the matter could be evaded, have checked the tendency to positive legislation. In England the existing laws against gambling and fraud have been found sufficiently effective to provide a remedy for cases of special importance.

T. Slater.

Spedalieri, Nicola, priest, theologian, and philosopher, b. at Bronte in the Province of Catania, Sicily, 6 December, 1740; d. at Rome, 26 November, 1795. He studied in the seminary of Monreale, then the most flourishing in Sicily, was ordained priest, and appointed professor of philosophy and mathematics, and later of theology. At the same time he cultivated the arts of poetry, music, and painting. Disgusted at the opposition stirred up by certain theological theses, which were branded as heretical at Palermo but approved at Rome, he withdrew from Monreale to Rome (1773 or 1774), where for ten years he led a life of penury but of fruitful study and labour. However, he always retained his affection for the seminary of Monreale. In 1784 he obtained from Pius VI a benefice in the Vatican Basilica, and then ceased the efforts he had made for years to obtain a chair in the Universities of Pisa, Pavia, and Turin. His first published work was "Analisi dell' Esame critico di Fréret" ("Examen critique des apologies de la religion chrétienne", a work wrongly attributed to Fréret, really written by Naigeon), Rome, 1778. In 1779 he published "Ragionamento sopra l'arte di governare" and "Ragionamento sull' influenza della religione cristiana sulla società civile". In 1784 he issued, also at Rome, his "Confutazione di Gibbon" in which he combats the thesis of the English historian who blames Christianity for the downfall of the Roman Empire. In it, as in the Apology against Fréret, he shows especially the benefits conferred by the Christian religion on the social and political order, inasmuch as Christianity is the most powerful bulwark against despotism.

In 1791 appeared his principal work, "I diritti dell' uomo", also at Rome; this was evidently intended [illegible] a Catholic answer to the proclamation of the "Rights of Man", made in France in 1789, which was the signal for the French Revolution. Notwithstanding the hearty reception given to this work by Pius VI who said, "For a long while rulers have been asking *quid est papa*. Your book will teach them *quid est populus*", a storm of criticism and refutation burst on the head of its author. Governments took notice of it and (e. g. Piedmont) forbade its circulation. The controversy continued even after Spedalieri's death. In his book, except in certain details, the writer only expressed in the language of the eighteenth century the teaching of the scholastic doctors on the popular origin of political sovereignty, a doctrine commonly taught from St. Thomas to Suarez and Bellarmine, which does not exclude the Divine origin of the same sovereignty. Spedalieri's thesis could not prove acceptable to the absolutism of princes and the Cartesian doctrines then in vogue, which did not admit the existence of a natural moral law but made all depend on the arbitrary Will of God; much less could it please the regalists. On the other hand, it is easy to understand how his theory might give rise to a fear that it was too favourable to the ideas of the revolutionaries. Spedalieri was wrongly claimed by the Liberals as one of theirs, and if some of them accuse him of a want of loyalty when he wishes to conciliate democracy and a Divine sanction of the social order, it is because they do not understand the true nature of democracy or of the saying that all authority comes from God. The controversies about Spedalieri were renewed on the occasion of the centenary of his death. Shortly before his decease he completed a "Storia delle Paludi Pontine", a book Pius VI ordered him to write and which was published by his intimate friend Nicolai, in the work "De bonificamenti delle terre pontine" (Rome, 1800). His death was attributed to poison; a modern writer has not hesitated to lay the blame on the Jesuits, forgetting that Spedalieri's enemies were the bitterest adversaries of the Jesuits.

U. Benigni.

Spee, Friedrich von, poet, opponent of trials for witchcraft, b. at Kaiserswerth on the Rhine, 25 February, 1591; d. at Trier, 7 August, 1635. On finishing his early education at Cologne, he entered the Society of Jesus in 1610, and, after prolonged studies and activity as a teacher at Trier, Fulda, Würzburg, Speyer, Worms, and Mainz, was ordained priest in 1622. He became professor at the University of Paderborn in 1624; from 1626 he taught at Speyer, Wesel, Trier, and Cologne, and was preacher at Paderborn, Cologne, and Hildesheim. An attempt to assassinate him was made at Peine in 1629. He resumed his activity as professor and priest at Paderborn and later at Cologne, and in 1633 removed to Trier. During the storming of Trier by the imperial forces in March, 1635, he distinguished himself in the care of the suffering, and died soon afterwards from the results of an infection contracted in a hospital. He was one of the noblest and most attractive figures of the awful era of the Thirty Years' War. His literary activity belongs to the last years of his life, the details of which are little known. Two of his works were not published until after his death: "Goldenes Tugendbuch" (Golden Book of Virtues), a book of devotion highly prized by Leibniz, and the "Trutznachtigall", a collection of fifty to sixty sacred songs, which, though not free from the weaknesses of the day, take a prominent place among religious lyrics of the seventeenth century, and have been in recent times repeatedly printed and revised. But the assumption that the author in this work applied the metrical principle independent of Opitz, is at least doubtful. His principal work, through which he obtained a well-deserved and world-wide reputation, is the "Cautio Criminalis", written in admirable Latin. It is an arraignment of trial for witchcraft, based upon his own awful experiences probably principally in Westphalia, for the traditional assumption that he acted for a long time as "witch confessor" in Würzburg has no documentary authority. This work was printed in 1631 at Rinteln without Spee's name or permission, although he was doubtlessly widely known as its author. He does not advocate the immediate abolition of trials for witchcraft, but describes in thrilling language and with cutting sarcasm the horrible abuses in the prevailing legal proceedings, particularly the inhuman use of the rack. He demands measures of reform, such as a new German imperial law on the subject, liability to damages on the part of the judges, etc., which, if they had been conscientiously carried out, would have quickly put an end to the persecution of witches. Many a generation passed before witch burning ceased in Germany, the classic land of these outrages; but at all events the "Cautio Criminalis" brought about its abolition in a number of places, especially at Mainz, and led the way to its gradual suppression. The moral impression created by its publication was very great. Even in the seventeenth century a number of new editions and German translations appeared, Protestants also eagerly assisting in promoting its circulation. Among the members of Spee's order his treatise seems to have usually found a favourable reception, although it was published without official sanction, and its publication led to a correspondence between the general of the Jesuits, the provincial of the order on the Lower Rhine, and Spee himself. The general wished more exact information as to how the printing took place and expressed the suspicion that Spee, even if he, perhaps, did not directly cause it, at least allowed it, and wrote him a mild rebuke.

The earlier literature is enumerated by CARDAUNS, *Friedrich Spee* in *Frankfurter zeitgemässe Broschüren*, V, pt. 4 (1884), where the first exact analysis of the *Cautio* is given. Since then much new material has appeared in the publications of DUHR, *Die Stellung der Jesuiten in den deutschen Hexenprocessen*, published by the Görresgesellschaft (1900); DIEL, *Friedrich Spee* in *Sammlung historischer Bildnisse*, second edition revised by DUHR (1901). Valuable articles by DUHR have appeared in the *Historisches Jahrbuch der Görresgesellschaft* (1900), 328 sqq.; (1905), 327 sqq. For a good bibliography see the introduction to the latest edition of the *Trutznachtigall* by WEINRICH (1907), xxxvii sqq.

HERMANN CARDAUNS.

Speed, JOHN, VENERABLE, English martyr, executed at Durham, 4 Feb., 1593–4, for assisting the venerable martyr John Boste (q. v.), whom he used to escort from one Catholic house to another. He died with constancy, despising the inducements offered to bring him to conformity. With him was condemned Mrs. Grace Claxton, wife of William Claxton, of the Waterhouse, in the parish of Brancepeth, Durham, at whose house Boste was taken and probably Speed also. She was, however, reprieved on being found to be with child.

Spencer, THE HON. GEORGE (in religion, IGNATIUS OF ST. PAUL), Passionist, b. at the Admiralty, London, 21 Dec., 1799; d. at Carstairs, Scotland, 1 Oct., 1864. He was the youngest son of the second Earl Spencer and Lavinia, daughter of Sir Charles Bingham. From Eton he went to Trinity College, Cambridge, received Anglican orders, 13 June, 1824, and became chaplain to Bishop Blomfield of Chester, and shortly afterwards rector of Brington, Northamptonshire. In 1830 he became a Catholic and went to Rome for his ecclesiastical studies, being ordained priest there, 26 May, 1832. He returned to England fired with zeal for its conversion and laboured incessantly to procure the prayers of Catholics on the Continent for that intention. From 1832 to 1839 he worked as priest at West Bromwich, building the church at his own cost; then he was professor at Oscott till 1846, when he entered the Passionist novitiate. He was professed at Aston Hall in January, 1848. He spent the rest of his life in arduous missionary labours as a true apostle for the conversion of England. He translated the life of Blessed Paul of the Cross (London, 1860) and published many sermons.

A Short Account of the Conversion of the Hon. and Rev. G. Spencer, written by himself (Cath. Inst. Tracts, London, no date); DEVINE, *Life of Father Ignatius of St. Paul, Passionist* (Dublin, 1866); GILLOW, *Bibl. Dict. Eng. Cath.*; PURCELL, *Ambrose Phillipps de Lisle.*

EDWIN BURTON.

Spenser, JOHN (*alias* HATCLIFFE and TYRRWHIT), b. in Lincolnshire, 1601; d. at Grafton, 1671. He was converted while a student at Cambridge, and entered the Society of Jesus in 1627. After having professed moral theology at Liège, 1642, and also having served the arduous "Camp Mission", he returned to England and partook, Whitsuntide, 1657, in a conference, much spoken of at the time, with two Anglican divines, Dr. Peter Gunning and Dr. John Pearson, afterward Bishops of Ely and Chester. All the disputants, including Spenser's Catholic colleague, Dr. John Lenthall, M.D., were Cambridge men, and may have known one another. An account of the conference was published in Paris, 1658, under the title, "Schism Unmasked", probably by Spenser. He also wrote: "[Thirty-Six] Questions propounded to the Doctors of the Reformed Religion" (Paris, 1657); "Scripture Mistaken" (London, 1660); and other books which won him a high name as a controversialist. At the time of his death he was chaplain to the Earl of Shrewsbury.

J. H. POLLEN.

Spenser, WILLIAM, VENERABLE, English martyr, b. at Ghisburn, Yorkshire; executed at York, 24 September, 1589. His maternal uncle, William Horn, who signed for the Rectory of Cornwell, Oxfordshire, in 1559, sent him in 1573 to Trinity College, Oxford, where he became Fellow in 1579 and M.A. in 1580. There, convinced of the truth of Catholicism, he used his position to influence his pupils in that direction; but he delayed his reconciliation till 1582, when, with four other Trinity men (John Appletree, B.A., already a priest; William Warford, M.A. and Fellow, afterwards a Jesuit; Anthony Shirley, M.A. and Fellow, afterwards a priest; and John Fixer, B.A., afterwards a priest), he embarked from the Isle of Wight, and landed near Cherbourg, arriving at Reims, 2 November. Received into the Church five days later, he was ordained sub-deacon and deacon at Laon by the bishop, Valentine Douglas, 7 April, 1583, and priest at Reims by the Cardinal Archbishop de Guise, 24 September, and was sent on the mission 29 August, 1584. He effected the reconciliation of his parents and his uncle (the latter was living as a Catholic priest in 1593), and afterwards voluntarily immured himself in York Castle to help the prisoners there. He was condemned under 27 Elizabeth, c. 2, merely for being a priest. With him suffered a layman, Robert Hardesty, who had given him shelter.

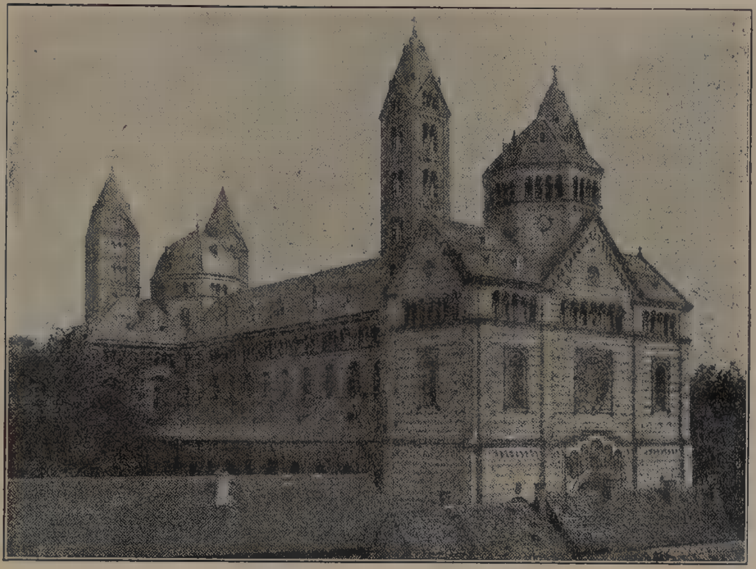
JOHN B. WAINEWRIGHT.

SEAL OF THE CITY OF SPEYER

Speyer, DIOCESE OF (SPIRA), in Bavaria. The city dates back to the stronghold of Noviomagus, in the territory of the German tribe of the Nemetes, on the left bank of the Rhine. In the course of time a Roman municipality (*Colonia Nemetum*) developed out of this stronghold; in 451 the municipality was entirely destroyed by Attila. From its ashes arose a new city, Spira or Speyer. Christianity found entrance into the city in the time of the Romans. The first bishop, Jesse (Jessius), is mentioned in the Acts of the Synods of Sardica (343) and of Cologne (346), but his historicity is not quite certain. On the other hand there is positive proof of Bishop Hilderich who attended the Synod of Paris held in 614. Since his episcopate the succession of bishops has been unbroken. In 748 Speyer was made suffragan of Mainz; and in 1030 the first stone of the present Romanesque Cathedral of Our Lady was laid; it was intended to be the mausoleum of the Salian emperors. In the struggle over investitures, Bishops Huzmann (1073–90) and Johann I (1090–1104) upheld the Emperor Henry IV and died under the ban of the Church. In 1146 St. Bernard preached the

Crusade at Speyer and won King Conrad III to the cause. Besides the four Salian emperors, Philip of Swabia, Rudolph of Habsburg, and the rival kings, Adolph of Nassau and Albert of Austria, are also buried in the cathedral. A lay brotherhood, the Twelve Brothers of Prayer, prayed without intermission in the cathedral, for the repose of the souls of these kings. Among the later bishops Matthias of Ramung (1464–78) should be especially mentioned for his reforming the clergy and people, and bringing new life into the diocese.

At the time of the Reformation several Diets were held at Speyer, the most important being in 1526 and 1529. In 1526 the condition of political affairs enabled the Protestants to secure the relatively favourable decision that each constituent state should act in reference to the matters contained in the Edict of Worms (1521) as it could answer to God and the emperor. But the action taken in 1529 was more decided: the Edict of Worms was to be executed, and the ecclesiastical innovations were to be abolished. Against this the Evangelical constituents protested. By the Reformation the diocese lost two thirds of its churches and benefices. Bishop Eberhard von Dienheim (1581–1610) sought to introduce the reforms ordered by the Council of Trent in the remaining territory. The gains temporarily acquired during the Thirty Years' War were nearly all lost by the Treaty of Westphalia (1648). The diocese suffered greatly during the predatory wars of Louis XIV of France, and in 1689 the city and cathedral were burned. In 1794 the cathedral, which had been restored at great expense, was once more ravaged by the lawless soldiery of the French Revolution. In 1801 that part of the diocese on the left bank of the Rhine had to be ceded to Mainz; in 1815 the diocese was assigned to Bavaria; in 1817 it received new boundaries in the Bavarian Concordat and was made suffragan of the new metropolitan Bamberg. By the liberality of King Louis I of Bavaria, the cathedral was suitably decorated (1846–53), the frescoes being done by Schraudolph. The area of the diocese corresponds to that of the Bavarian Palatinate of the Rhine. Dr. Michael Faulhaber, formerly a professor at the University of Strasburg, was appointed bishop in 1910. The diocese has 12 deaneries, 235 parishes, 6 curacies, 86 chaplaincies and vicarships, 377 secular clergy, and 10 regular clergy. The Catholic population is 413,481; the Protestant population is about 500,000. The diocese has also 1 Dominican monastery (Oggersheim), 1 Capuchin monastery (St. Ingbert), and 100 houses for nuns.



The Cathedral, Speyer
Begun in 1030; destroyed by French Soldiery in 1794; restored in the XIX Century

Klemens Löffler.

Speyer, Johann and Wendelin von, German printers in Venice from 1468 to 1477. They were among the first of those who, after 1462, left Mainz for Italy to introduce there the art of printing books. We have scant knowledge of their lives. They came originally from Speyer (capital of the Bavarian palatinate). Early in 1460–61 Johann appears in Mainz as a "goldsmith"—it was there, no doubt, that he learned the art of printing books. In 1468, with his wife, children, and brother Wendelin, he set out for Venice. The establishment of their printing house, the first in Venice, took place under the most favourable auspices. The Venetian Senate extended a cordial welcome to Johann, and granted him a full monopoly of printing for five years. His first book, Cicero's "Epistolæ ad familiares", appeared in 1469. During the printing of Augustine's "De Civitate Dei" (1470) Johann died, and Wendelin completed it. The latter assumed control of the business after the death of Johann and carried it on successfully until 1477. About 1472 he associated with him the German printer, Johann von Köln. Together they issued seven works. Besides their great skill as printers, their extraordinary industry is worthy of note. Before Johann died, four great works had been issued: two editions of Cicero; Pliny; and one volume of Livy. The "De Civitate Dei" had been begun. Within seven months eight hundred volumes were printed.

From 1470 to 1477 Wendelin issued over seventy great works (Italian and Roman classics, Fathers of the Church, jurists, etc.). Johann printed in an antique type modelled after the best Italian manuscript writing, beautiful, and carefully cut. It is decidedly superior to the later antique type, which deteriorated through desire to save space, and it is almost equal to the beautiful type of Jenson. Johann's clear type and his entire technical execution are surprisingly perfect. In addition to this first type, Wendelin used five newly cut types of exquisite workmanship, among them three slender Gothic models, probably reduced to save space. His work showed the same correctness of text, beauty of printing, and evenness that had characterized Johann's. The latter was the first printer to number the leaves with Arabic figures, and was also the first who used the colon and interrogation point. In Wendelin's books appeared for the first time the so called catch-words (*Kustoden*), that is to say he printed on the lower margin of each page the first word of the page following.

Denis, *Suffragium pro J. de Spira* (Vienna, 1794); Brown, *Venetian Printing Press* (London, 1891); Ongania, *Art de l'imprimerie à Venise* (Venice, 1895–6); Hartwig and others, *Festschrift zum 500 jähr. Geburtstage von Johann Gutenberg* (Mainz, 1900), 342.

Heinrich W. Wallau.

Spillmann, Joseph, author, b. at Zug, Switzerland, 22 April, 1842; d. at Luxemburg, 20 February, 1905. He attended the primary school and *gymnasium* of his native town, but feeble health necessitated his leaving his studies and devoting himself to his father's business. At the age of sixteen he resumed his interrupted studies at the Jesuit college of Feldkirch. Having entered the Jesuit novitiate at Gorheim (1862), he was sent, during the Franco-Prussian War (1870), to France, to nurse the sick. Two years later, when his order was banished from Germany, he went to England to complete his theological studies, and in 1874 was ordained priest. The life work of Spillmann, who had already shown his poetical gift in his contributions to "Der Hausfreund" (a calendar published by Father Pachtler in 1872), was clearly marked out for him. He was appointed collaborator on the "Stimmen aus Maria-Laach" (founded in 1871) and the "Katholische Missionen" (founded in 1873).

Spillmann's fruitful literary activity resulted chiefly from his connexion with these periodicals, especially the "Katholische Missionen", which he edited from 1880 to 1890. From his "Beilagen für die Jugend" grew seven portly volumes of "Reisebilder", while twenty-one booklets, "Aus fernen Landern", owe their origin to the same source; these consisted of edifying and tastefully illustrated stories for the young, with whom they have become favourites, as the numerous editions and translations prove. His comprehensive "Geschichte der Katholikenverfolgung in England von 1535–1681" began with articles in the "Stimmen aus Maria-Laach", was continued in the supplements to this periodical, and was completed in five large volumes. For the calendar, the "Hausfreund", which was given up in 1881, Spillmann wrote many stories; these were afterwards collected under the title "Wolken und Sonnenschein", eight pretty stories for the young which have been frequently republished and translated into other languages. Spillmann also wrote seven longer romances, the first (Die Wunderblume von Woxindon) appearing in 1893; and the last (Der schwarze Schumacher) ten years later; they are written in the style of his favourite authors, Sir Walter Scott and Charles Dickens. An eighth romance was sketched, but a serious illness prevented its completion. Spillmann's importance arises chiefly from his works for the young.

In addition to the necrologies in various newspapers and periodicals, see Baumgartner in *Stimmen aus Maria-Laach*, LXIX, 1–22.

N. Scheid.

Spina, Alfonso de, Spanish Franciscan, date of birth unknown; d. about 1491. A convert from Judaism, he was for many years superior of the house of studies of the Friars Minor at Salamanca, and in 1491 was created Bishop of Thermopylæ in Greece. He was a man of great learning and attained considerable renown as a preacher, but his chief title to fame is the work entitled "Fortalitium Fidei" which Mariana (lib. XXII "De rebus Hispan.", c. xlvi) describes as "opus eruditum, splendido titulo, voce barbara, et divinarum rerum cognitione præstanti". As appears from the text, this work was written in 1458, but it was added to by the author at different times up to the year 1485. The first edition was issued about 1464–76; the edition published at Nuremberg in 1485 begins thus: "Incipit prohemium Fortalitii Fidei conscriptum per quendam Doctorem eximium ordinis minorum anno MCCCCLIX in partibus occidentis." The fact that the "Fortalitium Fidei" appeared anonymously gave rise to some difference of opinion as to its authorship. The reason why the work is included in the "Scriptores O.P." is that one edition of it appeared under the auspices of Gulielmus Totani, O. P., for its author was undoubtedly a Franciscan, as Echard himself notes (Script. Ord. Præd., ed. 1721, II, 61), and modern scholars are practically unanimous in attributing it to Alfonso de Spina. The "Fortalitium Fidei" deals with the different kinds of armour to be used by preachers and others in their warfare against the enemies of the Christian religion. It is divided into five books, the first directed against those who deny the Divinity of Christ, the second against heretics, the third against the Jews, and the fourth against the Mohammedans, while the fifth book treats of the battle to be waged against the Gates of Hell. In this last book the author dwells at length upon the demons and their hatred of men, the powers they have over men and the diminution of these powers, owing to the victory of Christ on the Cross, the final condition of the demons, etc.

Besides the "Fortalitium", Alfonso de Spina published at least three other works: (1) Sermones de Nomine Jesu Vigintiduos, issued about 1454 (erroneously confounded with the "Fortalitium" by Oudin); (2) "Sermones plures de excellentia nostræ fidei", preached in 1459; (3) a treatise on fortune, dedicated to John, King of Castile (1404–54).

Paschal Robinson.

Spina, Bartolommeo, Scholastic theologian, b. at Pisa about 1475; d. at Rome, 1546. He joined the Dominican Order at Pisa about 1494. Having taught for many years in the schools of his order, he was appointed (1536) by the Venetian Senate to the chair of theology at Padua. He was also for a time *socius* of the master-general of his order, and prior provincial of the Holy Land. In July, 1542, he was made Master of the Sacred Palace by Paul III, and during the four years that he discharged the duties of that office he rendered great services to the Holy See and to the Fathers of the Council of Trent, regarding many difficult and mooted questions. From the year 1518 Spina was engaged in a heated controversy with his famous confrère, Cardinal Cajetan. Still more harsh was his opposition to Ambrose Catharinus, whom he denounced as guilty of heresy to Paul III about the beginning of the year 1546. The most important of Spina's works are: "Tutela Veritatis de Immortalitate Animæ contra Petrum Pomponatium" and "Flagellum in Tres Libros Apologiæ Pomponatii de Immortalitate Animæ", both published in 1518. Of special interest are also "Tractatus de Stringibus et Lamiis" (Venice, 1523), and "Apologiæ Tres adversus Joann. Franc. Ponzinibium Jurisperitum" (Venice, 1525). These last two works were also published at Rome in 1576. In his treatise "De Conceptione B. Mariæ Virg." (Venice, 1533), Spina opposed the doctrine of the Immaculate Conception.

Chas. J. Callan.

Spinola, Christopher Royas de, Bishop of Wiener-Neustadt, b. of a noble Spanish family, near Roermond in Gelderland in 1626; d. at Wiener-Neustadt, 12 March, 1695. Educated at Cologne, he entered the Franciscan Order at that place and for some time taught philosophy and theology. Going to Spain, he was made provincial of his order, and in 1661 accompanied Margaret Theresa, the first wife of Emperor Leopold I, to Vienna, where he became one of the emperor's influential diplomats. He was appointed titular Bishop of Knin in Dalmatia in 1668 and Bishop of Wiener-Neustadt, 19 January, 1686. In his endeavours to bring about a reunion between Protestants and the Catholic Church he had the support of Leopold I. His negotiations with well-known Protestant theologians, such as Molanus, Callistus, Leibniz, etc., and various Protestant courts, especially Hanover and Brandenburg, were encouraged by Innocent XI, and in 1683 led to a conference of Protestant theologians to whom Spinola submitted his plan of reunion. The plan was apparently approved by the Protestant theologians, but French influence and Spinola's too liberal concessions induced Innocent XI to take no action. On 20 March, 1691, the emperor appointed Spinola commissary-general of the movement for ecclesiastical reunion in Austria-Hungary. The extreme concessions which he now made to the Protestants of Austria-Hungary, such as Communion under both species, freedom for priests to marry, Mass in the German language, and suspension of the Tridentine decrees until a new council was held, were rejected by Rome.

Michael Ott.

Spinoza (d'Espinosa, Despinoza), Benedict, b. at Amsterdam, 24 Nov., 1632; d. at The Hague, 21 Feb., 1677. He belonged to a family of Jewish merchants of moderate means, and was originally called Baruch, a name that he later translated into its Latin equivalent Benedict. His father's name was Michael, his mother, Michael's second wife, was called Hana Debora. In 1641 Michael married a third wife who was named Hester de Espinosa. The family probably had some connexion with the little town of Espino in Spanish Galicia, and with the celebrated Marrano family there called Espinosa. (The Marranos were Spanish Jews compelled to conform outwardly to Christianity.)

Benedict Spinoza

Baruch attracted attention in the school for Portuguese Jews at Amsterdam by his talents and application to study. He made rapid progress in Hebrew and the study of the Talmud, and his teachers, especially Rabbi Saul Levi Morteira, had the greatest hopes of his future. It was intended that he should become a rabbi. The subtle methods of the teachers of the Talmud undoubtedly trained his intellect and led it particularly to reasoning by analogy. The moral teaching of the Haggada had a great and permanent influence upon his code of living. However, the difficulties in regard to the Scriptures, which he deduced from what he read, made a stronger impression upon him than their solutions. Thus he was a troublesome and critical pupil, although at the same time a modest one. He read and despised the Cabalists; yet traces of their influence are recognizable in his philosophy; mention should here be particularly made of the book called "Zohar" and of Herrera's work "Porta cœli". He studied industriously the Jewish writers on the philosophy of religion, especially Maimonides, Gersonides, Chasdaí Kreskas, and Ibn Esra, and later adopted much from them. The writings of the Arabian philosopher Al Farabi and of his commentator Ismail show striking similarities, even in the smallest details, with the later system of Spinoza. There are also clear evidences of connexion between the strange work of Ibn Tofaíl, the story of "Hai Ibn Joktan", and the conceptions of Spinoza.

About 1651 Spinoza, unable to see his way clearly, seems for a short time to have abandoned metaphysical studies, and to have fought a hard battle with his passions. Even at this time he was looked upon with suspicion by orthodox Jews. He now devoted himself to the natural philosophy of Descartes. Coming back in this way to metaphysics, he completely overcame the scepticism, and, resuming his first studies, began to lay the foundation of his new system. The philosophy of Descartes aided him in recasting the notions which he had previously acquired. After the death of his father in 1654, Spinoza was almost completely cast off by his family and, having no means, taught in the private Humanistic school of the ex-Jesuit and freethinker Franz van den Enden. Here he perfected himself in Latin and continued his philosophical investigations by the study of St. Augustine, the Stoics, Scholasticism (in a somewhat superficial manner), the philosophy of the Renaissance and that of some modern writers, especially of Hobbes. His later psychology shows extraordinary similarities with the teachings of Marcus Marci and of Glisson.

Spinoza now frequented almost exclusively the society of Christians, i. e. of the free-thinking sort, and especially of Mennonites. His lifelong friendships, as known from his letters, date in part from this period. In 1656 he was formally expelled from the Jewish community and soon afterwards from Amsterdam. A somewhat legendary attack upon his life is said to have been made about this time. He never became a Christian. He now began to dictate in Latin some of the principles of his philosophy to a company of pupils at Ouderkerk near Amsterdam. A Dutch translation of this dictation exists in two manuscripts which were discovered in 1853 and 1861 by Friedrich Muller, a Dutch bookseller. The translation as found in these manuscripts had been largely revised, had notes that were traceable, however, to Spinoza himself, and had been somewhat unskilfully handled by an editor. Since the discovery the manuscripts have been published a number of times both in the original text and in translations. The characteristics of the later system of the "Ethics" are evident in this "Korte Verhandeling van God, de Mensch, en deszelos Welstand". But neither the doctrine of the one and only Divine substance, nor the higher unity of "extension" and "thought" in the infinite and the finite, nor the instinct of self-preservation, is clearly expressed in it. Spinoza, obliged to seek some other means of support, became a very skilful grinder of lenses; his work commanded good prices. About 1660 he retired to the village of Rijnsburg near Leyden. The little house in which he lived still stands, and has been bought by admirers of the philosopher; it contains a fine library. Here Spinoza devoted himself to a revision of the "Korte Verhandeling" which was never completed. The result of these labours was an important unfinished treatise "De intellectus emendatione", with preparations for his great work, the "Ethics", and the development of the "geometrical method". While at Rijnsburg he was greatly stimulated in his work by the reports of the lectures of the professors of philosophy of Leyden (among whom should be included Geulincx), which were brought to him by students of the university. While at this village he also became acquainted with the celebrated Stensen, and had here a pupil named Casearius, whom he instructed in the Cartesian philosophy. In 1663 Spinoza published a book under his own name called "Renati des Cartes principiorum philosophiæ Pars I et II, more geometrico demonstratæ", and a supplement to this under the title, "Cogitata metaphysica". The work does not give Spinoza's own philosophy, but glimpses of his views may be found in it.

While at Rijnsburg Spinoza also taught by correspondence some young friends at Amsterdam who had formed a Spinoza club. In the spring of 1663 he moved to Voorberg, near The Hague. His acquaintance with scholars and statesmen increased. He was witty, was esteemed as a great Biblical critic and mathematician, and had the reputation of possessing a fine political sense. Jan de Witt and van Beuningen held him in high regard. Huygens interested himself in Spinoza's lenses. Great expectations were expressed of his philosophy by Heinrich Oldenburg of Bremen, who had visited Spinoza at Rijnsburg and now, in connexion with Robert Boyle, was active in London as the secretary of the Royal Society, and by the learned Ludwig Meyer. While living at Voorburg Spinoza worked hard on a lengthy treatise to which he later gave the title of "Tractatus theologico-politicus". He drew largely for this work from the Arabian and Jewish philosophy of religion and from the old rabbinical exegesis. But his main sources were early, little-known Jewish heretics and obscure Christian writers of his own time, especially Peyrère's "Systema theologicum ex Præadamitarum hypothesi" (1655). Spinoza's political views were largely inspired by Jan de Witt and his friends; the same opinions are to be found in the writings of other Dutch political writers of the same period, e. g. van Hove. Spinoza, however, in publishing his treatise, had special aims in view. It was intended to establish and enlarge the ecclesiastical and political principles of Jan de Witt and at the same time to lead the way to the publication of his own philosophy. According to Spinoza the Holy Scriptures of the Old Testament are not without error and are not inspired in the strict sense. They do not teach us with certainty as to the nature of God and His characteristics, but only concerning obedience to God, piety, and love. Consequently the text of the Bible can never come into conflict with philosophy and civil law. But, according to Spinoza, the limitations of philosophy and law are also clearly defined. As it is only in the State that justice and law, injustice and transgression are conceivable, the individual, in order to be able to live according to reason, must surrender his rights to the community. Then, too, he must obey the government in everything, even against his reason and conviction, unless a command contradicts universal feeling, as the murder of parents. Freedom of thinking and speaking, however, cannot be forbidden by the State; if it has the power to do this, the right, indeed, cannot be denied it, but the prohibition would be disadvantageous to it, because its own existence would be endangered by such tyranny. No man can ever act according to his convictions, if a law of the State stands in the way. Thus Spinoza upholds only a partial freedom of conscience. On the other hand the government has the right to supervise the external practice of religion. It is easy to understand that the Church councils and synods of Holland took energetic measures against this work, which appeared anonymously in 1670. Up to 1676 at least thirty-seven decisions or edicts against the work had appeared.

From 1670 Spinoza lived at The Hague, at first in the Verkade, then not far from this spot in the Paviljoensgracht, near the monument erected in 1880. Both houses are still in existence, but the latter, in which Spinoza died, has lately been completely rebuilt. The philosopher laboured with zeal on his great work; in order to be independent and undisturbed in elaborating his system of philosophy he declined a call to a professorship at Heidelberg. His plan to publish his system of ethics in 1675 failed, owing to the opposition of his enemies. Originally Spinoza seems to have had the intention to found a kind of philosophical world-religion. He believed that the basic ideas of his view of the world were to be found among the old Hebrews, in Christ, and in St. Paul. In his opinion this philosophy, without the Holy Scriptures, sufficed for the truly wise. In order to understand his conception of the original Christianity it must be remembered that his acquaintance from the beginning had been among latitudinarian Christians, who emphasized the moral life, not dogma, that, with many of his Christian friends, he regarded the Antitrinitarians as the most genuine Christians, that he found traces of his philosophy in the writings of Christian mystics, and finally that among the first writings which had introduced him to Christianity had been Hobbes's books "De cive" and "Leviathan". Towards the end of his life Spinoza had bitter disappointments, which, however, seldom disturbed his stoical composure. He lived tranquilly at The Hague in the midst of his work, his correspondence, and his friends. He began an exceedingly interesting political treatise in which he did not change his earlier views but rather carried them further. He also wrote a short treatise on the rainbow, and a Hebrew grammar, and, as it seems, translated the Pentateuch. He was a victim to the disease from which his family suffered, consumption, and this was aggravated by his work in grinding lenses. He died peacefully, in the presence of a physician who was a friend. Even the other people in the house did not know he was dying. The little he left was, as it were, a mirror of his life. Spinoza was a very frugal and unselfish man. He declined all money and pensions that he did not absolutely require. His way of living could not be simpler; it was only for books that he spent relatively large sums. The virtues which he most highly prized and consistently practised were control of the feelings, equability of spirit, love of country, loyalty and industry, moderation and love of the truth. In society he was animated and witty; he enjoyed being alone, and yet was kindly disposed towards his fellow men. Union with God, as he conceived of the Deity, i. e. as a thinking and infinite, necessarily existing, immanent cause of all existence, and love for this Being were to him the highest of all things. He was immovably convinced that his was the true philosophy, could scarcely understand any view that deviated from his own, was hard and unjust in his judgments of other thinkers, was not easily approached with objections, and was incapable of appreciating with historical objectivity other views of the world.

In 1677 his literary remains were published under the title "B. D. S. Opera posthuma". In this publication were included his system of ethics, the unfinished political tractate, the treatise "De emendatione intellectus", letters to and from him, and lastly his compendium of Hebrew grammar. The Dutch translation of the same year has great critical value. The tractate on the rainbow was first published anonymously in Dutch at The Hague in 1687. The problems added for the calculus of probabilities are not by Spinoza. The philosopher seems to have destroyed his translation of the Pentateuch; the Spanish apology which he drew up when expelled from the synagogue has not, so far, been found.

It is impossible to describe in a short article the Spinozistic system as a whole. For it is just the rigidly unified, minute construction of that system and the labyrinth of its thought processes that are of importance for the history of philosophy as an original creation. On the other hand, the elements, bases, and individual results are neither new nor original. Spinoza's view of the world is so constructed that the final results can be reached with equal logic from its epistemological and psychological assumptions, and from its ethical and metaphysical axioms. The view of Spinozism held by the present writer, which frequently varies from the views formerly held, can merely be indicated in what follows.

According to Spinoza there are no universal notions. Only that is thinkable which actually exists or will exist at some time. Further, only the necessary is thinkable. Existence and necessity, however, cannot be deduced from the nature of finite things; we must therefore conceive of a Being (God) necessarily existing and necessarily acting, from which all else follows of necessity. This Being is not the cause but the first principle in the manner of mathematical entities; the things come from it by mathematical sequence; for only in this way, says the philosopher, can the immutability of the first principle be maintained, only thus is a relation of the infinite to the finite thinkable; and only in this way is the unity of nature preserved, without fusing the substance of God with that of finite things. Yet the axiom "God=Nature" is valid because the things necessarily following from the Being of God belong in some way to God. Only the Being of God is independent; Spinoza calls this Being alone substance. All things (*modi*) must be founded in the attributes of God. This is one approach to Spinozism.

Another is the following: Spinoza observed in nature, on the one side, only systems of motion and rest which were derived from one another in an endless series of causes and effects; on the other side, running exactly parallel to these, but not influenced by them, a series of ideas. These systems of motion and ideas cannot be understood of themselves alone, but only with the aid of the notions of extension and thought, and these two notions contain in themselves the characteristic of infinity. Thus we are brought to a necessarily existing Being on whom all other beings must depend in their existence and nature. The facts of experience, as *conditio sine qua non*, lead us to the knowledge that the change which we observe can only be explained by an instinct of self-preservation existing in all things, which constitutes their individual nature. This instinct, then, is the relative factor in the scientific construction of ethics and politics. The Absolute, which corresponds to it and establishes it, consists of the immanently working, countless attributes of the universal substance. This is the second approach to Spinozism.

We now come to a third: Scepticism is completely overcome only when the idea is nothing else than the objective side of the process of movement which is identical with it under another point of view. Only then does the succession of things fully coincide with the succession of ideas. Thus truth and certainty are the same. The fact that there are ill-defined and false ideas can, accordingly, only be explained in that these ideas, so far as they do not prove themselves to be arbitrary combinations and fictions, are merely part-knowledge. Such part-knowledge, however, signifies that the one with such knowledge is in some sense part of an absolute intelligence. Therefore the part-extension identical with and corresponding with the part-knowledge is only a part of an infinite and indivisible extension. Consequently, in the infinite also, extension and thought are, absolutely considered, identical; as relative things they are different. Applied to ethics this doctrine signifies that good and evil have meaning only from the point of view of an incomplete part-knowledge; applied to politics it sets up for the individual life the axiom right is might, and ascribes to the State the creation of right.

Lastly, ethics as a doctrine of happiness, which is really Spinoza's starting-point, leads to the same result. His main question was, how is perfect happiness possible? Now he could only conceive of perfect peace and happiness on the supposition that all earthly happenings proceed as the necessary consequence of the nature of the absolutely infinite Being; whoever recognizes this and rests lovingly in this knowledge enjoys perfect peace. The aim of life is to attain this knowledge *cognitio sub specie æternitatis*. From this opinion, however, it follows necessarily that the individual acts of knowledge proceed in some manner from God's own thought (the soul therefore is no substance), that the nature of the individual soul is an individual instinct towards perfection (*conatus in suo esse perseverandi*—in order to preserve the continuity of all self-consciousness), that evil proceeds from a lack of adequate knowledge, that the material is only another side of the spiritual, because otherwise Spinoza would have had to suppose a second source of evil besides imperfect knowledge.

These statements show also the way in which Spinoza can be refuted. It must be shown that God's unchangeableness does not involve the necessity of all Divine action; it must be proved that the dependence of the finite upon the infinite does not demand a counter-relation in the infinite, and that there is a metaphysic world of pure possibility and universal conceptions. Further, it must be shown that an objectively true knowledge is possible, even though the order of ideas does not run strictly parallel to the order of things, and though the two orders are not identical. The positive contradictions of this identity in the finite must be revealed, and it must be shown that in the Spinozistic psychology the continuity of self-consciousness, notwithstanding the instinct of self-preservation, is destroyed, and that the part-knowledge of Spinoza, with the system of happiness built upon it, involves an impenetrable mystery and therefore is untenable as a philosophical view of the world. Some friends and later admirers of Spinoza thought they could combine his philosophy with Christianity. A hopeless attempt in this direction is made in the introduction to the "Opera posthuma" written by Ludwig Meyer. Jarrig Jellis, Spinoza's friend, also exerted himself to bring Spinozism and Christianity together. More ingenious and profound but also exceedingly sophistical is the treatise issued anonymously in 1684 by Abraham Cuffeler, "Specimen artis ratiocinandi naturalis et artificialis ad pantosophiæ principia manuducens". A number of writers leave one in doubt as to whether they did not use Christianity merely as a cloak. Others, e. g. Bredenburg, and Wittich in his "Anti-Spinoza", adopted only individual principles of Spinozism. When in the second half of the eighteenth century the reputation of Spinoza was again revived both in Germany and France simultaneously, the effort was once more made to reconcile Spinozism and Christianity. Mention might here be made of Heydenreich, Herder, and Sabatier de Castres.

That in the present time Spinoza has again become very modern is traceable to nine reasons: his criticism of the Scriptures, his doctrine of free-thought, his theory of the State as the source of right, his doctrine of happiness founded on necessity, his doctrine of morals dissociated from positive religion, his axiom *Deus sive Natura* and the justification of this axiom, his conception of the identity of thought and movement in the Absolute, his distinction of absolute and relative knowledge, finally his realism in the theory of knowledge to which many modern philosophers are returning.

The bibliography prepared by VAN DER LINDE extends only to 1871. It has been partially supplemented by GRUNWALD, *Spinoza in Deutschland* (Berlin, 1897), by WEG, *Katalog 29* (Leipzig, 1893), which contained the collection of works on Spinoza that had been sold for America, and by the Katolog "Spinoza", No. 598 (Frankfort, 1912). The relatively best but in no way complete edition of his works is that of VAN VLOTEN AND LAND (2nd ed., The Hague, 1895). Of this publication the "Ethics" alone has appeared in a third edition (1905). English translations of Spinoza, omitting the defective one of WILLIS, are: FULLERTON, *Ethics* (New York, 1894), HALE WHITE and HUTCHINSON STIRLING (3rd ed., London, 1899); this edition includes also the *De intellectus emendatione;* ELWES has edited the chief works (London, 1883–84), but with the letters freely abridged; GILLINGHAM ROBINSON, *Korte Verhandeling* (Chicago, 1909), defective, see below Wolf. An excellent translation into Dutch of all the works of Spinoza is that of MEYER (Amsterdam, 1897–1905); the best French translation is that of APPUHN (Paris, 1907–09), the correspondence and the theologico-political and the political treatises have yet to be published. Among the German translations should be mentioned the one made for the Philosophical Library by BÄNSCH, BUCHENAU, and GEBHARDT. An excellent facsimile edition of all the letters was issued by MEIJER in numbered copies at The Hague. A facsimile of the notes in handwriting to the theologico-political treatise was published by ALTKIRCH in the journal *Ost und West* (1901).

FREUDENTHAL, *Die Lebensgeschichte Spinozas in Quellenschriften, Urkunden und nichtamtlichen Nachrichten* (Leipzig, 1899). and *Spinoza I, Das Leben Spinoza* (Stuttgart, 1904). A quantity of new material is in MEINSMA, *Spinoza en zijn Kring* (The Hague).

1896). The youth and development of Spinoza is described in detail by Dunin-Borkowski, *Der junge De Spinoza, Leben u. Werdegang im Lichte der Weltphilosophie* (Münster, 1910).

Other biographies which also contain expositions of the ethical system are: Pollock, *Spinoza, His Life, and Philosophy* (2nd ed., London, 1899); Willis, *B. de Spinoza, His Life, Correspondence and Ethics* (2nd ed., London, 1870); Kuno Fischer, *Spinozas Leben, Werke und Lehre* (5th ed., Heidelberg, 1909); Couchoud, *Benoît de Spinoza* (Paris, 1902); Brunschvicg, *Spinoza* (2nd ed., Paris, 1906). Wolf has lately issued an English translation of the *Korte Verhandeling*, with a life of Spinoza (London, 1910).

There are innumerable presentations of Spinoza's theories; among those of earlier times the works of Boulainvilliers, Jacobi, the two Sigwarts, Trendelenburg, and Boehmer are very readable. Later works are: Martineau, *A Study of Spinoza* (2nd ed., London, 1899); Caird, *Spinoza* (cheap ed., London, 1903); Joachim, *A Study of the Ethics of Spinoza* (Oxford, 1901); Duff, *Spinoza's Political and Ethical Philosophy* (Glasgow, 1903); Picton, *Spinoza, a Handbook to the Ethics* (London, 1907); Camerer, *Die Lehre Spinozas* (1877); *Spinoza und Schleiermacher* (Stuttgart, 1903); Windelband in his history of modern philosophy. Very important for Spinoza's teaching is Brunner, *Die Lehre von den Geistigen und vom Volke*, I, pt. II (Berlin, 1908).

Of other important monographs there can only be mentioned: Fullerton, *On Spinozistic Immortality* (Philadelphia, 1899); Delbos, *Le problème moral dans la philosophie de Spinoza* (Paris, 1893); Worms, *La morale de Spinoza* (Paris, 1891); Rivaud, *Les notions d'essence et d'existence dans la philos. de Spinoza* (Paris, 1906); Léon, *Les éléments Cartésiens de la doctrine Spinoziste* (Paris, 1907); Freudenthal, *Spinoza und die Scholastik* (Leipzig, 1887), 83, 138, one of the philosophical essays dedicated to W. Zeller; Ludwig Stein, *Leibniz und Spinoza* (Berlin, 1890); Joel, *Beiträge zur Geschichte der Philosophie* (2 vols., Breslau, 1876), important for the history of the development of Spinoza; Baltzer, *Spinozas Entwicklungsgang* (Kiel, 1888); Volkelt, *Pantheismus und Individualismus im System Spinozas* (Leipzig, 1872); Zulawski, *Das Problem der Kausalität bei Spinoza* (Berne, 1899); Gebhardt, *Spinozas Abhandlung über die Verbesserung des Verstandes* (Heidelberg, 1905); Zeitschel, *Erkenntnislehre Spinozas* (Leipzig, 1889); Richter, *Der Willensbegriff in der Lehre Spinozas* (Leipzig, 1898); Busolt, *Die Grundzüge der Erkenntnistheorie und Metaphysik Spinozas* (Berlin, 1875); Becher, *Der Begriff des Attributs bei Spinoza* (Halle, 1905). There are also a large number of more or less valuable essays in the *Revue de Métaphysique et de Morale*, from 1900 in the *Année philosophique;* also in the *Archiv für Geschichte der Philosophie*, in *Zeitschrift für Philosophie und philosophische Kritik*, in *Vierteljahrsschrift für wissenschaftliche Philosophie;* also several in *Mind*, in *Navorscher*, in *Oud-Holland*, in *Tijdschr. voor Wijsbegeerte*, in *Revue philosophique*, in *Stimmen aus Maria-Laach*, especially vol. LXXIX, 521 sq., and in the *Studiën of Godsdienstig, wetenschappelijk en letterkundig gebied*, no. 48, 460 sqq.

Stan. Dunin Borkowski.

Spire (A. S. *spir*, "a stalk", "shoot"), a tapering construction, in plan conical, or pyramidal, or octagonal, or hexagonal, crowning a steeple or tower, or surmounting a building, and usually developed from the cornice; often pierced by ornamental openings and, where there were ribs, enriched with crockets. Sometimes an open lantern was interposed between the steeple, tower, or roof and the spire. On the Continent the architects aimed to make the steeple and spire one, merging them into each other, while in England they openly confessed it was a separate structure by masking its point of origin behind a plain or pierced parapet, or ornamental battlements. A spire properly belongs to Pointed architecture and hence has never been fully developed except in Gothic buildings. As early as the twelfth century they took on different forms, and almost everywhere, from the thirteenth to the sixteenth century, became the terminating construction of every church steeple, tower, or lantern, and also those of secular buildings, more especially in Germany and France. Their decorative value was very great, more particularly in varying and enriching the sky-line of the buildings which they crowned, and by the numerous variations of forms and variety of types employed. These forms ranged from such simple examples as that surmounting the south tower of Chartres Cathedral to that of Burgos, where the whole structure is an openwork of tracery. In England Norman churches were without spires, but with the coming in of Early English short ones were introduced; Decorated Gothic called for much higher ones, and the Perpendicular still higher. The earlier spires were generally built of timber, and they were always so when the building was roofed with wood.

These early timber spires were, as a rule, not very tall, but later they reached a greater elevation; that which crowned old St. Paul's in London is said to have been 527 feet in height. The most lofty spires now in existence—such as those of Salisbury, Coventry, and Norwich—are all of stone. In Central England there are many, and in fact wherever suitable stone was easily obtainable. In the north of England, however, in Scotland, and in Wales among the mountains the bell-gable takes the place of a spire, no doubt because the large area of the thinly populated parishes made it necessary to keep the bells uncovered, so that they might be more widely heard. The most beautiful examples of existing spires are to be seen at Chartres, Reims, Laon, Freiburg, Ratisbon, Cologne, Antwerp, Vienna, Burgos, and Salisbury. On some of these buildings there are several spires, in many instances built at different periods: the south spire of Chartres, culminating in a pinnacle 350 feet above the ground, was erected in 1175, while the north spire, with its apex 380 feet above the ground, was not finished until 1513. The so-called spires of the Renaissance and those built by Sir Christopher Wren are not true spires, but merely steeples terminating in a point.

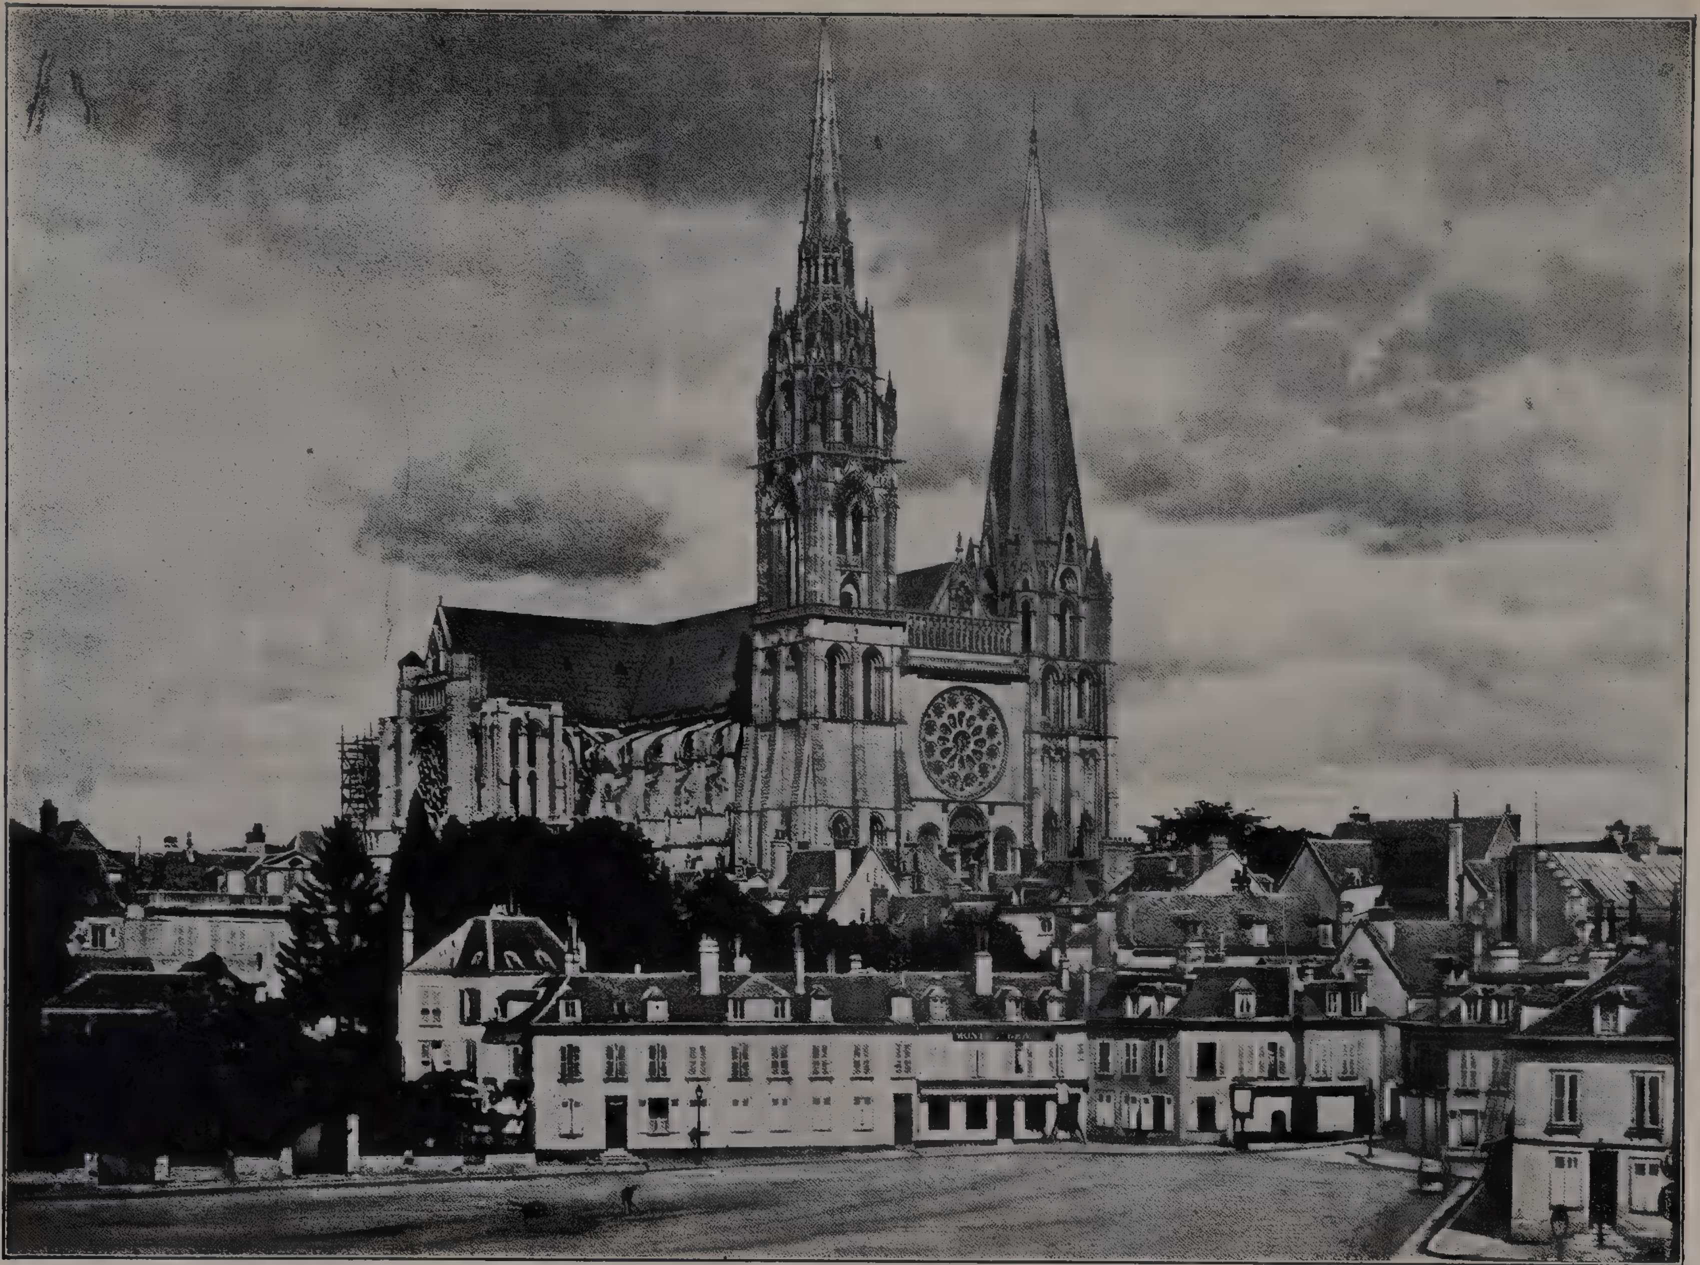
Spirit (Lat. *spiritus*, *spirare*, "to breathe"; Gk. πνεῦμα, δαίμων; Fr. *esprit;* Ger. *Geist.*) As these names show, the principle of life was often represented under the figure of a breath or air. The breath is the most obvious symptom of life, its cessation the invariable mark of death; invisible and impalpable, it stands for the unseen mysterious force behind the vital processes. Accordingly we find the word "spirit" used in several different but allied senses: (1) as signifying a living, intelligent, incorporeal being, such as the soul; (2) as the fiery essence or breath (the Stoic *pneuma*) which was supposed to be the universal vital force; (3) as signifying some refined form of bodily substance, a fluid believed to act as a medium between mind and the grosser matter of the body. The hypothesis of "spirits" in this sense was familiar to the Scholastic physicists. Albertus Magnus distinguished corporeal and incorporeal spirits, and long after the Scholastic age, in fact, down to the end of the eighteenth century, "animal spirits", "vital spirits", "natural spirits" were acknowledged agencies in all physiological phenomena (cf. Vesalius, Descartes, Harvey, Erasmus Darwin, etc.). "Magnetic" spirits were employed by Mesmer in his theory in very much the same way as modern Spiritists invoke the "ether" of the physicists.

In Psychology, "spirit" is used (with the adjective "spiritual") to denote all that belongs to our higher life of reason, art, morality, and religion as



THE CATHEDRAL OF NOTRE-DAME, CHARTRES

THE SOUTH SPIRE, 350 FEET HIGH, DATES FROM 1175; THE NORTH SPIRE, 380 FEET HIGH, WAS COMPLETED IN 1513

contrasted with the life of mere sense-perception and passion. The latter is intrinsically dependent on matter and conditioned by its laws; the former is characterized by freedom or the power of self-determination; "spirit" in this sense is essentially personal. Hegelianism, indeed, in its doctrines of Subjective, Objective, and Absolute Spirit, tries to maintain the categories of spiritual philosophy (freedom, self-consciousness and the like), in a Monistic framework. But such conceptions demand the recognition of individual personality as an ultimate fact.

In Theology, the uses of the word are various. In the New Testament, it signifies sometimes the soul of man (generally its highest part, e. g., "the spirit is willing"), sometimes the supernatural action of God in man, sometimes the Holy Ghost ("the Spirit of Truth Whom the world cannot receive"). The use of this term to signify the supernatural life of grace is the explanation of St. Paul's language about the spiritual and the carnal man and his enumeration of the three elements, spirit, soul, and body, which gave occasion to the error of the Trichotomists (I Thess., v, 23, Eph., iv, 23).

Matter has generally been conceived as in one sense or another the limitation of spirit. Hence, finite spirits were thought to require a body as a principle of individuation and limitation; only God, the Infinite Spirit, was free from all admixture of matter. Thus, when we find the angels described as ἀσώματοι or ἄυλοι, in the writings of the Fathers, this properly means only that the angels do not possess a gross, fleshly body; it does not at all imply a nature absolutely immaterial. Such Scripture expressions as "bread of angels", "they shall shine as the angels", as well as the apparitions of these heavenly beings, were adduced as proofs of their corporeality. So speak Sts. Ambrose, Chrysostom, Jerome, Hilary, Origen, and many other Fathers. Even in Scholastic times, the degree of immateriality that belongs to finite spirits was disputed. St. Thomas teaches the complete simplicity of all spiritual natures, but the Scotists, by means of their famous *materia primo prima*, introduced a real composition, which they conceived to be necessary to a created nature. As regards the functions of spirits in the world. and their active relations to the visible order of things, see GUARDIAN ANGELS and DEMONOLOGY. Scripture abounds in instances of their dealings with men, chiefly in the character of intermediaries between God and His servants. They are the heralds who announce his commands, and often too the ministers who execute His justice. They take a benevolent interest in the spiritual good of men (Luke, xv, 10). For these reasons, the Church permits and encourages devotion to the angels.

BERKELEY, *Siris* in *Works*, II. See also bibliographies, SPIRITUALISM; SOUL.

MICHAEL MAHER.
JOSEPH BOLLAND.

Spiritism is the name properly given to the belief that the living can and do communicate with the spirits of the departed, and to the various practices by which such communication is attempted. It should be carefully distinguished from Spiritualism (q.v.), the philosophical doctrine which holds, in general, that there is a spiritual order of beings no less real than the material and, in particular, that the soul of man is a spiritual substance. Spiritism, moreover, has taken on a religious character. It claims to prove the preamble of all religions, i. e. the existence of a spiritual world, and to establish a world-wide religion in which the adherents of the various traditional faiths, setting their dogmas aside, can unite. If it has formulated no definite creed, and if its representatives differ in the attitudes toward the beliefs of Christianity, this is simply because Spiritism is expected to supply a new and fuller revelation which will either substantiate on a rational basis the essential Christian dogmas or show that they are utterly unfounded. The knowledge thus acquired will naturally affect conduct, the more so because it is hoped that the discarnate spirits, in making known their condition, will also indicate the means of attaining to salvation or rather of progressing, by a continuous evolution in the other world, to a higher plane of existence and happiness.

THE PHENOMENA.—These are classified as physical and psychical. The former include: production of raps and other sounds; movements of objects (tables, chairs) without contact or with contact insufficient to explain the movement: "apports", i. e. apparitions of objects (e. g. flowers) in a closed room without any visible agency to convey them; moulds, i. e. impressions made upon paraffin and similar substances; luminous appearances, i. e., vague glimmerings of light or faces more or less defined; levitation, i. e. raising of objects from the ground by supposed supernormal means; materialization or appearance of a spirit in visible human form; spirit-photography, in which the features or forms of deceased persons appear on the plate along with the likeness of a living photographed subject. The psychical, or significative, phenomena are those which express ideas or contain messages. To this class belong: table-rapping in answer to questions; automatic writing; slate-writing; trance-speaking; clairvoyance; descriptions of the spirit-world; and communications from the dead.

HISTORY.—For an account of Spiritistic practices in antiquity see NECROMANCY. The modern phase was ushered in by the exhibitions of mesmerism and clairvoyance. In its actual form, however, Spiritism dates from the year 1848 and from the experiences of the Fox family at Hydesville, and later at Rochester, in New York State. Strange "knockings" were heard in the house, pieces of furniture were moved about as though by invisible hands, and the noises became so troublesome that sleep was impossible. At length the "rapper" began to answer questions, and a code of signals was arranged to facilitate communication. It was also found that to receive messages special qualifications were needed; these were possessed by Catherine and Margaret Fox, who are therefore regarded as the first "mediums" of modern times. Similar disturbances occurred in other parts of the country, notably at Stratford, Connecticut, in the house of Rev. Dr. Phelps, a Presbyterian minister, where the manifestations (1850–51) were often violent and the spirit-answers blasphemous. In 1851 the Fox girls were visited in Buffalo by three physicians who were professors in the university of that city. As a result of their examination the doctors declared that the "raps" were simply "crackings" of the knee-joints. But this statement did not lessen either the popular enthusiasm or the interest of more serious persons. The subject was taken up by men like Horace Greeley, Wm. Lloyd Garrison, Robert Hare, professor of chemistry in the University of Pennsylvania, and John Worth Edmonds, a judge of the Supreme Court of New York State. Conspicuous among the Spiritists was Andrew Jackson Davis, whose work, "The Principles of Nature" (1847), dictated by him in trance, contained a theory of the universe, closely resembling the Swedenborgian. Spiritism also found earnest advocates among clergymen of various denominations, especially the Universalists; it appealed strongly to many people who had lost all religious belief in a future life; and it was welcomed by those who were then agitating the question of a new social organization—the pioneers of modern Socialism. So widespread was the belief in Spiritism that in 1854 Congress was petitioned to appoint a scientific commission for the investigation of the phenomena. The petition, which bore some 13,000 signatures, was laid on the table, and no action was taken.

In Europe the way had been prepared for Spiritism by the Swedenborgian movement and by an epidemic of table-turning which spread from the Continent to England and invaded all classes of society. It was still a fashionable diversion when, in 1852, two mediums, Mrs. Hayden and Mrs. Roberts, came from America to London, and held séances which attracted the attention of scientists as well as popular interest. Faraday, indeed, in 1853 showed that the table movements were due to muscular action, and Dr. Carpenter gave the same explanation; but many thoughtful persons, notably among the clergy, held to the Spiritistic interpretation. This was accepted also by Robert Owen, the socialist, while Professor De Morgan, the mathematician, in his account of a sitting with Mrs. Hayden, was satisfied that “somebody or some spirit was reading his thoughts”. The later development in England was furthered by mediums who came from America: Daniel Dunglas Home (Hume) in 1855, the Davenport Brothers in 1864, and Henry Slade in 1876. Among the native mediums, Rev. William Stainton Moses became prominent in 1872, Miss Florence Cook in the same year, and William Eglinton in 1886. Spiritism was advocated by various periodical publications, and defended in numerous works some of which were said to have been dictated by the spirits themselves, e. g. the “Spirit Teachings” of Stainton Moses, which purport to give an account of conditions in the other world and form a sort of Spiritistic theology. During this period also, scientific opinion on the subject was divided. While Professors Huxley and Tyndall sharply denounced Spiritism in practice and theory, Mr. (later Sir Wm.) Crookes and Dr. Alfred Russell Wallace regarded the phenomena as worthy of serious investigation. The same view was expressed in the report which the Dialectical Society published in 1871 after an inquiry extending over eighteen months, and at the Glasgow meeting of the British Association in 1876 Professor Barrett, F.R.S., concluded his account of the phenomena he had observed by urging the appointment of a committee of scientific men for the systematic investigation of such phenomena.

The growth of Spiritism on the Continent was marked by similar transitions from popular curiosity to serious inquiry. As far back as 1787, the Exegetic and Philanthropic Society of Stockholm, adhering to the Swedenborgian view, had interpreted the utterances of “magnetized” subjects as messages from the spirit world. This interpretation gradually won favour in France and Germany; but it was not until 1848 that Cahagnet published at Paris the first volume of his “Arcanes de la vie future dévoilées”, containing what purported to be communications from the dead. The excitement aroused in Paris by table-turning and rapping led to an investigation by Count Agénor de Gasparin, whose conclusion (“Des Tables tournantes”, Paris, 1854) was that the phenomena originated in some physical force of the human body. Professor Thury of Geneva (“Les Tables tournantes”, 1855) concurred in this explanation. Baron de Guldenstubbe (“La Réalité des Esprits”, Paris, 1857), on the contrary, declared his belief in the reality of spirit intervention, and M. Rivail, known later as Allan Kardec, published the “spiritualistic philosophy” in “Le Livre des Esprits” (Paris, 1853), which became a guide-book to the whole subject.

In Germany also Spiritism was an outgrowth from “animal magnetism”. J. H. Jung in his “Theorie der Geisterkunde” declared that in the state of trance the soul is freed from the body, but he regarded the trance itself as a diseased condition. Among the earliest German clairvoyants was Frau Frederica Hauffe, the “Seeress of Prevorst”, whose experiences were related by Justinus Kerner in “Die Seherin von Prevorst” (Stuttgart, 1829). In its later development Spiritism was represented in scientific and philosophical circles by men of prominence, e. g. Ulrici, Fichte, Zöllner, Fechner, and Wm. Weber. The last-named three conducted (1877–8) a series of experiments with the American medium Slade at Leipzig. The results were published in Zöllner's “Wissenschaftliche Abhandlungen” (cf. Massey, “Transcendental Physics”, London, 1880, in which the portions relating to spiritism are translated). Though considered important at the time, this investigation, owing to lack of caution and accuracy, cannot be regarded as a satisfactory test. (Cf. “Report of the Seybert Commission”, Philadelphia, 1887—, which also contains an account of an investigation conducted at the University of Pennsylvania with Slade and other mediums.)

The foregoing outline shows that modern Spiritism within a generation had passed beyond the limits of a merely popular movement and had challenged the attention of the scientific world. It had, moreover, brought about serious divisions among men of science. For those who denied the existence of a soul distinct from the organism it was a foregone conclusion that there could be no such communications as the Spiritists claimed. This negative view, of course, is still taken by all who accept the fundamental ideas of Materialism. But apart from any such a priori considerations, the opponents of Spiritism justified their position by pointing to innumerable cases of fraud which were brought to light either through closer examination of the methods employed or through the admissions of the mediums themselves.

In spite, however, of repeated exposure, there occurred phenomena which apparently could not be ascribed to trickery of any sort. The inexplicable character of these the sceptics attributed to faulty observation. The Spiritistic practices were simply set down as a new chapter in the long history of occultism, magic, and popular superstition. On the other hand, a certain number of thinkers felt obliged to confess that, after making due allowance for the element of fraud, there remained some facts which called for a more systematic investigation. In 1869 the London Dialectical Society appointed a committee of thirty-three members “to investigate the phenomena alleged to be spiritual manifestations, and to report thereon”. The committee's report (1871) declares that “motion may be produced in solid bodies without material contact, by some hitherto unrecognized force operating within an undefined distance from the human organism, and beyond the range of muscular action”; and that “this force is frequently directed by intelligence”. In 1882 there was organized in London the “Society for Psychical Research” for the scientific examination of what its prospectus terms “debatable phenomena”. A motive for investigation was supplied by the history of hypnotism, which had been repeatedly ascribed to quackery and deception. Nevertheless, patient research conducted by rigorous methods had shown that beneath the error and imposture there lay a real influence which was to be accounted for, and which finally was explained on the theory of suggestion. The progress of Spiritism, it was thought, might likewise yield a residuum of fact deserving scientific explanation.

The Society for Psychical Research soon counted among its members distinguished representatives of science and philosophy in England and America; numerous associations with similar aims and methods were organized in various countries. The “Proceedings” of the Society contain detailed reports of investigations in Spiritism and allied subjects, and a voluminous literature, expository and critical, has been created. Among the most notable works are: “Phantasms of the Living” by Gurney, Myers, and Podmore (London, 1886); F. W. H. Myers, “Human Personality and its Survival of Bodily Death” (London, 1903); and Sir Oliver Lodge, F. R. S., “The

Survival of Man" (New York, 1909). In recent publications prominence is given to experiments with the mediums Mrs. Piper of Boston and Eusapia Palladino of Italy; and important contributions to the literature have been made by Professor Wm. James of Harvard, Dr. Richard Hodgson of Boston, Professor Charles Richet (University of Paris), Professor Henry Sidgwick (Cambridge University), Professor Th. Flournoy (University of Geneva), Professor Morselli (University of Genoa), Professor Cesare Lombroso (University of Turin), Professor James H. Hyslop (Columbia University), Professor Wm. R. Newbold (University of Pennsylvania). While some of these writers maintain a critical attitude, others are outspoken in favour of Spiritism, and a few (Myers, James), lately deceased, arranged before death to establish communication with their surviving associates.

Hypotheses.—To explain the phenomena which after careful investigation and exclusion of fraud are regarded as authentic, three hypotheses have been proposed. The telepathic hypothesis takes as its starting-point the so-called subliminal consciousness. This, it is claimed, is subject to disintegration in such wise that segments of it may impress another mind (the percipient) even at a distance. The personality is liberated, so to speak, from the organism and invades the soul of another. A medium, on this hypothesis, would obtain information by thought-transference either from the minds of persons present at the séance or from other minds concerning whom the sitters know nothing. This view, it is held, would accord with the recognized facts of hypnosis and with the results of experimental telepathy; and it would explain what appear to be cases of possession. Similar to this is the hypothesis of psychical radiations which distinguishes in man the material body, the soul, and an intermediate principle, the "perispirit". This is a subtle fluid, or astral body, which in certain persons (mediums) can escape from the material organism and thus form a "double". It also accompanies the soul after death and it is the means by which communication is established with the perispirit of the mediums. The Spiritistic hypothesis maintains that the communications are received from disembodied spirits. Its advocates declare that telepathy is insufficient to account for all the facts, that its sphere of influence would have to be enlarged so as to include all the mental states and memories of living persons, and that even with such extension it would not explain the selective character of the phenomena by which facts relevant for establishing the personal identity of the departed are discriminated from those that are irrelevant. Telepathy at most may be the means by which discarnate spirits act upon the minds of living persons. For a discussion of the hypotheses see Hyslop, "Science and a Future Life" (Boston, 1905); Lodge, "The Survival of Man"; and Flournoy, "Spiritism and Psychology" (tr. Carrington, New York, 1911); Grasset, "The Marvels beyond Science" (New York, 1910).

For those who admit that the manifestations proceed from intelligences other than that of the medium, the next question in order is whether these intelligences are the spirits of the departed or beings that have never been embodied in human form. The reply has often been found difficult even by avowed believers in Spiritism, and some of these have been forced to admit the action of extraneous or non-human intelligences. This conclusion is based on several sorts of evidence: the difficulty of establishing spirit-identity, i. e. of ascertaining whether the communicator is actually the personality he or it purports to be; the love of personation on the part of the spirits which leads them to introduce themselves as celebrities who once lived on earth, although on closer questioning they show themselves quite ignorant of those whom they personate; the trivial character of the communications, so radically opposed to what would be expected from those who have passed into the other world and who naturally should be concerned to impart information on the most serious subjects; the contradictory statements which the spirits make regarding their own condition, the relations of God and man, the fundamental precepts of morality; finally the low moral tone which often pervades these messages from spirits who pretend to enlighten mankind. These deceptions and inconsistencies have been attributed by some authors to the subliminal consciousness (Flournoy), by others to spirits of a lower order, i. e. below the plane of humanity (Stainton Moses), while a third explanation refers them quite frankly to demonic intervention (Raupert, "Modern Spiritism", St. Louis, 1904; cf. Grasset, "The Marvels beyond Science," tr. Tubeuf, New York, 1910). For the Christian believer this third view acquires special significance from the fact that the alleged communications antagonize the essential truths of religion such as the Divinity of Christ, atonement and redemption, judgment and future retribution, while they encourage agnosticism, pantheism, and a belief in reincarnation.

Spiritism indeed claims that it alone furnishes an incontestable proof of immortality, a scientific demonstration of the future life that far surpasses any philosophical deduction of Spiritualism, while it gives the death-blow to Materialism. This claim, however, rests upon the validity of the hypothesis that the communications come from disembodied spirits; it gets no support from the telepathic hypothesis or from that of demonic intervention. If either of the latter should be verified the phenomena would be explained without solving or even raising the problem of human immortality. If, again, it were shown that the argument based on the data of normal consciousness and the nature of the soul cannot stand the test of criticism, the same test would certainly be fatal to a theory drawn from mediumistic utterances which are not only the outcome of abnormal conditions, but are also open to widely different interpretations. Even where all suspicion of fraud or collusion is removed—and this is seldom the case—a critical investigator will cling to the idea that phenomena which now seem inexplicable may eventually, like so many other marvels, be accounted for without having recourse to the Spiritistic hypothesis. Those who are convinced, on philosophical grounds, of the soul's immortality may say that communications from the spirit world, if any such there be, go to strengthen their conviction; but to abandon their philosophy and stake all on Spiritism would be more than hazardous; it would, indirectly at least, afford a pretext for a more complete rejection of soul and immortality. In other words, if Spiritism were the sole argument for a future life, Materialism, instead of being crushed, would triumph anew as the only possible theory for science and common sense.

Dangers.—To this risk of philosophical error must be added the dangers, mental and moral, which Spiritistic practices involve. Whatever the explanation offered for the medium's "powers", their exercise sooner or later brings about a state of passivity which cannot but injure the mind. This is readily intelligible in the hypothesis of an invasion by extraneous spirits, since such a possession must weaken and tend to efface the normal personality. But similar results may be expected if, as the alternate hypothesis maintains, a disintegration of the one personality takes place. In either case, it is not surprising that the mental balance should be disturbed, and self-control impaired or destroyed. Recourse to Spiritism frequently produces hallucinations and other aberrations, especially in subjects who are predisposed to insanity; and even those who are otherwise normal expose themselves to severe physical and mental strain (cf.

Viollet, "Le spiritisme dans ses rapports avec la folie", Paris, 1908). More serious still is the danger of moral perversion. If to practise or encourage deception of any sort is reprehensible, the evil is certainly greater when fraud is resorted to in the inquiry concerning the future life. But apart from any intention to deceive, the methods employed would undermine the foundations of morality, either by producing a disintegration of personality or by inviting the invasion of an extraneous intelligence. It may be that the medium "yields, perhaps, innocently at first to the promptings of an impulse which may come to him as from a higher power, or that he is moved by an instinctive compulsion to aid in the development of his automatic romance—in any case, if he continues to abet and encourage this automatic prompting, it is not likely that he can long retain both honesty and sanity unimpaired. The man who looks on at his hand doing a thing, but acquits himself of responsibility for the thing done, can hardly claim to be considered as a moral agent; and the step is short to instigating and repeating a like action in the future, without the excuse of an overmastering impulse . . . To attend the séances of a professional medium is perhaps at worst to countenance a swindle; to watch the gradual development of innocent automatism into physical mediumship may be to assist at a process of moral degeneration" (Podmore, "Modern Spiritualism" II, 326 sqq.).

ACTION OF THE CHURCH.—As Spiritism has been closely allied with the practices of "animal magnetism" and hypnotism, these several classes of phenomena have also been treated under the same general head in the discussions of theologians and in the decisions of ecclesiastical authority. The Congregation of the Inquisition, 25 June, 1840, decreed: "Where all error, sorcery and invocation of the demon, implicit or explicit, is excluded, the mere use of physical means which are otherwise lawful, is not morally forbidden, provided it does not aim at unlawful or evil results. But the application of purely physical principles and means to things or effects that are really supernatural, in order to explain these on physical grounds, is nothing else than unlawful and heretical deception". This decision was reiterated on 28 July, 1847, and a further decree was issued on 30 July, 1856, which, after mentioning discourses about religion, evocation of departed spirits and "other superstitious practices" of Spiritism, exhorts the bishops to put forth every effort for the suppression of these abuses "in order that the flock of the Lord may be protected against the enemy, the deposit of faith safeguarded, and the faithful preserved from moral corruption." The Second Plenary Council of Baltimore (1866), while making due allowance for fraudulent practice in Spiritism, declares that some at least of the manifestations are to be ascribed to Satanic intervention, and warns the faithful against lending any support to Spiritism or even, out of curiosity, attending séances (Decreta, nn. 33–41). The council points out, in particular, the anti-Christian character of Spiritistic teachings concerning religion, and characterizes them as an attempt to revive paganism and magic. A decree of the Holy Office, 30 March, 1898, condemns Spiritistic practices, even though intercourse with the demon be excluded and communication sought with good spirits only. In all these documents the distinction is clearly drawn between legitimate scientific investigation and superstitious abuses. What the Church condemns in Spiritism is superstition with its evil consequences for religion and morality. (Cf. Perrone, "De virtute religionis", Turin, 1867; Noldin, "Summa Theol. Moralis", Innsbruck,1904, II).

EDWARD A. PACE.

Spirito Santo, DIOCESE OF (SPIRITUS SANCTI), suffragan of São Sebastião do Rio de Janeiro, established in 1896. Its jurisdiction comprises the State of Espirito Santo, United States of Brazil, South America, with twenty-eight municipalities and a Catholic population in 1911 of 202,000 inhabitants, 20 secular priests and 15 friars. Of Catholic educational institutions there are, in the city of Victoria, the capital of the state and seat of the bishop, a *gymnasio* or college of secondary instruction directed by secular priests and having the same privileges as a federal school; and the Collegio das Irmas de Caridade, for girls, under the direction of the Sisters of Charity. At Victoria are also located the "Hospital da Misericordia", in which five Sisters of Charity serve as nurses, and the Santa Casa de Misericordia, a charitable institution founded in 1545, and by decree of 1 June, 1606, it was accorded the same privileges of the Santa Casa de Misericordia of Lisbon; an important annex of this institution is the Orphanato Santa Luzia, an orphan asylum. There are also twelve Catholic associations in Victoria. In other cities and towns of the diocese there are also various Catholic schools, charitable institutions, etc. The present bishop is the Rt. Rev. Fernando de Sousa Monteiro, b. 22 Sept., 1866, raised to the see 1 March, 1902. (See BRAZIL.)

JULIAN MORENO-LACALLE.

Spirits, DISCERNMENT OF. See DISCERNMENT OF SPIRITS.

Spiritual Exercises of Saint Ignatius, a short work composed by St. Ignatius of Loyola and written originally in Spanish.

THE TEXT.—The autograph MS. of this "Spiritual Exercises" has unfortunately been lost. What is at present called the "autograph" is only a quarto copy made by a secretary but containing corrections in the author's handwriting. It is now reproduced by phototypy (Rome, 1908). Two Latin translations were made during the lifetime of St. Ignatius. There now remain: (1) the ancient Latin translation, *antiqua versio latina*, a literal version probably made by the saint; (2) a free translation by Father Frusius, more elegant and more in accordance with the style of the period, and generally called the "Vulgate". The *antiqua versio* is dated by the copyist "Rome, 9 July, 1541"; the vulgate version is later than 1541, but earlier than 1548, when the two versions were together presented to Paul III for approval. The pope appointed three examiners, who praised both versions warmly. The Vulgate, more carefully executed from a literary point of view, was only chosen for printing, and was published at Rome on 11 September, 1548, under the simple title: "Exercitia spiritualia". This *princeps* edition was also multiplied by phototypy (Paris, 1910). Besides these two Latin translations there exist two others. One is the still unpublished text left by Bl. Peter Faber to the Carthusians of Cologne before 1546; it holds a middle place between the literal version and the Vulgate. The second is a new literal translation by Father Roothaan, twenty-first general of the Society of Jesus, who, on account of the differences between the Vulgate and the Spanish autograph, wished to retranslate the "Exercises" into Latin, as accurately as possible, at the same time making use of the *versio antiqua*. His intention was not to supplant the Vulgate, and he therefore published the work of Frusius along with his own in parallel columns (1835).

The Spanish autograph text was not printed until long after the Vulgate, by Bernard de Angelis, secretary of the Society of Jesus (Rome, 1615); it has often been republished. The most noteworthy English versions are: (1) "The Spiritual Exercises of St. Ignatius. With Approbation of Superiours. At Saint Omers; Printed by Nicolas Joseph Le Febvre." This translation bears no date but it can be traced back to 1736; the printer was a lay brother of the Society. (2) "The Spiritual Exercises of St. Ignatius. Translated from the Authorized Latin; with extracts from the literal version and notes of the Rev. Father Rothaan [*sic*] by Charles Seager, M.A., to which is prefixed a Preface by the Right Rev. Nicholas Wiseman, D.D., bishop of Melipotamus" (London, Dolman, 1847); which was republished by Murphy at Baltimore, about 1850. (3) "The Text of the Spiritual Exercises of St. Ignatius, translated from the original Spanish", by Father John Morris, S.J., published by Burns and Oates (London, 1880). The reader of the "Exercises" need not look for elegance of style. "St. Ignatius", says F. Astrain, "writes in coarse, incorrect, and laboured Castilian, which only at times arrests the attention by the energetic precision and brevity with which certain thoughts are expressed." There are outpourings of the soul in different colloquies, but their affecting interest does not lie in words; it is wholly in the keen situation, created by the author, of the sinner before the crucifix,the knight before his king, etc.

COMPOSITION OF THE EXERCISES.—The book is composed of documents or spiritual exercises, reduced to the order most fitted to move the minds of the faithful to piety, as was remarked in the Brief of approval. We find in this work documents (instructions, admonitions, warnings), exercises (prayers, meditations, examination of conscience, and other practices), and the method according to which they are arranged. The sources of the book are the Sacred Scriptures and the experiences of spiritual life. Ignatius indeed was little by little prepared by Divine Providence to write his book. From 1521 the thoughts which precede his conversion, the progress of his repentance, the pious practices which he embraces at Montserrat and at Manresa helped to give him a knowledge of asceticism. His book is a work lived by himself and later on lived by others under his eyes. But a book so lived is not composed all at once; it requires to be retouched, corrected, and added to frequently. These improvements, which neither Polanco nor Bartoli hide, are revealed by a simple examination of the Spanish text, where along with the Castilian there are found Latin or Italian expressions, together with Scholastic terms which the writer could not have used before, at least, the beginning of his later studies. Ignatius himself admitted this to Father Luis Gonzales: "I did not compose the Exercises all at once. When anything resulting from my own experience seemed to me likely to be of use to others, I took note of it". Father Nadal, Ignatius's friend and contemporary, writes of the final redaction: "After having completed his studies, the author united his first attempts of the Exercises, made many additions, put all in order, and presented his work for the examination and judgment of the Apostolic See".

It seems probable that the "Exercises" were completed while St. Ignatius was attending lectures at the University of Paris. The copy of Bl. Peter Faber, written undoubtedly about the time when he followed the Exercises under Ignatius's direction (1533), contains all the essential parts. Moreover, some parts of the book bear their date. Such are: the "Rules for the distribution of alms", intended for beneficed clergymen, masters, or laureates of the university, in which occurs a citation of the Council of Carthage, thus leading one to suppose that the writer had studied theology; the "Rules for thinking with the Church", which appear to have been suggested by the measures taken by an assembly of theologians at Valladolid in 1527 against the Erasmists of Spain, or by the Faculty of Paris in 1535, 1542, against the Protestants. The final completion of the "Exercises" may be dated from 1541, when a fair copy of the *versio antiqua*, which St. Ignatius calls "Todos exercicios breviter en latin", was made. It may be asked how far the work of composition was carried out during the residence of the saint at Manresa. This spot, where Ignatius arrived in March, 1522, must always be considered as the cradle of the "Exercises". The substance of the work dates from Manresa. Ignatius found there the precious metal which for a long time he wrought and polished. "A work," as Fr. Astrain rightly says, "which contributes throughout so admirably to realize the fundamental idea set up by the author, is evidently not an invention made by parts, or composed of passages written at various times or under varying circumstances." The "Exercises" clearly bear the mark of Manresa. The mind of Ignatius, during his retirement there, was full of military memories and of thoughts of the future; hence the double characteristic of his book, the chivalrous note and the march towards the choice of a state of life. The ideas of the knight are those of the service due to a sovereign, of the shame that clings to the treason of a vassal (first week), and in the kingdom, those of the crusade formed against the infidels, and of the confrontation of the Two Standards (second week). But during his convalescence at the castle, the reading of the lives of the saints gave a mystical turn to his chivalrous ideas; the great deeds to be imitated henceforth are no longer those of a Roland, but of a Dominic or a Francis.

To help him in his outline of evangelical perfection, Ignatius received a special assistance, which Polanco and Ribadeneira call the unction of the Holy Ghost. Without this grace, the composition of the "Exercises" remains a mystery. How could a rough and ignorant soldier conceive and develop a work so original, so useful for the salvation and the perfection of souls, a book which astonishes one by the originality of its method and the powerful efficacy of its virtue? We ought not, however, to consider this Divine assistance as a complete revelation. What St. Ignatius knew of spiritual ways, he had learned chiefly from personal experience and by the grace of God, Who treated him "as the schoolmaster does a child". It does not mean that he had not the advice of a confessor to guide him, for he was directed by John Chanones at Montserrat; nor does it mean that he had read nothing himself, as we know that he had books at hand. We must therefore consider the revelation of the "Exercises", not as a completely supernatural manifestation of all the truths contained in the work, but as a kind of inspiration, or special Divine assistance, which prevented all essential error, and suggested many thoughts useful for the salvation of the author, and of readers at all times. This inspiration is the more admissible as Ignatius was favoured with great light in Divine things. Ribadeneira, writing from Madrid, 18 April, 1607, to Fr. Girón, rector of Salamanca, dwells on the wonderful fruits of the "Exercises", fruits foreseen and willed by God. Such a result could not be the effect of merely human reading and study, and he adds: "This has been the general opinion of all the old fathers of the Society, of us all who have lived and conversed with our blessed father".

Another tradition concerns the part taken by the

Blessed Virgin in the composing of the "Exercises" at Manresa. It is not based on any written testimony of the contemporaries of St. Ignatius, though it became universal in the seventeenth century. Possibly it is founded upon earlier oral testimony, and upon a revelation made in 1600 to the Venerable Marina de Escobar, and related in the "Life of Father Balthazar Alvarez". This tradition has often been symbolized by painters, who represent Ignatius writing from the Blessed Virgin's dictation.

Although Ignatius had been educated just like the ordinary knights of his time, he was fond of caligraphy and still more of reading; his convalescence at Loyola enabled him to gratify this double inclination. We know that he wrote there, in different coloured inks, a quarto book of 300 folios in which he seems to have gathered together extracts from the only two books to be found in the castle, which were "The Flower of the Saints" in Spanish, and "The Life of Jesus Christ" by Ludolph of Saxony or the Carthusian, published in Spanish at Alcalá, 1502 to 1503. "The Flower of the Saints" has left no apparent trace in the "Exercises", except an advice to read something similar after the second week. Ludolph's influence is more noticeable in expressions, ascetic principles, and methodic details. The part of the "Exercises" treating of the life of Christ, is especially indebted to him.

Ignatius, having recovered his health and determined to lead a hermit's life, left Loyola for Montserrat and Manresa. He spent the greater part of the year 1522 in the latter town, three leagues distant from Montserrat, under the direction of his confessor, Dom John Chanones. According to a witness in the process of canonization Ignatius went to see Chanones every Saturday. He could moreover have met him or other Benedictines at the priory of Manresa, which was dependent on Montserrat. It is possible that he received from them a copy of the "Imitation of Christ" in Spanish, for he certainly had that book at Manresa; they must have given him also the "Ejercitatorio de la vida espiritual", of Dom Garcia de Cisneros, published at Montserrat in 1500. Ribadeneira in his letter to Fr. Girón thinks it very probable that St. Ignatius was acquainted with this Castilian work, that he availed himself of it for prayer and meditation, that Chanones explained different parts to him, and that the title "Exercises" was suggested to him by the "Ejercitatorio". The Benedictines made use of this book for the conversion or edification of the pilgrims of Montserrat; in fact the tradition of the monastery relates that Chanones communicated it to his penitent. The "Exercises" borrow very little expressly from the "Imitation of Christ". There is, however, to be noticed a general concordance of its doctrine and that of the "Exercises", and an invitation to read it.

Was the "Ejercitatorio" more closely followed? In trying to solve this question it is not sufficient to draw conclusions from the resemblance of the titles, or to establish a parallel with a few details; it is necessary above all to compare the plans and methods of the two works. Whilst the "Exercises" consider the word "week" in its metaphorical sense and give liberty to add or to omit days, the "Ejercitatorio" presents a triple series of seven meditations, one and not several for each day of the real week. The whole series of twenty-one meditations is exhausted in just three weeks, which answer to the three lives: the purgative, the illuminative, and the unitive. The author seeks only to raise the "exercitador" gradually to the contemplative life, whereas St. Ignatius leads the exercitant to determine for himself the choice of a state of life amongst those most pleasing to God. The "Ejercitatorio" does not mention anything of the foundation, nor of the kingdom, of the particular examination, of the election, of the discernment of spirits, nor of the rules for rightly regulating one's food and for thinking with the Orthodox Church, nor of the three methods of praying. Only a few counsels of Cisneros have been adopted by St. Ignatius in the annotations 2, 4, 13, 18, 19, 20, and the additions 2, 4. Some of Cisneros's ideas are to be found in the meditations of the first week. The other weeks of St. Ignatius are entirely different. The similarities are so reduced in fact to a very small number.

But the work of Cisneros itself is only a compilation. Cisneros admits having reproduced passages from Cassian, Bernard, Bonaventure, Gerson etc.; moreover, he does not give the names of the contemporaries from whom he copied. Amongst other books Cisneros read and copied the "De spiritualibus ascensionibus" of Gerard Zerbolt of Zutphen (1367–98) and the "Rosetum exercitiorum spiritualium" of John Mombaer, or Mauburnus (d. 1502), who was also indebted to Gerard. Almost all in Cisneros that pertains to the method of spiritual exercises is extracted from the "Rosetum". The different ways of exercising oneself in the contemplation of the life and passion of Jesus Christ are taken from the "De spiritualibus ascensionibus". All Cisneros's borrowings were disclosed by Fr. Watrigant (see bibliography). Zutphen and Mombaer, like Thomas à Kempis, belonged to the Society of the Brothers of Common Life, founded towards the end of the fourteenth century by Gerard de Groote and Florence Radewyns. This society caused a revival of spiritual life by the publication of numerous ascetic treatises, several of which appeared under the title of "Spiritual Exercises". The Brothers of Common Life, or the Devoti, devoted themselves also to the reform of the clergy and monasteries. The Benedictine Congregation of Valladolid, on which Monserrat was dependent, had been under the influence of Lewis Barbo, who was connected with the brothers. We must therefore conclude that Ignatius may have profited by the result of Zutphen's and Mauburnus's labours whilst he read Cisneros or listened to Chanones's explanations at Manresa. Later, when he understood Latin, during his studies at the Universities of Alcalá and Paris, or while travelling in Flanders he may himself have become acquainted with the works of the Devoti. A greater analogy is to be noticed between Zutphen and Ignatius, two practical minds, than between Loyola and Cisneros.

ORIGINALITY OF THE WORK.—We may therefore look upon the question of a supposed plagiarism on the part of St. Ignatius to the detriment of Cisneros, as being definitively settled. This question was raised by Dom Constantine Cajetan, or rather by some one who assumed his name, in a treatise published at Venice in 1641: "De religiosa S. Ignatii . . . per patres Benedictinos institutione . . . ". The Jesuit John Rho answered him in his "Achates" (Lyons, 1644). Both the attack and reply were put on the Index, no doubt on account of their excessive acrimony. Besides, the general assembly of the Congregation of Monte Cassino which met at Ravenna in 1644, by a decree dissociated itself from the aggressor. The quarrel was afterwards renewed on several occasions, chiefly by the heterodox, but always without success. Benedictines and Jesuits agree to acknowledge that if St. Ignatius owes anything to Montserrat, he has retained his entire originality. Whatever may be said about the works he read and what he borrowed, his book is truly his own. A writer is never blamed for having previously searched and studied, if his own work is impressed with his personality, and treats the subject from a new point of view. This has been successfully accomplished by St. Ignatius, and with all the greater merit, as he could not change anything of the traditional truths of Christianity, or pretend to invent mental prayer.

Ignatius's originality appears at first sight in the selection and co-ordination of his material. To select some of the great truths of religion, to drive them deeply into the heart, until man thoroughly impressed falls at the Lord's feet, crying out like another Saul "Domine, quid me vis facere?", such is the genius, the ascetic character, of St. Ignatius. But to bring about this result it was necessary for the selected truths to be linked together in a logical series and animated by a progressive movement. The methodic order and irresistible deduction of the "Exercises" distinguish them from a large number of spiritual works. Above all the originality of St. Ignatius is displayed in the care with which he combines the subjects of meditation and ascetic principles, and the minute advice that guides and moderates, when necessary, the application of the "Exercises". We find in the annotations at the beginning, in the notes strewn here and there, in the rules for the discernment of spirits a real system of spiritual training, that makes adequate provision for the different states of soul of the exercitant, and warns him, or rather his director, of what is most fitting, according to the circumstances of the case. Nothing is left to chance. One sees how to adapt the general progress of the retreat to different persons, according to their occupations, the degree of their fervour, and the advantage they derive from the "Exercises". This art of proportioning spiritual instruction to the powers of the soul and to Divine grace was entirely new, at least under the precise and methodic form given to it by St. Ignatius.

Doctrine of the book.—The two words that form the general title of St. Ignatius's book bespeak at once the soul's action and labour, and the interior struggle. The still more explicit title which we find immediately after the annotations leaves one no doubt: "Spiritual Exercises to conquer oneself and regulate one's life, and to avoid coming to a determination through any inordinate affection". A method is here offered, which with God's grace teaches and helps one to overcome oneself, that is to say one's unruly passions, and by gaining control over every conscious act, to acquire inward peace—a method of self-conquest and self-governent. A general idea of the "Exercises" may best be gained from Diertins's summary: After setting forth the end for which God created man and all other things, the book, ever considering this truth as the first foundation, leads us in a short time by the way known as the purgative way to acknowledge the ugliness of the sins which have caused us to stray shamefully from the end, and to cleanse our souls from sin. Setting before us the example of Christ, our King and Leader, the author then invites us, in what is termed the illuminative life, to avoid the devil's standard and to follow the standard of this very good and wise Chief, and to imitate His virtues; indeed he almost forces us to do so by the meditation of the three classes, or grades, of men (the first of which is reluctant to follow Christ, the second eager to do so, but with limitations, and the last bent on following Him at once, wholly, and always). These resolutions are strengthened more and more in the third week, at the sight of Jesus Christ walking before us with His cross. Lastly, in the unitive way, which comprises the fourth week, he enkindles in our hearts a desire for the glory of Jesus risen, and for His purest love. To this are joined annotations, additions, preludes, colloquies, examinations, modes of election, rules for rightly regulating one's food, for discerning spirits, for the scrupulous, for thinking with the Orthodox Church, etc. The whole, if applied in the prescribed order, possesses the incredible strength of leading one to solid virtue and to eternal salvation. The four weeks have been summed up still more briefly in as many sentences: (1) deformata reformare; (2) reformata conformare; (3) conformata confirmare; (4) confirmata transformare; that is: (1) to reform what has been deformed by sin; (2) to make what is thus reformed conform to the Divine model, Jesus; (3) to strengthen what thus conforms; (4) to transform by love the already strengthened resolutions.

This method of spiritual progress had already been traced by St. Paul (Hebr., xii, 1-2). It cannot be repeated too often that, if St. Ignatius displayed his originality in uniting and co-ordinating the materials of his book, he did not compose the matter itself. He derived it from the ever open treasury of the Catholic Church, from Scripture and Tradition, from the Bible and the Fathers. The Gospel is the marrow of the "Exercises". The spirituality of St. Ignatius is in constant harmony with the teachings of Christ and His Apostles. What is the "homo vincat seipsum", but an echo of the "abneget semstipsum"? And whence came Loyola's idea of giving us the soldier's theory, a warlike book which contains all the plan of a campaign of man's struggle against himself, if not from the Saviour's words, which are a declaration of war: "Do not think that I came to send peace upon earth: I came not to send peace, but the sword" (Matt., x, 34). The spirituality of the "Exercises" belongs, therefore, to the active and militant kind. We must also remark that the work is not a mere book for reading or a mere manual of devotion; it gives us in the high sense of the word a psychological and pedagogic method. Mr. Orby Shipley, a convert from Protestantism to Catholicism, judged them rightly, when he said in the preface of his edition (London, 1870): "This treatise is not so much a manual as a method—and a method the value, the extraordinary power, of which does not appear at first sight. One of its great marvels consists in the fact that it has done so very much by such very simple means . . . They are no mere theoretical compositions, but they have been framed upon the closest study of the human mind; . . . they enter into its several emotions, encounter its numberless difficulties, and probe to their very depths its several springs of thought and action".

To obtain the desired result St. Ignatius uses only a few words, but these are so selected as to make a deep impression on the mind and, if seriously meditated on by the exercitant and fostered in his soul, will soon develop into powerful thoughts and become a source of great spiritual enlightenment and consequently of earnest energetic resolutions. However, though the method of St. Ignatius leaves the exercitant to think for himself, the author does not intend that the latter should use it without guidance. He places the " Book of Exercises " in the hands of a director, and entrusts him with applying it to the exercitant. He teaches him how to guide a soul in the choice of a state of life and in the work of self-reform. The annotations, which provide a key to the "Exercises", are intended more especially for the director. The greater part of them—the second, sixth, seventh, eighth, ninth, tenth, twelfth, thirteenth, fourteenth, fifteenth, seventeenth, eighteenth, a total of twelve out of twenty—is written for "el que da los Exercicios" (the person who gives the exercises). The fifteenth advises him to proceed with great discretion, so as not to interfere between the Creator and the creature, and to abstain especially in the case of a retreat of election, from any suggestion regarding the determination to be taken, even should it be, strictly speaking, for the very best. This advice shows how falsely some critics of the Exercises represent them as bringing undue influence to bear on the will, with a view to enslaving or paralyzing it. From this also appears the absurdity of Muller's thesis in "Les origines de la Compagnie de Jésus" (Paris, 1898), in which he strives to show the Mohammedan origin of the Exercises and of the Society of Jesus. In this way, therefore, the director in compliance with the author's desire respects the soul's freedom, a freedom already regulated by the authority of the Church, of which he is the representative. He also considers the soul's capacity; the Exercises contain in themselves matters useful to all, but taken altogether they may not be suitable to every one. The eighteenth annotation forbids them to be given indiscriminately, without considering who the exercitant is. Finally to sum up, all St. Ignatius's spirituality lies in traditional Catholic instruction, in a method favourable to personal activity, and in the importance of prudent direction.

The commentators who have attempted to explain and penetrate the doctrine of the "Exercises" are theorists who consider either the entire book or certain parts of it, and show the book's order and connexion and when necessary justify the thought. Several of them, not satisfied with simply discussing the method, deal also with the practice. Those whose names we give here belong to the Society of Jesus, but they did not write solely for their order: sixteenth century—Achille Gagliardi; seventeenth century—Francisco Suarez, Antoine Le Gaudier, Luis de la Palma, Giovanni Bucellani, Tobias Lohner, Ignatius Diertins; eighteenth century—Claude Judde, Jean-Joseph Petitdidier, Baltasar de Moncada, Peter Ferrusola; nineteenth century—Johann Philipp Roothaan, Pierre Jennesseaux, Antoine Denis, Marin de Boylesve, Jaime Nonell, James Clare, Franz de Hummelauer, Jaime Gutiérrez.

Criticism Unfavourable and Favourable.—We refer the reader to Diertins's narration of the "persecutions" to which the "Exercises" were subjected during the lifetime of St. Ignatius. He counts no less than twelve. The first attacks may be attributed to the surprise felt by ecclesiastics at the sight of a layman treating of spiritual matters, before having made his theological studies; the others arose from some difficulty of interpretation or from erroneous judgments as to the meaning of the text. These malevolent or over-zealous censurers were answered by Nadal and Suarez, who were justified by the approbation of the Holy See. The attacks of the present day are generally unscientific, inspired by passion, and made without any preliminary examination of the question. When the adversary's mind conceives a caricature of the "Exercises" either because he has not read them, or because before reading them he has been influenced by the erroneous statements of other hostile critics, the attack appears legitimate; in reality it will be found to refer to something that is not in the "Exercises". Besides the attacks by their mutual opposition destroy one another. The "Exercises" cannot have, simultaneously, a machiavellian and an anodyne character, or be rapt in the clouds and yet crawl upon the soil. Long ago they were, and to-day are, charged with being a clever machinery destined to strike and move the imagination, and finally through hallucination produce ecstasies. Michelet and Quinet in their too famous lectures revived this calumny, which has been answered by Fr. Cahour in his pamphlet: "Des jésuites par un jésuite". To this charge of charlantanry one reply will suffice, the answer made by a young religious, Rodrigo de Menezès, on being asked whether he had not been favoured with any kind of vision: "Yes, I witnessed a very affecting sight, the state of my soul, the nothingness of this world and the misfortune of losing God for ever".

This sight, if it can move a sinner to conversion, is not one likely to cause a steady mind to wander. And yet W. James mentions, as the culminating point of the "Exercises", "a half-hallucinated monoideism" ("L'Expérience religieuse", Paris, 1906, p. 345). Certain critics have reproached the "Exercises" with favouring private inspiration, in the Protestant sense, and with opening a path to illuminism. This criticism was emphasized in the beginning by Thomas de Pedroche, O.P., and arose from [illegible] erroneous interpretation of the fifteenth annotation, in which St. Ignatius advises the director not to substitute his own views for those God may have upon the exercitant. There is no question of leaving him an exaggerated liberty which might draw him beyond the limits laid down by the Church. We therefore see that some find in Ignatius's method illuminism, hallucination, and phantasmagoria; others see in it nothing dazzling, but rather dulness and insipidity. "There are people," said the Abbé Guetée, "who consider this book a masterpiece, and others find it but very ordinary" ("Histoire des Jésuites", Paris, 1858, I, 12). This charge appears again under a different form,—the "Exercises" afford but a scanty method, "a Japanese culture of counterfeited dwarfish trees" (Huysmans, "En Route", Paris, 1896, p. 398). Finally, some Catholics see in it only a book for beginners, a retreat for the time of conversion, and a suitable means to guide one's first steps in the way of perfection. A Protestant clergyman, Rev. Mr. Carter, observes, on the contrary, that the method is rather wide and free, since "one of the first rules laid down by St. Ignatius for the director of a retreat is, that he is to adapt the Exercises to the age, the capacity, the strength of the person about to perform them" ("Retreats with notes of addresses", London, 1893, p. xxv).

The praise bestowed on the "Exercises" far exceeds the adverse criticism. As they are considered a school of sanctity, it is interesting to know what the saints thought of them. The practice of Saints Philip Romolo Neri, Charles Borromeo, Francis de Sales, and Alphonsus Liguori is more eloquent testimony in favour of the "Exercises" than anything they have written; and it will be sufficient to recall the words of St. Leonard of Port-Maurice: "During these holy days we must exercise ourselves in the Divine art of making secure the great important affair of our salvation. As God has inspired the glorious founder of the illustrious Society of Jesus with this precious art, we have but to follow the method laid down by him in his admirable book of the Exercises." Since the approbation given by Paul III in 1548, the "Exercises" have often been favoured by the sovereign pontiffs; the praises they have bestowed on them are mingled with recommendations of retreats, the usage of which, according to St. Francis de Sales, was revived by St. Ignatius. We need mention only Alexander VII, Clement XII, Benedict XIV, Clement XIII, and Pius IX. All their eulogies have been resumed by Leo XIII in his Brief of 8 February, 1900: "The importance of St. Ignatius's book with regard to the eternal welfare of souls has been proved by an experience of three centuries and by the evidence of those remarkable men, who, during this lapse of time, have distinguished themselves in the ascetic paths of life or in the practice of sanctity."

Mgr Camus, Bishop of Belley, calls the "Exercises" a "Golden book, of pure gold, more precious than either gold or topaz" ("Direction à l'Oraison mentale", Lyons, 1623, c. xix, p. 157); Mgr Freppel, "A book that I should call the work of a man of genius, if it were not that of a saint, a wonderful book, which, with the 'Imitation of Christ', is perhaps of all books written by man the one which gains the most souls to God" ("Discours-Panégyriques", Paris, 1882, II, 36, 37); and Cardinal Wiseman: "There are many books from which the reader is taught to expect much; but which, perused, yield him but little profit. Those are few and most precious, which, at first sight, and on slender acquaintance, seem to contain but little; but the more they are studied, the more instruction, the more solid benefit they bestow; which are like a soil that looks bare and unadorned, but which contains beneath its surface rich treasures that must be digged out and drawn from a great depth. To this second class I know no book that so justly belongs as the little work here presented to the public" (Preface to Fr. ed. of the "Exercises" by Seager, London, 1847, p. xi). Janssen says: "This little book, considered by the Protestants themselves as a first class psychological masterpiece, has been for the German nation, and towards the history of its faith and civilization, one of the most important writings of modern times. . . . It has worked such extraordinary influence over souls, that no other ascetic work may be compared to it" ("L'Allemagne et la Réforme", Fr. ed., IV, 402).

Non-Catholics also praise it. "The Spiritual Exercises", according to Macaulay, "is a manual of conversion, proposing a plan of interior discipline, by means of which, in neither more nor less than four weeks, the metamorphosis of a sinner into a faithful servant of Christ is realized, step by step" ("Edinburgh Review", November, 1842, p. 29). More recently, the Canon Charles Bodington, praising the Jesuit missionaries, so lavish of their sweat and blood, really "worthy of hearty admiration and respect", added: "Probably the noble and devotional side of the lives of these remarkable men has been largely sustained by the use of the method of the spiritual exercises left to them by their founder" ("Books of Devotion", London, 1903, p. 130). Finally, a short time ago Karl Holl (see bibliography), a German, declared the "Exercises" to be a masterpiece of pedagogy, which instead of annihilating personality serves to elevate the spirit. The Positivist P. Lafitte, in the lectures delivered by him at the Collège de France, declares: "These Exercises are to my mind a real masterpiece of political and moral wisdom and merit careful study. . . . The destination of these Exercises is to so organize the moral life of the individual that by a prolonged, solitary, and personal labour he himself realizes the most perfect balance of the mind" ("Revue occidentale", 1 May, 1894, p. 309).

PAUL DEBUCHY.

Spiritualism.—The term "Spiritualism" has been frequently used during recent years to denote the belief in the possibility of communication with disembodied spirits, and the various devices employed to realize this belief in practice. The term "Spiritism" (q. v.), which obtains in Italy, France, and Germany, seems more apt to express this meaning. Spiritualism, then, suitably stands opposed to Materialism. We may say in general that Spiritualism is the doctrine which denies that the contents of the universe are limited to matter and the properties and operations of matter. It maintains the existence of real being or beings (minds, spirits) radically distinct in nature from matter. It may take the form of Spiritualistic Idealism, which denies the existence of any real material being outside of the mind; or, whilst defending the reality of spiritual being, it may also allow the separate existence of the material world. Further, Idealistic Spiritualism may either take the form of Monism (e. g. with Fichte), which teaches that there exists a single universal mind or ego of which all finite minds are but transient moods or stages: or it may adopt a pluralistic theory (e.g. with Berkeley), which resolves the universe into a Divine Mind together with a multitude of finite minds into which the former infuses all those experiences that generate the belief in an external, independent, material world. The second or moderate form of Spiritualism, whilst maintaining the existence of spirit, and in particular the human mind or soul, as a real being distinct from the body, does not deny the reality of matter. It is, in fact, the common doctrine of Dualism. However, among the systems of philosophy which adhere to Dualism, some conceive the separateness or mutual independence of soul and body to be greater and others less. With some philosophers of the former class, soul and body seem to have been looked upon as complete beings merely accidentally united. For these a main difficulty is to give a satisfactory account of the inter-action of two beings so radically opposed in nature.

Historically, we find the early Greek philosophers tending generally towards Materialism. Sense experience is more impressive than our higher, rational consciousness, and sensation is essentially bound up with the bodily organism. Anaxagoras was the first, apparently, among the Greeks to vindicate the predominance of mind or reason in the universe. It was, however, rather as a principle of order, to account for the arrangement and design evident in nature as a whole, than to vindicate the reality of individual minds distinct from the bodies which they animate. Plato was virtually the father of western spiritualistic philosophy. He emphasized the distinction between the irrational or sensuous and the rational functions of the soul. He will not allow the superior elements in knowledge or the higher "parts" of the soul to be explained away in terms of the lower. Both subsist in continuous independence and opposition. Indeed, the rational soul is related to the body merely as the pilot to the ship or the rider to his horse. Aristotle fully recognized the spirituality of the higher rational activity of thought, but his treatment of its precise relation to the individual human soul is obscure. On the other hand, his conception of the union of soul and body, and of the unity of the human person, is much superior to that of Plato. Though the future life of the human soul, and consequently its capacity for an existence separate from the body, was one of the most fundamental and important doctrines of the Christian religion, yet ideas as to the precise meaning of spirituality were not at first clear, and we find several of the earliest Christian writers (though maintaining the future existence of the soul separate from the body), yet conceiving the soul in a more or less materialistic way (cf. Justin, Irenæus, Tertullian, Clement, etc.). The Catholic philosophic doctrine of Spiritualism received much of its development from St. Augustine, the disciple of Platonic philosophy, and its completion from Albertus Magnus and St. Thomas, who perfected the Aristotelian account of the union of soul and body.

Modern Spiritualism, especially of the more extreme type, has its origin in Descartes. Malebranche, and indirectly Berkeley, who contributed so much in the sequel to Monistic Idealism, are indebted to Descartes, whilst every form of exaggerated Dualism which set mind and body in isolation and contrast traces its descent from him. In spite of serious faults and defects in their systems, it should be recognized that Descartes and Leibnitz contributed much of the most effective resistance to the wave of Materialism which acquired such strength in Europe at the end of the eighteenth and during the first half of the nineteenth centuries. In particular, Maine de Biran, who emphasized the inner activity and spirituality of the will, followed by Jouffroy and Cousin, set up so vigorous an opposition to the current Materialism as to win for their theories the distinctive title of "Spiritualism". In Germany, in addition to Kant, Fichte, and other Monistic Idealists, we find Lotze and Herbart advocating realistic forms of Spiritualism. In England, among the best-known advocates of

Dualistic Spiritualism, were, in succession to the Scottish School, Hamilton and Martineau; and of Catholic writers, Brownson in America, and W. G. Ward in England.

EVIDENCE FOR THE DOCTRINE OF SPIRITUALISM.—Whilst modern Idealists and writers advocating an extreme form of Spiritualism have frequently fallen into grievous error in their own positive systems, their criticisms of Materialism and their vindication of the reality of spiritual being seem to contain much sound argument and some valuable contributions, as was indeed to be expected, to this controversy. (1) *Epistemological Proof.*—The line of reasoning adopted by Berkeley against Materialism has never met with any real answer from the latter. If we were compelled to choose between the two, the most extreme Idealistic Spiritualism would be incomparably the more logical creed to hold. Mind is more intimately known than matter, ideas are more ultimate than molecules. External bodies are only known in terms of consciousness. To put forward as a final explanation that thought is merely a motion or property of certain bodies, when all bodies are, in the last resort, only revealed to us in terms of our thinking activity, is justly stigmatized by all classes of Spiritualists as utterly irrational. When the Materialist or Sensationist reasons out his doctrine, he is landed in hopeless absurdity. Materialism is in fact the answer of the men who do not think, who are apparently quite unaware of the presuppositions which underlie all science. (2) *Teleological Proof.*—The contention, old as Anaxagoras, that the order, adaptation, and design evidently revealed in the universe postulate a principle distinct from matter for its explanation is also a valid argument for Spiritualism. Matter cannot arrange itself. Yet that there is arrangement in the universe, and that this postulates the agency of a principle other than matter, is continually more and more forced upon us by the utter failure of natural selection to meet the demands made on it during the last half of the past century to accomplish by the blind, fortuitous action of physical agents work demanding the highest intelligence. (3) *Ethical Proof.*—The denial of spiritual beings distinct from, and in some sense independent of, matter inexorably involves the annihilation of morality. If the mechanical or materialistic theory of the universe be true, every movement and change of each particle of matter is the inevitable outcome of previous physical conditions. There is no room anywhere for effective human choice or purpose in the world. Consequently, all those notions which form the constituent elements of man's moral creed—duty, obligation, responsibility, merit, desert, and the rest—are illusions of the imagination. Virtue and vice, fraud and benevolence are alike the inevitable outcome of the individual's circumstances, and ultimately as truly beyond his control as the movement of the piston is in regard to the steam-engine. (4) *Inefficacy and Uselessness of Mind in the Materialist View.*—Again, unless the reality of spirit distinct from, and independent of, matter be admitted, the still more incredible conclusion inexorably follows that mind, thought, consciousness play no really operative part in the world's history. If mind is not a real distinct energy, capable of interfering with, guiding, and influencing the movements of matter, then clearly it has played no real part in the creations of art, literature, or science. Consciousness is merely an inefficacious by-product, an epiphenomenon which has never modified in any degree the movements of matter concerned in the history of the human race. (5) *Psychological Proof.*—The outcome of all the main theses of psychology, empirical and rational, in Catholic systems of philosophy is the establishment of a Spiritualistic Dualism, and the determination of the relations of soul and body. Analysis of the higher activities of the soul, and especially of the operations of intellectual conception, judgment, reasoning, and self-conscious reflexion, proves the faculty of intellect and the soul to which it belongs to be of a spiritual nature, distinct from matter, and not the outcome of a power inherent in a bodily organ. At the same time the Scholastic doctrine, better than any other system, furnishes a conception of the union of soul and body which accounts for the extrinsic dependence of the spiritual operations of the mind on the organism; whilst maintaining the spiritual nature of the soul, it safeguards the union of soul and body in a single person.

MICHAEL MAHER.
JOSEPH BOLLAND.

Spirituals, a general term denoting several groups of Friars Minor, existing in the second half of the thirteenth and the beginning of the fourteenth centuries, who, in opposition to the main body of the order, pretended to observe the Rule of St. Francis in its primitive severity. The derivation of the name is not quite clear. *Homo spiritualis* in the Middle Ages signified a profoundly religious and ascetic man, almost in the same sense as it occurs in I Cor., ii, 15; Gal., vi, 1. In this sense the word is commonly used in the thirteenth century. See examples in "Archiv" of Ehrle-Denifle, III, 600. In its limited application to the Friars Minor, according to some it owes its origin to the Rule of St. Francis, where it is said: "Wheresoever there are brothers who see and know that they are not able to observe the rule spiritually they ought to, and can recur to their ministers". Quite recently, Father Balthasar, O.F.M., traces it with some probability to the terminology of Joachimism. Joachim in fact styles the "Evangelium æternum" as the spiritual Gospel, whose understanding is given through the spiritual intellect of spiritual men who are to preach it (Archiv, I, 53–55). To the present writer it would seem that the name was given by the people, with whom the Spirituals, on account of their austerity, were generally in favour. In fact in a document of 1316 quoted by Ehrle, "Archiv", III, 601, the Spirituals themselves deny that they have ever sought the name of Spirituals, and declare that they want no other name than that of Friars Minor imposed by St. Francis. Moreover, we have also a direct testimony, hitherto overlooked, in the "Vita prima" of Clement V, in which it is recorded that "some called them [the Spirituals] Sarabaites and excommunicated, but by the people they are called Spirituals" (Baluzius, "Vit. Pap. Aven.", Paris, 1693, I, 19). From this it is clear that the name Spirituals is taken in its general sense, when applied by the people to the above-mentioned groups of Friars Minor.

The origin of the Spirituals is not less a subject for controversy than their name. If we are to believe Angelo Clareno's "Chronicle of the seven tribulations" the spiritual tendency in opposition to the larger observance of the community is as old as the order itself. Before modern historians began the history of the Spirituals (1274), Angelo had already told of four persecutions of friars, under Elias, even in the very lifetime of St. Francis himself, and that of Bl. John of Parma under Crescentius in the lifetime of St. Bonaventure. It must be admitted that the spiritual tendency existed shortly after the death of St. Francis (1226). Nevertheless, it cannot be denied that Spiritualism appeared first in those places where the first zealous companions of St. Francis lived, such as central Italy. There is no doubt that Angelo Clareno, Ubertin of Cassale, and others who entered the order shortly after 1260 came in contact with some of those men or their disciples, for in their writings these authors constantly refer to the companions of St. Francis and especially to the works of Brother Leo. To understand and appreciate the movement of the Spirituals, we have above all to consider the Order of Friars Minor in its general aspect in the second half of the thirteenth century, and here we are forced to admit a certain development, perhaps not clearly foreseen by St. Francis when writing the Rule of 1223. Whilst the founder does not appear to have attached very much importance to the scientific studies of his order (see chap. x in the Rule of 1223), it was, however, impossible for such a large moral body as his order to keep aloof from the great speculative and scientific movements of the thirteenth century. Moreover, sovereign pontiffs had bestowed on the Mendicants many privileges to enable them to work with more fruit for the benefit of souls and the service of the Church. Thus, convents of larger dimensions, which in the time of St. Francis were mostly poor hermitages, were being built in the towns, and beside them sprang up churches.

Attendance at the universities and life in towns required certain modifications in the life of the friars, perhaps somewhat different from what it may have been in St. Francis's time. The doubts that arose amongst the friars about the observance of the rule were generally settled by the sovereign pontiffs with a view of meeting new conditions, and at the same time safeguarding the letter of the rule. Whilst the greater part of the order followed without reluctance this natural and logical evolution, some more zealous friars, to whom every development seemed a departure from the first ideal of St. Francis, were strongly opposed to it. A similiar movement had taken place in the Order of St. Dominic, at the same time and in the same region, i. e. that of the Roman Province, which comprised, besides Rome itself, the Marches, Umbria, and Tuscany. Here, towards the end of the thirteenth and in the beginning of the fourteenth centuries, a reform party had arisen who aimed at a return to the primitive simplicity. The point was discussed in several general and provincial chapters, at last in the provincial chapter at Todi (1319). Here (1) the innocence of the zealous friars was asserted, and the discussion of controversial points forbidden; (2) the name *Spirituals*, as a name engendering discord, was not permitted. At the general chapter of the Order of Preachers at Florence (1321), the Master-General Heroæus Natabis confirmed the decrees of Todi, and the whole question seems to have been definitively settled (see bibliography).

Before entering on the history of the different groups of the Franciscan Spirituals, we must determine the points which are characteristic of all of them: (1) Literal observance of the Rule and Testament of St. Francis. (2) An overrated appreciation of the same rule, and especially of the Franciscan poverty. Basing their interpretation on the words of their rule (chap. I), "the rule and life of the Minor brothers is this, namely, to observe the holy Gospel", they considered their rule identical with the Gospel, and as the pope, they reasoned further, cannot dispense from the Gospel, so he cannot dispense from, or even explain, the rule in any other than a literal sense. Consequently they refused the authentic papal interpretations. (3) Joachimism. It was the great error of the Spirituals to combine their arguments in favour of reform with the ideas of Joachimism. Holzapfel (Handbuch, p. 41) goes so far as to say that their poverty was only to cover Joachimism, which was the true aim of the Spirituals. This is certainly exaggerated, for Joachimism existed in the order before the spiritual movement was apparent. Perhaps it is more just to presume that the ideas of Joachimism, promising a better near future, were resorted to by the Spirituals more as a help and a consolation in their manifold hardships and persecutions. It is certain at any rate that, in the great intellectual contest between the Spirituals and the community at Avignon (1310–12), the object of the Spiritualist contention was not Joachimism, but the real observance of poverty, and of the rule in general. However Joachimism was widely spread amongst the *Zelanti*, and was most prejudicial to their cause. To their grievances with regard to the observance of the rule the community replied by accusing them of heresy, taking the proof of their assertion from the writings of the great Spiritual, Olivi.

According to the time and place of origin we have to distinguish three distinct groups of Spirituals: (1) the oldest, those of the Marches of Ancona, about 1274; (2) the Spirituals in Provence, France, under Olivi (d. 1298); (3) the Tuscan group, about 1309.

(1) *The Spirituals of the Marches* are those as to whose fate we are best informed owing to the fact that Angelo Clareno, author of "Historia septem Tribulationum" and "Epistola excusatoria", belonged to them, and after the death of Peter, *alias* Liberatus, of Macerata, 1307, became their leader. (On their history see FRATICELLI.) They were excommunicated by John XXII by the Bull "Sancta Romana et universalis Ecclesia", dated from Avignon, 30 Dec., 1317; they continued to exist, however, as the Fraticelli.

(2) *The Province of Spirituals* were led by Pierre-Jean Olivi. To this group is due the great process between the Spirituals and the Community at the Papal Court at Avignon (1310–12). There are several versions as to what constituted the exact cause. Clareno (Archiv, II, 129) tells us that Arnold of Villanueva, the remarkable lay theologian, went to Charles II of Sicily, and induced the king to write to the minister-general of the order, Gundisalvus of Valleboa, requesting him to desist from interference with the Spirituals of Provence. Meanwhile, Arnold saw Clement V personally, and, on the general's advice, the pope summoned the heads of the Spirituals in Provence: Raymond Ganfredi, Guido of Mirepoix, Bartholomew Sicardi, and others, as also Ubertin of Casale from Italy, commanding them to report upon all observances which were not in accordance with the rule. Another version is given by Raymond of Fronsac, procurator-general of the order (Archiv, III, 18), and by Bonagratia of Bergamo (Archiv, III, 36). They relate that the citizens of Narbonne (1309) appealed publicly in favour of the Spirituals, and particularly the memory of Olivi. The two versions can very well be combined as they do not exclude each other, and are both in themselves very probable. Ehrle (Archiv, II, 360) and Balthasar (Armutstreit, 264), however, are inclined to believe that King Robert, who succeeded to his father, Charles II, in May, 1309, was the one to whom Arnold applied for protection of the Spirituals. Be this as it may, Clement V on 14 April, 1310, promulgated the Bull "Dudum ad apostolatus" (Bull. Franc., V, 65) which was very favourable to the Spirituals convoked to the Papal Court. They obtained full immunity for the time of the process between them and the community, and through the same Bull was instituted a commission of cardinals and theologians to hear and examine both parties. It is unnecessary to go into the details of this discussion, which lasted three years, and in which bitter words were said on both sides; it will suffice to point out the result.

The great aim of the Spirituals had been to obtain authorized separation from the order; for, said Ubertin (Archiv, III, 87), "there will never be peace in the Order until leave is given to those who want it, to observe the Rule literally". The Community on the contrary was opposed to that plan, and continued to discredit their opponents by insisting on the real or pretended errors in the doctrine of Olivi. In 1312 two papal decretals put a term to the *magna disceptatio:* "Fidei catholicæ fundamento" (Bull. Franc., V) and "Exivi de Paradiso" (Bull. Franc., V, I) condemning some errors of Olivi. The second enjoined stricter observance of the rule. Clement V exhorted the French Spirituals, who during the process had withdrawn from the community, to return to their convents, and even went so far as to depose some superiors, who had treated them unfairly (Archiv, II, 140; IV, 34). The Spirituals went to the convents of Beziers, Narbonne, and Carcassonne. But when Clement and the minister general, Alexander of Alexandria, had died (1314), the former harsh superiors were restored (1315). The Spirituals now took a desperate step, in possessing themselves by force of the convents of Beziers and Narbonne, from which they ejected the *Relaxati*. Thereupon they were excommunicated by William of Astre, *custos* of Narbonne (Archiv, I, 544; II, 140). The Spirituals appealed to the General Chapter of Naples in 1316 (Archiv, II, 159). John XXII, who was less favourable to the *Zelanti* than his predecessor, cited them to his court (Bull. Franc., V, 118; 120) in 1317 and had them examined before a commission, with the result that their leaders were imprisoned, and the others detained in convents. The Bull "Quorumdam exigit", 1317 (Bull. Franc., V, 128), was intended to put an end to the question. After some explanations of the rule the pope enjoined them under obedience and pain of excommunication to give up all particularities and to submit to the orders of the minister general, and concluded by saying "great is poverty, but greater is obedience". Twenty-five of the detained Spirituals utterly refused to accept the Bull and were therefore put before the inquisitor, who succeeded in converting twenty-one of them, whilst the four others, refusing to obey and to recognize the principle of papal authority on the Franciscan Rule, were handed over to the civil power, 7 May, 1318, and burned as heretics at Marseilles (see sentence of the inquisitor Michael Monachi in "Miscellanea" of Baluzius-Mansi, Lucca, 1761, II, 248).

(3) *The Spirituals of Tuscany*, appear in 1309 (see Fraticelli). After their flight to Sicily, John XXII directed against them, 23 Jan., 1318, the Bull "Gloriosam Ecclesiam" (Bull. Franc., V, 137) by which they were excommunicated. The movement of the Spirituals failed to obtain its aim; it even led through the errors of its leaders, to schism and heresy. However, the zeal for stricter observance of the rule combined with full submission to authority shortly after revived in the first Observant convents and led the order to new prosperity.

Livarius Oliger.

Spokan Indians, an important tribe of Salishan linguistic stock, closely cognate with the Colville, Cœur d'Alêne, Kalispel, and Flathead, and formerly holding the country upon Spokane River in Eastern Washington and the adjacent portion of Idaho. They were first noted, under the name of Lartielo, by the American explorers, Lewis and Clarke, in 1805. At a later period they came into communication with the traders of the Hudson Bay Company and American Fur Company. In 1839 a Presbyterian mission was established among the Lower Spokan at Chemakane, Washington, and continued until 1849, when it was abandoned in consequence of the massacre of Rev. Marcus Whitman and his companions of the Presbyterian mission of Waiilatpu among the Cayuse. The Spokan chief, Garry, however, gave protection to those at Chemakane until the danger was past. A Spokan primer, published by the missionaries in charge in 1842, was one of the earliest books printed on the Pacific coast.

The Upper Spokan came under the influence of the Jesuit Fathers De Smet, Point, and their successors, about 1841, with the result that that portion of the tribe is Catholic. Throughout the Yakimá war of 1856–8 the Spokan remained quiet, chiefly through the effort of the Catholic missionaries. In 1872 those of Washington, constituting the larger body, were gathered with other cognate tribes upon the Colville reservation, North-eastern Washington, where they now reside. Those in Idaho are associated with the Cœur d'Alêne and are all Catholic. At Colville the Lower band is Protestant, while the Upper band, somewhat smaller in numbers, is Catholic. From perhaps 1200 souls a century ago they have declined (1911) to 600, of whom 96 are on the Cœur d'Alêne reservation. The religious centre for those of Colville is the mission of St. Francis Regis, at Ward, Washington, under Jesuit management. The centre for Cœur d'Alêne is the Jesuit mission of the Sacred Heart, at De Smet, Idaho. In language, primitive custom, and characteristics the Spokan are virtually identical with the Cœur d'Alêne and Kalispel Indians.

James Mooney.

Spoleto, Archdiocese of (Spoletana), in the Province of Umbria, Italy. The city is situated on a spur of Monteluco, which belongs to the Sybilline Mountains. In the neighbourhood are marble quarries and coal mines; mineral earths are also found, and in the forests of Monteluco, truffles. The situation of the city upon a steep rock, protected by the mountain, has made it in all times an important fortress. The cathedral is an interesting Lombard building, begun in 617 by Duke Theudelapius; the campanile belongs to the tenth century, and the façade of 1207 is adorned with a large mosaic by Solsernus; the ornaments of the portal are by Gregorious Meloriantius (twelfth century). The interior, restored in 1640 by Bernini, contains frescoes by Pinturicchio and by Fra Filippo Lippi, who is buried here. Without the city, beyond the Porta della Torre (604?), is the ancient Church of San Pietro (fifth century), with interesting sculptures of the twelfth century. Not far away, on the crest of the mountain is the Church of San Giuliano, where the monastery of San Isacco (sixth century) arose. Other churches are: Il Crocifisso, built on the site and from the materials of an ancient temple; San Ansano, beneath which the foundations of another temple may be visited; San Pietro Martire, with frescoes by Spagna; San Filippo, with four columns of green porphyry taken from the temple of Clitumnus. Among the civic edifices are: Palazzo Comunale, with a collection of paintings; the castle of Cardinal Albornoz; and near the cathedral Palazzo Arroni, which is believed to have been the palace of the dukes of Spoleto. The relics of antiquity include: Porta della Fuga; the ruins of an amphitheatre, and of the Ponte Sanguinario (the bloody bridge); the arch of Drusus and Germanicus.

Spoletium, a city of the Umbrians, received a Roman colony 241 B. C. In 217 Hannibal, after his victory at Lake Trasimenus, was repulsed from the walls of Spoleto. Here, in the Civil Wars, Pompey and Crassus (82 B. C.) conquered the troops of Marius, who, however, found refuge in the city, and were thus the cause of its punishment. Here Æmilianus was proclaimed emperor (249), and killed three months later. In the Gothic war (537) the city surrendered to the Byzantine general, Constantine; but in 546 it was recovered by Totila, and it was not retaken by the Byzantines until 552, when Narses restored the fortifications. In 572 Spoleto became the seat of a Lombard duke, Faroald. He was succeeded by Ariulf, who made frequent expeditions against the Byzantine dominions (579–92 against Ravenna; 592 against Rome). Ariulf was succeeded by Theudelapius, son of Faroald, then came Atto (653), Transemund I (663), Faroald II (703), who ruled conjointly with his brother Wachilap. Faroald II had already captured Classe (the port of Ravenna), when he was obliged by Luitprand to restore it. He was deposed by his son Transemund II (724), who also rebelled against King Luitprand and formed an alliance with Gregory III, with whom he found refuge in 738. Ilderic, who had replaced him as duke, was slain by Transemund in 740, but in 742 the latter was obliged to become a cleric by King Luitprand, and the duchy was conferred upon Agiprand (742), who was succeeded by Theodicius. Under Hildebrand the Duchy of Spoleto was promised to the Holy See by the King of the Franks, and the duke himself was named by Pope Adrian (773), but the succeeding dukes were named by the Frankish emperors. Winigisus aided Pope Leo III against his enemies. Among the dukes of this epoch are the following: Sicco, who was expelled because of his hostility to the Franks, but was received and made duke at Beneventum; Guido I, who divided the duchy between his two sons Lambert and Guido II, the latter receiving the Duchy of Camerino. Lambert distinguished himself in the wars against the Saracens, but disgraced himself by massacres at Rome in 867; he was afterwards deposed (871), then restored (876), but was a second time excommunicated by Pope John VIII. In 883 Guido II united under his sway the entire dukedom, which from this time was called the Duchy of Spoleto and Camerino. After the death of Charles III the Bald (888), Guido had himself crowned Roman Emperor and King of Italy under Pope Stephen V (891); Pope Formosus in 892 also crowned his son Lambert II, who succeeded his father in the dukedom, kingdom, and empire.

THE ARCH OF DRUSUS AND GERMANICUS, SPOLETO

Alberico I, Duke of Camerino (897), and afterwards of Spoleto, married the notorious Marozia; he was killed by the Romans in 924. His son Alberico II made himself also master of Rome and remained there until the election to the papacy of his son John XII. At this time the Emperor Otto I detached from the Duchy of Spoleto the so-called Sabina Langobardica, which was bestowed upon the Holy See. In 967 Otto II united the duchy with that of Capua and Benevento, which was then ruled by Pandolfo Testa di Ferro; but after the death of the latter he detached Spoleto, which was in 989 granted to Hugo, Duke of Tuscany. The duchy was united with Tuscany a second time in 1057, when Godfrey of Lorraine espoused Beatrice, the widow of Boniface, Duke of Spoleto, and it remained so until the death of the Countess Matilda. During the conflict between the papacy and the Emperor Henry IV, the latter named other dukes of Spoleto. After this the dukedom was in the family of the Werners (Guarnieri) of Urslingen, Margraves of Ancona. In 1155 Frederick Barbarossa destroyed the city for having made a prisoner of his ambassador to Apulia. In 1158 the emperor gave the duchy to Guelf VI of Este; Henry VI invested Conrad of Urslingen with it, upon whose death in 1198 it was ceded to Pope Innocent III, the cession being confirmed by Otto of Brunswick. The latter, however, in 1209 occupied the duchy for himself, making Dipold von Vohburg duke. In like manner Frederick II in his different treaties with the Holy See acknowledged its sovereignty over the duchy, but when at war with the papacy he occupied it for the empire, and was always joyfully received by the populace (1240). His son, Manfred, on the other hand, did not succeed in winning the people. The popes maintained at Spoleto a governor, who was often a cardinal. As early as the thirteenth century, and more frequently in the fourteenth, Spoleto was involved in wars with Perugia, Terni, and other cities; in 1324 it was almost destroyed by the Perugians. In 1319 the struggle between the Guelphs and Ghibellines tore the city. Cardinal Albornoz favoured the city for the services which it rendered in the restoration of the papal power, and made it independent of Perugia. At the beginning of the Great Schism, Pietro di Prato succeeded in occupying Spoleto for the anti-pope Clement VII, but was expelled by Boniface IX. Ladislaus II, King of Naples, in 1414 endeavoured in vain to make himself master of the city. Pope Eugenius IV named as governor the Abbot of Monte Cassino, Piero Tomacelli, who was tyrannical to such an extent that the people besieged him in his castle, and in 1438 summoned the bands of Piccinino to free them. In 1480 Cardinal Vitelleschi ended the tyranny of Piero and of the Trinci of Foligno. The former perished in the Castle of Sant' Angelo. During the fifteenth century the city was often at war and in rebellion against the papal power. In the campaign of 1860 in Umbria, Spoleto was heroically defended by Colonel O'Reilly.

Spoleto venerates as its apostle St. Brictius, who is also venerated in other cities of Umbria and Tuscany. It is difficult to discuss the epoch in which he lived because the legend of his life is so full of anachronisms. The names of other martyrs are also recorded at Spoleto, like St. Gregory the Priest; indeed, the name Ponte Sanguinario is said to record a great massacre of Christians. Another martyred bishop was St. Saturnius (270), and during the persecution of Diocletian the martyrdom of St. Savinus, Bishop of Assisi, took place at Spoleto. The first bishop of certain date is Cæcilianus, to whom Pope Liberius wrote a letter in 354. There is record of Bishop Achilles, who during the conflict between Pope St. Boniface and the antipope Eulalius was a visitor of the Church of Rome (418); Bishop Spes (fifth century), who collected the relics of the martyrs and erected many churches; St. Amasius (d. 489); St. Johannes, killed by Totila (546). At the time of Bishop Petrus (573) Spoleto was under Arian rule. It is related that an Arian bishop in Spoleto wished to enter the Church of San Pietro, then the cathedral, by force, but was stricken with blindness. To Bishop Chrysanthus (591) St. Gregory the Great wrote four letters, in one of which he admonished him not to discipline fugitive monks so lightly. Other bishops were: Adeodatus (about 777); Siguald (827), formerly Abbot of Echternach; Adalbert (1015), who built the new cathedral and the episcopal residence within the city. After he had destroyed the city, Barbarossa presented to the cathedral the so-called Madonna of St. Luke, a Byzantine work with inscriptions of a dialogue between Mary and Jesus. Bishop Nicolò Porta, who became bishop in 1228, was transferred in 1236 to the Patriarchate of Constantinople. Bartolommeo de Bardi, O.Min. (1320), rendered excellent services as Governor of Terni. In 1417, on the death of Bishop Jacopo, who was a partisan of Pope John XXIII, the clergy wished to proceed to the election of a new pastor but the people prevented them, proclaiming as bishop Nicolò Vivari, the nominee of Gregory XII. Again in 1433 the clergy wished to revive their right of electing a bishop, but the intervention of Eugenius IV prevented them. Other bishops were: Berardo Erubi (1448), afterwards cardinal, who played an important part in the government of the church; Alessandro Farnese (1555); Alfonso Visconti (1601), founder of the seminary, which was enlarged by his successor Maffeo Barberini (1603), afterwards Pope Urban VIII, who ordered the restoration of the cathedral. After the death of Cardinal Locatelli (1812), Napoleon nominated Bishop Antonio de Longo, whom the canons were unwilling to obey, and were therefore nearly all exiled. In 1820 Spoleto became a metropolitan see and the ancient Diocese of Norcia was taken from its territory. Of the archbishops we should record: Mastai Ferretti (1827–32), afterwards Pius IX, whose episcopal rule was noteworthy for the manner in which (1837) he persuaded four thousand rebels to lay down their arms.

To the Diocese of Spoleto has been united that of Bevagna (*Mœvania*), an ancient city, which venerates as first bishop St. Vincent the Martyr; the first bishop of certain date is Innocentius (487). In the time of St. Gregory the Great it was very difficult to provide a bishop for this see, but in 649 and in 844 bishops are again recorded. Bevagna (Mævania, where, in ancient days the white bulls destined for the sacrificial altars were pastured) is situated twenty-two miles south-east of Perugia, at the confluence of the Clitunno and Tupino, and contains 6000 inhabitants. The ancient cathedral was dedicated to St. Michael. The body of Blessed James Bianconi is preserved at Bevagna. Blessed James was born there in 1220. At sixteen he was received into the Dominican order at Spoleto. After his ordination, he devoted his energies especially to the work of extirpating the heresy of the Nicolaites from Umbria, and finally succeeded in converting its chief propagator, Ortinellus. After a life of extraordinary austerity James died on 15 August, 1301. In later times his remains were exposed on three occasions and were found to be incorrupt. Numerous miracles were attributed to his intercession and even to-day they are of not rare occurrence. Pope Boniface IX has granted indulgences to all those who visit his relics during the first three days of May; Pope Clement X extended the celebration of his feast (23 August) to the whole Dominican Order (cf. Jacobilli, "Vita del beato Giacomo da Bevagna", Foligno, 1644; Piergi, "Vita del beato Giacomo Bianconi da Bevagna", Rome, 1729). Another Blessed James, a Franciscan martyr, who died on 2 September, 1377, is honoured at Bevagna (see "Acta SS.", I Sept., 595–6; "Année dominicaine", VIII, 1898, pp. 779–94).

The Cathedral, Spoleto
Begun, 617; campanile, X Century

Another ancient diocese united with Spoleto is Trevi. The town of Trevi (in ancient days Trebia), about four leagues from Spoleto, is situated on the right bank of the River Clitunno, on a rugged slope at the extremity of Monte Petino. It is in Umbria and so is to be distinguished from the Latin town Trebia. It was founded probably as early as the fifth century B. C. Pliny speaks of it as flourishing and calls its inhabitants "Trebiates Umbriæ populi". There is evidence to show that the Faith was preached there before the end of the second century. In A. D. 296 Pope Marcellinus consecrated, as first Bishop of Trevi, Æmilianus, an Armenian, who, with his companions Hilarian, a monk, and Hermippus and Denis, was martyred on 28 January, 302, under Diocletian. The body of Æmilianus was brought to Spoleto and interred there. During the troubles caused by the barbarbarian and internal wars the relics were concealed, but in 1660 they were discovered in the cathedral. Up to the year 1050 nine other bishops of Treviare known from the lists of prelates present at synods in Rome; they include: Constantine, in 487; Laurentius, in 499; Propinquus, in 501; Grisus or Priscus, in 743; Valerimus, in 769; Paulus in 826; and Crescentius, in 853. About the middle of the eighth century Trevi came under the temporal dominion of the Church. In 840 and 881 the city suffered from the Saracen inroads, and in 915 and 924 from an Hungarian invasion. The Trevans sided with the Guelph party in their struggles with the Ghibellines. Among the natives of Trevi the following may be mentioned: Saints Vincent, Bishop of Bevagna, and Benignus, deacon, martyrs; St. Constantinus, Bishop and patron of Perugia (feast 29 January); Blessed Thomas of Naples, hermit of the Institute of Celestine V; Benedetto Valenti, the learned jurisconsult; and Virgilio Lucarini, canon of St. George's Velabro, who founded the college of Trevi, which was opened in 1674. Giotta da Vespignano painted a beautiful fresco in the Church of the Holy Cross. In the Church of San Martino was a very valuable painting, representing "The Coronation of the Blessed Virgin in Heaven", attributed by some to Giovanni Spagna, but more likely a work of Pietro Vannucci (Perugino); it is now in the Pinacoteca Vannucci, Perugia.

In the valley below the town is the celebrated church and shrine of Santa Maria delle Lagrime (Our Lady of the Tears). The story of the miraculous image is briefly this: Diotallevio d'Antonio, who lived near the road leading from Spoleto to Trevi, had painted an image of the Madonna and Child on the outside wall of his house. One day tears were noticed falling from the eyes of the Madonna. The report of this extraordinary phenomenon, which continued for some time, spread far and wide. Official records of the occurrence were made by the municipal authorities. Many graces and favours were obtained through prayer before the picture. A small chapel was erected in August, 1485, and Mass was daily offered therein. On 26 July, 1846, Santa Maria delle Lagrime was chosen patroness of the town. On 27 March, 1487, the large basilica was begun, which on its completion, 8 March, 1489, was confided to the Olivetans. A contemporary account of the miraculous origin of the shrine by Father Francesco Mugnoni, an Olivetan, who resided within a short distance of d'Antonio's house, is preserved. The basilica contains Perugino's "The Adoration of the Magi", and Giovanni Spagna's "Deposition from the Cross". The shrine has been enriched with many beautiful offerings in commemoration of the numerous benefits conferred upon the people of the neighbourhood and visiting pilgrims through the intercession of Our Lady of Tears. Notable among these is a representation, in silver relief, of the city of Ferni given by its inhabitants and neighbouring towns in remembrance of their deliverance from the plague.

The archbishop, Mgr. Domenico Serafini, a Benedictine of the Congregation of Monte Cassino, was born at Rome on 3 August, 1852; professed at Subiaco on 16 June, 1874; ordained priest on 21 October, 1877; appointed procurator-general of the congregation five years later; in June, 1892, he was elected abbot-general; on 19 April, 1900, he was named archbishop and on 6 May, 1900, consecrated, in succession to Mgr. Mariano Elzeviro Pagliari (born at Camerino, in the Marches, on 11 September, 1834, and named to the see on 28 February, 1879). Spoleto has no suffragan see; it has 172 parishes, with 170 secular and 60 regular clergy, 92,000 souls, 14 monasteries for men, and 11 convents for women, 3 colleges for boys, and 2 for girls. Its seminary serves for southern Umbria. A Catholic weekly and a religious periodical are published here.

U. BENIGNI.

Spondanus (DE SPONDE), HENRI, a convert from Calvinism, Bishop of Pamiers, and one of the continuators of Baronius, b. at Mauléon, in the French Department of Basses-Pyrénées, 6 January, 1568; d. at Toulouse, 18 May, 1643. After studying humanities at the Calvinist college of Orthez, he accompanied the royal ambassador to Scotland and, upon his return, took up the study of jurisprudence. In 1589 he was jurist at the Parliament of Tours. Convinced of the truth of the Catholic religion by the writings of Bellarmine and the instructions of Duperron, he became a Catholic, 21 Sept., 1595. In 1600 he accompanied Cardinal de Sourdis to Rome, where he was ordained priest on 7 March, 1606; Pope Paul V then appointed him reviser of the briefs of the Pœnitentiaria. In 1625 he was created Bishop of Pamiers, in which capacity he laboured with great zeal for the preservation of Catholicism and converted numerous Protestants. Owing to ill-health he resigned his diocese in 1639 and retired to Toulouse. His writings are: "Les cimetières sacrés" (Bordeaux, 1596); "Annales ecclesiastici Cæsaris Baronii in Epitomen redacti" (Paris, 1612); "Annales sacri a mundi creatione ad ejusdem redemptionem" (Paris, 1637), an epitome of the "Annals" of Tornielle; "Annalium Baronii continuatio ab a. 1197 quo is desinit ad a. 1622" (Paris, 1639).

Spontini, GASPARO LUIGI PACIFICO, composer, b. at Magolati, near Jesi, Ancona, 14 Nov., 1774; d. there, 14 Jan., 1851. He was intended for the Church, but decided on a musical career. In 1791 he entered the Conservatorio de' Turchini at Naples, where he had Sala, Tritto, and Tarantino as masters, and soon displayed his skill in composition. Between the years 1796 and 1799 he had written six operas, which were duly produced in Rome and Florence, and in 1800 succeeded Cimarosa as Court composer at Palermo. In 1803 he settled in Paris, and for a time did not make any marked impression, but in 1804 his "Milton" (one-act opera) attracted considerable attention, and his triumph was assured by the production of "La Vestale" (15 Dec., 1807) and "Fernando Cortez" (28 November, 1809). He was appointed conductor of Italian Opera at the Odéon in 1810, and brought forward many notable works by various composers.

GASPARO LUIGI PACIFICO SPONTINI
From a contemporary portrait

His "Olympic" (15 Dec., 1819) he regarded as his best opera, yet it was not a success at first. At length after considerable revision he again presented it on 28 Feb., 1826, when his judgment was finally endorsed by the public.

Removing in 1820 to Berlin, where he was appointed chief *Kapellmeister* at a salary of 4000 thalers annually and a yearly benefit concert, he composed music for Moore's "Lalla Rookh", produced at the Royal Palace on 27 Jan., 1821. His "Agnes von Hohenstaufen" got its first hearing on 12 June, 1829. In 1829 he received the honorary doctorate of Halle University, and in 1834 he conducted a performance of his "Vestale" at Hamburg. He visited his native place in 1835, and journeyed to England in 1838, returning to Paris, where he was made a member of the Institute in the same year. A revised version of his "Agnes" was given in 1837, after which he ceased writing operas. In 1842 he left Berlin for good (being succeeded by Meyerbeer), and went to Rome, where many distinctions awaited him. The pope created him Count of St. Andrea in 1844, in which year he returned to Paris. That year is memorable for a visit to Dresden, on which occasion Richard Wagner got up his "Vestale" conducted by the composer. Feeling his end approaching he retired to Magolati in 1850. Although he loomed so large in the first half of the last century, Spontini's music is now almost on the top shelves. He was not a very loveable personality owing to his egotism, pride, and bad temper, but he was generous to needy musicians and at his death he bequeathed all his property for charitable purposes.

W. H. Grattan-Flood.

Sporer, Patritius, moral theologian, b. at Passau, Bavaria; d. there, 29 May, 1683. In 1637 he entered the Order of Friars Minor in the convent of his native town, which then belonged to the religious Province of Strasburg. He taught theology for many years, obtained the title of *Lector jubilatus*, and was also the theologian of the Bishop of Passau. Sporer is the author of several works: (1) "Amor Dei super omnia" (Würzburg, 1662); (2) "Actionum humanarum immediata regula Conscientia moraliter explicata atque ad disputationem publicam exposita" (Würzburg, 1660); (3) "Theologia moralis, decalogalis et sacramentalis" (3 folio vols., 1681; re-edited, Salzburg, 1692; Venice, 1724, 1726, 1755, 1756). Some editions have additional notes by K. Kazenberger and Ch. Mayr, two well-known Franciscan moralists. The latest edition with up-to-date supplements is by Irenæus Bierbaum, O. F. M. (3 vols. 8vo, Paderborn, 1897-1901; 2nd ed., 1901-5).

Sporer was one of the best moralists of his time and is much appreciated even to-day. St. Alphonsus Liguori often quotes him and Lehmkul numbers him amongst the classical authors of moral theology. For other testimonies see Preface of Bierbaum's edition. As to his moral system he follows Probabilism. In questions at issue between St. Thomas Aquinas and Duns Scotus he defends and follows the latter, as for instance in the question of indifferent human actions. Very often also Sporer lays under contribution his own large experience as director of souls, thus rendering his work all the more useful.

Joannes a S. Antonio, *Bibliotheca universa Francescana*, II (Madrid, 1732), 426; Minges, *Gesch. der Franziskaner in Bayern* (Munich, 1896), 227; Hurter, *Nomenclator*, IV (3d ed., Innsbruck, 1910), 944.

Livarius Oliger.

Sportelli, Cæsar, Venerable, b. at Nola in Bari, Italy, 29 March, 1702; d. at Pagani, 19 April, 1750. His mother, who died with the reputation of a saint, brought Cæsar up with all care. He became a distinguished lawyer, uniting the perfection of a Christian life with the duties of his profession. He was thirty-three when under the guidance of Fr. Falcoia of the "Pii Operarii" he joined St. Alphonsus, and was the first clerical novice of the saint's institute. He was ordained priest by his director, now become Bishop of Castellamare. Sportelli was St. Alphonsus's first and most faithful companion. When others abandoned him, Sportelli only clung more closely to him and like himself was determined, at any cost, to devote his life to the evangelization of abandoned souls. In this he succeeded admirably, nor was he less successful in his work for priests and religious. Severe with himself, he was full of charity to others. There was nothing austere in his virtue: it drew all hearts to him. His union with God was manifest, and although he preached the great truths with vehemence he repelled no one. He was the saint's advisor and helped him more than anyone else to extend the influence of his Institute. In times of great difficulty he founded the house of Mater Domini, Caposele, and the house of Pagani in which St. Alphonsus lived and died and where his relics repose. He wore himself out working and on his way to preach a retreat he was struck by apoplexy in a lonely place. Bandits helped him to reach Pagani, where after a tedious illness he died on the day he had foretold. Three years and seven months after his interment it was decided to transfer his remains to a place in a newly built crypt. The coffin was opened in the presence of the Bishop of Nocera, Right Rev. Gerard Volpe, the Abbot of Angri, D. Thomas Cortora, and others. The vestments in which the servant of God had been clothed turned to dust, while the body was in perfect preservation, flexible and exhaling a sweet fragrance. The countenance was beautiful and when a vein was opened blood flowed just as if he were living. St. Alphonsus wished to take steps at once for his beatification, but was prevented from doing so by many difficulties. It was not till 1899 that the cause was introduced and that he was declared venerable.

Landi, *Notizia de P. Sportelli;* A Redemptorist, *Compendio della vita del Servo de Deo P. D. Cesare Sportelli* (Avelleno, 1895); *Introductio Causæ.*

J. Magnier.

Springfield, Diocese of (Campifontis), in Massachusetts, erected in June, 1870. It comprises five counties of Central and Western Massachusetts: Worcester, Hampden, Hampshire, Franklin, and Berkshire. Its area is 4320 square miles, a little over half that of the entire state. According to the census of 1910 the population of the territory within the limits of the diocese was 843,212. Of this number 323,122 are Catholics.

Early History.—Some of the early Puritans of Central and Western Massachusetts became Catholics in a remarkable manner: children taken captive by French and Indians at Deerfield and Westboro were carried to Canada and there educated in the Catholic Faith. They married in Canada, and the descendants of some of them attained eminence. Joseph-Octave Plessis, who in 1806 became Archbishop of Quebec and in a trying time ruled the Canadian Church with firmness and prudence, was a grandson of Martha French, who a little over a century before had been carried away from the home of her father, Deacon French of Deerfield. Some Acadians were quartered at Worcester in 1755, but the last of them returned to Canada in 1767. At the time of the Revolutionary War many Irishmen lived in Central and Western Massachusetts. Some of them must have been Catholics, but there is no evidence that they contributed in any way to the upbuilding of the future Church of Springfield. The foundations of this Church were laid by Irish immigrants, who in 1826 and later came to Worcester, to Chicopee (then a part of Springfield), and to Pittsfield, to dig canals, to lay railroads, and to build and operate factories. The faith of these immigrants was nourished by apostolic men, of whom the foremost was Rev. James Fitton. He was born in Boston in 1805 and ordained priest by Bishop Fenwick (1827). After a short stay among the Indians at Eastport, Maine, he was made pastor at Hartford. His missionary zeal carried him into all parts of New England. In Massachusetts his labours extended from "Boston on the east, to Great Barrington in the Berkshires on the west". In 1830 he said Mass in Chicopee. On 7 July, 1834, he laid at Worcester the foundation of the first church which was built in the territory now ruled by the Bishop of Springfield. He became pastor of Worcester in 1836. Contemporary with the erection of the church at Worcester, Father Fitton purchased land south of the town, on which he built a school. This property he deeded (1843) to the Rt. Rev. Benedict J. Fenwick, Bishop of Boston. Bishop Fenwick erected upon it the College of the Holy Cross, which he induced the Jesuits of Maryland to assume charge of. This was the first Catholic college in New England. It began with seventeen students. It has become the largest of the Catholic colleges of the United States, whose students all follow a classical course, including Greek. Its influence is now felt in all parts of the American possessions. The parish at Worcester was composed mainly of Irish, though it included also French, English, and Americans. From Worcester Father Fitton made missionary trips to the towns along the Blackstone, and to the settlements along the Western Railroad. This work was continued and developed by the pastors who succeeded him at Worcester. Of these the most energetic, as a missionary, was Rev. Matthew W. Gibson, who in thirteen years built churches in nine places of Worcester County and in ten more established parishes.

The first resident pastor of Western Massachusetts was Rev. John D. Brady. In 1841 he assumed charge of the parish of Chicopee, which extended over four counties. For four years he shepherded this vast parish alone. In 1845 Rev. Bernard O'Cavanaugh came to him as an assistant. Rev. Jeremiah O'Callaghan, the zealous and able, if somewhat eccentric, missionary of Vermont, had said Mass at Pittsfield in 1835 and yearly thereafter till 1839. This remarkable man in his old age founded the first Catholic parish in Holyoke. In 1844 Father Brady built the first church at Pittsfield, of which Rev. Bernard O'Cavanaugh became pastor in 1848. His successor, Rev. Patrick Cudahy, the "church builder of the Berkshires", and Rev. William Blenkinsop, who continued the work of Father Brady in the Connecticut Valley, organized into new parishes and prepared for further development the Church which was now firmly established in Western Massachusetts. To this development Pius IX contributed when he made of Central and Western Massachusetts a diocese with its see at Springfield.

Bishops.—Rt. Rev. Patrick T. O'Reilly, the first Bishop of Springfield, was born in Cavan, Ireland, 24 Dec., 1833. He came to Boston in his boyhood. He studied classics at St. Charles's College, Maryland, theology at St. Mary's Seminary, Baltimore, and was ordained in Boston, 15 August, 1857, by Bishop Bacon of Portland. He served as assistant to Father Boyce at St. John's Church, Worcester, till 1862, when he was sent to organize the parish of St. Joseph's, Boston. In 1864 he returned to Worcester as pastor of St. John's. There he remained until he was appointed Bishop of Springfield (28 June, 1870), being consecrated 25 September of the same year. He ruled the Diocese of Springfield for twenty-one years and a half. During this time its population increased from 90,000 to 200,000; its priests from 43 to 196; its religious women from 12 to 321; its parishes from 43 to 96; its schools from 2 to 30. Bishop O'Reilly confirmed 77,000 persons. He dedicated 45 churches, and laid the corner-stones of nearly a hundred buildings consecrated either to religion or to education. He gave encouragement to works of charity. The hospital of the Sisters of Providence at Holyoke and the orphan asylums at Holyoke and at Worcester were begun during his administration. He died 28 May, 1892. He was succeeded by the present (1911) bishop, Rt. Rev. Thomas D. Beaven, D.D., who was born at Springfield, March, 1851. He studied at Holy Cross College and at the Grand Seminary, Montreal, and was ordained to the priesthood, 18 Dec., 1875. He laboured at Spencer for three years as assistant and for ten as pastor. In 1888 he was made pastor of the Church of the Holy Rosary, Holyoke. Four years later (31 July) he was appointed Bishop of Springfield. He was consecrated 18 Oct., 1892. Bishop Beaven is an organizer. He has applied to the temporal affairs of the Church sound business principles. He has developed the school system of the diocese and made it efficient. He has encouraged the establishment of high schools and academies, and organized and developed the charitable institutions of his diocese. Brightside, with its infants' home, its orphan asylum, its Beaven-Kelly Home for aged men, owes its existence to his inspiration and largely to his generosity. During his administration hospitals have been opened in Worcester, Springfield, Montague City, and Adams, orphan asylums at Holyoke, Worcester, and Leicester, a House of the Good Shepherd at Springfield, and homes for working girls in many places. Springfield has for years been remarkable among the dioceses of the country for the number of its vocations to the priesthood and the religious life. Four of its priests have become bishops during the present administration; Rt. Rev. Thomas J. Conaty, D.D. (Monterey and Los Angeles); Rt. Rev. Philip J. Garrigan, D.D. (Sioux City); Rt. Rev. Daniel F. Feehan, D.D. (Fall River), and Rt. Rev. Jospeh J. Rice, D.D. (Burlington).

Causes of Growth.—The growth of the Diocese of Springfield is due largely to immigration. The Irish were quickly followed by Canadians, and these by Poles and Lithuanians. The Italians and the Syrians came later. These immigrants came to Massachusetts to get a market for their labour. They prospered and their descendants are among the most esteemed citizens of the commonwealth.

Religious Communities.—About 380 religious women are engaged in charitable work in the diocese. Most of these are Sisters of Providence. The Sisters of Mercy (the first religious community to enter the diocese) conduct orphan asylums at Worcester and Leicester, the Grey Nuns an orphanage at Worcester, the Little Franciscan Sisters of Mary an old people's home at Worcester; and the Sisters of the Good Shepherd have a house at Springfield. The educational work of the diocese requires the services of 750 sisters. The Sisters of St. Joseph have a normal college in Springfield, an academy at Chicopee, and high schools in many parishes. They also do a great part of the parochial school work. The Sisters of Notre Dame conduct high schools at Worcester, Springfield, Holyoke, and Chicopee. Other communities of women engaged in teaching are: the Sisters of Holy Cross and of the Seven Dolors, Sisters of St. Ann, Sisters of the Assumption, Sisters of Providence, Faithful Companions of Jesus, Sisters of St. Joseph (Hartford), Presentation Nuns (St. Hyacinth, P. Q.), Presentation Nuns (Fitchburg, Massachusetts), Felician Sisters, Franciscan Sisters (Buffalo), and Daughters of the Holy Ghost. The religious orders of men represented in the diocese are: the Jesuits, at Worcester; the Fathers of La Salette, at Fitchburg, Ware, and Westfield; the Franciscans, at Chicopee and Holyoke; the Vincentians, at Springfield; the Fathers of the Assumption, at Worcester; and the Xaverian Brothers, at Worcester and Millbury.

Statistics.—Official reports for 1911 give the following figures: 300 diocesan and 14 regular priests (not including the Jesuits at Holy Cross and the Assumptionists of the Apostolic School); 160 parishes; 28 missions with churches and 10 stations; 2 colleges attended by 600 students; 4 academies; 61 parochial schools, with 25,600 pupils; 5 orphan asylums; 1 infants' home; 27,000 young people under Catholic care; 6 hospitals; 5 homes for the aged; 3 working girls' homes; 1 industrial school; and 1 House of the Good Shepherd.

Thomas F. Cummings.

Sprott (Spratt), Thomas, Venerable, English martyr, b. at Skelsmergh, near Kendal, Westmoreland; suffered at Lincoln with Thomas Hunt, 11 July, 1600. Sprott was ordained priest from the English College, Douai, in 1596, was sent on the mission that same year, and signed the letter to the pope, dated 8 November, 1598, in favour of the institution in England of the archpriest. Hunt, a native of Norfolk, was a priest of the English College of Seville, and had been imprisoned at Wisbech, where he had escaped with five others, some months previously. They were arrested at the Saracen's Head, Lincoln, upon the discovery of the holy oils and two Breviaries in their mails. When brought to trial, though their being priests was neither proved nor confessed, nor was any evidence produced, the judge, Sir John Glanville, directed the jury to find them guilty, which was done. The judge died sixteen days afterwards under unusual circumstances, as Dr. Worthington (quoted by Bishop Challoner) records.

John B. Wainewright.

Squamish Indians.—A considerable tribe of Salishan linguistic stock, speaking a distinct language, holding the territory about Squamish River and Howe Sound, above Fraser River in South-western British Columbia. From possibly 2000 souls a century ago they have dwindled, by smallpox visitation in 1862 and from results of earlier dissipation, to 690 in 1890, and to 396 in 1910, on six small reservations under the Fraser River agency, viz. Mission or Burrard Inlet (219), False Creek, Kapilano Island, Burrard Inlet No. 3, Squamish or Howe Sound, and Seymour Creek. The Squamish are first mentioned by the voyager, Vancouver, who met and traded with them in 1792, but regular contact with the whites dates from the establishment of the Hudson Bay Company trading posts in Lower British Columbia (1810–20). The earliest missionary worker was Father (afterwards bishop) Modeste Demers, who made a short missionary visit to the Lower Fraser in 1841. In 1857 the work of civilization and Christianization was regularly taken up by the Oblates—among them Fathers Casimir Chirouse, Léon Fouquet, and Pierre Durieu—with such success that the entire tribe is long since civilized and almost entirely Catholic. The educational work is in charge of the Sisters of the Holy Infant Jesus at the Squamish Mission, Burrard Inlet, by whom, according to the official report (1910), "every attention and care possible is being bestowed on the children". The Indians are described as subsisting by farming, fishing, hunting, lumbering, and labouring, with good dwellings and stock well cared for; very industrious and of good morals, excepting a few intemperates. In this connexion Hill-Tout says: "Many of them have to-day, I am told, snug little sums judiciously invested by their good friend and spiritual director, the late Bishop Durieu, in safe paying concerns. It is only fair to say, however, that they deserve to be prosperous. They are probably the most industrious and orderly band of Indians in the whole province, and reflect great credit upon the Roman mission established in their midst."

In their primitive condition the Squamish resembled, in their leading characteristics, the Sechelt, Songish, Lillooet, and other Salishan tribes of Southern British Columbia. They lived chiefly by fishing, their main dependence being the salmon. They also hunted the deer with dogs, driving the deer into the water and there shooting it from canoes. Roots and wild berries completed their commissary. Their ordinary houses were enormous communal structures from 20 to 40 feet in width and from 200 or 300 even to 600 feet in length, built of cedar planks, each family having its own separate fire and sleeping platform. Back from the coast they had also the communal semi-subterranean round house of the interior tribes. In household furnishing, baskets, of which they had a great variety, predominated. Their greatest skill was displayed in the shaping of their great dug-out cedar canoes, of which they had several types. Like their neighbours the tribe was divided into nobles, commons, and slaves. Chiefship was hereditary, each village being independent of the others. Polygamy was common. The dead were buried in boxes or canoes, laid upon the surface of the ground, and there were many peculiar mourning regulations, particularly as concerned the widow. Abortion was common and female infants were deliberately strangled by wholesale. A suitor signified his purpose by sitting beside the door of the girl's house for four days and nights without eating or drinking. The "potlatch", or ceremonial gift distribution, was the great intertribal festival; an instance is on record where over 2000 persons sat down to the feast and goods to the value of $5000 were given away. The puberty ordeal for girls included a four days' complete abstinence from food or drink, followed by an agonizing scratching over the whole body with thorny brambles. There were hypnotic dance performances and a barbarous dance common also to several other tribes, in which the principal dancer held in his hands a live dog which he devoured piecemeal as he danced. According to their cosmogony the human race sprang from a race of animals with semi-human characteristics, the world being afterwards made fit for human occupation by four brother culture heroes. The best summary of their mythology and analysis of the language is that given by Hill-Tout. See also Lillooet Indians, Sechelt Indians, Songish Indians.

Affairs, Annual Rept.* (Ottawa); Morice, *Catholic Church in Western Canada* (2 vols., Toronto, 1910); Vancouver, *Voyage of Discovery, etc., 1790–5* (6 vols., London, 1801).

James Mooney.

Squiers, Herbert Goldsmith, army officer and diplomatist; b. at Madoc, Canada, 20 April, 1859; d. at London, 19 Oct., 1911. The son of John I. and Elizabeth Squiers, he was educated at Canandaigua Academy, Minnesota Military Academy, Maryland Agricultural School, and Fordham University (A.M. and LL.D.); in 1877 he became second lieutenant, U. S. Army, and from 1885 to 1890 U. S. military instructor at St. John's College, Fordham; he left to join his regiment, the 7th Cavalry, at the Indian Battle of Wounded Knee, and resigned as first lieutenant, 1891. In 1894 he became second Secretary at the Legation at Berlin, and in 1898 first Secretary at the Legation at Peking, where he and his family were received into the Church by Archbishop Favier; during the siege of the Legations, 1900, he was chief of staff under Sir Claude Macdonald, the British Minister to China, who with de Giers, the Russian Minister, pronounced "Mr. Squiers's services invaluable in keeping people and things together in the midst of exaggerated racial feelings"; for his "bravery and distinguished services" he was formally thanked by the British Government and by President McKinley. In 1902 he was appointed Minister to Cuba; he resigned in 1905 but was the next year appointed Minister to Panama, in both of which offices his tact and firmness and his Catholic faith were of immense service to all in solving many complicated questions of these early days. He was devoted to his Church, and was very charitable but unostentatiously so. He helped many deserving students to a Catholic education. One of his last acts was to establish at the Catholic University two burses of $250 each for ten years. Broken in health by eight years in the tropics, he spent the last two years of his life cruising in European waters. His last words after receiving the last rites were: "I am alone with God". His wonderful collection of antique Chinese porcelain was purchased for him by Mr. Pethick, the famous connoisseur. Many were bought to assist Chinese friends. His first wife, Helen L. Fargo (m. 1881, d. 1886), left him four children, Gladys (Mrs. Rousseau), Georgia (Mrs. H. Whitman), Fargo (d. 1906), and Helen. In 1889 he married Harriette Bard Woodcock, who survives him, with their sons Herbert G., Bard, and John Astor Squiers.

JOHN SCULLY.

Squillace, DIOCESE OF (SQUILLACENSIS), suffragan of Reggio, in Calabria, Southern Italy. The city of Squillace, in the civil Province of Catanzaro, stands near the Ionian Sea at the base of a hill between the two branches of the River Alessi, and is a centre of the wine, olive, and silk industries; it also possesses lead and iron mines, and earthenware works. The ancient Scyllaceum, or Scylletium, had a harbour, which is now a marsh. According to Cassiodorus, who was born there and died in a monastery founded there by him, the city was established by an Athenian colony. Invasions of Saracens in the ninth and tenth centuries, a landing of the Turks in 1595, and the earthquake of 1783 caused its ruin. The diocese possesses the bodies of many saints, including: St. Achatius, martyr, in the cathedral; St. John Terrestre, abbot, a contemporary of St. Nilus in the (then Basilian) monastery of Stilo; and the holy monks Bartolomew, Nicholas, and Basil. St. Bruno established two Carthusian monasteries within the limits of the diocese, S. Maria dell' Eremo and S. Stefano in Nemore, the latter having the less rigorous discipline.

The first known Bishop of Squillace is Gaudentius (465); Zachæus accompanied Pope Vigilius to Constantinople (551); John, previously Bishop of Lissa, in Dalmatia, having been driven out by the barbarians, was transferred hither by St. Gregory the Great. After Bishop Demetrius (870), no bishops are mentioned until the Norman conquest, after which Count Roger erected the cathedral, into which the Latin Rite was introduced, while the Greek Rite continued much longer in the diocese. The series of bishops commences again with Theodore Mismer (1094). Other bishops were: Francesco degli Arcesi (1418–76); Cardinal Enrigo Borgia (1539); Cardinal Guglielmo Sirleto (1568), who resigned in favour of his nephew, Marcello (1573), the founder of a monastery for penitent women, and famous for his erudition; Tommaso (1594) and Fabrizio Sirleto (1693); Nicolò Micheli, who enlarged the seminary. The territory of Squillace contains Stilo, the ancient Consilinum, three bishops of which are known, Sabinus (495) being the earliest. The diocese contains 59 parishes, with 198 secular and 24 regular priests, 130,000 inhabitants, 5 convents of men and 1 of nuns.

CAPPELLETTI, *Le chiese d' Italia*, XXI.

U. BENIGNI.

Stabat Mater, the opening words of two companion hymns, one of which (Stabat Mater Dolorosa) is in liturgical use, while the other (Stabat Mater Speciosa) is not. They celebrate the emotions of Our Lady at the Cross and at the Manger—Calvary and Bethlehem—respectively, and may conveniently be differentiated here by the third word (*Dolorosa, Speciosa*). The Speciosa contains thirteen (double) stanzas of six lines; the Dolorosa, ten. In other respects the two hymns are in quite perfect parallelism of phrase throughout, as the first stanza may serve to illustrate:

$$\text{Stabat mater}\left\{\begin{array}{l}\text{dolorosa}\\ \text{speciosa}\end{array}\right.$$

$$\text{Juxta}\left\{\begin{array}{l}\text{crucem lacrimosa}\\ \text{fœnum gaudiosa}\end{array}\right.$$

$$\text{Dum}\left\{\begin{array}{l}\text{pendebat}\\ \text{jacebat}\end{array}\right\}\text{filius}$$

The question, which is the original, which the imitation, will be discussed under II. THE SPECIOSA.

I. THE DOLOROSA.—The hymn was well known to all classes by the end of the fourteenth century. Georgius Stella, Chancellor of Genoa (d. 1420), in his "Annales Genuenses", speaks of it as in use by the Flagellants in 1388, and other historians note its use later in the same century. In Provence, about 1399, the "Albati", or "Bianchi", sang it during their nine days' processions. "The Church did not receive the hymn from the heretics, but the heretics despoiled the Church of the Sequence" (Daniel, "Thesaurus Hymnologicus", II, 140). If the very questionable ascription to Jacopone da Todi be correct, the hymn probably found its way from Franciscan houses into those of other religious bodies and into popular use. It is found in several European (but not English) Missals of the fifteenth century, but was not introduced into the Roman Breviary and Missal until 1727 (Feast of the Seven Dolours B. V. M., assigned to Friday after Passion Sunday. The September feast of the same name employs other hymns in the Breviary Office). In the Breviary it is divided into three parts: at Vespers, "Stabat Mater dolorosa"; at Matins, "Sancta Mater, istud agas"; at Lauds, "Virgo virginum præclara".

The authorship of the hymn has been ascribed to St. Gregory the Great (d. 604), St. Bernard of Clairvaux (d. 1153), Innocent III (d. 1216), St. Bonaventure (d. 1274), Jacopone (d. 1306), Pope John XXII (d. 1334), Gregory XI (d. 1378). Of these ascriptions, the only probable ones are those to Innocent III and Jacopone. Benedict XIV gives it without question to Innocent, and quotes three authorities; Mone, in his notes, and Hurter, in his "Life", give it to the same great pontiff. Duffield, in his "Latin Hymn Writers and their Hymns", rejects with much positiveness, and Mearns, in Julian, "Dictionary of Hymnology", questions, the ascription. Gregorovius also denies it to the pope of "the great and cold intellect"; but for a similar reason he might question the ascription of the Corpus Christi hymns, redolent of devotional warmth and sweetness, to the rigorously scholastic mind of St. Thomas Aquinas; he adds, however, a reference to a fourteenth-century manuscript containing poems by Jacopone with an ascription to him of the Stabat. The argument for Jacopone is not satisfactory. While his hymns written in the Umbrian dialect commanded popularity and deserved respect, some of the Latin hymns ascribed to him are certainly not his, and it is doubtful if he ever wrote any—or at all events anything better than imitations of—Latin hymns.

A large literature has grown about the hymns, Protestants sharing with Catholics a deep, and often glowingly expressed, admiration for its pathos, its vividness of description, its devotional sweetness and unction, its combination of easy rhythmic flow with exquisite double rhyming and finished stanzaic form. Daniel styles it "the queen of sequences" (op. cit., V, 59) and devotes much space to its praise (II, 136–138). Dr. Philip Schaff (in "Literature and Poetry", 191) says: "The secret of the power of the 'Mater Dolorosa' lies in the intensity of feeling with which the poet identifies himself with his theme, and in the soft, plaintive melody of its Latin rhythm and rhyme, which cannot be transferred to any other language." Dr. Coles, a physician, devotes a long "Proem" to his own translation, to an estimate of the hymn, and thinks the hymn "powerful in its pathos beyond almost anything that has ever been written". Mingled with his praise is much very strong denunciation of its "Mariolatry." Schaff also notes the usual Protestant objection, but gently answers his co-religionists, concluding with the reminder that Catholics "do not pray to Mary as the giver of the mercies desired, but only as the interceder, thinking that she is more likely to prevail with her Son than any poor unaided sinner on earth". This affection of Protestants for the hymn has resulted in manifold translation. Dean Trench, however, excluded the hymn from his "Sacred Latin Poetry", and Saintsbury, in "The Flourishing of Romance" (p. 77, footnote), characterizes the exclusion as "a little touch of orthodox prudery". There are over sixty translations into English (in whole or in part), Caswall's being the most extensively used in hymnals. Amongst the translations are those of D. F. McCarthy, Aubrey de Vere, and Father Tabb.

Because of its vividly epic and lyric character, the hymn has received multiform musical setting. There are four well-known plainsong settings, the authentic form being found in the Vatican Gradual (1908). Josquin des Prés (fifteenth century) wrote a Stabat as elaborate as any of his "most highly developed Masses" (Rockstro). His great effort was distanced by the immortalizing twain of settings by Palestrina. Of Pergolesi's Stabat the German poet Tieck confesses: "I had to turn away to hide my tears, especially at the place, 'Vidit suum dulcem natum'". Haydn's Stabat is considered "a treasury of refined and graceful melody". Some less familiar names in the long list are Steffani, Clari, Astorga, Winter, Raimondi, Vito, Lanza, Neukomm. Rossini had written his "William Tell" before he essayed his much-abused Stabat. While it is not indeed fitted for liturgical use, Father Taunton (History and Growth of Church Music, 78-9) defends it; and Rockstro, refusing to discuss the question whether its sensuous beauty befits the theme, thinks that "critics who judge it harshly, and dilettanti who can listen to it unmoved. . . . must either be case-hardened by pedantry, or destitute of all 'ear for music'". The long list may close with Dvořák, who, in his original musical phrases, illustrated anew the perennial freshness of the theme.

II. THE SPECIOSA.—An edition of the Italian poems of Jacopone published at Brescia in 1495 contained both Stabats; but the Speciosa fell into almost complete oblivion until A. F. Ozanam transcribed it from a fifteenth-century manuscript in the Bibliothèque Nationale for his "Poètes Franciscains en Italie au Treizième siècle", Paris, 1852. He thought Jacopone had composed both Stabats at the same time; and, remarking of the Dolorosa that "this incomparable work would have sufficed for the glory of Jacopone", he confesses that he gave up the attempt to translate the Speciosa in verse, and concluded to present both hymns in simple prose, because "the untranslatable charm of the language, of the melody, and of the old quaintness, I feel are escaping me". The Anglican hymnologist, Dr. J. M. Neale, introduced the Speciosa to the English-speaking world in 1866, and ascribed it to Jacopone. Dr. Schaff dissents: "This is improbable. A poet would hardly write a parody on a poem of his own." Noting the unfinished style and the imperfect rhyme of the Speciosa, Neale thought it indicated the work of an apprentice shaping his hand to the work of Latin verse—in which case it must have preceded the Dolorosa, which is a perfect piece of work. Schaff, however, points out that the opening words of the Dolorosa were borrowed from the Vulgate Latin (John, xix, 25) "with reference to Mary at the Cross, but not at the Cradle", and also that the sixth line, "Pertransivit gladius", might have suggested the similar line of the Speciosa, "Pertransivit jubilus", but not vice versa. Coles doubts "a simultaneous birth, or even a common parentage". In his "Essay on Minor Rites and Ceremonies" Cardinal Wiseman seized on the parallelism of contrast in the two poems—similarity of form and phrase, and complete antithesis of theme and thought. Finally, it should be said that the great ruggedness of the Speciosa may be due to the carelessness of copyists.

KAYSER, *Beiträge zur Geschichte und Erklärung der ältesten Kirchenhymnen*, II (Paderborn, 1886), 110–192, gives text of both *Stabats* with variants and much comment. HENRY, *The Two Stabats*, in *Amer. Cath. Quarterly Rev.* (January, 1903), 68–89 and (Apr., 1903), 291–309, texts and translations, comment on authorship and "Mariolatry", and comparison of trs.; COLES, *Stabat Mater* (*Dolorosa*) (2nd ed., New York, 1868); IDEM, *Stabat Mater* (*Speciosa*) (New York, 1868); JULIAN, *Dict. of Hymnology* (2nd ed., London, 1907), 1081–84, 1590, 1706. To his entries must be added HENRY (as above); TABB in *Catholic News* (New York, Apr. 7, 1906), *In the Shadow of the Rood;* McKENZIE in *The Beacon* (Boston, May 7, 1887); *Stood the Virgin Mother Weeping*, and others noted in HENRY, *loc. cit.;* BAGSHAWE, *Breviary Hymns and Missal Sequences* (London, 1900), 109, *The Mother in deep sorrow stood;* DONAHOE in *Early Christian Hymns* (New York, 1908), 197, *Waiting by the cross atoning;* a good version, perhaps by a Catholic, reprinted in *The Catholic World* (April, 1870) from *The Democratic Magazine* of thirty years previously: *Brokenhearted, lo, and tearful.* The same issue of *The Catholic World* has [illegible] tr. into Greek by MAYER. VICTORI in *Cæcilia* (Strasburg, Dec., 1909) analyzes the *Christus* of FRANZ LISZT (the *Speciosa*, 182–5; the *Dolorosa*, 196–200); SHIPLEY adds others in *Amer. Eccl. Review*, XII (1895), 453. PACHEU, *L'Auteur du 'Stabat'* in *Revue du Clergé Français* (Mar., 1904), 163–75, thinks the author is, in all probability, Jacopone, and that the *Speciosa* is not his, but probably the work of some humanist of the fifteenth century. D'UDENHOUT, *Le 'Stabat Mater Speciosa' de Jacopone da Todi*, in *Etudes Franciscaines* (Aug., 1909), 140–8. SHIPLEY, *Annus Sanctus* (London, 1884), gives the trs. of McCARTHY, DE VERE, and AYLWARD. There is an anonymous tr. of the *Speciosa* (*Joy her tender breast expanding*), quoted from *The Catholic Magazine* in *The Rosary of the Blessed Virgin Mary* (London, s. d.), 62. DREVES, *Analecta hymnica* (Leipzig, 1888—), gives many poems founded on the *Dolorosa*, e. g. XXIV, 127; 150; 122 (from a Dominican Breviary, fifteenth century); see also II, 53, and VIII, 55–56, for illustrations of the fourteenth to the fifteenth century. HUSENBETH, *Missal for the Use of the Laity* (new ed., London, 1906), 234–6, gives Latin text and new translation. The Latin text is in many places different from that of the *Roman Missal* (although the preface declares that the book "will be found strictly conformable to the *Roman Missal*, as used by authority in this country"—sc. England). The Latin text includes the line, "Inflammatus et accensus", which is not in the *Roman Missal* text, but is found in Rossini's, and even in Liszt's *Stabat Mater.* For information concerning the line, cf. KAYSER, HENRY, opp. cit., or MONE, *Lateinishche Hymnen des Mittelalters*, II, 148, at end. The typical and official text of the *Vatican Graduale* (1908) is the same [illegible] that of the *Roman Missal.*

H. T. HENRY.

Stadion, CHRISTOPHER VON. See AUGSBURG, DIOCESE OF.

Stadler, JOHN EVANGELIST, a Bavarian hagiographer, b. at Parkstetten, in the Diocese of Ratisbon, 24 Dec., 1804; d. at Augsburg, 30 Dec., 1868. After completing the humanities in the *gymnasium* of Straubing in 1821, he entered the University of Landshut, where, in addition to the philosophical and theological studies prescribed for candidates to the priesthood, he devoted much of his time to the study of Oriental and modern languages. The year preceding his ordination to the priesthood he spent at the diocesan seminary of Ratisbon, where under the direction of the learned and saintly Michael Wittmann, the future auxiliary Bishop of Ratisbon, he prepared himself for the priesthood. After being ordained priest by Bishop Sailer at Ratisbon 22 June, 1827, he was occupied a few months in parochial work at the little village of Otzing in Lower Bavaria, whereupon he continued his theological studies at the Georgianum in Munich in November, 1828, and obtained the doctorate in theology in 1829. In 1830 he was "co-operator" at the Hospital of the Holy Ghost at Munich, in 1831 *Privatdocent* for Old Testament exegesis at the University of Munich, and in 1832 he succeeded Pruggmeyr as *subregens* of the Georgianum. In addition he was in 1833 appointed professor-extraordinary and in 1837 professor-ordinary of exegesis at the university. In 1838 he became canon and in 1858 dean at the Cathedral of Augsburg. Stadler was well versed in all the branches of theology, but he was especially fond of linguistic studies. Besides having a perfect mastery of German, French, Italian, and English among the modern languages, he knew Latin, Greek, Hebrew, Syriac, Arabian, Persian, Sanskrit, and in his later years he studied also Spanish and Polish. He is best known as the author of "Vollständiges Heiligen-Lexikon oder Lebensgeschichten aller Heiligen, Seligen u. a. aller Orte und aller Jahrhunderte, deren Andenken in der kath. Kirche gefeiert oder sonst geehrt wird" (Augsburg, 1858-82). The work is alphabetically arranged and contains more lives than any other work of its kind. The "Acta Sanctorum" of the Bollandists, [redacted] far as they were finished, that is, to the end of October, were condensed into short sketches, but many new lives were introduced and newly discovered data were added to the lives contained in the "Acta". The work is rather popular than scientific and from [redacted] critical point of view leaves much to be desired. In the preparation of the first volume Stadler was assisted by Rev. Fr. J. Heim, while the second and the third volume contain contributions from several priests of the Diocese of Augsburg. Stadler died before the third volume was finished, leaving the writing of the last two volumes to Rev. J. R. Ginal, pastor of Zusmarshausen. Other works of Stadler are: a Hebrew-Latin lexicon (1831); "De identitate Sapientiæ Veteris Testamenti et Verbi Novi Testamenti", which served as his thesis for the doctorate (1829); and "Dissertatio super Joannem VIII, 25" (Munich, 1832).

MICHAEL OTT.

Stagefyr. See FERBER, NICHOLAS.

Stained Glass, the popular name for the glass used in the making of coloured windows. The term is a misnomer, as stained glass is only one of the glasses so employed. It is more the result of a process than a glass *per se*, as it is produced by painting upon any glass, clear or coloured, with the oxide of silver, which penetrates the glass when subjected to heat and gives a yellow reaction. In building a coloured window a variety of glass can be used, but usually there is only one kind employed, viz.; pot-metal, a glass that is coloured throughout its substance while in a molten state. This is used either directly or after it has been toned, or ornamented, or made a background for a figure subject by painting the same upon it with vitrifiable pigments, fused to its surface or incorporated with its substance by means of heat. Nevertheless, although the word *stained-glass* is inaccurately used, usage has so fixed its erroneous meaning in the public mind that in all probability it will continue for all time to be applied in naming coloured windows and their glass.

I. Documentary, and, far more, monumental history, demonstrates that glass has been in use from the most remote ages; that the ancients were familiar with it; moreover, that its origin, or discovery, or invention is lost in the twilight of fables. In many cases where china and metal are now employed the ancients used glass: they blew, cast, and cut into it thousands of objects with which they furnished tombs and temples, palaces and private houses; and adorned their persons, their garments, and their buildings. It is indeed doubtful if there was any branch of the art of glass-making and the utilization of its products that was not known to them, a fact proved by the fragments of innumerable articles found to-day in countless numbers among the ruins of Egypt, Chaldea, Phœnicia, Greece, and Rome. It is true, however, that the glazing of window openings with glass cannot be traced back beyond the year 306 B. C. At this early date in the Far East coloured windows were made by arranging small gem-like pieces of pot-metal in perforated wooden or stone panels. This kind of window, still in use in the Orient, found its most notable development after the advent of Christianity; but it was not until the birth of Gothic architecture, with its large window-openings, that the full value of glass as a transmitter of light and a polychromatic decorative material was fully appreciated. Gothic window-openings called for a filling strong enough to keep out the weather, yet transparent enough to admit the light; on the other hand, as, in this form of architecture, the wall-spaces were necessarily small, the windows offered the only opportunity for the decorator's art in so far as it depended upon colour. As glass at that time was to be had only in small pieces, the glazier was compelled, in order to fill the window-openings, to make his lights a mosaic, that is a combination of pieces of glass of various sizes and colours worked to a given design by placing them in juxtaposition. These pieces of glass had to be kept in place by some other material, and the best medium for the purpose was found to be lead, applied in strips made with lateral grooves for the reception of the edges of the glass.

The early windows were purely ornamental transparent mosaics; later, when figure subjects were portrayed, the artist, on account of the limitations of the mosaic method, was compelled to use paint in order to get the proper effect, painting directly upon the glass with ordinary transparent pigments; but as this was not durable, when exposed to atmospheric changes, he protected the painted portion by covering it with another piece of glass which was held in place by means of leads, and thus insured its preservation, at least as long as the superimposed glass remained intact. This imperfect method was not long in use before a great discovery was made at Limoges in France, where a Venetian colony of glass-workers had settled as early as the year 979. The new process, which revolutionized the art, consisted in painting with metallic pigments which could be fused into the glass, the painting being thus made as lasting as the glass itself. Not the first, but one of the first, to employ this permanent process of painting on glass to any considerable extent was the great twelfth-century promoter of all things ecclesiological, the Abbot Suger. Recognizing the value of the invention, he caused the windows of the Church of St. Denis at Paris to be executed in this way, and they were so successful that picture-windows became thereafter a necessary constituent of every ecclesiastical edifice.

The oldest painted picture-window that has survived the action of time is one representing the Ascension in the cathedral of Le Mans, which is believed by many antiquarians to be a work of the late eleventh century. The glass composing it is very beautiful, more particularly the browns, which [redacted] rich in tone, the rubies, which are brilliant, streaked and studded with gemlike blobs of black, and the blues, which are of a greenish azure hue, while the general colour treatment is extremely oriental. The drawing of the figures is most effective, although simple in line, and Byzantine in character, differing in this point from those at St. Denis, which are Romanesque. The painting is peculiar in that the hair of the figures is rendered in solid black, and not in lines. Although Le Mans was one of the first places where windows made by the new process were used, yet it did not become the centre of work; the city of Chartres took the lead, and became the greatest of the schools of medieval glass-painting, and from it the new art slowly made its way to Germany and England, keeping always its essentially French character. Even to-day the Chartres windows are the most beautiful in existence.

At the very beginning—the eleventh and twelfth centuries—there were two methods of work: one school of artists freely employed paint in their windows, the other avoided its use, striving to obtain the result sought by a purely mosaic method, a system destined to be revived and developed in after ages; but the former school almost at once gained the mastery and held it for eight hundred years. Examples of the early work of these rival schools can best be studied by comparing the painted windows erected at Le Mans with those at Strasburg, which were built in accord with mosaic motives. In many of the first windows the figure subjects were painted upon small pieces of glass imbedded in a wide ornamental border, a large number of these medallions entering into the composition of a single window, and each section held in place by an iron armature—a constructive necessity, as the window-openings were without mullions. The medallions were all related to one another through their colour key, depicting various incidents in the same history or a number of points in a theological proposition. This form of window, peculiarly adapted to a single light, continued in fashion from the twelfth century until the introduction of tracery, and in some parts of France long after the single light had given way to the mullioned window. Contemporaneous with these medallion windows there were two other kinds: the canopy and Jesse windows. In the first there was a representation of one or two figures, executed in rich colours on a coloured or white ground within borders and under a low-crowned, rude, and simple canopy, usually out of proportion to the figure or figures it covered. The second variety, of pictorial genealogy of the Redeemer, consisted of a tree or vine springing from the recumbent form of Jesse, lying asleep at the foot of the window, the branches forming a series of panels, one above another, in which kings and patriarchs of the royal house of the Lion of Juda were pictured.

The windows of the twelfth century are admired on account of their ingenious combinations of colour, their rich rug-like effects and the brilliancy of the glass. It was reserved, however, for the thirteenth and fourteenth centuries to see the full unfolding of the possibilities and inherent beauty of coloured glass. Among the most noted of these windows are the exquisite jewel-like ones in the cathedral of Chartres, a hundred and forty-three in number, containing no less than one thousand three hundred and fifty subjects, with over three thousand figures; there are also some fine examples to be seen at Reims, Bourges, Tours, and Poitiers. These magnificent windows are only a small portion of the almost incredible number that once existed. The windows of the thirteenth century are not only more brilliant in colour, but the colours are more skilfully blended than in those of the preceding century; at the same time the drawing of the figures is better the faces are oval in form, more delicately treated, often refined and vigorous; the eyes have a natural expression, and the hair is rendered in lines of varying thickness. The compositions are simple and not over-crowded, the draperies are broader in treatment, the ornaments and architectural details, taking their motives mostly from natural objects, are well drawn. The range of subjects represented being limited by the paramount object of all ecclesiastical decorations of the Middle Ages, viz. the instruction of the illiterate and promotion of piety among the people, these windows present scenes from Biblical history and the lives of the saints, and symbolic portrayals of the dogmas of the Church. In fact they were sermons which "reached the heart through the eyes instead of entering at the ears". But their choice of subjects was not made at random; it fell under the same rule that guided the encyclopedias of the time in their classification of the universe, commencing with God and the creation of angelic beings, and so on through nature, science, ethics, and history. The windows were indeed poems in glass, "The first canto, reflecting the image of God as the Creator, the Father, and the giver of all good gifts; the second, nature, organic and inorganic; the third, science; the fourth, the moral sense; and lastly, the entire world". Where there were not enough windows in a church to carry out the complete scheme, one or more portions were represented.

The windows of the fourteenth century show a steady increase in knowledge of the art, more particularly in matters of drawing and harmonious use of colour. The later advance was brought about by the discovery of the yellow stain, which placed in the artists' hands not only various shades of yellow, but also a colour with which they could warm their white glass. It also led them to develop a style of glass window that first made its appearance in the days of St. Bernard and was used largely by the Cistercians, whose churches were a protest against the luxury, the pomp of colour and ornamentation, of those built by rival monastic bodies, particularly by the art-loving Cluniac monks. These grisaille, or stippled, windows were white and black, or gray and gray, brown and brown, warmed by the yellow stain and were painted upon white or clear glass. Towards the end of the fourteenth century the artists began to break away from the tutelage of the architect and abandoned the sound rules of the great school of the thirteenth century, ignoring the principle that "all ornament should consist of enrichment of the essential construction of a building". The sins of the glass-painters of the fifteenth century were still greater, for it mattered little to them if their windows were out of key with the architectural design of the building in which they were placed; their sole wish seemed to be to make their work do them honour. This abandonment of the fixed canons of the art, the abuse of its materials, and the exaggeration of individualism marked the beginning of the end of good glasswork, the deterioration becoming complete just as a revolution in religious thought was born into the world which destroyed in its destructive march not only the glass-painter's art, but many others, and also wrecked the art treasures of medieval culture, while it paralyzed for years, in Northern Europe, ecclesiastical art of every kind.

In the sixteenth century the windows were purely pictorial and wholly divorced from their architectural surroundings. At the end of this century and all through the next the windows rapidly degenerated, the art of making them finally passing from the hands of artists into the greedy grasp of tradesmen. The last windows made in which there was still some artistic merit are those in the Church of St. John at Gouda. In these the painters introduced landscapes, arcades, and corridors, aiming at absolute realism and startling perspectives, and treating their glass as they

would canvas. In the seventeenth and eighteenth centuries the use of paints and enamels became so excessive as to almost do away with pot-metal. Many of the windows were made wholly by painting and staining clear glass, and were purely articles of trade, with a very poor market, which became smaller from year to year until all demand ceased, and the noble art of placing images of beauty between earth and heaven for the edification of the people, for the glory of the art, for the love of the beautiful, and the honour of God disappeared for a time from off the face of the earth.

II. Continental Europe and Great Britain, in its recoil from the black night of unbelief, indifference, and disorder that wrecked good morals at the end of the eighteenth century and the beginning of the nineteenth, fell back upon the faith of the past as its only anchor of hope. As the Faith revived among the people it called for a material expression of its dogmas and history under forms of beauty, opening once again the field of religious art to architects, painters, and sculptors. All over Europe every branch of art found able leaders—men of enthusiasm, rare talents, and great energy. Each one, architect, painter, and sculptor, entered upon the work with the spirit of faith, love, and sacrifice, in their hearts, and tried to make their art "a frame for the sacred picture of truth". Amid this revival of the major arts, those which developed most rapidly were painting and architecture, and among the handmaidens of the latter the glazier's art almost at once took a leading position. To Germany belongs the honour of reviving coloured windows, although both France and England have a prior claim, as having produced the first picture windows subsequent to the French Revolution; but these were nothing more than isolated efforts of individuals, while in Germany associated artists of ability gave their attention to the matter and founded a school of glass-painters, and Munich became the centre of the movement. One of the greatest efforts of the Munich School is to be seen in Glasgow Cathedral, where it reached its limit of excellency. This was indeed a noble effort, but on the whole a lamentable failure, due to the nature of the glass, as well as a lack of knowledge of the requirements of the art and of its place as an adjunct to architecture. The windows are marked by thinness of colour, exaggerated diapered backgrounds, inharmonious borders, and defective blending of the colours, while there is a lack of harmony between the ornaments of the building and its architecture.

The modern French school of window-makers is very similar to the German, with even a stronger tendency to look upon coloured windows as easel pictures, with little or no leaning towards medieval processes, and without any apparent effort to attain the incomparable beauty of the windows which adorn the French cathedrals of the thirteenth and fourteenth centuries. The English school of glass-painters are by far the most successful, and all because their highest aim has been to make their windows good copies of the best glass of the Middle Ages. Much of their work is very beautiful, deeply imbued with a devotional spirit, and of high artistic merit. The American artist in glass, impatient of tradition, caring very little for either the subjects or the symbolism of the past, has attempted to do something new by using opal glass, with its limitless colour field, along the lines of the mosaic system, and build a window perfect in colour effect. In practice he separates his lights and darks from one another by carefully studied lead lines, which he endeavours to lose by making them look like a part of the glass and an essential constituent of the design. At the same time he tries to heighten the colour values of his glass by superimposing one colour upon another, seemingly always keeping in mind Ruskin's dictum: "Colour, to be perfect, must have a soft outline or a simple one; it cannot have a refined one; and you will never produce a good window with good figure drawing in it. You will lose perfection of colour as you give perfection of line. Try to put in order and form the colour of a piece of opal." So far the American artist in glass has not been successful in making good church windows, and all because he disregards their true purpose, their architectural surroundings, and because he has overestimated the value of coloured glass as a decorative material, hence sacrificing everything to his window. It is true, however, that he has made a few good windows, translucent mosaics which indeed are great works of art, with wonderful niceties of light and shade, with prismatic play of colours, and admirably harmonious.

In the future, as in the past, the proper field for this art is an ecclesiastical one. It therefore behoves the artist in glass, if he hopes to reach a high degree of perfection, to study the principles which govern Christian art, and ever to bear in mind that the glazier's art is but an auxiliary to the architect's.

CARYL COLEMAN.

Stalls, seats in a choir, wholly or partly enclosed on the back and sides, are mentioned from the eleventh century. In the earliest times the *subsellia*, usually of stone, of the clergy were placed to the right and left of the *cathedra* of the bishop in the apse of the basilica. After the numbers of the clergy had greatly increased they appear to have stood during choir service, as is evident from the Rule of St. Chrodegang and from the statutes of Aachen of the year 816. Even as late as the eleventh century St. Peter Damien wrote "Contra sedentes in choro". Those who were weak supported themselves on a T-shaped crutch called *reclinatorium*, which was sometimes censured, sometimes permitted, as in the second "Ordo Romanus". Soon, however, the *formæ* or *formulæ*, seats with backs, appeared (plan of St. Gall of the ninth century), as well as the actual *stalli*, connected seats in which only arms separated the individual seats, and an architectural effect was sought. The seats, which earlier were frequently movable, now became fixed; the sides and backs were made higher; the ornamentation, originally pictorial, soon became architectural and was carved. A few examples of these have been preserved in Germany from the Romanesque period. At Ratzeburg there are side-pieces, each supported by two small columns with base and capital, that are rounded above like a beam and beautifully broken in the middle by curved fluting. There are also small columns on the oldest choir-stall at Xanten; the face of the back is even more boldly curved, and fantastic heads completely in the round project from it. During the Gothic period the architectonic element was at times exaggerated; the mathematical forms of the labyrinths of lines and the scribing are too jejune, and the structure is often too high and uncomfortable. On the other hand the baldachinum over the highest row of seats was often very magnificent. Germany and France possess a large number of stalls that are masterpieces. These stalls are found on both sides of the choir in the churches of monasteries and collegiate foundations. The seats on the Epistle side are called *chorus abbatis* or *præpositi*, those on the Gospel side *chorus prioris* or *decani*. The last of the ascending rows has generally a back wall crowned with artistic decorations. The back of each preceding row serves the succeeding one as a prayer-desk; the first row has a projection built in front of it for the same purpose. On feast days, for the sake of comfort and ornament, tapestries were hung on the backs of the stalls, cushions laid on the seats, and rugs put under the feet. Ornamental designs or figures carved in the wood decorated both the front and rear faces of the high backs of all the stalls as well as the double arms that were used both when standing and sitting. On the arms as well as in subordinate parts, especially on the *misericordia* or console—against which, after the seat had been turned up, the cleric could support himself while standing—it was not unusual to carve fantastic figures of animals or grotesque devils. Choir-stalls of stone, which are always colder, occur but rarely (for example, at Kaurim in Bohemia). Among the oldest still existing examples of Gothic choir-stalls in France are those in the Church of Notre-Dame-de-la-Roche; especially rich in their ornamentation are those in the cathedrals at Amiens, Paris, Auch, and others. Viollet-le-Duc gives some beautiful examples in his "Dictionnaire de l'Architecture", s. v. *Stalles*. Among examples in Belgium the Church of St. Gertrude at Louvain shows late Gothic choir-stalls with statuettes and twenty-eight reliefs portraying the life of Christ, of St. Augustine, and of St. Gertrude. The most celebrated choir-stalls in Germany are those in the Cathedral at Ulm; these are reproduced in all their details in Egle, "Der Dom zu Ulm" (1872). There are eighty-nine seats with gable hood-mouldings and pinnacles, on each seat there are two rows of decorations, on the back and on the side, representing Christ as the anticipation of the heathen and the prediction of the prophets, and in addition there is delineated the founding of the New Covenant. The choir-stalls at Dordrecht, Holland, belong to the style of the Renaissance; they represent on the back the triumph of the Church and of the Holy Sacraments; on the opposite side, the triumphs of Charles V. There are superb creations of the same style in Italy, especially with inlaid work called *tarsia*, as at Assisi, Siena, Florence, and Venice (cf. Kraus, "Geschichte der christl. Kunst", II, 685). Modern times have made but few changes in the practical and artistic form that was fixed in an earlier era.

Central-Kommission zu Wien*, VIII (Vienna, 1865); GAILHABAUD, *Architecture du V*^{e} *au* XVII^e *siècle et des arts qui en dépendent* (Paris, 1850–8).

GERHARD GIETMANN.

Stanbrook Abbey, an abbey of Benedictine nuns, midway between Malvern and Worcester, England. The abbey and church are dedicated to Our Lady of Consolation, the title of the original foundation at Cambrai, Spanish Flanders, 1625, effected by the Benedictine Monks of the English Congregation, under whose immediate jurisdiction the community has always remained. Of the nine English ladies who began the foundation, Helen More (Dame Gertrude) was chief foundress because of the liberality of her father, Cresacre More, great-grandson of Sir Thomas More; wherefore the community has special claims on the patronage of this blessed martyr. The other ladies were: Margaret Vavasour; Anne Morgan; Catherine Gascoigne; Grace and Anne More, cousins of Helen; Frances Watson; and two lay sisters, Mary Hoskins and Jane Martin. Dame Frances Gawen, one of three nuns lent by the Benedictines of Brussels to train the postulants, governed as abbess until the infant community was in a position to choose one from its own body, Dame Catherine Gascoigne, abbess, 1629–1676. Dom Augustine Baker, to whom their spiritual formation was entrusted, wrote at the Cambrai Abbey, for their use, spiritual treatises which give him celebrity. In 1793 the French revolutionists, seizing their house and property, conveyed the nuns, twenty-two in number, to a prison in Compiègne. Here, consequent on hardship, four of them died, as also the Very Reverend Dom Augustine Walker, President of the Anglo-Benedictine Congregation, who had been arrested in their priests' quarters. Subsequently they had as fellow-prisoners the Carmelites (since beatified), who were led thence to martyrdom in Paris, July, 1794. Though a similar death awaited the Benedictines this was averted by the downfall of Robespierre, their deliverance from jail being effected only on 25 April, 1795. Clad in worn-out secular attire left in the Compiègne prison by the Carmelite martyrs, they reached England in utter destitution, but were charitably lodged in London for some days. Thence they proceeded to Lancashire, where the Very Reverend Dr. Brewer, President of the Anglo-Benedictine Congregation, made over to them the Ladies' School belonging to the Woolton mission under his care.

In 1807 the community removed to Salford Hall, near Evesham, where by the joint kindness of its owner, Mrs. Stanford, and the life-heir, Robert Berkeley, Esq., of Spetchly, they lived free of rent, till able to purchase Stanbrook Hall, to which they removed in 1838. In 1871 an entirely new monastic structure was inaugurated by the consecration of the abbey-church, designed by Edward Welby Pugin. The starting of this project was mainly attributable to the zeal and energy of the then *Vicarius monialium*, Dom James Laurence Shepherd, the well-known translator of Dom Guéranger's "Année Liturgique". The rest of the abbey building, of which Messrs. Cuthbert and Peter-Paul Pugin were the architects, was gradually erected during the abbacy of Lady Gertrude L. d'Aurillac Dubois, d. 1897. The abbey, with its extensive grounds, is enclosed by the canonical wall completed by the present abbess. As formerly at Cambrai, so at Stanbrook, the solemn celebration of the Divine Office, strictness of enclosure, and monastic observance are leading features. Though essentially devoted to the contemplative life, the nuns receive for education within the cloister a small number of alumnæ. They are girls of the upper classes of life, and are fitted for their future position in society by a strong traditionary training on monastic lines according to the spirit of St. Benedict's Rule. Stanbrook Abbey has some reputation for its contributions to Catholic literature, as also to the popularization of Gregorian Chant. Lady Cecilia A. Heywood, who was blessed abbess in November, 1897, is the twentieth in succession from the year 1629. [See More, Helen (Dame Gertrude.)]

William Clarkson Stanfield
From a Photograph

Stanfield, William Clarkson, English painter, b. at Sunderland, 1793; d. at Hampstead, near London, 1867. He became a sailor, and on one of his journeys to New Guinea made the acquaintance of Thomas Clarkson, who was strongly interested in the abolition of the slave trade; in proof of his warm friendship with whom, he added the name of Clarkson to his own, and thereafter styled himself William Clarkson Stanfield. He was disabled in 1816, and then started as a scene-painter in a theatre, much frequented by sailors, from which he obtained engagements to the various other London theatres. Making the acquaintance of Douglas Jerrold and Captain Marryat, the novelist, he was strongly recommended to take up the painting of panel pictures, and to try his chance at an exhibition. He exhibited at the Society of British Artists in 1824, and again in 1827, gaining considerable attention and encouragement. Two years later he sent a picture to the Academy, which was favourably received, and, gaining a prize of fifty guineas from the British Institution, he relinquished scene-painting and started on a Continental tour, painting various pictures. From that time he was a steady exhibitor at the Academy, sending in nearly one hundred and forty pictures to its exhibitions. His paintings partook of the character of scene-painting in their spectacular and stagey effect, but many of them were very charming, and were greatly admired, and some of his best will hardly ever be excelled as fine representations of sea scenes. Perhaps his greatest is the one in the possession of Mrs. Burns; other works of importance are those painted for the Marquess of Lansdowne at Bowood, and the four beautiful examples in the Victoria and Albert Museum. He was a man of tremendous energy, and regarded by his friends as exceedingly charming and pleasant. A devout Catholic, he spent the latter part of his life in an old house at Hampstead, still standing, and used partly as a library and partly as a residence. His funeral took place in the Catholic cemetery at Kensal Green, and a couple of years after his death there was a memorial exhibition of his works in the Royal Academy.

There is no work dealing with this painter that has any claim for special recognition; consult the memoirs in the local papers of Hampstead, and in the principal journals of the day.

George Charles Williamson.

Stanislas Kostka, Saint, b. at Rostkovo near Prasnysz, Poland, about 28 October, 1550; d. at Rome during the night of 14–15 August, 1568. He entered the Society of Jesus at Rome, 28 October, 1567, and is said to have foretold his death a few days before it occurred. His father, John Kostka, was a senator of the Kingdom of Poland and Lord of Zakroczym; his mother was Margaret de Drobniy Kryska, the sister and niece of the Dukes Palatine of Masovia and the aunt of the celebrated Chancellor of Poland, Felix Kryski. The marriage was blessed with seven children, of whom Stanislas was the second. His older brother Paul survived him long enough to be present at the celebration of the beatification of Stanislas in 1605. The two brothers were first taught at home, the main feature of this early education being the firmness, even severity, of their training; its results were the excellent habits of piety, modesty, temperance, and submission. After this they were sent to Vienna with their tutor to attend the Jesuit college that had been opened there four years before, reaching Vienna, 25 July, 1564. Among the students of the college Stanislas was soon conspicuous not only for his amiability and cheerfulness of expression, but also for his religious fervour and angelic piety. This spirit of devotion continued to grow during the three years he remained in Vienna. His brother Paul said of him during the process of beatification: "He devoted himself so completely to spiritual things that he frequently became unconscious, especially in the church of the Jesuit Fathers at Vienna. It is true," added the witness, "that this had happened at home to my brother at Easter when he was seated at table with our parents and other persons." Among other practices of devotion he joined while at Vienna the Congregation of St. Barbara, to which many students of the Jesuit college belonged. If the confidences he then made to his tutor and later to a fellow-member of the Society at Rome are to be believed, it was Saint Barbara who brought two angels to him during the course of a serious illness, in order to give him the Eucharist. So much piety, however, did not please the older brother Paul; his exasperation led him to treat with violence the innocent Stanislas. The latter finally lost patience, and one night after Stanislas had again suffered the harsh comments and blows of his brother he turned on Paul with the words: "Your rough treatment will end in my going away never to return, and you will have to explain my leaving to our father and mother." Paul's sole reply was to swear violently at him.

Meantime the thought of joining the Society of Jesus had already entered the mind of the saintly young man. It was six months, however, before he ventured to speak of this to the superiors of the Society. At Vienna they hesitated to receive him, fearing the tempest that would probably be raised by his father against the Society, which had just quieted a storm that had broken out on account of other admissions to the Company. Stanislas quickly grasped the situation and formed the plan of applying to the general of the Society at Rome. The distance was five hundred leagues, which had to be made on foot, without equipment, or guide, or any other resources but the precarious charity that might be received on the road. The prospective dangers and humiliations of such a journey, however, did not alarm his courage. On the morning of the day on which he was to carry out his project he called his servant to him early and told him to notify his brother Paul and his tutor in the course of the morning that he would not be back that day to dinner. Then he started, taking the first opportunity to exchange the dress of a gentleman for that of a mendicant, which was the only way to escape the curiosity of those he might meet. By nightfall Paul and the tutor comprehended that Stanislas had turned from them as he had threatened. They were seized with a fierce anger, and as the day was ended the fugitive had gained twenty-four hours over them. They started to follow him, but were not able to overtake him; either their exhausted horses refused to go farther, or a wheel of their carriage would break, or, as the tutor frankly declared, they had mistaken the route, having left the city by a different road from the one that Stanislas had taken. It is noticeable that in his testimony Paul gives no explanation of his ill-luck.

St. Stanislas Kostka
From a portrait preserved at St-Symphorien-d'Oxon, Isère, France

Stanislas stayed for a month at Dillingen, where the provincial of that time, the Blessed Peter Canisius, put the young aspirant's vocation to the test by employing him in the boarding-school. Subsequently he went on to Rome, where he arrived 25 October, 1567. As he was greatly exhausted by the journey, the general of the order, St. Francis Borgia, would not permit him to enter the novitiate of Saint Andrew until several days later. During the ten remaining months of his life, according to the testimony of the master of novices, Father Giulio Fazio, he was a model and mirror of religious perfection. Notwithstanding his very delicate constitution he did not spare himself the slightest penance ("Monumenta hist. Societatis Jesu, Sanctus Franciscus Borgia", IV, 635). He had such a burning fever in his chest that he was often obliged to apply cold compresses. On the eve of the feast of St. Lawrence, Stanislas felt a mortal weakness made worse by a high fever, and clearly saw that his last hour had come. He wrote a letter to the Blessed Virgin begging her to call him to the skies there to celebrate with her the glorious anniversary of her Assumption (ibid., 636). His confidence in the Blessed Virgin, which had already brought him many signal favours, was this time again rewarded; on 15 August, towards four in the morning, while he was wrapt in pious utterances to God, to the saints, and to the Virgin Mary, his beautiful soul passed to its Creator. His face shone with the most serene light. The entire city proclaimed him a saint and people hastened from all parts to venerate his remains and to obtain, if possible, some relics (ibid., 637). The Holy See ratified the popular verdict by his beatification in 1605; he was canonized on 31 December, 1726. St. Stanislas is one of the popular saints of Poland and many religious institutions have chosen him as the protector of their novitiates. The representations of him in art are very varied; he is sometimes depicted receiving Holy Communion from the hands of angels; sometimes receiving the Infant Jesus from the hands of the Virgin; or he is shown in the midst of a battle putting to flight the enemies of his country. At times he is depicted near a fountain putting a wet linen cloth on his breast. He is invoked for palpitations of the heart and for dangerous cases of illness (Cahier, "Caractéristiques des Saints").

This account has been drawn almost exclusively from the depositions of witnesses cited for the process of canonization of Stanislas (cf. Archivio della Postulazione generale d. C. d. G., Roma). The accompanying portrait is by Scipione Delfini and is the oldest of St. Stanislas in existence. Having probably been painted at Rome the year of his death, perhaps after death, it may be regarded as the best likeness. The face is strikingly Slavonic, a fact that is not noticeable in his other portraits.

Lives of Stanislas were written at Rome in the year of his death by Fathers Fazio and Warsevitz (Brussels, 1895). The former remained in manuscript, but the substance of both has been given in later biographies. Among these latter the most complete and most fully based on documentary evidence is that of Ubaldini in *Analecta Bollandiana*, IX–XVI (1890–1897). Equally worthy of recommendation are the works of Sacchini, Bartoli, Gruber, Goldie, and Michel.

Francis Van Ortroy.

Stanislaus of Cracow, Saint, bishop and martyr, b. at Szczepanow (hence called Szczepanowski), in the Diocese of Cracow, 26 July, 1030; d. at Cracow, 8 May, 1079; feast on 7 May in Roman Martyrology, but on 8 May at Cracow, which has a special feast of the translation of his relics on 27 September; patron of Poland and of the city and Diocese of Cracow; invoked in battle. In pictures he is given the episcopal insignia and the sword. Larger paintings represent him in a court or kneeling before the altar and receiving the fatal blow. No contemporary biography of the saint is in existence. At the time of his canonization a life appeared written by a Dominican Vincent(?) (Acta SS., May, II, 196) which contains much legendary matter. His parents, Belislaus and Bogna, pious and noble Catholics, gave him a religious education. He made his studies at Gnesen and Paris(?). After the death of his parents he distributed his ample inheritance among the poor. Lambert Zula, Bishop of Cracow, ordained him priest and made him pastor of Czembocz near Cracow, canon and preacher at the cathedral, and later, vicar-general. After the death of Lambert he was elected bishop, but accepted only on explicit command of Pope Alexander II. He worked with his wonted energy for his diocese, and inveighed against vices among high and low, regardless of consequences. Boleslaw II had become King of Poland. The renown he had gained by his successful wars he now sullied by atrocious cruelty and unbridled lust. Moreover the bishop had several serious disputes with the king about a piece of land belonging to the Church which was unjustly claimed by Boleslaw, and about some nobles, who had left the king before Kiev and returned to their homes to ward off various evils threatening their families and who were in consequence cruelly treated by the king. Stanislaus spared neither tears nor prayers and admonitions to bring the king to lead a more Christian life. All being in vain, Boleslaw was excommunicated and the canons of the cathedral were instructed to discontinue the Divine Offices in case the king should attempt to enter. Stanislaus retired to the Chapel of St. Michael in a suburb of Cracow. The king was furious and followed the bishop with his guards, some of whom he sent to kill the saint.

These dared not obey, so Boleslaw slew him during the Holy Sacrifice. The body was at first buried in the chapel, but in 1088 it was transferred to the cathedral by Bishop Lambert III. St. Stanislaus was canonized 1253 by Innocent IV at Assisi.

Francis Mershman.

Stanislawow, Diocese of (Stanislaopoliensis), of the Greek-Ruthenian Rite, in Galicia, Austria, suffragan of Lemberg. The establishment of this see was decided on in May, 1850, but the plan was not carried out till the issuing of the Brief "De universo dominico grege" (26 March, 1885) and the imperial decrees of 26 December, 1885. The diocese includes most of south-eastern Galicia and all Bukovina as far as Halicz, which was reserved to the metropolitan *mensa* of Lemberg. It comprises the districts of Stanislawow, Kolomyja, and Czerniowce. There are 21 deaneries, 433 churches with, and 298 without, resident priests, 63 chapels, 579 secular, and 13 regular, priests, 4 Reformed Basilian monasteries with 22 religious, 2 Basilian convents with 11 nuns, and 10 convents of the Servants of the Blessed Virgin Mary with 37 nuns. The Greek-Ruthenian Catholics number 920,000 out of a population of 1,387,930, of whom about 5000 belong to the Armenian, and 230,000 to the Latin, Rite. An ecclesiastical seminary was established in 1907, the clergy having been trained previously at Lemberg and Vienna. The episcopal town of Stanislawow was founded by Stanislav Potocki (d. 1683), and rebuilt after a disastrous fire in 1868. It is situated on the Bisthritza, 87 miles south-east of Lemberg, and has a population of 30,410, mostly Jews; it has a beautiful parish church containing the tombs of the Potocki, a Polish and a Ruthenian *gymnasium*, a Polish-Ruthenian normal school, 3 hospitals, a Jesuit residence, and convents of the Sisters of Charity and the Servants of the Immaculate Conception. It is a busy manufacturing centre (paper, lace, tanning, milling, and engineering works).

The bishops of Stanislawow were: (1) Mgr. Julian Pelesz, author of the "Geschichte der Union der ruth. Kirche mit Rom" (Vienna, 1878–81), previously rector of the Greek-Ruthenian Seminary, Vienna, then archpriest of Lemberg cathedral, preconized on 27 March, 1885; consecrated, 1 November, 1885; enthroned, 10 January, 1886; died 1891. (2) Mgr. Julian Kujlowski, b. at Krolewski in the Diocese of Przemysl, 1 May, 1826, elected titular Bishop of Ephestum, 26 June, 1890; transferred to Stanislawow, 22 September, 1891; held a diocesan synod in 1897. (3) Mgr. Count Andrea Alexander de Szeptyce-Szeptychi, member of a distinguished ancient Ruthenian family which joined the Latin Rite in the eighteenth century, b. at Przylbice, in the Diocese of Przemysl, 15 July, 1865, embraced the Ruthenian Rite to enter the Basilian Order, laboured energetically to strengthen the spirit of reform among the monks; was ordained, 29 August, 1892; accepted the episcopal dignity only on the formal order of Leo XIII; elected to the see, 19 June, 1899; promoted to the Archdiocese of Lemberg, 17 December, 1900. (4) Mgr. Gregorius Chomyszyn, b. on 24 March, 1867–8, elected, 19 April, 1904, and still governing the diocese.

A. A. MacErlean.

Stanley Falls, Vicariate Apostolic of, in the Belgian Congo. It is bounded on the east by the meridian 30° E. long.; on the south by a line running from the extreme point of Lake Albert Edward to the confluence of the Elila and the Congo, and thence to Bena-Kamba on the Lomani; on the west, by the right bank of the Lomani to its junction with the Congo, and the Congo to the watershed of the Ilimbiri; on the north by this same watershed of the Ilimbiri and the Congo and then the watershed of the Welle and the Arwimi as far as the meridian 30° E. long. The vicariate has an area of about 90,000 square miles.

The mission of Stanley Falls was established by the Fathers of the Sacred Heart in 1897. The pioneer missionaries, setting out from Antwerp on 6 July, 1897, settled definitively on Christmas Day following at a spot on the right bank of the River Congo four miles below Stanleyville, and gave to their first foundation, an orphanage, the name of St. Gabriel. The mission at that time formed part of the Vicariate of Belgian Congo. Their work was rapidly crowned with success and the mission on 3 August, 1904, was erected into a prefecture Apostolic, and on 10 March, 1908, was made a vicariate Apostolic. In 1901 the Franciscan Missionary Sisters of Mary came to assist the Fathers of the Sacred Heart and settled at St. Gabriel, taking charge of a girls' orphanage, a school, and a dispensary; since then they have given their services to the victims of sleeping-sickness in the quarantine station between the mission and Stanleyville. Four years later another band of the same Sisters arrived to take care of the hospital founded by the "Compagnie du Chemin de Fer des Grands Lacs", at Stanleyville, on the left bank of the river; they are about to establish (October, 1911) a house at Basoko at the mouth of the Arwimi. This year (1911) the Little Brothers of Mary are coming to Stanleyville to take care of the State school.

The mission has ten centres: St. Gabriel; Stanleyville, right bank; Stanleyville, left bank and railway; Lokandu; Lileke; Basoko; Banalya; Avakubi; Beni. Each centre spreads out and establishes secondary posts, with a chapel, dwelling-house for the missionary on his rounds, and house for the catechist; and posts of third rank, which have a catechist, but no chapel or house for the missionary. Each centre has its primary school, and St. Gabriel has a school for catechists. Most of the natives are fetishists or Mohammedans; the chief language spoken is Kishwali, but there are twenty-five others. The present superior is Mgr. Gabrielle-Emile Grison, titular Bishop of Sagalassus, who resides at St-Gabriel-lès-Falls, near Stanleyville. The latest annual religious statistics (1910–11) are: baptisms, 1839; confirmations, 1104; paschal communions, 5191; Christians, 7172; catechumens, 10,754; there are approximately 150 posts of second or third rank. The statistics of 1909 as given in Battandier, "Annuaire pontificale", are: Christians, 5969; catechumens, 7113; religious (men), 29, of whom 23 are priests and 6 lay brothers; churches, 9; chapels, 25; schools, 9; orphanages, 4; hospitals, 3; nuns, 11.

Gabriel Grison.

Stansel, Valentin, astronomer, b. at Olmütz, Moravia, 1621; d. at Bahia, Brazil, 18 Dec., 1705. He entered the Society of Jesus on 1 Oct., 1637, and taught rhetoric and mathematics at Olmütz and Prague. After his ordination he was, at his own request, appointed to work on the Jesuit mission in India, and went to Portugal to await an opportunity of taking ship for his destination. Meantime, he lectured on astronomy with considerable success at the college of Evora. While there, in order to conform to the language of the country, he changed his name to the form "Estancel", in which form it appears on the title pages of most of his published works. Obstacles having arisen which prevented his going to India, he was sent to Brazil, and was attached to the Jesuit College and Seminary of San Salvador (Bahia), where he filled the post of professor of moral theology, and later on that of superior. At the same time he continued his astronomical labours, and made extensive observations, particularly on comets, the results of which he sent to Europe for publication. His chief works are: "Dioptra geodetica" (Prague, 1652 or 1654), "Propositiones selenegraphicæ, sive de luna" (Olmütz, 1655); "Orbe Affonsino, horoscopio universal" (Evora, 1658); "Mercurius brasilicus, sive de Cœli et soli brasiliensis œconomia"; "Zodiacus Divini Doloris, sive Orationes XII" (Evora, 1675), "Legatus uranicus ex orbe novo in veterum, h. e. Observationes Americanæ cometarum factæ, conscriptæ et in Europam missæ" (Prague, 1683); "Uranophilus cœlestis peregrinus" (Ghent, 1685).

Edward C. Phillips.

Stanyhurst, Richard, Catholic controversialist, historian, and devotional writer, b. at Dublin, 1547; d. at Brussels, 1618. He was the son of James Stanyhurst, speaker of the Irish House of Commons and a leading Dublin Protestant. After leaving his school at Waterford he went to University College, Oxford, becoming B.A. in 1568, and then studied law in London. At Oxford he had met Bl. Edmund Campion, and he accompanied the latter on his visit to Ireland, helping him to collect material for his history of Ireland. He himself wrote the "Description of Ireland" and the "History of Ireland under Henry VIII", both published in Holinshed's "Chronicles", 1577. In several ways these works gave offence to Irish Catholics. In 1579 Stanyhurst's first wife, Janet Barnewall, died, and he left England for the Low Countries, where he became a Catholic. At Leyden he published his extraordinary translation of Virgil's Æneid into English hexameters (1582). Later he wrote "De rebus in Hibernia gestis" (1584) and "De Vita S. Patricii" (1587). In 1585 he married Helen Copley, by whom he had two sons, both afterwards Jesuits. Subsequently he spent some years in Spain as adviser to the Government on English affairs. On the death of his second wife, in 1602, he became a priest and was appointed chaplain to Archduke Albert, also assisting the English Benedictine nuns at Brussels. He published two devotional works, "Hebdomada Mariana" (1609) and "Hebdomada Eucharistica" (1614). His last work was "Brevis præmunitio pro futura concertatione cum Jacobo Usserio", in which he replied to the treatise of his Protestant nephew, James Ussher, afterwards Archbishop of Armagh.

Stanza, an Italian word signifying room, chamber, apartment. In English the term is chiefly used for Raphael's celebrated *Stanze* in the Vatican Palace, four in number, the walls of which were frescoed by Raphael and his pupils. The paintings in these chambers by Raphael's own hand belong to the most sublime monuments of Italian art, and rank with Michelangelo's ceiling frescoes of the Sistine Chapel. For a description of the paintings consult the articles Raphael; Vatican.

Stapf, Joseph Ambrose, theologian, b. at Fliess in the valley of the Upper Inn in the Tyrol, Austria, 15 August, 1785; d. at Brixen, 10 January, 1844. He studied at Innsbruck, and obtained the Degree of Doctor of Theology, and in 1821 became professor of moral theology at the lyceum at Innsbruck. In 1823 he was made professor of moral theology and pedagogy at the seminary of Brixen, where he was later a cathedral canon. His chief work is "Theologia moralis in compendium redacta" (4 vols., Innsbruck, 1827-30; 6th ed., 1846; 7th ed., 1855); the merits of this work consist in its strictly orthodox character, clear and precise presentation, and practical usefulness. From 1830 it was officially made a text-book for all seminaries of Austria. Much used as a text-book also was a compendium of this work: "Epitome theologiæ moralis publicis prælectionibus accommodata" [2 vols., Innsbruck, 1832; 2nd ed., 1842; 3rd ed. revised by J. V. Hofmann (volume I) and Simon Aichner (volume II), 1863-65]. At a later date Stapf made a free German revision, which showed the influence of Hirscher "Die christliche Moral. Als Antwort auf die Frage: Was wir thun müssen, um in das Reich Gottes einzugehen" [4 vols., Innsbruck, 1841-42; 2nd ed. edited after Stapf's death by J. V. Hofmann under the title: "Die christliche Sittenlehre" (3 vols., 1848-49)]. Besides these Stapf wrote: "Erziehungslehre im Geiste der katholischen Kirche" (Innsbruck, 1832; 4th ed., 1846; 5th ed. edited by J. V. Hofmann, 1854); "Expositio casuum reservatorum in diocesi Brixinensi" (Brixen, 1836); "Der hl. Vincentius von Paul, dargestellt in seinem Leben und Wirken" (anonymous, 2 vols., Vienna, 1837); "Biblische Geschichte des Alten und Neuen Bundes zum Gebrauche der Hauptschulen in den k. k. österreichischen Staaten" (1840).

Friedrich Lauchert.

Staphylus, Friedrich, theologian, b. at Osnabrück, 27 Aug., 1512; d. at Ingolstadt, 5 March, 1564. His father, Ludeke Stapellage, was an official of the Bishop of Osnabrück. Left an orphan at an early age he came under the care of an uncle at Danzig, then went to Lithuania and studied at Cracow, after which he studied theology and philosophy at Padua. About 1536 he went to Wittenberg, obtained the Degree of *magister artium* in 1541 and at Melanchthon's recommendation became a tutor in the family of the Count of Eberstein. In 1546 Duke Albert of Prussia appointed Staphylus professor of theology at the new University of Königsberg, which the duke had founded in 1544. At this time Staphylus was still under the influence of Luther's opinions, as is shown by his academic disputation upon the doctrine of justification, "De justificationis articulo". However, at his installation as professor he obtained the assurance that he need not remain if the duke tolerated errors which "might be contrary to the Holy Scriptures and the *primitivæ apostolicæ et catholicæ ecclesiæ consensum*". This shows that even then he regarded with suspicion the development of Protestantism. He had at Königsberg a violent theological dispute with William Gnapheus. In 1547-48 he was the first rector elected by the university, but in 1548 he resigned his professorship, because he met with enmity, and was dissatisfied with religious conditions in Prussia. Still he continued to be one of the councillors of the duke. In 1549 he married at Breslau the daughter of John Hess, a reformer of that place.

Returning to Königsberg, a new dispute broke out between him and Osiander. The dogmatic dissension, which seemed to him to make everything uncertain, drove him continually more and more to the Catholic idea of Tradition and to the demand for the authoritative exposition of the Scriptures by the Church. He expressed these views in the treatise "Synodus sanctorum patrum antiquorum contra nova dogmata Andreæ Osiandri", which he wrote at Danzig in 1552. A severe illness hastened his conversion, which took place at Breslau at the end of 1552. After this he first entered the service of the Bishop of Breslau, for whom he established a school at Neisse. In 1555 the Emperor Ferdinand I appointed him a member of the imperial council. At the Disputation of Worms in 1557 he opposed, as one of the Catholic collocutors, the once venerated Melanchthon. In his "Theologiæ Martini Lutheri trimembris epitome" (1558) he severely attacked the lack of union in Protestantism, the worship of Luther, and religious subjectivism. The treatise called forth a number of answers. In 1560 Duke Albert of Bavaria, at the request of Canisius, appointed Staphylus professor of theology at the Bavarian University of Ingolstadt after Staphylus had received the Degree of Doctor of Theology and Canon Law in virtue of a papal dispensation, as he was married. As superintendent (curator) he reformed the university. After this he took an active part in the Catholic restoration in Bavaria and Austria. He drew up several opinions on reform for the Council of Trent, as the "Counsel to Pius IV", while he declined to go to the council personally. In 1562 the pope sent him a gift of one hundred gulden, and the emperor raised him to the nobility. His learning and eloquence are frankly acknowledged by his Lutheran fellow-countryman Hermann Hamelmann. The attempt is now no longer made to trace his conversion to mercenary motives.

Klemens Löffler.

Stapleton, Theobald, b. in Co. Kilkenny, Ireland, but was English by descent, though not connected with the Yorkshire Stapletons. Nothing is known of his career, except that he was a priest living in Flanders, and that in 1639 he published at Brussels a book called "Catechismus seu doctrina christiana latino-hibernica", which was the first book in which Irish was printed in Roman type. His object in publishing it was to promote the use of Irish in religious literature, and to further this object he added to the book an appendix in nineteen sections giving directions for reading Irish.

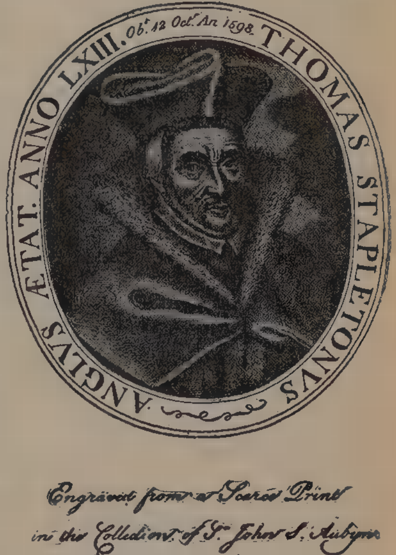
Edwin Burton.

Stapleton, Thomas, controversialist, b. at Henfield, Sussex, July, 1535; d. at Louvain, 12 Oct., 1598. He was the son of William Stapleton, one of the Stapletons of Carlton, Yorkshire. He was educated at the Free School, Canterbury, at Winchester, and at New College, Oxford, where he became a fellow, 18 Jan., 1553. On Elizabeth's accession he left England rather than conform to the new religion, going first to Louvain, and afterwards to Paris, to study theology. In 1563, being in England, he was summoned by the Anglican bishop Barlow to repudiate the pope's authority, but refused and was deprived of the prebend of Woodhorne in Chichester Cathedral, conferred on him in 1558. He then retired to Louvain with his father and other relatives. In 1568 he joined Allen at Douai and took a great part in founding the English college there, both by lecturing and by devoting to its support his salary as lecturer in theology at Anchin College.

His talents were so remarkable that he was soon appointed public professor of divinity, and canon of St. Amatus; and together with Allen he completed the degree of D.D. on 10 July, 1571. In 1584 he resigned these preferments to enter the Society of Jesus, but did not complete his novitiate, and returned to Douai. Philip II appointed him professor of Scripture at Louvain in 1590, to which office a canonry in St. Peter's Church was annexed; and soon after he was made dean of Hilverenbeeck in the Diocese of Bois-le-Duc. The emoluments of these offices were all spent in relieving necessitous English Catholics. Meanwhile his fame as a theologian had spread to Rome and Pope Clement VIII thought so much of his theological writings that he caused them to be read aloud at his table. Twice he invited Stapleton to Rome in vain, but his offer to make him prothonotary Apostolic in January, 1597, was accepted. It was generally believed that he would be created cardinal, a suggestion which was disapproved of by Father Agazzari, S. J., rector of the English College, and obstacles were put in the way of his journey to Rome (Eley, "Certaine Briefe Notes", p. 254). He accordingly remained at Louvain till his death in the following year. He left his books and manuscripts (now lost) to the English College at Douai. An original painting of Stapleton is preserved at Douai Abbey, Woolhampton, England.



Obt. 12 Oct. An 1598.
THOMAS STAPLETONVS ANGLVS ÆTAT. ANNO LXIII.
Engraved from a Scarce Print
in the Collection of Sr. John S. Aubyn

His first works were translations: Ven. Bede's "History of the Church in England" (Antwerp, 1556), the "Apology of Staphylus" (Antwerp, 1565), and Hosius on "The Expresse Word of God" (1567). His original works were very numerous: "A Fortress of the Faith" (Antwerp); "A Return of Untruths" (Antwerp, 1566); "A Counterblast to M. Horne's vain blast" (Louvain, 1567); "Orationes funebres" (Antwerp, 1577); "Principiorum fidei doctrinalium demonstratio" (Paris, 1578); "Speculum pravitatis hæreticæ" (Douai, 1580); "De universa justificationis doctrina" (Paris, 1582); "Tres Thomæ" (Douai, 1588); "Promptuarium morale" in two parts (Antwerp, 1591, 1592); "Promptuarium Catholicum in Evangelia Dominicalia" (Cologne, 1592); "Promptuarium Catholicum in Evangelia Ferialia" (Cologne, 1594) and "Promptuarium Catholicum in Evangelia Festorum" (Cologne, 1592); "Relectio scholastica" (Antwerp, 1592); "Authoritatis Ecclesiasticæ circa S. Scripturarum approbationem defensio" (Antwerp, 1592); "Apologia pro rege Philippo II" (Constance, 1592), published under the punning pseudonym of Didymus Veridicus Henfildanus, i. e. Thomas the Stable-toned [truth-speaking] Henfieldite. "Antidota Evangelica", "Antidota Apostolica contra nostri Temporis Hæreses" (both at Antwerp, 1595); "Antidota Apostolica in Epistolam Pauli ad Romanos" (Antwerp, 1595); "Triplicatio inchoata" (Antwerp, 1596); "Antidota Apostolica in duas Epistolas ad Corinthios" (Antwerp, 1598); "Orationes catecheticæ" (Antwerp, 1598); "Vere admiranda, seu de Magnitudine Romanæ Ecclesiæ" (Antwerp, 1599); "Orationes academicæ miscellaneæ" (Antwerp, 1602); "Oratio academica" (Mainz, 1608). All his works were republished in four folio volumes in Paris in 1620, with an autobiography of the author in Latin verse and Henry Holland's "Vita Thomæ Stapletoni".

Holland, *Vita Thomæ Stapletoni*, prefixed to the *Opera Omnia*, (Paris, 1620); Pitts, *De illustribus Angliæ scriptoribus* (Paris, 1619); Dodd, *Church History*, II (Brussels *vere* Wolverhampton, 1739–42); *Laity's Directory* (London, 1812), with engraved portrait; Cooper, in *Dict. Nat. Biog.*, s. v.; Gillow, *Bibl. Dict. Eng. Cath.*, s. v.; *Douay Diaries* (London, 1878); *Letters and Memorials of Cardinal Allen* (London, 1882); Eley, *Certaine Briefe Notes* (Paris, 1603); Duthillœul, *Bibl. Douaisienne* (Douai, 1835–38); Molanus, *Histoire de Louvain* (Brussels, 1861); Foster, *Alumni Oxonienses* (Oxford, 1891); À Wood, *Athenæ Oxonienses* (London, 1813–20).

Edwin Burton.

Starowolski, Simon, b. at Stara Wola, near Cracow, 1585; d. at Cracow, 1656; studied at Louvain, but took his degrees in the University of Cracow, after which he travelled in various countries of Western Europe. Returning, he taught philosophy in the University of Cracow, and then became secretary to Chodkiewicz, whom he accompanied on his expedition to Chocim. For years he was a tutor to young noblemen, and again went over Europe in this capacity with the Hetman Koniecpolski's son. In 1639 he was ordained priest, and subsequently became a canon in Cracow. During the Swedish siege (1655) he administered the diocese for Bishop Gębicki, and it became his duty to show the cathedral to the Swedish king. When he pointed to the tomb of Łokietek who, he said, thrice an exile, had returned thrice, Charles Gustavus remarked that "John Casimir would never return". "Serenissime Rex", he replied, "fortuna variabilis, Deus immutabilis." He died some months later, before John Casimir's triumphant return.

Starowolski wrote most abundantly and on every possible subject—history, geography, law, strategy, theology, and politics. His province also embraced literature, for his "Scriptorum Polonicorum Hecatontas" is a short biography of Polish authors, with the titles of their works. This he wrote during his travels abroad, where he published it in Latin, to instruct foreigners in Polish matters. At the same time he wrote books in Polish, chiefly of a moral character, and many theological treatises; also two collections of sermons entitled: "The Lord's Sanctuary" and "The Ark of the Testament". His chief political works are: an exhortation to put down the Tatars; "The True Knight"; and three works intended to reform Polish morals, with different titles, and in different degrees of elaboration. Last, and shortly before his death, appeared his famous though short "Lament of the dying Mother, Poland, over her undutiful sons"; from Skarga's days to those of Mickiewicz, no equally lofty expression of patriotism appeared. Starowolski wrote more than sixty books; but those mentioned suffice to give an idea of the extent of his learning, intelligence, assiduity, and zeal for his country's welfare. In the commonwealth, tottering to its fall, he was one of the most public-spirited men; possibly there was not a single evil in Poland which he did not denounce. And thus, though no genius, he is most worthy of respect, and is the principal literary figure of those times. As a writer, perhaps on account of his numerous works, he is neither very correct nor very brilliant; yet at times (as in the Lament), under the influence of his indignation, he rises to heights of thrilling eloquence. As a political writer, he possesses the quality of sound common sense, and not unfrequently succeeds in pointing out the right means of saving the State. On the whole, he is somewhat more of a moralist than of a politician; at all events, in his writings, the reform of morals takes up a larger place than the regeneration of the commonwealth.

S. Tarnowski.

Starr, Eliza Allen, b. at Deerfield, Massachusetts, 29 Aug., 1824; d. at Durand, Illinois, 8 Sept., 1901. She was educated at her father's home. On her father's side she was descended from Dr. Comfort Starr of Ashford, County Kent, England, who settled at Cambridge, Massachusetts, in 1633, and, on her mother's side, from the "Allans of the Bars", who came from Chelmsford, Essex, England. She inherited the love of literature from her parents, and when thirteen years of age went to Boston, where she finished her studies in 1845. In Boston she opened a studio, but, the climate proving unfavourable to her health, she moved to Brooklyn, thence to Philadelphia. She finally accepted a position as teacher in the family of a wealthy planter at Natchez, Mississippi. In 1853 she returned to Brooklyn as teacher of drawing in a boarding-school. In 1848 she returned to Philadelphia. It was during this visit to her kinsfolk she met the Rt. Rev. Francis Patrick Kenrick, afterward Archbishop of Baltimore. It was from this saintly and learned churchman that the germs of faith already in her heart received their first activities. After an incessant struggle of nine years she was received into the Catholic Church at Boston by Bishop Fitzpatrick on 23 December, 1854, and made her first Communion on the following Christmas morning in the chapel of the Sisters of Charity. In 1856 Miss Starr entered upon a larger field of labour. In Chicago she found her life work. She laboured with her pen, and with the pencil illustrated her books. She lectured throughout the United States, and in the auditorium of her home annually gave a course of ten lectures upon art and literature.

Her published works are: "Songs of a Lifetime"; "Patron Saints"; "Pilgrims and Shrines"; "Isabella of Castile"; "What we see"; "Ode to Christopher Columbus"; "Christmas-tide"; "Christian art in our own age"; "The Seven Dolours of the Virgin Mary"; "Literature of Christian Art"; "The Three Keys to the Camera della Segnatura in the Vatican"; "Art in the Chicago Churches", published in the "New World"; "Woman's work in Art"; and "The Three Archangels and the Guardian Angels in Art". In recognition of this last work Leo XIII sent to her a beautiful medallion. She was the first woman to receive the Lætare Medal, which was conferred on her in 1865 by the University of Notre Dame, Indiana.

James J. McGovern.

State and Church.—The Church and the State are both perfect societies, that is to say, each essentially aiming at a common good commensurate with the need of mankind at large and ultimate in a generic kind of life, and each juridically competent to provide all the necessary and sufficient means thereto. The State is ethically demonstrated to be such, and the Church has a like demonstration from the theology of Christian Revelation. By reason of coexistence on the earth, community of subjects, and a need in common of some of the same means of activity, it is inevitable that they should have mutual relations in the juridical order. To declare these relations in brief from an ethical viewpoint, which is the scope of the present article, it will be necessary to state: I. The basis of their respective rights; II. The range of their respective jurisdictions; III. Their mutual corporate relation; IV. The union of Church and State; V. Counter theories.

I. The Basis of Rights.—All rights and duties on earth come ultimately from God through the Divine Law, either natural or positive. The character of our natural rights and duties is determined by the purpose to which the Creator shaped the nature of man, and natural knowledge of them is acquired by human reason from the aptitudes, tendencies, and needs of nature. Duties and rights descending from positive Divine Law are determined by some additional purpose of God, over and above the exigencies of human nature, and are to be learned only from Divine Revelation, either in its explicit declaration or its rational content. Man has one ultimate purpose of existence, eternal happiness in a future life, but a twofold proximate purpose, one to earn his title to eternal happiness, the other to attain to a measure of temporal happiness consistent with the prior proximate purpose. The State is a natural institution, whose powers, therefore, come from the natural law and are determined by the character of the natural purpose of the State *plus* whatever limitation God has, because of qualifications in the last end of man, ordained in the Divine Positive Law. The Church is a positive institution of Christ the Son of God, whose powers, therefore, are derived from the Divine Positive Law and are determined by the nature of the purpose He has assigned to it, *plus* whatever further concession He has made to facilitate the accomplishment of that purpose. In any consideration of the mutual relations of Church and State the above propositions are fundamental.

The goal of the State is the temporal happiness of man, and its proximate purpose the preservation of external juridical order and the provision of a reasonable abundance of means of human development in the interests of its citizens and their posterity. Man himself, however, as we have said, has a further goal of perfect happiness to be realized only after death, and consequently a proximate purpose to earn in this life his title to the same. In the pursuit of this latter purpose, speaking in the abstract, he had a natural right to constitute a social organization taking over the worship of God as a charge peculiarly its own. In the concrete, however, i. e. as a matter of fact, God by positive law has vacated this natural right and established a universal society (the Church) for Divine worship and the securing of perfect happiness in the hereafter. God, furthermore, has appointed for man a destiny which cannot be attained by mere natural means, and consequently God has conceded to man additional means commensurate with this ultimate purpose, putting these means at the disposal of man through the ministration of the Church. Finally, He has determined the form of external public worship to be rendered, centring it about a sacrifice, the efficacy of which is from itself, being, as it is, a repetition of the Sacrifice of Calvary. The goal, then, of the Church is the perfect supernatural happiness of man; its proximate purpose, to safeguard the internal moral order of right and wrong; and its external manifestation, to care for Divine worship and minister to man the supernatural means of grace. The State, then, exists to help man to temporal happiness, the Church, to eternal. Of these two purposes the latter is more ultimate, man's greater good, while the former is not necessary for the acquisition of the latter. The dominating proximate purpose of man must be to earn his title to eternal salvation: for that, if needs be, he must rationally sacrifice his temporal happiness. It is clear, therefore, that the purpose of the Church is higher in the order of Divine Providence and of righteous human endeavour than that of the State. Hence, in case of direct collision of the two, God's will and man's need require that the guardian of the lower purpose should yield. Likewise the argument for the extension of the powers of the higher society in a measure into the domain of the lower will not hold for such extension from the lower into the higher.

II. The Range of Jurisdiction.—As there are many distinct States of equal natural right the subjects of each are restricted in number, and its government of them is practically confined within the limits of its own territory. Within this territory it has full power to govern them, defining their rights and in some cases restricting the exercise of these rights, conferring purely civil rights and imposing civil duties, holding its citizens to a proper condition of public morality, owning property and qualifying private ownership of the same—all within the exigencies of the civic purpose of preserving external juridical order and promoting the prosperity of the citizens, and over all bound by the enactment of the Divine Law, both natural and positive. In a word, the State controls its own subjects, in the pursuit of its own natural end, in all things where a higher right does not estop it. A higher right will be a right existent because of an ulterior or a more essential destiny of man than the purpose which civil society pursues for him. The Church has the right to preach the Gospel everywhere, willing or nilling any state authority, and so to secure the rights of its members among the subjects of any civil polity whatever. The Church has the right to govern her subjects, wherever found, declaring for them moral right and wrong, restricting any such use of their rights as might jeopardize their eternal welfare, conferring purely ecclesiastical rights, acquiring and holding property herself, and empowering her subordinate associations to do the same—all within the limits of the requirements of her triple purpose, as laid down by the Divine Positive Law, of preserving the internal order of faith and morals and its external manifestation, of providing adequate means of sanctification for her members, and of caring for Divine worship, and over all bound by the eternal principles of integrity and justice declared in the natural and positive Law of God.

In all purely temporal subject-matter, so long as it remains such, the jurisdiction of the State over its own subjects stands not only supreme, but, as far as the Church is concerned, alone. Purely temporal matter is that which has a necessary relation of help or hindrance to man's temporal happiness, the ultimate end of civil society or the State, in such wise that it is at the same time indifferent in itself as a help or hindrance to man's eternal happiness. It is of two kinds: primarily it includes all human acts so related, and secondarily persons or external things as far as they are involved in such acts. In all purely spiritual subject-matter, so long as it remains such, the jurisdiction of the Church over her ecclesiastical subjects obtains to the complete exclusion of the State; nor is the Church therein juridically dependent in any way upon the State for the exercise of its legitimate powers. Purely spiritual subject-matter is primarily made up of human acts necessarily related as help or hindrance to man's eternal happiness, the last end of the Church, and at the same time indifferent in themselves as a help or hindrance to man's temporal happiness; secondarily it extends to all persons and external objects as involved in such acts. In all subject-matter not purely spiritual nor purely temporal, but at the same time both spiritual and temporal in character, both jurisdictions may enter, and so entering give occasion to collision, for which there must be a principle of solution. In case of direct contradiction, making it impossible for both jurisdictions to be exercised, the jurisdiction of the Church prevails, and that of the State is excluded. The reason of this is obvious: both authorities come from God in fulfillment of his purposes in the life of man: He cannot contradict Himself; He cannot authorize contradictory powers. His real will and concession of power is determined by the higher purpose of His Providence and man's need, which is the eternal happiness of man, the ultimate end of the Church. In view of this end God concedes to her the only authority that can exist in the case in point.

In a case where there is no direct contradiction, but a possibility of both jurisdictions being exercised without hurt to the higher, though neither jurisdiction is voided, and they both might, absolutely speaking, be exercised without mutual consultation, practically there is a clear opening for some adjustment between the two, since both jurisdictions are interested in avoiding friction. Though concordats were not devised precisely for this purpose, they have in many cases been used for such adjustment (see Concordat). Consistently with the superiority of essential purpose indicated above, the judicial decision as to when a question does or does not involve spiritual matter, either purely or in part, rests with the Church. It cannot lie with the State, whose jurisdiction, because of the inferiority of its ultimate end and proximate purpose, has not such judicial faculty in regard to the subject-matter of a jurisdiction which is as far above its own as the ultimate end and proximate purpose thereof is above that of the State. In analogous fashion every higher court is always judge of its own jurisdiction as against a lower.

All the above is matter of principle, argued out as a question of objective right, and it supposes that the jurisdiction is to be applied through the respective subjects of the same. In point of fact the duty of submission in a citizen of a State to the higher jurisdiction of the Church does not exist where the citizen is not a subject of the Church, for over such the Church claims no governing power. It may also be by accident subjectively obscured in one who, though in point of right the Church's subject, in good faith fails, through an erroneous conscience, to recognize this fact, and, by consequence, the Church's right and his own duty. The subject of the State has been made fairly clear by human law and custom; but the frequent rebellion, continued through centuries, of great numbers of the Church's subjects has confused in the mind of the non-Catholic world the notion of who is by revealed law a subject of the Church. The juridical subject of the Church is every human being that has validly received the Sacrament of Baptism. This birth into the Church by baptism is analogous to the birth within the territory of a State of the offspring of one of its citizens. However, this new-born subject of the State can, under certain circumstances, renounce his allegiance to his native State and be accepted as the subject of another. Not so one born into the Church by baptism: for baptism is a sacrament leaving an indelible character upon the soul, which man cannot remove and so escape legitimate subjection. Yet, as in a State, a man may be a subject without full rights of citizenship; may even, while remaining a subject, lose those rights by his own act or that of his parents; so, analogously, not every subject of the Church is a member thereof, and once a member, he may lose the social rights of membership in the Church without ceasing to be its subject. For full membership in the Church, besides valid baptism, one must by union of faith and allegiance be in fellowship with her, and not be deprived of the rights of membership by ecclesiastical censure. Hence, those validly baptized Christians who live in schism or, whether by reason of apostasy or of initial education, profess a faith different from that of the Church, or are excommunicated therefrom, are not members of the Church, though as a matter of objective right and duty they are still her subjects. In practice the Church, while retaining her right over all subjects, does not—except in some few matters not of moment here—insist upon exercising her jurisdiction over any but her members, as it is clear that she cannot expect obedience from those Christians who, being in faith or government separated from her, see no right in her to command, and consequently recognize no duty to obey. Over those who are not baptized she claims no right to govern, though she has the indefeasible right to preach the Gospel among them and to endeavour to win them over to become members of Christ's Church and so citizens of her ecclesiastical polity.

III. Mutual Corporate Relation of Church and State.—Every perfect society must acknowledge the rights of every other perfect society; must render to it all duties consequent upon such rights; must respect its autonomy; and may demand the recognition of its own rights and the fulfilment of obligations arising therefrom. Whether one may also command such recognition and fulfilment is another question: one does not involve the other; thus, for instance, the United States may demand its rights of England, but cannot command England to acknowledge them, as the United States has no authority over England or any other nation. Prescinding from this for the moment, the Church must respect the rights of the State to govern its subjects in all purely temporal matters, and, if the subjects of the State are likewise subjects of the Church, must hold the latter to the fulfilment of their civil duties as an obligation in conscience. On the other hand, in principle, as a matter of objective duty, the State is bound to recognize the juridical rights of the Church in all matters spiritual, whether purely so or of mixed character, and its judicial right to determine the character of matters of jurisdiction, in regard, namely, to their spiritual quality. The State, furthermore, is bound to render due worship to God, as follows from the same argument from the natural law which proves man's obligation to external worship, namely, that man must acknowledge his dependence upon God and his subjection to Him in every capacity in which he is so dependent, and therefore not only in his private capacity as an individual but also in that public, corporate capacity whereby he and his fellow citizens constitute the State. Due worship, in the present economy, is that of the religion of Christ, entrusted to the care of the Church. The State must also protect the Church in the exercise of her functions, for the reason that the State is bound to protect all the rights of its citizens, and among these their religious rights, which as a matter of fact would be insecure and fruitless were not the Church protected. The State is even under obligation to promote the spiritual interests of the Church; for the State is bound to promote whatever by reaction naturally works for the moral development of its citizens and consequently for the internal peace of the community, and in the present condition of human nature that development is necessarily dependent upon the spiritual influence of the Church.

There being, then, an obligation upon the State as such, arising out of the Natural and the Divine Positive Law, to render public Divine worship in accordance with the guidance of the Church, in whose charge Christ has placed the worship due in the present order of things, an obligation also to protect the Church and to promote her interests, the Church clearly has a perfect right to demand the fulfilment of these duties, since their neglect would infringe her right to the benefit proceeding from the fulfilment. To have the further right to command the State in their regard implies that the Church has a right to impose the obligations of her authority in their regard, to exact them authoritatively from the State. Now in purely temporal matters, while they remain such, the Church cannot command the State any more than she can command the subjects of the State, even though these are at the same time her own subjects. But in spiritual and mixed matters calling for corporate action of the State, the question depends upon whether the physical persons who make up the moral personality of the State are themselves subjects of the Church. In case they are, then the Church has in consequence jurisdiction therein over the State. The reason is that owing to the supremacy in man's life purposes of his eternal happiness, man in all his capacities, even of a civil nature, must direct his activities so that they shall not hinder this end, and where action even in his official or civil capacity is necessary for this ultimate purpose he is bound to place the action: moreover, in all these activities so bearing on this end, since they are thereby spiritual matter, every subject of the Church is under the jurisdiction of the Church. If, then, the physical persons constituting the moral person of the State are the subjects of the Church, they are still, in this joint capacity, subject to her in like matters, namely, in the fulfilment of all civil duties of the State towards religion and the Church. The Church, because of the uselessness of her insistence, or because of greater evils to be so avoided, may waive the exercise of this jurisdiction; but in principle it is hers.

In practice we distinguish, from a religious point of view, four kinds of civil authority. First, in a Catholic State, in which, namely, the physical persons constituting the moral personality of the State are Catholic, the Church's jurisdiction in matters of her competency is in every way complete. Secondly, in a non-Christian State, for instance that of the Turks, where the constituency is not even baptized, the Church claims no jurisdiction over the State as such: the foundation of such jurisdiction is lacking. Third, in a Christian but non-Catholic State, where the constituency, though by baptism subjects, are not members of the Church, *per se* the jurisdiction of the Church would stand, but *per accidens* its exercise is impossible. Fourth, a mixed State, one, namely, the constituents of whose moral personality are necessarily of diverse religions, practically lies outside the reach of ecclesiastical jurisdiction, since the affiliation of some of the constituents could not make a subject of the Church out of the moral personality constitutionally made up of elements not all of which share such affiliation. The subordination here indicated is indirect: not that the Church does not directly reach spiritual and mixed matters, but that in their regard it directly reaches only its immediate subjects and indirectly through them the State which they constitute. Again, the State as such does not in such matters directly act for the supernatural purpose of the Church (the eternal happiness of its subjects), but for its own temporal purpose inasmuch as such action will make for their temporal happiness; and so it acts for the Church by indirection.

There is no parallel argument to give the State indirectly jurisdiction over the Church in matters purely temporal, and therefore of the State's sole competency. The Church is universal and cannot be a member or subject of any particular State. Even were there but one universal State in the world, the Church would not be a member thereof, for its members are not citizens of the State to the extent that in every capacity they must submit their activities for the purpose of the State, particularly not the activities concerned directly with the higher purpose of eternal life. Moreover, the Church is not constituted merely by the exercise of the natural rights of the men who are citizens of the State, but by the supernatural endowment of the Divine Positive Law. Finally, the Church in its corporate capacity is not bound to seek the temporal happiness of her members as a means to their eternal welfare, while the State as such is bound to Divine worship and to the protection and promotion of the Church in the interests of religion, because this is a necessary element involved in the perfect temporal happiness of the Catholic citizen. The State, therefore, has not, either in temporal or in spiritual things, any authority over the Church as such, however much it may have in things purely temporal over the members of the Church, who are subjects of the State. The State can, as was said above, demand its rights of the Church: it cannot command them.

IV. Union of Church and State.—There is some confusion in the public mind about the meaning of the union of Church and State. The essential idea of such union is a condition of affairs where a State recognizes its natural and supernatural relation to the Church, professes the Faith, and practises the worship of the Church, protects it, enacts no laws to its hurt, while, in case of necessity and at its instance, taking all just and requisite civil measures to forward the Divinely appointed purpose of the Church—in so far [illegible] all these make for the State's own essential purpose, the temporal happiness of its citizens. That this is in principle the normal and ethically proper condition for a truly Catholic State should be evident from the religious obligations of the Catholic State as above declared. That in practice it has in the past sometimes worked evil to both Church and State, is an accidental effect consequent upon the frailty and passion of the human instruments then ruling in Church, or in State, or in both. As a partial attempt at security against such evil consequences, the Church has for centuries established concordats with Catholic States; but even these have not always saved the situation. For concordats, like all other agreements, however firm in principle, are in practice only as strong as the conscientiousness of those whose duty it is to observe them. The conscienceless can destroy them at pleasure. Between the Church and a non-Christian or a Christian, but non-Catholic, State a condition of separation, as meaning a condition of indifference of the State towards the Church, is to be expected, as the foundation of the specific obligations involved in union are wanting. Such a separation for a Catholic State would be criminal, as ignoring the sacred obligations of the State.

For a State once Catholic and in union with the Church to declare a separation on the ground that it has ceased to be Catholic is an action which as a matter of objective right has no standing; for in objective truth the duty of the people would be to regain their lost faith, if they had really lost it, or to live up to it, if in reality it were not lost. But on the supposition that the essential constituency of a State has been transformed from Catholics to those who, not by hypocritical pretence, but in the fulness of good faith, are not Catholics—a condition easier of supposition than of realization—the State through such mistaken conscience might seek for separation without subjective fault, provided the separation were effected without the summary dissolution of existing contracts, without the violation of vested rights of the Church or its members. It may be noted in passing that in the recent instances of separation in France and Portugal, i. e. the breaking up of an existing condition of union between Church and State, the separation has been effected where the bulk of the people is still Catholic, has been conducted in violation of rights and contracts both natural and positive, and has resulted, as it was aimed to do, in an attempt at complete subjection of the Church and of all civil subjects in the matters of religion to the tyranny of administrations which scoff at all religion. That in States whose personality is constitutionally made up of every complexion of religious faith, much of it in its diversity sincere, there should be a governmental abstention from any specific denominational worship or profession of belief, and a general protection and encouragement of the individual in the practice of religion according to his own religious principles within the limits of the Natural Law, or of a general acceptance of Christianity, seems a practical necessity of evil times, when unity of faith is so widely lacking, and a *modus vivendi* which, if sincerely carried out, seems to work as little harm to objective right as can be expected in a condition of consciences sincerely differing in the matter of right established by the Divine Positive Law.

V. Counter Theories.—The theories opposed to the Catholic position on the true relations between the Church and State are threefold, differing in latitude of negation of ecclesiastical right.

A. *Absolute Liberalism* is the most extreme. Having its source in the principles of the French Revolution and beginning with those who denied the existence of God, it naturally takes the position that the State prescinds from God: the State, it says, is atheistic. Undertaking, with the elimination of revelation and the Divine Positive Law, to get back to purely natural principles, it accepted from Rousseau and the Utilitarians the principle that all right comes from the State, all authority from the consentient wills of the people of the State. The position logically followed that the Church has no rights—not even the right to existence—save such as are conceded to it by the civil power. Hence it is not a perfect society, but a creature of the State, upon which it depends in all things, and upon which it must be directly subordinate, if it is to be allowed to exist at all. (See LIBERALISM.)

B. *Qualified Liberalism*, as formulated by Cavour and Minghetti in Italy at the close of the first half of the nineteenth century, does not go so far. While claiming to admit that the Church is more or less a perfect society with foundations in the Divine Positive Law of Christian Revelation, it contends that the Church and State are disparate in such fashion as to prosecute their respective ends independently in behalf of the individual, having no subordination whatever one to the other. Consequently, in all public affairs the State must prescind from every religious society, and deal with such either as private associations existing within the State or as foreign corporations to be treated with accordingly. The axiom of this newer Liberalism is "A free Church in a free State", which in point of fact means an emasculated Church with no more freedom than the shifting politics, internal and external, of a State chose to give, which in the event, as was to be foreseen, amounted to servitude. (See ITALY: *Political and Civil Government:* (2) *Church and State.*)

C. *The Theory of the Regalists* conceded to the Church a certain amount of social right from its Divine Founder, but conditioned the exercise of all social powers upon the consent of the civil government. This theory, originating with Gallicanism (q. v.), practically denied the Church to be a perfect society, inasmuch as it made its jurisdiction depend for its valid exercise upon the civil power. The theory gradually extended its contentions so far as to make the Church indirectly subordinate to the State, attributing to the State the authority to forbid the Church any juridical act that might work to the detriment of the State and to command the Church in case of necessity to put forth her full powers to promote the interests of the State.

CHARLES MACKSEY.

State or Way, PURGATIVE, ILLUMINATIVE, UNITIVE.—The word *state* is used in various senses by theologians and spiritual writers. It may be taken to signify a profession or calling in life, as where St. Paul says, in I Cor., vii, 20: "Let every man abide in the same calling in which he was called". We have, in this sense, states of perfection, classified in the Church as the clerical state, the religious state, and the secular state; and among religious states, again, we have those of the contemplative, the active, and the mixed orders. The word is also used in the classification of the degrees or stages of Christian perfection, or the advancement of souls in the supernatural life of grace during their sojourn in the world. This has reference to the practice of all the virtues, both theological and moral, and to all their acts both external and internal. It includes two elements, namely our own efforts and the grace of God assisting us. This grace is never wanting for those acts which are positively commanded or inspired by God, and the work of perfection will proceed according to the energy and fidelity with which souls correspond to its aids.

DIVISION OF THE STATES OR WAYS.—It is in the latter sense we have to understand the word *state* in this article, and, according to the various classes of souls who aspire to perfection in this life, the Fathers and theologians distinguish three states or stages of perfection. These are the state of beginners, the state of progress, and the state of the perfect. These states are also designated "ways", because they are the ways of God by which souls are guided on the road to heaven according to the words of the Psalmist: "He hath made his ways known to Moses: his wills to the children of Israel" (Ps. cii, 7). Hence we have the division of the spiritual life which has been adopted since the time of the Pseudo-Dionysius, into the "purgative" way, the "illuminative" way, and the "unitive" way. (See St. Thomas, II-II, Q. clxxxiii, a. 4; Suarez, "De Religione", Tr. VIII, lib. I, c. xiii.) St. Thomas well explains the reason for this division when he says: "The first duty which is incumbent on man is to give up sin and resist concupiscence, which are opposed to charity; this belongs to beginners, in whose hearts charity is to be nursed and cherished lest it be corrupted. The second duty of man is to apply his energies chiefly to advance in virtue; this belongs to those who are making progress and who are principally concerned that charity may be increased and strengthened in them. The third endeavour and pursuit of man should be to rest in God and enjoy Him; and this belongs to the perfect who desire to be dissolved and to be with Christ." Among the condemned propositions of Miguel de Molinos, the author of "The Spiritual Guide" (in which the false mysticism known as Quietism is propounded), is the following: "These three kinds of way, the *purgative, illuminative,* and *unitive,* are the greatest absurdity in Mystical Theology" (cf. Constitution "Cœlestis Pastor" of Innocent XI, 1687). Avoiding this and other errors of false mystics, it must be borne in mind that energy and activity are required in every stage of our spiritual life, and that we have to accept the degrees of that life and to follow the kind of prayer which is proper to one or other of them according to our state, whether it be the purgative, illuminative, or unitive. Various descriptions of these three ways are given by eminent masters of the spiritual life. Substantially they may all be said to agree, though in details and manner of treatment they may differ.

The Purgative Way.—The purgative way is the way, or state, of those who are beginners, that is those who have obtained justification, but have not their passions and evil inclinations in such a state of subjugation that they can easily overcome temptations, and who, in order to preserve and exercise charity and the other virtues, have to keep up a continual warfare within themselves. It is so called because the chief concern of the soul in this state is to resist and to overcome the passions by nourishing, strengthening, and cherishing the virtue of charity. This can and ought to be done not only by keeping the Commandments, but by foreseeing the occasions in which the precepts oblige, so as to be ready by a prompt and well-disposed will to resist and avoid any sins opposed to them. This state, although in one sense it is imperfect, in another sense may be called a state of perfection, because the soul remains united to God by grace and charity so long as it is free from the stain of mortal sin. Purity of soul may be said to be the proper end of the purgative way, and the forms of prayer suitable for this way or state are meditations on sin and its consequences, and on death, judgment, hell, and heaven. The acts which aid towards uprooting the remnants and habits of former sins, and preventing one from ever returning to them, are corporal austerities, mortification of the appetite, abnegation of one's own will, and conformity to the will of God. In a word, the distinctive notes of this state are war against those temptations which entice the soul to sin by the attraction of pleasures of the senses and the natural shrinking from pain; and repugnance to acts known to be contrary to the will of God. The characteristic virtue of this state is humility, by which the soul is made sensible of its own weakness and its dependence upon the succours of the grace of God.

What mystical writers describe as the active and passive purifications of the spiritual life may be brought under, and arranged according to, their three states of perfection, though not confined to any one of them. The active purification consists in all the holy efforts, mortifications, labours, and sufferings by which the soul, aided by the grace of God, endeavours to reform the mind, heart, and the sensitive appetite. This is the characteristic work of the purgative way. The passive purifications are the means which God employs to purify the soul from its stains and vices, and to prepare it for the exceptional graces of the supernatural life. In the works of St. John of the Cross these purifications are called nights, and he divides them into two classes, the night of the senses and the night of the spirits. In the state of beginners the soul is often favoured by God with what are called "sensible consolations" because they have their beginning and are felt chiefly in the senses or sensible faculties. They consist in sensible devotion and a feeling of fervour arising from the consideration of God's goodness vividly represented to the mind and heart; or, from external aids, such as the ceremonies of the Church. These consolations are often withdrawn, and a state of desolation ensues, and then the passive purification of the senses begins.

The Illuminative Way.—The illuminative way is that of those who are in the state of progress and have their passions better under control, so that they easily keep themselves from mortal sin, but who do not so easily avoid venial sins, because they still take pleasure in earthly things and allow their minds to be distracted by various imaginations and their hearts with numberless desires, though not in matters that are strictly unlawful. It is called the illuminative way, because in it the mind becomes more and more enlightened as to spiritual things and the practice of virtue. In this grade charity is stronger and more perfect than in the state of beginners; the soul is chiefly occupied with progress in the spiritual life and in all the virtues, both theological and moral. The practice of prayer suitable for this state is meditation on the mysteries of the Incarnation, the Life of Our Saviour, and the mysteries of His Sacred Passion. "Though the mysteries of the Passion", as Ven. Luis de Lapuente says, "belong to the illuminative way, especially in its highest degree, which approaches nearest to the *unitive* way, nevertheless they are exceedingly profitable for all sorts of persons, by whatever way they walk, and in whatever degree of perfection they live; for sinners will find in them most effectual motives to purify themselves from all their sins; beginners to mortify their passions; proficients to increase in all kinds of virtue; and the perfect to obtain union with God by fervent love" (introduction to "Meditations on the Passion"). The fundamental virtue of this state is recollection, that is, a constant attention of the mind and of the affections of the heart to thoughts and sentiments which elevate the soul to God—exterior recollection which consists in the love of silence and retirement, interior recollection in simplicity of spirit and a right intention, as well as attention to God in all our actions. This does not mean that a person has to neglect the duties of his state or position in life, nor does it imply that honest and needful recreation should be avoided, because these lawful or necessary circumstances or occupations can well be reconciled with perfect recollection and the most holy union with God.

The soul in the illuminative way will have to experience periods of spiritual consolations and desolations. It does not at once enter upon the unitive way when it has passed through the aridities of the first purgation. It must spend some time, perhaps years, after quitting the state of beginners, in exercising itself in the state of proficients. St. John of the Cross tells us that in this state the soul, like one released from a rigorous imprisonment, occupies itself in Divine thoughts with much greater freedom and satisfaction, and its joy is more abundant and interior than it ever experienced before it entered the night of the senses. Its purgation is still somewhat incomplete, and the purification of the senses is not yet finished and perfect. It is not without aridities, darkness, and trials, sometimes more severe than in the past. During the period of desolation it will have to endure much suffering from temptations against the theological virtues and against the moral virtues. It will also have to endure sometimes other diabolical attacks upon its imagination and senses. Also, God will permit natural causes to combine in afflicting the soul, such as the persecutions of men, and the ingratitude of friends. Patient suffering and resignation have to be borne during all these trials, and the devout soul should remember the encouraging words of the pious and learned Blosius: "Nothing more valuable can befall a man than tribulation, when it is endured with patience for the love of God; because there is no more certain sign of the divine election. But this should be understood quite as much of internal as of external trials, which people of a certain kind of piety forget." And again he says: "It is the chain of patient suffering that forms the ring with which Christ espouses a soul to Himself" (Institutio Spiritualis, viii, §3).

The Unitive Way.—The unitive is the way of those who are in the state of the perfect, that is those who have their minds so drawn away from all temporal things that they enjoy great peace, who are neither agitated by various desires nor moved by any great extent by passion, and who have their minds chiefly fixed on God and their attention turned, either always or very frequently, to Him. It is the union with God by love and the actual experience and exercise of that love. It is called the state of "perfect charity", because souls who have reached that state are ever prompt in the exercise of charity by loving God habitually and by frequent and efficacious acts of that Divine virtue. It is called the "unitive" way, because it is by love that the soul is united to God, and the more perfect the charity, the closer and the more intimate is the union. Union with God is the principal study and endeavour of this state. It is of this union St. Paul speaks when he says: "He who is joined to the Lord, is one spirit" (I Cor., vi. 17). Souls thus united to God are penetrated by the highest motives of the theological and moral virtues. In every circumstance of their lives the supernatural motive which ought to guide their actions is ever present to their mind, and the actions are performed under its inspiration with a force of will which makes their accomplishment easy and even delightful. These perfect souls are above all familiar with the doctrine and use of consolations and desolations. They are enlightened in the mysteries of the supernatural life, and they have experience of that truth proclaimed by St. Paul when he said: "We know that to them that love God, all things work together unto good, to such as, according to his purpose, are called to be saints" (Rom., viii, 28). The form of prayer suitable to persons in the unitive way is the contemplation of the glorious mysteries of Our Lord, His Resurrection, Appearances, and Ascension, until the coming

of the Holy Ghost, and the preaching of the Gospel. These mysteries may also be the subject of meditation for beginners and for those in a state of progress, but in a peculiar manner they belong to the perfect. Union with God belongs substantially to all souls in a state of grace, but it is in a special manner the distinguishing characteristic of those in the unitive way or in the state of the perfect.

It is in this state that the gift of contemplation is imparted to the soul, though this is not always the case; because many souls who are perfect in the unitive way never receive in this life the gift of contemplation and there have been numerous saints who were not mystics nor contemplatives, and who nevertheless excelled in the practice of heroic virtue. Souls, however, who have attained to the unitive state have consolations of a purer and higher order than others, and are more often favoured by extraordinary graces; and sometimes with the extraordinary phenomena of the mystical state, such as ecstasies, raptures, and what is known as the prayer of union. The soul is not, however, in this state always free from desolations and passive purgation. St. John of the Cross tells us that the purification of the spirit usually takes place after the purification of the senses. The night of the senses being over, the soul for some time enjoys, according to this eminent authority, the sweet delights of contemplation; then, perhaps when least expected, the second night comes, far darker and far more miserable than the first, and this is called by him the purification of the spirit, which means the purification of the interior faculties, the intellect and the will. The temptations which assail the soul in this state are similar in their nature to those which afflict souls in the illuminative way, only more aggravated, because felt more keenly; and the withdrawal of the consolations of the spirit which they have already experienced is their greatest affliction. To these trials are added others, peculiar to the spirit, which arise from the intensity of their love for God, for Whose possession they thirst and long. "The fire of Divine love can so dry up the spirit and enkindle its desire for satisfying its thirst that it turns upon itself a thousand times and longs for God in a thousand ways, as the Psalmist did when he said: For Thee my soul hath thirsted; for Thee my flesh, O how many ways" (St. John of the Cross, op. cit. infra, bk. II, xi). There are three degrees of this species of suffering designated by mystical writers as the "inflammation of love", the "wounds of love", and the "languor of love".

Spiritual States of Consolation and Desolation.—Consolation and desolation may be said to be phases of the various states or stages of the spiritual life, rather than distinct states in themselves. The character or permanence does not usually belong to them. They succeed each other, as a rule, and devout souls have to experience both the one and the other, but as they may have sometimes a long period of consolation or desolation the term *states* may be used in a wide sense when treating of them. Speaking in a general sense, the state of consolation is that in which the soul enjoys a spiritual sense or impression of close union and intimate converse with God. The state of desolation, on the contrary, is that in which the soul feels itself as it were abandoned by God. Consolation and desolation may be more easily understood when considered in opposition to each other.

Consolation.—In the spiritual order consolation is of three kinds. The first kind, which is known as "sensible consolation", is that which has its beginning and is felt chiefly in the senses or sensible faculties. It consists in sensible devotion and a feeling of fervour arising from the consideration of God's goodness vividly represented to the mind and heart; or from the external aids and ceremonies of the Church. It is not to be disregarded on this account because it leads us finally to good. St. Alphonsus says: "Spiritual consolations are gifts which are much more precious than all the riches and honours of the world. And if the sensibility itself is aroused, this completes our devotion, for then our whole being is united to God and tastes God" (Love for Jesus, xvii). The second kind of consolation, which is often the result of the first, and usually remains with the third, is characterized by a facility and even delight in the exercise of the virtues, especially the theological virtues. St. Ignatius says that any increase of faith, hope, and charity may be called a consolation (Rule 3 for the discernment of spirits). By this kind of consolation the soul is raised above the sensible faculties; and, in the absence of sensible consolation, truth is perceived at a glance, faith alone operating, enlightening, sustaining, and directing the soul, and fervour of the will succeeds to sensible fervour. We should be thankful to God for consolations of this kind and pray for their continuance, and it is these we ask for in the prayer "En ego" usually recited after Communion. The third kind of consolation affects the higher faculties of the soul, namely the intellect and the will, and in a more perfect way than the second. It consists in special tranquillity and peace of soul, and is the result of the firm determination of the will to live for God with entire confidence in His grace. It is present when, as St. Ignatius says, "the soul burns with the love of its Creator, and can no longer love any creature except for His sake" (Rule 3 for the discernment of spirits). The soul is conscious of its happiness, even though the inferior and sensible faculties may be depressed and afflicted. This is the most perfect kind of all, and it is not often experienced except by the perfect. As the first kind is said to belong to beginners in the way of perfection, the second to those making progress, so the third is said to belong to the perfect.

Desolation.—Spiritual desolation means the feeling of abandonment by God, and of the absence of His grace. This feeling of estrangement may arise from various causes. It may be the result of natural disposition or temperament, or of external circumstances; or it may come from the attacks of the devil; or from God Himself when for our greater good He withdraws from us spiritual consolation. In contradistinction to consolation spiritual desolation may be of three kinds. The first is called sensible desolation and is the opposite of sensible consolation. It includes aridities, dissipation of mind, weariness, and disgust in the exercises of piety; and it is often experienced by beginners in the practice of mental prayer. It may co-exist with consolation of a higher order, just as, in the natural order, we may feel pain of body and joy of soul at one and the same time. The second kind of desolation affects the intellect and will, and consists in the privation of the feeling of the presence of the supernatural virtues as described by St. Teresa in her Life (ch. xxx). This trial is extremely severe, but if generously accepted and patiently endured, it may be turned into great merit, and many fruits of sanctity will be the result. (See Letter of St. Francis of Sales to S. Jane Frances de Chantal, 28 March, 1612.) The third kind of desolation is still more severe. It is a darkening of the mind and a feeling of abandonment so great that the soul is tempted to distrust concerning salvation and is tormented by other terrible thoughts against faith, against purity, and even by blasphemous thoughts—the most painful experience which a holy soul has to endure (see St. John of the Cross, op. cit. infra, bk. I, ch. xiv). It would be a great mistake to imagine that spiritual desolation arrests progress in virtue or enfeebles the spirit of fervour. On the contrary, it affords occasion of heroic virtue and of absolute detachment from sensible pleasure, whether natural or supernatural. At the same time we may hope and wish that these interior griefs may be diminished or made to disappear, and we may pray God to deliver us from them, but if all our efforts are in vain, and God permits the desolation to continue, it only remains to resign ourselves generously to His Divine Will.

Directions.—For the better understanding of the three states or ways in their relations to each other and their effects upon souls tending towards perfection the following directions and observations may be useful.

(1) The three states or ways are not so entirely distinct that there may not appear in any one of them something of the other two. In each and all of them is found the effort and care to preserve and guard the soul from sin, though this is said to belong (appropriately) to the purgative way; in each, virtue has to be practised, and from its practice light and progress result. Again, in each of them the soul gives itself to God to live in Him and for Him the supernatural life which He imparts to it, and this may be said to be the commencement of the unitive way. The characteristic and distinctive feature of these states is determined by the form which is dominant in the soul in its efforts towards perfection. When strife and fear predominate, the soul is said to be still in the purgative way; when the desire and fervour to advance in virtue and the attraction of hope prevail above fear, then the soul is said to be in the illuminative way. If charity is dominant above all, the soul is in the unitive way; but so long as this mortal life lasts, for the strong and the feeble there will always be the labour and activity of purgation, illumination, and of union in the work of supernatural perfection. Suarez teaches this doctrine in very distinct terms. "These three states", he says, "are never so distinct that any one of them may not participate of the other two. Each of them takes its name and character from that which predominates in it. And it is certain that no one can attain to such a state of perfection in this life that he may not or cannot make further progress" (De Orat., l. II, c. xi, n. 4).

(2) According to the usual manner of advancement, the majority of souls are gradually raised to the state of perfect union after passing through the states of purification and illumination. But this rule is by no means absolute, and a miraculous intervention or an extraordinary grace may bring a soul suddenly from the lowest depths of moral abjection to the most sublime heights of charity, as may be seen in the case of St. Mary Magdalen and other celebrated penitent saints. On the other hand we may find saints in whom the purgative state may predominate even to the end of their lives, and God sometimes withholds the favours of the unitive way from many faithful and fervent souls who have advanced generously in the degrees of the purgative and illuminative ways, and who have all along preserved the fervour of holy charity, which is the essence and crown of perfection.

(3) As a rule, supernatural phenomena of mysticism appear in the most perfect state, namely that of union; one special favour of the mystical life, namely spiritual espousals, supposes the unitive way, and cannot be ascribed to either of the inferior grades of perfection. Many of the other mystical favours, such as ecstasies, visions, locutions, etc., may be found, by way of exception, in the less advanced stages of the spiritual life. As regards the gift of contemplation, although it is proper to those who are perfect in virtue and holiness, still it is sometimes granted to the imperfect and even to beginners so that they may taste of its sweetness. Souls by the exercise of Christian asceticism can prepare themselves for this intimate communication with God, but they should await with humility and patience the time and occasion in which they are to be introduced by their heavenly Spouse into the mystical state of contemplation.

(4) In order to decide as to the dispositions required for frequent and daily communion, it is no longer necessary for a spiritual director to find out or to judge whether a soul is in one or other of these states according to the rules laid down by some modern theologians. All that is now required, as stated in the first clause of the Decree of the Sacred Congregation of the Council of 20 Dec., 1905, is that the recipient be in a state of grace and approach the Holy Table with a right intention. As already stated, these three states are not easily distinguishable, and the lines of demarcation between them cannot easily be discerned, and therefore could not have been regarded as at any time very useful as a rule of guidance for frequent Communion. Now the rule is inapplicable, for those in the purgative way may receive Holy Communion just as often as those who are in the illuminative and unitive, as is evident from the Decree referred to. We are not, however, to suppose that the rules given by theologians and ascetical writers, founded as they are on the teaching of the ancient Fathers, with regard to Holy Communion according to the three states or ways no longer serve for edification. They indicate to us what is to be expected as the fruits of frequent Communion received worthily. Frequent Communion is the chief means of preserving and perfecting in our souls the spiritual life, and of supporting them in all its ways.

Arthur Devine.

States of the Church (Ital. *Lo Stato della Chiese*), the civil territory which for over 1000 years (754–1870) acknowledged the pope as temporal ruler. The expression "Patrimonium Sancti Petri" originally designated the landed possessions and revenues of various kinds that belonged to the Church of St. Peter at Rome. Until the middle of the eighth century this consisted wholly of private property, but the term was later applied to the States of the Church, and more particularly to the Duchy of Rome. Our subject may thus be conveniently treated under the following heads: I. Patrimony of St. Peter (tracing the origin of the States of the Church to the time of Charlemagne); II. History of the States of the Church.

I. Patrimony of St. Peter.—(1) *Patrimonial Possessions of the Church of Rome.*—The law of Constantine the Great (321), by which the Christian Church was declared qualified to hold and transmit property, first gave a legal basis to the possessions of the Church of Rome. Subsequently the possessions were rapidly augmented by donations. Constantine himself set the example, the Lateran Palace being most probably presented by him. Constantine's gifts formed the historical nucleus, which the Sylvester Legend later surrounded with that network of myth, that gave rise to the forged document known as the "Donation of Constantine". The example of Constantine was followed by wealthy families of the Roman nobility, whose memory frequently survived, after the families themselves had become extinct, in the names of the properties which they had once presented to the Roman See. The donation of large estates ceased about 600. The

Byzantine emperors subsequently were less liberal in their gifts; the wars with the Lombards likewise had an unfavourable effect, and there remained few families in a position to bequeath large estates. Apart from a number of scattered possessions in the Orient, Dalmatia, Gaul, and Africa, the patrimonies were naturally for the most part situated in Italy and on the adjacent islands. The most valuable and most extensive possessions were those in Sicily, about Syracuse and Palermo. The revenues from the properties in Sicily and Lower Italy in the eighth century, when Leo the Isaurian confiscated them, were estimated at three and one-half talents of gold. But the patrimonies in the vicinity of Rome were the most numerous and, after most of the remote patrimonies had been lost in the eighth century, were managed with especial care. Of other patrimonies may be mentioned the Neapolitan with the Island of Capri, that of Gaeta, the Tuscan, the *Patrimonium Tiburtinum* in the vicinity of Tivoli, estates about Otranto, Osimo, Ancona, Umana, estates near Ravenna and Genoa, and lastly properties in Istria, Sardinia, and Corsica.

With these landed possessions, scattered and varied as they were, the pope was the largest landowner in Italy. For this reason every ruler of Italy was compelled of necessity to reckon with him first of all; on the other hand he was also the first to feel the political and economical disturbances that distressed the country. A good insight into the problems that required the attention of the pope in the administration of his patrimonies can be obtained from the letters of Gregory the Great (Mon. Germ. Epist., I). The revenues from the patrimonies were employed, not only for administrative purposes, for the maintenance and construction of church edifices, for the equipment of convents, for the household of the pope, and the support of the clergy, but also to a great extent to relieve public and private want. Numerous poorhouses, hospitals, orphanages, and hospices for pilgrims were maintained out of the revenues of the patrimonies, many individuals were supported directly or indirectly, and slaves were ransomed from the possession of Jews and heathens. But, above all, the popes relieved the emperors of the responsibility of providing Rome with food, and later also assumed the task of warding off the Lombards, an undertaking generally involving financial obligations. The pope thus became the champion of all the oppressed, the political champion of all those who were unwilling to submit to foreign domination, who were unwilling to become Lombards or yet wholly Byzantines, preferring to remain Romans.

(2) *Political Position of the Papacy.*—This political aspect of the papacy became in time very prominent, inasmuch as Rome, after the removal of the imperial residence to the East, was no longer the seat of any of the higher political officials. Even after the partition of the empire, the Western emperors preferred to make the better-protected Ravenna their residence. Here was the centre of Odoacer's power and of the Ostrogothic rule; here also, after the fall of the Ostrogoths, the viceroy of the Byzantine emperor in Italy, the exarch, resided. In Rome, on the other hand, the pope appears with ever-increasing frequency as the advocate of the needy population; thus Leo I intercedes with Attila and Geiserich, and Gelasius with Theodoric. Cassiodorus as *præfectus prætorio* under the Ostrogothic supremacy actually entrusted the care of the temporal affairs to Pope John II. When Emperor Justinian issued the Pragmatic Sanction (554), the pope together with the Senate was entrusted with the control of weights and measures. Thenceforth for two centuries the popes were most loyal supporters of the Byzantine Government against the encroachments of the Lombards, and were all the more indispensable, because after 603 the Senate disappeared. They, too, were the only court of judicature at which the Roman population, exposed as it was to the extortion of the Byzantine functionaries and officers, could find protection and defence. No wonder then that at scarcely any other time was the papacy so popular in Central Italy, and there was no cause which the native population, who had again begun to organize themselves into bodies of militia, espoused with greater zeal then the freedom and independence of the Roman See. And naturally so, for they took part in the election of the pope as a separate electoral body.

When the Byzantine emperors, infected with cæsaro-papist tendencies, attempted to crush the papacy also, they found in the Roman militia an opposition against which they were able to accomplish nothing. The particularism of Italy awoke and concentrated itself about the pope. When Emperor Justinian II in 692 attempted to have Pope Sergius II (as formerly the unfortunate Martin I) forcibly conveyed to Constantinople to extract from him his assent to the canons of the Trullan Council, convoked by the emperor, the militia of Ravenna and of the Duchy of Pentapolis lying immediately to the south assembled, marched into Rome, and compelled the departure of the emperor's plenipotentiary. Such occurrences were repeated and acquired significance as indicating the popular feeling. When Pope Constantine, the last pope to go to Constantinople (710), rejected the confession of faith of the new emperor, Bardanas, the Romans protested, and refused to acknowledge the emperor or the *dux* (military ruler) sent by him. Not until news was brought that the heretical emperor had been replaced by one of the true Faith was the *dux* allowed to assume his office. That was in 713. Two years later the papal chair, which had last been occupied by seven Oriental popes, was filled by a Roman, Gregory II, who was destined to oppose Leo III the Isaurian in the Iconoclastic conflict. The time was ripening for Rome to abandon the East, turn toward the West, and enter into that alliance with the Germano-Romanic nations, on which is based our Western civilization, of which one consequence was the formation of the States of the Church. It would have been easy for the popes to throw off the Byzantine yoke in Central Italy as early as the time of Iconoclasm. If they resisted the impulse, it was because they correctly recognized that such an attempt would have been premature. They foresaw that the end of the Byzantine supremacy and the beginning of the Lombard power would have been encompassed at the same time. It was necessary first to establish the fact that the Byzantines could no longer protect the pope and the Romans against the Lombards, and then to find a power that could protect them. Both of these conditions were fulfilled in the middle of the eighth century.

(3) *Collapse of the Byzantine Power in Central Italy.*—The strange shape which the States of the Church were destined to assume from the beginning is explained by the fact that these were the districts in which the population of Central Italy had defended itself to the very last against the Lombards. The two chief districts were the country about Ravenna, the exarchate, where the exarch was the centre of the opposition, and the Duchy of Rome, which embraced the lands of Roman Tuscany north of the Tiber, and to the south the Campagna as far as the Garigliano, where the pope himself was the soul of the opposition. Furthermore, the greatest pains were taken, as long as it was at all possible, to retain control of the intervening districts and with them communication over the Apennines. Hence the strategic importance of the Duchy of the Pentapolis (Rimini, Pesaro, Fano, Sinigaglia, Ancona) and Perugia. If this strategic connexion were broken,

it was evident that Rome and Ravenna could not singly maintain themselves for any length of time. This was recognized by the Lombards also. The same narrow strip of land in fact broke the connexion between their Duchies of Spoleto and Benevento and the main portion of the king's territories in the north, and it was against this therefore that, from the second decade of the eighth century, they aimed their attacks with ever-increasing energy. In the beginning the popes were able repeatedly to wrest from their hands all that they had gained. In 728 the Lombard king Liutprand took the Castle of Sutri, which dominated the highway at Nepi on the road to Perugia. But Liutprand, softened by the entreaties of Pope Gregory II, restored Sutri "as a gift to the blessed Apostles Peter and Paul". This expression of the "Liber pontificalis" was erroneously interpreted to mean that in this gift the beginning of the States of the Church was to be recognized. This is incorrect inasmuch as the popes continued to acknowledge the imperial Government, and Greek officials appear in Rome for some time longer. True it is, however, that here for the first time we meet the association of ideas on which the States of the Church were to be constructed. The pope asked the Lombards for the return of Sutri for the sake of the Princes of the Apostles and threatened punishment by these sainted protectors. The pious Liutprand was undoubtedly susceptible to such pleas, but never to any consideration for the Greeks. For this reason he gave Sutri to Peter and Paul, that he might not expose himself to their punishment. What the pope then did with it would be immaterial to him.

The belief that the Roman territory (at first in the more restricted, but afterwards also in the wider sense) was defended by the Princes of the Apostles became more and more prevalent. In 738 the Lombard duke Transamund of Spoleto captured the Castle of Gallese, which protected the road to Perugia to the north of Nepi. By the payment of a large sum of money Gregory III induced the duke to restore the castle to him. The pope then sought by an alliance with Duke Transamund to protect himself against Liutprand. But Liutprand conquered Spoleto, besieged Rome, laid waste the Duchy of Rome, and seized four important frontier fortresses (Blera, Orte, Bomarzo, and Amelia), thereby cutting off the communication with Perugia and Ravenna. In this exigency the pope now (739) for the first time turned to the powerful Frankish kingdom, under the protection of which Boniface had begun his successful labours as a missionary in Germany. He sent to Charles Martel, "the powerful mayor of the palace" of the Frankish monarchy and the commander of the Franks in the famous battle at Tours, undoubtedly with the consent of the Greek *dux*, and appealed to him to protect the tomb of the Apostle. Charles Martel replied to the embassy and acknowledged the gifts, but was unwilling to offer aid against the Lombards, who were helping him against the Saracens. Accordingly the successor of Gregory III, Zacharias (the last Greek, who occupied the papal chair), changed the policy that had been previously followed toward the Lombards. He formed an alliance with Liutprand against Transamund, and received (741) in return the four castles. This Zacharias obtained as the result of a personal visit to the camp of the king at Terni. Liutprand also restored a number of patrimonies that had been seized by the Lombards, and furthermore concluded a twenty years' peace with the pope. The duchy now had a respite from Lombard attacks. The Lombards fell upon Ravenna, which they had already held from 731 to 735. The exarch had no other recourse than to seek the aid of the pope. Liutprand did in fact allow himself to be induced by Zacharias to surrender the greater part of his conquests. Nor was it unimportant that these districts too once owed their rescue to the pope. Only a short time after Liutprand's death (744) Zacharias was successful in further postponing the catastrophe. When Rachis, the Lombard king, was besieging Perugia (749), Zacharias so wrought upon his conscience that the king raised the siege. But as a result of this Rachis was overthrown, and Aistulf, who was put into his place, at once showed by his acts that no consideration could halt him in his course.

In 751 Aistulf conquered Ravenna, and thereby decided the long delayed fate of the exarchate and the Pentapolis. And when Aistulf, who held Spoleto also under his immediate sway, directed all his might against the Duchy of Rome, it seemed that this too could no longer be held. Byzantium could send no troops, and Emperor Constantine V Copronymus, in answer to the repeated requests for help of the new pope, Stephen II, could only offer him the advice to act in accordance with the ancient policy of Byzantium, to pit some other Germanic tribe against the Lombards. The Franks alone were powerful enough to compel the Lombards to maintain peace, and they alone stood in close relationship with the pope. It is true that Charles Martel had on a former occasion failed to respond to the entreaties of Gregory III. But meanwhile the relations between the Frankish rulers and the popes had become more intimate. Pope Zacharias had only recently (751), at Pepin's accession to the throne, spoken the word that removed all doubts in favour of the Carlovingian mayor of the palace. It was not unreasonable, therefore, to expect an active show of gratitude in return, when Rome was most grievously pressed by Aistulf. Accordingly Stephen II secretly sent a letter to Pepin by pilgrims, soliciting his aid against Aistulf and asking for a conference. Pepin in turn sent Abbot Droctegang of Jumièges to confer with the pope, and a little later dispatched Duke Autchar and Bishop Chrodengang of Metz to conduct the pope to the Frankish realm. Never before had a pope crossed the Alps. While Pope Stephen was preparing for the journey, a messenger arrived from Constantinople, bringing to the pope the imperial mandate to treat once more with Aistulf for the purpose of persuading him to surrender his conquests. Stephen took with him the imperial messenger and several dignitaries of the Roman Church, as well as members of the aristocracy belonging to the Roman militia, and proceeded first of all to Aistulf. In 753 the pope left Rome. Aistulf, when the pope met him at Pavia, refused to enter into negotiations or to hear of a restoration of his conquests. Only with difficulty did Stephen finally prevail upon the Lombard king not to hinder him in his journey to the Frankish kingdom.

(4) *Intervention of the Franks. Formation of the States of the Church.*—The pope thereupon crossed the Great St. Bernard into the Frankish kingdom. Pepin received his guest at Ponthion, and there promised him orally to do all in his power to recover the Exarchate of Ravenna and the other districts seized by Aistulf. The pope then went to St-Denis near Paris, where he concluded a firm alliance of friendship with the first Carlovingian king, probably in January, 754. He anointed King Pepin, his wife, and sons, and bound the Franks under the threat of excommunication never thereafter to choose their kings from any other family than the Carlovingian. At the same time he bestowed on Pepin and his sons the title of "Patrician of the Romans", which title, the highest Byzantine officials in Italy, the exarchs, had borne. Instead of the latter the King of the Franks was now to be the protector of the Romans. The pope in bestowing this title probably acted also in conformity with authority conferred on

him by the Byzantine emperor. In order, however, to fulfil the wishes of the pope Pepin had eventually to obtain the consent of his nobles to a campaign into Italy. This was rendered imperative, when several embassies, which attempted by peaceful means to induce the Lombard king to give up his conquests, returned without accomplishing their mission. At Quiercy on the Oise the Frankish nobles finally gave their consent. There Pepin executed in writing a promise to give to the Church certain territories, the first documentary record for the States of the Church. This document, it is true, has not been preserved in the authentic version, but a number of citations, quoted from it during the decades immediately following, indicate its contents, and it is likely that it was the source of the much interpolated "Fragmentum Fantuzzianum", which probably dates from 778–80. In the original document of Quiercy Pepin promised the pope the restoration of the lands of Central Italy, which had been last conquered by Aistulf, especially in the exarchate and in the Roman Duchy, and of a number of more or less clearly defined patrimonies in the Lombard Kingdom and in the Duchies of Spoleto and Benevento. The lands were not yet in Pepin's hands. They had therefore first to be conquered by Pepin, and his gift was conditioned by this event. In the summer of 754 Pepin with his army and the pope began their march into Italy, and forced King Aistulf, who had shut himself up in his capital, to sue for peace. The Lombard promised to give up the cities of the exarchate and of the Pentapolis, which had been last conquered, to make no further attacks upon or to evacuate the Duchy of Rome and the districts of Venetia and Istria, and acknowledged the sovereignty of the Franks. For the cities in the exarchate and in the Pentapolis, which Aistulf promised to return, Pepin executed a separate deed for the pope. This is the first actual "Donation of 754". But Pepin had hardly recrossed the Alps on his return home, when Aistulf not only failed to make preparations for the return of the promised cities, but again advanced against Rome, which had to endure a severe siege. The pope sent a messenger by sea, summoning Pepin to fulfil anew his pledge of loyalty. In 756 Pepin again set out with an army against Aistulf and a second time hemmed him in at Pavia. Aistulf was again compelled to promise to deliver to the pope the cities granted him after the first war and, in addition, Commachio at the mouth of the Po. But this time the mere promise was not considered sufficient. Messengers of Pepin visited the various cities of the exarchate and of the Pentapolis, demanded and received the keys to them, and brought the highest magistrates and most distinguished magnates of these cities to Rome. Pepin executed a new deed of gift for the cities thus surrendered to the pope, which together with the keys of the cities were deposited on the grave of St. Peter (Second Donation of 756).

The Byzantine Government naturally did not approve of this result of the intervention of the Franks. It had hoped through the instrumentality of the Franks to regain possession of the districts that had been wrested from it by the Lombards. But Pepin took up arms, not to render a service to the Byzantine emperor, but for the sake of St. Peter alone, from whose protection he expected earthly happiness and everlasting salvation. Just as kings at that time founded monasteries and endowed them with landed properties, that prayers might be offered for them there, so Pepin wished to provide the pope with temporal territories, that he might be certain of the prayers of the pope. Therefore Pepin answered the Byzantine ambassadors, who came to him before the second expedition of 756 and asked him to return to the emperor the cities to be taken from the Lombards, that he had undertaken the expedition for St. Peter alone and not for the emperor; that to St. Peter alone would he restore the cities. Thus did Pepin found the States of the Church. The Greeks undoubtedly had the formal right to the sovereignty, but as they had failed to meet the obligation of sovereignty to give protection against foreign enemies, their rights became illusory. If the Franks had not interfered, the territory would by right of conquest have fallen to the Lombards; Pepin by his intervention prevented Rome with the native population from falling into the hands of the foreign conquerors. The States of the Church are in a certain sense the only remnant of the Roman Empire in the West which escaped foreign conquerors. Gratefully did the Roman population acknowledge that they had escaped subjection to the Lombards only through the mediation of the pope. For it was only for the pope's sake that Pepin had resolved to interfere. The results were important, (a) chiefly because the pope through his temporal sovereignty received a guarantee of his independence, was freed from the fetters of a temporal power, and obtained that freedom from interference which is necessary for the conduct of his high office; (b) because the papacy threw off the political ties that bound it to the East and entered into new relations with the West, which made possible the development of the new Western civilization. The latter was destined to become especially prominent under Pepin's son, Charlemagne.

Under Charlemagne the relations with the Lombards soon became strained again. Adrian I complained that the Lombard king Desiderius had invaded the territories of the States of the Church, and reminded Charlemagne of the promise made at Quiercy. As Desiderius also championed the claims of Charlemagne's nephews, he endangered the unity of the Frankish kingdom, and Charlemagne's own interests therefore bade him to oppose Desiderius. In the autumn of 773 Charlemagne entered Italy and besieged Desiderius at Pavia. While the siege was in progress, Charlemagne went to Rome at Easter, 774, and at the request of the pope renewed the promises made at Quiercy. Soon after this Desiderius was forced to capitulate, and Charlemagne had himself proclaimed King of the Lombards in his place. Charlemagne's attitude toward the States of the Church now underwent a change. With the title of King of the Lombards he also assumed the title as "Patricius Romanorum", which his father had never used, and read into this title rights which under Pepin had never been associated with it. Moreover, differences of opinion arose between Adrian and Charlemagne concerning the obligations which had been assumed by Pepin and Charlemagne in the document of Quiercy. Adrian construed it to mean that Charlemagne should take an elastic concept of the "respublica Romana" to the extent of giving up not only the conquests of Aistulf in the exarchate and in the Pentapolis, but also earlier conquests of the Lombards in Central Italy, Spoleto, and Benevento. But Charles would not listen to any such interpretaion of the document. As both parties were anxious to come to an understanding, an agreement was reached in 781. Charlemagne acknowledged the sovereignty of Adrian in the Duchy of Rome and in the States of the Church founded by Pepin's donations of 754–56. He now executed a new document in which were enumerated all the districts in which the pope was recognized as ruler. The Duchy of Rome (which had not been mentioned in the earlier documents) heads the list, followed by the exarchate and the Pentapolis, augmented by the cities which Desiderius had agreed to surrender at the beginning of his reign (Imola, Bologna, Faenza, Ferrara, Ancona, Osimo, and Umana); next the patrimonies were specified in various groups: in the Sabine, in the Spoletan and Beneventan districts, in Calabria, in Tuscany, and in Corsica. Charlemagne, however, in his character as "Patricius", wanted to be considered as the highest court of appeal in criminal cases in the States of the Church. He promised on the other hand to protect freedom of choice in the election of the pope, and renewed the alliance of friendship that had been previously made between Pepin and Stephen II.

The agreement between Charlemagne and Adrian remained undisturbed. In 787 Charlemagne still further enlarged the States of the Church by new donations. Capua and a few other frontier cities of the Duchy of Benevento, besides several cities in Lombardy, Tuscany, Populonia, Roselle, Sovana, Toscanella, Viterbo, Bagnorea, Orvieto, Ferento, Orchia, Marta, and lastly Città di Castello appear to have been added at that time. All of this, of course, is based upon painstaking deductions, since no document has come down to us either from the time of Charlemagne or from that of Pepin. Adrian in these negotiations proved himself no mean politician, and is justly ranked with Stephen II as the second founder of the States of the Church. His arrangements with Charlemagne remained authoritative for the relations of the later popes with the Carlovingians and the German emperors. These relations were given a brilliant outward expression by Charlemagne's coronation as emperor in 800.

II. STATES OF THE CHURCH.—(1) *The Period of the Carlovingian Emperors.*—The States of the Church founded by the Carlovingians were the security for the friendly alliance between the papacy and the empire which dominated the Middle Ages. But this friendly alliance also was and remained the necessary condition for the existence of the States of the Church. Without the protection of the great power beyond the Alps the States of the Church could not have been maintained. The worst dangers threatened the States of the Church, not so much from foreign enemies, [illegible] from the factions of the nobility in the city of Rome, who were continually engaged in jealous quarrels, each striving to get control of the spiritual and temporal power attaching to the papacy. The degradation of the papacy reached its lowest point when it could obtain no protection from the empire against the lust for power of the factions of the Roman nobility or of the neighbouring patrician families. This lust for power manifested itself principally at the election of a new pope. For this reason the emperors, when they assumed the responsibility of protecting the States of the Church, also guaranteed a canonical election, and the popes laid great stress upon having this obligation renewed in writing by each new emperor in the confirmation of the old charters. Of these charters the oldest whose text is preserved is the "Hludovicianum" or *Pactum* of Louis the Pious, i. e. the instrument executed by that monarch for Paschal I in 817. With Paschal's successor, Eugene II, the friendly alliance was, by order of Louis, renewed in 824 by his eldest son and colleague in the empire, Lothair I. The pope, dependent on the protection of the emperor, then granted the emperor new rights, which mark the zenith of the imperial influence under the Carlovingians. The emperor received the right of supervising the government and the administration of justice at Rome through the instrumentality of permanent envoys, and no new pope was to be consecrated until he had, together with the Romans, taken the oath of allegiance to the emperor in the presence of imperial envoys.
